D99 1	Dec. 90	1967

PLAN AND USE OF THE MANUAL OF CLASSIFICATION

Locating patents in a field of technology or science embraced by the U. S. Patent Classification System requires a good measure of judgement applied to the continuous and coordinated use of three tools:

1. The Index to Classification
2. The Manual of Classification
3. The Class and Subclass Definitions

The Index is an alphabetical list of subject headings referring, by indicia numbers, to specific pertinent classes and subclasses for the classification system. The Index is particularly useful as an initial means of entry into the system for those either lacking experience in the use of the classification or unfamiliar with the particular technology under study.

The Manual of Classification lists the numbers and descriptive titles of all the classes and subclasses. Titles – more than 100,000 – are necessarily brief and thus indicative and not definitive. Hence, searches will be expedited by using the Manual as a key to the Definitions from the outset.

The Definitions comprise statements of the scope embraced by each of the official classes and subclasses (exclusive of the Plant Class and Designs), together with search notes directing the searcher to related subject matter in other classes and subclasses.

The Index and Manual may be purchased from the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402. Copies of Definitions – class by class – may be purchased from the Patent and Trademark Office, Information Resources Branch, Washington, D. C. 20231.

This Manual contains:

		Start on page
1.	A list of the contents of the Manual showing the current page date for each class and the year in which the class was originally classified.	CP-1
2.	A list showing an organization of science and technology into three main groups.	I-5
3.	A hierarachical arrangement of class titles in each main group by related subject matter.	I-6
4.	A list, in numerical order, of each examining group and art unit indicating examining group personnel, their location, and phone numbers	II-1
5.	A list in numerical order by art unit indicating the classification assigned each.	III-1
6.	A list of classifications, in numerical order by class number, giving the class title, the art unit to which it is assigned, and the examiner search room in which it can be found.	IV-1
7.	A list of classes in alphabetical order by class title giving the class number indicating where its schedule can be found in this Manual.	V-1
8.	The class schedules for PLANTS (page P-1).	PLT-1

9. Class schedules (i.e., listing of the subclasss titles and numbers arranged in organized order for each class) arranged in the numerical sequence by class number. 2-1

10. The Design classes (at the end of the Manual). D-1

UNOFFICIAL SUBCLASSES AND DIGESTS

Over a span of years Patent Examiners have created "unofficial" subclasses and digests to facilitate searches within the arts under their jurisdiction. An inventory of these patents in the Examiner search file has enabled listing unofficial subclasses and digests in the Manual of Classification.

In order to distinguish between an unofficial subclass and digest, the following definitions should be considered:

> Unofficial Subclass: A grouping of patents selected out from an official subclass by Examiner and then made an indented subclass under the official subclass with an alpha designation following the official numeric designation. Insofar as the original subclass then does not have all the patents officially classified therein, it is given the alpha designation "R" (indicating Residual). It may be noted that the numeric subclass equates to the residual subclass plus the unofficial subclasses indented thereunder, e.g., in Class 24, BUCKLES, BUTTONS, CLASPS, ETC., official subclass 129, One-piece, is shown as follows:
>
> 129R . One-piece
> 129B . . . Sheet material
> 129A . . . Slack adjuster
> 129D . . . Rubber
> 129C . . . Wire
> 129W . . . Swagged, deformable
>
> Note: The Public Search Room file comprises only those patents listed according to the official (numeric) classification.
>
> Digest: A collection of copies of patents based on a concept which relates to a class but not to any particular subclass of that class. It should be noted that the "original" classification of a patent cannot comprise a digest insofar as digests are "outside" of the official classification arrangement. The digests are listed in numeric sequence at the end of each class schedule.

There are no definitions for the unofficial subclasses, nor is it contemplated to define these subclasses beyond the context of the titles and the definitions of the official subclasses from which they were formed (R subs).

The unofficial subclasses have been "double indented" under the subclass from which they were formed as a indicator that rules of hierarchy do not apply to these subclass groupings, nor are any other of the rules of official classification applicable. These art collections are offered only to the extent they may be helpful as a search assist and should not necessarily be considered to be a complete collection of the art represented by the title.

HOW TO READ SUBCLASS TITLES AND DEFINITIONS

The full title of any subclass in a given class schedule includes: (1) the class title; and if applicable, any or all of (2) the title of most adjacent higher subclass in the first vertical column at the extreme left of the particular schedule; (3) the title of most adjacent higher subclass indented thereunder in the second vertical column; (4) the title of the most adjacent higher subclass indented thereunder in the third vertical column; and so on. For example, in Class 2, APPAREL, the full title of subclass 15 should read as:

> "APPAREL, GUARD'S AND PROTECTORS, Eye shields (e.g., hoodwinks or blinds, etc.).

Similarily, the definition of any subclass includes the definition of the class plus that of any subclasses under which it may be indented.

BASIS OF CLASSIFICATION

All patentable subject matter is created for an ulterior utility and this characteristic has been selected as the primary basis for classification. Arts or instruments having like functions, producing like products, or achieving like effects, are brought together, but the functions or effects that are chosen as a basis of classification must be proximate or essential, not remote or accidental.

GENERAL SCOPE OF CLASSES

The statutory categories of invention are product, process, apparatus, composition of matter, and certain varieties of plants. Classes may be made on the basis of any one or more of these.

Product, process, apparatus, and composition of matter may be in the same class (e.g., Class 131, Tobacco).

Process, apparatus, and plant varieties are all in Class 47, Plant Husbandry.

Processes, particularly mechanical, are commonly classified with the instruments specially adapted to aid in practicing them (e.g., Class 65, Glass Manufacturing).

Processes limited to the use of particular ingredients for producing a specified composition are classified with the composition (e.g., Class 23, Chemistry, Physical Processes; Class 106, Compositions, Coating or Plastic).

Products or fabricated shaped articles are sometimes classified in classes by themselves (e.g., Class 411, Expanded, Threaded, Driven, Headed, Tool-Deformed, or Locked-Threaded Fastener; Class 245, Wire Fabrics and Structure), but some are in classes associated with the processes and instruments for making them (e.g., Class 59, Chain, Staple and Horseshoe Making).

Accessories are generally classified with the instrument to which they are peculiar.

ARRANGEMENT OF SUBCLASSES

The subclasses in each class (other than class 130 and some Design classes) are generally arranged in the order of complexity or comprehensiveness of the inventions included therein. The complex wholes such as the "special" work and combined machines (or processes) come first, followed in the order named, by simple whole machines, the major parts, the minor parts, or details and accessories, and the residuum or "miscellaneous". Preceding subclasses are deemed "superior" to succeeding ones. This order of subclasses permits a uniformity in assigning disclosures containing features classifiable in more than one subclass. The basic rule is to assign one patent copy (original) corresponding to a claimed invention to the first appearing of a series of coordinate subclasses that may properly receive it, and place additional (cross-reference) copies where appropriate in the later appearing subclass or subclasses, adapted to receive its parts. In a class having the subclasses arranged according to this rule, no "original" patent copy should be found in any coordinate subclass following the one properly entitled to receive it, although it may be found either in preceding subclasses as a part of some other organization, or in an indented more specific subclass.

A "rule" of superiority and inferiority applies also to patents containing subject matter classifiable in more than one class, the patent being assigned to the class designed to receive the largest claimed combination with a cross-reference, if necessary, for other claimed disclosures to the more elemental classes. Between classes, however, the positional relationship (hierarachy) that exists between subclasses of the same class does not obtain, and "superiority" and "inferiority" is given only by the Definitions.

Illustrated or other disclosed matter not claimed as a part of the invention, if classified, may be placed by cross-reference.

SUGGESTIONS FOR SEARCH

If the use of the Index to the classification fails to reveal a restricted field of search the following is a suggested procedure for delineating a field of search:

(1) Determine what is the essential function or effect of the art or instrument to be sought.

(2) Scan the titles in the major groupings at the front of the Manual or in the numerical or alphabetical list of class titles and note those that appear to include the invention sought.

(3) Note particularly that one which has the most intensive or specific title that includes the invention.

(4) Inspect carefully the class definition and notes thereto.

(5) If the class definition indicates the selected class as the proper one, scan the schedule of subclasses of the selected class, inspecting first the major coordinate subclasses whose titles begin farthest to the left and the initial letters of which are arranged in vertical alignment.

(6) Select the first appearing major subclass title that includes a characteristic of the invention and study the definitions thereof.

(7) If the major subclass definition includes the invention, scan the schedule of minor subclasses indented one place to the right immediately under the selected major subclass, selecting the first appearing title to include an additional characteristic of the invention.

(8) So proceed until the most specific minor subclass is reached whose title and definition indicate the inclusion of the invention in question, and then inspect the art composing it.

(9) If this subclass contains nothing pertinent, search the more generic subclasses under which it is indented, the miscellaneous subclasses, and those above it, the titles of which indicate the possibility that they may include the thing sought.

(10) If the pertinent art is still not found, search the other possible classes noted in step 2 in the same way.

Failure to find any pertinent art usually indicates that the proper place in the classification has not been located. The classifiers engaged in creating new, and maintaining the existing, classifications are always available for consultation in outlining fields of search.

Note: In the Index, the plus sign adjacent a subclass number refers to all the subclasses indented thereunder.

PATENT OFFICE CLASSES

Arranged by Related Subjects

Main Groups

I. CHEMICAL AND RELATED ARTS

II. COMMUNICATIONS, DESIGNS, RADIANT ENERGY, WEAPONS, ELECTRICAL, AND RELATED ARTS

III. BODY TREATMENT AND CARE, HEATING AND COOLING, MATERIAL HANDLING AND TREATMENT, MECHANICAL MANUFACTURING, MECHANICAL POWER, STATIC, AND RELATED ARTS

Note: In the following lists, classes preceded by an asterisk (e.g., *75) appear more than once. Subject titles used at times differ from class titles.

Class	Subject
505	SUPERCONDUCTOR TECHNOLOGY - APARATUS, MATERIAL, PROCESS Subclass 1 involving material superconducting above 30° Kelvin and Subclasses 800–933 for art collections on superconductor technology.
437	SEMICONDUCTOR DEVICE MANUFACTURING: PROCESS
156	ADHESIVE BONDING AND MISCELLANEOUS CHEMICAL MANUFACTURE (III, Class 428 for products of this class)
8/94.1-142	BLEACHING AND DYEING: FLUID TREATMENT AND CHEMICAL MODIFICATION OF TEXTILES AND FIBERS
400–696	(III, Class 8, Manipulative fluid treatment; Class 68, Textiles, Fluid Treating Apparatus)
427	COATING PROCESSES (III, Classes 101 and 118 for printing and coating apparatus)
134/1–42	CLEANING AND LIQUID CONTACT WITH SOLIDS (III, Class 134 for apparatus)
419	POWDER METALLURGY - PROCESSES
•75	SPECIALIZED METALLURGICAL PROCESSES, ETC. (II, Class 75 rare refractory or radioactive) (metals, consolidated metal powder compositions)
148	METAL TREATMENT
65	GLASS MANUFACTURING
264	PLASTIC AND NONMETALLIC ARTICLE SHAPING OR TREATING: PROCESSES (II, Class 264 for treating of explosive or radioactive material)
426	FOOD OR EDIBLE MATERIAL: PROCESSES, COMPOSITIONS AND PRODUCTS (III, Class 99 treating apparatus)
162	PAPER MAKING AND FIBER LIBERATION
201	DISTILLATION: PROCESSES, THERMOLYTIC

Class	Subject
202	DISTILLATION: APPARATUS
203	DISTILLATION: PROCESSES, SEPARATORY
48	GAS, HEATING AND ILLUMINATING
430	RADIATION IMAGERY CHEMISTRY - PROCESS, COMPOSITION OR PRODUCT
512	PERFUME COMPOSITIONS
252	COMPOSITIONS (Miscellaneous) (In some instances compositions specialized to a particular art are classified with that art, e.g. Class 51, etc.) (II, Class 52, Radioactive material)
502	CATALYST, SOLID SORBENT, OR SUPPORT THEREFOR, PRODUCT OR PROCESS OF MAKING
424 and 514	DRUG, BIO-AFFECTING AND BODY TREATING COMPOSITIONS (II, Class 424, for radioactive medicine)
71	CHEMISTRY, FERTILIZERS
44	FUEL AND RELATED COMPOSITIONS
•210/ 500.1+	LIQUID PURIFICATION OR SEPARATION (Filter Material)
•51/293+	ABRADING (Material) (III, Class 51 for abrading machines and processes)
520 - 528	CHEMISTRY, SYNTHETIC RESINS OR NATURAL RUBBERS (see the 520 Series of classes)
106	COMPOSITIONS, COATING OR PLASTIC
420	ALLOYS OR METALLIC COMPOSITIONS (II, Class 420 radioactive)
501	COMPOSITIONS: CERAMIC
436	CHEMISTRY: ANALYTICAL AND IMMUNOLOGICAL TESTING
23	CHEMISTRY, PHYSICAL PROCESSES
435	CHEMISTRY, MOLECULAR BIOLOGY AND MICROBIOLOGY
429	CHEMISTRY, ELECTRICAL CURRENT PRODUCING APPARATUS, PRODUCT AND PROCESS

Class	Subject
136	BATTERIES, THERMOELECTRIC AND PHOTOELECTRIC
204	CHEMISTRY, ELECTRICAL AND WAVE ENERGY (II, Class 204 for actinide series elements)
423	CHEMISTRY, INORGANIC (II, Class 423 for actinide series compounds)
518	CHEMISTRY, FISCHER-TROPSCH PROCESSES: OR PURIFICATION OR RECOVERY OF PRODUCTS THEREOF
*260 and 530-585	CHEMISTRY, CARBON COMPOUNDS (II, Class 260 for radioactive metal, rare earth metal or nitro containing compounds (see also Classes 530-585)
208	MINERAL OILS: PROCESSES AND PRODUCTS
196	MINERAL OILS: APPARATUS
127	SUGAR, STARCH, AND CARBOHYDRATES (See notes to the definitions of Class 422 for distribution of this art).
422	PROCESS DISINFECTING, DEODORIZING, PRESERVING OR STERILIZING, AND CHEMICAL APPARATUS
62/4, 8, 44, 532-545	REFRIGERATION (III, Class 62, Refrigeration, generally)
55	GAS SEPARATION
261	GAS AND LIQUID CONTACT APPARATUS
159	CONCENTRATING EVAPORATORS
210	LIQUID PURIFICATION OR SEPARATION
503	RECORD RECEIVER HAVING PLURAL LEAVES OR A COLORLESS COLOR FORMER, METHOD OF USE OR DEVELOPER THEREFOR
428	STOCK MATERIAL OR MISCELLANEOUS ARTICLES

Class	Subject
935	GENETIC ENGINEERING: RECOMBINANT DNA TECHNOLOGY, HYBRID OR FUSED CELL TECHNOLOGY AND RELATED MANIPULATIONS OF NUCLEIC ACIDS (Cross-Reference Art Collection)

Class	Subject
505	SUPERCONDUCTOR TECHNOLOGY - APPARATUS, MATERIAL, PROCESS subclass 1 involving material superconducting above 30° Kelvin and Subclasses 800-933 for art collections on superconductor technology.
	RADIOACTIVE AND ACTINIDE
376	INDUCED NUCLEAR REACTIONS, SYSTEMS AND ELEMENTS
423/2-20, 249-261	CHEMISTRY, INORGANIC (actinide series compound) (I, Class 423, Chemistry, Inorganic)
•75/84	METALLURGY (rare or radioactive articles; powder metallurgy) (I, Class 75, Metallurgy alloys and refining)
419	Powder Metallurgy - Processes
75	Rare, refractory or radioactive metals, consolidated metal powder compositions (I, Class 75 Specialized metallurgical processes, etc., remainder)
420	ALLOYS OR METALLIC COMPOSITIONS (Radioactive) (I, 420, Alloys or Metallic Compositions, remainder)
424/1.1, 1.5	DRUG, BIO-AFFECTING AND BODY TREATING COMPOSITIONS (radioactive) (I, Class 424, Drug, Bio-Affecting and Boby Treating Compositions, generally)
204/1.5	CHEMISTRY, ELECTRICAL AND WAVE ENERGY (actinide series element) (I, Class 204, Chemistry, Electrical and Wave Energy, generally)
252/ 478, 517	COMPOSITIONS (radioactive) [I, Class 252, Compositions (Miscellaneous)]
	ORGANIC COMPOUNDS
534/10 +	Radioactive Metal Containing
14 +	Rare Earth Metal Containing
568/924 +	NITRO CONTAINING (I, Class 260 and 530- 585, Chemistry, Organic Compounds generally)
264/0.5, 3.1 +	PLASTIC SHAPING (radioactive or explosive material) (I, Class 264, Plastic and Nonmetallic Article Shaping or Treating: Processes)
930	PEPTIDE OR PROTEIN SEQUENCE

Class	Subject
380	CRYPTOGRAPHY
340	COMMUNICATIONS, ELECTRICAL
358	PICTORIAL COMMUNICATION; TELEVISION
382	IMAGE ANALYSIS
342	COMMUNICATIONS, DIRECTIVE RADIO WAVE SYSTEMS AND DEVICES (E.G., RADAR, RADIO NAVIGATION)
343	COMMUNICATIONS, RADIO WAVE ANTENNAS
370	MULTIPLEX COMMUNICATIONS
381	ELECTRICAL AUDIO SIGNAL PROCESSING SYSTEMS, AND DEVICES
379	TELEPHONIC COMMUNICATIONS
178	TELEGRAPHY
375	PULSE OR DIGITAL COMMUNICATIONS
455	TELECOMMUNICATIONS
341	CODED DATA GENERATION OR CONVERSION
367	COMMUNICATIONS, ELECTRICAL: ACOUSTIC WAVE SYSTEM AND DEVICES
334	TUNERS
332	MODULATORS
329	DEMODULATORS
116	SIGNALS AND INDICATORS
	CALCULATORS, COMPUTERS OR DATA PROCESSING SYSTEMS
371	ERROR DETECTION/CORRECTION AND FAULT DETECTION/RECOVERY
•364/737	ARITHMETICAL ERRORS
•235/375	REGISTERS (Systems Controlled by Data Bearing Records
400	(Ordnance or Weapon System Computers) (Record Controlled Calculators)
364	ELECTRICAL COMPUTERS AND DATA PROCESSING SYSTEMS

Class	Subject
	CALCULATORS, COMPUTERS OR DATA PROCESSING SYSTEMS - (cont)
377	ELECTRICAL PULSE COUNTERS, PULSE DIVIDERS OR SHIFT REGISTERS: CIRCUITS AND SYSTEMS
902	ELECTRONIC FUNDS TRANSFER
*235/61	REGISTERS (Mechanical Calculators)
	INFORMATION STORAGE
369	DYNAMIC INFORMATION STORAGE OR RETRIEVAL
360	DYNAMIC MAGNETIC INFORMATION STORAGE OR RETRIEVAL
365	STATIC INFORMATION STORAGE AND RETRIEVAL
*235/435	REGISTERS (Coded Sensors)
346	RECORDERS
	MEASURING, TESTING, PRECISION INSTRUMENTS (I, Class 23, Chemical Testing)
73	MEASURING AND TESTING
324	ELECTRICITY, MEASURING AND TESTING
*250/250	WAVEMETERS
356	OPTICS, MEASURING AND TESTING
368	HOROLOGY, TIME MEASURING SYSTEMS OR DEVICES
374	THERMAL MEASURING AND TESTING
177	WEIGHING SCALES
33	GEOMETRICAL INSTRUMENTS
*250	RADIANT ENERGY (I, Class 204, Chemistry, Electrical and Wave Energy)
378	X-RAY OR GAMMA RAY SYSTEMS OR DEVICES

Class	Subject
	RADIANT ENERGY - (cont)
*250/ 316.1-319, 330-334 338-353	INFRARED RAY
372	COHERENT LIGHT GENERATORS
350	OPTICS, SYSTEMS AND ELEMENTS
351	OPTICS, EYE EXAMINING, VISION TESTING AND CORRECTING
352	OPTICS, MOTION PICTURES
354	PHOTOGRAPHY (Note: Class 430, Photographic Chemistry, Processes and Material, I)
355	PHOTOCOPYING
353	OPTICS, IMAGE PROJECTORS
362	ILLUMINATION
84	MUSIC (Horns, Whistles, Sirens, Bells, Compressional Wave Generators, Class 116, Signals and Indicators, subs. 137 to 172; Class 340, Communications, Electrical, subs. 384 +)
181	ACOUSTICS
361	ELECTRICITY, ELECTRICAL SYSTEMS AND DEVICES (Nonelectrical device with electrical operation or control is classified with nonelectrical device)
219	ELECTRIC HEATING (Nonelectric Heating, III)
392	ELECTRIC RESISTANCE HEATING DEVICES
373	INDUSTRIAL ELECTRIC HEATING FURNACES
290	PRIME-MOVER DYNAMO PLANTS (III, Power Plants and Nonelectric Motors)
318	ELECTRICITY, MOTIVE POWER SYSTEMS
388	ELECTRICITY, MOTOR CONTROL SYSTEMS
187/29	ELEVATORS (electric control) (III, Class 187, Elevators Structure)
320	ELECTRICITY, BATTERY AND CONDENSER CHARGING AND DISCHARGING

Class	Subject
331	OSCILLATORS
330	AMPLIFIERS
328	MISCELLANEOUS ELECTRON SPACE DISCHARGE DEVICE SYSTEMS
*307/400-430	MISCELLANEOUS NONLINEAR REACTOR SYSTEMS
*307/200+	MISCELLANEOUS NONLINEAR SOLID STATE DEVICE CIRCUITS
333	WAVE TRANSMISSION LINES AND NETWORKS
363	ELECTRICAL POWER CONVERSION SYSTEMS
323	ELECTRICITY, POWER SUPPLY, OR REGULATION SYSTEMS
315	ELECTRIC LAMP AND DISCHARGE DEVICES, SYSTEMS
314	ELECTRIC LAMP AND DISCHARGE DEVICES, CONSUMABLE ELECTRODES
322	ELECTRICITY, SINGLE GENERATOR SYSTEMS
	ELECTRICITY, HEATING
*307	MISCELLANEOUS SYSTEMS
313	ELECTRIC LAMP AND DISCHARGE DEVICES
357	ACTIVE SOLID STATE DEVICES, E.G., TRANSISTORS, SOLID STATE DIODES
310	ELECTRICAL GENERATOR OR MOTOR STRUCTURE
335	ELECTRICITY, MAGNETICALLY OPERATED SWITCHES, MAGNETS AND ELECTROMAGNETS (Class 200, Electricity, Circuit Makers and Breakers, below, for mechanically actuated switches in general, and Class 337, Electricity, Electrothermally or Thermally Actuated Switches, below, for thermally actuated switch structures)
	ELECTRICITY, HEATING - (cont)
337	ELECTRICITY, ELECTROTHERMALLY OR THERMALLY ACTUATED SWITCHES (Class 200, Electricity, Circuit Makers and Breakers, below, for mechanically actuated switches in general, and Class 335, Electricity, Magnetically Actuated Switches, Magnets and Electromagnets, above, for magnetically actuated switch structures)
336	INDUCTOR DEVICES
361/433+	ELECTROLYTIC DEVICES (I, Classes 136, Batteries and 204, Chemistry, Electrical and Wave Energy
361/271+	CAPACITOR DEVICES
338	ELECTRICAL RESISTORS
200	ELECTRICITY, CIRCUIT MAKERS AND BREAKERS (Class 335, Electricity, Magnetically Actuated Switches, Magnets and Electromagnets, above, for magnetically actuated switches, and Class 337, Electricity, Electrothermally or Thermally Actuated Switches, above, for thermally actuated switches)
174	ELECTRICITY, CONDUCTORS AND INSULATORS
	AMMUNITION, WEAPONS
89	ORDNANCE (III, Class 124, Mechanical guns and projectors)
244/14	AIRCRAFT, TORPEDOES (III, Class 244, Aircraft Structure)
114/20-25	SHIPS (III, Class 114, Ship Structure)
42	FIREARMS
102	AMMUNITION AND EXPLOSIVES
149	EXPLOSIVE AND THERMIC COMPOSITIONS OR CHARGES
86	AMMUNITION AND EXPLOSIVE CHARGE MAKING
D-1 to D-99	DESIGNS

Class	Subject
505	SUPERCONDUCTOR TECHNOLOGY - APPARATUS, MATERIAL, PROCESS subclass 1 involving material superconducting above 30° Kelvin and Subclasses 800-933 for art collections on superconductor technology
	BODY TREATMENT CARE, ADORNMENT (I, Class 424, Drug, Bio-Affecting and Body Treating Compositions)
433	Dentistry
623	Prosthesis (i.e., Artificial Body Members), Parts Thereof or Aids and Accessories Therefor
128	Surgery
600	Surgery
604	Surgery
606	Surgery

12	Boot and Shoe Making
69	Leather Manufactures
112	Sewing
	PLANT AND ANIMAL HUSBANDRY (Note: Class 100, Presses, for balers; Class 289, Knots and Knot Tying; Class 460, Crop Threshing or Separating
PLT	Plants
449	Bee Culture
452	Butchering
	PLANT AND ANIMAL HUSBANDRY - (cont)
43	Fishing, Trapping and Vermin Destroying
47	Plant Husbandry
119	Animal Husbandry
54	Harness
168	Farriery
231	Whips and Whip Apparatus
	TEACHING
434	Education and Demonstration (II, for navigation and radar)
40	Card, Picture and Sign Exhibiting
272	AMUSEMENT AND EXERCISING DEVICES
273	Amusement Devices, Games
446	Amusement Devices, Toys
124	Mechanical Guns and Projectors
99/275-450	FOOD PREPARING AND TREATING APPARATUS (I, Food Compositions and Processes)
	HEATING, COOLING (II, Electric Heating)
62	Refrigeration (I, Liquified gas)
237	Heating Systems
236	Automatic Temperature and Humidity Regulation
432	Heating
122	Liquid Heaters and Vaporizers
126	Stoves and Furnaces
431	Combustion
110	Furnaces (Solid or Combined Fuels)
165	Heat Exchange

Class	Subject
	BUILDINGS
135	Tents, Canopies, Umbrellas and Canes
109	Safes, Bank Protection and Related Devices
52	Static Structures, e.g., Buildings
14	Bridges
404	Road Structure, Process and Apparatus
182	Fire Escapes, Ladders, Scaffolds
220	RECEPTACLES
312	Supports, Cabinet Structures
190	Trunks and Hand Carried Luggage
206	Special Receptacle or Package
215	Bottles and Jars
229	Envelopes, Wrappers and Paperboard Boxes
150	Purses, Wallets, and Protective Covers
383	Flexible Bags
217	Wooden Receptacles
248	SUPPORTS
5	Beds
297	Chairs and Seats
211	Supports, Racks
108	Horizontally Supported Planar Surfaces
	CLOSURES, PARTITIONS, PANELS (Building and receptacle classes for other closures, partitions, and panels)
*267	Spring Devices (Support Type)
49	Movable or Removable Closures
160	Closures, Partitions and Panels, Flexible and Portable
256	Fences
	TEXTILES
8/147-159	Bleaching and Dyeing; Fluid Treatment and Chemical Modification of Textiles and Fibers (I, for processes and compositions)
245	Wire Fabrics and Structure
289	Knots and Knot Tying
28	Textiles, Manufacturing
26	Textiles, Cloth Finishing
66	Textiles, Knitting
87	Textiles, Braiding, Netting and Lace Making
139	Textiles, Weaving
57	Textiles, Spinning, Twisting and Twining
19	Textiles, Fiber Preparation
	EARTH WORKING AND AGRICULTURAL MACHINERY
405	Hydraulic and Earth Engineering
299	Mining or In Situ Disintegration of Hard Material
166	Wells
175	Boring or Penetrating the Earth
111	Planting
171	Unearthing Plants or Buried Objects
37	Excavating
56	Harvesters
172	Earth Working
194	CHECK-ACTUATED CONTROL MECHANISMS
	DISPENSING (For the distribution of this art see notes to definitions of Class 222, Dispensing, and Class 220, Receptacles)
453	Coin Handling
141	Fluent Material Handling, with Receiver or Receiver Coacting Means

Class	Subject
	DISPENSING- (cont)
169	Fire Extinguishers
291	Track Sanders
239	Fluid Sprinkling, Spraying and Diffusing
222	Dispensing
221	Article Dispensing
232	Deposit and Collection Receptacles
414	MATERIAL OR ARTICLE HANDLING
258	Railway Mail Delivery
186	Merchandising
406	Conveyors, Fluid Current
212	Traversing Hoists
198	Conveyers, Power-Driven
•187	Elevators (II, Electric control)
193	Conveyers, Chutes, Skids, Guides and Ways
224	Package and Article Carriers
294	Handling, Hand and Hoist-Line Implements (Class 81, Tools)
•901	Robots •Accepts No Applications
137	FLUID HANDLING
98	Ventilation
4	Baths, Closets, Sinks and Spittoons
138	Pipes and Tubular Conduits
251	Valves and Valve Actuation
	VEHICLES
244	Aeronautics (II, for aerial torpedoes)
114	Ships (II, for torpedoes)
441	Buoys, Rafts, and Aquatic Devices
	VEHICLES - (cont)
440	Marine Propulsion
191	Electricity, Transmission to Vehicles
104	Railways
246	Railway Switches and Signals
105	Railway Rolling Stock
238	Railways, Surface Track

298	Land Vehicles, Dumping
180	Motor Vehicles
296	Land Vehicles, Bodies and Tops
	Parts (Mechanisms and Machine Elements, below)
301	Land Vehicles, Wheels and Axles
295	Railway Wheels and Axles
152	Resilient Tires and Wheels
305	Wheel Substitutes for Land Vehicles
213	Railway Draft Appliances
278	Land Vehicles, Animal Draft Appliances
293	Vehicle Fenders
•267/2-68, 140.1-141.7	Spring Devices
410	FREIGHT ACCOMMODATION ON FREIGHT CARRIER
	MOTORS, ENGINES, PUMPS (II, Electricity, for electric motors)
60	Power Plants (I, for chemical reaction motors)
123	Internal-Combustion Engines
417	Pumps
91	Motors, Expansible Chamber Type
415	Rotary Kinetic Fluid Motors or Pumps
416	Fluid Reaction Surfaces (i.e., Impellers)

MOTORS, ENGINES, PUMPS - (cont)

Class	Subject
185	Motors, Spring, Weight and Animal Powered
418	Rotary Expansible Chamber Devices
92	Expansible Chamber Devices

COATING, PRINTING, AND PRINTED MATERIAL; STATIONARY, BOOKS

Class	Subject
118	Coating Apparatus (I, Class 427, Coating Processes)
184	Lubrication
101	Printing
400	Typewriting Machines
199	Type Casting
276	Type Setting
401	Coating Implements with Material Supply
281	Books, Strips and Leaves
282	Manifolding
283	Printed Matter

MANUFACTURING, ASSEMBLING, INCLUDING SOME CORRELATIVE MISCELLANEOUS PRODUCTS

Class	Subject
164	Metal Founding
266	Metallurgical Apparatus
*29/1-25.42, 81-91.8, 560, 560.1	Metal Working (General Manufacturing)
412	Bookbinding: Process and Apparatus
53	Package Making
59	Chain, Staple and Horseshoe Making
76	Metal Tools and Implements, Making
79	Button Making

MANUFACTURING, ASSEMBLING, INCLUDING SOME CORRELATIVE MISCELLANEOUS PRODUCTS - (cont)

Class	Subject
493	Manufacturing Container or Tube from Paper; or Other Manufacturing from a Sheet or Web
131	Tobacco
147	Coopering
157	Wheelwright Machines
163	Needle and Pin Making
227	Elongated-Member-Driving Apparatus
270	Sheet-Material Associating
300	Brush, Broom and Mop Making
445	Electric Lamp or Space Discharge Component or Device Manufacturing
*29/ 148.3-179, 400-426.6, 428-559, 569-623.5, 631, 825-885	Metal Working (Methods)
*29/700-824	Metal Working (Assembling Apparatus)
*29/650	Plural Diverse Manufacturing Apparatus

CUTTING, COMMINUTING, AND MACHINING

Class	Subject
234	Selective Cutting (e.g. Punching)
460	Crop Threshing or Separating
241	Solid Material Comminution or Disintegration
10	Bolt, Nail, Nut, Rivet and Screw Making
*29/26-80 561-568	Metal Working (Miscellaneous Machining)
407	Cutters, For Shaping
30	Cutlery
51	Abrading
408	Cutting by Use of Rotating Axially Moving Tool

Class	Subject
	CUTTING, COMMINUTING, AND MACHINING - (cont)
82	Turning
83	Cutting
409	Gear Cutting, Milling, or Planing
125	Stone Working
144	Woodworking
142	Wood Turning
225	Severing by Tearing or Breaking
	PLASTIC DEFORMATION, PRESSING, OR TREATING (I, Plastics)
72	Metal Deforming
425	Plastic Article or Earthenware Shaping or Treating: Apparatus (I, Class 264, Plastic and Nonmetallic Article Shaping or Treating: Processes)
100	Presses
413	Sheet Metal Container Making
140	Wireworking
228	Metal Fusion Bonding
249	Static Molds
	MISCELLANEOUS TREATING (I, for chemical treatment and physical separation)
494	Imperforate Bowl, Centrifugal Separators
209	Classifying, Separating and Assorting Solids
366	Agitating
•134	Cleaning and Liquid Contact with Solids (I, for cleaning processes)
34	Drying and Gas or Vapor Contact With Solids
68	Textiles, Fluid Treating Apparatus
38	Textiles, Ironing or Smoothing
15	Brushing, Scrubbing and General Cleaning

Class	Subject
	HANDLING OR STORING SHEETS, WEBS, STRANDS, AND CABLE
402	Binder Device Releasably Engaging Aperture or Notch of Sheet
226	Advancing Material of Indeterminate-Length
242	Winding and Reeling
•254/ 199-417	Implements or Apparatus for Applying Pushing or Pulling Force (Cable Hauling or Strand Placing)
271	Sheet Feeding or Delivering
74	MACHINE ELEMENTS AND MECHANISMS
475	Planetary Gear Transmission Systems and Components
474	Endless Belt Power Transmission Systems and Components
•29/110-132	Metal Working (Rolls)
464	Rotary Shafts, Gudgeons, Housings and Flexible Couplings for Rotary Shafts
384	Bearings
173	Tool Driving or Impacting
188	Brakes
192	Clutches and Power-Stop Control
•254/ 1-134.7 418,427	Implements or Apparatus for Applying Pushing or Pulling Force (Force Multipliers)
269	Work Holders
303	Fluid-Pressure Brake and Analogous Systems
•16/1-220	MISCELLANEOUS HARDWARE
70	Locks
•267	Spring Devices

Class	Subject
	TOOLS
7	Compound Tools
*29/213-283	Metal Working (Assembling Devices)
81	Tools
403	JOINTS AND CONNECTIONS
439	Electrical Connectors
285	Pipe Joints or Couplings
*16/221-392	Miscellaneous Hardware (Hinges)
279	Chucks and Sockets
277	Joint Packing
	FASTENINGS
292	Closure Fasteners
24	Buckles, Buttons, Clasps, etc.
411	Expanded, Threaded, Driven, Headed, Tool-Deformed, or Locked-Threaded Fastener

Class 260 is being reclassified in steps by forming new classes from parts of it. The new class numbers are in numerical order according to the hierarchy of the whole system. For subject matter that has not been reclassified, 260 appears in the "Class" column.

CLASS	SUBJECT MATTER
260	Miscellaneous
518	Fischer-Tropsch reactions
520	Synthetic Resins and Natural Rubbers
521	.Ion Exchange Resins; Cellular (Foams) Products
522	.Prepared By Wave Energy
523, 524	.With Non-reactive Additives
525	.Mixed Synthetic Resins, Block or Graft Copolymers; Chemical Modification of Solid Synthetic Resins (e.g.unsaturate + preformed resin)
526	.Reaction Zone Features
	.Polymers from Unsaturated Monomers
527	.Polymers from Specialized Reactants (e.g. proteins, carbohydrates)
528	.Condensates (from various starting materials, e.g., phenols)
530	Natural Resins, Proteins, Peptides or Lignins
532	Has no patents presently. Definitions contain a glossary of terms used in 532-570 Series of Classes.
534	.Noble gas, Radioactive Metal or Rare Earth Metal containing; Azo-type Compounds
536	.Carbohydrates
540	.Heterocyclic Compounds
	..Seven or more ring members with at least one hetero nitrogen; Steroids; Beta-lactams such as Cephalosporins and Penicillins
544	..Six-membered ring with two or more ring heteros, at least one hetero nitrogen
546	..Six-membered ring with one hetero nitrogen and five carbons
548	..Five-, Four- or Three-membered ring with at least one hetero nitrogen
549	..Hetero Sulfur or Oxygen
552	.Azides, Triphenylmethanes
260	.Carbocyclic or Acyclic
260	..Anthrones, Anthronols, Quinones, Steroids, Fatty Acids
556	..Heavy Metal, Aluminum, or Silicon containing
558, 560	..Esters
562	..Organic Acids, Acid Halides, Acid Anhydrides, Selenium or Tellurium Compounds
564	..Urea Adducts, Amino Nitrogen Compounds
568	..Boron, Phosphorus, Sulfur or Oxygen containing
260	..C-metal (light metal bonded directly to carbon)
570	..Halogen containing
585	Hydrocarbons

CLASS	TITLE OF CLASS
51	ABRADING
181	ACOUSTICS
357	ACTIVE SOLID STATE DEVICES, E.G., TRANSISTORS, SOLID STATE DIODES
156	ADHESIVE BONDING AND MISCELLANEOUS CHEMICAL MANUFACTURE
226	ADVANCING MATERIAL OF INDETERMINATE-LENGTH
244	AERONAUTICS
366	AGITATING
420	ALLOYS OR METALLIC COMPOSITIONS
102	AMMUNITION AND EXPLOSIVES
86	AMMUNITION AND EXPLOSIVE-CHARGE MAKING
330	AMPLIFIERS
272	AMUSEMENT AND EXERCISING DEVICES
273	AMUSEMENT DEVICES, GAMES
446	AMUSEMENT DEVICES, TOYS
119	ANIMAL HUSBANDRY
D30	ANIMAL HUSBANDRY
D 2	APPAREL AND HABERDASHERY
223	APPAREL APPARATUS
2	APPAREL
D22	ARMS, PYROTECHNICS, HUNTING, FISHING, AND TRAPPING EQUIPMENT
221	ARTICLE DISPENSING
236	AUTOMATIC TEMPERATURE AND HUMIDITY REGULATION
4	BATHS, CLOSETS, SINKS AND SPITTOONS
136	BATTERIES, THERMOELECTRIC AND PHOTOELECTRIC
384	BEARINGS
5	BEDS
449	BEE CULTURE
402	BINDER DEVICE RELEASABLY ENGAGING APERTURE OR NOTCH OF SHEET
8	BLEACHING AND DYEING; FLUID TREATMENT AND CHEMICAL MODIFICATION OF TEXTILES AND FIBERS
10	BOLT, NAIL, NUT, RIVET AND SCREW MAKING
412	BOOKBINDING: PROCESS AND APPARATUS
281	BOOKS, STRIPS AND LEAVES
36	BOOTS, SHOES AND LEGGINGS
12	BOOT AND SHOE MAKING
175	BORING OR PENETRATING THE EARTH
215	BOTTLES AND JARS
188	BRAKES
14	BRIDGES
15	BRUSHING, SCRUBBING AND GENERAL CLEANING
D 4	BRUSHWARE (1)
300	BRUSH, BROOM AND MOP MAKING
24	BUCKLES, BUTTONS, CLASPS, ETC.
D25	BUILDING UNITS AND CONSTRUCTION ELEMENTS
441	BUOYS,RAFTS, AND AQUATIC DEVICES
452	BUTCHERING
79	BUTTON MAKING
40	CARD, PICTURE AND SIGN EXHIBITING
502	CATALYST, SOLID SORBENT, OR SUPPORT THEREFOR, PRODUCT OR PROCESS OF MAKING
59	CHAIN, STAPLE AND HORSESHOE MAKING

CLASSES ARRANGED IN ALPHABETICAL ORDER

CLASS	TITLE OF CLASS
297	CHAIRS AND SEATS
194	CHECK-ACTUATED CONTROL MECHANISMS
436	CHEMISTRY: ANALYTICAL AND IMMUNOLOGICAL TESTING
435	CHEMISTRY: MOLECULAR BIOLOGY AND MICROBIOLOGY
518	CHEMISTRY FISCHER-TROPSCH PROCESSES; OR PURIFICATION OR RECOVERY OF PRODUCTS THEREOF
260	CHEMISTRY, CARBON COMPOUNDS
204	CHEMISTRY, ELECTRICAL AND WAVE ENERGY
429	CHEMISTRY, ELECTRICAL CURRENT PRODUCING APPARATUS, PRODUCT AND PROCESS
71	CHEMISTRY, FERTILIZERS
585	CHEMISTRY, HYDROCARBONS
423	CHEMISTRY, INORGANIC
530	CHEMISTRY, NATURAL RESINS OR DERIVATIVES PEPTIDES OR PROTEINS; LIGNINS OR REACTION PRODUCTS THEREOF
23	CHEMISTRY, PHYSICAL PROCESSES
279	CHUCKS OR SOCKETS
209	CLASSIFYING, SEPARATING AND ASSORTING SOLIDS
134	CLEANING AND LIQUID CONTACT WITH SOLIDS
160	CLOSURES, PARTITIONS AND PANELS, FLEXIBLE AND PORTABLE
292	CLOSURE FASTENERS
192	CLUTCHES AND POWER-STOP CONTROL
118	COATING APPARATUS
401	COATING IMPLEMENTS WITH MATERIAL SUPPLY
427	COATING PROCESSES
341	CODED DATA GENERATION OR CONVERSION
372	COHERENT LIGHT GENERATORS
453	COIN HANDLING
431	COMBUSTION
342	COMMUNICATIONS, DIRECTIVE RADIO WAVE SYSTEMS AND DEVICES (E.G., RADAR, RADIO NAVIGATION)
367	COMMUNICATIONS, ELECTRICAL: ACOUSTIC WAVE SYSTEM AND DEVICES
340	COMMUNICATIONS, ELECTRICAL
343	COMMUNICATIONS, RADIO WAVE ANTENNAS
501	COMPOSITIONS: CERAMIC
252	COMPOSITIONS
106	COMPOSITIONS, COATING OR PLASTIC
7	COMPOUND TOOLS
159	CONCENTRATING EVAPORATORS
193	CONVEYERS, CHUTES, SKIDS, GUIDES AND WAYS
198	CONVEYERS, POWER-DRIVEN
406	CONVEYORS, FLUID CURRENT
147	COOPERING
460	CROP THRESHING OR SEPARATING
380	CRYPTOGRAPHY
30	CUTLERY
407	CUTTERS, FOR SHAPING
408	CUTTING BY USE OF ROTATING AXIALLY MOVING TOOL
83	CUTTING
329	DEMODULATORS

CLASSES ARRANGED IN ALPHABETICAL ORDER

CLASS	TITLE OF CLASS
433	DENTISTRY
232	DEPOSIT AND COLLECTION RECEPTACLES
D29	DEVICES AND EQUIPMENT AGAINST FIRE HAZARDS, FOR ACCIDENT PREVENTION AND FOR RESCUE
222	DISPENSING
202	DISTILLATION: APPARATUS
203	DISTILLATION: PROCESSES, SEPARATORY
201	DISTILLATION: PROCESSES, THERMOLYTIC
424	DRUG, BIO-AFFECTING AND BODY TREATING COMPOSITIONS
514	DRUG, BIO-AFFECTING AND BODY TREATING COMPOSITIONS
34	DRYING AND GAS OR VAPOR CONTACT WITH SOLIDS
369	DYNAMIC INFORMATION STORAGE OR RETRIEVAL
360	DYNAMIC MAGNETIC INFORMATION STORAGE OR RETRIEVAL
172	EARTH WORKING
D 1	EDIBLE PRODUCTS
434	EDUCATION AND DEMONSTRATION
381	ELECTRICAL AUDIO SIGNAL PROCESSING SYSTEMS, AND DEVICES
364	ELECTRICAL COMPUTERS AND DATA PROCESSING SYSTEMS
439	ELECTRICAL CONNECTORS
310	ELECTRICAL GENERATOR OR MOTOR STRUCTURE
377	ELECTRICAL PULSE COUNTERS, PULSE DIVIDERS OR SHIFT REGISTERS: CIRCUITS AND SYSTEMS
338	ELECTRICAL RESISTORS

CLASS	TITLE OF CLASS
307	ELECTRICAL TRANSMISSION OR INTERCONNECTION SYSTEMS
323	ELECTRICITY,POWER SUPPLY, OR REGULATION SYSTEMS
320	ELECTRICITY, BATTERY AND CONDENSER CHARGING AND DISCHARGING
200	ELECTRICITY, CIRCUIT MAKERS AND BREAKERS
174	ELECTRICITY, CONDUCTORS AND INSULATORS
361	ELECTRICITY, ELECTRICAL SYSTEMS AND DEVICES
337	ELECTRICITY, ELECTROTHERMALLY OR THERMALLY ACTUATED SWITCHES
335	ELECTRICITY, MAGNETICALLY OPERATED SWITCHES, MAGNETS AND ELECTROMAGNETS
324	ELECTRICITY, MEASURING AND TESTING
318	ELECTRICITY, MOTIVE POWER SYSTEMS
388	ELECTRICITY, MOTOR CONTROL SYSTEMS
322	ELECTRICITY, SINGLE GENERATOR SYSTEMS
191	ELECTRICITY, TRANSMISSION TO VEHICLES
219	ELECTRIC HEATING
313	ELECTRIC LAMP AND DISCHARGE DEVICES
314	ELECTRIC LAMP AND DISCHARGE DEVICES, CONSUMABLE ELECTRODES
315	ELECTRIC LAMP AND DISCHARGE DEVICES, SYSTEMS
445	ELECTRIC LAMP OR SPACE DISCHARGE COMPONENT OR DEVICE MANUFACTURING
363	ELECTRIC POWER CONVERSION SYSTEMS
392	ELECTRIC RESISTANCE HEATING DEVICES

CLASSES ARRANGED IN ALPHABETICAL ORDER

CLASS	TITLE OF CLASS
902	ELECTRONIC FUNDS TRANSFER
187	ELEVATORS
227	ELONGATED-MEMBER-DRIVING APPARATUS
474	ENDLESS BELT POWER TRANSMISSION SYSTEMS AND COMPONENTS
229	ENVELOPES, WRAPPERS AND PAPERBOARD BOXES
D23	ENVIRONMENTAL HEATING AND COOLING, FLUID HANDLING AND SANITARY EQUIPMENT
D 7	EQUIPMENT FOR PREPARING OR SERVING FOOD OR DRINK NOT ELSEWHERE SPECIFIED
D13	EQUIPMENT FOR PRODUCTION, DISTRIBUTION OR TRANSFORMATION OF ENERGY (1)
371	ERROR DETECTION/CORRECTION AND FAULT DETECTION/RECOVERY
37	EXCAVATING
411	EXPANDED, THREADED, DRIVEN, HEADED, TOOL-DEFORMED, OR LOCKED-THREADED FASTENER
92	EXPANSIBLE CHAMBER DEVICES
149	EXPLOSIVE AND THERMIC COMPOSITIONS OR CHARGES
168	FARRIERY
256	FENCES
42	FIREARMS
182	FIRE ESCAPES, LADDERS, SCAFFOLDS
169	FIRE EXTINGUISHERS
43	FISHING, TRAPPING AND VERMIN DESTROYING
383	FLEXIBLE BAGS
141	FLUENT MATERIAL HANDLING, WITH RECEIVER OR RECEIVER COACTING MEANS
303	FLUID-PRESSURE BRAKE AND ANALOGOUS SYSTEMS
137	FLUID HANDLING
416	FLUID REACTION SURFACES (I.E., IMPELLERS)
239	FLUID SPRINKLING, SPRAYING AND DIFFUSING
99	FOODS AND BEVERAGES: APPARATUS
426	FOOD OR EDIBLE MATERIAL: PROCESSES, COMPOSITIONS AND PRODUCTS
450	FOUNDATION GARMENTS
410	FREIGHT ACCOMMODATION ON FREIGHT CARRIER
44	FUEL AND RELATED COMPOSITIONS
110	FURNACES
D 6	FURNISHINGS
D21	GAMES, TOYS, AND SPORTS GOODS
261	GAS AND LIQUID CONTACT APPARATUS
55	GAS SEPARATION
48	GAS, HEATING AND ILLUMINATING
409	GEAR CUTTING, MILLING, OR PLANING
935	GENETIC ENGINEERING: RECOMBINANT DNA TECHNOLOGY,HYBRID OR FUSED CELL TECHNOLOGY AND RELATED MANIPULATIONS OF NUCLEIC ACIDS
33	GEOMETRICAL INSTRUMENTS
65	GLASS MANUFACTURING
294	HANDLING, HAND AND HOIST-LINE IMPLEMENTS
54	HARNESS
56	HARVESTERS
237	HEATING SYSTEMS
432	HEATING

CLASSES ARRANGED IN ALPHABETICAL ORDER

CLASS	TITLE OF CLASS
165	HEAT EXCHANGE
108	HORIZONTALLY SUPPORTED PLANAR SURFACES
368	HOROLOGY: TIME MEASURING SYSTEMS OR DEVICES
405	HYDRAULIC AND EARTH ENGINEERING
362	ILLUMINATION
382	IMAGE ANALYSIS
494	IMPERFORATE BOWL. CENTRIFUGAL SEPARATORS
254	IMPLEMENTS OR APPARATUS FOR APPLYING PUSHING OR PULLING FORCE
376	INDUCED NUCLEAR REACTIONS, SYSTEMS AND ELEMENTS
336	INDUCTOR DEVICES
373	INDUSTRIAL ELECTRIC HEATING FURNACES
123	INTERNAL-COMBUSTION ENGINES
63	JEWELRY
D11	JEWELRY, SYMBOLIC INSIGNIA AND ORNAMENTS
403	JOINTS AND CONNECTIONS
277	JOINT PACKING
289	KNOTS AND KNOT TYING
280	LAND VEHICLES
278	LAND VEHICLES, ANIMAL DRAFT APPLIANCES .
296	LAND VEHICLES, BODIES AND TOPS
298	LAND VEHICLES, DUMPING
301	LAND VEHICLES, WHEELS AND AXLES
69	LEATHER MANUFACTURES
D26	LIGHTING (1)
122	LIQUID HEATERS AND VAPORIZERS
210	LIQUID PURIFICATION OR SEPARATION
70	LOCKS
184	LUBRICATION
D15	MACHINES, NOT ELSEWHERE SPECIFIED
74	MACHINE ELEMENTS AND MECHANISMS
282	MANIFOLDING
493	MANUFACTURING CONTAINER OR TUBE FROM PAPER; OR OTHER MANUFACTURING FROM A SHEET OR WEB
440	MARINE PROPULSION
D34	MATERIAL OR ARTICLE HANDLING EQUIPMENT (1)
414	MATERIAL OR ARTICLE HANDLING
73	MEASURING AND TESTING
D10	MEASURING, TESTING OR SIGNALLING INSTRUMENTS (1) (2)
124	MECHANICAL GUNS AND PROJECTORS
D24	MEDICAL AND LABORATORY EQUIPMENT
186	MERCHANDISING
266	METALLURGICAL APPARATUS
72	METAL DEFORMING
164	METAL FOUNDING
228	METAL FUSION BONDING
76	METAL TOOLS AND IMPLEMENTS, MAKING
148	METAL TREATMENT
29	METAL WORKING
196	MINERAL OILS: APPARATUS
208	MINERAL OILS: PROCESSES AND PRODUCTS
299	MINING OR IN SITU DISINTEGRATION OF HARD MATERIAL

665 .Wash receptacle water empties into toilet facility
666 DIAPER WASHING DEVICES
300 FLUSH CLOSET
300.1 .With toilet tissue holder
300.2 .With bedpan rinser
300.3 .With splash guard or water baffle
301 .Urinals only
302 ..Flush actuation automatically responsive to condition
303 ...Periodic flush
304 ...By radiant energy responsive means
305 ...By electric condition responsive means
306 ..Ventilated, i.e., noxious fume removal
307 ..Folding type
308 ..Pedal actuated flush
309 ..With disinfectant means
310 ..Vertical type
311 ..Bowl type
312 .Folding type
313 .With automatic flush responsive means
314 .With indicator
315 .With disposable container
316 .Reduced gravity environment type
317 .With recirculating means
318 ..Including specified filtering means
319 .With macerator
320 ..Including additional treatment
321 .With holding tank
322 ..And heater
323 ..And valve for emptying
324 .Manual selection of the amount of flush
325 ..Alternate unicyclic flush
326 ...Plural flush valves
327 ....In axial alignment
328 .Tank and bowl with plural connections, one being pneumatic
329 .Low profile tank and bowl
330 ..Seat actuated flush
331 ..Float-controlled valve
332 ..Pressure flush
333 .Normally empty tank
334 ..Pressure tank
335 ...With seat-actuated valve
336 ....And siphon bowl
337 ....And drain means
338 ..With seat-actuated valve
339 ...And drain means
340 .Plural receptacles
341 ..Diverse
342 ..Separate and distinct
343 .Overhead tank with bowl
344 ..Siphon bowl
345 .Plural flush, preliminary or subsequent
346 ..Including plural compartments in tank
347 .Ventilated, i.e., noxious fume removal
348 ..Bowl
349 ...Unitary with flush supply to bowl
350 ...Unitary with discharge from bowl
351 ....Trap or siphon
352 ...Annular ventilator
353 .Tank only
354 ..Pressure tank
355 ...Float-released outlet valve
356 ...Float outlet valve
357 ....Free floating
358 .....With guide (e.g., a cage)
359 ...Valve held open by flow
360 ...Dashpot-controlled outlet valve
361 ...Pneumatic or hydraulic adjustability
362 ...By air under pressure
363 ..With plural compartments
364 ...Single tank with divider
365 ...Pivotal compartment
366 ..With simultaneous common actuating means for supply and outlet valves
367 ...By fluid or electrical means
368 ..With outlet siphon
369 ...Including means to relieve trapped air
370 ....By releasing trapped air
371 ....By raising trapped air housing
372 ...Including means to immerse siphon
373 ...Pump starter
374 ...Jet starter
375 ...Including means to raise liquid level
376 ...Valve starter
377 ....By moving siphon
378 ..With outlet valve
379 ...With delay of valve closing
380 ....By pressure or suction control of valve
381 ....By float releasable latch
382 .....Tiltable or pivoted valve body
383 .....With overflow through valve closure
384 .....Latched actuator
385 ....By varying weight releasable latch
386 ....By shifting weight
387 ....By flow-responsive element in valve outlet
388 ....By retarding mechanism, e.g., dashpot
389 .....With overflow through valve closure
390 ...With overflow through valve closure
391 ....Float connected or float type valve
392 ...Swinging
393 ....Pivoted
394 ...Connected to float
395 ...Float type
396 ....Free floating during flush
397 ....Having seating guide
398 .....Cage type
399 .....Valve moves relative to guide through bottom of valve
400 .....Valve-attached seating element enters discharge pipe
401 .....Plural static guides
402 ....Having liquid receptacle open upwardly
403 ....Hollow
404 .....Open at bottom
405 ...Actuator
406 ....Electrical
407 ....Pneumatic or hydraulic
408 ....Pneumatic or hydraulic
409 .....With overhead tank
410 ....With overhead tank
411 ....Portion of linkage external to tank
412 ....Including flexible linkage element in tank(e.g., chain or cord)
413 ....Including articulated rigid linkage
414 .....Having stationary pivot within tank
415 ..Water saver
416 ..With lining
417 ..With connector or seal
418 ...Cover or housing for connector or seal
419 ..With support
420 .Bowl
420.1 ..With body-contacting nozzle
420.2 ..With heated bidet fluid
420.3 ..With bidet basin
420.4 ..With bidet nozzle
420.5 ...Integral with flush closet
421 ..Siphon discharge
422 ...With flush valve
423 ....With vacuum breaker
424 ...Extra trap or false trap
425 ...Siphonic jet at trap

	FLUSH CLOSET
	.Bowl
	..Siphon discharge
426	...With check valve
427	...Overflow inhibitor
428	...Configurated outlet
429	...Pan bowl
430	...Distinct from bowl
431	..Pump or suction-type discharge
432	...With flush supply pump
433	....Unitary with discharge pump
434	..Valved dischage
435	...With flush supply actuated by valved discharge
436	....By movement of seat or cover
437	....Float control of fluid in bowl
438	....Pivoted valve
439	.....With additional valve (e.g., draft control)
440	.....Pan type
441	...Pivoted valve
442	....Pan type
443	BIDETS
444	.With seat
445	.Bidet basin for flush closet
446	.Bidet bowl with drain
447	.Nozzle with seat
448	.Nozzle attachment
449	DRY CLOSETS
111.1	.With heating meas
111.2	..And cyclic control means
111.3	...Having seat actuator or interlock
111.4	..Fluid fuel burner
111.5	..Electric
111.6	..And separate drying zone
450	.Bedpans
451	..Disposable type
452	..With liner
453	..With deodorizing means
454	..With urinal
455	..With drain means
456	..Cushioned
457	..Accessories
458	.Automobile
114.1	..Urinal
459	.Chemical
460	.Field
461	.Plural
462	.With urinal
463	..Separate receiver
464	.With magazine
465	..Furniture type
466	..Valved bowl
467	..Movable receiver
468	..Seat operated
469	..Cover operated
470	..In cover
471	.Valved bowl
472	..Ventilated
473	..Seat or cover operated
474	.Vault type
475	..Ventilated
476	.Enclosed receptacle type
477	..Ventilated
478	..With arm or back support
479	.Receptacle type
480	..Invalid
481	..Muffler for liquid
482	..Ventilated
483	..With seat
484	..Flexible material
485	.Seat subclosure
486	..Seat or cover operated
144.1	.Urinal
144.2	..Disposable, entirely or a portion
144.3	..Contacting and conforming to anatomy
144.4	..Spout only
487	OPEN-WATER BARRIER

488	POOL TYPE
489	.Plural separate receptacles
490	.With cleaning means
491	.With wave-making means
492	.With water-jet means
493	.With heating means
494	.Combined or convertable
495	.Adjustable bottom
496	.Accessory
497	..Wave quelling
498	..Cover
499	...Air inflatable or supported
500	...Including storage area
501	....On pool bottom
502	....On a roll
503	...Including securing means
504	..Safety means
505	..Divider
506	.Construction details
507	..Including water inlet or outlet means
508	...And water level control
509	...And pump
510	...Gutter
511	....With handhold (e.g., life rail)
512	....Including weir
513	..Shape
514	CONVERTIBLE CLASS-TYPE APPARATUS
515	HAIR WASHING MACHINE OR DEVICE OR ACCESSORY
516	.Portable
517	.Combined
518	.With water supply means
519	.Head or neck receiving or supporting sink
520	.Shield or drain
521	..Supported by body
522	..With post-type support
523	.Body-portion rest
524	VAPOR OR HEAT IN BATH (E.G., SAUNA, STEAM BATH, OR SUDATORIUM)
525	.With additional means for washing
526	.Collapsible
527	..Flexible fabric supported by a folding frame
528	..With body support means
529	...Bed type
530	....With head or back rest
531	...Seat
532	....Fixed
533	.Conversion means
534	..Flexible cover
535	MEANS FOR APPLYING VAPOR OR HOT AIR DIRECTLY TO BODY OF USER
536	.With means for covering a majority of the user's body
537	.To the head or face
538	TUBS
539	.Plural tubs (i.e., all for bathing)
540	.With means for turning tub for aiding access
541	.With means for augmenting water flow
542	..Mixing gas into water (e.g., whirlpool bath)
543	...From bottom through a plurality of openings
544	..By pump
545	.With heating of tub structure
546	.Combined with diverse means
547	..Couch or bed
548	..Storage or support means
549	...Cabinet
550	....Pivoted tub
551	...Dressing table
552	..A complete and separate shower
553	..Basin or sink
554	...Relatively movable tub or basin
555	.With user access means in side of the tub

	TUBS
	.With user access means in side of the tub
556	..Pivoted door
557	.With movable closure
558	..Flexible type
559	.Convenience accessories
560	..Means for handling user
561	...Vertically and horizontally
562	....Horizontal movement is pivotal
563	.....Hydraulically operated
564	...Vertically, only (e.g., lifts)
565	....Supported by tub
566	.....Hydraulically operated
567	..Means for spraying user
568	...Located inside of the tub
569	....Conduit having rectilinearly spaced spray holes
570	...Mounted on support external to tub
571	..Support for user, static
572	...For infant
573	...Body type
574	....Foot
575	....Head or back
576	....Hand grip
577	.....Mounted on tub, only
578	....Seat
579	.....Supported by tub, only
580	..Liner or cover
581	...Mat type
582	....With antislip means
583	.....In contact with tub bottom
584	.Particular construction or configuration details
585	..Flexible material (e.g., collapsible, etc.)
586	...For infant
587	....Supported by folding frame
588	....Inflatable
589	..With integral body support
590	...Seat
591	..Rim supply
592	..Support structure
593	...For strengthening bottom or side
594	...Legs
595	..Means for securing tub in place
596	SHOWER (E.G. STALL, WITH WALLS, RECEPTOR, AND SPRAY)
597	.Combined with diverse means
598	.With heating means
599	.Collapsible or expandable
600	..Wall type
601	.Plural spray heads
602	.With self-contained water supply
603	..And pump
604	.With special feature for physically handicapped
605	.Convenience accessories
606	..Scrubber
607	..Movable closure
608	...Flexible type
609	..Shield or guard means
610	..Mounting or supporting means for movable closure
611	..Support for user
612	.Particular construction
613	..Of receptor
614	..Wall or panel
615	MEANS FOR SPRAYING USER
616	.With self-contained water supply
617	..Overhead-gravity feed
618	.Supported by neck or shoulder of user
619	WASH RECEPTACLES
620	.Emergency fountains
621	.With human body support
622	..Foot
623	.With proximity operated valve
624	.Wash fountain
625	.With water supply or waste-water tank
626	..And water control
627	..Having pivoted receptacle
628	.With cleaning brush, soap dispenser or holder
629	.With garbage receptor or tableware extractor
630	.With cabinet, shelf, or drawer
631	.With work surface
632	..Sink rim rests on work-surface recess below top surface
633	..Sink rim clamped to work-surface top by clamp means partly on sink
634	..Sink rim clamped to work surface
635	..Sink rim joined to work surface by molding frame
636	...Molding frame T-shaped
637	..Drainboard
638	.Combined
639	.Plural receptacles
640	..With drain
641	...Nested
642	...Dissimilar
643	.With support
644	..Pivoted
645	..Vertically adjustable
646	..Post
647	..Hanger
648	..Bracket
649	..Clamp
650	.With drain
651	..And overflow
652	..And strainer
653	..And water handling
654	.Attachments
655	..Disposable receptacle liner
656	..Drainboard, rack, or tray
657	..Receptacle or receptacle content protective device
658	..Receptacle splash or drip guard
659	..Infant bathing support
660	.Rim frames
661	MISCELLANEOUS
191	BATH, BASIN, AND RECEPTACLE FITTINGS
192	.Hot and cold supply
193	..Compartment tub
194	..Outlet valve
195	.Supply and outlet
196	..Bottom supply
197	.Outlet valve and trap
198	.Outlet valve and overflow
199	..Valve operator in overflow
200	..Valve operator outside
201	..Overflow valve in receptacle
202	..Overflow valve outside
203	.Outlet valve, operator outside receptacle
204	.Outlet valve or plug, operator inside receptacle
205	.Outlet valve or plug, float operated
206	.Receptacle overflow, closure or trap
207	.Airbound trap
208	.Compartment-tub outlet
209 R	VENTILATION
209 FF	..With fluid filter
210	.Railway car
211	.House plumbing
213	.Electric-motor pump
214	.Water-motor pump
215	.Water-jet pump
216	.Bowl structure or vent valve
217	.Seat structure
218	.Roof outlet
219	.Sewer
220	..Disinfecting
221	..Burner
222	DISINFECTION
222.1	.With screen

	DISINFECTION
223	.Dispensing to bowl
224	..Combined with flusher
225	.Dispensing to flush pipe
226	.Chemical holder in flush pipe
227	.Dispensing to flush tank
228	.Chemical holder in flush tank
229	.Chemical holder in seat
230	.Chemical holder in cover
231	.Chemical holder suspended in bowl
232	.Chemical chamber formed in bowl
233	.Seat and cover treating
234	SEATS AND COVERS
235	.Plural seats
236	.Hinges
237	SEATS
238	.Subclosure, seat operated
239	.Superposed
240	.Hinges
241	.Counterbalanced
242	COVERS FOR SEATS
243	.Destructible material
244	..Pad
245	...On seat
246	...On main cover
247	..Roll
248	BUFFERS AND DASHPOTS
249	FLUSH-VALVE OPERATORS
250	.Seat operated
251	SEAT AND COVER OPERATORS
252 R	CLOSET-BOWL SUPPORTS, COUPLINGS, AND DRIP CATCHERS
252 A	..Drip catchers
253	CLOSET-BOWL CLOSURES
254	CLOSET HEAD, FOOT, AND BODY RESTS
255	OBSTRUCTION REMOVERS AND CLOSURES
256	.Water supply
257	.Closet bowl
258	SPITTOONS
259	.Pocket
260	.Bar
261	.Disinfecting
262	.Flushing
263	..Dental
264	...Rotary member
265	..Hand pump
266	..Flush valve and outlet valve
267	.Covered
268	..Floor orifice
269	...Valved outlet
270	...Receptacle
271	..Hand operated
272	..Pedal operated
273	...Two-part cover
274	..Flexible material and holder
275	.Floor orifice
276	..Valved outlet
277	..Receptacle
278	.Agitator
279	.Reversible
280	.Floor controlled valve
281	.Gravity controlled valve
282	.Positively operated inlet valve
283	.Trapped liquid
284	.Gravity receptacle
285	.Flexible material and holder
286	STRAINERS AND STOPPERS
287	.Combined strainer, plug, or valve
288	.Combined strainer and pipe coupling
289	.Strainers in series
290	.Strainer, receptacle
291	..Depending
292	.Strainer
293	.Covers
294	..Disinfecting
295	.Plugs

180	....Cofolding legs and ends
181	.Extension
182	..Lazy tongs
183	..Extensible headboards
184	..Extension side rails
185	..Lateral sections
400	.Having bottom
401	..And integral pad
402	...Having upholstery cover on pad and means to secure cover to pad or bottom
403	....By wedge or clamp
404	.....Spring clamp
405	.....With means to urge opposed clamping surfaces together
406	.....Deformable clamp and bead
407	......Bead is in or part of cover
408	....By tufting
409	....By cover-penetrating fastener
410	.....Bottom-carried impaling prong
411	..And removable mattress or cushion, and means to fix its position on the bottom
412	..Movable relative to bedstead
	..Fabricated elastic flats
186.1	...Surface
187	....Canvas
188	....Linkages
189	....Continuous spring elements
190	....Cables and cords
191	....Thin strips
192	....Edging, midribs and center strips
193	....Guards

194	...Binding and fastening
195	....Folding strips
196	....Clamping strip
197	....Groove and strip
198	....Slit tube
199	....Marginal spring connections and limiting springs
200.1	...Frame
201	....Knockdown
202	....Sectional folding or extensible
203	....Braces
204	....Dropped-truss side rails
205	....Corner risers
206	.....Stamped metal
207	...Frame hangers, supports and retainers
208	....Rigid frame extension supports
209	....Shiftable on frame riser
210	....Spring
211	...Tighteners
212	....Cord take-up
213	....Lever and screw
214	....Lever
215	....Depression self-tightener
216	....Roller
217	.....Rolling bedstead rails
218	.....Riser mounting
219	.....Attachable
220	....Screw
221	.....Attachable
222	.....Extensible rods or trusses
223	.....Individual element
224	.....Sliding riser
225.1	.....Sliding end rail
226	...Reinforcers
227	....Cable systems
228	....Edge spreaders
229	....Subcoils
230	..Of fabrics and springs
231	...Underslung spring supports
232	...Yielding rail
233	...Marginal spring tension
234	...Leaf-spring supports
235	...Connecting fabric to tops of coil springs
236.1	..Of slats
237	...Bowed spring slats
238	...Hangers and engagers
239	..Of slats and springs
240	...Collapsible or extensible frameworks
241	...Independent slats with spring supports
242	....With leaf springs
243	....With subcoil springs
244	...Ridig slat frame tops
245	...Attaching slats to spring coils
246	..Of springs
247	...Nonspiral springs only
248	...Spiral springs only
249	....Frames, sectional and collapsible
250	.....Folding
251	.....Variable width or length
252	....Intermediate frames and connections
253	....With accessory spring shock absorbers
254	...Elements
255	....Springs, nonspiral
256	....Springs, spiral
257	....Top-coil unions
258	....Top saddles
259.1	....Connecting clip (e.g., plate or wire)
260	....Margin rims and connections
261	....Restrainers and limiters
262	....Lateral upper-frame braces
263	....Bottom spring support
264.1	.....Bars
265	.....Bar and wire
266	.....Wire

	BEDSTEADS
	.Having bottom
	..Of springs
	...Elements
267	....Top connections
268	.....Twin and continuous springs
269	.....Helical connectors
270	.....Links or clips
271	.....Extended coils
272	.....Top coil extended and guy
273	.....Guy with extended loops
274	.....Zigzag guy
275	.....Central cross strips and wires
276	.....Parallel cross groups
277	.....Two and one cross elements
278	..Equalizers
279.1	.Element or detail
280	..Panel, insert, or mirror
281	..Post top or ornament
282.1	..Joint or connection
283	..Filler bars
284	..Heating and cooling devices
285	..Knockdown and removable parts
286	..Side-rail and frame-rail construction
287	...Exhibition couplers
288	...Corner fastenings
289	...Chill fasteners
290	...Post boxes
291	...Rail boxes and hoods
292	...Rails interengaging within posts
293	...Rail-entering post stubs
294	...Post hooks
295	...Interlocking fingers
296	...Rail hooks
297	...Swinging hooks
298	...Drawbars
299	...Keyhole, bayonet and opentop slots
300	...Dovetails
301	...Post clamps
302	...Rotating rails
303	...Pins and pintles
304	...Brackets
305	..Bedstead braces
306	...Cable systems
307	...Link systems
308	..Receptacles, drawers and compartments
309	..Antinoise devices and buffers
310	..Legs
311	...Sliding disappearance
312	...Pivoted
313.1	....Link control
314.1	....Slot with shoulder
315.1	....Latch
315.2	.....Spring actuated
316	....Jointed braces
413	SLEEPING BAG WITH OR RECEIVING BED OR TENT STRUCTURE
414	WITH MOSQUITO NET OR CANOPY
415	.Actuated by folding of bed
416	.On baby carriage
417	GROUND MAT
418	.With sun shade
419	.Having head rest
420	.Padded
421	WITH HEATING OR COOLING
422	.Of waterbed mattress
423	.And means to force air
424	HAVING SAFETY DEVICE
425	.Side guard
426	..Secured between mattress and bed bottom
427	..Flexible
428	..Adjustable in place
429	...Telescoping
430	...Pivoting
431	SUPPORT FOR USER'S BODY OR PART THEREOF
432	.For back when person is in seated position
433	..Having adjustable incline
434	.For head (e.g., pillow, etc.)
435	..Having means permitting the unrestricted passage of air therethrough for breathing purposes
436	..Adapted to accommodate either other parts of the body or body-treating device (e.g., hair rollers, etc.)
437	..Having distinct, adjustable parts
438	..Scent affecting or disseminating
439	..With coil, leaf, or torsion spring core
440	..With rigid frame or base
441	..Fluent material filled
442	..Compartmented
443	.For foot or leg
444	..Having planar support for sole of foot
445	.Self-help support, grip, or handhold
446	.Having means for varying contour or firmness of support surface or added support structure of different contour or firmness
447	..Internal of support
448	.Mattress or cushion
449	..Having confined fluent material within flexible container (e.g., air mattress, etc.)
450	...And a confined, diverse fluent or yieldable material
451	...Confined liquid (e.g., waterbed, etc.)
452	....Supported or confined by air-chamber frame
453	...With fluent material source (e.g., pump)
454	....Manually operated
455	...Including plural distinct compartments for fluid
456	....Filled via common manifold
457	...Having parallel-strip ties
458	...Point ties or braces
459	..With fireproof material
460	..Having means to facilitate application or retention of bedclothes
461	..Having means permitting the unrestricted passage of air through the mattress or cushion
462	..Having pocket for disparate article
463	...Article is toilet receptacle
464	..Sectional with regard to firmness
465	..Sectional and rearrangeable
466	..Having handle
467	...Combined with means providing ventilation
468	..Having means providing ventilation
469	...And means to force ventilation (e.g., fan, etc.)
470	..Having separable ticking or upholstery as primary cover
471	..Having upholstery cover and means for physically securing it thereto
472	...Tufting
473	..Having waterproof outer surface
474	..Having means to form or strengthen edge or border
475	..Having innerspring-type core
476	...Noncoil spring element
477	...Compartmentalized
478	...And spring insulator
479	....Extensible
480	..Having internal partition
481	..Comprising foam material
482	BEDCLOTHING
483	.Fireproof
484	.Waterproof
485	.Having pocket

BEDCLOTHING
486 .One section being adjustable or having characteristics which differ relative to another section
487 .Disposable
488 .And means to facilitate changing thereof
489 ..For dressing pillow
490 .Pillow cover
491 .Pillow sham
492 ..And holder
493 .Valance
494 .Having means to engage body of user or bed structure to insure proper covering of body
495 .Sheet
496 ..Having manipulable fastening means
497 ..Contoured or fitted
498 .And means to hold clothes in position on bed
499 .Adapted to contact mattress
500 ..Multilayer
501 .And protector therefor
502 .Multilayer
503 RECEPTACLE OR SUPPORT FOR USE WITH BED
504 .To support bedclothes
505 ..Above body of person using bed
506 ..For airing thereof
507 .Planar support (e.g., a table, step, etc.)
508 ATTACHMENT OR ACCESSORY
509 .For tilting of bed
510 .To facilitate moving of bed
511 ..And guide therefor (e.g., track, etc.)
512 .Screen which is attached to periphery of bed
513 .Partition for bed surface

900 BATHTUB OR BED

CLASS 7 COMPOUND TOOLS

DECEMBER 1990

100	AUTOMOBILE REPAIR OR MAINTENANCE
101	WATCHMAKING OR REPAIR
102	SHOEMAKING OR LEATHER WORKING
103	CARPET INSTALLATION, FINISHING, OR TRIMMING
104	SPECIALIZED TO MINING OR MINER'S USE, E.G., MINER'S CANDLESTICK
105	HOUSE PAINTING, PAPER HANGING, OR GLAZING
106	FISHING
107	ELECTRICAL CONNECTION FORMING OR WIRE PREPARATION
108	.With screwdriver
109	FOR STOVE, RANGE, OR FURNACE USE
110	COOKING, BAKING, OR KITCHEN FOOD PREPARATION
111	.Rolling pin, combined or convertible
112	.With culinary fork
113	.With knife or cutter means
114	WEEDING, GARDENING, OR LIGHT AGRICULTURAL OR EARTHWORKING USE
115	.Pitch fork
116	.Spade or shovel
117	SPECIALIZED TO WIRE FENCE INSTALLATION OR REPAIR
118	POCKETKNIFE TYPE
119	.With gauge or other measuring means, e.g., ruler, level, etc.
120	.With abrasive sharpening means
121	THIMBLE AND THREAD CUTTER
122	SHINGLE GAUGE ON HATCHET, HAND AXE, OR HAMMER
123	WITH BUTTON HOOK OR SHOE HORN
124	MUTILATING ERASER COMBINED WITH BURNISHER
125	PLIER TYPE
126	.With receptacle opener or closure remover
127	.With tool or plier handle
128	..With tool pivoted to plier
129	..With cutter
130	...Nipper
131	...Shear
132	.With cutter
133	..Nipper
134	..Shear
135	...Scissors
136	....And comb
137	.With hammer
138	WRENCH
139	.Adjustable, e.g., monkey wrench, pipe wrench, etc.
140	..And brace
142	..With cutter
143	HAMMER
144	.With cutter
145	..Axe, hatchet, or adz head
146	.Fixed form
147	..Integral
148	HANDSAW
149	.Hacksaw frame type
150	.With gauge or other measuring means, e.g., ruler, level, etc.
151	RECEPTACLE OPENER OR CLOSURE REMOVER
152	.Can opener cutter
153	..With tear strip puller
154	..With corkscrew
155	.Corkscrew
156	.With cutter
157	PIPE OR TUBE END FORMER AND/OR CUTTER
158	CUTTER COMBINED WITH OTHER TOOL OR TOOLS
159	.Brush hook and axe
160	.Desk use tool, e.g., letter opener, pencil sharpener
161	.With hook
162	.With means specialized to manicure use
163	.With gauge or other measuring means, e.g., ruler, level, etc.
164	WITH GAUGE OR OTHER MEASURING MEANS, E.G., RULER, LEVEL, ETC.
165	WITH SCREWDRIVER
166	CROWBAR OR PRYBAR
167	HOLDERS OR HANDLES
168	.For pivoted tools
169	INTEGRAL

CLASS 8 BLEACHING AND DYEING; FLUID TREATMENT AND CHEMICAL MODIFICATION OF TEXTILES AND FIBERS

400 MEASURING, TESTING, OR INSPECTING DYE PROCESS
401 USING ENZYMES, DYE PROCESS, COMPOSITION, OR PRODUCT OF DYEING
402 WOOD DYEING PROCESS
403 FUGITIVE DYE COMPOSITION, PROCESS OR PRODUCT
404 DYEING INVOLVING ANIMAL-DERIVED NATURAL FIBER MATERIAL (OTHER THAN SOLELY WOOL OR SILK), E.G., LEATHER, FUR, HAIR, FEATHERS, ETC., COMPOSITION, PROCESS, OR PRODUCT
405 .Hair dyeing
406 ..Oxidation dye
407 ...With dye other than oxidation dye
408 ...Plural dyes or dye and coupling agent
409 ....Heterocyclic amine dye
410 ....Paradiaminobenzene dye
411 .....With metadiaminobenzene dye
412 .....With aminophenol dye
414 ...Nitroaniline dye
415 ....Nitrophenylenediamine dye
416 ...Aryldiamine dye
421 ...Aminophenol dye
423 ...Aminoheterocyclic dye
424 ...Phenols (natural oxidation dye)
425 ..Mordant, solvent dye formation or metallized azo dye
426 ..Basic dye, including diphenylmethane, triphenylmethane, xanthene, fluorene, methine, acridine, oxazine, phenazine, flavylium, naphthoperinone, quinophthalone, quaternary ammonium group, etc., containing
428 ..Dye reactive with hair
429 ..Developed on the hair
431 ..With fluid treatment, e.g., bleaching with dyeing, etc.
432 ...-S-S- bond disruption, e.g., use of thioglycolates, etc.
433 ...Swelling of hair
435 ..Solvent assisted dyeing
436 .Leather dyeing
437 ..Azo dye
438 PROCESS OF EXTRACTING OR PURIFYING OF NATURAL DYE
439 .Logwood
440 DYE RECOVERY PROCESS, OTHER THAN NOMINAL RECOVERY
441 PROCESS OF COLOR RENOVATING A DYED PRODUCT
442 COLOR PROTECTING PROCESS FOR DYED PRODUCT
443 WEIGHTING PROCESS (LOADING SILK WITH METAL SALTS)
444 DYEING PROCESS UTILIZING ELECTRIC, MAGNETIC, OR WAVE ENERGY; OR PRODUCT THEREOF
445 PROCESS OF PRINTING PERMANENTLY ON SUBSTRATE, OTHER THAN NOMINAL PRINTING, USING PRINT PASTE CONTAINING DISCHARGE MATERIAL, RESIST MATERIAL, OR DYE MATERIAL; OR STENCIL DYEING
446 .Resist or reserve
447 ..Wax
448 ..Chemically modified local areas
449 ..Reactive dye
450 ..Oxidation dye, e.g., aniline, nitroaniline, etc.
451 ..Azo dye component ground
452 ..Mordant dye, e.g., dye with a metal chelating group, etc.
453 ..Vat dye or sulfur dye, e.g., quinonic or indigoid reducible dye, sulfur-organic reaction product dye, etc.
454 ..Basic dye, including diphenylmethane, triphenylmethane, xanthene, fluorene, methine, acridine, oxazine, phenazine, flavylium, napthoperinone, quinophthalone, quaternary ammonium group, etc., containing
455 ..Acid (including direct) dye, e.g., sulfonated, sulfamated, etc.
456 ..Disperse dye
457 .Discharge utilized
458 ..Chemically modified local areas
459 ..Oxidation dye, e.g., aniline, nitroaniline, etc.
460 ..Mordant dye
461 ..Vat dye or sulfur dye, e.g., quinonic or indigoid reducible, or sulfur-organic compound reaction product dye, etc.
462 ..Basic dye, including diphenylmethane, triphenylmethane, xanthene, fluorene, methine, acridine, oxazine, phenazine, flavylium, naphthoperinone, quinophthalone, quaternary ammonium group, etc., containing
463 ..Acid (including direct) dye, e.g., sulfonated, sulfamated, etc.
464 ..Disperse dye
465 .Vat dye or sulfur dye, e.g., quinonic or indigoid reducible dye, sulfur-organic compound reaction product dye, etc.
466 .Azo dye
467 DIFFUSION TRANSFER DYEING PROCESS, TRANSFER SHEET AND PRODUCT
468 .Release layer utilized
469 .Steam
470 .Dry heat treatment for penetration
471 ..Sublimation
472 ...Air pressure
473 SUBAMBIENT TEMPERATURE DYEING PROCESS, I.E., LESS THAN 20 DEGREES C.
474 REACTIVE GAS OR REACTIVE VAPOR UTILIZED IN DYE PROCESS
475 CONFINED GAS PHASE SUPERATMOSPHERIC PRESSURE DYEING PROCESS (OTHER THAN STEAM BELOW 138 DEGREES C.)
476 .Steam (at 138 degrees C. or above)
477 FOAM DYE COMPOSITION OR PROCESS
478 PATTERN EFFECT DYEING, PROCESS, COMPOSITIONS, OR PRODUCTS
479 .Discontinuous or multidirectional movement of substrate
480 .Cross dyeing
481 ..Mixture of treated and untreated individual fibers
482 .Suppress dyeing, e.g., fold, twist, wrinkle, etc.
483 .Random pattern effect, e.g., space dyeing, etc.
484 ..Differential diffusion
485 .Two or more sequential dye application steps
486 .Direct contact with applicator
487 ..Roller or disc
488 BONDING OF PREFORM, E.G., FLOCKING, ETC., WITH DYEING, PROCESS OR PRODUCT
489 DRAWING OR STRETCHING OF PREFORM WITH DYEING, PROCESS OR PRODUCT
490 PROCESS OF PRESERVING SUBSTRATE COMBINED WITH DYEING OR PRODUCT THEREOF, E.G., BIOCIDAL OR FIRE RETARDANT TREATMENT, ETC.

491 OVERALL DIMENSIONAL MODIFICATION OR STABILIZATION, E.G., CREPING, ETC., INCLUDING USE OF CHEMICAL ADDITIVE TO FORM AT LEAST A TEMPORARY COMPOSITION, WITH DYEING PROCESS
492 .Solvent treatment of synthetic fibers
493 .Modification of molecular structure of substrate by chemical means, e.g., cross-linking of substrate, hydrolysis of substrate, etc.
494 NOMINAL TEXTILE MANUFACTURE PROCESS COMBINED WITH DYEING
495 COATING OR SIZING WITH DYEING PROCESS OR PRODUCT
496 .Aminoplast or aminoplast precursor coating
497 FORMING, SHAPING, OR RESHAPING WITH DYEING PROCESS OR PRODUCT
498 PROCESS OF DYEING INVOLVING DRY POWDER APPLICATION
499 SPRAY-DYEING PROCESS
500 DYEING PROCESS UTILIZING MECHANICAL PRESSURE, E.G., PRESSES, ETC.
501 TWO-PHASE SYSTEM DYEING COMPOSITION OR PROCESS
502 REPLENISHMENT OR REPLACEMENT OF SAME BATH LIQUOR IN DYEING PROCESS
503 DYEING PROCESS INVOLVING BURNING OF REAGENTS
504 PROCESS INVOLVING PLURAL APPLICATION STEPS WITH SAME DYE
505 DIFFERENTIAL FLUID PRESSURE ASSISTED DYEING PROCESS, E.G., AIR PRESSURE, VACUUM, ETC.
506 NONTEXTILE, DYEING PROCESS OR PRODUCT, INCLUDING INORGANIC FIBER
507 .Contact lens
508 .Vinyl chloride polymer substrate
509 .Acrylate polymer substrate
510 .Acrylonitrile polymer substrate
511 ..Contains basic addition comonomer, e.g., vinyl pyridine, etc.
512 .Polymer from polyol and a polycarboxylic acid or derivative substrate
513 .Olefin polymer substrate or rubber
514 ..Styrene polymer
515 .Polymer from isocyanate and polyol, e.g., polyurethane, etc., substrate
516 .Amide polymer substrate
517 ..Natural polyamide, e.g., casein, gelatin, keratin, collagen, etc.
518 .Cellulose substrate other than paper
519 ..Cellulose ester or cellulose ether
520 .Phenol-aldehyde resin substrate
521 .Oil, fat, wax, or gasoline dyeing
522 .Inorganic substrate
523 ..Silica or calcareous substrate, e.g., glass, etc.
524 DRY DYE COMPOSITION OTHER THAN MERE MIXTURE OF TWO OR MORE DYES ALONE OR PROCESS OF MAKING
525 .Dye soap or detergent
526 .Dye in specified form other than mere powder
527 DYE CONCENTRATE COMPOSITION WHEREIN AN ADDITIONAL AMOUNT OF A CONSTITUENT OF THE COMPOSITION MUST BE ADDED BEFORE USE
528 .Highly viscous dye concentrate, e.g., paste, etc.
529 MULTIPLE CHEMICALLY DIVERSE FIBERS OR FIBERS WITH DIFFERENT CROSS SECTION, PROCESS OF DYEING OR PRODUCT
530 .Resisting a fiber
531 .Synthetic polyamide
532 .Polyester fiber and cellulose fiber
533 .Polyster fiber and wool or silk fiber
534 .Polyacrylonitrile fiber
535 PHENOL-ALDEHYDE FIBER DYEING COMPOSITION, PROCESS, OR DYED PRODUCT
536 FIBER DERIVED FROM SAPONIFIED CELLULOSE ESTERS OR FROM NITROCELLULOSE CONVERTED TO CELLULOSE, DYE COMPOSITION, PROCESS, OR PRODUCT
537 MERCERIZED CELLULOSE FIBER OR PARCHMENTIZED CELLULOSE FIBER DYEING COMPOSITION, PROCESS, OR PRODUCT
538 GELLED FIBER-DYEING PROCESS OR PRODUCT
539 SYNTHETIC FIBER PRODUCED FROM MATERIAL WHICH CONTAINS PENDANT -COO-, -(O=)S(=O)-O-, -O-(O=)P(=O)-O-, PYRIDINO, DIALKYLAMINOALKYL-, OR QUATERNARY AMMONIUM RADICAL, DYEING PROCESS OR PRODUCT
540 .Quaternary ammonium, pyridino, or dialkylaminoalkyl
541 ACYLATING AGENT OR CROSS-LINKER DYE ADDITIVE, COMPOSITION, PROCESS, OR PRODUCT
542 .Pretreatment of substrate
543 REACTIVE DYE COMPOSITION, PROCESS, OR PRODUCT
544 .1,2-epoxy terminal group dye or Halohydroxdye, e.g., -CH(OH)-CHCl containing
546 .Thiosulfato group containing dye
547 .Quaternary ammonium group containing dye
548 .Alkylene phosphate or phosphite dye
549 .Alkylene sulfato, halotriazine, halodiazine, haloquinoxaline, or halopyrimidine dye
550 ORGANIC ADDITIVE FOR DYE COMPOSITION, DYE COMPOSITION CONTAINING ORGANIC ADDITIVE, PROCESS OR PRODUCT; OTHER THAN EMULSIFIER, PH ADJUSTER OR STARCH OR GUM PRINT PASTE THICKENER
551 .Ethylenimine or polymer thereof or polyalkylene polyamine
552 .Polymeric additive
553 ..Derived from vinyl pyrrolidone or vinyl pyridine
554 ..Cationic polymer, e.g., aminated polymer without -COO-, -(O=)S(=O)-, -O-(O=)P(=O)-O- groups, e.g., polyacrylamide, etc.
555 ...Acrylamide or dialkylaminoalkylacrylate polymer
556 ...Cyanamide- or dicyandiamide-formaldehyde polymer
557 ..Acid polymer, e.g., carboxylated or sulfonated polymer
558 ...Acrylic acid polymer
559 ...Carboxyalkylene cellulose
560 ...Phenol-aldehyde polymer
561 ..Carbohydrate
562 ...Cellulose ester or cellulose ether
563 ..Polypeptide or protein
564 .Lactam
565 .Six-membered hetero ring having two or more ring hetero atoms of which at least one is nitrogen
566 ..Triazines (including hydrogenated)
567 ..Diazines (including hydrogenated)
568 .Six-membered hetero ring consisting of one nitrogen and five carbon atoms
569 ..Quinolines
570 .Five-membered hetero ring having two or more ring hetero atoms of which at least one is nitrogen
571 ..Hetero N ring contains a sulfur atom (including hydrogenated)

ORGANIC ADDITIVE FOR DYE COMPOSITION, DYE COMPOSITION CONTAINING ORGANIC ADDITIVE, PROCESS OR PRODUCT; OTHER THAN EMULSIFIER, PH ADJUSTER OR STARCH OR GUM PRINT PASTE THICKENER
.Five-membered hetero ring having two or more ring hetero atoms of which at least one is nitrogen
572 ..Hetero N ring contains an oxygen atom (including hydrogenated)
573 ..Hetero N ring contains at least two nitrogen hetero atoms (including hydrogenated)
574 .Five-membered hetero ring consisting of one nitrogen and four carbon atoms
575 .Sulfur-containing hetero ring
576 .Oxygen-containing hetero ring
577 ..Furyl (including hydrogenated)
578 ..Lactones
579 ..Hetero ring is six-membered consisting of one oxygen and five carbons
580 .Fats, higher fatty acids or esters, oils or waxes, other than nitrogen-containing
581 .Silicon-containing
582 .Carboxylic acid esters, cyanates, isocyanates, or sulfur analogues thereof
583 ..Aromatic
584 .Phosphorus-containing
585 .Ureas, thioureas, pseudoureas, or pseudothioureas
586 .Carboxamides or thiocarboxamides
587 .Sulfur-containing
588 ..Sulfonic acids or sulfonic acid esters
589 ...Aromatic
590 ....Amino
591 ...Acyclic
592 ..Sulfamic or sulfinic acids, salts, or esters
593 ..Sulfonamides
594 .Carboxylic acid or salt thereof
595 ..Tannins or tannic acid
596 ...Contains heavy metal
597 ..Amine
598 ..Acyclic
599 ...Hydroxy-containing
600 ...Heavy metal-containing
601 ...Halogen-containing
602 .Nitrogen-containing, other than nitro or nitroso
603 ..Nitrile
604 ..Amino alkanol
605 ..Anilines
606 ..Quaternary ammonium compound
607 .Ketone
608 .Aldehyde
609 .Ether
610 ..Aryl ether
611 .Alcohol
612 ..Chlorohydrin
613 ..Phenols
614 .Halogen-containing
615 ..Fluorine
616 ..Aromatic
617 .Hydrocarbon
618 INORGANIC ADDITIVE FOR DYE COMPOSITION, DYE COMPOSITION CONTAINING INORGANIC ADDITIVE, PROCESS OR PRODUCT; OTHER THAN EMULSIFIER, PH ADJUSTER, WATER, NITROUS ACID FOR AZO COUPLING OR SULFUR REDUCING AGENT FOR VAT OR SULFUR DYE
619 .Ammonia
620 .Ammonium salt
621 .Molybdenum, uranium, or tungsten (wolfram)
622 .Group VA metal (As, Sb, Bi)
623 .Group VIII metal (Fe, Co, Ni, Os, Ir, Pt, Ru, Rh, Pd)
624 .Group IB metal (Cu, Ag, Au)
625 .Group IIIA metal (Al, Ga, In, Tl)
626 .Group IV metal (Sn, Pb, Ge, Ti, Zr, Hf)
627 .Group VB metal (V, Nb, Ta)
628 .Group VII metal (Mn, Tc, Re)
629 .Group IIB metal (Zn, Cd, Hg)
630 .Boron
631 .Nitrogen
632 .Silicon
633 .Phosphorus
634 .Halogen acids
635 .Chromium
636 DYE OR POTENTIAL DYE COMPOSITION, ADDITIVE, TREATMENT, PROCESS, PRODUCT, OR ANCILLARY DYE OPERATION
637.1 .Pigments used as dyes (imbibition of a pigment)
638 .Mixed dyes, noncomplexed
639 ..Azo
640 ...With sulfur dye or vat dye
641 ...Sulfonated azo
642 ..Sulfur dye or vat dye
643 ..Anthraquinone dye
644 ..Basic dye
645 .Inorganic dye (mineral dye)
646 .Dye extracted from natural product
647 .Polymeric dye, e.g., a chromophore pendant from an addition polymer, etc.
648 .Fluorescent dye, e.g., stilbene, benzimidazole, benzoxazole, benzothiazole, pyrazoline dye, etc., optical brightner or bluing agent
649 .Oxidation dye, e.g., aniline, nitroaniline, etc.
650 .Sulfur dye or vat dye
651 ..Soluble leuco ester salts
652 ..Sulfur dye (sulfur-organic reaction product dye)
653 ..Indigoid dye
654 .Basic (cationic) dye containing strongly basic onium or alkylene imine group
655 ..Heterocyclic onium group, e.g., pyridinium, etc.
657 .Basic dye, including diphenylmethane, triphenylmethane, xanthene, fluorene, methine, acridine, oxazine, phenazine, flavylium, naphthoperinone, quinophthalone, etc., group-containing
658 ..Acid dye form, e.g., with sulfonic acid group, etc.
659 ..Methine group
661 .Phthalocyanine dye
662 .Azo, acridone, or quinone dye
663 ..Naphthoquinone dye
664 ..Stabilized or potential diazo compound
665 ...Nitrosamine or N-diazo
666 ..Azo developed on the fiber
667 ...Nitroaromatic component
668 ...Pyrazolone component
669 ...Polyazo component
670 ...Heterocyclic component
671 ...Me-C(=O)-CH-C(=O)- group-containing
672 ..Dye containing removable solubilizing group, e.g., lactam radical, etc., or the dye is oxidized to insolubilize
673 ..Dye containing -COOH
674 ...Metallized, heavy metal
675 ...Anthraquinone dye
676 ...Sulfonic acid or salt thereof or sulfonamide

	DYE OR POTENTIAL DYE COMPOSITION, ADDITIVE, TREATMENT, PROCESS, PRODUCT, OR ANCILLARY DYE OPERATION
	.Azo, acridone, or quinone dye
	..Anthraquinone dye
677	...Heterocyclic group
678	...Phenoxy, phenol, mercapto, alkoxy, or thioalkyl group
679	...Anilino group on the anthraquinone nucleus
680	..Dye containing -(O=)S(=O)-O-, -O(O=)S(=O)-O- or phosphorus oxide group
681	...Sulfonated azo
682	....Monoazo
683	.....Monosulfonated
684	......Heterocyclic
685	..Metallized dye, including metallization during dyeing (i.e., including in situ forming of metallized dye)
686	...Heterocyclic
687	..Polyazo dye
688	..Six-membered hetero ring having two or more ring hetero atoms of which at least one is nitrogen
689	...Diazines (including hydrogenated)
690	..Five-membered hetero ring having two or more ring hetero atoms of which at least one is nitrogen
691	...Thiazoles (including hydrogenated)
692	...Diazoles or triazoles (including hydrogenated)
693	..-COO-alkyl or -COO-aryl hydrocarbon
694	..Aryl-(O=)S(=O)-N-
695	..HO-C-C-N-
696	..Carbonyl bonded directly to nitrogen
94.1 R	TREATMENT OF HIDES, SKINS, FEATHERS AND ANIMAL TISSUES

94.19 R	.Tanning
94.19 C	...Resin condensation in situ in leather
94.2	..With subsequent treatment
94.21	...Organic material
94.22	....Fat, fatty oil, fatty oil acid or salt thereof
94.23	.....Emulsions
94.24	..With aldehyde-aromatic condensation product
94.25	..With heavy metal compound
94.26	...With organic material
94.27	...Chromium compound
94.28	...Iron compound
94.29	..With aluminum compound
94.3	...With vegetable extract
94.31	..With cellulose liberation liquor
94.32	..With vegetable extract
94.33	..With organic material
101	BLEACHING
102	.Color stripping or subduing
103	.Wave energy
107	.Chemical
108.1	..Chlorine
109	...With sulfur compounds or peroxides or oxygen
110	..Sulfur compounds
111	..Peroxides or oxygen
112	IMPROVING FELTING PROPERTIES (E.G., CARROTING)
114	ORNAMENTAL EFFECTS
114.5	.Differential creping
114.6	.With fiber destruction or removal
115	.With local treatment
115.51	CHEMICAL MODIFICATION OF TEXTILES OR FIBERS OR PRODUCTS THEREOF
115.6	.With coating, sizing, or lubricating
115.7	.Mixed fibers
116.1	.Cellulose fibers
181	..Treatment with nitrogen-containing organic compound
182	...With aminoplast condensate or aminoplast condensate-former
183	....Triazine-aldehyde condensate
184	....Amido-aldehyde condensate
185	.....Urea-aldehyde condensate
186	......Alkylatedurea-aldehyde condensate
187	.....Carbamic-aldehyde condensate
188	...Quaternary ammonium compound
189	...Heterocyclic nitrogen compound
190	....Triazine
191	....Three-membered ring with two C and one N
192	...Cyano-, isocyano-, thiocyano-, or isothiocyano-group containing
193	....Ethylenic radial containing
194	...Amide
195	....Urea or thiourea
196	...Amine
116.4	..Treatment with aldehyde or ketone
117	..Wool-like or crinkle effects
118	..Transparent, parchmentized, or linen finish
119	...Paper
120	..Esterifying, etherifying or immunizing
121	...Acetylation
122	...Xanthogenation
123	..Cuprammonium treatment
125	..Mercerizing or alkaline treatment
127	...Wetting addition or pretreatment
127.1	..Treatment with phosphorus containing material
127.5	.Proteinaceous fibers
127.51	..Hair
127.6	..Treatment with aldehyde or aldehyde derivative, ketone or nitrogen containing organic compound
128.1	..Natural wool or silk
128.3	...Chemical modification in the presence of a sulfur or silicone containing material
129	.Cellulose ester or ether fibers
115.52	.Using wave energy, electrostatic field or electrical discharge
115.53	..Ultraviolet radiation
115.54	.Treating textiles or fibers from synthetic resin or natural rubber with chemical reactant
115.55	..Single fiber or filament containing more than one synthetic organic polymer
115.56	..Organic chemical reactant
115.57	...Reactant contains heterocycle
115.58	....Reactant contains nitrogen heterocycle
115.59	.....Contains six-membered nitrogen heterocycle
115.61	....Reactant contains oxygen heterocycle
115.62	...Reactant contains nonaromatic carbon-carbon double bond
115.63	....Reactant containing nonaromatic carbon-carbon double bond also contains sulfur atom

	CHEMICAL MODIFICATION OF TEXTILES OR FIBERS OR PRODUCTS THEREOF
	.Treating textiles or fibers from synthetic resin or natural rubber with chemical reactant
	..Organic chemical reactant
115.64	...Organic reactant contains element other than C, H, O, N or S
115.65	...Organic reactant contains nitrogen
115.66	....Organic reactant contains plural nitrogen atoms nonbonded to each other
115.67	....Reactant contains isocyanate group
115.68	..Inorganic nongaseous chemical reactant
115.69	...Oxidizing or alkaline agent
130	..Saponifying
130.1	SWELLING OR PLASTICIZING OF ARTIFICIAL FIBERS
131	.Cellulose ester or ether fibers
132	..With stretching
133	FIBER PROTECTING DURING FLUID TREATMENT
137	CLEANING OR LAUNDERING
137.5	.Removing formation impurities from artifical fiber
138	.Degumming or desizing
139	.Scouring, degreasing or bowking
139.1	..With fat solvent
140	.Carbonizing
141	.Waste reclaiming and conditioning
142	.Dry cleaning
147	FLUID TREATMENT (MANIPULATIVE)
148	.Confined areas
149	.Intermittent length
149.1	.Combined liquid and gas or vapor
149.2	.Gas or vapor
149.3	..Including steam
150	.Special forms and forming
150.5	..Hides, skins or leather
151	..Running lenghts
151.1	...Helical textile course
151.2	...Yarns
152	...Piling
154	..Wound packages
155	...Yarns
155.1	....Radial liquid flow
155.2	....Skeins, cakes or cheeses
156	..Pulp or fibers (in bulk)
157	.Kier treatment

CLASS 15 BRUSHING, SCRUBBING AND GENERAL CLEANING

DECEMBER 1990

1	MISCELLANEOUS
1.51	ELECTROSTATIC CLEANING
1.52	.Hand implement
1.7	SUBMERGED CLEANERS WITH AMBIENT FLOW GUIDES
3	MACHINES
3.1	.For fruit, vegetables, meat or eggs
3.11	..With assorting or screening
3.12	..Fluid application and/or work heating (e.g., drying)
3.13	...Work moved through apparatus
3.14	....Liquid application only
3.15	.....Work treating element and/or work immersed
3.16	..Work moved through apparatus
3.17	...Transverse axis work treating elements
3.18	....Longitudinally movable elements
3.19	...Fixed axis rotary work treating conveyor
3.2	....Axial work feed
3.21	...Work conveyor mounted work treating elements
3.5	.With means to pass a solid cleaning agent and a fluid carrier through tubular work
3.51	..With conservation or recovery of the cleaning agent
3.52	...By attached line
3.53	.Erasing
300.1	.With air blast or suction
301	..Fixed position cleaners or installed cleaning systems
302	...With liquid or other cleaning material application to work
303	...With work handling or supporting
304	....Hollow work internal cleaning, e.g., bag and/or bottle cleaners
305	....Tumbling cylinders or cages
306.1	....With means to guide or move the work to or through a cleaning station or treating means
307	.....With work-width compensating features
308	.....With work agitator, e.g., brushing, beating, shaking
309	......Plural diverse types, e.g., beating and brushing
309.1	.....Indefinite length article
309.2	.....Plurality of discrete articles
310	....Manual application of work to cleaning means
311	.....With moving work-agitating means
312.1	...With fixed guide for ambulant air draft applying means
312.2	....Flexible tube
313	...Installed in automobile or other vehicle for the cleaning thereof
314	...With flexible conduit connection between ambulant air draft applying means and relatively stationary air pump or supply
315	....Extensible and retractable conduit
316.1	...Air blast only (e.g., boiler soot-blower)
317	....With blowing element housing or protecting feature, e.g., embedded, disappearing or cooling
318	....Moving nozzle with air supply control interlocked with nozzle motion means
318.1	....Sequence control
319	..With automatic control
320	..With liquid or other cleaning material application to work
321	...Manipulatable nozzle with flexible conduit connection to portable power and/or material supply unit, e.g., window washer
322	...Nozzles
323	..With storage facilities for tools or nozzles, conduits, etc., e.g., racks and cabinets
324	..Illuminator for work area
325	..With fender or bumper, i.e., furniture guard
326	..With sound muffling feature
327.1	..Tank type cleaner organization
327.2	...Casing feature
327.3	....Air float or support
327.4	....Cleaner encircling roller
327.5	....Off-the-floor support (e.g., operator supported)
327.6	...Vertically aligned motor and filter
327.7	...Horizontally aligned motor and filter
328	..Convertible
329	...To or from hand held and hand manipulated
330	...Suction to or from blast
331	...Plural selective air draft means, e.g., on-floor to off-floor
332	....With agitator and/or fan interlock, e.g., floor or rug safety feature
333	.....Floor nozzle elevating
334	....Floor nozzle air flow diverted to off-floor cleaning means
335	.....Tubular handle, e.g., "Air-Way" type
336	......With supporting means, e.g., wall-mounted clamp
337	.....By insertion or attachment of additive converter
338	...Converter attached to floor nozzle mouth
339	..Combined, e.g., with signal or indicator
340.1	..Power propelled vehicle or carrier
340.2	...Maneuvered by walking attendant
340.3	...Including brush
340.4	....Plural brushes
341	..Traction or manual operation of air pump or fan
342	...Rotary air impeller
343	....Hand cranked
344	..Hand supported and manipulated, e.g., miniature or upholstery type
345	..Air blast with suction
346	...Closed circuit systems, i.e., air recirculating
347	..With dust or dirt handling or storing or separating, e.g., filter bags
348	...With conveying means additional to air stream
349	...With receiver for dirt from rotary or moving agitator
350	...Separator mounted on or attached to manipulating handle, e.g., push-broom type
351	....Handle movable relative to floor tool air exhaust conduit
352	...Separator element cleaning in situ and/or storage or removal of retained dirt
353	...With liquid and/or deflection type separator
354	..With work-contacting carriage or mount, and relatively adjustable nozzle
355	...With agitator adjustable relative to nozzle
356	....Interlocked or simultaneous adjustment
357	...Suction responsive

	MACHINES
	.With air blast or suction
	..With work-contacting carriage or mount, and relatively adjustable nozzle
358	...With work surface contact or penetration sensing
359	...Biased or floating nozzle
360	....Urged away from contact with work
361	...Handle operated or handle associated control
362	..With nozzle carriage or mount having work-surface penetration control, e.g., differential area supporting wheels
363	..With mechanical agitating means
364	...Diverse agitating operations, e.g., brushing with beating or movable with stationary
365	....Selective
366	....Rotary only, e.g., "Hoover" type beating brush
367	....Stationary or non-moving agitating means only
368	...Adjustable with respect to nozzle
369	....Responsive to translational movement of nozzles
370	....Rotary agitator with radially adjustable elements, e.g., wear compensating
371	....Floating or resiliently biased contact with work surface
372	.....Rotary work contactor
373	....Retractable, i.e., selective use
374	...Oblique or V-shaped arrangement of agitator
375	...With auxiliary ambient air inlet to nozzle, e.g., through air tunnel and/or agitator
376	....Agitator bearing or drive air bleed
377	...Auxiliary or separate, i.e., non-fan, driving motor
378	...With guard to inhibit work entry into nozzle mouth
379	...Vibrating nozzle or nozzle lips
380	...Rectilinearly moving parallel to work surface, e.g., scrubbing
381	...Oscillating agitator, e.g., sweeping
382	...Striking beater, i.e., perpendicular movement
383	...Rotary agitator
384	....Tandem agitator units
385	....Axis non-parallel to work surface
386	....With eccentrically mounted turnable work contacting elements
387	....Air current operated
388	....Traction operated
389	....Drive details
390	.....With clutch or other drive disconnect
391	.....Belt or drive housings or other protective features
392	.....Agitator bearings or supporting details
393	...Stationary agitator
394	....Work piece surrounding or opposed agitators, e.g., bar or slat cleaners
395	....For opposed surfaces or hollow work internal cleaning
396	....Hollow head with perforate reticulate supporting surface for agitator
397	.....With tubular air nozzles interspersed throughout work contacting surface
398	....Bristle brush type
399	.....With bristle bridle or air seal or shroud
400	.....Nozzle attachment type
401	....Scraper or squeegee type
402	.....Serrated or toothed, e.g., comb or rake type
403	....Dry mop type, e.g., textile strand or sheet pelt
404	..With pulsating air flow
405	..Air blast only
406	...For hollow work, internal cleaning, e.g., tube soot-blowers
407	....Work operated valve
408	....With induced flow of ambient air, e.g., jet pump
409	..Jet pump suction-devices
410	..Handle features, e.g., limit stops or storage locks
411	...Angular or lateral adjustment of cleaner by axial rotation of handle
412	..Motor features, e.g., housing or casing assemblies
413	...Air cooling by other than main air stream
414	..Detachable and/or extension nozzles
415.1	..Nozzle
416	...With plural mouths selectively usable, e.g., "duplex" nozzles
417	....Top and bottom reversible type
418	...With area adjusting, e.g., restrictors
419	...With air flow control means, e.g., work-operated valve
420	...With notched or grooved lips for localized intensification of air draft
421	...With auxiliary inlet for ambient air, e.g., vacuum relief
422	...With guard to inhibit work entry into nozzle mouth
422.1	...Width changes along transverse dimension
422.2	..Plural fans
4	.Combined
5	..Beater and brush
21.1	.Brushing
21.2	..Ball cleaner
22.1	..Handle mount
22.2	...Reciprocating tool
22.3	...Belt brush
22.4	...Swinging tool
23	...Rotary cylinder
24	....Fountain
25	....Manual motor
26	.....Alternating
27	....Traction operated
28	...Rotary disk
29	....Fountain
30	..Boot cleaning, blacking, and polishing
31	...Polish supplying
32	...Rotary reciprocating brush
33	...Reciprocating brush
34	...Rotary brush
35	....Planetary
36	..Boot cleaners and polishers
37	...Reciprocating brush
38	..Brush cleaners
39	..Comb cleaners
39.5	..Table top or tablecloth cleaner
40	..Flexible-fabric cleaners
41.1	...Carpet sweeper
42	....Auxiliary brush
43	....Combined fan and brush
44	....Dust laying
45	....Fenders
46	....Manual motor
47	....Non-rotary
48	....With brush cleaner

	MACHINES
	.Brushing
	..Flexible-fabric cleaners
	...Carpet sweeper
48.1	....Unidirectional drive
48.2	....Bellows type
49.1	..Floor and wall cleaner
50.1	...Scrubber
50.2	....Reciprocating brush
50.3	....Cylindrical brush

234	.Having staggered leaves

HINGE
235 .Including adjustment for changing relative orientation of hinged members
236 ..Having plural independent adjustments
237 ...All rectilinear
238 ....Including screw-operated means to move hinged members
239 ..Pivotal adjustment
240 ...Including screw-operated means to move hinged members
241 ....About hinge axis
242 ..Including means to move hinged members
243 ...Along or parallel to hinge axis
244 ....Including threaded hinge pin
245 ...Screw-operated
246 ....To shift plate toward or away from hinged member
247 ..Having adjustable spacer between leaf and hinged member (e.g., shim)
248 ..Adjustable along or parallel to hinge axis
249 ..Having interdigitated surfaces or slot for hinge-to-member fastener
250 .Having cover
251 ..Leaf cover
252 .Having clamp for attaching hinge to hinged member
253 ..Circumferential clamp
254 .Having means to facilitate assembly and disassembly of hinge sections to join or disjoin hinged members
255 ..Resiliently biased hinge
256 ...Having helical spring along hinge axis
257 ..Resiliently biased retaining means
258 ...Having discrete latch and spring to slide or pivot latch
259 ...Discrete retaining means for pivotal contacting surfaces
260 ..Separation of pivotal contacting surfaces
261 ...Having movable or removable connector
262 ....Pintle removable from remainder of hinge
263 .....And additional connector for pintle or separate pintle sections
264 ....Screw-threaded connector
265 ...Axially shifting hinge sections
266 ....At specific angular orientation of hinge sections
267 ...Hook and pin
268 ...Hook in aperture
269 ...Hook to hook
270 ..And discrete movable or removable connector to fasten one hinge section to another
271 ..By relatively sliding connection (e.g., dovetail)
272 ...Including receiving connector attachable to hinged member
273 .Having means to reduce friction between hinge parts
274 ..By fluid lubricant
275 ..Ball or roller bearing
276 ...Circularly distributed balls or rollers
277 .Resiliently biased hinge
278 ..Including means to render spring ineffective through all or a portion of swing
279 ...Comprising manipulatable element or portion
280 ..Biased from either direction toward neutral position (e.g., double acting)
281 ...Helical spring transverse to hinge axis
282 ...Plural hinge axes (e.g., multiple pintle)
283 ....And barrels for helical springs on separate axes
284 ...Resiliently biased rolling or sliding cam surface
285 ...By helical spring along hinge axis
286 ..Having transverse helical spring or elastic strip
287 ...Plural hinge axes (e.g., multiple pintle)
288 ....Four or more axes
289 ...To counterbalance weight of hinged member (e.g., closure biased to open position)
290 ....Including pivoted coaxial spring retaining bar
291 ...Over-center spring or linkage travel (e.g., "holdback hinge")
292 ...Having means to hold hinged members against pivotal movement about hinge axis (i.e., catch)
293 ..Over-center spring or linkage travel (e.g., "holdback hinge")
294 ...Plural hinge axes
295 ...Coil spring having axis along or parallel to hinge axis
296 ...Including camming or sliding surface to deflect spring perpendicularly to the hinge axis
297 ..Having means to hold hinged members against pivotal movement about hinge axis (e.g., catch)
298 ..Having force adjustment
299 ...Rotatable spring-engaging collar
300 ....Having detention aperture or protuberance
301 ....Having tool-receiving aperture
302 ..Plural hinge axes (e.g., multiple pintle)
303 ..Having axially biased camming surface
304 ..Coil
305 ...Plural coils
306 ...To counterbalance weight of hinged member (e.g., horizontal closure biased to open position)
307 ...On pintle
308 ..Torsion spring
309 .Gravitating hinge having vertical axis
310 ..Having lift rod
311 ..Having plural spaced hinge axes
312 ..Including cam surface and follower
313 ...And rolling element
314 ....Between opposing surfaces
315 ....And detent in cam surface
316 ...On axially twisted or helically fluted element
317 ...Including means to hold hinged members against pivotal movement
318 ...Having aperture for slidably receiving pintle (e.g., camming knuckle)
319 .Including means to hold or retard hinged members against pivotal movement (e.g., catch)
320 ..Magnetic
321 ..Resiliently biased catch
322 ...Having spring force adjustment
323 ...Including toggle linkage
324 ...Having discrete manipulatable release means (e.g., lever)
325 ....Including cam or eccentric
326 ....Sliding release means or lever-actuated sliding catch
327 ...Sliding
328 ....Movement along or parallel to hinge axis
329 .....Interdigitated or plural sockets

	HINGE
	.Including means to hold or retard hinged members against pivotal movement (e.g., catch)
	..Resiliently biased catch
	...Sliding
	....Movement along or parallel to hinge axis
	.....Interdigitated or plural sockets
330	......Opposed interdigitated sliding collars on hinge axis
331	.....And catch receiving socket
332	....And catch receiving socket
333	...Pivoted
334	...Plural alternately useable detents
335	...Spring arm
336	....Plural opposed arms
337	..By friction
338	...Screw-threaded adjustment
339	....Along or parallel to hinge axis
340	.....Threaded pintle
341	...Cam or wedge actuator
342	...On hinge pin or between surfaces surrounding hinge axis
343	..Pivoted
344	...Plural alternately useable detents
345	...And sliding
346	...Serially connected pivoted arms between leaves (e.g., brace)
347	...About axis along or parallel to hinge axis
348	..By transversely moving pin in slot
349	..Having discrete manipulatable release means (e.g., lever operated)
350	..By shifting hinged members
351	...Along hinge axis
352	..Sliding
353	...Along or parallel to hinge axis
354	.Including toothed gear
355	.Comprising nested open curved portions attached to hinged members
356	..Including hinge pin
357	.Including transversely moving pin in slot
358	..Plural noncollinear pins and slots
359	...Parallel slots
360	..Having pin fixed to pivoted arm or plate
361	..Hinge pin movable along slot
362	.Including sliding surfaces to permit relative translation of hinged members
363	..And stop or abutment for pivotal movement
364	..Movement transverse to hinge axis
365	.Three-hinged members
366	.Having plural hinge axes (e.g., multiple pintle)
367	..Having transverse or skewed axes
368	..Connected by serially arranged pivoted links between hinged members
369	...Plural sets of serially arranged pivoted links
370	..Four or more axes
371	..Including stop or latch
372	.Including laminated leaf
373	.Wire hinge
374	.Having stop or abutment
375	..Adjustable or resilient
376	..Comprising relieved axially opposed relatively rotating surfaces
377	..Comprising platelike bearing portion curved about hinge axis
378	.Hinge axis passes through hinged member (e.g., floor hinge)
379	..Pintle or pivot concealed in hinged member

380	.Including means to retain pintle in hinge (e.g., tamper proof, nonrising pintle, etc,)
381	..Threaded or slotted pintle or knuckle
382	.Including means to fasten leaf to member
383	..By expandable connector
384	..Self-penetrating fastener
385	.Specified material
386	.Specific pintle structure
387	.Specific leaf structure
388	.Having prongs or cooperating structure on leaf
389	..Angular leaf sections
390	...Parallel sections
391	...Coplanar sections
392	...Including planar section perpendicular to hinge axis

238	...By variation of fiber input rate
239	..With material sensing
240	...And speed changing
241	....By belt shifting
242	..With fiber stretching
243	..With doubling
244	..Apron type
245	...With clearing
246	...With condensing
247	...With fiber orienting
248	...Pressing or holding fibers against belt
249	...With auxiliary apron support
250	...Tensioning
251	....By roll
252	...With apron guide
253	....Including specific cross-guide structure
254	....Cradles
255	.....For plural aprons
256	...With adjustments
257	..With cooperating trough
258	..Roll type
259	...Including slip roll
260	...Including changing roll speed or location
261	....Roll-spacing adjusting
262	...With clearing
263	....Pneumatic
264	....Underclearing
265	....Top roll
266	...Pressure-applying devices
267	....With releasing means
268	.....Responsive to roll relationship
269	.....Gravity pressure means
270	....Signal
271	....Uniform pressure applying to all rolls or plural pairs from a single source
272	....Magnetic, hydraulic, or pneumatic
273	....Applied through stirrup and saddle
274	.....Including fulcrumed lever linking stirrup and pressure means
275	......Gravity pressure applying means
276	.......With means to vary or permit variation of pressure effect on fulcrumed lever arm
277	.....Spring pressure applying means
278	....Applied through saddle
279	.....Spring pressure applying means
280	......With pressure-adjusting means
281	....Spring pressure applying means
282	.....With means to adjust pressure
283	....Gravity pressure applying means
284	....Saddle per se
285	.....Lubricating or antifriction means
286	...Roll condensing
287	...Reciprocating transverse guide, condenser or roll
288	...With fiber guide, condenser or brake
289	....Including marginal folding
290	....Presser
291	....Open type
292	....Adjustable
293	...Gear or friction driving
294	...Roll stands
295	....Top roll
144	ASSEMBLING
145	.Different materials
145.3	..Fiber to stick or rod
145.5	..Blending
145.7	...By carding
148	.Article, screen-condensing
149	.Article, winding
150	.Silver forming
151	..Fleece dividers
152	..Rub rolls
153	..Rub aprons
296	.Web forming
297	..With fiber sampling
298	..With split lap preventing
299	..Including continuous filaments
300	..Control means responsive to sensed condition or program
301	..Irregular, nonuniform, or patterned receiving surface
302	..Stratified or multilayer
303	..With divided fiber stream or separate handling of trash or fugitive fiber
304	..Fluid propelled to condenser
305	...With fiber liberation
306	....Gripping feed to fiber separator
307	.....Rotary condenser
308	...Rotary condenser
157	.Formed silvers
159 R	..Coiling
159 A	....Can changing
160	..Zigzag
161.1	.Formed web
163	..Zigzag

313 FB	...Fluidized bed
313 P	...Pan agglomeration
314	..Carbon

CLASS 24 BUCKLES, BUTTONS, CLASPS, ETC.

DECEMBER 1990

1	MISCELLANEOUS
2	ALBUM FASTENERS
2.5	GUN BAND TYPE
3 R	ARTICLE HOLDERS
3 A	..Arm and leg carried
3 B	..Neck supported
3 C	..Eyeglasses with retaining means
3 D	..Of wire
3 E	..Open ended
3 F	..Article holding receptacles
3 G	..Spectacle case with clip
3 H	..With pocket engager
3 J	..With spring clip
3 L	..With clip
3 M	..With flexible connector
3 K	..Key ring holder
4	.Chatelaine safety hooks
5	.Flower
6	..Pin attached
7	.Napkin
8	..Hook
9	..Neck inclosing
10 R	.Pencil
10 A	...Rule holder
11 R	..Clasp attached
11 FE	....Finger ear, belt attached pencil holder
11 PP	....Pencil holder with paper clip
11 CC	....Combined and convertible pencil holder
11 CT	....Container type pencil holder
11 HC	....Separate pencil holder and pocket engaging clip
11 S	....Sliding jaw pencil holding clip
11 C	....Wire pencil holder
11 F	....Flexible shank pencil-holder
11 M	....With movable catch (e.g., pin pivoted lever, roller, etc.)
11 P	....Pivoted jaw pencil holder
12	..Pin attached
15	.Sleeve
13	.Pin attached
16 R	BALE AND PACKAGE TIES, HOSE CLAMPS
16 PB	..Plastic band
17 R	.Packet holders
17 A	...Adjustable bands
17 B	...Closed loops
17 AP	...Plastic bands
18	..Cord
19	.With tighteners
268	..Wedge
269	..Winder
270	..Self-locking (dead center or snap action)
271	...Adjustable girth
272	....Rack bar
273	..Lever
274 R	..Worm and tooth
274 P	....Pivotal worm band clamp
274 WB	....Radial worm band clamp
275	..Integral thread
276	...External thread
277	....Both ends threaded
278	..Radial screw
279	..Tangential screw
280	...Adjustable girth
281	....Step adjustment
282	.....Plural separable parts
283	...Wire
284	...Plural separable parts
285	...Pivotal strap parts
286	...Plural wrap
20 R	.Metal bands
20 CW	...Circumferentially swagged band clamp
20 EE	...End-to-end integral band end connection
20 TT	...Ratchet and tool tightened band clamp
20 S	...Spring closed band clamp
20 LS	...Screw locked band clamp
20 W	...Swedged to lock band ends
21	..Separate connections
22	...One piece
23 R	....Sheet metal
23 B	......Buckle band connection
23 W	......Swedged sheet metal band connection
23 EE	......End-to-end integral with band connecting means
24	...Pivoted parts
25	...Wedging parts
26	...Wire
27	.Wire
28	..Separate connections
29	...Wire
30	.Wooden bands
30.5 R	BAG FASTENERS
30.5 W	..Swedged bag tie
30.5 P	..Plastic band bag tie
30.5 S	..Resilient slot bag tie
30.5 T	..Twist-to-close bag tie
30.5 L	..Slides to lock bag end within housing
31 R	BELT FASTENERS
31 B	..Butt connected belt ends
31 C	..V, round, trapezoidal belts
31 F	..Flanged belt ends, connector hold ends
31 L	..Lapped ends of endless belts
31 H	..Hinged ends of endless belts
31 W	..Wire strands reinforce belts
31 V	..Velcro and zipper belt end connection
32	.Tighteners
33 R	.Hinged
33 A	...Ring connected belt ends
33 F	...Bent over flanged ends
33 P	...Pintle pin connected belt ends
33 V	...V and round belts
33 L	...Overlapped belt ends
33 B	...Sheet metal knuckles, common pintle
33 C	...Wire knuckles, common pintle
33 K	...Knuckle integral with belt material
33 M	...Multiple pintles interconnected V-belt type
34	.Lacing
35	.One piece
36	..Deflecting prong
37	.Screw clamp
38	.Splices
39	.Wire
40	BUTTONERS
41	CUFF HOLDERS
42	.Adjustable
43	.Clasp button
44	.Clasp clasp
45	.Clasp hook
46	.Clasp pin
47	.Pin button
48	.Pin fastener
49 R	NECKTIE FASTENERS
49 CF	..Tie engaging loop with shirt or button engaging fastener
49 KC	..Knot engaging and collar attaching
49 K	..Key ornamented and article holder
49 M	..Magnetic, adhesive, snap connected tie and shirt fasteners
49 CC	..Clip and clasp connected
49 CP	..Clip and pin
49 S	..Slider
49 A	..Ornamental initials, arrows, cloth
49 P	..Pivotal jaws, pins
49 TS	..Tie stiffener with shirt fastener
49 C	..Resilient clasp
50	.Bands
51	..End-securing pin
52	..Gripping
53	..Depressors
54	...Button engaging
55	...Pin or spur

	NECKTIE FASTENERS
56	.Button engaging
57	..Adjustable
58	..Cord loop
59	..Pivoted or sliding jaw
60	..Pin attached
61	.Collar button combined
62	..Clasp attached
63	..Pin attached
64	..Separable fastener
65	.Tie, attached hook
67 R	PAPER FASTENER
67 AR	..Adhesive
67 CF	..Corner fastened
67 P	..Paper-penetrating
67.1	.With screw threaded or notch engaging securing means
67.3	.Resiliently biased
67.5	..Including means to open or close fastener
67.7	...Pivotally mounted on pintle
67.9	..One piece
67.11	...Mounted on support means
68 R	STRAP TIGHTENERS
68 J	..Jewelry
68 SB	..Seat belt
68 AS	..Accordion straps
68 PP	..Parallel poles clamp
68 FP	..Form panels for walls
68 CD	..Cargo tie down
68 CT	..Chain tighteners
68 BT	..Split band with tightener
68 TT	..Tire chain tighteners
68 SK	..Ski, boot and shoe fasteners
68 A	..Fixed jaw with sliding or pivoted jaw
68 B	..Rack and pinion and circular tighteners
68 C	..Circular flange container clamp
68 D	..Strap stretching tools, tighteners and sealers
68 E	..Buckle type
68 F	..Integral piece
68 T	..Toggle
68 SC	..Stocking top
69 R	.Cam lever and loop
69 ST	...Strap tighteners
69 TT	...Tie chain tighteners
69 CT	...Cargo tie down
69 CF	...Cover fasteners
69 T	...Chain tighteners
69 TM	...Strap tightener machine
69 TS	...Toggle actuated sliding jaw
69 J	...Jewelry
69 AT	...Split ring with tightener
69 FP	...Concrete form panels
69 SB	...Seat belt buckles
69 WT	...Chain, cable, wire tighteners and anchors
69 EF	...Envelope fasteners
69 SK	...Ski boot and garment fasteners
70 R	..Step adjusted
70 SK	....Ski boot and garment fasteners
70 T	....Split ring tightener
70 CT	....Chain and rope tighteners
70 TT	....Tire chain tighteners
70 ST	....Strap tighteners
70 J	....Jewelry
71 R	.Strap-attached folding lever
71 T	...Toggle latch
71 ST	...Strap tightener
71 TT	...Tire anti-skid strap tightener
71 SB	...Seat belts
71 A	...Split ring fasteners
71 J	...Jewelry-watch straps
71 TD	...Tie downs (covers, articles)
71 CT	...Cable, wire, rope tightener
71 SK	...Ski boot and garment fasteners
71 SD	...Dress hem raisers
71.1	.Midline
71.2	..Winders
71.3	...One-piece
72	TROUSER GUARDS AND STRAPS
72.5	BEDCLOTHES HOLDERS
72.7	T-HEAD NON-GRIPPING, FABRIC ENGAGING TYPE
381	ZIPPER OR REQUIRED COMPONENT THEREOF
382	.Plural zippers
383	..Zipper chain
384	..Having surface sealing structure
385	.Having slider or interconnected sliders with access opening for diverse-art-member
386	.Plural independently movable sliders
387	.With distinct, stationary means for anchoring slider
388	..And for aligning surfaces or obstructing slider movement
389	.With distinct member for sealing surfaces
390	.With distinct separable-fastener
391	.Having coiled or bent continuous wire interlocking surface
392	..With stringer tape interwoven or knitted therewith
393	..With stringer tape having specific weave or knit pattern
394	..With core encircled by coils or bends
395	..With mounting portion having structural formations complementary to stitching
396	..Attached by stitching
397	...String or stringer tape having distinctive property (e.g., heat sensitive)
398	..With stringer tape having distinctive property (e.g., heat sensitive)
399	.Having interlocking surface with continuous cross section
400	..Opposed interlocking surface having dissimilar cross section
401	.Having interlocking surface formed from single member with varying cross section
402	..Opposed surface having dissimilar cross section
403	.Interlocking surface constructed from plural elements in series
404	..Having either, noninterlocking element in, or interrupted, unequal length series
405	..With element structural feature unrelated to interlocking or securing portion
406	..Dissimilar opposed elements
407	..Wire element
408	..Preattached to mounting cord
409	..Having interlocking portion with specific shape
410	...Including symmetrical formations on opposite walls for engaging mating elements
411	...Including complementary formations on opposite walls for engaging mating elements
412	....Mating elements having reversed orientation of formations
413	..Having mounting portion with specific shape or structure
414	...Including embracing jaws
415	.Slider having specific configuration, construction, adaptation, or material
416	..Including relatively movable spaced wings (i.e., restraining walls)
417	..Including converging channel and relatively movable separator island

ZIPPER OR REQUIRED COMPONENT THEREOF
.Slider having specific configuration, construction, adaptation, or material
418 ..Including position locking-means attached thereto
419 ...Protrusion on pull tab directly engaging interlocking surfaces
420 ...Having surface engaging element shifted by reorientation of pull tab
421 ....Resilient or spring biased element
422 .....Selectively shifted by either of two pull tabs
423 .....With relatively movable link
424 .....Biased by distinct spring
425 .....Having aperture cooperating with guide post
426 ..Including means preventing bunching of Structure-to-be-secured or stringer
427 ..Having specific contour or arrangement of converging channel, separator island, or wing
428 ...Spaced segments of each wall of channel supported by different wings
429 ..Including pull tab attaching means
430 ..Including means for attaching components of slider together
431 ..With ornamental slider
432 .With means for concealing surfaces
433 .Including complementary, aligning means attached to ends of interlocking surfaces
434 ..Having specific mounting connection or reinforcing structure at connection
435 .Including means attaching interlocking surfaces together
436 .Including means for obstructing movement of slider
437 SLIT CLOSING MEANS INCLUDING GUIDES ON OPPOSITE EDGES OF SLIT AND SLIDABLE BRIDGING COMPONENT
438 .With hand-actuated lever for shifting bridging component
439 .Including structure linking and allowing variations in separation between opposite-guide-contacting portions of component
440 .Having bridging components attached in series along carrying element
441 .Having separate, independently movable, bridging components
442 INCLUDING READILY DISSOCIABLE FASTENER HAVING NUMEROUS, PROTRUDING, UNITARY FILAMENTS RANDOMLY INTERLOCKING WITH, AND SIMULTANEOUSLY MOVING TOWARDS, MATING STRUCTURE (E.G., "VELCRO")
306 .Combined with diverse fastener
443 .With distinct structure for sealing securement joint
444 .With feature facilitating, enhancing, or causing attachment of filament mounting surface to support therefor
445 .Having filaments formed from continuous element interwoven or knitted into distinct, mounting surface fabric
446 .Having filaments of varied shape or size on same mounting surface
447 .With feature facilitating or causing attachment of filament to mounting surface
448 ..Thermal or adhesive
449 .Having several, repeating, interlocking formations along length of filament
450 .Having opposed structure formed from distinct filament of diverse shape to those mating therewith
451 .Having filaments constructed from coated, laminated, or composite material
452 .Having mounting surface and filaments constructed from common piece of material
287 FREIGHT CONTAINER TO FREIGHT CONTAINER FASTENER
288 DRUM OR CAN SPACER FASTENER
289 TRIM MOLDING FASTENER
290 .Having externally threaded attaching means
291 ..And laterally extending biasing appendage
292 .Having laterally extending biasing appendage
293 .Resilient metal type
294 ..Strip formed
295 ..Sheet metal formed
296 ..Wire formed
297 .Plastic type
298 PLURAL FASTENERS HAVING INTERMEDIATE FLACCID CONNECTOR
299 .Chain connector
300 .Elastic connector
301 ..Strap connector
302 .Strap connector
303 HAVING MAGNETIC FASTENER
304 HAVING ADHESIVE FASTENER
305 COMBINED DIVERSE MULTIPART FASTENERS
307 .Buckle
308 ..And buckle
309 ...Having separate material adjustment means
310 ...Having separate disconnect means
311 ....Pivotal lever type
312 ...Having disconnect structure
313 ....Resilient cooperating means
314 ...And pin
315 ...Crossed belt accommodating
316 ..And clasp
317 ..And pin
318 ..And hook
319 ...Having disconnect means
320 ...Having penetrating prong
321 ...Buckle having plural receiving slots
322 ..And button
323 ..And separable fastenings means for attached fastener
324 ...Snap fastener
325 ..Having roller means
326 .Clasp
327 ..Having pivoted members
328 ...Cam type member
329 ...Plural clasps
330 ....And toggle operator
331 ....Spring biased
332 .....Coil
333 ....And cam
334 ...Coil spring biased
335 ..Plural clasps
336 ...Resilient type clasp
337 ....And cam
338 ....Spring biased jaw
339 ....Circular work engageable
340 ....And pin attachment
341 ....And disconnect means
342 ..And button
343 ..And hook
344 ...Having intermediate connector allowing movement
345 ....And adjustment means
346 ...Having gripping configuration on clasp jaw
347 ....Penetrating type
348 ...Having cam
349 ...Having separable jaws
350 ..And penetrating prong

	COMBINED DIVERSE MULTIPART FASTENERS
	.Clasp
351	..And pin
352	...Having separate pin loss prevention means
353	....Pin coextensive, coplanar and contiguous with clasp jaw
354	...Pin coextensive, coplanar and contiguous with clasp jaw
355	...Pin forms part of clasp jaw
356	.Pin
357	..And pin
358	...And disconnect means
359	....Hook and eye type
360	...And hook
361	....Having connector allowing movement
362	...Having intermediate connector allowing movement
363	..And hook
364	...Having intermediate connector allowing movement
365	....And adjustment means
366	...Hook having locking means
367	..And button
368	..And penetrating prong
369	.Hook
370	..And hook
371	...Having biasing spring
372	...Separately connected
373	...Having securing means
374	....Sliding
375	....Snap type
376	....Pivoted
377	..Having penetrating prong
378	..And button
379	.Button
380	.Penetrating prong
89	INTERCHANGEABLE BUTTON LOOP AND PIN
90 R	BUTTONS AND FASTENERS
90 A	..Ornamental buttons
90 B	..Tufting
90 C	..Fabric embracing
90 E	..Hollow with friction grip
90 HA	..Heat and adhesive secured
90 TA	..Thread-attached apertured buttons
90.5	.Loss-preventing devices
91	.Adjustable
92	.Cloth shanks and covers
93	.Multiple attachment
94	.Deflecting prong or rivet
95	..Anvil or plate
96	..Integral
97	.Hinged leaf
98	..Axially rotating
99	..Double
100	..Sliding
100.5	.Sliding bar
101 R	.Integral or rigid stud
101 B	...Bent sheet metal (integral)
102 R	.Link
102 A	...Integral rubber button, extendable shank
102 E	...Extendably connected
102 PL	...Pivoted leaf
102 SL	...Releasably locked
102 FC	...French cuff
102 T	...Tufting
102 P	...Integral piece
103	.Pin attached
104	.Separable
105	..Screw
106	..Spring
107	...Resilient head
108	...Resilient socket
109	...Rotating head
110	...With operatfng devices
111	.Separate thread bar
112	.Spiral fastener
113 R	.Covers
113 MP	...Metal or plastic caps
114	.Pads
712	DRAWSTRING, LACED - FASTENER, OR SEPARATE ESSENTIAL COOPERATING DEVICE THEREFOR
712.1	.Includes separate device for holding drawn portion of lacing
712.2	..Device engages tie in lacing
712.3	...And fully covers tie
712.4	..Device engages element or formation on lacing
712.5	..Having relatively movable holding components or surfaces
712.6	...With pivotal connection therebetween
712.7	...With integral resilient linking structure therebetween
712.8	....Formed from wire
712.9	..Having lacing wound thereabout or wedged therein
713	.With holding means fixedly mounted on lacing
713.1	..And forming lacing tips
713.2	.Includes lacing holding structure within directing means therefor
713.3	.Having diverse shaped directing means for lacing
713.4	.Having lacing directing means in particular pattern
713.5	.Includes lacing guiding roller within directing means
713.6	.Having eyelet type directing means
713.7	..With permanently deformed mounting structure
713.8	...Mounting structure formed from different material than directing passage
713.9	.Having hook shaped directing means
714	..And movable component or surface for closing throat
714.1	..Mounted by structure allowing bodily movement thereof
714.2	..Formed from wire
714.3	..With mounting structure formed from different material
714.4	..With permanently deformed mounting structure
714.5	...Expanding stud
714.6	.Having loop or sleeve shaped directing means
714.7	..Entirely formed from flaccid material
714.8	..Mounted by structure allowing bodily movement thereof
714.9	..Formed from wire
715	..With permanently deformed mounting structure
715.1	...Loop or sleeve closed when mounted
715.2	...Expanding stud
715.3	.Having elastic segment in lacing
715.4	.Having means covering tip of lacing
715.5	..Tasseled
715.6	..With plural components
715.7	..With permanently deformed mounting structure
114.5	STRAP CABLE OR PIPE BUTTON
115 R	CORD AND ROPE HOLDERS
115 A	..Bendable, ductible
115 F	..Safety release
115 G	..Alignable aperture and spring pressed moving element
115 H	..Loop, adjustable
115 J	..Snubbers, cleats by dielectric loss
115 K	..Loop engaging
115 L	..Ball or roller
115 M	..Sliding wedge
115 N	..Helical preform
116 R	.Chain
116 A	...Bead chain fasteners

	CORD AND ROPE HOLDERS
122.3	.Sheathed strand
122.6	.Plural-strand cord or rope
127	.Friction disk
128	.Knot engaging
129 R	.One-piece
129 B	...Sheet material
129 A	...Slack adjuster
129 D	...Rubber
129 C	...Wire
129 W	...Swagged, deformable
130	..Wedge slot
131 R	..Wire
131 C	....Cord runs thru center of coil
132 R	.Pivoted part
132 AA	...Pivotal means with plate aperture
132 WL	...Jaws locked together by cam, wedge, lever, or screw
133	..Lever tension
134 R	..Cam lever
134 KA	....Laterally shifted rope
134 KB	....Cam engaging or disengaging
134 L	....Fixed and movable jaws, movable jaw pulled
134 N	....Link-connected parallel jaws
134 P	....Dual cam
135 R	.Screw clamp
135 A	...Screw clamp with snubber
135 K	...Tangential bolt
135 L	...J- shaped bolt
135 N	...Bolt perpendicular to cable axis
136 R	.Sliding part or wedge
136 K	...Rope looped about movable member
136 L	...Rope clamped between cone and socket
136 A	...Sliding ball
136 B	...Screw actuated
163 R	BUCKLES
163 FC	..Fabric covered
163 K	..Ornamental and/or object supported
164	.Harness
165	..Combined buckles and snap hooks
166	..Lock
167	...Key
168	..Clamping
169	...One-piece
170	...Pivoted part or lever
171	...Sliding part or wedge
172	..Cross bails
173	...Pivoted stud plate
174	...Rigid stud
	..Penetrating tongue
175	...Guarded
176	...One-piece
177	...Multiple
178	...Pivoted
179	....Lever actuated
180	....Stud
181	...Sliding part or wedge
182	..Strap loops and attaching devices
183	..Loop shields
184	.Garment shielded
	.Combined pressure bar and guard
185	..Hook attached
	.Penetrating prong
186	..One-piece
187	...Hook attached
188	..Pivoted
189	...Hook attached
190	..Slide
191	.Pivoted lever
192	..Hook attached
193	..Looped strap
194	.Sliding part of wedge
195	..Hook attached
196	..Looped strap
197	.Looped strap
198	.One-piece
199	..Hook attached
200	..Looped strap
705	PIERCED EARRING FASTENER
453	INDEPENDENT, HEADED, APERTURE PASS-THROUGH FASTENER
454	FASTENER WITH REVOLVING COMPONENT WRAPPING STRUCTURE-TO-BE-SECURED ABOUT FASTENER
455	CLASP, CLIP, SUPPORT-CLAMP, OR REQUIRED COMPONENT THEREOF
456	.Gripping member adapted for tool actuation or release
457	.With specific mountng means for attaching to rigid or semirigid supporting structure or structure-to-be-secured
458	..For cooperating with aperture in supporting structure or structure-to-be-secured
459	.Dissociable gripping members
460	..Channel and inserted bar
461	...Having operator or locking means
462	...Resilient channel or bar
463	.Having gripping member actuated by fluid force
464	.Having inserted and receiving interlocking members connected by bendable, nonbiasing strap
465	..Discrete flaccid strap
466	...With distinct means for preventing separation of members
467	....Slidably mounted
468	...With separate flaccid flap or pocket for protecting structure-to-be-secured
469	...With separate, cavity-blocking gate on receiving member
470	...Resilient inserted or receiving member
471	....Inserted or receiving member substantially covered or coated for protection or to promote gripping
472	....Resilient inserted member
473	.....Having engaging face formed from nonmetallic material
474	......Having head and neck type engaging face
475	.......Having internal supporting or reinforcing element
476	........Circular head or neck
477	...Having wedge shaped, inserted and receiving members
478	...With specific means for attaching to flaccid strap or supporting strap
479	....On the inserted member
480	...Having necked button sliding along length of closed, variable width loop
481	.Having flaccid gripping member
482	..Formed from elastic material
483	.Encircling gripping member including semirigid band and operator for tightening
484	.Encircling gripping member including semirigid band and means for adjusting girth
485	.With specifically shaped, nongripping, rigid structure for connecting independently operable clasps, clips, or support-clamps
486	.Gripping member face integral with or rigidly affixed to screw-driving portion
487	.Having either discrete flaccid or thin, nonbiasing, integral, connecting hinge

CLASP, CLIP, SUPPORT-CLAMP, OR REQUIRED COMPONENT THEREOF

488 .Having equally spaced or continual gripping faces revolving about central axis
489 .Including pivoted gripping member
490 ..Pivoted member also slides
491 ...Tapered face
492 ..Pivoting gripping member either supports or coacts with sliding engaging face
493 ..Having three or more pivotally connected gripping members
494 ..Having toggle operator for moving
495 ..Having rigid linking arm pivotally connected to each gripping member
496 ...With extended lever portion
497 ....Having lever end modified for attachment to support
498 ..Pivoted gripping member applies camming force
499 ..Spring or resiliently biased about pivot
500 ...Distinct spring
501 ....Attached solely by spring
502 ....With operator for moving pivoted member
503 .....Camming or wedging element
504 ......Pivoted or rotated element
505 ....With position locking-means for gripping members
506 .....Including pivoted arm
507 ....Having specific surface material or irregularity on or along engaging face
508 ....Having specific handle structure
509 ....Coil Spring
510 .....Having coil portion coaxial or parallel with pivotal axis
511 ....Flat or leaf spring
512 ..Closed by gravity or weight of structure-to-be-secured
513 ..With operator for moving pivoted member
514 ...Threaded cylindrical rod and mating cavity
515 ...Camming or wedging element
516 ....Pivoted or rotated element
517 ..With position locking-means for gripping members
518 ...Integral locking-means
519 ..Having inserted and receiving interlocking engaging faces
520 ...Resilient gripping member
521 ..Having specific surface material or irregularity on or along engaging face
522 .Including track or way guided and retained gripping member
523 ..Biased by distinct spring
524 ..With operator for moving guided member
525 ...Threaded cylindrical rod and mating cavity
526 ..Track or way oblique to path of gripping member
527 ..With position locking-means for gripping members
528 ...Integral locking-means
529 ..With specific mounting means for attaching to flaccid supporting structure of structure-to-be-secured
530 .Having gripping member formed from, biased by, or mounted on, resilient member
531 ..Integrally combined, independently operable, diverse clasps, clips, or support-clamps
532 ..With specific means for mounting to flaccid supporting structure or structure-to-be-secured
533 ...Mounting means made entirely from integral wire portion of resilient gripping member
534 ....Wire coiled about flaccid support structure
535 ..With operator for moving biased engaging face
536 ...Camming or wedging element
537 ....Encircling sleeve type element
538 ....Pivoted or rotated element
539 .....Element pivoted or rotates in plane parallel to plane bisecting opposed engaging faces
540 .....Elongated element with pivot between cam and handle portions
541 ......For moving engaging face of U-shaped gripping member
542 ..With position locking-means for engaging faces
543 ...Integral locking-means
544 ...Pivoted lock member
545 ..Opposed engaging faces on gripping member formed from single piece of resilient material
546 ...Piece totally forms clasp, clip, or support-clamp and has shaped, wirelike or bandlike configuration with uniform cross section throughout its length
547 ....Opposed faces located in and bias towards common plane in nonuse position
548 ....Resilient gripping member having tightly twisted portion
549 ....Resilient gripping member having coiled portion
550 .....Convolutions of coil form faces
551 ....Relatively movable segments of resilient gripping member contact and cross in nonuse position
552 .....Segments form opposed engaging faces
553 ......Having specific handle structure
554 .....Having specific handle structure
555 ....Terminal end of resilient member having engagement or disengagement enhancing structural modifications
556 ....Having specific surface irregularity on or along engaging face
557 ...Having specific handle structure
558 ....Movably attached to gripping member
559 ...Interlocking faces
560 ...With reinforcing member
561 ...Having specific surface irregularity on or along engaging face
562 ....Corrugated or toothed face
563 ...Clasp, clip, or support-clamp cut or shaped from a single sheet of resilient, uniformly thick, planar material
564 ..Having specific surface material or irregularity on or along engaging face
565 ..Having specific handle structure
566 ..Including resilient biasing wire
567 ...Coiled wire
568 .Having gripping member shifted by operator
569 ..Threaded cylindrical rod and mating cavity
570 .Formed from single rigid piece of material
571 ..Having specific surface irregularity on or along engaging face

572	SEPARABLE-FASTENER OR REQUIRED COMPONENT THEREOF
573.1	.With third, detached member completing interlock
573.2	..And linking cavities in adjacent parallel panels
573.3	..Third member includes independently engaged hooks for linking spaced cavities
573.4	...And movably connected, noninserted gate for closing access throat of hook
573.5	..Third member includes relatively movable, separate components
573.6	...For parachute harness
573.7	..Third member consist of unitary elongated element
575	.Each mating member having similarly shaped, sized, and operated interlocking face
576	..Including elongated face having identical, parallel cross sections throughout its length
577	..Including elongated face having varying, parallel cross sections throughout its length
578	..Including complementary shaped and alternately useable interlocking faces
579.1	..Single piece hook-shaped member (e.g., mating garment hooks)
580	.Including member having distinct formations and mating member selectively interlocking therewith
581	..Formations positioned along wall forming mating-member-guiding cavity
582	...Formations member having movably attached or biased interlocking structure
583	..Formations member having movably attached or biased interlocking structure
584	..Selectively interlocking member having movably attached or biased interlocking component
585	...And cavity for guiding movement of formations
586	..Having mounting means allowing repositioning of member for facilitating interlock
587	.Including member having elongated, resilient, interlocking face with identical, parallel cross sections throughout its length
588	.Including receiving member having cavity and mating member having insertable projection guided to interlock thereby
589	..Having divergent interlock means distinct from cavity or projection of its member
590	..Projection or cavity rotates about axis of cavity access opening to interlock
591	...Having projection rotatably connected to its member
592	....And operator therefor
593	....And position locking-means therefor
594	.....Including notch or hump on projection axially biased by spring
595	.....Including radially biased element egnaging against relatively rotating surface at connection
596	....And spring for axially biasing projection
597	...Receiving member includes either movable connection between interlocking components or variable configuration cavity
598.1	..Projection passes through cavity then moves toward noninserted portion of its member to complete interlock (e.g., snap hook)
598.2	...Entire projection member forms loop or ring when interlocked
598.3	....Includes slidable gate closing entrance throat
598.4	...Hook type projection member
598.5	....Plural hooks entering opposite sides of same cavity
598.6	.....Hooks formed solely from wire
598.7	....Noninserted portion of projection member includes movably connected gate for closing access throat
598.8	.....Threaded gate
598.9	.....Revolvably mounted disc shaped gate
599.1	.....Pivotally connected gate
599.2	......Gate swings transversely to plane of hook
599.3	......Gate also slides relative to pivot
599.4	......Having means biasing gate about pivot
599.5	.......And position locking-means for gate
599.6	.......Includes distinct biasing spring
599.7	........Coil type spring
599.8	.........Coiled about pivotal axis of gate
599.9	......Having position locking-means for gate
600.1	.......Locking-means pivotally connected
600.2	.......Locking-means slidably mounted
600.3	......Gate closes when structure-to-be-secured is tensioned
600.4	.....Track or way guided gate
600.5	......Having means biasing gate
600.6	.......Guide of gate encircles shank
600.7	.......Cavity in shank forms track or way
600.8	........With position locking-means for gate
600.9	.....Resilient, self-biased gate
601.1	......With position locking-means for gate
601.2	......Gate and hook formed from plastic
601.3	......Gate and hook formed solely from wire
601.4	......Gate and hook formed from single piece of sheet metal
601.5	....Projection pivotally attached to shank or mounting structure
601.6	....Projection slidably mounted to shank or mounting structure
601.7	....Projection self-biased towards shank or mounting structure
601.8	.....And formed solely from wire
601.9	......Cooperating with relatively stationary wire gate
602	..Interlocking portion actuated or released responsive to preselected condition (e.g., heat, pressure)
603	..Having electric or fluid powered, actuation or release, of interlock
604	..Projection having movable connection between components thereof or variable configuration
605	...With additional, similar projection for engaging different cavity
606	...And operator therefor
607	....Including camming or wedging element on projection member
608	.....Pivotally attached element

SEPARABLE-FASTENER OR REQUIRED COMPONENT THEREOF

.Including receiving member having cavity and mating member having insertable projection guided to interlock thereby

..Projection having movable connection between components thereof or variable configuration

609 ...Including pivotal connection between projection components

610 ....Component slides relative to connection

611 ....And spring or resilient extension biasing about pivot

612 ...Including slidably guided connection between nonself-biasing projection components

613 ....And distinct spring biasing component

614 ...Including resiliently biased projection component or surface segment

615 ....Requiring manual force applied against bias to interlock or disengage

616 .....Having connected leading edge and separated trailing arms

617 ....Cooperating with cavity having side walls and axially biased component capping end

618 ....Forming total external surface of projection

619 .....And encircling hollow central area

620 ......Having separate mounting means inserted into area

621 ....Plastic deformation of means or surface required for mounting

622 ......Having separate mounting means encompassing cross section of projection

623 ......Having dome-shaped head and expansion slit along side

624 ....And connected surface at tip of head

625 .....Having inserted end formed by oppositely biased surface segments

626 .....Constructed from wire

627 ....Having both resiliently biased and rigid components forming external surface of projection

628 ..Projection member including noninserted spring for engaging and pushing against receiving member

629 ..Receiving member includes either movable connection between interlocking components or variable configuration cavity

630 ...With additional cavity for engaging different projection

631 ....Having common means actuating or releasing interlocking components or surfaces

632 .....And interlocking with independently associated or dissociated projection members

633 ...And operator therefor

634 ....For plural, oppositely shifting, similar interlocking components or segments

635 .....Operator includes camming or wedging element

636 ....Including pivotally connected element on receiving member

637 .....For shifting pivotally connected interlocking component

638 ......Element and component pivot about same axis

639 .....For shifting slidably connected and guided, nonself-biasing interlocking component

640 ....Including slidably connected and guided element on receiving member

641 .....For shifting pivotally connected interlocking component

642 .....For shifting slidably connected and guided, nonself-biasing, interlocking component

643 ...Having pivotally connected interlocking component

644 ....Blocking removal of formation on projection from complementary formation on side wall of cavity

645 ....And position locking-means therefor

646 ....And relatively movable handle therefor

647 ....Requiring manual force thereon to interlock or disengage

648 .....Plural, oppositely shifting, similar interlocking components

649 .....Having aperture therein alignable with parallel access opening

650 .....Having interlocking portion thereof housed continuously within cavity

651 ...Having cavity with side walls and axially biased component capping end

652 ...Having slidably connected, nonself-biasing interlocking component

653 ....Blocking removal of formation on projection from complementary formation on side wall of cavity

654 ....And position locking-means therefor

655 ....And relatively movable handle therefor

656 ....Requiring manual force thereon to interlock or disengage

657 .....Plural, oppositely shifting, similar interlocking components

658 .....Having closed aperture therethrough alignable with parallel access opening

659 ...Having flaccid component defining access opening of cavity

660 ....Component formed solely by flaccid cord

661 ....With nonflaccid component

662 ...Having resiliently biased interlock component or segment

663 ....Cavity or projection rotates about axis of cavity to dissociate

664 ....Requiring manual force applied against bias to interlock or disengage

665 .....And partially blocking separate, nonresilient access opening of cavity

666 ....And closed elongated access opening for guiding transverse projection travel after insertion

667 .....Nonresilient walls define opening

668 .....Formed from wire

669 ....And access opening with gap in perimeter for allowing movement of noninserted projection support therepast

670 .....Cavity constructed solely from wire

671 ....Partially blocking separate, nonresilient, access opening of cavity

672 .....And bodily shifted into or out of interlock location by manual force thereon

	SEPARABLE-FASTENER OR REQUIRED COMPONENT THEREOF
	.Including receiving member having cavity and mating member having insertable projection guided to interlock thereby
	..Receiving member includes either movable connection between interlocking components or variable configuration cavity
	...Having resiliently biased interlock component or segment
	....Partially blocking separate, nonresilient, access opening of cavity
673	.....Formed from wire
674	......Having curved or bent engaging section conforming to contour of projection
675	.......Similar, distinct sections
676	......Having distinct sections engaging projection at spaced points
677	....Including separate, nonprojection-engaging spring for biasing
678	....Biased component or segment entirely formed from wire
679	....Having portion of cavity deformed during mounting
680	.....And cooperating with separate mounting component
681	....Having axially extending expansion slit along side of cavity
682	..Means for mounting projection or cavity portion
683	...Allows bodily movement facilitating interlock
684	....About pivotal connection
685	....Includes resilient component separate from portion
686	...Allows relocation of portion
687	...Having component of means permanently deformed during mounting operation
688	....And formed from or fixedly attached to projection or cavity portion
689	.....Cooperates with detached component of means
690	.....Having shape facilitating impaling of mounting surface
691	....And inserted into or through cavity or projection
692	....And encircling cavity or projection
693	...Consisting of thermally fusible substance
694	...Having threaded formation
695	...Having specific structure for cooperating with stitching
696	...Having shape facilitating impaling of mounting surface
697.1	..Plural distinct cavities or projections
697.2	...Hook type
698.1	..Hook-shaped projection member passing through cavity
698.2	...Formed from single piece of sheet metal
698.3	...Formed solely from wire
700	..Cavity having specific shape
701	...Including closed elongated access opening for guiding transverse projection travel after insertion
702	...Having access opening with gapped perimeter for allowing movement of noninserted projection support therepast
706	PIN OR SEPARATE ESSENTIAL COOPERATING DEVICE THEREFOR
706.1	.With separately operable, manually releasable, nonpenetrating means for mounting (e.g., drapery hook)
706.2	.Having distinct guiding, holding, or protecting means for penetrated portion
706.3	..Means detachable from or flaccidly connected to pin (e.g., Hatpin type)
706.4	...For pin having plural penetrating portions
706.5	...Including relatively movable guiding, holding, or protecting components or surfaces
706.6	....Having operator for moving holding component or surface
706.7	.....Moves pivoting holding component
706.8	.....Moves slidably guided, nonself-biasing, holding component
706.9	....Having piercable (e.g., cork) or naturally resilient (e.g., rubber) surfaces
707	....With pivotal connection therebetween
707.1	....With slidable connection between nonself-biasing components
707.2	....Having resiliently biased component or surface
707.3	.....Coiled about longitudinal axis of held portion
707.4	.....And aperture therein alignable with another spaced aperture of means
707.5	.....And nonresilient structure for guiding portion thereto
707.6	...Including structure for cooperating with formation (e.g., cavity) formed on penetrating portion
707.7	..For pin having plural penetrating portions
707.8	...Each independently movable towards and into cooperation with means
707.9	..Including relatively movable guiding, holding, or protecting components of surfaces
708	...With connection allowing component to revolve about axis of held penetrating portion
708.1	...With pivotal connection therebetween
708.2	....Having position locking means therefor
708.3	....Spring or resiliently biased
708.4	...With slidable connection between nonself-biasing components
708.5	....Component slides parallel to axis of held penetrating portion
708.6	...Means engages formation formed on penetrating portion
708.7	...Having nonresilient and resilient components
708.8	...Means formed from single resilient wire
708.9	...Means formed from resilient sheet metal
709	..With independent, spaced, intermediate connections or formations (e.g., coils), about which portion or means moves
709.1	...Includes slidable connection
709.2	..With pivotal connection between penetrating portion and means
709.3	...Connection also permits sliding movement
709.4	...Resiliently biased about connection
709.5	..With slidable connection intermediate penetrating portion and means
709.6	..Having resilient bridging structure between portion and means

	PIN OR SEPARATE ESSENTIAL COOPERATING DEVICE THEREFOR
	.Having distinct guiding, holding, or protecting means for penetrated portion
	..Having resilient bridging structure between portion and means
709.7	...Means includes structure for cooperating with formation (e.g., cavity) formed on portion
709.8	...And penetrating portion formed from wire
709.9	....Bridging structure includes elongated nonwire element
710	....Wire also forms coiled bridging structure about which portion moves
710.1	.....Including distinct device for cooperating with coil
710.2	.....Having means also formed from same wire
710.3	.With cavity for guiding structure-to-be-secured towards penetrating portion (e.g., stocking support)
710.4	.Having penetrating portion retractable or of changeable length
710.5	.Having interconnected distinct penetrating portions
710.6	..Connection allows movement therebetween
710.7	...Slidable connection
710.8	...Resilient connection
710.9	..Formed from common wire
711	...And pointing in same direction
711.1	.Penetrating portion includes relatively movable structure for resisting extraction
711.2	.Having specific wire penetrating portion
711.3	..Wire curved or bent
711.4	.Having distinct head structure
711.5	..Movably connected to penetrating portion
265 R	STRAP-END-ATTACHING DEVICES
265 A	..Bendable sheet material
265 B	..Watch pintle connected
265 C	..Webbing to tube (lawn chair)
265 BC	..Buckle connected
265 EC	..End clasp
265 H	..Hook
265 AL	..Ring-loop
265 CD	..Cargo tiedown
265 WS	..Watch strap
265 EE	..Enlarged end epoxy
267	PIVOTED EDGE STAYS
703.1	FASTENER DESTRUCTIVELY SECURED BY RESHAPING DISTORTION FORCE (E.G., DUCTILE FASTENER)
703.2	.Distorted structure having shape facilitating impaling
703.3	..And distinct fastener structure cooperating with impaled structure
703.4	...Detached cooperating structure
703.5	..Including plural impaling elements
703.6	...Elements form single aperature (e.g., split shank type)
704.1	READILY INTERLOCKING, TWO-PART FASTENER REQUIRING EITHER DESTRUCTIVE OR TOOL DISENGAGEMENT
704.2	.Including additional fastener structure linking parts
716	HANGER OR PORTABLE ARTICLE SUPPORT FOR MANUAL ATTACHMENT THEREOF TO OVERHEAD SUPPORT (E.G., DRAPERY HOOK)

100 TEXTILE PRODUCT FABRICATION OR TREATMENT
101 .Cross laying by rotatable or revolving flyer
102 .Cross laying by divergent thread conveying members
103 .Fiber entangling and interlocking
104 ..By fluid jet needling or perforating
105 ...Through backing and support members
106 ..To form perforations
107 ..Needling
108 ...To chain entangle
109 ...To form decorative article or fabric
110 ...To form endless or tubular article or fabic
111 ...Distinct needling stations
112 ...With treatment
113 ...With relative movement of needles
114 ...With compound motion of needles or supply
115 ...Needle or needle board feature
116 ..Compressive manipulation
117 ...To unite discrete articles or fabrics
118 ...Tampon shaping
119 ....With ejecting
120 ....With string attaching
121 ...Compacted fiber article encasing
122 ...With treatment
123 ...Of nonplanar article or fabric
124 ....While on form
125 ....Coil or circular article manipulation
126 .....By roller pocket
127 ......With progressive feed
128 ......Discontinuous roller surface
129 ....With curved or tapered contour
130 .....By driven and opposed surfaces
131 ......With compound movement of driven surface
132 ......Reciprocating or oscillating opposed surfaces
133 .....Internally of container
134 ...By multiroller manipulation
135 ....With plural multiroller stations
136 ....Having plural superimposed beds
137 ....With compound roller motion
138 ...By cylinder and opposed conforming bed
139 ...By reciprocating member, e.g., platen
140 .Of thread interlaced article or fabric
141 ..Splicing or repair
142 ..Endless or tubular fabric
143 ..Article
144 ...Chenille
145 ...Fringe
146 ....By fraying or raveling
147 ...Tuft, tassel or pompon
148 ...Slit interlaced
149 ...By utilizing thread frame
150 ....Rosette or lace
151 ....Woven
152 .....Warp and weft retention
153 ...Garment
154 ....Hosiery
155 ..Elastic or crepe fabric
156 ...By differential shrinkage
157 ...Bias or diagonal thread orientation
158 ..Multi-ply fabric
159 ..Pile fabric
160 ...Discontinuous or patterned surface
161 ...Separable fastener type
162 ...Napped or teased
163 ..Ornamental or surface textured fabric
164 ...By sewing
165 ..Treating
166 ...By pretreatment of component
167 ...By fluid contact
168 ....To remove transitory component
169 ....Coating or dyeing
170 ...By cutting or transitory thread removal
171 ...By article or fabric disassembly
172 R WARP PREPARING OR HANDLING
172 A .With drawing or stretching
173 .Clearing
174 ..Singeing
175 .Chain formation or manipulation
176 ..Wrapping or unwrapping
177 ..Linking
178 .With fluid treatment, e.g., sizing
179 ..With drying
180 ...By noncontacting heating means
181 ...With preseparation
182 ..By immersion
183 ...With squeezing rollers
184 .Pattern setting
185 .With means responsive to sensed condition
186 ..Stopping
187 ...Electrical
188 ...By arrestable oscillator or vibrator
189 ....Pivoted detector
190 .Reeling or beaming
191 ..Section building
192 ..Narrow warps
193 ..Supply replenishing
194 ..Tensioning means
195 ..Traversing
196 ..Having means contacting beamed warp sheet
197 ...Warp engaging drive means
198 ..Leasing
199 ...By reed or comb
200 ..Having drive means
201 .Machine replenishing
202 ..Warp selecting and separating
203 R ..Drawing
203 A ...Hand implement
204 ...Mechanical reeding
205 ...Heddle or detector manipulation
206 ....By indexing blade-type thread guide
207 .....By distortion of blade-type thread guide
208 ..Warp end or machine element handling means
209 ..Uniting
210 ...Twisting
211 ...Tying
212 .Thread guide, e.g., comb
213 ..Expansible
214 PILE TUFTING, PATTERN SETTING
215 .With loom replenishing
216 PILE TUFTING, LOOM REPLENISHING
217 THREAD FINISHING
218 .Fabrication-defabrication
219 .Surface modification of running length
220 ..Diverse finishing operations
221 ...Including stuffer box texturing
222 ..Clearing
223 ...Combined clearing operations
224 ....Gap or slot type
225 ...With stopping
226 ...Clamping, severing or shearing
227 ....By electronic or pneumatic detection of knot or slub
228 ....By feeler engagement with knot or slub
229 ....By knot or slub biased wedging member
230 .....Arcuately contoured wedge
231 ....By knot or slub deflecting slot
232 ....By opposed, gap defining surfaces, e.g., stripping guide
233 .....Selectively usable gaps
234 .....Including toothed or serrated surface
235 .....Adjustable slot forming surface

THREAD FINISHING
.Surface modification of running length
..Clearing
...Clamping, severing or shearing
....By opposed, gap defining surfaces, e.g., stripping guide
.....Adjustable slot forming surface
236 ......By eccentric mount
237 ......By pin and slot mount
238 ......By internally threaded surface
239 ...By singeing
240 ..Stretching
241 ...Control means responsive to sensed condition
242 ....With stopping
243 ...Variable denier
244 ...Progressively lengthening lateral path
245 ...Between spaced, differentially driven surfaces
246 ....With intermediate treating
247 ..Texturing, e.g., crimping
248 ...Control means responsive to sensed condition
249 ....Temperature
250 ....Plug or wad control
251 .....By alternation of drive
252 ...Discontinuous or irregular
253 ....By shifting thread or texturing device to or from contact
254 ...Jet feed to impact surface
255 ....Plug impact surface
256 .....Traveling plug conveying means
257 ....Traveling impact surface
258 ...Diverse texturing operations
259 ...Asymmetric
260 ....By knife edge
261 .....With treating
262 ...Axial compression
263 ....Stuffer box
264 .....Internal chamber retarder
265 .....With treating
266 ......Post treatment
267 ......By direct fluid application to chamber plug
268 .....Thread feeding feature
269 ......Nip roll mount or construction, e.g., wear plate
270 ....Including traversing
271 ...Fluid jet
272 ....With threading
273 ....Flow restrictor type, e.g., venturi, etc.
274 ....Having orthogonally arranged flow paths
275 .....Opposed resonance chamber
276 .....Plural opposed fluid passageways
277 ...Peening
278 ...Shaping member
279 ....Opposed intermeshing traveling members
280 .....Relatively movable sinkers
281 ...Latent bulk or crimp development
282 ..Tow opening or spreading
283 ...By fluid
284 .Bobbin, cheese or cop
285 ..With thermal treating
286 ...Including bulking, crimping or shrinking
287 .Hank or skein
288 ..With positive feed
289 PACKAGING
290 .Wound package
291 ..Hank or skein
292 BOBBIN STRIPPING
293 .By unwinding
294 ..Fluid assist or removal
295 .By cutting
296 .By stapilizing
297 .By axial removal of thread residue, e.g., slipping off
298 ..Traveling stripping jaws
299 MISCELLANEOUS

CLASS 29 METAL WORKING

1.1	ARMS MAKING
1.11	.Ordnance
1.2	PROJECTILE MAKING
1.21	.Hollow
1.22	.Bullets or shot
1.23	..Jacketed or composite
1.3	CARTRIDGE CASE MAKING
1.31	.Heading
1.32	.Trimming
2	BATTERY-GRID MAKING
2.1	BIAS CUTTING OF TUBULAR STOCK
2.11	.Including orbital cutter means
2.12	..Within stock support
2.13	..With orbiting strip accumulator
2.14	.Including means to inflate stock
2.15	.With means to feed stock along support or mandrel
2.16	..Single means produces compound motion
2.17	...Endless belt
2.18	..Axially
2.19	..Rotatably
2.2	.With means to rotate stock supply
2.21	..Axis of rotation parallel to support or mandrel
2.22	.With means for arcuate shift of mandrel
2.23	.Including means to handle strip or web
2.24	..With common adjustment for cutter
2.25	.Processes
3	BUCKLE MAKING
4	BUTTON-FASTENER MAKING
4.51	SHREDDING METAL OR METAL WOOL ARTICLE MAKING
4.52	.Metal wool making

17.4	..With pack formation or pack treatment
17.5	...Using transitory solid cover material
17.6	...Including bond prevention treatment
17.7	...Opening or separating pack
17.8	..By shaving or longitudinal cutting
17.9	..Using transitory material
18.1	.Apparatus for opening or separating pack
20	SPECTACLE-FRAME MAKING
20.1	SPIRAL CUTTING OF FLAT STOCK
21	STEREOTYPE-PLATE FINISHING
21.1	CLENCH-TONGUE FORMING (E.G., TIEBAND TONGUE)
22	TIRE UPSETTING, CUTTING, PUNCHING, ETC.
23.1	TOOTHED-CYLINDER MAKING APPARATUS
23.51	IMPELLER MAKING APPARATUS
24	TYPE FINISHING AND GROOVING
24.5	VENETIAN BLIND ASSEMBLY
25	UMBRELLA-FRAME MAKING
25.01	BARRIER LAYER OR SEMICONDUCTOR DEVICE MAKING PROCESS AND APPARATUS
25.02	.BARRIER LAYER DEVICE MAKING
25.03	..ELECTROLYTIC DEVICE MAKING; E.G., CAPACITOR
25.35	PIEZOELECTRIC DEVICE MAKING
25.41	ELECTRIC CONDENSER MAKING
25.42	.Solid dielectric type
76.1	FILING
76.2	.Of key article
76.3	.Continuous band type
76.4	.Reciprocating type
77	.File-blank strippers
81.01	SCALE REMOVER OR PREVENTOR
81.02	.For hollow workpiece
81.021	..Interior surface
81.03	.Rolling deformation or deflection
81.04	..For wire or rod
81.05	.With rotary head
81.06	.Fluid impingement
81.07	..With heater
81.08	..Liquid jet
81.09	..Airblast
81.1	.Chainer
81.11	.Scraper or scalper
81.12	.Brush type
81.13	.Mechanically powered operator
81.14	..Tack or needle type
81.15	..Hammer
81.16	..Blade or chisel
81.17	.Hand tool
89.5	BURNING-IN, WEARING-IN, AND OIL BURNISHING
90.01	BURNISHING
90.1	.Of water laid fibrous article (e.g., paper)
90.2	..Heated burnishing member
90.3	...Burnishing tool reciprocates across work surface
90.5	.Continuous feed
90.6	.Of gear article
90.7	.By shot peening or blasting
91	UPHOLSTERY MAKING
91.1	.Process
91.2	.Tufting
91.3	..Plus means to clench fastener
91.4	..Plus means to insert guide pin or fastener
91.5	.Cover stretching
91.6	.Edge-roll forming
91.7	.Form and/or holder
91.8	..With follower
400.1	PROCESS OF MECHANICAL MANUFACTURE
592.1	.Electrical device making
593	..Including measuring or testing of device or component part
594	..Acoustic transducer making
595	..Indicating transducer making
596	..Dynamoelectric machine making
597	...Commutator or slip ring assembly
598	...Rotor
599	..Superconductor making
600	..Antenna or wave energy "plumbing" making
601	...With other electrical component
602.1	..Electromagnet, transformer or inductor
603	...Magnetic recording reproducing transducer (e.g., tape head, etc.)
604	...Data storage inductor or core
605	...By winding or coiling
606	...By assembling coil and core
607	...Including permanent magnet or core
608	....From comminuted material
609	....Laminated
609.1	...Acoustic transducer
610.1	..Resistor making
611	...Heater type
612	...Thermally variable

	PROCESS OF MECHANICAL MANUFACTURE
	.Electrical device making
	..Resistor making
613	...With envelope or housing
614	....Filling with powdered insulation
615	.....With direct compression of the powdered insulation
616	....Powdering the insulation
617	.....By oxidation
618	....With winding
619	....Applying terminal
620	...Coating resistive material on a base
621	...Applying terminal
621.1	...Strain gage making
622	..Switch making
623	..Fuse making
623.1	..Electric battery cell
623.2	...Including sealing
623.3	...Including laminating of indefinite length material
623.4	...Including adhesively bonding
623.5	...Including coating or impregnating
825	..Conductor or circuit manufacturing
826	...Brush
827	...Beam lead frame or beam lead device
828	...Co-axial cable
829	...On flat or curved insulated base, e.g., printed circuit, etc.
830	....Assembling bases
831	....Assembling formed circuit to base
832	....Assembling to base an electrical component, e.g., capacitor, etc.
833	.....By utilizing optical sighting device
834	.....With component orienting
835	......And shaping e.g., cutting or bending, etc.
836	......Different components
837	.....By inserting component lead or terminal into base aperture
838	......With deforming of lead or terminal
839	.......Including metal fusion
840	.....By metal fusion
841	.....With encapsulating, e.g., potting, etc.
842	....Assembling terminal to base
843	.....By metal fusion bonding
844	.....By deforming or shaping
845	......With shaping or forcing terminal into base aperture
846	....Manufacturing circuit on or in base
847	.....With selective destruction of conductive paths
848	.....With molding of insulated base
849	......Simultaneous circuit manufacturing
850	.....By using wire as conductive path
851	.....With sintering of base
852	.....By forming conductive walled aperture in base
853	......With deforming of conductive path
854	...Assembling electrical component directly to terminal or elongated conductor
855	....With encapsulating
856	.....By molding of insulating material
857	...Assembling terminal to elongated conductor
858	....With molding of electrically insulating material
859	.....By shrinking of cover
860	....By metal fusion bonding
861	....By deforming
862	.....Of ferrule about conductor and terminal
863	.....Of terminal
864	......With forming eyelet from elongated conductor
865	......With penetrating portion
866	.......Through insulation
867	......With insulation removal
868	...Assembling elongated conductors, e.g., splicing, etc.
869	....With end-to-end orienting
870	.....Including fluid evacuating or pressurizing
871	.....Including deforming of joining bridge
872	....With overlapping orienting
873	.....Including oppositely facing end orienting
874	...Contact or terminal manufacturing
875	....By powder metallurgy
876	....By assembling plural parts
877	.....With bonding
878	......Of fused material
879	.......Metal
880	........By impregnating a porous mass
881	.....By elastic joining
882	.....With deforming
883	.....With molding of insulation
884	.....Forming array of contacts or terminals
885	....With coating
631	..Insulator making
631.1	..Electret making
888	.Prime mover or fluid pump making
888.01	..Internal combustion I.C. engine making
888.011	...Repairing, converting, servicing or salvaging
888.012	...Rotary or radial engine making
888.02	..Fluid pump or compressor making
888.021	...Repairing, converting, servicing or salvaging
888.022	...Scroll or peristaltic type
888.023	...Screw or gear type, e.g., moineau type
888.024	...Centrifugal type
888.025	...Vane type or other rotary, e.g., fan
888.03	..Valve lifter making
888.04	..Piston making
888.041	...Repairing, converting, servicing or salvaging
888.042	...Multi-element piston making
888.043	....Utilizing a high energy beam, e.g., laser, electron beam
888.044	...With assembly or composite article making
888.045	....With thermal barrier or heat flow provision
888.046	....With fiber reinforced structure
888.047	....By composite casting or molding
888.048	....By coating or cladding
888.049	...Ring groove forming or finishing
888.05	...Gudgeon pin, wrist pin, piston pin, or boss therefor
888.051	...With other attaching provisions for connecting rod
888.06	..Cylinder, cylinder head or engine valve sleeve making
888.061	...With lining, coating or sleeve
888.07	..Piston ring or piston packing making
888.071	...Including forging or hammering
888.072	...Including casting or molding
888.073	...Including rolling or die forming, e.g., drawing, punching
888.074	...Including coating or plating
888.075	...Including grinding or honing
888.076	...Including machining or angular cutting
888.08	..Crankshaft making
888.09	..Connecting rod making
888.091	...Including metallurgical bonding
888.092	...Including metal forging or die shaping
888.1	..Camshaft making
888.2	..Push rod or rocker arm making

	PROCESS OF MECHANICAL MANUFACTURE
	.Prime mover or fluid pump making
888.3	..Seal or packing making
888.4	..Poppet or I.C. engine valve or valve seat making
888.41	...Valve guide making
888.42	...Repairing, converting, servicing or salvaging
888.43	...Valve tappet making
888.44	...Valve seat making
888.45	...Composite or hollow valve stem or head making
888.451	....Including forging
888.452	....Including extruding
888.453	....Including casting
888.46	...With assembly or composite article making
889	.Impeller making
889.1	..Repair or disassembly
889.2	..Turbomachine making
889.21	...Assembling individual fluid flow interacting members, e.g., blades, vanes, buckets, on rotary support member
889.22	...Assembling fluid flow directing devices, e.g., stators, diaphragms, nozzles
889.23	...Shaping integrally bladed rotor
889.3	..Axial blower or fan
889.4	..Centrifugal blower or fan
889.5	..Fluid coupling device
889.6	..Propeller making
889.61	...Utilizing hollow tube blank
889.7	..Blade making
889.71	...Composite blade
889.72	...Hollow blade
889.721	....With cooling passage
889.722	.....Passage contains tubular insert
890	.Catalytic device making
890.01	.Rocket or jet device making
890.02	.Burner, torch or metallurgical lance making
890.03	.Heat exchanger or boiler making
890.031	..Repairing, converting, servicing or salvaging
890.032	..Heat pipe device making
890.033	..Solar energy device making
890.034	..Regenerator or recuperator making
890.035	..Cooling apparatus making, e.g., air conditioner, refrigerator
890.036	..Tube inside tube
890.037	..Tube wound about tube
890.038	..Tube joined to flat sheet longitudinally, i.e., tube sheet
890.039	..Sheet joined to sheet
890.04	...With inserted tubes
890.041	...Utilizing bond inhibiting material
890.042	....With subsequent fluid expansion
890.043	..Tube joint and tube plate structure
890.044	...Including conduit expansion or inflation
890.045	..Tube with heat transfer means
890.046	...Finned tube
890.047	....Common fin traverses plurality of tubes
890.048	....Helically finned
890.049	....Internally finned
890.05	....Made from unitary workpiece, i.e., no assembly
890.051	..Boiler making
890.052	..Header or manifold making
890.053	..Tube making or reforming
890.054	..With metallurgical bonding
890.06	.Accumulator making
890.07	.Condenser, evaporator or vaporizer making
890.08	.Muffler, manifold or exhaust pipe making
890.09	.Fluidic or fluid actuated device making
890.1	.Fluid pattern dispersing device making, e.g., ink jet
890.11	.Tapping device making
890.12	.Valve or choke making
890.121	..Repairing, converting, servicing or salvaging
890.122	..Valve seat forming
890.123	..Valve stem or tire valve making
890.124	..With assembly, disassembly or composite article making
890.125	...Joining plural semi-circular components
890.126	...With material shaping or cutting
890.127	....Including molding or casting
890.128	....Including machining or drilling
890.129	....Including metallurgical bonding
890.13	....Including metal deforming
890.131	...Including metallurgical bonding
890.132	..Including metal shaping and diverse operation
890.14	.Gas and water specific plumbing component making
890.141	..Plumbing fixture making
890.142	..Nozzle making
890.143	...Sprayer
890.144	..Flexible conduit or fitting therefor
890.145	..Flue connector device making
890.146	..Trap making
890.147	..Return connector device making
890.148	..T-shaped fitting making
890.149	..Elbow or L-shaped fitting making
890.15	..Ferrule making or reforming
891	.Agricultural device making
891.1	..Traction apparatus, e.g., for tractor
891.2	..Harvester guard
892	.Pulley making
892.1	..Assembly
892.11	...With shaping
892.2	..Disc splitting to form pulley rim groove
892.3	..Groove forming in sheet metal pulley rim
893	.Gear making
893.1	..Assembly of gear into force transmitting device
893.2	..Gear mounting
893.3	..Gear shaping
893.31	...Worm gear
893.32	...Roll forming
893.33	...Punching or stamping
893.34	...Die-press shaping
893.35	...Gear tooth cutting
893.36	...Gear blank making
893.37	...With specific gear material
894	.Wheel making
894.1	..Steering wheel
894.2	..Material winding, e.g., reel, spool
894.3	..Land wheel
894.31	...Assembling tire to wheel body
894.32	...Disc type wheel
894.321	....Assembling wheel disc to rim and hub
894.322	....Assembling wheel disc to rim
894.323	.....With disc shaping
894.324	....Integral rim and disc making
894.325	....Disc shaping
894.33	...Tensioned spoke type wheel making
894.331	....Tensioning all spokes simultaneously
894.332	....Tensioning spokes in series
894.333	....Tensioning spokes individually
894.34	...Compression, e.g., nontension, spoke type wheel making
894.341	....Joining spokes to rim and hub
894.342	....Joining spokes to rim
894.343	....Joining spokes to hub
894.344	....Making plural spokes from a single blank
894.345	....Individual spoke making

	PROCESS OF MECHANICAL MANUFACTURE
	.Wheel making
	..Land wheel
894.35	...Rim making
894.351	....With assembly
894.352	.....Demountable rim making
894.353	....Die-press shaping
894.354	....Rolling forming
894.36	...Hub making
894.361	....With assembly
894.362	....Hub shaping
894.37	...Tire making
894.38	...Wheel trim making, e.g., wheel covers, hubcaps
894.381	....With means for retaining trim member on wheel
895	.Roller making
895.1	..Repairing or servicing
895.2	..Assembling preformed components
895.21	...Work contacting surface element assembled to core
895.211	....Work contacting surface wound about core
895.212	....With prestressing of component by heat differential, e.g., shrink fit
895.213	....Work contacting surface having annular axial sections
895.22	...Work contacting surface element assembled to end support members
895.23	...Includes securing removable cover on roller
895.3	..Fabricating and shaping roller work contacting surface element
895.31	...Toothed roller
895.32	...With coating or casting about a core
895.33	..One-piece roller making
160	.Grilles
160.6	.Jewelry and dentistry
161	.Knobs and knob shanks
163.6	.Multiperforated metal article making
163.7	..Coil wound wall screen
163.8	..Filter
168	.Railway car wheels
169.5	.Sound devices
172	.Spring-head clips
173	.Springs
175.1	.Turnbuckle making
177	.Watches and clocks
178	..Arbors, pinions and balances
179	..Cases, crowns, and pendants
897	.Structural member making
897.1	..Restoring existing member, e.g., reinforcement, repair
897.2	..Vehicular structural member making
897.3	..Static structure, e.g., a building, component making
897.31	...Openwork, e.g., a truss, joist, frame, lattice-type or box beam
897.312	....Frame component
897.32	...Panel
897.33	...Columnar member
897.34	...Metal reinforcement member for nonmetallic, e.g., concrete, structural element
897.35	...Beam or girder
898	.Process for making bearing or component thereof
898.01	..Repair
898.02	..Fluid bearing
898.03	..Linear bearing
898.04	..Rotary bearing
898.041	...Thrust bearing
898.042	...Plain bearing
898.043	....Self-adjusting or self-aligning, including ball and socket type, bearing and component making
898.044	.....Deforming socket to secure ball
898.045	......Die-press shaping
898.046	.......Having liner
898.047	.....Having liner
898.048	.....Socket making
898.049	......By molding or casting
898.05	......Nonmetallic socket
898.051	......By assembly
898.052	.....Ball making
898.053	......With metallurgical bonding
898.054	....Sleeve or bushing making
898.055	.....Nonmetallic
898.056	.....Strip or blank material shaping
898.057	......Die-press shaping
898.058	.......Having inner lining layer
898.059	.....Having liner
898.06	...Anti-friction bearing or component thereof
898.061	....Assembly of race, cage and rolling anti-friction members
898.062	....Assembly of race and rolling anti-friction members
898.063	.....With race making
898.064	....Assembly of cage and rolling anti-friction members
898.065	.....With cage making
898.066	....Race making
898.067	....Cage making
898.068	....Roller making
898.069	....Ball making
898.07	..Mounting
898.08	..Demounting
898.09	..Pre-usage process, e.g., preloading, aligning
898.1	..Lubrication
898.11	..Sealing
898.12	..Coating or casting
898.13	..Bearing surface treatment
898.14	..Specific metallic composition
898.15	..Nonmetallic bearing element
899	.Ball making
899.1	..Hollow ball
401.1	.Converting
402.01	.Repairing
402.02	..Seal or element thereof
402.03	..With disassembly
402.04	...Including reconditioning of part
402.05	....By shaping
402.06	.....Removing of material
402.07	......And metallurgical operation, e.g., welding, casting
402.08	...Replacement of defective part
402.09	..By attaching repair preform, e.g., patching
402.11	...And removing damaged material
402.12	....Mechanically attaching preform with separate fastener
402.13	....Metallurgically attaching preform
402.14	...Preform mechanically attached with separate fastener
402.15	....Screw threaded fastener
402.16	...Preform metallurgically attached
402.17	...Screw threaded preform
402.18	..By applying fluent material, e.g., coating, casting
402.19	..By shaping, e.g., bending
402.21	...Including heating
403.1	.Including scrap recovery or utilization
403.2	..Metalworking to consolidate scrap
403.3	..Separating materials one from another
403.4	...By burning or use of heat
404	.During simulated operation or operating conditions
405	..Temperature
406	.Center locating and shaping
407	.With testing and/or indicating
408	.Of slide fasteners
409	..Of slider
410	..Of interlocking element

	PROCESS OF MECHANICAL MANUFACTURE
411	.Obtaining plural pieces from preassembled blanks
412	.Obtaining plural pieces from unitary piece
413	..Breaking through weakened portion
414	..Dividing through modified portion
415	..Dividing on common outline
416	..Coacting pieces
417	..Dividing sequentially from leading end
418	.Providing transitory integral holding portion
419.1	.Shaping fiber or fibered material
419.2	.Magnetic shaping
421.1	.Shaping by direct application of fluid pressure
421.2	..Explosive
422	.Shaping container end to encapsulate material
423	.Utilizing transitory attached or associated separate material
424	..Temporary protective coating, impregnation, or cast layer
425	.Shaping mating parts for reassembly in different positions
426.1	.Disassembly
426.2	..With other than ancillary treatment or assembly
426.3	..With conveying of work or disassembled work part
426.4	..By alteration or destruction of work part or connector
426.5	..By application of force
426.6	...To elastically deform work part or connector
428	.Assembly and/or joining
429	..Progressively advancing of work assembly station and/or assembled portion of work
430	...Advancing work to successive stations (i.e., assembly line)
431	...Advancing station
432	..Punching, piercing or reaming part by surface of second part
432.1	...With shaping
432.2	....Of first part
433	..By stringing
434	..Retaining clearance for motion between assembled parts
435	...Between tube-forming helical coils
436	...Through resilient media
437	...By deforming interlock
438	....By folding part into plural ears
439	....By wrapping around
440	.....Of link closure
441.1	....Of sphere in socket
441.2	.....Ball point pen making
442	.....Allowing only single plane motion
443	....Of flange into tubular socket
444	....Outwardly deforming internally fitted rod
445	..Sizing mating parts during final positional association
446	..With prestressing of part
447	...By heat differential (e.g., shrink fit)
448	...Of skin on frame
449	....By flexing
450	...Elastic joining of parts
451	....Confining elastic part in socket
452	...Prestressing rod, filament or strand
453	...By snap fit
454	..Of flexible wall, expansible chamber devices (e.g., bellows)
455.1	..Spaced wall tube or receptacle
456	..Of separate helix (e.g., screw thread)
457	..Ribbing
458	..With coating previous to assembly
459	...To roughen surface
460	..Subsequently coating
461	..With spreading of cable strands
462	..Joining plate to frame
463	..Peripheral joining of opposed mirror image parts to form hollow bodies
464	..Associating parts by use of aligning means (e.g., fixture)
465	...Registering mating opposed tool parts (e.g., punch and die)
466	...By multiple cooperating fixtures
467	...Sequential association of parts on single fixture
468	...By manipulating single fixture
469	..Assembling two or more subassemblies
469.5	..Metal deforming with nonmetallic bonding
505	..Joining by deforming
506	...Securing cup or tube within axially extending double walled annulus
507	....By expanding inner annulus
508	....By constricting outer annulus
509	...Over-edge clamping of seated part
510	....By necking in cup or tube walls
511	.....At cup or tube ends
512	....By flaring inserted tube end
513	....By bending over projecting prongs
514	...Of parallel side-by-side elongated members
515	...Inward deformation of aperture or hollow body walls
516	....Hollow body is axially joined sleeve or cap
517	.....To rod or elongated member
518	......With lapping of ends of plural rod or members
519	......After thinning
520	....By axially applied force
521	...Surface interlocking
522.1	...Expanding part in cavity, aperture or hollow body
523	....Radial expansion of internally fitted tube
524	....Peripheral edge joining of abutting plates
524.1	....Riveting
525	..By driven force fit
525.1	..By application of separate fastener
525.2	...Riveting
526.2	.With separation of localization of as cast defects in ingots (e.g., anti-pipe)
526.3	..Compressing ingot while still partially molten
526.4	..Removal of defects
526.5	...From center of ingot to leave hollow blanks
526.6	...After deforming
527.1	.With applying or shaping of fluent material
527.2	..Coating
527.3	...And casting
527.4	...Subsequent to metal working
527.5	..Metal casting
527.6	...Followed by cutting or removing material
527.7	...Including rolling
530	..Filling openings
557	.Shaping one-piece blank by removing material
558	..Successive removal operations
559	.Work holding
568	TRANSFER MEANS BETWEEN STORAGE AND WORK STATION FOR PLURAL, SEPARATE, TOOLS
560	CONVERTIBLE METAL WORKING MACHINES
560.1	.Vise type

33 R	PLURAL DIVERSE MANUFACTURING APPARATUS INCLUDING METAL SHAPING AND/OR ASSEMBLY
33 A	..Flash removers
33 B	..Welding strip ends
33 C	..Casting and working
33 D	..Tube making
33 E	..Covering
33 F	..Wire working
33 G	..Radiator making
33 H	..Printing plates
33 J	..Turret
33 K	..Assembly
33 L	..Armatures
33 M	..Electrical connectors and terminals
33 N	..Tire valve and spark plug
33 P	..Multiple station with conveyor
33 Q	..Multiple stations working strip material
33 S	..Continuous strip
33 T	..Work on tubes
33.2	.Slide fastener or slide fastener element
33.5	.Binding or covering and cutting
33.52	..Cutting covering material only
	.Type of machine
26 R	..Drill press
26 A	....Drilling and other
26 B	....Portable
27 R	..Lathe
27 A	....Convertible
27 B	....Commutator
27 C	....Lathe and tool
28	...Grinding attachment
29	...Pulley and wheel
30	..Planer
34 R	.Forging and bending, cutting or punching
34 A	...Fasteners (zipper)
34 B	...Riveting
34 C	...Ball making
34 D	...Wire working
561	.With means to feed work during tool contact
562	..Including nonrotary flying tool
563	.With means to feed work intermittently from one tool station to another
37 R	..Stock turret
37 A	....Swiss type
38 R	..Blank turret
38 A	....Rotary work - vertical axis
38 B	....Rotary work - horizontal axis
38 C	....Stationary work
38 D	....Belt drive
38 E	....Crankshaft
38 F	....Collapsible tube
38.9	..Endless belt
564	.Separate tool stations for selective or successive operation on work
564.1	..Including assembly or disassembly station
564.2	...And means to machine work part to fit cooperating work part
564.3	...And means to sever work prior to disassembly
564.4	....Comprising means to strip insulation from wire
564.5	...And means to stake electric wire to commutator or armature in assembling of electric motor or generator
564.6	...And means to sever work from supply
564.7	...And means to machine product
564.8	....To sever product to length
565	.Common reciprocating support for spaced tools
566	.Including composite tool
566.1	..Including severing means
566.2	...To sever electric terminal from supply strip
566.3	...To trim electric component
566.4	....Means comprising hand-manipulatable implement
35.5	.With turret mechanism
36	..Multiple turret
39	..Tool turret
40	...Rotary tool holder
41	...Sliding tool holder
42	...Fluid operated
	...Cam operated
43	....Longitudinal turret axis
44	....Transverse turret axis
45	...Lever operated
46	...Rack-and-pinion operated
47	...Screw operated
48.5 R	..Including rotating and/or locking means
48.5 A	....Lock means for tool or work turrets
49	...Frictional and positive
50	.Multiple-tool holder
51	..Laterally movable stock holder
52	..Axial tool and transversely movable slide rest
53	...Rotary tool spindle
54	..Longitudinally and transversely movable
55	...Rotary tool spindle
56	..Oscillating tool
56.5	.Including machining means
56.6	..And work-holder for assembly
57	.Attachments
64	.Speed controllers
65	.Carriage stop mechanisms
650	PLURAL DIVERSE MANUFACTURING APPARATUS
700	MEANS TO ASSEMBLE OR DISASSEMBLE
701	.With means to regulate operation by use of templet, tape, card or other replaceable information supply
702	..With comparator
703	...Computer input
704	..Web or strand-carried information supply
705	.With means to test work or product
706	.With randomly actuated stopping or disabling means
707	..Responsive to condition of work or product
708	..Responsive to operative (e.g., safety device, etc.)
709	.With control means energized in response to activator stimulated by condition sensor
710	..Including means to divert defective work part
711	..Multiple station assembly or disassembly apparatus
712	...Including position sensor
713	..Responsive to timer
714	..Responsive to work or work-related machine element
715	...With means to fasten by deformation
716	....Self-piercing work part
717	...With means to fasten by elastic joining
718	...With means to fasten by frictional fitting
719	...Including means to apply magnetic force directly to position or hold work
720	.With signal, scale, illuminator, or optical viewer
721	..For work-holder for assembly or disassembly
722	.Including means to provide a controlled environment
723	.Nuclear device

MEANS TO ASSEMBLE OR DISASSEMBLE
724 .Roller or ball bearing
725 ..Including deforming means
726 .Heat exchanger
726.5 ..Including means to manipulate heat exchanger tube bundle
727 ..Including deforming means
728 .Means to place sheath on running-length core
729 .Means to assemble electrical device
730 ..Storage cell or battery
731 ...Including deforming means
732 ..Motor or generator
733 ...Means to assemble commutator
734 ...Means to position insulation
735 ...Means to stake wire to commutator or armature
736 ...Including deforming means
737 ..Magnetic memory device
738 ..Laminated device
739 ..Means to fasten electrical component to wiring board, base, or substrate
740 ...Chip component
741 ...Multilead component
742 ..Multiple station assembly apparatus
743 ..Means to apply vacuum directly to position or hold work part
744 ..Means to apply magnetic force directly to position or hold work part
745 ..Conductor
746 ...Electrode
747 ...Terminal or connector
748 ....Assembled to wire-type conductor
749 .....Means to simultaneously assemble multiple, independent conductors to terminal
750 .....Means comprising hand-manipulatable implement
751 ......Fastening by deformation
752 ......Fastening by elastic joining
753 .....Means to fasten by deformation
754 .....Means to fasten by elastic joining
755 ...Multiple, independent conductors
756 ...Switch or fuse
757 ..Means to simultaneously fasten three or more parts
758 ..Means comprising hand-manipulatable implement
759 ..Means to align and advance work part
760 ..With work-holder for assembly
761 ..Means to fasten by deforming
762 .Means to disassemble electrical device
763 ..Storage cell or battery
764 ..Means comprising hand-manipulatable implement
765 .Means to place traveler on ring or ring on bobbin of a textile machine
766 .Slide fastener
767 ..Means to assemble stop onto stringer
768 ..Means to assemble slider onto stringer
769 ..Means to assemble teeth onto stringer
770 ..Disassembly means
771 .Means to interrelatedly feed plural work parts from plural sources without manual intervention
772 ..Box or pallet assembly means
773 ..Means to assemble container
774 ...Handle to container
775 ...Label to container
776 ...Pressurized dispensing container
777 ...Hypodermic syringe
778 ...Including fluid component
779 ..Running-length work
780 ...Means including orbiting running-length work supply
781 ...Pipe section
782 ...Assembled to article
783 ..Multiple station assembly apparatus
784 ..Including assembly pallet
785 ..Including turret-type conveyer
786 ..Including converging conveyers
787 ..And means to fasten work parts together
788 ...By deforming
789 ...By elastic joining
790 ...By friction fit
791 .Multiple station assembly or disassembly apparatus
792 ..Including turret-type conveyer
793 ..Including converging conveyers
794 ...And primary central conveyer
795 ..Means to fasten work parts together
796 ...By deforming
797 ...By elastic joining
798 .Means to drive self-piercing work part
799 .Including assembly pallet
800 .Including provision to utilize thermal expansion of work
801 .Means to assemble or disassemble container and fluid component
802 .Vehicle wheel
803 ..Railway wheel
804 .Tumbler lock
805 .Toy doll
806 .Film or tape cartridge
807 .Crystal to watch or clock
808 .Means to insert or extract pen point
809 .With magazine supply
810 ..And magnetic work-holder or positioner
811.2 ..Assembling means comprising hand-manipulatable implement
812 ...One work part comprising living tissue
812.5 ...Comprising driver for snap-off-mandrel fastener; e.g., Pop (TM) riveter
813 ...One work part comprising nut or screw
814 ...One work part comprising paper clip
815 ...Means to assemble tire stud into tire tread
816 ...Means to fasten by deforming
817 ....Fastening sinker to fishing line
818 ..Means to fasten by deforming
819 .Running-length work
820 ..Assembled on core
821 .Including means to vibrate work
822 .Including work conveyer
823 ..Including transporting track
824 ...And work carrying vehicle
213.1 .Valve applying and removing
214 ..Engine valve unit pullers or appliers
215 ..Engine, valve spring compressors, only
216 ...Plural spring engagement
217 ...Screw operated
218 ....Parallel or tong type, side entrance
219 ...Lever operated
220 ....Single jaw or valve engagement
221 ....Plier type
221.5 ..To or from wheel rim of resilient tire or tube
221.6 ..Removal tool
222 .Piston ring inserters and removers
223 ..Plier-type operation
224 ...With ring encirclement
225 .Spring appliers and removers
226 ..Transmission spring
227 ..Helical springs
228 ..Flat spiral spring (e.g., watch and clock type)
229 ..Circular springs
230 ..Leaf springs
231 .Staking watches and clocks
232 ..Plier type
233 .Lining to brake shoes
234 .Tube and coextensive core

	MEANS TO ASSEMBLE OR DISASSEMBLE
235	.Applying and removing resilient articles (e.g., tubes, sleeves, etc.)
235.5	..Nipples to nursing bottles
236	..Well protectors to sucker rods
237	.Couplings to conduits
237.5	.Loose-leaf sheet binder
238	.Compressing parts together face to face
239	.Spreading parts apart or separating them from face to face engagement
240	.By rotation of work part
240.5	..Helix inserting and/or removing
241	.By stringing
242	.Tool handles and tools
243	.Tool chucks and tools
243.5	.overedge assembly
243.51	..Belt-hook attacher
243.517	..Annular work
243.518	...With radially acting tool inside annular work
243.519	...With second workpiece inside annular work one workpiece moved to shape the other
243.521	....Comprising driver for snap-off-mandrel fastener; e.g., Pop (TM) riveter
243.522	.....Including near side fastener shaping tool
243.523	.....Pneumatic- or fluid-actuated tool
243.524	......Liquid
243.525	.......And gas
243.526	.....Having rotary drive mechanism
243.527	.....Having allochiral actuating handles
243.528	.....Having repositionable annulus engaging tool
243.529	....Including near side fastener shaping tool
243.53	..Riveter
243.54	...Single header
243.55	....Pipe joiner
243.56	..Clip applier
243.57	..Binding or covering
243.58	...Edge binding
244	.Pullers or pushers, contained force multiplying operator
245	..Hubcaps
246	..Battery terminals
247	..Cotter pins
248	...Plier type
249	..Valve stem pins and keys
250	..Machine keys
251	..Arbor-type pressers
252	..Fluid operator
253	..Wedge operator
254	..Percussion or explosive operator
255	...Tube, sleeve, or ferrule inserting or removing
256	..Screw operated
257	...C-frame
258	...Central screw, work-engagers around screw
259	....Work-engager arms along or parallel to screw
260	.....With arm connecting engaging means
261	.....Pivotal arms
262	.....Pivotal grippers on screw
263	....Tubular or tube segment form work-engagers
264	.....Screw threaded work-engager
265	.....Movable grippers on screw
266	.....Plate or bar form work-engagers
267	..Lever operator
268	...Plier type
269	.Piston ring group contractors and holders
270	.Hand-manipulatable tools
271	..Aligners or centers
272	...Tube with tube
273	...Auto wheel with auto chassis
274	...Clutch plates
275	..Impact receiving tools
276	...C-frame
277	...Thread protectors (e.g., wheel axle type)
278	..Hand grippers for direct push or pull
279	...Centrifugal separators
280	...Tube sleeve or ferrule applying and removing
281	....Thread-tapping grip
281.1	.With work-holder for assembly
281.2	..For assembling a luminescent mantle
281.3	..And assembly press (e.g., truss assembly means, etc.)
281.4	..Having means to permit support movement while work is thereon
281.5	.Including means to relatively position plural work parts
281.6	.Work-supported apparatus
282	.Tube, sleeve or ferrule
283	.Work grippers, anvils and elements
283.5	.By deforming
78	FILES AND RASPS
79	.Sectional
80	.Holders
110	ROLLS OR ROLLERS
110.5	.With handle
111	.With guage
112	.With signal or indicator
113.1	.With inflatable chamber
113.2	..Anti-deflection
114	.With fan
115	.Combined (e.g., with driving gear here)
116.1	.Rotatable relative to supporting shaft
116.2	..Anti-deflection
117	.With internal wedging expander
118	.With sheet edge holder
119	..End ring
120	.With pile or nap surface
121.1	.With surface indentations, projections or slits
121.2	..Plural direction alignment of sets, e.g., checkerboard type
121.3	...Outer screenlike layer over skeleton or perforate core, e.g., "Dandy Roll"
121.4	..Helically aligned
121.5	..Axially aligned
121.6	..Radially aligned
121.7	...With minor interruptions
121.8	..Irregular and/or uneven arrangement, e.g., sandblast type
122	.Tapering
123	.With end rings or reinforcement
124	.With segmental sections
125	.With annular axial sections
126	.With leaf or coil spring member
127	.With helical member
128	.With spiral member
129	.With internal anchor for annular member
129.5	.Single annular member only
130	.With plural annular members
131	..With cloth annular member
132	.Compositions and materials

PRESSURE FLUID SOURCE AND MOTOR

384 .Expansible chamber type volumetric responsive measuring device in series with or driven by output motor operates the motor controller

385 .Manual pump pressurizes fluid to position output motor motive fluid control valve

386 ..Manual pump supplies motive fluid to output motor when power motive fluid pump is inactive

387 .Distinct structure metering and dispensing a stroke length determining volume of motive fluid to the motor

388 .Full range correspondence of position of external manipulator and motor positioned member effected by feedback linkage

389 ..Positioned member is displacement controller of second motor pump

390 ..Electrical feedback means

391 ..Feedback linkage controls variable displacement pump

392 ..Feedback includes plural movable valve parts

393 .Manipulator for motive fluid control valve having load feel or motor pressure feedback

394 .Having apparatus control by timer or delay means

395 .Control relative to independently driven oscillator, speed standard or pacer device

396 .Utilizing lubricant, starter motor, cooling fluid, or fluid used for combustion in an internal combustion engine

397 ..Vacuum generated by internal combustion engine intake manifold powers motor

398 .Utilizing natural energy or having a geographic feature

399 .Unsafeness, unreadiness or disarray prevent manual change or operative state

400 .Selective or simultaneous power and manual energy inputs

401 ..Fluid motor and directs manual drive of output device

402 ..Separate manual and motor driven pumps supply motive fluid to output motor

403 .Apparatus having means responsive to or ameliorating the effects of breakage, plugging, mechanical failure or power failure

404 ..Stand-by stored energy means activated responsive to malfunction or power failure

405 ..Second motive fluid supply means takes load responsive to failure of first

406 ..Output means locked, positioned or released on failure of motive fluid supply means

407 .Pneumatic motor with gas supply or removal device

408 ..Convertible motor-pump device selectively charges and is driven by gas from storage vessel

409 ..Having automatic control

410 ...Responsive to condition in gas storage vessel

411 ...Suction pressure on motor regulated

412 ..Having pump device

413 .With control means for structure storing work driving energy (e.g., accumulator, etc.)

414 ..Energy of braking or of reversed load on motor stored

415 ..Accumulator pressurized by gas pump or external gas supply

416 ..Plural accumulators

417 ..Stroke device driven by successively operated energy input structure and stored energy structure

418 ..Control by sensor of accumulator condition

419 .Motor driven by motive fluid of system drives pump pressurizing motive fluid of system

420 .Having condition responsive control in a system of distinct or separately operable outputs or output drive units

421 ..With plural pump or motive fluid source relationships selected by multiway valve

422 ..Independently actuatable outputs with condition responsive means insuring sufficiency of feed of motive fluid

423 ..Including means for controlling or for reversing input pump drive

424 ..Serially connected motors controlled to establish parallel operation or to by-pass a motor means of the series

425 ..Condition responsive means establishes number of motor sections driving a common output

426 ..Speed of, pressure in, or position of one output motor or motor section controls another

427 ..With manual control or selection of motor, motor speed or motor load

428 .Having condition responsive control in a system of separately operable power input pumps, pump motors, pump cylinders or pressure fluid sources

429 ..With externally operated multiway valve changing the relationships of the motive fluid pressurizing or supplying means

430 ..Pressure or volume responsive means shifts the relationship

431 .Condition responsive control of or by input to input pump drive means

432 ..Pump drive means deactivated responsive to position of output stroke device

433 .Having correlated or joint actuation of controller of input to motive fluid pressurizer and of controller of motive fluid floow

434 ..Interlinked pump drive controller and manipulator of stroke device

435 .Having a mechanical clutch or brake device in the power train

436 ..Correlated control of device and motive fluid flow controller

437 ..Selective fluid and mechanical drive of output from input

438 ...Condition responsive selection

439 ..Device acts on intermediate reactive rotor to modify speed ratio or direction

440 ...Condition or direction responsive device

441 ..Condition or direction responsive device

442 ..Device holds output in adjusted position

443 .Servo-motor having externally operated control valve sets motor or pump displacement

PRESSURE FLUID SOURCE AND MOTOR
.Servo-motor having externally operated control valve sets motor or pump displacement
444 ..Having auxiliary pump or external source of motive fluid supplying servo-motor
445 .Condition responsive control of pump or motor displacement
446 ..Pump displacement varied responsive to position of motor or output device
447 ..Control actuated by a servo-motor fed by a speed indicating auxiliary pump
448 ..By means sensing rotational speed of output motor
449 ..By means sensing rotational speed of prime mover or pump
450 ..Choke in motor feed or discharge line establishes displacement control pressure (e.g., rate of flow responsive, etc.)
451 ..Controlled by torque of motor or motor discharge pressure
452 ..Pump displacement controlled by pump discharge or motor feed pressure
453 .With means purging, cleaning or separating undesirables from motive fluid
454 ..Solids from liquid separator
455 .Having leakage collecting structure
456 .Having distinct cooling or lubricating structure
457 .Collapsible joined device having fluid trapping valve in joint
458 .Having assembly or repair structure
459 .Condition responsive control of motive fluid flow
460 ..Holding or braking valve in motor exhaust line controlled by pressure in motorfeed line
461 ..Discharge from contracting cylinder of double-acting motor controlled
462 ..With externally operable multiway valve means directing flow to a stroke device
463 ...Sensor of external condition controls valve
464 ..Of motive fluid transfer between a reservoir and a recirculating path of a pump motor loop
465 ..Having externally operable means for setting motor or pump displacement or direction of rotation
466 ..Of braking or holding valve in motor discharge line
467 ..Stroke cylinder open to exhaust responsive to position of output member
468 ..Of by-pass of motor, pump or flow control element
469 .Having means controlling or attenuating shock vibration, sticking or chattering
470 .Externally operated multiway valve or interconnected control elements control motive fluid for a limited stroke to-and-fro device
471 ..Having plural distinct or separately operable output means
472 ..Flow to opposed expansible chambers having a common output reversed
473 .Pump means moves motive fluid from one chamber to an opposite chamber of opposed expansible chambers having a common output
474 ..Valve or restriction controls gravity or spring return of output
475 ..With means compensating for charge leakage or volume difference between discharging and receiving chambers
476 ..Reversible delivery from pump means
477 .Ram driven by fluid pumped from reservoir
478 ..Having means pressurizing, vacuumizing or venting reservoir
479 ..Having selective or variable pump displacement or pump drive leverage
480 ..Telescopic ram
481 ..Having fluid trapping means with a manual release or by-pass holding ram
482 ...Release valve and pump actuated by a common handle
483 .Having selecting means distributing motive fluid between plural motors or cylinders rotating a common output shaft
484 .Having plural energy outputs (e.g., plural motors, etc.)
485 ..Unit having coaxial rotary output shafts and pump means in a common housing (e.g., automobile differential, etc.)
486 .Having plural energy input means, pumps or diverse pump outlets
487 .Input pump and rotary output motor system having displacement varying type of direction or speed selector
488 ..Including auxiliary system feed pump
489 ..Having valve means controlling flow between pump and motor
490 ..Both motor and pump have displacement adjustment means
491 ...Having common or intercontrolled adjuster actuating means
492 ....Motor swash plate and pump swash plate intercontrolled
493 .Valve means reverses flow from pump to reversible rotary motor
494 .Including by-pass or restrictor controlling flow circuit
495 MOTOR HAVING A BUOYANT WORKING MEMBER
496 .With means to vary buoyancy of working member
497 .Working member actuated by the rise and fall of a surface of a body of fluid
498 ..Having tide responsive working member positioning means
499 ..Having means responsive to lateral impulse of fluid
500 ..Having articulated buoyant members
501 ..Motor is free floating unit
502 ..Having fluid flow or wave controlling, confining or directing means
503 ...In which the control means is variable
504 ..Having flexible strand working member motion transmitting means
505 ..Having relatively movable working members
506 ..Working member pivotally supported
507 ..Having one-way clutch power transmission means, e.g., ratchet, etc.
685 MOTOR HAVING EXHAUST FLUID TREATING OR HANDLING MEANS
686 .Having condition responsive control of exhaust structure or by exhaust condition
687 .Motor-exhaust assembly with stress relieving or absorbing structure
688 .Water mingled with exhaust steam
689 .Exhaust fluid mingled with non-exhaust fluid
690 .Motor and indirect heat exchanger

MOTOR HAVING EXHAUST FLUID TREATING OR HANDLING MEANS
.Motor and indirect heat exchanger
691 ..Boiler feed water heated by exhaust
692 ..Having condensate pump
693 ..Plural heat exchangers
694 .Including exhaust flow directing or dividing device
695 ..Device directs exhaust of air motor into atmosphere
696 ..Device is draft structure of hydraulic motor
697 ..Turbine discharge directed to flow line
698 SYSTEM HAVING PLURAL MOTORS OR HAVING DIVERSE TYPES OF ENERGY INPUT
699 .Spring type motor and internal combustion engine motor
700 .Motors intercontrolled responsive to angular speed differential of rotatable output shafts
701 ..Hydraulic or pneumatic intercontrol system
702 ..Electrical intercontrol system
703 .Control including pacer, oscillator, punch card, template or tape
704 .Control including clock, retarder or programmer
705 .Signal, indicator or inspection means
706 .Having condition responsive control
707 ..Of branched flow of motive fluid through serially connected motors
708 ..Of or by motor cooling, ventilation, or brake system
709 ..Of or by disconnect or load release means to output means or between motors
710 ..Intercontrol of internal combustion engines responsive to relative fuel or manifold conditions
711 ..First motor load share adjusted relative to the load share of a second motor driving a common load, responsive to a condition of the second motor or of the load
712 .Engine apparatus or system actuatable selectively or simultaneously by internal combustion of fuel and by expansion of motive fluid
713 .Plural motors having brake means for motor or output means
714 .Plural motors having supply or control of cooling, lubricating, or scavenging fluid
715 .Plural motors, connected for serial flow of motive fluid
716 .System of plural motors having a common output structure
717 ..And another output
718 ..Having disconnect means between a motor and the output
719 .Interrelated or group control operating means for plural motors or outputs
720 .Unitary support for plural motors

1 CONSUMABLE PRODUCTS PRODUCED BY COOLING
3.1 USING ELECTRICAL OR MAGNETIC EFFECT
3.2 .Thermoelectric; e.g., peltier effect
3.3 ..Heat pump, selective heating and cooling
3.4 ..Including dehumidifying and condensate handling
3.5 ..Made with flexible heat exchanger material; e.g., blanket, wearing apparel, etc.
3.6 ..Interior of enclosure cooled; e.g., refrigerator
3.61 ...Having vehicle feature; e.g., cooling cart, car, truck, boat, etc.
3.62 ...Portable, having transporting feature; e.g., handle
3.63 ...Icemaker
3.64 ...Beverage dispenser
3.7 ..Including specific circuitry or heat exchanger material
4 CHEMICAL REACTION OR SOLIDS DISSOLVING
5 VORTEX TUBE, E.G., RANQUE
6 GAS COMPRESSION, HEAT REGENERATION AND EXPANSION, E.G., STIRLING CYCLE
7 UTILIZING FUEL AS REFRIGERANT
8 SOLIDIFIED OR LIQUIFIED GAS (E.G., CRYOGEN) PRODUCT MANUFACTURING FROM A GAS
9 .Processes, e.g., liquefying per se
10 ..Solidifying gas as consumable product
11 ..Extracting a component from a mixture of gases by liquefaction and separation
12 ...With solidification
13 ....Extracting solids prior to rectifying
14 .....With filtration
15 ....Extracting by filtration
16 ...Retrograde condensation
17 ...Sorption
18 ....By solid sorbent
19 ...Selecting diverse operations
20 ...Contacting with a treating material
21 ...Modulating
22 ...Obtaining a rare atmosphere gas, e.g., argon, krypton, neon, xenon
23 ...Plural separations
24 ....Including rectification
25 .....Spaced initial charging
26 ......Repressurizing
27 .....Returning contacting component to separator
28 ......To same separator
29 .....Downstream intermingling of separated components
30 ......Repressurizing
31 .....Utilizing product of separator as indirect heat exchanging medium in rectification
32 ...Rectification
33 ....Supplemental withdrawal
34 ....Intermediate heat exchanging
35 .Solidified gas shaping means, e.g., press
36 .Liquefied gas producing and separating apparatus
37 ..With condition sensing means
38 ..Flow line connected expansion engine and treater
39 ...Downstream of separator
40 ..With external refrigeration producer
41 ..Forcing means downstream of separator, e.g., liquid pump
42 ..Separator, e.g., rectifier
43 ...Dividing and recombining feed prior to separator
44 ...With feed treater upstream of rectifier-separator
45.1 STORAGE OF SOLIDIFIED OR LIQUIFIED GAS (E.G., CRYOGEN)
46.1 .With sorbing or mixing
46.2 ..Mixing of substance with hydrogen
46.3 ..Sorbing into capillary material
47.1 .With conservation of cryogen by reduction of vapor to liquid within storage receptacle
48.1 .With vapor discharged from storage receptacle
48.2 ..And subsequently restored to receptacle as liquid
48.3 ..And subsequently used to cool receptacle
48.4 ..Discharge caused by ignition of combustible gas
49.1 .With measuring
49.2 ..Of liquid level
50.1 .Liquified gas transferred as liquid
50.2 ..With vaporizing of liquified gas downstream of storage
50.3 ...Energy converted to work (e.g., used to drive prime mover)
50.4 ...Operates valve which controls flow of liquid
50.5 ...In phase separator
50.6 ..Specific pump structure
50.7 ..Specific conduit, valve, or coupling structure
51.1 .Including cryostat
51.2 ..Utilizing Joule-Thomson effect
51.3 ..Helium-type
52.1 .Spraying of cryogen
53.1 .Underground or underwater storage
53.2 .Storage in modified vehicle (e.g., ship, truck, etc.)
54.1 .Cryogen stored in both phases (e.g., as slush or gel)
54.2 .Controlled conversion of solidified gas to another phase
54.3 .Storing solidified gas
55.5 LOW PRESSURE COLD TRAP PROCESS AND APPARATUS
56 PROCESSES
57 .Suspending in upwardly directed current
532 .Fractionally solidifying a constituent and separating the same
533 ..Including direct contact with added refrigerant
534 ...Liquid refrigerant converted to vapor phase during cooling
535 ....Spent refrigerant vapor used in direct contact to melt solidified component or heat product liquid
536 ...Refrigerant remains liquid during cooling
537 ..Utilizing a constituent of the original mixture or solution as refrigerant
538 ..Solidifying or purifying in a pulsed column or using sonic vibration
539 ...With control of pulsed column process parameter
540 ..With measured parameter responsive control
541 ..With separated constituent recycle
542 ..Using melted solid to wash solidified constituent
543 ..With squeezing or compression of solidified component
544 ..With stirring, agitating or scraping of the solidification zone
545 ...With externally scraped drum or helix or screw
59 .Accumulating holdover ice in situ
60 .Packaging
61 .Utilizing motion of vehicle
62 .Treating an article

PROCESSES
.Treating an article
63 ..Moving through cooling zone during cooling
64 ..By contacting with liquid
65 ..Diverse sequential temperatures, e.g., precooling
66 .Congealing flowable material, e.g., ice making
67 ..With filtering or gravitational separating
68 ..Agitating
69 ...Introducing gas, e.g., air
70 ....By injecting
71 ..Removing product from congealing surface
72 ...Flexing supporting surface
73 ...By heating
74 ..Spraying or dripping
75 ..Sequential stages, e.g., composite block making
76 .With preliminary refrigerant manufacturing
77 .Assembling, charging, or repairing of refrigeration producer
78 .Deodorizing, antisepticizing or providing special atmosphere
79 .Exchanging heat between plural systems, e.g., disparate
80 .Defrosting or frost inhibiting
81 ..By utilizing working fluid of refrigeration producer
82 ..By utilizing fluid strange to system
83 .Preventing slugging to compressor
84 .Lubricant handling
85 .Separating or preventing formation of undesirables
86 .Reducing pressure on compressed gas
87 ..Converting energy of expansion to mechanical movement
88 ...With reheat of gas stream
89 .Circulating external gas
90 ..With reheating
91 ..With adding of moisture
92 ...With removing of moisture
93 ..With removing of moisture
94 ...By sorption
95 ..Plural cooling, e.g., precooling by exhaust
96 ..Indirect cooling using closed circuit heat transfer fluid
97 ..Combining streams having diverse temperatures
98 .Fluid external of refrigeration producing cycle
99 ..Indirect by using heat transfer fluid external of cycle
100 .Vacuumizing an open outlet chamber
101 .Evaporation induced by sorption
102 ..Using diverse refrigerants
103 ..With modulated flow rate of fluid
104 ...By varying heat input or output
105 ...Varying non-refrigerant fluid flow
106 ..Intermittent operating of generation and sorption cycle
107 ..With absorption liquid circulation aided by system generated pressure
108 ..With liquid refrigerant transfer to evaporator against gravity
109 ..Cooling by evaporation of refrigerant from sorption solution
110 ..With diffusion of refrigerant into inert gas
111 ...With forced circulation between evaporator and sorber
112 ..Utilizing particular refrigerant and/or sorbent materials
113 .Transferring heat between diverse function portions of refrigeration cycle
114 .Employing diverse materials or particular material in refrigeration circuit
115 .Compressing, condensing and evaporating
116 ..Utilizing motive energy of fluid to compress
117 ..Dividing refrigerant flow, e.g., bypass parallel units
118 .Pumping fluid in closed circuit
119 .Condensing and evaporating
120 .Spaced cooling steps
121 .Gas and liquid contact
122 .Combining fluids having diverse temperatures
123 SEPARATOR FOR SOLIDIFIED CONSTITUENT OF LIQUID MIXTURE
124 .With heater for liquid mixture container
125 WITH INDICATOR OR TESTER
126 .Operatively correlated with automatic control
127 .Diverse function indicators or testers
128 .Atmospheric condensation accumulation, e.g., frost
129 .Condition sensing
130 ..External cooled material
131 .Position or extent of motion of movable element
132 AUTOMATIC CONTROL
133 .Responsive to vehicle body motion or traction
134 ..Electrical generator
135 .By congealed removable product condition
136 ..By change of consistency, e.g., viscosity or overrun
137 ..By accumulation of product
138 ...On heat absorber
139 .By accumulation on freezing surface, e.g., ice
140 ..By frost, i.e., atmospheric condensate
141 .Of closed system sorbent type
142 ..Discontinuous operation of refrigerant or sorbent container unit
143 ...Of intermittent generator-sorber unit
144 ....Plural unit sequence or alternation
145 .....Serially connected type
146 ....Of cooling fluid
147 .....Including sorbent refrigerant flow
148 ..Of heating means
149 .Withdrawing or adding refrigerant from or to normally closed system
150 .Preventing, removing or handling atmospheric condensate
151 ..Defrosting
152 ...Limited area, e.g., preferred zone
153 ...By storage compartment closure actuated means
154 ...By energy input actuated means
155 ...Including time or program actuator
156 ...By temperature
157 .Time or program actuator
158 ..Time delay of condition sensing or control operation
159 .Selective heating or cooling
160 ..Reversible cycle machine
161 .With correlated manual or external operator and condition sensing means, e.g., cutoff or reset
162 ..Manual initiate with sensor terminate
163 ..Selective
164 ..Manual reset or sensor operates additional element
165 .Solidified gas
166 ..Diverse control or response

	AUTOMATIC CONTROL
	.Solidified gas
167	..Of heater, heat transmitter or secondary fluid
168	..By temperature
169	.Vacuumized chamber with open outlet
170	..Evacuating means, e.g., jet pump
171	.Gas-liquid contact cooler, fluid flow
172	.Air compessor, cooler and expander
173	.Of external fluid reheating
174	.Trapping and discharging refrigerant batches
175	.Diverse, cascade or compound refrigeration-producing system
176.1	.Humidity sensor
176.2	..Having defrost control related to humidity
176.3	..Controlling variable compressor capacity
176.4	..Controlling gas-liguid contactor for air
176.5	..Control of air heater, e.g., reheat pump
176.6	..Plus air temperature sensor exerting a control
177	.Of external fluid or means
178	..Diverse control or response
179	...Plural external fluids or means controlled
180	...External fluid and refrigeration producer
181	....Condenser cooling fluid flow
182	....Sequential
183	..Cooling fluid for heat rejecter, e.g., condenser
184	...By refrigerant
185	..Indirect heat transfer liquid, e.g., brine
186	..Air controller or director
187	...Damper between storage compartments
188	..By lever, e.g., float-controlled valve
189	..By fluid flow, e.g., check valve
190	.Refrigeration producer
191	..Of or by jet-type compressor
192	..Lubrication
193	...Of or by compressor
194	...Lubricant aspirator in evaporator liquid level control chamber
195	..Impurity removal
196.1	..Bypass, e.g., compressor unloading
196.2	...For plural compressor cylinders
196.3	...Direct bypass of compressor
196.4	...Condensor bypass
197	...Of expansion zone
198	....Of serially arranged evaporator
199	....Through an evaporator, i.e., parallel
200	.....Individual flow controllers and sensors
201	..By external cooled liquid or holdover
202	..Including external thermal source modifying sensor action
203	..Plural refrigerating producing elements and plural sensors
204	...Including expansion valve or variable restrictor
205	....Plural variable restrictors in flow line
206	.....High and low side
207	..Diverse function refrigeration elements controlled by single sensor
208	..Single refrigeration producer controlled by plural sensors
209	...Compensating or modifying
210	....Expansion valve or variable restrictor
211	.....External condition sensor
212	.....Plural sensors at low side
213	...Alternative or selective sensors
214	..Single sensor mounted or formed to respond to plural conditions, e.g., compensators
215	...Controlling compressor or its drive, e.g., torque or speed
216	..Of or by evaporation zone
217	...Back flow or pressure regulator
218	...Valve or restrictor by liquid lever
219	....Low side float
220	.....Float chamber at suction line
221	......Valve isolated from float chamber
222	...Of expansion valve or variable restrictor
223	....By external condition
224	....By condition at low side
225	.....At or beyond evaporator outlet, i.e., superheat
226	...Compressor or its drive controlled
227	....By conducted evaporator temperature
228.1	..Compressor or its drive controlled
228.2	...For ice or ice cream maker
228.3	...By refrigerant pressure
228.4	...By variable speed motor or pulley type mechanism
228.5	...By variable compressor output, e.g., unloading, staging, etc.
229	...By external cooled gas
230	...By condition of power source
231	TIME OR PROGRAM ACTUATOR
232	.Closed system sorbent type
233	.Congelation product maker
234	.Defrosting
235	RINK
235.1	UTILIZING SOLAR ENERGY
236	WITH ALTERNATELY USABLE ENERGY SOURCES
237	SEPARABLE AMBULANT COOLED ENCLOSURE AND POWER OR COOLING SOURCE
238.1	DISPARATE APPARATUS UTILIZED AS HEAT SOURCE OR ABSORBER
238.2	.With vortex tube, thermoelectric, Stirling or air cycle
238.3	.With sorption
238.4	.With power vapor generator
238.5	.With distillation, ice maker, or freeze separation
238.6	.With vapor compression system
238.7	..Reversible, i.e., heat pump
239	WITH VEHICLE FEATURE
240	.Ship
241	.Utilizing motion of vehicle
242	..Axle drive
243	.Vehicle contained common power supply
244	.Occupant-type vehicle
245	.Melt control
246	DISPLAY TYPE
247	.With means dispersing or evaporating liquid into atmosphere
248	.Means removing or preventing condensate on transparent panel
249	.With feature extraneous to cabinet or cooler
250	.With material conveyer or transporter, e.g., for ice or goods
251	.Stepped, e.g., shelves
252	.Plural storage compartments
253	..Formed by hollow imperforate cooled partition
254	..Including nondisplay storage compartment
255	.With air controlling or directing means
256	..Spaced elongated air inlet and outlet type, e.g., air curtain
257	.Bottom cooling means, e.g., cooled floor
258	WITH MEANS FORMING NON-COOLED WORK SURFACE, E.G., COUNTER, TABLE, SIDEBOARD

259.1	STRUCTURAL INSTALLATION
259.2	.With electrical component cooling
259.3	.With body applicator
259.4	.With evaporative type cooler
260	.Geographic, e.g., subterranean feature
261	.Article of furniture, e.g., bed cover or canopy
262	.Window connected or mounted
263	.Vertical partition or wall mounting feature
264	WITH ILLUMINATING OR RADIANT ENERGY MEANS
265	COMPARTMENT ACCESS OR USE AND AIR BLOCKING
266	.Including article conveyer or transporter
267	INTERLOCKED DIVERSE FUNCTION ELEMENTS
268	VACUUMIZED CHAMBER WITH OPEN VAPOR OR GAS OUTLET
269	.Including sorbent agent
270	.System, i.e., multiple treating or fluid handling means
271	ATMOSPHERE AND SORBENT CONTACTING TYPE
272	WITH MEANS PREVENTING OR HANDLING ATMOSPHERIC CONDENSATE RELATIVE TO HEAT ABSORBER
273	.Operating on insulation, e.g., vent to refrigerated compartment
274	.With means to add moisture to cooled space
275	.By external heater
276	..Heating principal heat absorber, e.g., evaporator
277	.Means utilizing heat developed by refrigeration producer
278	..Bypassing or reversing internal fluid flow
279	..Means conducting atmospheric condensate to heat rejecter
280	...Pump or thrower for condensate
281	.With porous or foraminous atmospheric condensate receiver
282	.Means contacting heat absorber with fluid strange to system
283	.Moisture condensing means distinct from principal heat absorber
284	.Wiper or scraper
285	.Retainer or flow director for atmospheric condensate
286	..Adjustable position or selectively usable
287	..Wetted inner surface type refrigerator
288	..With flow director directing condensate to retainer
289	...Retainer exterior of refrigerated space
290	..Plural distinct flow directors acting in parallel
291	..Condensate retainer
292	WITH MEANS FOR CHARGING CLOSED REFRIGERATION PRODUCING SYSTEM
293	HAND MANIPULABLE TOOL
294	CONTAINER CUTTER OR PUNCH-TYPE OPENING MEANS
295	RESILIENTLY SUPPORTED POWER AND/OR HEAT REJECTING ELEMENT
296	MUFFLER OR SOUND DAMPENER
297	EXTERNAL SUPPORT FOR REFRIGERATOR HOUSING
298	WITH REPAIR, ASSEMBLY OR DISASSEMBLY MEANS
299	.Detachable valve and coupling
300	.Means releasing mold from support
301	..With grid or cube release means
302	.Sliding or rolling on guide means
303	WITH CLEANING MEANS FOR APPARATUS
304	MATERIAL COOLING MEANS INCLUDING GAS-LIQUID CONTACTOR
305	.Cooling heat rejector of refrigeration producer
306	.Means feeding gas into pressurized receiver
307	.Submerged gas inlet
308	..Drop tube type
309	.Gas recirculated relative to enclosure
310	.Fluid recirculating means
311	.Diverse treating means
312	..Ice holder and ice melt-gas contactor
313	...Elongated vertical passage for melt and air
314	.With gas forcing or directing means
315	.Porous wall liquid container or flow line
316	.Porous cover member
317	WITH SEPARATOR-CLARIFIER FOR COOLING FLUID OR ICE MELT
318	.For liquid
319	..Isolated from coolant
320	WITH COMMINUTOR OR CUTTER
321	.Including means utilizing product
322	DISPARATE SERIALLY ARRANGED PRODUCT TREATING APPARATUS
323.1	WITH INTERNAL-COMBUSTION ENGINE
323.2	.With cooling apparatus other than gas compressor
323.3	.With electrical motor drive
323.4	.With clutch or variable speed transmission controlling compressor drive
324.1	REVERSIBLE, I.E., HEAT PUMP
324.2	.With cooling apparatus other than gas compressor
324.3	.With product treatment
324.4	.With refrigerant collection and intermittent discharge
324.5	.With atmospheric condensate removal or prevention
324.6	.With flow control or compressor details
325	.External fluid flow reversed
326	CONVERTIBLE
327	.Storable or variable capacity ice bunker
328	..Bunker wall movable to chamber wall
329	.Movable partition within cooled compartment
330	WITH REFRIGERANT OR COOLANT MANUFACTURING MEANS
331	COMBINED
332	DIVERSE SYSTEMS, E.G., ICE AND MECHANICAL
333	.Primary and secondary dependent circuits
334	..Secondary evaporator contacting inner liner, e.g., two zone cold wall
335	PLURAL PAIRED DIFFERENT FUNCTION REFRIGERATION PRODUCING ELEMENTS, E.G., CASCADE
336	MATERIAL HANDLERS OF DIVERSE TYPES
337	COOLED ARTICLE STORAGE COMPARTMENT AND COOLED ISOLATED MATERIAL HANDLER
338	.Liquid container or flow line within cooled enclosure
339	..Including inlet flow line connection
340	MEANS PRODUCING SHAPED OR MODIFIED CONGEALED PRODUCT
341	.With article press means
342	.With means for working congealing material, e.g., beater
343	..Diverse blades
344	.With product receiving and storing means
345	.Freezing surface mounted for movement during freezing
346	..Drum
347	.With raw material projector, e.g., spray

MEANS PRODUCING SHAPED OR MODIFIED CONGEALED PRODUCT
348 .With means to precool or recirculate raw material
349 .Thawing means
350 ..Attached to hand-manipulable mold
351 ..Electrical heater
352 ..Means using refrigerant or coolant as heating fluid
353 .Heat absorber with product remover
354 ..Moving scraper
356 .Mold with means to absorb heat, e.g., brine tank
371 PORTABLE, COMMODITY-CONTAINING
372 .Mutually supported commodity and solid coolant
373 LIQUID CONTACTING DISCRETE COMMODITY
374 .With article conveyer or transporter
375 ..With liquid recirculating means
376 .With liquid recirculating means
377 ARTICLE HOLDER MOUNTED ON DOOR OR PIVOTED PARTITION
378 ARTICLE MOVING MEANS
379 .Solid refrigerant
380 .Continuous longitudinal-type conveyor
381 .Rotary about fixed axis, e.g., rotary shelf or scraper
382 .Drawer, tray or track-guided type; horizontally movable
383 MOVABLE THERMAL MEANS VARYING HEAT TRANSMISSION
384 COOLER UTILIZING SOLIDIFIED GAS
385 .Sublimed gas entering insulation or within hollow wall
386 .Means cooling withdrawable liquid
387 .External as circulator or director
388 .Means dispersing sublimed gas into cooled enclosure
389 WITHDRAWABLE LIQUID, E.G., DISPENSER
390 .With plural liquid outlets or sources, e.g., distributing system
391 .With withdrawn liquid receiver
392 .With agitator for withdrawable liquid
393 .With intermediate indirect heat transfer fluid container or conductor
394 .Refrigerant evaporator surrounding or within a container
395 ..Between cooled liquid container and insulation
396 .In indirect heat exchanging relationship to coolant
397 ..Barometric feed-type liquid container
398 ..Cooled liquid container supporting ice
399 ..Helical or spiral coil
400 ..Ice holder and cooled liquid container concentrically nested
401 AIR COMPRESSOR, COOLER AND EXPANDER TYPE
402 .Motor-type expander
403 ..Reciprocating element-type motor, e.g., piston
404 GAS CONTROLLER OR DIRECTOR
405 .Isolated gas compartment, e.g., cold air jacket
406 .Gas passage over or through indirect heat-transfer container or holdover
407 .Cooled gas directed relative to cooled enclosure
408 ..With adjustable gas flow controller
409 ...For exterior port
410 ..Exterior port, i.e., ventilating
411 ...With additional means causing flow, e.g., blower
412 ...Inlet and outlet ports
413 ..Means verging gas streams within storage space
414 ...Gas flow forcing means
415 ...Space cooler units in separate streams
416 ....Above storage space and adjacent opposed walls
417 ..With imperforate partition forming storage compartments
418 ..Foraminous gas distributor flow connected to cooler unit
419 ..Gas forcing means
420 ..Directed relative to ice container
421 ...Foraminous wall or bottom ice container
422 ....Melt collector over storage space
423 .....Storage space along container side
424 ...Gas flow passage means under ice container
425 .Gas flow through ice compartment contacting ice
426 .Gas forcing means, e.g., cooler unit
427 ..Plural gas inlets, e.g., recirculated and fresh air
428 ..Means directing gas over heat rejector
429 ...Unitarily driven plural blowers
430 INTERMEDIATE FLUID CONTAINER TRANSFERRING HEAT TO HEAT ABSORBER OR HOLDOVER
431 .Side-by-side or superimposed cooled compartments
432 ..Different temperature arrangements
433 ..With top access to each compartment, e.g., ice cream cans
434 .Flow line connected transfer fluid supply and heat exchanger
435 .With indirect fluid pump or agitator
436 .Connected distinct sections for indirect fluid
437 .Non-liquid heat accumulator
438 .Forming cooled storage compartment
439 .Unitary jacket surrounding coolant line
440 COOLED ENCLOSURE
441 .Plural cooled compartments
442 ..Coolers in parallel for plural compartments
443 ..Cooler integral with or forming dividing wall
444 ...Exterior wall
445 ...With non-dividing cooler
446 ...Forms plural sides of a storage compartment
447 ..Insulating dividing wall
448 .Movable unit of refrigeration producing assembly
449 ..Unit includes movable wall section, e.g., door
450 ...Unit includes condenser fan
451 .Flowing coolant container covered by insulation means or within hollow wall of enclosure
452 .With heat rejecting element enclosure or cooling feature
453 ..Heat rejector contacting enclosure wall
454 ..With ventilation means therefor
455 ...Forced circulation
456 ...Vertical flue venting bottom compartment
457.1 .Portable receptacle
457.2 ..With holdover material
457.3 ...Drinking container
457.4 ...For beverage receptacle
457.5 ....For multiple receptacles
457.6 ..Cooled serving dish
457.7 ..Picnic/lunch box type cooler
457.8 ..Wine server/cooler
457.9 ..Cooled by means other than ice (e.g., mechanical, electrical, absorption, cryogenic, etc.)
458 .Access surface open to atmosphere
459 .Ice support, e.g., container

	COOLED ENCLOSURE
	.Ice support, e.g., container
460	..Flowing ice melt heat exchanger within cooled enclosure
461	...Lateral ice melt distributor
462	..Valve or trap within ice melt flow line
463	..Partially surrounding storage compartment
464	..Top access to ice compartment
465	.With particular internal element support
466	..Resilient
467	REFRIGERATION PRODUCER
468	.With lubricant handling means
469	..Of unitary motor-compressor in casing
470	..Lubricant separator
471	...At evaporator or evaporator-discharge line
472	....With lubricant heating means
473	...At condenser or receiver
474	.With refrigerant treater
475	..Means for discharging impurity from system
476	.Sorbent type
477	..Absorber-still, e.g., intermittent
478	...Evaporator-condenser unit
479	...With means returning sorbent from evaporator
480	...With solid sorbent
481	...With sorber-generator cooling means
482	....Internal liquid flow to external cooler
483	..Pump means forcing gas or vapor relative to sorber
484	..Vapor-liquid contact in reabsorber forming liquid refrigerant
485	..Means causing cooling fluid contact with sorber and/or condenser
486	..Means cooling liquid refrigerant flow line to evaporator
487	..Internally generated pressure or capillary means moving sorption liquor
488	...Transfer vessel, e.g., liquid trap
489	..Means attempering flow line between sorber and generator
490	..Inert gas
491	...Gas-liquid contactor within inert gas circuit
492	....In evaporator
493	...Means cooling inert gas flow line from sorber to evaporator
494	..Particular gas-liquid contact in sorber
495	..Sorbent vapor separator between generator and condenser
496	...Submerged gas-liquid contact means
497	..With means to enhance separations in generator
498	.Compressor-condenser-evaporato r circuit
499	..Unitarily movable connected units
500	..Jet powered by circuit fluid
501	..External fluid actuates compressor and exchanges heat
502	..Diverse fluids
503	..With liquid trap or disperser in suction line
504	..Means to apportion refrigerant to evaporator
505	..Cooling motor and/or compressor by refrigerant
506	..External cooling fluid contacts heat rejector
507	...Air cooled
508	....Motor-compressor in common housing
509	..Condensed liquid receiver, e.g., surge tank
510	..Plural compressors or multiple effect compression
511	..Fixed restrictor
512	.Distinct vapor liquid separator and separated liquid recycle
513	.Heat exchange between diverse function elements
515	.Evaporator, e.g., heat exchanger
516	..Enclosure forming
517	...With closure
518	...Surrounds inner container
519	...Plural distinct sections or diverse zones
520	....Shelf is evaporator
521	...Shelf, shelf or receptacle support
522	....Integral or attached shelf
523	...Corrugated or embossed wall
524	..Plural distinct sections
525	...With particular flow distributor to sections
526	...Serially connected
527	..Flow controller or boiling expeditor
528	...Adjustable controller
529	REFRIGERANT OR COOLANT, STORER OR HANDLER
530	.Envelope type

1 FILAMENT OR FIBER MAKING
2 .Processes
3.1 ..With coating
3.11 ...Having components with different refractive indices, (e.g., optical fibers, optical wave guides, etc.)
3.12 ....By reacting metal compound, chemical vapor or soot deposition, or using plasma
3.13 ....Multiple crucible process
3.14 ....With ion exchange to change refractive index of outer layer
3.15 ....Leaching preform
3.2 ...Glass coating
3.3 ...Metal coating
3.31 ....With vapor deposition of metal compound
3.4 ...Resin, rubber, or asphalt coating
3.41 ....Silicon in coating (e.g., silane, silicone, etc.)
3.42 ....Asphalt coating
3.43 ....Thermosetting resin coating
3.44 ....Thermoplastic resin coating
4.1 ..With joining of fibers or filaments
4.2 ...Having components with different refactory indexes, e.g., optical fiber, etc.
4.21 ....Utilizing preformed fibers or filaments other than for attenuating stock material
4.3 ...Forming and joining in parallel alignment
4.4 ...To form mat
5 ..Fiber formation by utilization of fluid blast
6 ...During slinging or rotary-centrifugal distribution
7 ...Fluid blast comminution of solid filament
8 ..By slinging or rotary-centrifugal distribution
9 .With felting means
10 .With assorting means
10.1 .With winding means
10.2 .With severing means
11.1 .Combined
12 .Means for heating or cooling formed filament or fiber
13 .From rod stock
14 .By slinger and fluid blast means
15 .By slinger
16 .By fluid blast means
17 PROCESS
18.1 .With shaping of particulate material and subsequent fusing of particles
18.2 ..Including flame or gas contact
18.3 ..Employing nonoxide additive
18.4 ..With treatment subsequent to fusing
19 .Slag, utilization
20 ..Foaming of slag
21.1 .Self-supporting particle making (e.g., bead, ball, granule, etc.)
21.2 ..By molten glass comminuting
21.3 ..Spheroidizing or rounding of solid glass particles
21.4 ..Hollow or porous particle
21.5 ..With mechanical shaping or subdividing
22 .With pore forming in situ
23 .With destruction or delamination of transitory attached or associated separate material
24 .Utilizing parting or lubricating layer
25.1 ..Providing a gaseous layer between glass and apparatus
25.2 ...Sheet
25.3 ....Formed from molten glass
25.4 ....Reshaping
26 ..Coating of apparatus
27 .Repairing or cleaning of apparatus; or batch dust prevention or control
28 .With glass reclaiming, repairing or crack run interruption
29 .With testing or inspecting
30.1 .With chemically reactive treatment of glass preform
30.11 ..To enhance the ability to darken or change color in response to radiation exposure (e.g., photochromic)
30.12 ..To hydrate the glass
30.13 ..With metal ion penetrating into glass (i.e., ion exchange)
30.14 ...To temper or strengthen the glass
31 ..By etching or leaching
32.1 .Operating under inert or reducing conditions
32.2 ..With bonding or sealing
32.3 ..With crystallization or photochromism or phase separation
32.4 ..With coating
32.5 ..With forming glass from molten state, with treatment of molten glass, or with drawing of glass in softened state
33 .Devitrifying or vitrifying crystalline glass
34 .With sealing off of gas evacuating opening
35 .With vibrating, oscillating or agitating a preform
36 .Fusion bonding of glass to a formed part
37 ..Lens making
38 ...With bonding of at least three formed parts
39 ...With molding or reshaping of glass to assume shape of configured lens part during bonding
40 ..Dielectric or joule effect heating of work
41 ..With annealing or tempering of glass
42 ..Bonding of sub-assembly with subsequent assembly and bonding (formed parts only)
43 ..By or with coating at joint interface of a formed part prior to bonding
44 ..With embossing or corrugating
45 ..With glass part forming from shapeless molten glass
46 ...With blowing to shape glass
47 ...In mold cavity
48 ....And bonding to part in same mold cavity
49 .....Bonding to metal formed part
50 ...Forming and bonding glass sheet to metal part
51 ....Contacting metal with molten glass prior to forming sheet
52 .....Forming of plural glass sheets
53 ...Forming plural sheets or sheet-like streams from same source
54 ..With reshaping glass preform prior to assembly or subsequent to bonding
55 ...Prior to assembly
56 ..With severing, perforating, or breaking of glass
57 ..Relative rotation of work and heating means
58 ..Of parts having opposed facing areas out of contact, e.g., building blocks
59.1 ..Of glass to metal part
59.2 ...Maintaining cavity in glass
59.21 ....Glass applied in powdered (i.e., frit) form

	PROCESS
	.Fusion bonding of glass to a formed part
	..Of glass to metal part
	...Maintaining cavity in glass
59.22	....Named fusible bonding material employed
59.23	....With firing in vacuum, in inert atmosphere, or in pumped in gas
59.24	....Metal part outside of glass part
59.25	....Metal part inserted through hole or into groove in glass part
59.26	....Metal part forced through or into softened glass part (e.g., pinch sealing, etc.)
59.27	....Metal part coaxial with and inside of glass part
59.28	....Relative movement or manipulation of parts during or immediately preceding fusion
59.3	...More than two parts in overlaying series (noncavity)
59.31	....Metal part inserted through hole or into groove in glass part
59.32	....Metal part forced through or into softened glass part (e.g., pinch sealing, etc.)
59.33	....Relative movement or manipulation of parts during or immediately preceding fusion
59.34	....Metal part outside of glass part
59.35	....Metal part coaxial with and inside of glass part
59.4	...Metal part outside of glass part
59.5	...Glass applied in powdered (i.e., frit) form
59.6	...Metal part coaxial with and inside of glass part
59.7	...Metal part forced through or into softened glass part (e.g., pinch sealing, etc.)
60.1	.With coating
60.2	..Plural diverse layers
60.3	..Organic coating
60.4	..Free metal coating
60.5	..Oxide coating
60.51	...From inorganic metal salt
60.52	...From organic metal compound
60.53	...From inorganic oxides or hydroxides
60.6	..Free carbon containing coating
60.7	..Inorganic metal salt containing coating
60.8	..Silicon containing coating
61	.With wearing away of surface material, e.g., abrading or grinding
62	.Combined
63	.Sequentially forming, reheating and working
64	..Reshaping
65	.Forming and fire polishing or product
66	.Forming product or preform from molten glass
67	..Converting sheet to hollow product or hollow product to sheet
68	..Initial forming of hollow product or preform in mold cavity
69	...With annealing or tempering
70	...With severing of formed product
71	...Spreading of molten glass by rotation
72	...With charging of mold cavity
73	....By suction from upper surface of "pool"
74	.....With sequential blowing in charged cavity
75	....Through orifice in bottom wall of dispenser
76	....With additional diverse shaping step
77	...With additional forming step

78	....Diverse
79	.....Press and blow
80	......In separate lines
81	...By differential gas pressure
82	..Reshaping of hot parison in mold cavity to form hollow article
83	..With positive cooling of product or molten glass at forming area
84	...By direct gaseous contact
85	...Of glass product
86	..Drawing and simultaneously forming hollow stock from molten glass
87	...With additional shaping, or severing, or perforating
88	...Vertically drawing upwardly while applying fluid internally of stock
89	..Forming hollow stock by surface filming
90	..Sheet
91	...With application of lateral tension to edge portion of moving sheet
92	...With smoothing subsequent to sheet formation
93	...With reshaping or surface deformation
94	....Subsequent to formation
95	...With annealing or tempering
96	....Conveying at different rate than speed of formation
97	...With severing or perforating
98	...Simultaneously forming plural separate sheets
99.1	...By or with pouring molten glass onto forming surface
99.2	....Utilizing molten metal forming surface
99.3	.....Maintaining molten metal temperature
99.4	.....Treating or removing impurities in molten metal or glass
99.5	.....Maintaining or adjusting sheet width or thickness
99.6	......By nonmechanical means
100	....Onto moving roll or platen
101	.....Through bite of rolls
102	.Reshaping or surface deformation of glass preform
103	..Utilizing heat shield or heat-sink
104	..With annealing, tempering or fire-polishing
105	..With severing or perforating
106	..Reshaping of planar sheet
107	...By sagging by gravity on mold surface
108	..Reshaping of tubular preform, retaining cavity
109	...During rotation
110	...Utilizing vacuum or gas pressure
111	.Glass preform treating
112	..With severing or preforating
113	...By or with flame
114	..Tempering
115	...Differential or localized
116	...Quenching in liquid bath
117	..Annealing
118	...During conveying
119	....Annealing by direct contact with gaseous heat exchange medium
120	..By flame
121	.Blending of separate molten glass streams
122	.Charging of molten glass into mold cavity
123	..By gravity and severing subsequent to charging mold cavity
124	..By suction
125	.Gathering from upper surface of glass pool
126	.Discharging molten glass downwardly through orifice

PROCESS
.Discharging molten glass downwardly through orifice
127 ..With gob shaping or treating subsequent to discharge through orifice
128 ..With temperature modification at orifice
129 ..Regulating or arresting of flow into or out of orifice
130 ...With or by differential gas pressure
131 ....With segregation prior to discharge
132 ...With segregation prior to discharge
133 .Severing of molten glass stream
134 .Purifying or homogenizing of molten glass
135 ..Melting in separate zone of glass container, e.g., tank furnace
136 ..Fining by heating
137 .Cooling of molten glass
138 ELECTRONIC ENVELOPE HEADER, TERMINAL OR STEM MAKING MEANS
139 .With means inserting wire into glass
140 .By press mold
141 MELT DISINTEGRATOR AND SOLIDIFIER INCLUDING FLUID-MELT CONTACT MEANS
142 PARTICULATE BEAD OR BALL MAKING APPARATUS, E.G., PIN HEADING
143 .By rolling means
144 MEANS SHAPING PREFORM FROM GRANULAR MATERIAL WITH FUSION MEANS
145 PLURAL SOURCES FEEDING DIVERSE GLASS MELTS TO COMMON FORMING MEANS
146 WITH MEANS TO FEED DIVERSE MATERIAL TO GLASS WORKING MEANS
147 .Wire laminating means
148 ..Sheet rolling means
149 ...Sandwiching wire between opposed glass feeds
150 ...Roll coacting with platen
151 ....Embedding means on roll
152 FUSION BONDING MEANS
153 .Concentric body making, e.g., vacuum bottle making, etc.
154 .Glass to metal
155 .Electronic device making
156 .With article molding means
157 MEANS PROVIDING SPECIAL ATMOSPHERE
158 WITH SIGNAL, INDICATOR, INSPECTION MEANS, REGISTER, OR RECORDER
159 WITH APPARATUS SAFETY MEANS
160 CONTROL RESPONSIVE TO CONDITION SENSING MEANS
161 .Glass working fluid or treating fluid control
162 .Temperature or heater control
163 .Speed control
164 .Molten glass dispenser or gatherer control
165 WITH REJECT CATCHER, DEFLECTOR OR HOLDER
166 PERFORATOR FOR ARTICLE OR PREFORM
167 CONVERTIBLE TO DIFFERENT OPERATION
168 WITH POSITIVE CLEANING MEANS FOR APPARATUS
169 WITH MEANS PROVIDING PARTING MATERIAL
170 WITH APPARATUS LUBRICATING MEANS
171 WITH REPAIR, ASSEMBLY OR DISASSEMBLY MEANS FOR APPARATUS
172 .To replace worn or damaged parts
173 .To provide alternately used parts
174 WITH MECHANICAL CUTTER, SCORER OR SCRIBER FOR ARTICLE OR PREFORM
175 .With annealing means
176 .Running length
177 .Associated with article mold
178 WITH AGITATOR FOR MOLTEN OR SOFT GLASS
179 .Delivery area associated
180 ..Orifice associated
181 COMBINED
182.1 WITH FLUID SUPPORT FOR ARTICLE OR PREFORM
182.2 .Gaseous support
182.3 .Means for treating or maintaining molten metal
182.4 .Including preform width maintaining or stretching mean
182.5 .Structure or composition of lining material or arrangement with shell
183 EXTRUSION DIE FORMER WITH UPSTREAM DISCHARGE ASSISTANT
184 MEANS CHARGING CONTINUOUS FILM OR STRIP TO SEPARATE AND DISTINCT FORMER
185 .Into sheet rolling means
186 ..With auxiliary heating or cooling means upstream of rolling means
187 MEANS DRAWING TUBE OR ROD STOCK FROM BATH
188 .Drawing vertically upward
189 ..With product take-down means
190 ..Means correlating air supply and bait movement
191 ..With internal core or centering means
192 ..Air injection means extending through bath
193 MEANS DRAWING SHEET FROM BATH
194 .With annealing or tempering means
195 .Means dividing and recombining melt in draw chamber
196 .Vertically upwardly with means bending sheet to horizontal
197 ..With moving endless drawing or flattening table
198 ..With coacting roll contacting surface of supply bath
199 .With width maintaining and/or lateral stretching means
200 ..Stretching means
201 ..Adjustable width maintaining means
202 .With pivoted lip tile
203 .With auxiliary heating means for draw pot or drawing chamber
204 .With cooling means in drawing chamber
205 .With radiant heat reflector in draw pot or drawing chamber
206 .With skimmer
207 GOB CHARGING MEANS WITH SHAPE IMPARTING RECEPTACLE MEANS
208 .With glass treating means
209 .By fluid pressure discharge assistant means
210 .By suction gatherer mounted above supply
211 ..With means correlating movable pool-closure
212 ..Gatherer moving transversely from orbit of traveling mold, i.e., ram type
213 ..Mold is gatherer
214 ...Parison mold
215 ....With plunger movable relative to mold
216 .....With separate, distinct blow mold
217 ......Diverse molds traveling concentric orbits
218 ....Finish mold pivotally mounted below parison's orbit
219 ....With blow means
220 .....Sequentially used, distinct molds
221 .By delivery from tank feeder
222 ..To parallel mold tables
223 ..With press means
224 ...With diverse molding
225 ..With gob guide means
226 .With press means
227 DIVERSE DISTINCT GLASSWORKING APPARATUS
228 .Marvering means with blow means

DIVERSE DISTINCT GLASSWORKING APPARATUS
229 .Press means with blow means
230 ..With reheating means therebetween
231 ..Blank mold encaseable in finish mold
232 ..With mold inverting means
233 ...With pneumatic charge compacting means
234 ....Settle-blow means
235 ...Neck mold inverting
236 ....With parison mold inverting
237 ..Diverse molds traveling concentric orbits
238 **...With diverse motion of mold**
239 ...With movable work transfer means between orbits
240 ..Plural traveling mold carriers
241 ...With movable intermediate work transfer means
242 ..Reciprocating mold bottom
243 PLURAL DISTINCT GLASSWORKING APPARATUS
244 .Spaced preform reheating means with reshaping means
245 .Sheet rolling means
246 .Plural presses
247 ..Plungers sequentially coacting with same mold
248 ..With relative rotation between plunger and mold during withdrawal
249 ...Plungers oppositely disposed
250 ..Plungers oppositely disposed
251 ..Plungers orbiting above orbiting molds
252 .Fire-polishing means
253 ROLLING MEANS TO FORM SHEET OR STRIP
254 .With treating means
255 .With corrugating or surface imprinting means
256 .Roll coacting with planar platen
257 ..Reciprocating platen
258 SHEET CASTING AND RECEIVING MEANS
259 .With pot handling means
260 WITH MEANS ABOVE MOLD TO TAKE-OUT OR TRANSFER PRODUCT
261 BLOWING MEANS WITH BLOW MOLD
262 .With treating means
263 .Combined with vacuum means
264 .Traveling mold
265 ..With means heating and/or cooling apparatus
266 .Mold rotary about own axis
267 .With means heating and/or cooling apparatus
268 PREFORM RESHAPING MEANS WITH TREATING MEANS
269 GLASSWORKING OR PREFORM BY OR WITH REHEATING MEANS (E.G., FLAME SEVERING)
270 .Envelope tipping off type
271 .Heating means movable relative to work during shaping operation
272 .Work, workholder or tool correlated burner control
273 .Planar sheet preform
274 .With spaced preheating means
275 .Mechanical means to reshape preform
276 ..Tubular type preform
277 ...By resizing mandrel
278 ...Means supporting and orbiting preform
279 ....Preform supported horizontally
280 ....Preform supported vertically
281 ...By bending means
282 ...By internal forming means
283 ...By stretching means
284 .Fire-polishing means
285 .To reshape preform by flame pressure or gravity
286 PREFORM RESHAPING MEANS
287 .Sheet bending mold
288 ..With heat shield or heat sink
289 ..Including auxiliary movable sheet support or movable sheet guide means
290 ...Movable mold section
291 ..Having movable section
292 .Cylindrical preform
293 ..By threading means
294 ..By expansible mandrel
295 ..By crimping means
296 ..By internal and external forming means
297 ...Both rotary driven
298 ...Rotary internal, stationary external
299 ..By flaring means
300 MEANS APPLYING PNEUMATIC PRESSURE INSIDE OF DISCRETE CHARGE, I.E., BLOW MEAN
301 .With selective control means
302 ARTICLE FORMING MEANS UTILIZING MOLD MOTION, E.G., CENTRIFUGAL CASTING
303 GOB SHAPING OR TREATING MEANS DOWNSTREAM OF GOB SEVERING MEANS
304 WITH GOB HANDLING MEANS
305 PRESS MOLDING MACHINE
306 .With product treating means
307 .Mold ring or baffle laterally and movably supported
308 .Plunger coacting with successively presented molds
309 ..Relative rotation between plunger and orbiting mold
310 ...Independent dies actuated by common plunger
311 ..Means providing orbiting mold with diverse motion
312 ..Mold orbiting about horizontal axis
313 ..Vertically segmented orbiting mold
314 .Plural motors coaxial with plunger
315 .With core drawing means
316 .With means to rotate plunger during withdrawal
317 .Means reciprocating or oscillating female mold member
318 .With means varying plunger pressure during pressing
319 .With means for heating or cooling apparatus
320 .Selectively operated plural plungers
321 .Plunger penetrating superimposed mold table
322 .With means to adjust plunger stroke
323 PRODUCT OR PARISON CENTERING MEANS, OR MOLD AND/OR CORE ALIGNING MEANS
324 MOLTEN GLASS DISPENSING MEANS (E.G., FEEDER OR LADLE)
325 .Discharge orifice below melt level
326 ..With auxiliary heating or cooling means
327 ...At orifice
328 ..Plural plunger-type discharge assistants or discharge orifices
329 ..By differential gas pressure
330 ..By reciprocating plunger-type discharge assistant
331 ...With diverse motion
332 ...With severing means
333 .Discharge lip with discharge assistant
334 WITH MOLTEN GLASS CHARGE CUTTING OR SCRAPING MEANS
335 GLASS FURNACE WITH FURNACE CHARGING MEANS
336 GATHERING OR DRAWING POOL TYPE FURNACE
337 .Supplemental heating or heat exchange means associated with pool
338 ..With deputer, draw ring or draw shield
339 .Separate and distinct means defining pool (e.g., floor-supported dam)
340 ..Movably mounted
341 ..Cascadingly connected
342 ..By bridge
343 ...Floating bridge

GATHERING OR DRAWING POOL TYPE FURNACE
.Separate and distinct means defining pool (e.g., floor-supported dam)
344 ..With deputer, draw ring or draw shield
345 ..By suspended baffle
346 GLASS CONDITIONING CHANNEL SECTION
347 MELTING POT OR FURNACE WITH STRUCTURALLY DEFINED DELIVERY OR FINING ZONE
348 PRODUCT COOLING MEANS, E.G., TEMPERING
349 .With preceding reheater
350 ..Plural spaced reheaters
351 ..Plural spaced cooling means
352 DRAWING BAIT
353 .With air supply means
354 ..With heating or cooling means
355 MEANS HEATING OR COOLING APPARATUS
356 .Internally positioned
357 MOLD WITH SEPARATING MEANS OR CLAMPING MEANS
358 .Core drawing means
359 .With mold support or carrier
360 ..Pivoted mold sections
361 MOLD WITH SUPPORTING OR CARRYING MEANS
362 PLUNGER
374.1 APPARATUS MADE OF SPECIAL MATERIAL
374.11 .Metal-nonmetal composite
374.12 .Metallic
374.13 .Ceramic material
374.14 .Asbestos containing
374.15 .Elemental carbon containing (e.g., graphite, charcoal, etc.)

CLASS 66 TEXTILES, KNITTING

DECEMBER 1990

1 R	MISCELLANEOUS
1 A	..Hand knitting and crotcheting aids
1.5	REKNITTING
2	DARNING
3	LOOPER PIN AND HOOK
4	.Hand
5	UNITED NEEDLE KNITTING AND INDEPENDENT NEEDLES
6	.With independent needle knitting
7	INDEPENDENT-NEEDLE MACHINES
8	.Circular
9 R	..Incorporating unknit or fleece-type materials
9 A	....Core covering
9 B	....With carding
10	...Warp and weft type
11	...Laterally displaceable needle
12	...Varied needle
13	..Special-type machines
14	...Double-ended needle
15	...Swing jack needle, dial and cylinder
16	...Axially reciprocating actuator
17	..Multiple-needle bank
18	...Opposed conical
19	...Dial and cylinder
20	....Varied needle, frequently with special stitch
21	....Pocket welt, frequently with special stitch
22	.....Two-ply simultaneously knit
23	.....With stitch-length variation
24	....To or from rib or rib change
25	....Special stitch
26	.....Racking
27	....Stitch-length variation
28	....Dial and cylinder connections
29	...To or from rib or rib change
30	...Narrowing and widening
31	..Dial
32	...Narrowing and widening
33	....Laterally displaceable needle
34	..Conical
35	..Laterally displaceable needle
36	...Special stitch
37	...Narrowing and widening
	..Varied needle
38	...Separate cam paths
39	....Narrowing and widening
40	...Special stitch
41	....Welt or antiravel
42 R	....Multifeed
42 A	......Eyelet prevention
43	.....Suture forming
44	....With varied latch
45	...Hand coverings, forming
46	...Narrowing and widening
47	....With needle-actuated pickers
48	.....Rotary needle carrier
49	...Splicing
215	..Special stitch
216	...Having butt selection means
217	....Control of sinkers
218	....Electrical control type
219	.....Magnetic
220	......Butt translation
221	......And pivoted butt-engaging member
222	....Simultaneous control of multiple butt levels
223	.....Including permanent selection means
224	.....Including drum having integral plural level pattern
225	......Selection by axial movement of element with multiple butt levels
226	......Drum contact with butts
227	......Having additional butt-engaging member control means
228	....Having pattern at rotating member engaging butts at single level
229	.....Inclined rotating member with integral pattern
230	....Having butt-engaging members limited to other than rotary motion about the periphery and longitudinal axis of the needle cylinder
51	..Narrowing and widening
52	...With needle-actuated pickers
53	....Needle-actuated pickers
54	..Stitch-length variation
55	...Axial cylinder adjustment
56	..Cylinder movement or speed change
57	..Needle-cam construction
58	..Preparing for transfer
59	...Including axial cylinder movement
60 R	.Straight
60 H	...Manually operated knitting machine
61	..Incorporating unknit or fleece-type materials
62	..Special-type machines
63	...Double-ended needle
64	..Multiple-needle bank
65	...Hand coverings, forming
66	...Laterally displaceable needle
67	....Narrowing and widening
68	...Varied needle
69	...Racking
70	...Narrowing and widening
71	...With stitch-length variation
72	..Laterally displaceable needle
73	...Narrowing and widening
74	..Varied needle
75.1	..Special stitch
75.2	...Fluid pressure, electric or magnetic stitch selector control means
76	..Narrowing and widening
77	..With stitch-length variation
78	..Needle-cam construction
	UNITED NEEDLE MACHINES
79	.Circular
80	..Incorporating unknit or fleece-type materials
81	..Warp
82 R	.Straight
82 A	...Motor control
82 S	...Stitch length control
83	..Incorporating unknit or fleece-type materials
84 R	...Warp
84 A	.....Mechanism for incorporating unlooped weft extending from selvage to selvage
85 R	....Crotchet type
85 A	......Quilting
203	..Warp
204	...Means to control motion of needle, or needle cooperating element
205	....Individual transducer for particular element
206	....Presser means
207	....Guide bar
208	....Needle bar
209	...Let off
210	....Means controlling rate of let off
211	.....By means sensing strand tension
212	.....By means responsive to radius of beam
213	....Strand-tensioning means
214	...Yarn guides
87	...Multiple-needle bank
88	..Multiple-needle bank
89	..Narrowing and widening, frequently with loop traversing
90	NEEDLE COOPERATING ELEMENTS
91	.Pile loop formers
92	..For needle dial and cylinder machines

		NEEDLE COOPERATING ELEMENTS
		.Pile loop formers
93		..Radially slidable
94		.Wheels, nonlooping, fleece type
95		.Loop traversers or holders
96	R	..For straight machines
96	W	....Welt turners
97		..Wheel
98		.Beard pressers
99		..With press-off preventers
100		..Needle displacement
101		..Individually movable
102		...Sliding
103		..Special stitch wheels
104		.Sinkers or web holders
105		..Wheel
106		..Pivoted
107		..Radially slidable
108	R	...Movable cam sections
108	A	.....Knitting above nebs
109		..For straight machines
110		...Transversely slidable
111		.Pivoted latch actuators
112		..Gap closers
113		.Wheel
114		NEEDLE BEDS
115		.Independent needle
116		NEEDLES
117		.Hand
118		..Crochet
119		.Spring beard
120		.Sliding latch
121		.Pivoted latch
122		..Latch pivots
123		.Shanks
124		..Self-frictioning
125	R	FEEDING
125	A	..With yarn treatment
125	B	..Throat plates
126	R	.Traversing guides, straight machine
126	A	...Feed fingers
127		..Alternately idled guides
128		..Partial traverse
129		...With additional strand
130		..Shock reducers
131		.Close-feed devices
132	R	.Positive
132	T	...Tape
133		.Additional strand idled guide
134		..With clamp or cutter
135		..Needle-wrapping type
136		.Plating
137		..Reversible
138		.Alternately idled guides
139		..Sliding
140	R	..With clamp or cutter
140	S	....With suction
141		.Nonidling or nonplating guides
142		..With clamp or cutter
143		...Starting by strand interengagement
144		....Uniting
145	R	.With clamp or cutter
145	B	...For straight machine (i.e., straight bar)
145	S	...With suction
146		.Strand tensions
147		FABRIC MANIPULATION
148		.Transferring fabric
149	R	.Take-ups
149	S	...Suction take-ups
150		..Special-shape work
151		..Winding, from rotary needle bank
152		..Continuous
153		...From rotary needle bank
231		PATTERN SYSTEM
232		.Electrical signal type
233		.Flexible member type
234		..Chain
235		...Chain being horizontally fed to drive sprocket
236		...Having coaxial pattern member
237		.Multiplier or divider
238		PATTERN STORAGE DEVICE
239		.Drum type
240		..Having removable pin
241		..Having jack
242		.Flexible type
157		STOPPING
158		.Strand controlled
159		..With strand severing
160		..With tension relieving
161		...Electrical
162		...Moving actuator
163		..Electrical
164		..Moving actuator
165		.Needle cooperating element controlled
166		.Fabric controlled
167		.Length control
168		CLEANING ATTACHMENTS
169	R	FABRICS OR ARTICLES
169	A	..Run resistant fabric
170		.Articles
171		..Garments
172	R	...Border or antiravel portions, frequently hosiery
172	E	.....Elastic
173		....Pocket welt
174		...Hand coverings
175		...Union, trunk, and nether
176		...Trunk
177		...Nether
178	R	....Hosiery
178	A	......Stretch and support hosiery
179		.....Suture seam
180		.....Ornamental stitch
181		......With mock seam
182		.....Reinforced
183		.....Combined foot structure and fashioned calf
184		......With heel or toe
185		.....Foot structure
186		......With heel or toe
187		.......Heel or toe
188		.....With rib leg and foot
189		...Fashioned
190		.Incorporated unknitted materials
191		..Fleece or pile type
192		..Warp
193		...With crochet stitch
194		.Fleece or pile type
195		.Warp
196		.Multi-ply
197		..Rib
198		.Traversed or doubled loop
199		..To or from rib or rib change
200		.Rib
201		.Strand change

CLASS 68 TEXTILES, FLUID TREATING APPARATUS

DECEMBER 1990

1 WASTE RECLAIMING APPARATUS
2 CARBONIZING APPARATUS
3 R MACHINES
3 SS ..Supersonic vibrator
4 .Convertible
5 R .With gas, steam or mist treating
5 A ...Limited area application
5 B ...Relative movement of applicator and textile
5 C ...In chamber
5 D ...Continuous textile feed and discharge
5 E ...With chamber seal
6 ..Static devices
7 ...With fabric carrying cylinder
8 ..Textile on cylinder
9 .With successive fluids and plural tubs
10 ..Relatively transferable textile holder
11 .Plural tubs and relatively transferable textile worker
12 R .Single tube and automatic sequential operation
12 FA ...Fluid actuated control
13 R .Combined
13 A ...With water softener
14 ..With scrub-board
15 ..With tank heater
16 ...Tumbler drum
17 R ..With soap supply
17 A ....Dispenser on agitator
18 R ..With solvent recovery
18 C ....Using condenser
18 D ....Using decanter
18 F ....Using filter
18 FA .....Filter on agitator
19 ..With liquid extractor
19.1 ...Disparate extractors
19.2 ....Centrifugal extractor and gaseous drier
20 ...Gaseous drier
21 ...Squeezer extractor
22 R ....Roller
22 A ......Domestic with wringer
22 B ......Roller serves as reservoir
23 R ...Centrifugal extractor (e.g., centrifuge)
23 A .....Guard ring on basket
23.1 ....With means to control or isolate vibration
23.2 .....Including counterbalance
23.3 .....Vertical axis centrifuge
23.4 ....Including additional fluid handling means actuated by rotation of centrifuge
23.5 ....Including fluid supply means
23.6 ....Including impulsing means (e.g., agitator) within and independent of centrifuge
23.7 .....Oscillating type
24 ....Horizontal or nonvertical axis tumbler and centrifuge
25 ....Shiftable to vertical axis centrifuge
26 ....Independent vat and centrifuge
27 .Plural fluid treating machines
28 .Combined operations
29 ..With free element
30 ..Tumbling, scrubbing and squeezing
31 ..Scrubbing and squeezing
32 ...One work element reciprocable longitudinally of a roll axis
33 ...Cooperating movable work element
34 ....One movable with tub
35 ...Single movable work element
36 ....Pivotally movable
37 ....Rectilinearly movable
38 ..Scrubbing and liquid flowing
39 ...Endless apron and scrubber
40 ....Scrubber reciprocable longitudinally of apron
41 ...Horizontal axis pivoted carrier scrubber
42 ...Carrier roll and platen
43 ..Squeezing and liquid flowing
44 ...Squeezer and endless belt
45 ....Single endless belt
46 ...Roll and carrier roll
47 ...Roller bed and carrier roll
48 ...Movable tub, tray or cage
49 ....With shuttle squeezer
50 ....Vertically movable
51 ...Mechanical liquid pump
52 ..Squeezing and dragging
53 ..Impulsing and liquid flowing
54 ..Impulsing and scrubbing
55 ..Dragging and liquid flowing
56 ..Dragging and scrubbing
57 ...Drag on vertical axis
58 ..Tumbling and liquid flowing
59 ...Spurting nozzle, thermal flow
60 ..Tumbling and scrubbing
61 ..Tumbling and squeezing
62 ..Liquid flowing and liquid applying
63 .Scrubbing
64 ..Scrubber and bed, reciprocatory
65 ...Bed reciprocable about a roll periphery
66 ...Both movable
67 ....On horizontal axis
68 .....Vertical scrubbers
69 .....Unitary tub and bed
70 ....On vertical axis
71 .....Tub movable with scrubber
72 ....Rectilinearly
73 .....In vertical plane
74 ...Scrubber, only, movable
75 ....On horizontal axis
76 .....Plate scrubber transverse to axis
77 .....Plural scrubbers
78 ......Individually pivoted scrubbers
79 ....On vertical axis
80 .....Downwardly directed scrubbing face
81 ....Rectilinearly
82 ...Bed, only, movable
83 ....On vertical axis
84 ..Rotary
85 ...Brush roller and roll
86 ...Roll and platen
87 ....Brush roll or brush platen
88 ....Resiliently mounted platen
89 ...Vertical axis scrubber
90 ...Horizontal axis scrubber
91 ..Fixed scrubber and bed, movable carrier
92 ..Scrubbers
93 ..Scrubber bed or cage
94 .Squeezing
95 ..Squeezer and textile cover
96 ..Deformable receptacle
97 ..Roll type
98 ..Planetary
99 ...Roll and roll
100 ...Roll and roller bed
101 ....Resiliently mounted roller bed
102 ...Rectilinearly reciprocable roll and bed
103 ....Fixed bed
104 .....Single roll
105 ...Fixed axis roll and reciprocable bed
106 ...Oscillating roll and bed
107 ....Single roll
108 ..Chasers
109 ...Nonrotatable bed
110 ..Squeezer and bed, both movable
111 ...Vertically reciprocable squeezer and vertically pivoted bed

		MACHINES
		.Squeezing
		..Squeezer and bed, both movable
112		...Opposed receding and approaching squeezers
113		..Squeezer, only, movable
114		...Cradled
115		...Plural horizontally pivoted squeezers
116		....Bilateral squeezing faces
117		...Single horizontally pivoted squeezer
118		....Bilateral squeezing faces
119		....Edge pivoted horizontal plate
120		...Rectilinearly movable squeezer
121		....Bilateral squeezing faces
122		....Vertically
123		.....With squeezer displacement
124		.....Successively acting squeezers
125		..Mountings
126		...For roll squeezers
128		..Squeezer roll strippers
129		..Nonrotary squeezers
130		...With plungers or valves
131		.Impulsing
132		..Oscillatory or rotary on vertical axis
133		...Bottom drive
134		..Impellers
135		.Dragging
136		..Oscillatory or rotary on vertical axis
137		...Top drive
138		..Dollies
139		.Tumbling
140		..Cage type tumbler supports, bearings or drive
141		..Wobbly cage
142		..Cage construction
143		...Compartmented
144		..Imperforate receptacle type
145		...Compartmented
146		...Fixed inclined axis
147		.Liquid flowing
148		..Liquid displacement and movable cage or carrier
149		...Rotatable skein-supporting sticks
150		...Wound package, central liquid flow
151		...Vertically pivoted cage-pump or carrier-pump
152		..Movable cage or perforate tray
153		...Oscillatable cage or tray
154		....Vertical axis
155		...Rectilinearly reciprocable cage or tray
156		....Vertically reciprocable
157		..Movable carrier in vat
158		...Continuous textile feed and discharge
159		...Skein carrying stick or frame in liquid receptacle
160		....Rotatable skein stick
161		.....With skein stretching means
162		....Rotatable carrier for sticks or frames
163		.....Rotatable skein stick
164		......With skein stretching means
165		....Reciprocable carrier for sticks or frames
166		.....Rotatable skein stick
167		....Traversing skein stick
168		.....Endless belt stick carrier
169		......With skein stretching means
170		...Vertically reciprocable carrier
171		..Movable liquid receptacle
172		...Rockable or oscillatable liquid receptacle
173		....Fixed axis
174		.....Vertical axis
175		..Fixed liquid receptacle
176		...Helical textile course
177		...Web or rope pleating in receptacle
178		....Conditioning chutes
179		...Conditioning chutes
180		...Jiggers
181	R	...With liquid supply and efflux
181	D	.....Diaper washer
182		....Rotating stock strainer
183		...With gas supply to liquid
184		...With liquid pump
185		....And interconnecting sampler
186		.....And textile holddown
187		....And textile holddown
188		....Skein supporting sticks
189		....Wound package, central liquid flow
190		....Surgers
191		....Thermal flow
192		.....Surgers
193		.....Tubular conductors
194		...Textile holddowns
195		...False bottoms
196		...Covers
197		...Elevatable textile supports
198		...Hollow wound package holders
199		...Carriers
200		.Liquid applying
201		..Needle injectors
202		..Roller
203		...Intermittent liquid applicator
204		..Endless belts
205	R	..Tricklers and sprinklers
205	D	....Diaper washer
205	E	....Reel type
206		...With skein supporting sticks
207		.Liquid supply or vapor supply to liquid
208		.Drains and overflows
209		.Fire or explosion preventers or fume removers
210		.Loaders, unloaders or dumpers
211		.Limited area clamps
212		.Elements
213		IMPLEMENTS
214		.Combined
215		.Pounders
216		..With plunger
217		...And valve
218		..Valved
219		..With material receptacle
220		.Scrubbers
222		.Steamers
223		.Washboards
224		..Brandboards, soap holders and soap supply
225		..Splash guards and breast boards
226		..Rubbing surfaces
227		...Brush type
228		...Sheet or slab
229		....Surface design or elevation
230		...Of slats, bars, or tubes
231		...Of rollers
232		.Tubs
233		..With scrub surfaces
235	R	ACCESSORIES
235	D	..Diaper washer
236		.Combined wash bench and wringer support
237		.Washtub or wash boiler attachments
238		..Wringer supports
239		.Wringer supports
240		.Clothes supporting or spotting boards
241		.Wringers
242		..Flexible diaphragm squeezers
243		..Twisters
244		..Roller type
245		...Combined
247		...Enclosable
248		...Rolls in horizontal plane
249		...Interconnected functional units
250		....Guide, roll pressure and clamp
251		....Roll pressure and clamp
252		....Guide and clamp
253	R	....Roll pressure and drive

	ACCESSORIES
	.Wringers
	..Roller type

132 ....Curved
133 ....Combination operable only
134 ....Key operable only
135 ......Swinging
136 ....Keeper and housing interlocking
137 ....With hooked end
138 ....Combination operable only
139 ....Key operable only
140 ......Screw
141 ....Locking latch bolts, biased
142 .....Keeper interlocking
143 .....Projectable beyond normal biased position
144 .....Spring projected
145 ......Manually operable

FOR ANTITHEFT SIGNALING DEVICE ON PROTECTED ARTICLE
.For closures
..Door
...Swinging door
....Locking latch bolts, biased
.....Spring projected
......Manually operable
467 ....Directly acting dog for exterior, manual, bolt manipulator
468 ....Related dog for interior, manual, bolt manipulator
469 ....Dog having a dog
470 ....Related dogging means for latch-bolt
471 ....Dog and dog actuator always interconnected
472 ....Exterior manipulator declutched from bolt when dogged
473 ....Manual dog-controller concentric with bolt manipulator
474 ....Shiftable rollback serves as dog
475 ....Additional dog-controller key actuated for dogging and undogging
476 ....Dog-controller axially slidable and axially rotatable
477 ....Dog-controller rotatable
478 ....Key-actuated lock releases dog
479 ....Manual bolt-manipulator operation releases dog
480 ....Manual bolt-manipulator operation releases dog
481 ....Interior manual bolt-manipulator serves as dog-controller
482 ....For both dogging and undogging
483 ....Manual dog-controller
484 ....With additional lock actuated dog-controller
485 ....Additional dog-controller controls both dogging and undogging
486 ....Accessible at door edge
487 ....Slidable only
488 ....Manual bolt-manipulator is slidable only
489 ....Manual bolt-manipulator is lever
149 ....Freely movable external manipulator
150 ....Dogged bolt or connections
151 R ....Automatic
151 A ....Snub bolt
152 ....By manipulator
153 ....Connections only
154 .....Gravity projected
155 ......Projecting mechanism is lock controlled
156 .....Combination and/or key operable
157 ......Trip release
158 ..Cover, lid, cap, encasing shield
159 ...Pivoted
160 ....Cover-carried lock
161 .....Dead bolt
162 .....Latching bolt
163 ...Removable
164 ....External locking devices
165 ....Freely movable when locked
166 ....Directly seating
167 .....Cover-carried lock
168 ......Dead bolt
169 ......Latching bolt
170 ....Movably seating
171 .....Cover-carried lock
172 ......Dead bolt

CLASS 72 METAL DEFORMING

1 WITH RANDOMLY-ACTUATED STOPPING
2 .Manually controlled
3 .Responsive to condition of work or product
4 ..Work feed or faulty work
5 ...Termination or tangle of running-length work
6 WITH USE OF CONTROL MEANS ENERGIZED IN RESPONSE TO ACTIVATOR STIMULATED BY CONDITION-SENSOR
7 .Including sensor responsive to pattern, or to indicia carried by auxiliary record (e.g., tape or card)
8 .With condition-corrector responsive to comparsion between plural conditions
9 ..Of work or product only
10 .Including sensor responsive to condition of work or product
11 ..Including plural sensors or sensor responsive to plural conditions
12 ...For sensing work or product only
13 ..Comprising sensor responsive to temperature of work or product
14 ..Comprising lead-end or tail-end sensor
15 ...To control operation of deformer directly by sensor
16 ..Comprising lateral-dimension (e.g., thickness) sensor
17 ..Comprising surface-contacting sensor for running-length work (e.g., dancer)
18 ...With deforming of work by sensor
19 .Including sensor responsive to energy-input to tool or tool-driver
20 ..Sensor responsive to tool-actuating fluid pressure
21 .Including sensor responsive to position of tool or tool-linked part
22 ..To control predetermined sequence of operating movements (e.g., of one tool operating on work)
23 ...Of different operating assemblages
24 ....Including work-handling or product-handling
25 ..To control operation of interlock
26 ..To stop machine
27 .To control different operating assemblages
28 WITH USE OF SELF-REGULATING CONTROL SYSTEM UTILIZING ELECTRICAL OR HYDRAULIC ENERGY
29 .Utilizing electrical energy
30 WITH STOPPING UPON COMPLETION OF PRESCRIBED OPERATION
31 WITH INDICATION OF CONDITION OR POSITION OF WORK, PRODUCT, OR MACHINE ELEMENT (E.G., BROKEN-TOOL ALARM)
32 .Including use of quantitative indicator (e.g., pointer and scale)
33 ..Work or product data (e.g., counter)
34 ...Dimension or form
35 ..Position of machine element (e.g., roller spacing)
36 ...Adjustment of normally fixed element (e.g., work gauge)
37 WITH USE OF OPTICAL OR TRANSPARENT (E.G., VIEWING) MEANS
38 WITH EXPOSURE OF WORK TO GAS, VAPOR, MIST, OR MODIFIED ATMOSPHERE
39 WITH CLEANING, DESCALING, OR LUBRICATION OF WORK OR PRODUCT
40 .Mechanical cleaning
41 .Lubricating
42 ..With particular lubricant
43 ..With means to apply lubricant
44 ...With means to transfer lubricant
45 ....Force feed
46 WITH "COATING" OF WORK
47 .Metal coating
48 BY TOOL-COUPLE PRESSING TOGETHER ADJACENT SURFACE PORTIONS OF SAME WORK (E.G., TUBE-SEAMER)
49 .To form helically-seamed tube
50 ..Using roller conforming to seam contour
51 .To form longitudinally-seamed tube
52 ..During longitudinal movement of work
53 BY SHOT-BLASTING
54 BY APPLICATION OF FLUENT MEDIUM, OR ENERGY FIELD
55 .With cutting
56 .By kinetic energy of fluid or field
57 .With actuated tool engaging work
58 ..Expanding hollow work
59 ...Corrugating tubular work
60 .Using fixed die
61 ..Expanding hollow work
62 ...In circular section die
63 ..Utilizing diaphragm between fluid and work
64 BY TWISTING AXIALLY MOVING WORK
65 .With adjustment of machine or variation in effect of tool on product
66 COILING BY WORK-GUIDE MEMBER ORBITING ABOUT LONGITUDINAL CENTERLINE OF FORMED COIL
67 BY USE OF TOOL ACTING DURING RELATIVE ROTATION BETWEEN TOOL AND WORK ABOUT INTERNAL CENTER (E.G., GYRATING OR ROTATING TOOL)
68 .With metal deformation of different type
69 .With modification or control of temperature of work, tool or machine, or with lubrication thereof
70 .With cutting of work or product
71 ..By composite cutting, deforming tool
72 ..With actuation of cutter in timed relation to movement of deformer or work
73 .With oscillation of work about work-axis
74 .With oscillation of work-engaging tool surface about work surface
75 .Spherical tool
76 .Work-hammering tool
77 .With tool surface orbiting around axis parallel to direction of travel of longitudinally moving work
78 ..Including orbiting roller mounted on rotating carrier
79 ..Including deflectors arranged to provide undulating path for work
80 .During rotation of work
81 ..With "pattern" causing movement of presser member
82 ..Caused by work-holding, shape-imparting form (e.g., for "spinning")
83 ...With means causing cooperating presser member to traverse form surface
84 ..Using tool having rotating surface moving along it axis of rotation during deformation
85 ...And means causing tool to traverse surface of cooperating rotatable member
86 ..Using angularly related roller-couple acting parallel to axis of work rotation
87 ...And additional work-engaging tool, circumferentially spaced about axis of work rotation

BY USE OF TOOL ACTING DURING RELATIVE ROTATION BETWEEN TOOL AND WORK ABOUT INTERNAL CENTER (E.G., GYRATING OR ROTATING TOOL)
.During rotation of work
88 ..Caused by tools (e.g., "platens") relatively moving parallel to their surface
89 ...Including rotating tool (e.g., "disk-platen")
90 ...Including stationary tool
91 ..Caused by rotating tool and opposing concave surface
92 ...Non-rotating concave surface
93 ....With means to adjust concave surface
94 ..And movement of work laterally of rotational axis during deformation
95 ..And longitudinal movement of work
96 ...Using external rotating tool and internal core
97 ....Including work-piercing or work-expanding plug
98 ...Using tool-surfaces spaced along axis of work rotation
99 ...Using hyperboloidal roller
100 ...Using tool-cluster
101 ..Using rotating tool-couple relatively adjustable about pivot normal to tool axis
102 ..Using non-cylindrical rotating tool
103 ...Having helical groove
104 ....With cooperating tool rotating in same direction
105 ...And cooperating, complementary tool
106 ....And circumferentially spaced, work-engaging elements
107 ...Included in roller-cluster
108 ...With cooperating tool rotating in same direction
109 ...Including in tool-couple
110 ..Using roller-cluster
111 ..Using tool-couple
112 .Tool orbiting or rotating about an axis
113 ..Comprising transverse-axis roller inside hollow work
114 ..Helically-grooved tool threadedly engaging work
115 ..Comprising movable tool cooperating with fixed, work-spaced tool
116 ...Plural, selectively usable fixed tools
117 ...Outwardly acting movable tool
118 ..Including tool surfaces spaced along orbital axis
119 ...Including plural tools rotating on angularly related axes
120 ..With actuation of tool radially
121 ...Wherein tool is actuated inwardly
122 ...Including rotating tool mounted on rotating carrier
123 ....Including roller having noncylindrical work-engaging surface
124 ..Comprising roller cooperating with work-spaced tool
125 ..With work or tool locator or work-clamp
126 ..Tool both orbits and rotates
127 BY DEFLECTING SUCCESSIVELY-PRESENTED PORTIONS OF WORK DURING BODILY MOVEMENT THEREOF (E.G., FOR COILING, LEVELLING, CURVING OR TROUGHING MATERIAL IN MOVEMENT)
128 .With modification or control of temperature or work, tool or machine
129 .With cutting of work or product
130 ..And deforming of work or product (other than by deflecting)
131 ..And stopping of work movement during cutting
132 ..And actuation of cutter in timed relation to deflector or work movement
133 .With feeding of discrete articles or orienting of work relative to deflector (other than by deflector)
134 .With use of means to remove product from deflector
135 .To form helical coil or tube
136 ..Including thinning of helical portion of work section
137 ..With deforming of work or product (other than by coiler)
138 ..By use of means acting by and during machine operation to form coil of irregular pitch and/or diameter
139 ...Including non-cylindrical core
140 ..By interchangeable or selectable tool portion
141 ..By multi-convolutional tool
142 ..By work-guide and rotatable, work-holding core
143 ...And means to change pitch of coil
144 ...And means to traverse work-guide
145 ..By movable-periphery tool external of coil
146 .To form spiral coil
147 ..With interposes to space adjacent coil convolutions
148 ..With core inside coil
149 .By use of work-contacting wiper and moving, work-holding form
150 ..With core inside hollow workpiece
151 ..With tensioning or work
152 ..With deforming or work or product (other than by wiper and former)
153 ..And means to impart compound motion to form
154 ..Including backed-up, travelling wiper (e.g., follow bar)
155 ..And means to urge wiper toward form surface
156 ..And interrelated means to move form and gripper element thereon
157 ..Including interchangeable or adjustable wiper or form
158 ...Comprising adjustable wiper
159 ..And work-complementing gripper faces (e.g., contoured)
160 .By use of deflected arranged to provide longitudinally undulating path for work (e.g., "leveling")
161 ..With deforming of work or product (other than levelling)
162 ..Including relatively-inclined successive rollers
163 ..And back-up means for roller-deflector
164 ..And adjustable carrier for deflector
165 ...Including tier of roller-deflectors on carriers
166 .By use of deflectors arranged to bend work longitudinally of direction of work-movement
167 ..Including thinning of portion of work-section
168 ..With deforming of work or product (other than bending longitudinally)
169 ..With handling of curved product
170 ..Including three concurrently-acting delta-arranged deflector elements
171 ...And additional work-deflecting or work-constraining element
172 ...Comprising two rollers and guide
173 ...Including adjustable element
174 ....And interrelated means to adjust plural elements simultaneously

BY DEFLECTING SUCCESSIVELY-PRESENTED PORTIONS OF WORK DURING BODILY MOVEMENT THEREOF (E.G., FOR COILING, LEVELLING, CURVING OR TROUGHING MATERIAL IN MOVEMENT)
.By use of deflectors arranged to bend work longitudinally of direction of work-movement
..Including three concurrently-acting delta-arranged deflector elements
...Including adjustable element
175 ....Comprising rectilinearly reciprocable carrier for element
176 .By use of deflector arranged to bend work transversely of direction of work-movement (e.g., troughing)
177 ..With deforming of work or product (other than bending transversely)
178 ..Including roller-cluster
179 ..Including complementary roller-couple
180 ...Including plural, axially-spaced circumferential ribs and grooves
181 ...Including plural, successively-acting roller-couples
182 ..Including roller-couple
183 .By tension applied to work or product (e.g., uncoiling)
184 BY USE OF "FLYING TOOL" ENGAGING MOVING WORK
185 .With cutting
186 ..By composite cutting, deforming tool
187 .Included in plural deforming stations or passes
188 ..Passes spaced along axis of rotating tool
189 .Including arcuately oscillating tool-face
190 .Including orbitally-moving tool-face
191 ..Moving in circular orbit
192 ...With cooperating rectilinearly-moving tool (e.g., "anvil")
193 ....Comprising tool inside hollow work
194 ...Included in tool-cluster
195 ...Circumferentially adjustable relative to work-spaced cooperating surface
196 ...With cooperating complementary (e.g., conjugate) tool-face
197 ...With cooperating roller
198 ...With cooperating allochiral tool-face
199 BY USE OF ROLLER OR ROLLER-LIKE TOOL-ELEMENT
200 .With modification or control of temperature of work, tool or machine
201 ..Including cooling
202 ..By means (other than a tool) modifying temperature of work
203 .With cutting of work or product
204 ..By composite cutting deforming tool
205 .Including tautening of work during deformation (e.g., "tension bridle")
206 .With non-roller Metal Deforming station
207 .Including rectilinearly moving tool cooperating with single roller
208 .With tool inside hollow work
209 ..Comprising plug acting on longitudinally moving work
210 .Mounted on travelling, work-supported carriage
211 .Mounted on manually maneuverable carrier
212 .With work-forcer offset from, and relatively movable between, spaced rollers
213 ..With use of means to move work-forcer
214 .Comprising tool movable relative to stationary work-portion during deformation
215 ..Along a curved path
216 ...About a fixed pivot
217 ....Work between movable tool and pivot (e.g., sweep-arm bender)
218 .....With means to apply torque to movable tool
219 .....Including adjustable tool
220 ..Along a straight path relative to stationary cooperating tool
221 .Plural passes spaced along axis of one roller of tool-couple
222 ..With use of means to displace work laterally into next pass
223 ..Roller common to two tool-couples
224 .Included in roller-cluster
225 ..Comprising diverse roller-pairs
226 .Plural roller-couples (e.g., successively or optionally usable)
227 ..With material-handling between successive couples
228 ...Including optionally selectable work paths
229 ...To reverse-roll the workpiece
230 ...By curved guide (e.g., "loop return")
231 ...Changing orientation or direction of work
232 ..Including one roller common to two roller-couples (e.g., three-high mill)
233 ...Including roller shiftable between successive passes of work
234 ..Including successively-acting roller-couples
235 ...Comprising relatively-inclined successive couples
236 .With cleaning or conditioning of tool, or lubrication of tool or machine
237 .With carrier for roller-couple or tool-couple
238 ..With replacement of tool
239 ...By means to replace tool
240 ..With variation of bite of roller-couple during deformation
241.2 ..Including back-up for roller
241.4 ...With means to relatively vary back-up force along roller axis
241.6 ....Hydraulic or pneumatic force appliers spaced along roller axis
241.8 ....Means to apply bending moment to roller or back-up roll
242.2 ...Load bearing, equal size pair of back-up rolls
242.4 ....And second stage, equal size pair of back-up rolls
243.2 ...Including reaction roll
243.4 ....Equal size pair of reaction rolls
243.6 ...Irregular, convex or hollow back-up roll
244 ..With interposer (e.g., wedge or gag) between tool and pressure applier
245 ..Including fluent-driven tool support
246 ..Including resiliently urged tool support
247 ..Including means to position tool along axis
248 ..With "screw-down" to adjust bite of tool-couple
249 ..With means to drive tool
250 .With handling of, or guiding of, work or product relative to tool
251 ..By endless belt or conveyor roll
252 ..By reciprocating or oscillating means
252.5 .Roller or roller-like tool-element of particular configuration
253.1 BY EXTRUDING THROUGH ORIFICE
254 .With cutting
255 ..Severing product from stock or residue
256 .With metal-deforming other than by extrusion

BY EXTRUDING THROUGH ORIFICE
257 .With product handling
258 .Expressing polymetallic-layered product
259 .By plural impellers operating into one extrusion chamber
260 .Expressing non-uniform cross-section or non-linear product
261 .Expressing plural products
262 .By rotating impeller means
263 .Non-axial movement of die, ram, mandrel or container
264 .Utilizing internal forming means (e.g., mandrel) or core tube (e.g., wire guide)
265 ..Movable longitudinally in ram
266 ..Integral with ram
267 ...Single element ("impact extrusion" type)
268 ..Core tube
269 ..Bridge mandrel
270 .Work supplying
271 .Pressure or velocity conditioning
272 .Container and/or support therefor
273 .Ram or ram element
273.5 .Indirect extrusion
274 BY PULLING WORKPIECE THROUGH CLOSED PERIPHERY DIE (E.G., ROD-, TUBE-, OR WIRE-DRAWING)
275 .With cutting
276 .Producing a non-uniform product
277 .With movement of discrete workpiece angularly, laterally, or in a reverse direction
278 .Utilizing plural metal-deforming tools
279 ..Varying speed of continuous workpiece through successive tool stations
280 ..Accumulating work between successive tool stations
281 ..Including non-coaxial closed dies
282 ..All closed dies coaxially aligned
283 ..Including a mandrel inserted within a hollow workpiece
284 .And applying a "pushing" force
285 .Movable die
286 .With heating or cooling
287 .Utilizing specified work moving means
288 ..Varying speed of moving work
289 ..Rotating a drum, roll, sheave, etc.
290 ..Interrelated work gripper and carrier
291 ..Maintaining a "straight-line-draw"
292 BY TIGHTENING FLEXIBLE BAND OR CHAIN ABOUT WORK
293 BY USE OF NON-DEFORMING WORK-GRIPPING CLAMP AND RELATIVELY MOVABLE CLAMP, TOOL OR WORK-FORCER
294 .With cutting
295 .By individually non-deforming clamps
296 ..With coacting relatively movable tool
297 ...With means to actuate tool
298 ..With means to rotate clamp about fixed axis
299 ...About axis intersecting work-gripping regions of two clamps (e.g., twisting)
300 ..With interrelated clamp closer and clamp mover
301 ..With bodily motion in fixed path
302 ...Substantially direct approach or recession (e.g., stretching)
303 ....Along curved path (e.g., tire upsetting)
304 .With work-distorting clamp
305 .With plural spaced clamps
306 .Plural or complex apparatus (e.g., with plural operations)
307 ..With means to advance elongated work (e.g., pipe elbow crimper)
308 .Clamp is active metal-deforming element
309 ..With coacting movable tool
310 ..Clamp rotatable about fixed axis (e.g., bending brake)
311 .Movable clamp
312 .With interrelated clamp closer and tool mover
313 ..Jaw actuator driven by tool or tool holder
314 ..Mechanical actuator
315 ...Cam or toggle
316 .Clamp structure constitutes sole initial metal-deforming force-reaction means (i.e., is passive tool)
317 ..With plural selectively usable clamps (e.g., tube flarer)
318 ..Deforming indeterminate-length work
319 ..With pivotal tool (e.g., sheet metal bender)
320 ...With die surface extension on clamp
321 ....Curved die surface
322 ..With die surface extending from clamp jaw
323 ...Plural die surface portions and coacting tools
324 WITH CUTTING
325 .By composite tool (e.g., piercing)
326 ..Shear-type
327 ...With endless cutting edges
328 ....Utilizing stripper or ejector
329 ....Blank detaching
330 ...Blank detaching
331 ...Severing (e.g., subdividing)
332 .By shearing tool-couple
333 ..With endless cutting edges (e.g., for punching a hole)
334 ...After final metal-deforming operation
335 ...Pre-cutting (i.e., before metal-deforming)
336 ....Blank detaching
337 ..Blank detaching
338 .Severing a discrete piece from stock, work, or product
339 ..Pre-cutting
340 .Machining after final metal-deforming (e.g., grinding to size)
341 .Machining between plural metal-deforming operations
342.1 WITH TEMPERATURE MODIFICATION OF TOOL OR OF SPECIFIED PORTION OF WORK
342.2 .Cooling
342.3 ..Of tool
342.4 ...And heating of tool
342.5 ..And heating of work
342.6 ...Distinct temperature modifications at distinct locations of workpiece
342.7 .Of tool
342.8 ..Preheating
342.92 ..By electrical resistance heater within tool
342.94 .Distinct temperature modifications at distinct locations of workpiece
342.96 ..By passing electric current through work
343 BY USE OF CLOSED-DIE AND COACTING WORK-FORCER (E.G., PUSH-DRAWING)
344 .With stripping or ejecting from tool
345 ..Timed with tool motion
346 ...With work feeding
347 .Cup or shell drawing (i.e., deep drawing)
348 ..With additional metal-deforming
349 ...Plural deep drawing
350 ..With application of frictional restraining force to work during deformation

	BY USE OF CLOSED-DIE AND COACTING WORK-FORCER (E.G., PUSH-DRAWING)
	.Cup or shell drawing (i.e., deep drawing)
	..With application of frictional restraining force to work during deformation
351	...With yieldable actuation of work-gripper (e.g., spring-biased blank-holder)
352	.Forcing work into or within closed die; e.g., forging
353.2	..By two or more coacting tools movable relative to closed die; e.g., tool complex
353.4	...Symmetrically expanding tools
353.6	....With tools converging to form annular surface; e.g., segments of closed die
354.2	...With tools converging to form annular surface; e.g., segments of closed die
354.6	...One tool telescoping into closed die
354.8	....One yieldably connected to another
355.2	....Coaxial opposed tools
355.4	.....Passing through work; e.g., punch
355.6	.....Both tools telescoping into closed die
356	..With additional metal-deforming
357	..With actuation of split die
358	..Tool portion enters cavity of closed die
359	...With telescoping engagement
360	..Coacting closed-dies
361	..With holding, handling or guiding of work or product
362	PROCESS
363	.Deforming stacked blanks
364	.With temperature maintenance or modification
365.2	."Rolling"
366.2	..Between disclosed rollers
367	.Tube making and/or reshaping
368	..Making
369	..Bending
370	..Comprising use of internal tool
371	.Coiling and/or twisting
372	.Involving use of claimed apparatus
373	..Reciprocating tool
374	...Opposed tool faces
375	....Complementary
376	....Single tool pair
379.2	.Deforming sheet metal
379.4	..Container making
379.6	..Forming undulations
377	.With attenuation, thickening, elongating or shortening of work material
378	..By application of tensile forces
380	BY RELATIVELY MOVABLE OFFSET TOOL-FACES (E.G., FOR BENDING OR DRAWING)
381	.Embodying three or more coacting relatively movable tools (i.e., tool-complex)
382	..Comprising yieldable tool or face portion
383	..With concurrent actuation of tools
384	.Plural
385	.Multi-point tool-couple (e.g., corrugator)
386	.With tool motion in fixed path
387	..Pivotal motion only
388	...Cantilever bender
389	..Between and coplanar with opposed tools
390	...Screw-actuated
391.2	..Concentric or telescoped tools
391.4	...Tool inside hollow fastener
391.6	....With fastener loader or supply
391.8	....Helically ribbed tool
392	BY RELATIVELY RECEDING WORK-ENGAGING TOOL-FACES (E.G., FOR STRETCHING)
393	.Embodying three or more tools (e.g., tube expander)
394	BY THREE OR MORE COACTING RELATIVELY MOVABLE TOOLS (I.E., TOOL-COMPLEX)
395	.With paired coplanar tool-faces (e.g., for stretching flat work)
396	.Yieldable face portion or auxiliary tool on tool-couple element
397	..On actuated tool
398	..Movable toward and against portion of work (e.g., floating mandrel)
399	.Concurrently actuated tools
400	..With coacting fixed tool
401	...Between generally opposed-stroke tools
402	..All tools movable radially inward
403	.With means to actuate tools in sequence
404	BY PLURAL TOOL-COUPLES
405	.With means to feed work between plural tool stations
406	WITH MEANS TO EFFECT COMPOUND MOTION OF TOOL (E.G., ROCKING)
407	WITH MEANS TO ACTUATE BOTH ELEMENTS OF TOOL-COUPLE
408	.By continuously rotating shaft
409	.Handle-actuated tools (e.g., plier type)
410	..Clip-clencher or sleeve-crusher
411	BY RELATIVELY MOVABLE TOOLS HAVING SLIDABLY-ENGAGED WORK-CONFINING WALL MEANS (E.G., EDGEWISE SHEET-METAL BENDER)
412	BY TOOL-COUPLE EMBODYING NONPLANAR TOOL-FACE
413	.With adjustable or replaceable section of tool-face
414	With complementary tool-faces (e.g., for embossing)
415	.Constant profile (e.g., cylindrical segments)
416	.Similar tool-faces
417	INCLUDING INTERRELATED TOOL-MOVER AND BLANKHOLDER-MOVER
418	INCLUDING TOOL MEANS TO MOVE WORK TO OR AGAINST COOPERATING TOOL
419	WITH MEANS TO HANDLE WORK OR PRODUCT
420	.Including means to permit maneuvering of work or product at tool zone
421	..With means to interrelate movement of tool and of work
422	.By gripper and/or endless chain
423	..With drum carrier for gripper
424	.With means to store workpieces (e.g., magazine)
425	.Including variable-speed means
426	.Including product handling means
427	..Ejector
428	.Including work guide
429	WITH MEANS TO DRIVE TOOL
430	.Including magnet, solenoid or explosive
431	.Including yieldable connection in drive train to movable tool
432	..Including pneumatic or hydraulic connection
433	..Including metallic spring connection
434	...Coil spring
435	.Mechanical potential-energy drive means only
436	..With means to check energy for subsequent release
437	..Wherein energy is stored by retraction of tool
438	...With means to control force of blow

WITH MEANS TO DRIVE TOOL
.Mechanical potential-energy drive means only
..Wherein energy is stored by retraction of tool
439 ...Wherein tool is retracted by pinch rolls acting on rectilinearly moving tool-support
440 ...Wherein tool is retracted by flexible strap
441 .With means to selectably control movement of tool
442 ..By drive means common to optionally selectable tools
443 ..To control speed of tool
444 ..By means to connect and/or disconnect tool from its drive
445 .With stored-energy means to retract tool
446 .With means to permit tool positioning
447 ..To reposition line-of-action of tool
448 ..To position stationary tool of tool-pair
449 .Including gear-actuated tool support
450 .Including link-actuated tool support
451 ..Toggle links
452 .Including cam-actuated tool support
453.01 .Including pneumatic- or fluid-actuated tool support
453.02 ..Multiple or staged drive means
453.03 ...With mechanical drive means
453.04 ....Fluid high pressure/mechanical low pressure
453.05 ...Displacement additive
453.06 ...Pressure additive
453.07 ....Axially aligned pistons
453.08 ....Independently actuated means
453.09 ....Pull-down press
453.1 ..Utilizing stored energy
453.11 ...Stored kinetic energy
453.12 ..Pull-down press
453.13 ..Including fluid cushion for die opposite to ram
453.14 ..With ram or tool support aligning means
453.15 ..Randomly manipulated or work-supported tool
453.16 ...With handle for manual manipulation
453.17 ....Riveting tool
453.18 ..Having hydraulic or pneumatic return
453.19 ...Riveting tool
454 .Including screw-actuated tool support
455 WITH TOOL CARRIER (E.G., PRESS FRAME)
456 .With guide for rectilinearly moving tool
457 BY OR WITH WORK-CONSTRAINER AND/OR MANIPULATED WORK-FORCER
458 .Comprising lever manipulated to force work
459 ..With work-complementing tool-face adjacent to work-gripping clamp
460 .Comprising nondeforming work-gripping clamp having adjacent tool-face
461 .Comprising work-stopping abutment
462 TOOL AND/OR TOOL HOLDER
463 .With nondeforming passageway
464 .Including deforming tool and cutting tool
465 .Including flexible or yieldable tool or support
466 ..Flexible or articulated back-up
467 .Tool comprising closed periphery deforming passageway
468 ..Including adjustable size or multiple passageway
469 .Tool-comprising die plate having ribs and/or grooves
470 .Including tool couple or die couple (e.g., opposed die faces)
471 ..With intermediate tool
472 ..Including plural tool couples
473 ..Having adjustable face
474 ..Having nonsymmetrical faces
475 ...Complementary faces
476 .Having unitary tool-face
477 ..Including optionally selectable faces
478 ..Comprising plural sections fixed together in use (e.g., adjustable or collapsible)
479 ..With elongated extension fixed to tool face in use (e.g., handle or shank)
480 ...Adjustable relative to tool-face before use
481 ..With support or holder for adjustable or removable tool-face
482 ...Adjustable or collapsible relative to its support
483 MISCELLANEOUS

45.6 ...Pneumatic tire
45.7 ....Mesh envelope
45.8 ...Radiator
46 ..Between fitted parts, e.g., joints
47 ...Piston, piston ring or engine valve
48 ...Tire valve
49 ..Pneumatic tire
49.1 ..Pipe
49.2 ..Receptacle
49.3 ...Sealed
49.4 .With ram pressure inducer
49.5 .Pipe
49.6 ..With power-operated closure or seal
49.7 .Motor part or auxiliary
49.8 .Clamp, plug or sealing feature
52 TESTING SEALED RECEPTACLE
53 TESTING OF LIQUID OR LIQUID SUSPENSION OF SOLIDS
54 .Internal resistance, e.g., viscosity
55 ..Friction tube
56 ..Orifice or nozzle flow or extrusion
57 ..Gravity movement of object in medium
58 ..Adhesion or cohesion between wetted surfaces
59 ..Force reaction to member driven therein
60 ..Shearing torque between parallel surfaces
60.1 .Cleaning or foaming ability
61 R .Content or effect of constituent of liquid mixture
61 LM ...Liquid metal monitors
61.1 R ..Liquid constituent of liquid mixture
61.1 C ....Chromotography
61.2 ..Depositioning characteristic, e.g., slime or scale
61.3 ..Utilizing evaporation or heat
61.4 ..Settling or filtering ability, e.g., drilling mud characteristic
63 .Paper pulp freeness
64 .Lubricant testing
64.1 .Gelling or coagulation
64.2 .Vapor pressure
64.3 .Osomotic pressure, e.g., diffusion characteristic
64.4 .Surface tension
65 CENTER OF GRAVITY; TURNING MOMENTS; METACENTRIC HEIGHT
66 ROTOR UNBALANCE
455 .Propeller, impeller or fluid coupling
456 ..Single blade balancing
457 .In situ
458 ..With counterbalancing means
459 .Combined static and dynamic
460 .Dynamic (spinning)
461 ..Mass centering
462 ..With electrical sensor and indicator
463 ...Wattmeter
464 ...Rotatable switch
465 ...Oscilloscope (cathode ray)
466 ...Stroboscopically illuminated
467 ....Indicator
468 ..With counterbalancing means
469 ...By radially and circumferentially adjustable weights
470 ...By circumferentially adjustable weights
471 ..With vibratable mount feature
472 ...Free floating rotor
473 ....Horizontal axis
474 ...One rotor end universally tiltable
475 ...Horizontal rotational axis
476 ....Horizontal plane of vibration
477 .....Both ends free
478 ......With selective endlock
479 ....Horizontal fulcrum
480 .Gravitational moment turns rotor about spin axis
481 ..Ways
482 .Gravitational moment tilts rotor about axis transverse to spin axis
483 ..Universally tiltable
484 ...With tapered rotor centering means
485 ...With expansible or contractible centering means
486 ...With suspension means
487 .Tool and adjunct
570 VIBRATION
571 .Test chamber
572 .Loose object detection
573 .Hardness or compliance
574 .Mechanical impedance
575 ..Of an elastomer
576 ..Device having an electromagnetic drive
577 .Fatigue study
578 ..Electromagnetic drive
579 .Resonance, frequency, or amplitude study
580 ..Including weight determination
581 ..Including axial force determination
582 ..Including structural bond evaluation
583 ..Of aircraft or related structural element
584 .By mechanical waves
585 ..Including ear or hearing testing
586 ..Reverberation
587 ..Acoustic emission
588 ..Structural bond evaluation
589 ..Acoustical impedance
590 ..In detection of a liquid reaction, a chemical reaction, or a nuclear reaction
591 ..Listening or sound tube
592 ..Fluid, fluid leak, or pipe flaw detection
593 ..Bearing, gear, or related moving mechanism
594 ..Soil or building structure
595 ..Frangible
596 ..Beamed
597 ...Velocity or propagation time measurement
598 ....For flaw or discontinuity detection
599 ...Attenuation measurement
600 ....For flaw or discontinuity detection
601 ...Having plural, diverse forms of radiant energy
602 ...With signal analyzing or mathematical processing
603 ...Acoustic holography
604 ....Having means substituted for reference signal
605 ....Liquid or deformable surface holography
606 ...Imaging of discontinuity with stationary sonic transmitter
607 ....By scan of a sonic receiver
608 ....By Bragg diffraction
609 ...Measuring or testing system having threshold, gating, delay or blocking means
610 ....Electronic gating
611 .....Adjustably responsive to information signal
612 .....Plural gating
613 .....Of noise

	VIBRATION
	.By mechanical waves
	..Beamed
	...Measuring or testing system having threshold, gating, delay or blocking means
	....Electronic gating
614	.....Of signals to pass only echoes from within test body
615	.....Of signals to pass only echoes from front surface or flaw and from rear surface of test body
616	.....Of signals to pass only echoes from rear surface of test body
617	....Having mechanical delay or mechanical blocking
618	...Measuring or testing system having scanning means
619	....Programmed scan
620	....By reflected wave
621	.....Having compound scan
622	.....Of tubing, vesssel, or cylindrical object
623	......Scan from within object
624	.....Having separate sonic transmitter and receiver
625	.....Having plural sonic type transmitter or (receiver) transducers
626	......Switched
627	...By reflected wave
628	....Having plural sonic type transmitters-receivers transducers
629	....Having unitary sonic type transmitter-transducer
630	.....Establishing resonance in a test body
631	.....Having automatic gain control
632	...Sonic wave transmitter or receiver transducer
633	....Having transducer scanning means
634	.....Automatic transducer positioning
635	.....Rolling contact
636	......On railroad rails
637	......Around cylindrical object
638	......Along cylindrical object
639	......Transducer forms wheel or is within a wheel
640	.....Scanning curved surface in direction of curvature
641	.....Plural sonic transmiters or receivers
642	....Having wave shaping means
643	....Nonvibrating transducer
644	....Having significant coupling means
645	..Acoustic parameter
646	...Amplitude, power, or intensity
647	....Current generating or modifying
648	.....Frequency sensitive
649	.Sensing apparatus
650	..Torsional
651	..Vibratable reed
652	..With inertia element
653	...With light beam indicator
654	...With electrically controlled indicator
655	..With light beam indicator
656	...By optical holography
657	...By frequency or phase shift
658	..With electrically controlled indicator
659	...Spectrum analysis
660	...Rotating machinery or device
661	...Having a probe
662	.Vibrator
663	..Table, platform, or other support
664	...Circuitry
665	...Having fluid bearing or fluid pressure actuated
666	...Having spring support
667	...Eccentrically vibrated
668	...Electromagnetically vibrated
669	..Vehicle shaker
670	...Treadmill
671	..Having a fluid jet
672	..Having a rotatable imbalanced mass
73	MOISTURE CONTENT OR ABSORPTION CHARACTERISTIC OF MATERIAL
74	.By residual capacity measurement
75	.By heat conductivity
76	.By desiccation or extraction
77	.By wet and dry bulb temperature
78	HARDNESS
79	.Scleroscope or rebound
81	.By penetrator or indentor
82	..Impact type
83	..With successive minor and major load
84	..Soil bearing capacity
85	..Penetrator element
86	EMBRITTLEMENT OR EROSION
87	DUCTILITY OR BRITTLENESS
760	SPECIMEN STRESS OR STRAIN, OR TESTING BY STRESS OR STRAIN APPLICATION
761	.Threaded fastener stress
762	.Indicating coating or sheet providing direct visual indication (e.g., cracking, color change)
763	.Specified electrical sensor or system
764	..Having level attainment counter
765	..Compensation (e.g., linearization)
766	...Temperature
767	..Plural sensors at single location (e.g., diverse orientation, plural level)
768	..Sensor embedded in specimen
769	..Coupling circuit for specific additional purpose (e.g., noise suppression) or having specified structure
770	...Peak indicating system
771	...Having selector switching means
772	...Plural sensed signal system
773	...Specified signal transmitting link
774	..Specified sensor structure
775	...Bonded to specimen
776	....Sensor comprises coating
777	...Semiconductor
778	...Vibratory element
779	...Magnetic or inductive
780	...Capacitive
781	.Specified load or strain transmission device from specimen to electrical detector
782	..Strain multiplier
783	.Deformation or change in stress after fracture, cutting, or boring
784	.Earth stresses
785	.Prestressed specimen
786	.In static structures (e.g., buildings, bridges)
787	.Stress or strain history of a specimen without application of a load
788	.By loading of specimen (e.g., strength of material test)
789	..Stress-strain relationship determination
790	...Compression
791	...Graphical output
792	....Moving chart
793	.....Drum
794	..Plural diverse stress-strain tests or composite loads
795	...Strain
796	...Tension-compression
797	....Alternating
798	....Hydraulic or pneumatic actuation
799	..Specimen cracking or crack propagation

	SPECIMEN STRESS OR STRAIN, OR TESTING BY STRESS OR STRAIN APPLICATION
	.By loading of specimen (e.g., strength of material test)
800	..Optical
801	..Acoustic emission
802	..Aircraft structure
803	..Concrete
804	..Model of structure to determine structure properties
805	..Varied in response to specimen condition other than failure
806	..Varied according to predetermined pattern
807	...Applied directly by fluid pressure
808	...Repetitive
809	....Plural specimen
810	....To failure
811	....Electric control circuit or particular loading device
812	....Flexing, bending, or folding
813	....Compressive
814	....Torsional
815	....Shear
816	...Hydraulic or pneumatic actuation
817	...Motor driven actuating screw
818	..Compressional
819	...Plural specimen or multiaxial loading
820	...Fluid desplacement provides indication
821	...To fracture, crushing, or yield point
822	...Plastic flow or creep
823	...Residual deformation (e.g., consolidation)
824	...By rotating squeezing element
825	...With hydraulic or pneumatic actuation
826	..Tensile
827	...Bond test
828	...Strand or chain test
829	....By roller
830	....To failure
831	...Having specified clamp
832	....Interior to specimen
833	....Jaws
834	...To failure
835	....Tear
836	...Pendulum dynamometer
837	...Hydraulic or pneumatic actuation
838	..Rupture or burst strength of sheet material by transverse loading
839	...Including cutting or piercing element
840	...Hydraulic or pneumatic actuation
841	..Shear
842	...Bond
843	...By rotary element
844	...Impact (e.g., pendulum)
845	...To fracture or failure
846	...Opposing work holders including specimen
847	..Torsion
848	...To failure
849	..Bending, flexing, or folding
850	...Weld testing
851	...To failure or fracture
852	...Loading means intermediate stationary end holders or supports
853	...Having opposite ends of specimen clamped
854	...By angular displacement of opposite ends of specimen
855	.Support, holder, or housing for unspecified type electrical sensing element
856	.Specimen clamp, holder, or support
857	..With hydraulic or pneumatic actuation of grip
858	..Winding drum or roller type
859	..With wedging or camming elements contacting specimen
860	..Opposed pair
104	SURFACE AND CUTTING EDGE TESTING
105	.Roughness
112	POWER PLANT OR UNIT EFFICIENCY
113	.Automobile fuel consumption
114	..Miles per gallon
115	.Pressure derivative
116	MOTOR AND ENGINE TESTING
117	.With vehicle wheel supporting roller or belt
117.1	.Utilizing a test chamber or tank to simulate operating conditions
117.2	.Disparate tests under operating conditions
117.3	..With continuous operation
117.4	.Thrust measurement, e.g., jet engine
118.1	.Testing auxiliary unit
118.2	..Intake air flow
119 R	.Motor part
119 A	...Fuel injection tests
120	..Piston ring
121	BRAKE TESTING
122	.Slidable platform
123	.Roller or belt wheel support
124	..Relatively shiftable front and rear wheel supports
125	..Inertia type
126	..With driving effort indication
127	...Single wheel portable unit
128	.Road test attachment or adjunct
129	.Vehicle installation
130	.Single wheel rotating and resistance measuring means
131	..Torque measuring lever
132	.Brake depressor with measuring means
862	DYNAMOMETERS
862.01	.For testing force-biased connections
862.02	..Ski bindings
862.03	.For testing relative pulling power (e.g., for contests)
862.04	.Responsive to multiple loads or load components
862.05	..Applied to guidance means
862.06	..On machine tools
862.07	..To determine distribution of tensile stress
862.08	.Responsive to torque
862.09	..By absorption
862.11	...Having plural brake means
862.12	...Having friction brake means
862.13	....Automatic load control
862.14	...Having fluid brake means
862.15	....Air brakes
862.16	....Automatic load control
862.17	...Having magnetic or electromagnetic brake means
862.18	....Automatic load control
862.19	..During transmission
862.21	...For making or breaking threaded connections (e.g., torque measuring wrenches)
862.22	....With variable capacity or sensitivity
862.23	....With detection of specific torque value or condition (e.g., peak torque)
862.24	.....Rate of change
862.25	....Power tongs
862.26	....Bending beam type
862.27	...With recording or totalizing means
862.28	...With electrical computation of horsepower
862.29	...By measuring reaction forces of a prime mover
862.31	...By measuring reaction forces of transmission gearing

	DYNAMOMETERS
	.Responsive to torque
	..During transmission
862.32	...By measuring elastic deformation of a torque transmitting member
862.33	....Electrical
862.34	.....Phase angle detection
862.35	.....Using resistance strain gages
862.36	...By measuring electrical or magnetic properties of a torque transmitting member
862.37	...By measuring the fluid pressure of a hydraulic coupling
862.38	.Responsive to force
862.39	..To determine tension on a stretched flexible element
862.41	...By measuring vibrations (e.g., resonant frequency)
862.42	...By applying a measured tensioning force
862.43	....Racket stringing
862.44	....With winding or reeling means
862.45	...By measuring deflection or deflecting force
862.46	....With angular deflection
862.47	....Using elastically deformable force measuring means
862.48	.....Electrical
862.49	..To determine axial thrust on a rotating machine element
862.51	..With recording means
862.52	..With variable capacity or sensitivity
862.53	..With detection of specific force value or condition (e.g., peak force)
862.54	..Combined
862.55	...With pressure applying roller (e.g., mill roll)
862.56	...With hoisting means
862.57	...With towing means
862.58	..By measuring a fluid pressure
862.59	..By measuring vibrations (e.g., resonant frequency)
862.61	..By measuring a counterbalancing or restoring force
862.62	..By measuring elastic deformation
862.63	...With pressure or temperature compensation
862.64	...Electrical
862.65	....Using resistance strain gages
862.66	.....Shear-type
862.67	.....Including specified electrical circuit
862.68	..By measuring electrical properties
862.69	..By measuring magnetic properties
146	TIRE, TREAD OR ROADWAY
146.2	.Tire inflation testing installation
146.3	..By direct fluid pressure reading
146.4	...Telemetric (e.g., indicator on cowl)
146.5	....Electric
146.8	...Tire stem attachments
147	WIND TUNNEL: AERODYNAMIC WING AND PROPELLER STUDY
148	MODEL BASIN AND TESTING TANK
149	VOLUMETRIC CONTENT MEASURING
150 R	COATING MATERIAL: INK ADHESIVE AND/OR PLASTIC
150 A	..Bond strength
151	BORE HOLE AND DRILLING STUDY
151.5	.Drill depth-rate
152	.Formation logging
153	..By drill mud or core analysis
154	..Thermal
155	.Fluid intrusion, theft of flow study
156	STATISTICAL RECORD VERIFYING
157	RECORD STRIP SPROCKET HOLE TESTING
158	HOISTING CABLE AND ROPE
159	SHEET, WOVEN FABRIC OR FIBER
160	.Filament
161	SPRING TESTING
162	TOOTHED GEAR
163	COIN
164	MINER'S LAMP
167	ORDNANCE AND PROJECTILE
168	BLOWER, PUMP AND HYDRAULIC EQUIPMENT
169	FLOUR, DOUGH OR BREAD
172	ORTHOPEDIC PRESSURE DISTRIBUTION
178 R	NAVIGATION
178 H	..Helicopter
178 T	..Take-off and landing monitors
179	.Rate of climb (pressure type)
180	.Leeway incidence or side-slip
181	.Ship's log
182	..Pressure differential type
183	...With integrating means
184	..Drag type
185	...Rotary
186	..Vane type
187	..Rotary
170 R	METEOROLOGY AND OCEANOLOGY
170 A	..Oceanographic
171	.Rain gauge
188	.Fluid flow direction
189	..With velocity determination
861	VOLUME OR RATE OF FLOW
861.01	.With indirect temperature or density compensation
861.02	..Electrical
861.03	...Digital
861.04	.Of selected fluid mixture component
861.05	.By measuring transit time of tracer or tag
861.06	..With auto correlation or cross-correlation detection
861.95	..Thermal tracer or tag
861.07	.By measuring tracer concentration
861.08	.By measuring electrical or magnetic properties
861.09	..Ionization type
861.11	..Electromagnetic induction (e.g., Faraday type)
861.12	...With detecting electrodes
861.13	....Including permanent magnet or D.C. field
861.14	....For dielectric fluids
861.15	....Plural pairs of detecting electrodes
861.16	....Including electrically interconnected or synchronized input and output circuit
861.17	.....Selective or periodic sampling
861.18	.By measuring vibrations or acoustic energy
861.19	..Produced by fluidic oscillator
861.21	..Caused by fluid interaction with obstacle
861.22	...Vortex shedders
861.23	....Acoustic
861.24	....Movable sensor responsive to vortices
861.25	..Reflection or scattering of acoustic waves
861.26	..Deflection of acoustic waves
861.27	..Transit time of acoustic waves
861.28	...Transmitted along single path
861.29	....In both directions simultaneously
861.31	...Transmitted along parallel paths
861.32	.By measuring swirl rate imparted by static means
861.33	..With turbine in a swirl chamber
861.34	..Precess type
861.35	.Mass flow by imparting angular or transverse momentum to the fluid
861.36	..Motor driven
861.37	...Transverse rotation or oscillations
861.38	....With transverse velocity gradient (e.g., Coriolis, gyroscopic principle)

	VOLUME OR RATE OF FLOW
861.39	.Using an applied fluid jet
861.41	.By counting drops, bubbles, or particles
195	.System
196	..Flow comparing
197	..Compound meter
198	.Combined
199	..With pressure regulator or demand limit
200	..With gas and liquid separator
201	..With connection or box
202	.Proportional
202.5	..Thermal sensing of flow
203	..With valved proportioning means
204.11	.Thermal type
204.12	..With conduit extending between heat sinks
204.13	..With auxiliary fluid contacting or in heat exchange relation with flow path (e.g., thermodilution)
204.14	..Including digital or pulse measuring circuitry
204.15	..Including detail of feedback or rebalancing circuitry
204.16	...By control of a separate heating or cooling element
204.17	..With distinct heating circuitry for a self-heated sensor
204.18	..Including response characteristic or condition compensation
204.19	...For temperature
204.21	..With fluid flow deflector or restrictor (e.g., baffle, constriction)
204.22	..With sensor housing
204.23	..Having particular electrical heating, cooling, or thermal sensing element
204.24	...Thermoelectric junction
204.25	...Resistive element
204.26	....With substrate carrier (e.g., thin film)
204.27	....Wire type (e.g., hot wire)
861.42	.Using differential pressure
861.43	..With time integration
861.44	...By electrical means
861.45	...By mechanical means
861.46	....Including pressure applied to liquid column or reservoir
861.47	..Pressure applied to moveable member (e.g., a diaphragm)
861.48	...With linearization (e.g., square root extraction)
861.49	..Pressure applied to liquid column or reservoir
861.51	...With linearization
861.52	..With restriction
861.53	...Automatically variable restriction
861.54	....Slotted piston or cylinder
861.55	....Cone and ball or disk
861.56	.....With structure of coupling to indicator
861.57	.....With structure of float, float tube, or float guide
861.58	....Orifice and tapered plug
861.59	...Including recirculation pump
861.61	...Orifice or flow nozzle
861.62	....Adjustable
861.63	...Venturi
861.64	....Inlet or outlet structure
861.65	..Pitot
861.66	...Sensing at plural transverse locations
861.67	...Adjustable
861.68	...With heating element
861.69	..Centrifugal
215	.Weir type
216	..Submerged orifice or discharge nozzle
	.Tank type
217	..Rotary tank or bucket
218	...With power drive
219	..Plural measuring chamber
220	...With fluid-pressure operated valve
221	...With float operated valve
222	...With siphon discharge
223	..Single measuring chamber
224	...With float operated valve
225	....With trip gear
226	...With siphon discharge
227	.Area-velocity integrating
861.71	.By measuring thrust or drag forces
861.72	..By changing fluid direction
861.73	..Impact of particulate material
861.74	..On a vane
861.75	...With rotation about a fixed axis
861.76	....Spring biased
861.77	.Using rotating member with particular electrical output or circuit
861.78	..With pick-up coil
861.79	.Using turbine
861.81	..With response modification
861.82	...Pressure responsive valve or restriction
861.83	...Axial supply and delivery
861.84	....Differentially responsive turbines
861.85	..Anemometers
861.86	..With fluid directed radially outward
861.87	..With flow direction retained in a plane perpendicular to turbine axis
861.88	...Mechanical coupling to indicator
861.89	..Axial supply and delivery
861.91	...With structure to reduce friction or wear
861.92	...With structure of bearing or turbine support structure
861.93	...With mechanical coupling to indicator
861.94	...With magnetic coupling drive assembly
232	.Expansible chamber
233	..With variable indicator drive
234	..Wet type (e.g., liquid seal)
235	...Rotary drum
236	...Oscillating bell or drum
237	...Reciprocating bell
238	...Nutating bell
239	..Reciprocating piston or cylinder
240	...Transversely reciprocating piston and cylinder
241	...Oscillating cylinder
242	...Valveless
243	...Duplex
244	....Wobble plate or cam
245	....With transverse shaft
246	.....With single distributing valve
247	...Radial cylinder
248	...Valved piston
249	...With fluid actuated valve
250	...With piston or rod actuated valve gear
251	....With trip gear
252	..Oscillating piston
253	..Rotary piston or cylinder
254	...With compensating bypass
255	...With orbital movement
256	....Plural stationary abutment
257	....Single stationary abutment
258	.....Nutating piston
259	...With sliding vane
260	...With swinging vane
261	...With interengaging pistons
262	..Diaphragm or collapsible wall
263	...Multiple diaphragm
264	....Duplex
265	....With rotary valve
266	.....Crank operated
267	......With flag rod

	VOLUME OR RATE OF FLOW
	.Expansible chamber
	..Diaphragm or collapsible wall
	...Multiple diaphragm
268	....With oscillating or reciprocating valve
269	...Single diaphragm
270	....With diaphragm actuated valve trip gear
271	....With fluid actuated valve
272 R	.Element
272 A	...With remote register
273	..Casing
274	...Diaphragm meter type
275	..Antireversing mechanism
276	...Check valve
277	.."Frostproof" construction
278	..Diaphragm mounting
279	..Diaphragm
280	...With oiling structure
281	..Tangent adjustment
290 R	LIQUID LEVEL OR DEPTH GAUGE
290 B	..Ullage volume
290 V	..Vibratory type
291	.With other measuring device
292	..Thermometer
293	.With illumination
294	.With funnel or hose nozzle
295	.Thermal type
296	.Weighing type
297	.Test cock type
298	.Exploring tube
299	.Hydrostatic pressure type
300	..Bathometer type
301	..With electrically controlled indicator
302	..With fluid displacement or replenishment
303	...Suction type or vacuum tank action
304 R	.Immersible electrode type
304 C	...Capacitative
305	.Float
306	..Combined
307	...With warning signal or alarm
308	....Electric
309	..Buoyancy type
310	..Total registering
311	..Multiple floats
312	..Recording
313	..With electrically controlled indicator
314	..With position sensing
315	..With float lock
316	..With fluid transmission
317	..Pivoted float arm
318	...With flexible cable transmission
319	..Vertically reciprocable
320	...With spiral cam or guide
321	...With flexible cable transmission
322	...Indicator stem attached
322.5	..Float structure
323	.Sight glass
324	..With cleaner
325	..With guard or casing
326	...Boiler type
327	..Reflector or magnifier
328	..Boiler type
329	...Duplex or multiple section
330	...Transparent closure plate type
331	....Bull's eye type
332	...With valve
333	....Safety feature
334	..Transparent closure plate type
335	HYGROMETER
336	.Combined
336.5	.With electrical circuit
338	.Wet and dry responsive elements
338.3	..Actuate relative reading means
338.6	..Relative air motion creating means (e.g., sling psychrometer)
337	.Expansible sorption element
337.5	..Tensioned or twisted element type
379	MUSCULAR STRENGTH
380	.Spring scale instrument
381	..Pivotal indicator
382 R	GRAVITATIONAL DETERMINATION
382 G	..Gravitational variation
383	.Torsion balance
488	SPEED OR ACCELERATION
489	.Recording or registering interrelated factors
490	.With distance registering means
491	.With means for retaining reading
492	..Maximum acceleration
493	.Structural installation or mounting means
494	..Installed in rotary speed source
495	.Indicating diverse conditions
496	.Vibration control or antistick means for reading structure
497	.Temperature compensator
498	.Adjusting means for reading structure
499	.Illuminated reading device
500	.Liquid surface is or moves reading means
501	..Surface of revolving liquid body
502	.Externally connected pressure gauge gives reading
503	.Means integrating time and acceleration
504	.With gyroscopic means
505	.Means measuring or testing change of orientation
506	.Means integrating intermittent speed source impulses
507	.Comparison to a fixed standard, master or reference speed device
508	.With governor drive failure responsive means
509	.With response to a nonspeed condition
510	.Response to multiple sensing means or motion conditions
511	..Response to both velocity and acceleration
512	...Centrifugal-type velocity sensor and separate inertial means
513	.With manual control
514	.Response to rate of change of speed
515	..Fluid
516 R	...With electrical or magnetic means
516 LM	.....With liquid mass
517 R	..Electrical or magnetic
517 AV	....With vibrating element
517 B	....With rebalance system
517 A	....Angular acceleration
518	.Electrical or magnetic
519	..Permanent magnet type
520	...With flux adjusting means
521	.Fluid
522	..Dampening means
523	..Expansible chamber devices
524	..Fluid coupling or torque convertor type
525	..Brake (e.g., vanes in air)
526	.With dampening or shock-absorbing means
527	.With input means
528	..Selective speed transmitter
529	..Frictional (e.g., friction wheels)
530	.With output transmitting mechanism
531	..With transmission adjustment means
532	..Gear
533	...Rectilinear rack
534	..Surface and follower
535	.Centrifugal weight type
536	..Weight lever arm or pivot automatically variable during operation
537	..Bias automatically variable during operation

SPEED OR ACCELERATION
.Centrifugal weight type
..Bias automatically variable during operation
538 ...Snap action
539 ..Limit stop for weight
540 ..With adjusting means
541 ...Diverse
542 ...Biasing weight
543 ...Lever or gear adjustor
544 ...Adjusting screw means and bias spring concentric to centrifugal axis
545 ...Spring and adjustor connect paired weights
546 ..Leaf spring biasing means
547 ..Toggle joint mounted
548 ..Radially projecting striker type
549 ..Rigid mass crossing axis at an acute angle
550 ..Weighted bell crank lever type
551 ..Surface and follower (e.g., cam or weight as wedge)
384 BAROMETER (E.G., ALTIMETER)
385 .Mercury
386 .Aneroid
387 ..Settable
700 FLUID PRESSURE GAUGE
701 .Null balance type
702 .Vibration type
703 ..Ultrasonic
704 ..Vibrating strip or wire
705 .Photoelectric
706 .With protective separator
707 .With fluid pulsation dampener
708 .With pressure and/or temperature compensation
709 .With excess or maximum registering
710 .With steam trap
711 .With variable drive
712 .With recorder
713 .With float
714 .Combined
715 .Diaphragm
716 ..Multiple and/or differential
717 ...With electrical readout
718 ....Capacitive
719 ....Resistive
720 ....Strain gauge
721 .....Piezoresistive
722 ....Electromagnetic
723 ..With electrical readout
724 ...Capacitive
725 ...Resistive
726 ....Strain gauge
727 .....Piezoresistive
728 ...Electromagnetic
729 ..Capsule or bellows
730 ..Expansible conduit
731 ..Sack
732 .Bourdon
733 ..With electrical readout
734 ...Resistive
735 ...Electromagnetic
736 ..Multiple and/or differential
737 ..Intermediately supported
738 ..Safety pressure release casing
739 ..With mechanism dampening
740 ..With zeroizing adjustment
741 ..Bourdon tube and mounting
742 ...Helical Bourdon tube
743 ...Spiral Bourdon tube
744 .Piston
745 ..With electrical readout
746 ...Resistive
747 .U-tube liquid column
748 ..Sphygmomanometer
749 ..With electrical readout
750 ...Resistive
751 .Balance
752 .McLeod type
753 .Electrical
754 ..Semiconductor
755 ..Pirani type
756 .Mounting and connection
863 SAMPLER, SAMPLE HANDLING, ETC.
863.01 .Automatic control
863.02 ..Quantity or rate of flow responsive
863.03 ...Rate of sample flow continuously controlled
863.11 .With heating or cooling
863.12 ..And separation
863.21 .With constituent separation
863.22 ..Particle impact
863.23 ..Sieve, filter, or semipermeable membrane
863.24 ...Cleaning
863.25 ...Changing feature
863.31 .Plural parallel systems
863.32 ..Pipette
863.33 ..Plural capture, single receiver
863.41 .Flow divider, deflector, or interceptor
863.42 ..Attached to mouth of dumpable receptable
863.43 ..Having precapture flow guide or homogenizer
863.44 ...Oscillating or reciprocating
863.45 ...Rotary
863.51 ..Having an upstream-facing-opening-type capture element
863.52 ...With receptacle
863.53 ....Mounted for flow zone traverse
863.54 ...Mounted for reciprocation
863.55 ...Oscillating
863.56 ...Rotary
863.57 ...With blocking means
863.58 ...Pitot tube type
863.61 ..Branched conduit
863.71 .Conduit or passageway section capture chamber
863.72 ..Single valve unit
863.73 ...Capture chamber within valve unit
863.81 .Withdrawing through conduit or receptacle wall
863.82 ..Capture element movable to plural loci
863.83 ..With metering means or pump
863.84 ...Expansible chamber
863.85 ..Lock or seal for sampler insertion or removal
863.86 ..Valve or restriction
863.91 .Conveyor coacting
863.92 ..Integral with conveyor structure
864 .Capture device
864.01 ..Pipette or cannula
864.02 ...Self-filling of self-limiting
864.03 ...With user mouth protection
864.11 ...With suction applying and liquid discharge means
864.12 ....With separate diluent supply
864.13 ....Piston within pipette
864.14 ....With particular connection or release means
864.15 ....With valve for connection to external pressure source
864.16 ....Piston and cylinder
864.17 .....Plural
864.18 .....Plural or adjustable limit stops
864.21 ...With sample supply to analyzer
864.22 ...With pipette contacting second fluid supply
864.23 ...Pipette fixed; source movable
864.24 ...Pipette longitudinally movable
864.25 ....And transversely movable
864.31 ..With capture device transporter
864.32 ...Cyclically operated scoop
864.33 ..Capture by fluid current
864.34 ..Sample meter or pump

	SAMPLER, SAMPLE HANDLING, ETC.
	.Capture device
	..Sample meter or pump
864.35	...Chamber with alternate pressure or vacuum applier
864.41	..Cutter, tearer, or scraper
864.42	...Jaw
864.43	...Auger or drill
864.44	...Corer
864.45	....With corer advancing means
864.51	..Receptacle type
864.52	...Preevacuated
864.53	...Mold
864.54	....With suction applier
864.55	....With diminutive fill passageway
864.56	.....Mating sections
864.57	......Labyrinth
864.58	....With sample conditioner
864.59	....With holder or connector
864.61	...Fluid displacement
864.62	...Expansible chamber
864.63	...With valve or closure
864.64	....Side opening
864.65	....Contact actuated
864.66	....Support force or inertia actuated
864.67	....Messenger actuated
864.71	..Material for particulate adhesion
864.72	..Capillary attraction retention
864.73	..Conduit
864.74	...With penetrating means
864.81	.Analyzer supplier
864.82	..Having sample capsule holder
864.83	..Having sample confining chamber
864.84	...Connector for separable holder
864.85	..Connector for separable holder
864.86	...Septum structure
864.87	...Syringe with connector
864.91	.Sample holder
426	MEASURING VESSEL
427	.With depth indication
428	..Removable indicator
429	.Capacity adjustable
430	INSTRUMENT MECHANISM DAMPENING
431	INSTRUMENT CASING
865	MASS
865.1	HUMAN STRESS LIMIT (E.G., DEPRESSION GAUGE FOR DIVERS)
865.2	HYDRAULIC ALTIMETER
865.3	TESTING BY IMPARTING MOTION
865.4	ANALYZING BODILY MOVEMENT (E.G., SKILLS OR KINETIC OF HANDWRITING)
865.5	PARTICLE SIZE
865.6	SIMULATED ENVIRONMENT (E.G., TEST CHAMBERS)
865.7	TOUCH OR TASTE
865.8	INSPECTING
865.9	TESTING OF APPARATUS
866	TESTING OF MATERIAL
866.1	INSTRUMENT MECHANISM OR TRANSMISSION
866.2	.Rate of change
866.3	DISPLAY OR DISPLAY DEVICE DETAILS
866.4	SPECIMEN MODEL OR ANALOG
866.5	PROBE OR PROBE MOUNTING
432.1	MISCELLANEOUS

3.52	..Plural, sequential, trip actuations
3.54	..Clock train
3.56	...Winding knob trip (e.g., alarm mechanism)
4	.Hit and miss
5 R	GYROSCOPES
5 F	..Flexure hinges for gyros
5.1	.With caging or parking means
5.12	..Rotor spin and cage release type
5.14	..And resetting means
5.2	.With gimbal lock preventing means
5.22	.Combined
5.34	.Multiple gyroscopes
5.37	..With rotor drives
5.4	.Gyroscope control
5.41	..Erecting
5.42	...By plural diverse forces
5.43	...By jet
5.44	...By weight
5.45	...By friction
5.46	...By magnetic field
5.47	...By motor torque
5.5	..Damping
5.6 R	.With pick off
5.6 A	...Optical
5.6 B	...Pneumatic
5.6 C	...Conducting liquid
5.6 D	...Electrical
5.6 E	...Electrical and magnetic
5.7	.With rotor drive
5.8	.Vertical gyroscopes
5.9	.Horizontal gyroscopes
843	INTERRELATED MOTOR AND TRANSMISSION CONTROL
880	.Including fluid drive
881	..Steer by driving
882	..Impeller-turbine type
883	...With countershaft gearing
884	....And turbine shaft brake
885	....And clutch control
886	....Control of or by fluid drive
887	...With hydrodynamic braking
888	...With nonratio brake
889	...Control responsive to fluid drive
890	...With clutch control
891	...With fluid unit vane control
892	...Fill and empty type fluid units
844	.Control by sensed ambient condition, pattern indicia or external signal
845	.Load motion limit control
846	.Control by manual brake on transmission output
847	.Plural driving motors
848	.Reversible rotary driving motor
849	.Transmission change by moving motor
850	.Motor starting interlock
851	.Motor ignition intermitting for transmission change
852	..Having safety means limiting duration of intermission
853	..Controlled by motor input manifold pressure
854	..Initiated by positioning accelerator
855	...Initiation inhibited by sensed condition
856	.Sensed condition responsive control
857	..Of motor energy input
858	...Diminution during transmission change
859	...Transmission output condition responsive
860	...Transmission setting contingent
861	..Of transmission change
862	...By acceleration of transmission driven load
863	...By motor input manifold pressure
864	....Response regulated by transmission output condition
865	...Accelerator position regulated response
866	....Electrically coordinated signals
867	....Hydraulically coordinated signals
868	.....Opposed pressures control shift valve
869	......Plural shift valves
870	...Accelerator overrule of responsive control
871	....Overrule inhibited by sensed condition
872	.Transmission change modifies motor input control
873	..Change resets motor idling control
874	..Completing change increases motor input
875	..Change to neutral idles motor
876	...Motor input variable in neutral
877	.Transmission change triggered by positioning accelerator
878	.One control blocks another
879	.Motor control linkage mounted on manual gear shift lever
6	ENGINE STARTERS
7 R	.Automatic
7 A	...Separate power mesher
7 B	...Holders
7 C	...Clutch connection
7 D	...Worm and wheel
7 E	...Reduction gearing
8	.Radial meshing
9	.Cam operated
10 R	SHAFT OPERATORS (RADIO TUNER TYPE)
10 A	..Remote control
10.1	.Preselected position
10.15	..Step by step
10.2	..Rotatable stop and projectable abutment
10.22	..Digital dial type
10.27	..Plural operator
10.29	...Cam and follower
10.31	....Adjustable cam
10.33	.....Sliding operator
10.35	....Adjustable follower
10.37	.....Sliding operator
10.39	...Rack and pinion
10.41	..With detent or clicker
10.45	.Plural shafts
10.5	.Plural speed
10.52	..Planetary
10.54	..Separate operators
10.6	.Cam and follower
10.7	.Tensioned flexible operator
10.8	.Gear drive
10.85	..Worm or screw
10.9	.Lever and linkage drive
813 R	ROTARY MEMBER OR SHAFT INDEXING, E.G., TOOL OR WORK TURRET
813 C	..Control means
813 L	..Locking means
814	.With safety device or drive disconnect
815	.With locating point adjusting
816	.Preselected indexed position
817	..Sequential
818	...Skip position
819	...Held by torque
820	...Geneva or multilated gear drive
821	...Velocity control
822	...Interlocked rotator and brake

	ROTARY MEMBER OR SHAFT INDEXING, E.G., TOOL OR WORK TURRET
	.Preselected indexed position
	..Sequential
	...Interlocked rotator and brake
823	....Diverse type brakes
824	.....With axially acting friction brake
825	.Plural operators or input drives
826	.With means to axially shift shaft
827	.Single revolution input effects desired fractional output
11	POWER TAKE-OFF
12	.Speedometer
13	.Wheel take-off
14	..Wheel bed type
15	..Supported pulley
15.2	.Plural take-off shafts
15.4	.With independent change speed gearing
15.6	.From shaft extension
15.63	..Prime mover shaft, e.g., crank shaft
15.66	..Change speed transmission shaft
15.69	..Vehicle propeller shaft
15.8	.Intermediate ends of power transmitting line
15.82	..Vehicle propulsion transmitting line
15.84	...Between prime mover shaft and transmission
15.86	...Drive from transmission gear
15.88	...Between transmission and propeller shaft
16	POWER TABLES AND STANDS
17	WASHER AND WRINGER
17.5	FULL STROKE MECHANISM
17.8	MOTION TRANSFER THROUGH INPERFORATE FLEXIBLE SEAL
18	FLEXIBLE SEALING DIAPHRAGM ATTACHED TO MOVING ROD AND TO CASING
18.1	.Pivoting or nutating rod
18.2	.Longitudinally reciprocating rod
828	ALTERNATING-MOTION DRIVEN DEVICE WITH MEANS DURING OPERATION TO ADJUST STROKE
829	.Constant length stroke with means to displace end limits
830	..Cyclical displacement responsive to the alternating-motion
831	.Stroke adjustable to zero and/or reversible in phasing
832	..Plural driving means to jointly drive the driven device
833	..Device driven from selected points on oscillating link
834	..Driving lever with adjustable pivot point
835	..Eccentric and strap drive, shiftable eccentric
836	...Changing the extent of eccentricity
837	..Crank pin drive, shiftable pin
838	..Cam and follower drive
839	...Axial type cam (e.g., wabbler type)
840	ROTARY DRIVEN DEVICE ADJUSTABLE DURING OPERATION RELATIVE TO ITS SUPPORTING STRUCTURE
841	.Screw and nut adjusting means
842	.Rack and pinion adjusting means
	MECHANICAL MOVEMENTS
20	.Oscillating to reciprocating and alternating rotary
21	.Oscillating to reciprocating and intermittent rotary
22 R	.Rotary to reciprocating and rotary
22 A	...Rotary to reciprocating or rotary
23	.Rotary to reciprocating and alternating rotary
24	.Rotary to reciprocating and intermittent rotary
25	.Rotary to or from reciprocating or oscillating
26	..Head motions
27	..Reciprocating carriage motions
28	...Phonograph type
29	..Rack and pinion type
30	...Shifting rack
31	...Shiftable pinion
32	...Segmental pinion
33	...Alternately rotated pinion
34	...Clutchable gears
35	....Bevel
36	..Overcoming dead center
37	..Belt or chain carried member
38	..Crank, lever, toggle and slide
39	..Crank, lazy-tong and slide
40	..Crank, pitman, lever and slide
41	...Pump jack type
42	..Crank, pitman and lever
43	...Multiple levers
44	..Crank, pitman and slide
45	..Crank, lever and slide
46	...Rack connections
47	..Crank and lever
48	...Slidable connections
49	..Crank and slide
50	...Slidable connections
51	..Crank and multiple pitmans
52	..Planetary gearing and slide
53	..Cam, lever and slide
54	..Cam and lever
55	..Cam and slide
56	...Axial cam
57	....Grooved
58	.....Multiple screw
59	.....Alternately rotated screw
60	...Wabbler type
61	..Unbalanced weights
62	..Trammel-pitman
63	.Rotary to rotary
64	..Inertia or centrifugal transmitters
65	..Crank, pitman, lever and crank
66	..Crank, lever and crank
67	..Crank, pitman and crank
68	..Cranks, link connected
69	..Cranks, slidable connections
70	.Rotary to alternating rotary
71	..Mangle connections
72	...Shiftable driven gear
73	....Central teeth
74	...Multilated gearing connections
75	..Crank, pitman and lever
76	..Reciprocating rack connections
77	...Crank and pitman actuator
78	...Simple crank actuator
79	..Oscillating rack connections
80	...Mangle actuated
81	...Crank and pitman actuator
82	..Flexible connector type
83	..Associated inertia devices
84 R	.Rotary to intermittent unidirectional motion
84 S	...Space machines
86	.Rotary to gyratory
87	..Unbalanced weight
88	.Reciprocating or oscillating to intermittent unidirectional motion
89	.Reciprocating or oscillating to or from alternating rotary
89.1	..Including inertia device
89.11	...With rack and pinion
89.12	....Rectilinear rack
89.13	..Including bevel gears
89.14	..Including worm
89.15	..Including screw and nut
89.16	..Including spur gear
89.17	...With rack
89.18	....Curvilinear rack
89.19	.....With biasing means

	MECHANICAL MOVEMENTS
	.Reciprocating or oscillating to or from alternating rotary
89.2	..Including flexible drive connector (e.g., belt, chain, strand, etc.)
89.21	...With sprocket wheel
89.22	...With pulley
96	.Oscillating to oscillating
97.1	..Snap action
97.2	...Plate spring
98	..Geared connections
99 R	.Reciprocating to or from oscillating
99 A	...Inclined ramp
100.1	..Snap action
100.2	...Plate spring
101	..Compound lever and slide
102	..Lever and slide
103	...Straight line motions
104	...Slidable connections
105	...Link connections
106	...Toggle transmissions
107	...Cam connections
108	...Flexible connections
109	..Rack and pinion
110	.Reciprocating to reciprocating
111	MECHANICAL MOVEMENTS (INTERMITTENT GRIP TYPE)
112	.Rotary to intermittent unidirectional motion
113	..Automatically controlled
114	...Speed
116	..Rotary crank or eccentric drive
117	...Adjustable
118	...Lever transmitter
119	....Adjustable leverage
120	...Rack and pinion transmitter
121	....Adjustable throw
122	...Rotary cam drive
123	....Adjustable throw
124	.....Radial cam
125	....Radial cam
125.5	..Intermittenly engaged clutch
126	.Oscillation or reciprocation to intermittent unidirectional motion
127	..Screw and nut devices
128	..Slide actuator
129	...Multiple acting
130	..Rack actuator
131	...Multiple acting

Note:

In this schedule, many subclasses are based on the groupings of elements in the periodic chart. Below are listed elements in the group as used in the schedule.

Alkali metal : Lithium(Li), Sodium(Na), Potassium(K), Rubidium(Rb), Cesium(Cs), and Francium(Fr)

Alkaline earth metal : Calcium(Ca), Strontium(Sr), Barium(Ba), and Radium(Ra)

Halogen : Fluorine(F), Chlorine(Cl), Bromine(Br) Iodine(I), and Astatine(At)

Iron Group : Iron(Fe), Cobalt(Co), and Nickel(Ni)

Lanthanide : Lanthanum(La), Cerium(Ce), Praseodymium(Pr), Neodymium(Nd), Promethium(Pm), Samarium(Sm), Europium(Eu), Gadolinium(Gd), Terbium(Tb), Dysprosium(Dy), Holmium(Ho), Erbium(Er), Thulium(Th), Ytterbium(Yb), and Lutetium(Lu)

Noble gas : Helium(He), Neon(Ne), Argon(Ar), Krypton(Kr), Xenon(Xe), and Radon(Rn)

Noble metal : Silver(Ag), Gold(Au), Osmium(Os), Iridium(Ir), Platinum(Pt), Ruthenium(Ru), Rhodium(Rh), and Palladium(Pd)

Radioactive : Technetium(Tc), Promethium(Pm) Polonium(Po), Astatine(At), Radon(Rn), Francium(Fr), Radium(Ra), Actinium(Ac), Thorium(Th), Protactinium(Pa), Uranium(U), Neptunium(Np), Plutonium(Pu), Americium(Am), Curium(Cm), Berkelium(Bk), Californium(Cf), Einsteinium(Es), Fermium(Fm), Mendelevium(Md), Nobelium(No), Lawrencium(Lr), Unnilquadium(Unq), Unnilpentium(Unp), and Unnilhexium(Unh)

Rare earth metal : Scandium(Sc), Yttrium(Y), and Lanthanide group

Refractory metal : Titanium(Ti), Zirconium(Zr), Hafnium(Hf), Vanadium(V), Niobium(Nb) or Columbium(Cb), Tantalum(Ta), Chromium(Cr), Molybdenum(Mo), and Tungsten(W)

Transition metal : Scandium(Sc), Titanium(Ti), Vanadium(V), Chromium(Cr), Manganese(Mn), Iron(Fe), Cobalt(Co), Nickel(Ni), Copper(Cu), Zinc(Zn), Yttrium(Y), Zirconium(Zr), Niobium(Nb) or Columbium(Cb), Molybdenum(Mo), Technetium(Tc), Ruthenium(Ru), Rhodium(Rh), Palladium(Pd), Silver(Ag), Cadmium(Cd), Lanthanum(La), Cerium(Ce), Praseodymium(Pr), Neodymium(Nd), Promethium(Pm), Samarium(Sm), Europium(Eu), Gadolinium(Gd), Terbium(Tb), Dysprosium(Dy), Holmium(Ho), Erbium(Er), Thulium(Tm), Ytterbium(Yb), Lutetium(Lu), Hafnium(Hf), Tantalum(Ta), Tungsten(W), Rhenium(Re), Osmium(Os), Iridium(Ir), Platnium(Pt), Gold(Au), Mercury(Hg), Actinium(Ac), Thorium(Th), Protactinium(Pa), Uranium(U), Neptunium(Np), Plutonium(Pu), Americium(Am), Curium(Cm), Berkelium(Bk), Californium(Cf), Einsteinium(Es), Fermium(Fm), Mendelevium(Md), Nobelium(No), Lawrencium(Lr), Unnilquadium(Unq), Unnilpentium(Unp), and Unnilhexium(Unh)

300 COMPOSITIONS
301 .Reactive furnace lining
302 .Welding rod or electrode defined by composition
303 .Solid treating composition for liquid metal (e.g., flux, slagging agent, casting agent, etc.) or charge
304 ..In wire, container, or article with surface feature
305 ..For casting or teeming operation
306 ..For electrothermic operation (e.g., electroslag remelting, etc.)
307 ..Containing Boron(B) compound
308 ..Containing halide
309 ...Containing Fluoride
310 ....And consolidated
311 ...And consolidated
312 ..Containing carbide
313 ..Composition for or from consolidating by agglomerating, calcinating, compacting, indurating, roasting, sintering, or solidifying from molten mass
314 ...Containing free metal
315 ....Aluminum(Al) or Magnesium(Mg) as free metal
316 ....Iron(Fe), Iron scrap, or Iron alloy as free metal
317 .....And coal, coke, pitch, asphalt, or tar
318 .....And clay (e.g., bentonite, montmorillonite, etc.), cement, or Alkali metal silicate
319 ...Containing Iron(Fe) compound
320 ....And coal, coke, pitch, asphalt, or tar
321 ....And synthetic polymer, natural polymer, or carbohydrate
322 ....And clay (e.g., bentonite, montmorillonite, etc.), cement, or Alkali metal silicate
323 ....And Alkaline earth metal compound or Aluminum(Al) compound
324 ...Containing Zinc(Zn) compound
325 ...Containing coal, coke, pitch, asphalt, or tar
326 ...Containing clay (e.g., bentonite, montmorillonite, etc.), cement, or Alkali metal silicate
327 ...Containing Alkaline earth metal compound or Aluminum(Al) compound
328 ..Containing free metal
329 ..Containing Alkaline earth metal compound or Aluminum(Al) compound
228 .Consolidated metal powder compositions
229 ..Flake or fibrous constituent or fibrous grain structure
230 ..With nonmetal constituent - Silicon(Si) considered a metal (e.g., cermet, etc.)
231 ...Molybdenum sulfide or functional constituent, (e.g., lubricant, abrasive, etc.)
232 ...Oxide containing
233 ....With another nonmetal
234 ....Oxygen(O) associated with more than one metal
235 ....Oxide of Aluminum(Al), Beryllium(Be), Magnesium(Mg), Alkaline earth metal, Scandium(Sc), Yttrium(Y), Lanthanide metal, Actinide metal, Titanium (Ti), Zirconium(Zr), or Hafnium(Hf)
236 ...Carbide containing
237 ....With another nonmetal
238 .....Nonmetal is Boron(B) or Nitrogen(N)
239 ....Carbide only of Vanadium(V), Niobium(Nb) or Columbium(Cb), or Tantalum(Ta)
240 ....Carbide only of Chromium(Cr), Molybdenum(Mo), or Tungsten(W)
241 ....Carbon(C) associated with more than one metal
242 .....Free metal is Iron(Fe), Cobalt(Co), or Nickel(Ni) only
243 ...Nonmetal is elemental Carbon(C) only
244 ...Containing Boron(B) or Nitrogen(N)
245 ..Base metal one or more Transition metal
246 ...Base metal one or more of Iron group, Copper(Cu), or Noble metal
247 ....Base metal one or more of Copper(Cu) or Noble metal
248 ...Base metal confined to Tungsten(W)
249 ..Base metal one or more of Beryllium(Be), Magnesium(Mg), or Aluminum(Al)
250 ...Base metal is Beryllium(Be) only
255 .Loose particulate mixture (i.e., composition) containing metal particles
252 ..Mixture contains particles of nonmetal
253 ...Halogen containing particles
254 ...Boron(B) containing particles
330 PROCESSES
331 .Producing solid particulate free metal directly from liquid metal (e.g., liquid comminuting, etc.)
332 ..With subsequent coating of the particles
333 ..Utilizing centrifugal force or rotating forming zone to comminute liquid metal
334 ...Including directing liquid metal onto rotating disc
335 ..By vibrating or agitating
336 ..Utilizing electrothermic energy to comminute
337 ..By impinging plural liquid streams
338 ..By impinging or atomizing with gaseous jet or blast
339 ...Gas used is air
340 ..By extrusion spraying or gravity fall through orifice
341 ...Into moving fluid
342 .Spheroidizing or rounding of existing solid metal particles
343 .Producing or purifying free metal powder or producing or purifying alloys in powder form (i.e., named or of size up to 1,000 microns in its largest dimension)
344 ..Radioactive
345 ..Utilizing, electrothermic, magnetic, or wave energy
346 ...Utilizing plasma
347 ...Utilizing magnetism
348 ..Producing or purifying named magnetic material
349 ...Using Phosphorus(P), Boron(B), or Silicon(Si) or compound thereof
350 ...Using Alkaline earth metal or compound thereof
351 ..Producing alloy
352 ...Including comminution
353 ..Utilizing scrap material
354 ..Including comminution
355 ...Directly from liquid mass (e.g., by atomizing, etc.)
356 ...And shaping or sintering prior to comminution

PROCESSES
.Producing or purifying free metal powder or producing or purifying alloys in powder form (i.e., named or of size up to 1,000 microns in its largest dimension)
..Including comminution
357 ...With step at 300 degrees C or greater
358 ....Use of salt bath
359 ....Reduction
360 ....Use of gas
361 ...Using nonmetallic material which is liquid under standard conditions
362 ..Decomposition of organo-compound containing metal or metal carbonyl
363 ..At 300 degrees C or greater
364 ...Combined with step at less than 300 degrees C using nonmetallic material which is liquid under standard conditions
365 ....Step at 300 degrees C or greater after step at less than 300 degrees C using nonmetallic material which is liquid under standard conditions
366 ...Utilizing a fluidized bed
367 ...Vaporizing or condensing free metal
368 ...Settling of powder in molten metal or salt bath
369 ...Purifying powdered metal or reducing powdered metal compound to free metal
370 ..Using nonmetallic material which is liquid under standard conditions
371 ...And settling of free metal from solution
372 ....Displacing by another metal (i.e., electromotive series)
373 ....Copper(Cu) recovered
374 ....Nickel(Ni) or Cobalt(Co) recovered
10.1 .Electrothermic processes (e.g., microwave, induction, resistance, electric arc, plasma, etc.)
10.11 ..With zone melting or fractional crystallization
10.12 ..Controlling process through sensed condition
10.13 ..Electromagnetic wave energy (e.g., microwave, laser, etc.)
10.14 ..Electrical induction
10.15 ...Producing or treating Iron(Fe) or Iron alloy
10.16 ....With induced magnetic stirring
10.17 ....With gaseous treating agent
10.18 ...Producing or treating Aluminum(Al), Beryllium(Be), Cobalt(Co), Chromium(Cr), Magnesium(Mg), Nickel(Ni), Titanium(Ti), or alloy thereof
10.19 ..Plasma
10.2 ...Influenced by magnetic field
10.21 ...Producing or treating Aluminum(Al) or Aluminum alloy
10.22 ...Producing or treating Iron(Fe) or Iron alloy
10.23 ..Consumable metal-containing electrode
10.24 ...Electro-slag remelting
10.25 ....Producing or treating Chromium(Cr), Cobalt(Co), Copper(Cu), Iron(Fe), Manganese(Mn), Nickel(Ni), Titanium(Ti), or alloy thereof
10.26 ...Producing or treating Titanium(Ti) or Zirconium(Zr) or alloy thereof
10.27 ..Carbothermic reduction of Aluminum(Al) compound
10.28 ..With volatilization of metal halide
10.29 ..Distillation or volatilization of refined metal or compound thereof
10.3 ...Producing Zinc(Zn)
10.31 ....From consolidated material (e.g., briquette, pellet, etc.)
10.32 ....With electric arc
10.33 ...Producing magnesium(Mg)
10.34 ..Rotating chamber
10.35 ..Reducing or smelting slag or dross as starting material
10.36 ..Exhaust or top gas reused or treated
10.37 ...With production of electrical energy
10.38 ...Producing or treating Iron(Fe) or Iron alloy
10.39 ..Adding gaseous treating agent
10.4 ...Gas contains gaseous Oxygen
10.41 ....Producing or treating Iron(Fe) or Iron alloy
10.42 .....With charge melting by electrothermal energy
10.43 ...Hydrogen or water vapor
10.44 ...Carbon monoxide or Carbon dioxide
10.45 ...Noble gas, Nitrogen, or inert gas not otherwise identified
10.46 ..Adding solid treating agent, slag,or flux
10.47 ...Magnesium(Mg) or compound thereof
10.48 ...Aluminum(Al) or compound thereof
10.49 ...Boron(B) or compound thereof
10.5 ...Silicon(Si) or compound thereof
10.51 ....Ferrosilicon alloy
10.52 ....Silicon carbide
10.53 ....With lime present
10.54 ...Alkali metal, Alkaline earth metal or compound thereof
10.55 ....Calcium fluoride (e.g., Fluorspar, Fluorite, etc.)
10.56 ....Calcium carbide
10.57 ....Calcium carbonate (e.g., limestone, etc.)
10.58 ....Calcium oxide (e.g., lime, calx, etc.)
10.59 ...Carbon(C) containing material (e.g., Carbon, carbonaceous material, Carbide, etc.)
10.6 ....Producing or treating Iron(Fe) or Iron alloy
10.61 .....With electric arc
10.62 ..Reducing or smelting
10.63 ...Producing or treating Iron(Fe) or Iron alloy
10.64 ..Vacuum purifying or degassing
10.65 ..Melting or holding melt
10.66 ...Producing or treating Iron(Fe) or Iron alloy
10.67 .Magnetic (e.g., electromagnetic, etc.) or electrostatic processes
375 .Process control responsive to sensed condition
376 ..Removing material from process to sense condition
377 ...Material removed is molten metal
378 ..Pressure sensed
379 ...Of feed gas
380 ..Temperature sensed
381 ...Of waste gas
382 ...Of molten metal
383 ...Of sintered material
384 ..Composition sensed
385 ...Of waste gas
386 ..Characteristic of treated material sensed (e.g., density, etc.)
387 ..Flow rate sensed
388 .Preparing for amalgamation, preparing and amalgamating, or breaking amalgam to produce free metal

PROCESSES
.Preparing for amalgamation, preparing and amalgamating, or breaking amalgam to produce free metal
389 ..And displacing with a metal other than Mercury(Hg)
390 ..Utilizing a Halogen containing agent
391 ..Utilizing a Nitrogen(N) containing agent
392 .Producing or treating free metal
393 ..Utilizing Radioactive material, producing or treating Radioactive metal
394 ...Thorium(Th)
395 ....Reduction
396 ...Plutonium(Pu)
397 ....Reduction
398 ...Uranium(U)
399 ....Reduction
400 ..Free metal production from sea nodules
401 ..Treating multi-component metal-containing scrap having an integral substrate to separate metal therefrom by temperature modification or chemical process at 300 degrees C or greater wherein at least one metal remains solid during separation
402 ...Utilizing molten salt bath
403 ...Removing nonmetal from metal
404 ..Separating liquid metal by centrifuging
405 ..Removing gas from liquid metal by use of gas permeable membrane
406 ..Adsorbing impurity from liquid metal
407 ..Filtering vaporous or liquid metal
408 ...Alkali metal, singly or in combination
409 ...Magnesium(Mg)
410 ...Noble metal, singly or in combination
411 ...Copper(Cu)
412 ...Aluminum(Al)
413 ..From metal carbonyl or carbon monoxide complex
414 ..At 300 degrees C or greater (e.g., pyrometallurgy, etc.)
415 ...Foam
416 ...Combined with step at less than 300 degrees C using nonmetallic material which is liquid under standard conditions (e.g., hydrometallurgy, etc.)
417 ....Obtaining metal from photographic waste
418 ....Obtaining metal from electrolytic slime
419 ....Step at less than 300 degrees C using nonmetallic material which is liquid under standard conditions after a step at 300 degrees C or greater
420 .....Step at less than 300 degrees C using nonmetallic material which is liquid under standard conditions is reduction to free metal
421 ......Noble metal
422 ....Silver(Ag)
423 ....Gold(Au)
424 ......Copper(Cu)
425 ......Iron(Fe), Cobalt(Co), or Nickel(Ni)
426 ....Noble metal obtained
427 .....Silver(Ag)
428 .....Gold(Au)
429 ....Copper(Cu) obtained
430 ....Iron(Fe), Cobalt(Co), or Nickel(Ni) obtained
431 ....Zinc(Zn), Cadmium(Cd), or Mercury(Hg) obtained
432 ....Tin(Sn) or Lead(Pb) obtained
433 ...Iron(Fe)
434 ....With concurrent production of hydraulic cement
435 ....With concurrent production of Titanium dioxide
436 ....With consolidation (e.g., pelletizing, etc.) of solid metallic Iron(Fe) product after reduction
437 ....Reducing Iron(Fe) halide
438 ....Making wrought Iron(Fe)
439 .....Pouring molten Iron(Fe) into molten slag (i.e., Aston process)
440 .....Utilizing moving hearth
441 .....Directly from Iron(Fe) compound only (no metallic Iron)
442 ......In moving furnace
443 ....Reducing in gaseous suspension
444 .....Fluidized bed
445 ......With melting of Iron(Fe)
446 ....Outside the fluidized bed
447 ......With solid in fluidized bed in addition to reducible Iron(Fe) compound
448 ....Carbon(C)
449 ....Generated in situ
450 ......Using plural fluidized bed furnaces
451 ......Using plural fluidized bed zones within a furnace
452 .....Solid product produced (without melting)
453 .....Cyclone apparatus used
454 .....Using same inlet to feed solid and gas
455 ......Inlet is a burner
456 ......Burner is horizontal
457 ......Inlet feeds upwardly
458 ....Blast furnace reduction to produce molten Iron(Fe)
459 .....Using additive to the blast
460 ......Carbonaceous
461 ....Slurry of solid in liquid
462 ....Liquid
463 ....Gaseous
464 ....Recycled off gas
465 ......Water
466 ......Oxygen enrichment
467 .....Tapping molten product
468 .....Top gas recovery
469 .....Specified method of charging burden
470 .....Defined composition of slag
471 .....Defined composition of reductant
472 .....Defined composition of Iron(Fe) source
473 ....Reduction in closed retort (e.g., Hoganas process, etc.)
474 ....Reduction in rotary kiln
475 .....With melting of Iron(Fe) product
476 ......Iron(Fe) product melted within rotary kiln
477 .....Introducing solid reductant into rotary kiln
478 ......Solid reductant is recycled
479 ......Any part of the charge is consolidated by agglomerating, compacting, indurating, or sintering (e.g., pelletized ore, flux, or reductant, etc.)

PROCESSES
.Producing or treating free metal
..At 300 degrees C or greater (e.g., pyrometallurgy, etc.)
...Iron(Fe)
....Reduction in rotary kiln
.....Introducing solid reductant into rotary kiln
480 ......Reducible Iron(Fe) compound and solid reductant fed through same end of rotary kiln
481 ....Mixed prior to charging
482 .....With generation of gaseous reductant outside rotary kiln
483 ....Superposed multiple hearth reduction
484 ....Moving furnace or hearth (e.g., moving belt, etc.)
485 .....Reduction in molten state
486 ....Heating reduction zone by heat conducted through walls of zone
487 .....Shaft furnace
488 ....Reduction to metallic Iron(Fe) within shaft furnace
489 .....Externally supplied gas reductant
490 ......Solid Iron(Fe) produced within shaft furnace
491 ....With melting Iron(Fe) product outside shaft furnace
492 ....With gasification of solid carbonaceous material in melt (e.g., coal, etc.)
493 ....Using solid Carbon(C) to generate gas in separate furnace (e.g., Wiberg Process, etc.)
494 ....Solid Carbon(C) is coal
495 ....Direct addition of gas containing gaseous Oxygen or water to shaft furnace (e.g., continuous Hyl process, etc.)
496 ....With reformation of reducing gas in separate furnace (e.g., Midrex process, etc.)
497 ....With plural reformers (e.g., Purofer process, etc.)
498 ....With addition of steam to reformer (e.g., Armco process, etc.)
499 .....Molten Iron(Fe) produced in shaft furnace
500 ....Reduction in molten state
501 .....Gas injection below surface of melt
502 .....Gas injection over surface of melt (e.g., as in reverberatory furnace, etc.)
503 ....Reduction in presence of solid Carbon(C) containing material (e.g., coke, coal, carbides, etc.)
504 .....Including consolidation of solid Carbon(C) containing material with reducible Iron(Fe) compound
505 ....Reduction with externally applied gas (e.g., batch HyL process, etc.)
506 ....Reduction in the presence of liquid carbonaceous reductant (e.g., petroleum, pitch, etc.)
507 ....Melting Iron(Fe) or treating molten Iron
508 .....Vacuum treatment of molten Iron(Fe)
509 ......Free falling stream or spray of molten Iron(Fe)
510 ......Vacuum lift
511 ....With addition of gas
512 ......With addition of gas
513 .....In reverberatory furnace (e.g., open-hearth, Siemens-Martin, puddling, etc.)
514 ......With treating of molten Iron(Fe) with gas outside reverberatory furnace (e.g., in Bessemer converter, etc.)
515 ......With melting Iron(Fe) in shaft furnace
516 ......Using gaseous Oxygen in a higher concentration than in ambient air
517 ......With addition of solid elemental Carbon(C) or employing elemental Carbon furnace lining
518 ......With compound containing Alkali metal and Oxygen (e.g., Sodium nitrate, Sodium carbonate, etc.)
519 ......With Halogen or Halogen containing compound (e.g., Sodium chloride, Fluorspar, etc.)
520 ......With Alkaline earth metal or Magnesium(Mg) containing compound
521 ......With Transition metal compound
522 ....Iron oxide
523 ......Melting solid Iron(Fe)
524 .....Sequential treatment of molten Iron(Fe) in plural apparatus with different linings (e.g., acid Bessemer followed by basic Bessemer, etc.)
525 .....Impinging free falling molten metal stream or spray with a gas or solid agent or spraying (e.g., atomizing, etc.) of molten metal
526 .....Adding solid treating agent in form of wire, rod, or article with surface feature or in container or by plunging means
527 .....In rotary kiln (e.g., Kaldo process, etc.)
528 .....Injecting gas or nonmetalliferous liquid which gasifies into, onto, or through premelted Iron(Fe) or slag layer thereon
529 ......With hydrocarbon liquid or gas present
530 ....And hydrocarbon in surrounding relationship to gaseous Oxygen (e.g., hydrocarbon in outer concentric tube, etc.)
531 ......And adding solid agent, slag, or flux to premelted Iron(Fe) or slag layer thereon
532 ....Loose elemental Carbon(C), coal, or coke (e.g., carburizing, etc.)
533 ....With solid entrained in gas or injected by gas pressure
534 ....Boron(B) or compound thereof used in process
535 ....Metal halide used in process
536 ....Carbide used in process
537 ....Elemental metal or elemental Silicon(Si) used in process
538 ....Iron(Fe) containing compound used in process
539 ....Alkali metal compound or Alkaline earth metal compound used in process
540 ....Gas contains gaseous Oxygen
541 ....Metal halide
542 ....Carbide
543 ....Elemental metal or elemental Silicon(Si)

PROCESSES
.Producing or treating free metal
..At 300 degrees C or greater (e.g., pyrometallurgy, etc.)
...Iron(Fe)
....Melting Iron(Fe) or treating molten Iron
.....Injecting gas or nonmetalliferous liquid which gasifies into, onto, or through premelted Iron(Fe) or slag layer thereon
......And adding solid agent, slag, or flux to premelted Iron(Fe) or slag layer thereon
.......Gas contains gaseous Oxygen
544 ....Iron(Fe) containing compound
545 ....Alkali metal compound or Alkaline earth metal compound
546 ....Noble gas or inert gas not otherwise identified
547 ....Gas compound containing Oxygen (e.g., Carbon monoxide, Carbon dioxide, Water, etc.)
548 ......Gas contains gaseous Oxygen
549 ....With treatment of exhaust gas
550 ....And adding gaseous Oxygen or inert gas to exhaust gas
551 ....Injecting from above and below melt surface
552 ....Including other gas from below
553 ....Injecting only from above melt surface
554 ....Including other gas from above
555 ....Including other gas from below
556 ....Injecting only from below mel surface
557 ....Including other gas from below
558 ......Noble gas or inert gas not otherwise identified
559 ......Gas compound containing Oxygen (e.g., Carbon monoxide, Carbon dioxide, Water, etc.)
560 .....Treating premelted Iron(Fe) or slag layer thereon by adding solid agent, slag, or flux
561 ......Loose elemental Carbon(C), coal, or coke (e.g., carburizing, etc.)
562 ......Sulfur(S) or compound thereof
563 ......Nitrate, Chlorate, Permanganate, or Peroxide
564 ......Boron(B) or compound thereof
565 ......Metal halide
566 ......Carbide
567 ......Elemental metal or elemental Silicon(Si)
568 ....Aluminum(Al) or Magnesium(Mg)
569 ......Iron(Fe) containing compound
570 ......Alkali metal compound or Alkaline earth metal compound
571 .....Melting solid Iron(Fe)
572 ......Melting packaged Iron(Fe) or Iron of specified structure to facilitate melting (e.g., shaped bale of scrap, etc.)
573 ......In shaft furnace (e.g., cupola, etc.)
574 ....Without the use of solid, carbonaceous material (e.g., without coke, etc.)
575 ....Using Oxygen in a higher concentration than ambient air
576 ....Using both a solid, carbonaceous fuel (e.g., coke, etc.) and a fluid fuel (e.g., natural gas, etc.)
577 ....Defined composition of solid fuel other than nominal "coke"
578 ....With Calcium carbide
579 ....With Alkali metal compound
580 ......In closed vessel with heat conducted through walls only (e.g., crucible melting, etc.)
581 ......Melting scrap
582 .....Separating slag from molten Iron(Fe)
583 .....Stirring or agitating molten Iron(Fe)
584 .....Pouring or tapping molten Iron(Fe)
585 ...Nonferrous
586 ....Concurrent production of Nonferrous metal and other desired nonmetallic product (e.g., cement, etc.)
587 ....Countercurrent liquid-liquid extraction of molten Nonferrous metal
588 ....Fractionation of molten Nonferrous metal (e.g., with reflux, etc.)
589 ....Alkali metal, singly or in combination
590 .....Vaporizing or condensing
591 ......Cesium(Cs)
592 .....Precipitation impurities from molten Alkali metal
593 ....Beryllium(Be)
594 ....Magnesium(Mg)
595 .....Vaporizing or condensing
596 ......Reduction
597 ....Using metal or metal compound reductant
598 ....And Carbon(C)
599 ....Using Carbon(C)
600 .....Treating molten Magnesium(Mg)
601 ......Precipitating impurities from molten Magnesium(Mg)
602 ......Adding gas
603 ....And solid
604 ......Adding solid
605 ....Alkaline earth metal, singly or in combination
606 .....Reducing halide
607 .....Vaporizing or condensing
608 ......Reduction
609 .....Treating molten Alkaline earth metal
610 ....Rare earth metal, singly or in combination
611 ....Refractory metal, singly or in combination
612 .....Titanium(Ti), Zirconium(Zr), or Hafnium(Hf), singly or in combination
613 ......Reduction
614 ....Using free metal or alloy reductant
615 ....Of Titanium(Ti), Zirconium(Zr), or Hafnium(Hf), compound containing Halogen
616 ....Of binary halide- MX(4)
617 ....Of chloride - MC1(4)
618 ....Free metal or alloy reductant contains Magnesium(Mg)
619 ....Metal produced is Titanium(Ti)
620 ....Of Titanium(Ti), Zirconium(Zr), or Hafnium(Hf) compound containing Halogen
621 ......Treating molten Titanium(Ti), Zirconium(Zr), or Hafnium(Hf)

PROCESSES
.Producing or treating free metal
..At 300 degrees C or greater (e.g., pyrometallurgy, etc.)
...Nonferrous
....Refractory metal, singly or in combination
622 .....Vanadium(V), Niobium(Nb) or Columbium(Cb), or Tantalum(Ta), singly or in combination
623 .....Chromium(Cr), Molybdenum(Mo), or Tungsten(W), singly or in combination
624 ....Manganese(Mn)
625 .....Reduction
626 ....Cobalt(Co)
627 .....Reduction
628 ....Nickel(Ni)
629 .....Reduction
630 ......Segregation process
631 ....Noble metal, singly or in combination
632 .....Palladium(Pd)
633 .....Platinum(Pt)
634 .....Silver(Ag)
635 ......Recovering Silver(Ag) from photographic material
636 ......Reduction
637 .....Gold(Au)
638 ....Copper(Cu)
639 .....Treating material in gaseous suspension
640 .....Treating slag or dross
641 .....Reduction
642 ......Segregation process
643 ......Treating matte or sulfide
644 ....Treating waste gas
645 ....With prior production of matte or sulfide
646 .....Treating molten Copper(Cu)
647 ......By vacuum
648 ......Adding gas
649 ....Containing gaseous Oxygen
650 ....And adding solid
651 ....And solid
652 ......Adding solid
653 .....Melting Copper(Cu) in shaft furnace
654 ....Zinc(Zn)
655 .....Treating slag or dross
656 .....Reduction
657 ......Using Halogen containing material
658 ......Vaporizing or condensing
659 ....Treating material in gaseous suspension
660 ....Treating material in blast furnace or cupola
661 ....Treating material in vertical retort
662 ....Treating material in rotary kiln
663 .....Treating molten or vaporous Zinc(Zn)
664 ......Using Halogen containing material
665 ......Vaporizing or condensing
666 ....Condensing with Lead(Pb) coolant
667 ....Condensing with use of molten metal slinger
668 ....Cadmium(Cd)
669 .....Vaporizing or condensing
670 ....Mercury(Hg)
671 ....Aluminum(Al)
672 .....Treating slag or dross
673 .....Reduction
674 ......Carbothermic
675 ......Decomposition of organo-compound containing Aluminum(Al)
676 ......Of Aluminum(Al) halide
677 ....Of subhalide
678 .....Treating molten Aluminum(Al)
679 ......Fractional crystallization
680 ......Adding gas
681 ....Containing Halogen atom
682 ....And adding solid
683 ....And solid
684 ......Adding solid
685 ....Containing Halogen
686 .....Melting Aluminum(Al)
687 ......Scrap
688 ....Gallium(Ga) or Indium(In)
689 ....Germanium(Ge)
690 ....Tin(Sn)
691 .....Reduction
692 ......Of Halogen containing material
693 ....Lead(Pb)
694 .....Treating material in gaseous suspension or gaseous state
695 .....Reduction
696 ......Of Lead-Sulfur compound
697 .....Treating molten Lead(Pb)
698 ......By vacuum
699 ......Adding gas
700 ....Containing Halogen atom
701 ......Adding solid
702 ....Containing free metal
703 ....Antimony(Sb)
704 .....Reduction
705 ....Bismuth(Bi)
706 ....Arsenic(As)
707 ...Reducing or smelting unnamed ore
708 ...Stirring or agitating of molten material
709 ...Covering the surface of molten metal
710 ..Below 300 degrees C
711 ...Using nonmetallic material which is liquid under standard conditions (e.g., hydrometallurgy, etc.)
712 ....Involving mining or in situ operation
713 ....From photography material
714 ....From electrolytic or cementation slime
715 ....Removing coating to recover free metal from substrate or coating
716 .....From Tin(Sn) scrap or Tin plate
717 ....Reducing to free metal with gas
718 .....Copper (Cu) recovered as free metal
719 ......Using Sulfur dioxide
720 .....Noble metal recovered as free metal
721 ....Utilizing organic reducing agent
722 ....Involving organic compound containing metal or organic agent for agglomerating metal
723 .....Natural or synthetic polymer
724 ....Displacing by another metal (i.e., electromotive series)
725 .....Lead(Pb) or Zinc(Zn) recovered as free metal
726 .....Copper(Cu) recovered as free metal
727 ......And flotation
728 ......And injecting or pressurizing with air or Oxygen
729 ......From Cyanide solution
730 ......With agitating or abrading
731 ......Utilizing leaching agent containing Sulfur(S)
732 .....Noble metal recovered as free metal
733 ......Silver(Ag) recovered as free metal
734 ....And injecting or pressurizing with air or Oxygen
735 ....From Cyanide solution
736 ......Gold(Au) recovered as free metal
737 ....From Cyanide solution

PROCESSES
.Producing or treating free metal
..Below 300 degrees C
...Using nonmetallic material which is liquid under standard conditions (e.g., hydrometallurgy, etc.)
....Displacing by another metal (i.e., electromotive series)
738 .....Nickel(Ni) or Cobalt(Co) recovered as free metal
739 ....Utilizing chemical agent to precipitate free metal
740 .....Copper(Cu) recovered as free metal
741 .....Noble metal recovered as free metal
742 ....Cleaning, leaching, or dissolving of Mercury(Hg)
743 ....With leaching or dissolving
744 .....Noble metal recovered as free metal
745 ...Alkali metal, singly or in combination
746 .Consolidating metalliferous material (e.g., ore, tailings, flue dust, fluxes, etc.) by agglomerating, compacting, or heat treating; preparatory process therefore; or treating consolidated material therefrom
747 ..Noble metal containing metalliferous material
748 ..With vaporization of impurity as metal halide
749 ..With physical separation or classification of solids
750 ...By sifting
751 ..With heat treatment (e.g., calcinating, fusing, indurating, roasting, sintering, vaporizing, etc.)
752 ...Vaporizing metalliferous impurity
753 ...With leaching, dissolving, or washing
754 ...By suspension (e.g., fluid bed, cyclone, etc.)
755 ...On moving grate, moving pallet, or endless belt
756 ....Using multi-layers
757 ....With gas recycling or reusing
758 ....Sintering
759 .....Of consolidated starting material
760 ...In shaft furnace or multi-hearth furnace
761 ....Sintering
762 ...In rotary kiln
763 ....Sintering
764 ...Coking of binder or additive
765 ...Sintering or with agglomerating or compacting
766 ....With coal, coke, pitch, asphalt, or tar
767 ....With synthetic polymer, natural polymer, or carbohydrate
768 ....With Alkaline earth metal compound, clay, or hydrosetting agent
769 ....Sintering
770 ..Agglomerating or compacting
771 ...With coal, coke, pitch, asphalt, or tar
772 ...With synthetic polymer, natural polymer, or carbohydrate
773 ...With Alkaline earth metal compound, clay, or hydrosetting agent

337	...Pivoted pawl
338	..Rack and pawl means
339	..Coacting friction means
340	...Serrated surfaces
341	.With means to vary range limit(s) of jaw movement
342	.Jaw-actuating means (handle-manipulation conversion)
343	..With means to choose one of a plurality of actuator leverages
344	...Predetermined and discrete member of leverage selections
345	..Axial motion of handle-attached actuators(s)
346	..Pivotal motion about axis of parallel actuator rod(s)
347	..With means to articulate and/or slide both jaws
348	...With means for arcuate motion of both jaws
349	....Cam actuator
350	....Dual pivoted actuator levers
351	.....With jaws pivoted together
352	...With means for parallel movement of work-engaging surfaces
353	....Longitudinal guide means
354	....Lateral guide means
355	..With means for sliding jaw actuation
356	...With adjustment means
357	....Pivoted pawl type

	TOOL JAW(S) POSITIONED BY RELATIVELY MOVABLE PLURAL HANDLES (E.G., PLIERS)
	.Jaw-actuating means (handle-manipulation conversion)
	..With means for sliding jaw actuation
358	...Pinion and rack
359	...Claw lever and rack or notch
360	....Plural teeth on claw
361	...Grip lever and cam
362	...Grip lever and link
363	....Toggle link
364	..Including claw lever and rack or notch means
365	...With adjustment means
366	...Plural teeth on claw
367	..Including toggle means
368	...With toggle release
369	....By means acting on intermediate pivot
370	.....Release means carried by grip lever
371	......Mounted on intermediate pivot
372	...With means to limit movement of intermediate pivot
373	...With means for relative parallel movement of jaws
374	...With pitman between grip lever and intermediate pivot
375	...With toggle linkage and actuated jaw mounted on carrier
376	...With connecting rod between grip lever and actuated jaw
377	...With connecting rod between grip lever and handle member
378	....With actuated jaw pivoted on handle member
379	.....With means for resiliently biasing jaw and/or toggle
380	......Extension coil spring between jaw and handle member
381	..Including grip lever actuator and pivoted jaw (e.g., tandem levers)
382	...With adjustment means
383	...With link connecting jaw and grip lever
383.5	..Including cam actuator and pivoted jaw
384	..With adjustment means
385	.Adjustable relationship between jaw(s) and/or handle(s)
386	..By relative positioning of jaw(s) only
387	...Both jaws adjustable
388	...By threaded elements
389	....Rotatable screw type
390	....Rotatable nut type
391	...Maintained by detent and rack
392	...Maintained by locked interdigitated members
393	..By angular orientation of one handle portion relative to other
394	..By selection of pivot hole(s) in each handle
395	..By threaded adjustment means
396	...Worm and rack type
397	...Peripherally threaded handle manipulated for travel relative to other handle
398	...Threaded element travels relative to both handles
399	...Rotatable screw in nut
400	....Screw attached to joint
401	....Nut attached to joint
402	...Rotatable nut on screw
403	....Screw attached to joint
404	....Nut attached to joint
405	..By manipulation of pivot-carrying member
406	...With angular orientation of eccentric pivots joining handles
407	..By relative sliding or slipping of handles
408	...With fulcrum-carrying member
409	....With positive lock for member
409.5	....With spring urged lock for member
411	...With pivot pin fulcrum in notched slot
412	....With flattened cross section pin
413	...With toothed-member fulcrum on notched handle
414	...With opposed interdigitated concentric segmental annular portions
415	.Crossed handles
416	..Joint detail
417	..Resiliently urged
418	.Jaw features
419	..Tined or digitated jaws
420	..Jaws extend laterally beyond side edge plane of handle(s)
421	..Jaw attachment and/or inserts
422	...Selective
423	....By detachment
424	...Articulated
424.5	..Nonplanar jaw face
426	...And diversely shaped face
426.5	...Work conforming face
427	.Resiliently urged
427.5	.Handle
463	INCLUDING TOOL DRIVING BY IMPACT DELIVERING COMPONENT OR COOPERATING ANVIL
464	.Motor or gear driven
465	.Structurally constrained to arcuate movement
466	..About turning axis of work engaging portion
52	WRENCH, SCREWDRIVER, OR DRIVER THEREFOR
53.1	.With elongated hot line stick
53.11	..Globe manipulator
53.12	...Rotatable grasper
53.2	.Stud-removal and implacement
429	.Responsive to movement of work
467	.Responsive to torque on work
468	..With marking mechanism
469	..Means for regulating motor
470	...Fluid motor
471	..Permanently deformable component
472	..Relatively movable work contacting components
473	..Rotatable, coaxial, clutching components
474	...Having intermediate, disparate, interlock element
475	...Having complementary formations
476	...Having friction type contact surfaces
477	..Work engaging portion attached to and turned by resilient member
478	..Work engaging portion pivotally or rotatably connected to handle
479	..With electric signal device
480	..Axis of connection coaxial to rotational axis of work
481	....With arm extending from portion
482	....With pivoted locking pawl
483	...With arm extending from portion and through connection
54	.Machine
55	..Bolt-holding
56	...Gear-operated
57	..Gear-operated
57.11	...With motor
57.12	....Oblique angle drive
57.13	....Right angle drive
57.14	....Parallel axis drive
57.15	...Round work
57.16	....With additional work-engaging means
57.17	....Flexible jaw

	WRENCH, SCREWDRIVER, OR DRIVER THEREFOR
	.Machine
	..Gear-operated
	...Round work
57.18	....Cam-operated jaw
57.19	....Fluid-operated jaw
57.2	....Pivoted jaw
57.21	....Sliding jaw
57.22	...Multiple drive or driven means
57.23	....With magazine
57.24	...With support
57.25	....Vehicular
57.26	...Adjustable angle drive
57.27	....Flexible shaft
57.28	...Oblique angle drive
57.29	...Right angle drive
57.3	...Parallel axis drive
57.31	...Common axis drive
57.32	..Double or duplex
57.33	..Round work
57.34	...With additional work-engaging means
57.35	...With support
57.36	..Multiple work-engaging means
57.37	..With feed or magazine means
430	...Utilizing fluid to convey work
431	...Including chute having longitudinal axis collinear with rotational axis of work turning portion
432	...Including vibratory work supporting member
433	...Including revolvably driven work contacting member
434	...Including driven, flexible, work supporting strip
435	...Including driven, reciprocating, conveying member
57.38	..With tensioning means
57.39	..Step by step
57.4	..With support
57.41	...Vehicular
57.42	..Direct drive
57.43	...Flexible
57.44	...Fluid
57.45	...Oblique angle
57.46	...Tangential engagement
57.5	.Turret head
74	.Wheel or endless track operated
75	..Hub-rim grasp
76	...Internal
58	.Handle clutched to head
58.1	..With additional head-turning means
58.2	..Radially slotted or open end head
58.3	..Axially movable clutching parts
58.4	..Positive two-way drive (e.g., dog clutch)
58.5	..Radially extending eccentrically movable handle
59.1	..Ball or roller wedge
60	..One-way detent drive, e.g., ratchet
61	...Pivoted pawl
62	....Reversing
63	.....Single
63.1	...Reversing
63.2	....Single pawl
436	.Having work engaging and force exerting portion inserted into cavity (e.g., allen wrench, screwdriver)
437	..Combined with or usable as diverse type wrench
438	..Having structure adapting portion or tool for separation
439	..Including discrete, separately usable inserted portions
440	...Pivotally or rotatably mounted
441	..Inserted portion cuts into or deforms cavity
442	..Inserted portion having relatively movable components
443	...Having camming or wedging element for moving components
444	....Axially shiftable element located between and wedging against components
445	.....With threaded surface for cooperating with mating tool structure
446	....Rotatable element located between and camming against components
447	...Having cooperating threaded element type actuating means
448	...Having resilient or spring biased component
449	....Biased component rotated about axis collinear to rotational axis of tool
450	..Inserted portion mounted to pivot or swivel relative to longitudinal axis of handle
451	..With separate means for guiding or gripping work
452	...Having resilient, relatively movable, work gripping members
453	....With camming or wedging element for moving members
454	...Having pivoted, relatively movable, work gripping members
455	....With camming or wedging element for moving members
456	...Having member with work underlying portion
457	....Member spring biased for axial movement
458	....Resilient member
459	..Inserted portion having threaded periphery
460	..Inserted portion having plural, noncollinear blades (e.g., Phillips)
461	..Inserted portion having plural, separate, work engaging projections
64	.Flexible
65	..Threaded adjustment
65.2	..Link
68	...Handle jaw
69	....Pivoted
70	....Duplex
65.4	...Toothed adjustment
73	.U-crank arm
77	.Double-ended, simultaneous adjustment
90.1	.Plural pivoted jaws and handle-lever
90.2	..Cam or gear operated
90.3	..Jaws enclose work
90.4	...Including latch to connect jaw to handle-lever
90.5	....At least three jaws enclose work
90.6	...Including latch to connect pivoted jaws
90.7	....At least three jaws enclose work
90.8	.....Two jaw pairs connected by latch
90.9	..Including means to adjust or to secure jaw in adjusted position
91.1	..Slidable pivot
91.2	..First jaw pivoted directly to handle and to second jaw
91.3	..Two jaws pivoted directly to intermediate member
92	.Pivoted inner jaw
93	..Nut or screw fulcrum
94	..Pin fulcrum
95	...Roller jaw
96	....Pinion
97	...Spring-pressed
	.Pivoted outer jaw
	..Fixed fulcrum
98	...Nontraveling jaw
99	....Spring-pressed
100	...Traveling jaw

161	.....Traveling nut
162	.....Traveling screw, shank rack
163	...Right and left threads
164	...Rotatable threaded handle shank
165	...Sliding side jaw
	...Nontraveling rotatable nut
166	....Intermediate
167	.....Causing outer jaw to slide
168	....Terminal
169	.....Causing outer jaw to slide
170	...Nontraveling rotatable screw
171	....Bracket-bearing
172	....Spiral groove engaged by slidable actuator
173	...Traveling and rotating nut
174	....Threaded handlebar
175	...Traveling and rotating screw
176	....Shank rack
176.1	.Spanner
176.15	..Having means to engdage work axially

176.2	...And means to engage peripheral face of work
176.3	..Having relatively movable jaws
119	.Rigid jaws
120	..Round work
121.1	..Enclosed (e.g., socket)
122	...Watch and clock keys
123	....Dust protectors
124.1	...With nut ejectors
125	...Work-holding
124.2	...Slotted socket
124.3	...Through socket and perpendicular handle
124.4	...Plural sockets
124.5	....Slidably or pivotally connected to handle or each other
124.6	...Having axial opening for removable handle
124.7	...Having perpendicular handle
125.1	..Double-ended
177.1	.Handle or shank
177.8	..Angularly adjustable handle
177.9	...With yieldable one-way detent
177.2	..Extensible handle or handle extension
177.3	..Having finger opening
177.4	..Having means to store parts
177.5	..Having terminal cross arm
177.6	..Foldable or flexible
177.7	..Having pivoted handle section
177.75	...Universal joint
177.85	..Including socket and boss type connecting means
178	.Reversible jaws
179	.Sliding jaw face
462	.Having stationary structure for supporting wrench or screwdriver
180.1	.Attachment, or including adjunct or replaceable portion
181	..Cutters
182	...Rotary
183	..Roller clutch
184	..Shank-embracing
185	..Socket reducers
185.1	..Removable jaw face
185.2	..Movably mounted
186	.Jaw faces
19	DEFORMABLE HEAD MALLET
20	HAMMER
21	.Having work protector surrounding face
22	.Having shock absorbing means
23	.Having nail placer
24	..Magnetic
25	.Having replaceable striking face
26	.Having plural striking faces
27	.Rod encircling type
28	BIT STOCK HAVING MANUAL DRIVE MEANS (E.G.,BRACE)
29	.Having ratchet mechanism
30	..Straight crank arm
31	..Adjustable pawl
32	..Pivoted pawl
33	..Sliding pawl
34	.Straight stock having side driving gear
35	.Having U-shaped crank arm
36	..Speeding gear
37	..Bit shaft inclined relative to crank
484	FOR ADJUSTING VARIABLE POSITIONED PARTS
485	SPREADER
486	RESILIENT ARTICLE TENSIONER OR COMPRESSOR
489	HANDLE FOR TOOL
490	.Having storage compartment
491	.Having discrete relatively movable tool clamp
492	.Having cap or reinforcing means
487	HAND HELD HOLDER OR HAVING CLAMP

DECEMBER 1990

1.11	PROCESS OF TURNING
1.12	TALKING MACHINE TABLET
1.2	RADIALLY MOVING ROTATING TOOL INSIDE BORE
1.3	.Forming non-circular bore
1.4	.Tool simultaneously moving axially
1.5	..Pivoted to tool-carrier
18	PATTERN SECTION
19	.Cam-controlled cutter
11	AXIAL PATTERN
11.1	.Having transverse tool and templet guide
11.2	..With workpiece guage
11.3	..Having electrical actuator
11.4	...And hydraulic actuator
11.5	..Having hydraulic actuator
12	.Pivoted tool rest
13	.Profiled cutter
	TAPERS
15	.Offset work axis
	.Transversely shifted cutter
17	..Templet controlled
16	..Gear controlled
46	SEVERING OR CUT-OFF
47	.Processes
48	.Automatic and/or triggered control
49	.Combined with means to sharpen tool(s)
50	.Combined with means to apply fluid
51	.Combined with means to heat tool and/or work
52	.With dust or chip handling
53	.Including scrap cutting means
53.1	.Flying cutter type
54	.Cutting couple straddling work
55	..With pattern, guide or cam means (noncircular product)
56	..Plural cutting means (pairs, or pair, plus single)
57	..Rotary shear pair
58	...Tool axes parallel to axis of work rotation
59	.Interrelated means for tool infeed and circumrotation
60	..Dependent upon reaction to work
61	..Infeed cam disk rotation geared to tool holder rotation
62	...Axial infeed cam
63	...Including centrifugal balancing means
64	...Scroll plate infeed cam
65	..Infeed cam plate braked with respect to tool(s) carrier plate
66	..Orbital cogwheel and fixed detent
67	..Common gear means
68	...Including adjustable means to vary gear speed
69	...With manual disconnect lever
70	..With means to feed work
70.1	.Infeed means
70.2	..With means to circumrotate tool(s) about work
71	...Fluid means for relative tool actuation
72	...Gear means for tool actuation
73	....Including axial cam
74	.....With indicator
75	...Bell crank linkage for tool(s) holder
76	...Resilient means for tool actuation
77	....With means for manual retraction
78	..Hand crank for tool holder
79	..Power driven eccentric
80	...Fluid motor
81	...Plural tools
82	..Tool within work
83	..With means to rotate tool(s)
84	...Including rotatable cutters supporting work
85	...Planetating work mandrels
86	...Pivoted tool carriage
87	....With adjustable work stops
88	...Eccentric periphery rotary tool
89	...Means to feed work axially
90	...Translatable work support carriage
91	...With tool groove in support roll(s)
92	..Rotatable tool(s) driven by contact with work
93	...Axially movable tool support
94	....Freely floating parallel to axis
95	.....With supplemental nonrotative tool
96	....Including clutch control for work rotation
97	...Including resilient means urging work against rotary support
98	..Separate means for plural tools
99.1	..Spring urged
99.2	...For window shade
100	..Tool adjustment and/or stop
101	..With means to support and/or rotate work
102	..With means to feed work
103	LATHE FOR PULLEY
104	LATHE FOR WHEEL OR AXLE
105	.In situ lathe for railroad wheel
106	LATHE FOR CRANK OR CRANK PIN
107	.Portable lathe for crank pin
108	.Having work oscillator
109	..Having work driver
110	LATHE FOR SCREW CUTTING
111	.Having swinging feed nut and tool bar
112	PORTABLE LATHE FOR BRAKE DRUM, DISC, OR SHOE
113	PORTABLE LATHE FOR PIPE TURNING
114	PORTABLE LATHE FOR PISTON GROOVING
115	BENCH LATHE
116	.Watchmaker's lathe
117	LATHE
118	.With program control
119	..And transmission
120	..And tool turret
121	.With tool turret
122	.Vertical
123	.Having facing tool fed transverse to work
124	.With work feeder or remover
125	..Magazine type
126	...Bar feeder
127	..Bar feeder
128	.Portable
129	.Multiple
130	.Having hollow cutter head
131	.Revolvable cutter heads
132	.Carriage feed
133	..Control
134	...Electrical type
135	..Apron mechanism
136	...Feednut control
137	..Slide rest
138	...Multiple tool support
139	...Tool relief
140	..Change gears
141	..Feedscrews and rods
142	.Headstock
143	..Speed changing gear
144	...Speed change gears for maintaining constant cutting speed
145	..Spindle reverser
146	..Spindle or work angler
147	..Spindle and bearings
148	.Tailstock
149	.Bed
150	.Center
151	..Alignment adjuster
152	.Attachment
153	..Stop (e.g., carriage, tool, work, etc.)
154	...Tool slide
155	...Collet or spindle

	LATHE
	.Attachment
	..Stop (e.g., carriage, tool, work, etc.)
156	...Indexible (e.g., roll type, etc.)
157	.Tool and work rest
158	.Tool rest
159	..Turret type holder (e.g., multiple tools, etc.)
160	..Quick release tool or holder clamp
161	..Tool post
162	.Work rest
163	..With noise or vibration dampener
164	..Center rest
165	WORK DRIVER
166	.Lathe dog
167	..Cam grip
168	.Mandrel
169	..Expansible
170	CENTERER
171	DRILL PRESS ATTACHMENT FOR TURNING
172	ATTACHMENT FOR CUTTING A VALVE
173	MISCELLANEOUS

CLASS 83 CUTTING

861 OTHER THAN COMPLETELY THROUGH WORK THICKNESS OR THROUGH WORK PRESENTED
862 .Combined types of cutting
863 ..Including use of rotary scoring blade
864 ...Plural independent rotary scoring blades
865 ..With infeeding of work
866 .Pricking
867 ..Including use of orbiting tool carrier
868 ..With infeeding of tool
869 .Edge trimming (e.g., chamfering, etc.)
870 .Splitting
871 ..By use of endless band or chain knife
872 ..By use of rotary blade
873 ...Plural independent rotary blades
874 ..With infeeding of work
875 .Grooving
876 ..By use of plural independent rotary blades
877 ...Forming common groove
878 ...Blades turning about perpendicular axes
879 .Scoring
880 ..Processes
881 ..Active means to control depth of score
882 ..Serially
883 ..Plural independent scoring blades
884 ...Rotary scoring blades
885 ....On opposite sides of work
886 ..Rotary scoring blade
887 ...With means to rotate blade
13 PROCESSES
14 .With preparatory or simultaneous ancillary treatment of work
15 ..By heating or cooling
16 ...At localized area (e.g., line of separation)
17 ..By distorting within elastic limit
18 ...By stretching
19 ...By compressing
20 ...By flexing around or by tool
21 ....To conform to shape of tool
22 ..By fluid application
23 .With subsequent handling (i.e., of product)
24 ..By fluid application
25 ..By retaining or reinserting product in workpiece
26 ..By accelerating travel
27 ..By separating products from each other
28 ..By moving work support to which a tacky product is adhered
29 .Including stacking of plural workpieces
30 .Puncturing
31 .With manipulation of tool protective strip (e.g., backing strip)
32 .Cutting of interdigitating products
33 .Making and using a registration cut
34 .With reorientation of tool between cuts
35 .With reorientation of work between cuts
36 ..Relative to same tool
37 .During movement of work past flying cutter
38 ..Cyclically varying rate of tool or work movement
39 .Plural cutting steps
40 ..Blanking and cutting
41 ...Cutting to join blanked holes
42 ..Repetitive transverse severing from leading edge of work
43 ...Alternately forming products of less than total width of work
44 ...With longitudinal severing
45 ....Effected by plural steps
46 ....Along zigzag or undulant line or cut
47 ....Prior to transverse severing
48 ...Non-rectilinear cutting
49 ..Plural cutting steps effect progressive cut
50 ..Repetitive blanking
51 .Cutting part way through from opposite sides of work
52 .Effecting diverse or sequential cuts in same cutting step
53 .Cutting by direct application of fluent pressure to work
54 .Cutting wall of hollow work
55 .Blanking
56 .Cut advances across work surface
57 WITH MANUALLY ACTUATED MEANS TO DISTURB CYCLIC OPERATION
58 WITH RANDOMLY ACTUATED STOPPING MEANS
59 .With means to permit subsequent hand operation
60 .With stop-signal-responsive means to actuate auxiliary cutter
61 .With sensing of product or product handling means
62 .Responsive to tool detector or work-feed-means detector
62.1 ..Responsive to tool characteristic
63 .Responsive to work sensing means
64 ..Of buckled work
65 ...Running loop
66 ..Detector supported on or urged against work
67 ...Resiliently biased
68 .Manually operated
69 WITH STOPPING MEANS EFFECTIVE ON COMPLETION OF PREDETERMINED NUMBER OF TOOL CYCLES
70 WITH MEANS TO ACCOMPLISH DELAYED STOPPING AFTER CESSATION OF CYCLIC OPERATION
72 WITH MEANS TO MONITOR AND CONTROL OPERATION (E.G., SELF-REGULATING MEANS)
73 .Including means to monitor product
74 .Including means to correct the sensed operation
75 ..And modify another operation
75.5 ..Optimizing product from unique workpiece
76 .Including means to compensate tool speed for work-feed variations
76.1 WITH CONTROL MEANS RESPONSIVE TO REPLACEABLE OR SELECTABLE INFORMATION PROGRAM
76.2 .For cutting component of animal, e.g., hair clipper
76.3 .Removable element carries program
76.4 ..Indeterminate length web or strand
76.5 ...Magnetic
76.6 .Arithmetically determined program
76.7 ..With condition sensor
76.8 ...Responsive to work
76.9 ..With operator input means
77 WITH MEANS TO WEIGH PRODUCT
78 WITH PRODUCT HANDLING MEANS
79 .Initiated by means responsive to product or work
80 ..Responsive to work
81 .Initiated by means directly responsive to tool movement
82 ..In return motion of tool
83 .Including means to drape the product
84 .Including means to form or hold pile of product pieces
85 ..In nested relation
86 ..In stacked or packed relation
87 ...Stacker sweeps along product support
88 ...Including cut pieces overlapped on delivery means
89 ...And means to separate product portions

	WITH PRODUCT HANDLING MEANS
	.Including means to form or hold pile of product pieces
	..In stacked or packed relation
90	...Including means to move stack bodily
91	....By movement of stack holder
92	.....By timed relocation of holder along path of stack growth
92.1	......Interrelated adjustment of holder movement and work-feeder
93	...And means to resist stack movement
94	...Including means to deliver individual pieces to a stack holder
95	....With spindle to enter a hole or to make hole in product
96	....By face-engaging means to push product broadside into stacked relation
97	...Upon emergence from hollow cutter
98	.By fluid current
99	..Plural blasts directed against plural product pieces
100	..By suction means
101	.By brush means
102	.Including means to divert one portion of product from another
102	..By kerf entering guide
103	..Remaining or re-inserted product portion from base material
104	..Gravity type
105	..Deflecting guide
106	...Positionable gate in product flow path
107	..Diverging product movers
108	.Including means to replace product in base material after cutting
109	.Means to move, guide, or permit free fall or flight of product
110	..Means to move product at speed different from work speed
111	..Means to move product out of contact with tool
112	...With means to effect subsequent conveying or guiding
113	...Out of contact with a rotary tool
114	....Mover surrounds axis of tool rotation
115	....Mover mounted on rotary tool
116	.....For radial movement of product
117	......Resiliently mounted
118	....Mover is resiliently mounted
119	....Pivoted mover
120	.....And plural rotating tools
121	....Stationary mover
122	.....And plural rotating tools
123	...By ejector within a hollow cutter
124	....And means to strip the outer surface of a cutter
125	....Ejector operated with return stroke of cutter
126	....By means carried by cooperating cutter
127	....By cam-operated ejector
128	....By resiliently biased ejector
129	...Moving stripper timed with tool stroke
130	....And alternatively movable to or from operating position
131	....Latched stripper released by tool return
132	....Plural strippers operative upon plural tools
133	....Single stripper operative upon plural tools
134	....Spring arm stripper
135	....Linkage actuated
136	....Carried by moving tool element or its support
137	.....Fluid pressure actuated stripper
138	.....Stripper biased against product
139	......Elastomeric stripper contacting product
140	......By spring means
141	......By free weight of stripper
142	....Stripper biased against product
143	.....Spring biased stripper
144	...Manually operated stripper
145	...Stationary stripper
146	....Stripper encircles moving tool
147	..Blockable exit port
148	..Tool conforming member interposed between tool and work
149	..Including means to move, or resist movement of, cut pieces along delivery chute
150	..Active delivery means mounted on tool support
151	..Product mover including gripper means
152	...Suction gripper
153	...Reciprocating product handler
154	...Rotating or oscillating product handler
155	..Endless conveyer
155	...And means to remove product there-from
156	..Roller(s)
157	..Tiltable or withdrawable support
158	..Means to move product laterally
159	...Oscillating means
160	...Reciprocating means
161	..Means to move product in a non-rectilinear path
162	..Guide
163	...Abutment in path of product being moved by work feeder
164	...Product-diverting conduit in or from hollow tool
165	...Inclined conduit, chute or plane
166	...Abutment interposed in path of free fall or flight of product
167	WITH RECEPTACLE OR SUPPORT FOR CUT PRODUCT
168	WITH MEANS TO CLEAN WORK OR TOOL
169	WITH MEANS TO APPLY TRANSIENT NONPROPELLANT FLUENT MATERIAL TO TOOL OR WORK
170	WITH MEANS TO CONTROL OR MODIFY TEMPERATURE OF APPARATUS OR WORK
171	.Of tool
174	WITH TOOL SHARPENER OR SMOOTHER
174	.Spatially-fixed tool
175	WITH MEANS TO STRETCH WORK TEMPORARILY
176	WITH MEANS TO DEFORM WORK TEMPORARILY
177	BY FLUID BLAST AND/OR SUCTION
178	BY TOOL INSIDE HOLLOW WORK
179	.Work pre-packed with internal tool(s)
180	.With expanding mandrel
181	.Interrelated tool feed means and means to actuate work immobilizer
182	..Actuated clamp element and work holder coact to position work
183	.Synchronized tool and work feeding means
184	.With means to position tool(s) for cutting
185	.One tool (either internal or external) having compound motion
186	..Annulus and disc type tool pair
187	.One tool having unidirectional rotary motion
188	.One tool having only rectilinear motion(s)
189	..Annulus and disc type tool pair
190	...A tool has a sequence of motion in plural paths
191	..Internal tool is an active cutter

BY TOOL INSIDE HOLLOW WORK
.One tool having only rectilinear motion(s)
192 ..Multiple external active tools
193 ...Tools operate in a substantially common transverse plane of cut
194 ....With tool actuating cams on a common support
195 .With manually actuated means to position, or facilitate positioning of work
196 BY MEANS TO MISALIGN ALIGNED APERTURED TOOLS
197 .Combined with another type tool of the class
198 .Rectilinear relative movement only
199 .Rotary relative movement solely about a single pivot
200 ..With plural apertures in one or both carriers
200.1 BY INCREASED TENSIONING OF WORK-ENCLOSING WIRE
202 TOOL ENGAGES WORK DURING DWELL OF INTERMITTENT WORKFEED
203 .Unicyclic
204 ..Convertible to and from unicyclic
205 ..Controlled by mechanical means
206 .With work-moving clamp jaw
207 .Work moved solely by movable abutment
208 .Operation initiated by work-driven detector means to measure work length
209 .Work-sensing means to control work-moving or work-stopping means
210 ..With means to initiate tool feed by same control impulse
211 .Work-sensing means to initiate tool feed
212 ..With work-stopping abutment in sensing means
212.1 .Plural tools at same station, one positioned for continuous engagement with work
213 .Plural tools successively actuated at same station
214 ..During one dwell period
215 .Tool has motion additional to cutting stroke during tool cycle
216 ..Tool has additional motion during work dwell
217 ...Included in plural cutting cycles
218 ..Tool has work feeding motion
219 .With variable direction of work feed from cycle to cycle
220 ..In one of certain selected directions
221 .Interlock between tool actuating and work feed means
222 .Tool motion initiates work feed and vice versa
223 .Stored energy means for moving work or tool, loaded by tool or work
224 ..Work feed means actuates energy storage device for tool
225 .Work feed means controlled by means mounted on tool or tool support
226 ..Such means drives the work feed means
227 ...Work feed means carried by tool or tool support
228 ...With supplemental work feed means
229 ...On return stroke of tool
230 ..Work feed means halted by means on tool or tool support
231 .Work feed mechanism in non-feed motion effects or initiates tool actuation
232 ..By striking tool actuator
233 ...Non-feed motion is reverse to feed motion
234 .With means to vary number of work-feed increments between tool strokes
235 .Dwell caused by imposing reverse motion on portion of flexible moving work
236 .With uninterrupted flow of work from supply source
237 .Work feed increment shorter than longitudinal tool field
238 .Unequal work feed increments in recurring series
239 ..Work carriage carries ratchet means to determine increments
240 .Means to change tool position, or length or datum position of work- or tool-feed increment
241 ..With means to vary magnitude of work-feed increment
242 ...Multi-increment type (e.g., ticket-issuing)
243 ....Length selector initiates machine operation
244 ...By change in length of one member of feed driving linkage
245 ....Rotating member
246 ...By change of effective shape of driving or driven surface of element of work-feed mechanism
247 ...By adjustment of fixed stop
248 ..With means to vary magnitude or base position of tool stroke
249 .With means to facilitate manual repositioning (shift) of work
250 .With means to produce plurality of work-feed increments per tool cycle
251 ..Including supplemental work-feed means
252 ...Manual
253 ...With stop adapted to engage abutment surface on work
254 ....Plurality of work stops successively effective
255 .Work fed successively to plural tools
256 ..With change of direction between tools
257 .Work advance occurs during return stroke of tool
258 .Dwell defined only by "dead-center" of rotating crank
259 .Dwell initiated by disengagement of surface of moving frictional feed means from work
260 ..Feed means has interrupted frictional surface
261 ..Feed means has rotary motion
262 .Dwell caused by clamping or blocking work during continuous operation of feed means
263 .With means to control magnitude of work-feed increment or work acceleration
264 ..Means to prevent random or excessive work feeds
265 ..Full-stroke required of feed means
266 .Work feed functions as tool support
267 .With rotary work-carrier
268 .With abutment to position work being fed with respect to cutter
269 ..With slip between positioned work and feed means
270 .Work guide and feed means have open side
271 .Work feed means modified to maintain clearance from tool
272 .Plurality of work feed means in separate paths
273 .Intermittent drive type of gearing for work-feed means
274 ..Gearing modified to lock the work-feed means
275 ..Mutilated gear in mesh with gear driving work-feed means

TOOL ENGAGES WORK DURING DWELL OF INTERMITTENT WORKFEED
276 .Work-feed element contacts and moves with work
277 ..Comprises a work-moving gripper
278 ..Comprises element entering aperture in, or engaging abutment surface on, work
279 .With means to guide, position, or present work to work-feed means
280 ..Means to transport work to work-feed means
281 ...Including means to pick articles from pack or stack
282 .With means to clamp work during dwell
283 .One-revolution clutch in tool drive
284 CUTTING MOTION OF TOOL HAS COMPONENT IN DIRECTION OF MOVING WORK
285 .With means to initiate intermittent tool action
286 ..Tool moved in response to work-sensing means
287 ...With means to vary "length" of product
288 ....To vary an end-product "length" (e.g., "crop cut")
289 ...With photo-electric work-sensing means
290 ...With trip-switch work-sensing means
291 ....To initiate feed movement of tool
292 .....And to initiate flying movement of tool
293 ...With work-responsive means to initiate flying movement of tool
294 ....With flying work-gripper means related to tool carrier
295 ....With means controlling flying speed dependent on work speed
296 ..With means to vary frequency of initiation
297 ...By orbitally traveling trigger pin(s)
298 .Interrelated control of tool and work-feed drives
299 .With means to concurrently adjust flying frequency and retain flying speed of tool
300 .Plural diverse flying cutters
301 .Combined with other type cutter
302 ..With slitter
303 .Plural separately mounted flying cutters
304 .With means to render cutter pass(es) ineffective
305 ..With means to produce "mis-cut"
306 .Oscillating work shifter adjacent cutter
307 ..Work actuated senser initiates shifter
307.1 .Wire tool
307.2 ..On tool support having reciprocation parallel to direction of work-feed
307.3 ...And rotation about axis parallel to direction of work-feed
308 .Tool flies by engagement with the work
309 ..Tool merely flexes with moving work
310 .Flying support or guide for work
311 .With tool speed regulator
312 .With work feed speed regulator
313 ..With means to vary cyclically speed of work
314 .Spring return of tool in counter-fly direction
315 .Tool mounted on oscillating standard
316 ..Both tools of couple on single standard
317 ...One tool swings out of work path on return stroke
318 .Tool carrier shuttles rectilinearly parallel to direction of work feed
319 ..Including means to secure work to carrier
320 ..Both members of cutting pair on same carrier
321 .Orbital motion of cutting blade
322 ..Work feeder mounted on tool support
323 ...Gripper type feeder
324 ..Tool speed varied within each orbital cycle
325 ..Work feed gripper carried on endless belt
326 ..Endless belt or chain tool carrier
327 ..Constantly oriented tool with arcuate cutting path
328 ...Cutting couple type
329 ..Rotatable-disc type tool on orbiting axis
330 ...Idling disc
331 ..Rotary tool
332 ...Segmented disc slitting or slotting tool
333 ...With undulant cutting edge (e.g., "pinking" tool)
334 ...Single tool action drive
335 ....With one-revolution drive
336 ...With loop former preceding tool
337 ...Compound movement of tool during tool cycle
338 ....Axial reciprocation of tool
339 ...Interconnected work feeder and tool driver
340 ...Side cutting helical blade
341 ...With means to cause progressive transverse cutting
342 ....With helical cutter blade
343 ...With cooperating rotary cutter or back-up
344 ....Cooperating tool axes adjustable relative to each other
345 ....With radial overlap of the cutting members
346 ....With anvil back-up
347 .....With resilient anvil surface
348 ....Resiliently urged cutter or anvil member
349 ...With cooperating stationary tool
350 CUTTER WITH TIMED STROKE RELATIVE TO MOVING WORK
351 .Work swings about progressively cutting tool during tool stroke
352 .Tool actuated by movable work support
353 .Traveling cutter
354 .With means to vary timing of tool feed
355 .Uniform periodic tool actuation
356 ..With periodic lateral feed of tool or work
356.1 ..With plural tool stations
356.2 ..Reciprocating tool
356.3 ..With plural tools on a single tool support
357 .With plural tool stations
358 OPERATION CONTROLLED BY MEANS RESPONSIVE TO PRODUCT
359 .Actuation of tool controlled
360 OPERATION CONTROLLED BY DETECTOR MEANS RESPONSIVE TO WORK
361 .With means to control work-responsive signal system
362 ..To delay response to work-senser
363 ..To change length of product
364 .With plural work-sensing means
365 .With photo-electric work-sensing means
366 .Release of interlock controlled
367 .Movement of work controlled
368 .Positioning of tool controlled
369 .Actuation of tool controlled by work-driven means to measure work length

	OPERATION CONTROLLED BY DETECTOR MEANS RESPONSIVE TO WORK
370	.Actuation of tool controlled in response to work-sensing means
371	..Sensing means responsive to work indicium or irregularity
372	..With trip-switch in work-sensing mechanism
373	INTERRELATED TOOL ACTUATING AND WORK GUIDE MOVING MEANS
374	INTERRELATED TOOL ACTUATING MEANS AND MEANS TO ACTUATE WORK IMMOBILIZER
375	.Work clamp
376	..Tool deflected by guide on tightened clamp
377	...With means to control clamping force
378	..Clamp driven by reaction from tool force
379	..With means providing for plural steps in clamping stroke
380	..With sequencing means
381	..With provision for manual control of clamp
382	..Tool or tool support on movable clamp jaw
383	..Clamp moved by direct impact of tool or tool support
384	...Clamp retracted by impact of tool or tool support
385	..Clamp actuating means driven by tool or tool support
386	...Clamp yieldably driven by tool or tool support
387	....With resilient drive element
388	..Clamp driven by yieldable means
389	...Drive means is resilient
390	...Fluid pressure yieldable drive means
391	.Work-stop abutment
392	..Oppositely effective abutments
393	..With cyclic means to alter work-stopping position
394	..Stop partakes of tool motion
395	...Carried by tool or tool support
396	INTERRELATED TOOL ACTUATING MEANS AND MEANS TO ACTUATE WORK-MOVER STOP
397	INTERRELATED TOOL ACTUATING MEANS AND GUARD MEANS
397.1	.Work guard
398	.Cutter guide slot closer
399	OPERATION OF MEMBER CONTROLLED BY MEANS RESPONSIVE TO POSITION OF ELEMENT REMOTE FROM MEMBER (E.G., INTERLOCK)
400	.With means to initiate operation of member
401	WITH MEANS TO CONVEY WORK RELATIVE TO TOOL STATION
402	.By fluid current
403	.Centrifugal feed to tangential tool (e.g., "Beria" type)
403.1	.With means to regulate work-feed speed
404	.Including means to move work from one tool station to another
404.1	..Tool stations angularly related
404.2	...Work manipulated between tool stations
404.3	...With static tool
404.4	..Tool stations staggered relative to one another
405	..Punch or die station
406	..Notcher or pinker station
406.1	..Work reciprocated past double-edge knife
407	..Slitter station
408	...And transverse cutter station
703	.Plural passes of diminishing work piece through tool station
704	..Work alternately, angularly re-oriented relative to tool station
705	...By additional means to engage work and orient it relative to tool station
706	...By roller or roll-like element
707	..Work rectilinearly reciprocated through tool station
708	...With means to cause or permit angular re-orientation of work about axis parallel to plane of cut
709	....By endless member having work-engaging teeth
710	....By member having work-engaging tooth
711	.....Including plural work-engaging teeth
712	......Fluid operated
713	...With means to cause movement of work transversely toward plane of cut
714	....By means to cause movement toward and away from plane of cut
715	.....Actuated by movement of a member on reciprocating means
716	.....Actuated by passive means which is external to reciprocating means
717	....By means to define increment of movement toward plane of cut
718	.....Interrelated with movement of reciprocating means
719	.....By pusher mechanism
720	......With additional work holding or positioning means
721	.......Work holding means includes actuator
722	......Including plural, simultaneously acting pusher elements
723	.......Independently adjustable
724	.......With additional means to retract elements
725	.......Power derived from movement of reciprocating means
726	.......Power derived from fluid pressure means
727	.......Movement by screw means
728	.......Movement by rack and pinion or pawl
729	......With handle
730	.....By carriage
731	...By cable or belt drive
732	.With means for transverse positioning of work on a moving conveyor
409	.With work-constraining means on work conveyer (i.e., "work-carrier")
409.1	..Plural means to constrain plural work pieces
409.2	...End of work protrudes through aperture in carrier
410	..With means to guide work-carrier in non-rectilinear path
410.7	...About axis fixed relative to tool station
410.8	....Infeed
410.9	.....About vertical axis
411.1	......Cut normal to axis
411.2	.......Work-guide tube
411.3	.....Cut normal to axis
411.4	......Oscillating work-carrier
411.5	......Multiple cutters
411.6	.......Coaxial rotary cutters
411.7	....Work stationary during cut
412	..With means to orient or position work carrier relative to tool station
413	...By pattern or templet
414	...By indexing means
415	..With additional work-locating means on work-carrier
416	.With means to stop work-conveyer
417	.With means to store work articles
418	.With additional mans to engage work and orient it relative to tool station

	WITH MEANS TO CONVEY WORK RELATIVE TO TOOL STATION
	.With additional mans to engage work and orient it relative to tool station
419	..By work-stopping abutment
420	..By opposed lateral guide means
421	..With means to adjust additional means
422	.With means to press work to work-carrier
423	.With projections on work-carrier (e.g., pin wheel)
424	.Tool between tandem-arranged work carrying means
425	.Cut made parallel to direction of and during work movement
425.1	..Including non-concurrently acting tool
425.2	..Including plural, laterally spaced tools
425.3	...Tools mounted on common tool support
425.4	....Tools axially shiftable on support
426	..Interrelated work-conveying and tool-moving means
427	...With reciprocating tool (e.g., "jigsaw" type)
428	...With means to move tool laterally of feed direction during cutting
429	...With means to effect difference between work-speed and tool-speed
430	...Tool co-axial with work-conveying means
431	..With means to press work to tool
432	..Bevel-cutting tool
433	..Tool shiftable relative to work-conveying means
434	..Tool in contact with surface of work-conveying means
435	..Tool between laterally-spaced work-conveying means
435.1	..By work moving carriage
435.2	..By work moving flexible chain or conveyor
436	.By feed-roller
437	.Rectilinear movement only
733	.Work carrier rotates about axis fixed relative to tool station
734	.Interrelated work-feeding means and tool-moving means
743	TOOL CARRIER OR GUIDE-AFFIXED TO WORK DURING CUTTING
744	.By flexible work-engaging member
745	.Entirely work-supported
746	BY TOOL RECIPROCABLE ALONG ELONGATED EDGE
747	.With means permitting tool to be rotatably adjusted about its cutting edge during cutting
748	.With dynamic balancing or shock absorbing means
749	.With tool of another type
750	.With means to change to other type tool
751	.Plural reciprocable tools
752	.Stored energy furnishes drive in one direction
753	.With tool in-feed
754	..And auxiliary means for promoting or retarding tool in-feed
755	...By yieldable means
756	...And means to vary tool in-feed speed
757	...With interrelated tool actuating and in-feed means
758	..Of rectilinearly reciprocating tool
759	...With in-feed by pivoting carrier
760	..And means to prevent tool in-feed
761	..With passive means to guide tool directly
762	...By plural opposed guide surfaces
763	....Having relative adjustment between guide surfaces
764	....With relative adjustment between guide and work or work-support
765	.....By or with additional movable work-support portion
766	.....By rotation about an axis parallel to the work-support surface
767	.....By rotation about an axis perpendicular to the work-support surface
768	..Including means to cause non-rectilinear tool in-feed
769	..Of arcuately oscillating tool
771	..Of tool carrier on single moving pivot
772	...Pivot moves in closed loop
773	...Pivot moves to-and-fro in arcuate path
774	....Axis of arcuate path moves during cutting
775	...Pivot moves to-and-fro in rectilinear path
776	.Having uniplanar compound motion
777	..By plural arcuately oscillating carrier
778	..Constantly oriented tool travelling in orbit
779	..Tool rocks cutting reciprocations
780	...One tool reciprocates along fixed guide element
781	.With work-support and means to vary relationship between tool and work-support
782	.Arcuately oscillating tool carried on single pivot
783	.With means to support tool at opposite ends
784	..And apply drive force to both ends of tool
785	...By flexible drive means
786	...By reciprocating rigid support
788	BY ENDLESS BAND OR CHAIN KNIFE
789	.With programming means
790	.With cutter other than endlessly orbiting type
792	.Including contiguous oppositely moving knife portions
793	.With means to change to non-endlessly orbiting cutter
794	.With tool in-feed
795	..Including ground-traversing vehicle
796	..Including means to permit arcuate in-feed motion
797	...Including means to relocate path of in-feed motion
798	....Angular relative previous path
799	..By gravity
800	...With fluid in-feed regulating means
801	..By motor-driven mechanism
802	.With scale or indicator
803	.Including plural cutting zones
804	..With adjustment of separation between zones
805	...By lever means
806	...By screw-threaded means
807	..Including "figure-8" band
808	..Comprising plural bands
809	.Including means to adjust relationship between band and work-support surface
810	..By varying angle between band and work-support surface
811	...By tilting band carrier
812	....About point of intersection of cutting span and work-support surface
813	..By varying distance between band and work-support surface
814	.With means to guard or tension
815	..Including means to retard un driven pulley or sprocket

BY ENDLESS BAND OR CHAIN KNIFE
.With means to guard or tension
816 ..With means to vary distance between pulley or sprocket axes
817 ...And angular relationship of axes
818 ...Including means to yieldably bias pulley
819 ....By fluid means
820 .With special blade guide means
438 WITH MEANS TO GUIDE MOVING WORK
439 .In pivotal or arcuate movement
440 .Guide fixed to or integral with stationary tool element
440.1 ..Tool element cooperates with a second tool
440.2 .With guard
441 .With attachment or operative connection to tool carrier
441.1 .With attachment or operative connection to passive tool guide
442 .Guide cooperates with template or straight-edge secured to work
443 .Curved or deflecting guide
444 .Positively confines or otherwise determines path of work
445 .Adapted to permit maneuvering of work at tool zone
446 .With movable or yieldable guide element
447 ..Opposed to work-supporting surface
448 .Plural guide elements
449 ..Opposed
450 .Opposed to work supporting surface
451 WITH WORK IMMOBILIZER
452 .Means to clamp work
453 ..Combined with, peculiarly related to, other element
454 ...With or to tool guide
455 ...Guide for traveling cutter
456 ...Tool or tool support on movable clamp jaw
457 ..With means providing for plural steps in clamping stroke
458 ..With equalizer or self-aligning jaw
459 ..With biasing or counterbalancing means
460 ..Clamp driven by yieldable means
461 ..Liquid pressure actuating means
462 ..Including means to retain clamp jaw in position
463 ..Self-locking drive means
464 ..Manually actuated drive means
465 ..Including clamping face of specific structure
466 ..With means to adjust clamp position or stroke
466.1 .Gapped work-constrainer
467.1 .Work-stop abutment
468 ..With scale or indicator
468.1 ..Normal to plane of cut
468.2 ...Adjustable
468.3 ....Angularly relative to plane of cut; e.g., miter
468.4 ...With traversing cutter guide; e.g., cut-off saw
468.5 ..Collapsible
468.6 ..Retractable
468.7 ..Adjustable
468.8 ...Having curved cutting edge to make arcuate cut, plural nonaligned intersecting cutting edges, or spaced punches
468.9 ....Spaced edges
468.93 ..Having curved cutting edge to make arcuate cut, plural nonaligned intersecting cutting edges, or spaced punches
468.94 ...Spaced edges
469 ROTATABLE-DISC TOOL PAIR OR TOOL AND CARRIER
471 .With means to support work relative to tool(s)
471.1 ..Plural tool elements successively actuated at same station
471.2 ..Tool moved relative to work-support during cutting
471.3 ...Tool angularly adjustable relative to work-support
472 ..Supporting surface and tool axis angularly related
473 ...Adjustable angular relationship
474 ..Unidirectionally movable work support
475 ...With opposed work-presser
476 ....Presser co-axial with tool
477 ..Support and tool relatively adjustable
477.1 ...By movement of the tool
477.2 ..Work-support includes passageway for tool (e.g., slotted-table)
478 .With guard for tool
479 .Optional tool pairs alternatively operative
480 ..One element of tool pairs common to all pairs
481 .With means to permit replacement of tool
482 .Means to separate elements of tool pair
483 .Carrier for rotatable tool movable during cutting
484 ..Unicyclic movement
485 ..Tool carrier reciprocable rectilinearly
486 ...With means to adjust path of reciprocation
486.1 ....Angular relative to previous path
487 ...With means to reciprocate carrier
488 ....And means to rotate tool
489 ...With means to rotate tool
490 ..Tool carrier oscillated or rotated
491 .Means to rotate or oscillate tool
492 ..Including means to rotate both elements of tool pair
493 ...Including means to rotate both elements at different speeds
494 ...And means to change speed of rotation
495 .Tool pair comprises rotatable tools
496 ..Tool pair elements angularly related
497 ...Elements of tool pair angularly adjustable relative to each other
498 ..Tool pair axially shiftable
499 ...With shifting mechanism for at least one element of tool pair
500 ..Tool pair comprises contacting overlapped discs
501 ...With means to effect axial pressure on pair
502 ....With means to change axial pressure
503 ...With means to change overlap of discs
504 ..Tool element axially shiftable
505 ..Tool pair comprises disc and cylindrical anvil
506 ...With adjustable means to urge tool elements together
507 ..Elements of tool pair adjustably spaced
508 .Tool pair comprises rotatable tool and non-rotatable tool
508.1 .Tool element selectively operative
508.2 .Tool element mounted for adjustment
508.3 ..Plural, axially-spaced tool elements
509 TOOL PAIR COMPRISES ROTATABLE ANVIL AND FIXED-TYPE TOOL
510 .Anvil has motion in addition to rotation (i.e., traveling anvil)
511 ..Additional motion is along fixed arcuate path
512 ..With plural anvils

513 TWO TOOL PAIRS, DRIVER FOR ONE PAIR MOVES RELATIVE TO DRIVER FOR OTHER PAIR
514 .One tool support acts as driver for other
515 ..Punch and shear
516 .With variable spacing between tool pairs
517 ..With intermediate work support
518 .Punch and shear
519 .Successively acting
520 WITH ILLUMINATING OR VIEWING MEANS FOR WORK
521 .Mirror or lens
522.11 WITH SIGNAL, SCALE OR INDICATOR
522.12 .Signal; e.g., alarm
522.13 .Indicator comprising work or product
522.14 .Responsive to force
522.15 .Indicates tool position
522.16 ..Relative to another element
522.17 ...To work engaging member
522.18 ....Calibrated scale or indicator
522.19 .....Indicates dimension of work being cut
522.21 ......Dynamic indicator
522.22 ...To another tool assembly
522.23 ...To cooperating tool
522.24 ...To another component of tool assembly
522.25 ...Adjustable guide for traversing tool; e.g., radial saw guide or miter saw guide
522.26 .Indicates work characteristic
522.27 .Indicates wear
522.28 .Bubble level
522.29 .Counter
523 MEANS TO DRIVE OR TO GUIDE TOOL
524 .Unicyclic
525 ..With adjustable stopping point or tool
526 ..With brake or blocking means
527 .Means to change datum plane of tool- or tool-presser-stroke
528 ..For disabling of continuously actuated cutter
529 ..With adjustable stop
530 ..By varying length of tool stroke
531 .Clicker die press
532 ..With die handling attachment
533 ..With reciprocating presser
534 ...Laterally movable to selective operative positions
535 ....Pivotal or revolving only
536 .....With means to impart, limit, or control pivotal motion of presser
537 ......Interrelated with presser reciprocating means
538 .....With means to mount presser for oscillation about column
539 ...With adjustable bed block
540 ...Including presser member reinforcing, or flexure compensating, means
541 ...With manually actuated control apparatus for reciprocation of presser member
542 .By deforming resilient tool or tool support
543 .With transmission yieldable on overload
544 .With guard means
545 ..Static
546 ...Adjustable
547 .With movable tool-protecting work-backing strip
548 .Single tool with plural selective driving means
549 .Plural tools selectively engageable with single drive
550 ..Predetermined sequence of selection
551 ...Of paired tools
552 ..Turret of tools
553 .Tool movable to cooperate selectively with one of a plurality of mating tools
554 .With means providing for plural steps in tool stroke
555 .Sequential cutting motions
556 .With tool positioning means synchronized with cutting stroke
557 ..Anvil moves into and out of operative position
558 ..Straight line positioning
559 .Tool pair positionable as a unit
560 ..Straight line positioning
561 .Tool and anvil relatively positionable
562 ..Straight line
563 .Tool displaceable to inactive position (e.g., for work loading)
564 ..By pivotal motion
565 .With templet-surface-following tool
566 .Tool moves work to and against cooperating tool
567 ..With means to clamp or bind work to moving tool
568 ..One tool resiliently mounted or biased
569 ..Work forced through tool aperture or between spaced cooperating tools
570 ..Manually actuated work-moving tool
571 .With means to connect or disconnect tool and its drive
572 ..Continuously moving drive means (e.g., "gag")
573 ...Hand actuated connecting means
574 .Convertible from tool path to another or from implement to machine
575 .Magnet- or solenoid-actuated tool
576 ..Tool movement modifies actuating circuit
577 ..Solenoid core is tool or tool support
578 .Cutting tool operative in opposite directions of travel
579 .Motion direction of tool influenced by resistance of work
580 .One tool edge of tool pair encompasses work (e.g., wire cutter)
581 .Bevel or miter cut
581.1 .With tool tensioning means
582 .Constantly urged tool or tool support (e.g., spring-biased)
583 ..Ledger blade
584 ..Oscillating tool urged axially
585 ...And urged about pivotal axis
586 ..Stored energy furnishes cutting force
587 ...With reset
588 ..Through return (non-cutting) stroke
589 ...Oscillating tool
590 .Tool return mechanism separate from tool advance mechanism
591 .With simple revolving motion only
592 ..Tool mounted on radial face of rotor
593 ..Variable speed during one revolution (e.g., intermittent)
594 ..Revolving tool moves through recess in work holder or cooperating tool
595 ...Progressively cutting
596 ..Progressively cutting
597 .With simple oscillating motion only
598 ..Plural tool pairs
599 ...Plural tools on single oscillating arm (i.e., tool holder)
600 ..And means to move cooperating cutter member
601 ..Tool driver movable relative to tool support
602 ...Cam or eccentric revolving about fixed axis
603 ...Gear or ratchet pawl drives toothed tool support

	MEANS TO DRIVE OR TO GUIDE TOOL
	.With simple oscillating motion only
	..Tool driver movable relative to tool support
604	...Toggle links, one link pivoted to tool support
605	...Fixed axis lever
606	....Adjustable mechanical advantage
607	..Cutting edge in radial plane
608	...Adjustable
609	...With guide means for the cutting member
610	..Axially entending cutting edge
611	...Axially progressing cut
612	...Adjustable
613	.With simple rectilinear reciprocating motion only
614	..Edge-to-edge of sheet or web (e.g., traveling cutter)
615	..With provision for dynamic balance
616	..With lost motion in tool drive
617	..Means to vary force on, or speed of, tool during stroke
618	..Plural tools with same drive means
619	...Tools positioned by template
620	...Plural distinct cutting edges on same support
621	....Concentrically mounted
622	....Successively acting
623	..And means to move cooperating cutting member
624	..With application of force to opposite ends of tool-supporting crosshead
625	...By relatively movable fixed axis levers
626	...By connecting rod articulated with tool support
627	..Tool driver movable relative to tool support
628	...Cam or eccentric revolving about fixed axis
629	...Gear actuated tool support
630	...Toggle links, one link pivoted to tool support
631	...Screw actuated tool support
632	...Connecting rod articulated with tool support
633	...Fixed axis lever
634	....Adjustable mechanical advantage
635	...Including details of guide for tool or tool support
636	..Progressively cutting
637	..With spaced guide pins (e.g., die set leader pins)
638	..With inclined guides
639.1	..Fluid pressure actuated
639.2	...Utilizing fluid amplifier
639.3	...Diaphram
639.4	...Explosive fluid
639.5	...Plural cylinders
639.7	...Offset cutter
640	..With means to adjust tool position on tool holder
641	...Adjustably mounted cooperating tool
642	.Parallel draw-cut (e.g., translatory)
643	..Link suspension
644	.Straight line motion combined with tilting in plane of stroke
646	.Uniplanar compound motion
647	..Reciprocating plus work approach (e.g., saw type)
647.5	..With gyratory drive
821	.Guide
823	..With non-rigidly positioned member
824	..With anti-friction means
825	...Roller with peripheral flange or groove
826	...Disc
827	..With means to vary space between opposed members
828	...By rectilinear movement of member
829	..With means to adjust position
648	TOOL WITH EITHER WORK HOLDER OR MEANS TO HOLD WORK SUPPLY
649	.Rotatable wound package supply
650	..Plural supply sources
830	CUTTER ASSEMBLAGE OR CUTTER ELEMENT THEREFOR (E.G., CHAIN SAW CHAIN)
831	.With means permitting removal of cutter element
832	.Having diverse cutting elements
833	..And non-cutting depth gauge
834	.Having non-cutting depth gauge
651	TOOL OR TOOL WITH SUPPORT
651.1	.Wire tool
652	.Work supported tool (e.g., clicker die)
653	..With product ejection facilitator
654	..With tool manipulating portion
655	..With tool positioning abutment
656	..To sever article from work and cut within article
657	..With tool contour adjusting means
658	.Anvil
659	..Rotatable type
660	.Pointed perforators
661	.Endless band or belt type
835	.Toothed blade or tooth therefor
836	..With means to vary tooth position
837	..With additional cutting means
838	..Plural separable sections
839	...Tooth separable from blade
840	....By independent connecting element
841	.....Transversely movable
842	.....Arcuately movable
843	......With additional element to prevent movement of connecting element
844	.....Rectilinearly movable
845	....By deformation
846	..Uniformly varying teeth or tooth spacing
847	..Undulating tooth arrangement
848	..Plural tooth groups
849	...Including raker-tooth group
850	...Including intermediate raker-tooth
851	..Series of dissimilar teeth
852	..Series of allochiral teeth
853	..Teeth having transversely curved cutting edge
854	..Teeth having cutting edge parallel to blade surface
855	..Teeth having cutting edge perpendicular to blade surface
662	.Tool mounted by and between spaced arms
663	.Rotatable type
664	..With spacer interposed between shaft-mounted tools
665	..Mounting of tool about rod-type shaft
666	...At end of shaft
667	..Punching plus non-punching tool
668	..Notching plus non-notching tool
669	..Punching tool
670	...Shear type
671	..Notching tool
672	..Helical tool
673	..Shear type
674	...Cutting edge wholly parallel to axis of rotation
675	...Cutting edge wholly normal to axis of rotation
676	..Disc type
677	..Radially adjustable tool
678	..Spaced cut forming tool
679	.Cutting couple type
680	..Spiral type cutter
681	..To punch, and cut punched article
682	..Punching plus non-punching tool

	TOOL OR TOOL WITH SUPPORT
	.Cutting couple type
683	..Notching plus non-notching tool
684	..Punching tool
685	...Tool pair
686	...Shear-type male tool
687	....Multiple punchings
688	....Plural spaced successively operative shearing portions
689	....Progressive cutting
690	...Shear-type female tool
691	...Multiple punchings
692	..Notching tool
693	...Shear type
694	..Shear type
695	..Spaced cut forming tool
696	..With tool contour adjusting means
697	.Reciprocable type
698	.Joints and connections
699	..Adjustable
700	...Rectilinearly
856	.Stationary cutter
857	..Non-parallel cutting edges
858	..Parallel cutting edges
859	MACHINE FRAME
860	.Guard
701	MISCELLANEOUS

CLASS 86 AMMUNITION AND EXPLOSIVE-CHARGE MAKING

	AMMUNITION MAKING
10	.Caps and cartridges
11	..Paper shells
12	...Assembling
17	..Shell lining and varnishing
19	.Lubricating
20.1	LOADING FIREWORKS AND BURSTING CHARGES
20.11	.Filling and ramming fireworks
20.12	.By casting
20.13	.By vibratory packing
20.14	.Placing bursting charge in projectile
20.15	.Placing, tampimg or priming charge in blast hole
21	.Implements
22	..Fuse
23	AMMUNITION LOADING
25	.Loading and shell closing
26	..Rectilinear shell feed
27	..Rotary shell feed
28	..Implements
29	.Filling and ramming
30	..Rammers
31	.Filling
32	..Cap and cartridge priming
33	..Implements
36	.Capping and uncapping
37	..Implements
38	...Magazine
39	.Crimping
40	..Implements
41	..Crimper heads
42	.Bullet patching
43	.Bullet setting
44	.Shell holders
24	.Implements
45	FEEDING DEVICES
46	.Shell
47	CARTRIDGE PACKING
48	.Belt loading

49	AMMUNITION SHELL UNLOADING
50	BOMB DISPOSAL

CLASS 87 TEXTILES, BRAIDING, NETTING AND LACE MAKING

PROCESSES AND PRODUCTS
1 .Coated or impregnated
2 .Elastic
3 .Intertwisted strands
4 ..Twist or bobbinet lace
5 .With material incorporated in diverse ways
6 ..Tubular fabric with core
7 ..Braided with unbraided material
8 .Braided
9 ..Tubular
10 ..Lace
11 ..Variable form
12 ..Knotted mesh
13 .Miscellaneous
APPARATUS
14 .With pattern mechanism
15 ..With electric or fluid operated means
16 ..For braiding apparatus with movable switch for carrier
17 ..For braiding apparatus of arrestable carrier type
18 .With stopping or starting
19 ..Electrical
20 .With automatic control
21 ..Let offs
22 ...Ratchet type
23 .With coating or impregnating
24 .Intertwisted strand type
25 ..Portable
26 ...With diverse material incorporating
27 ..Twist or bobbinet lace
28 .With diverse material incorporating
29 ..Tubular fabric with core
30 ..Braided with unbraided material
31 .With take up
32 .Combined
33 .Braiding
34 ..With mandrel or form
35 ..With die or shaper
36 ..With beater or strand layer
37 ..With movable switch for carrier
38 ...Carrier actuated
39 ..Arrestable carrier type
40 ...With clutch
41 ..With braid variation
42 ..Interlocking twist type
43 ..With reciprocating carrier
44 ..Concentric circular orbit type
45 ...Rack and gear carrier propellers
46 ...Intermittently retractible carrier propellers
47 ....Rotating
48 ...Strand deflecting devices
49 ..With strand anti-twist means
50 ..Carrier propelling and/or guiding means
51 ...Without race plate
52 .Tatting
53 .Knotted mesh fabric
54 .Shuttles, carriages and/or threading and loading or unloading devices
55 ..Braiding carriers
56 ...With strand tensioning means
57 ....Let offs
58 ..Tatting type
59 ...With rewinding means
60 ..Seine needles
61 .Strand tensioners
62 .Miscellaneous

1.12	GUN HEATERS
1.13	MINE-DESTROYING DEVICES
1.15	WELL PERFORATORS
1.16	ENGINE STARTERS
1.2	SMOKE OR RESIDUE EJECTOR
1.25	LUBRICANT INJECTOR
1.34	LINE THROWING
1.35	TRENCH MORTARS
1.3	MUZZLE LOADING
1.42	GUN HANDLES
1.51	BOMB, FLARE AND SIGNAL DROPPING
1.52	.Drop grenade
1.53	.Sway braces
1.54	.Bomb displaced from exterior of plane
1.55	.Arming device
1.56	.Electrical and radio releases and sighting
1.57	.Explosive releases
1.58	.Shackles
1.59	.Racks
1.6	.Timing devices
1.61	.Sighting
1.7	RECOILLESS GUN
1.701	.Having a reaction mass
1.702	..Barrel parts separable for loading
1.703	.Having pressure-control means
1.704	.Having breech closure
1.705	..Closure has firing device
1.706	..Cartridge-case closure
1.8	ROCKET LAUNCHING
1.801	.Having rocket-storage and transfer means
1.802	..Launcher movable relative to storage means
1.803	..Having magazine-gate means to feed and support rocket for launching
1.804	..Storage means movable to facilitate launching
1.805	.Having means to transfer rocket to launcher
1.806	.Having means restraining rocket from movement in launching direction
1.807	..Including rocket-firing means
1.808	..Rocket spin stabilized while restrained
1.809	.Underwater launching
1.81	..Rocket launched from container
1.811	.Having umbilical-separating means
1.812	.Having safety devices for preventing premature ignition or launching
1.813	.Having rocket-firing means
1.814	..Rocket propellant ignited by electrical means
1.815	.Movable launcher
1.816	.Having tubular guide means
1.817	..Including a forward closure
1.818	..Including an auxiliary rocket-launching charge
1.819	.Having guide means
5	SUBMARINE
125	AUTOMATIC
126	.Plural gun, barrel or bore
127	..Firing control
128	.Convertible gun operation (e.g., to nonautomatic)
129.01	.Regulation of speed or rate of automatic fire
129.02	..By regulating burst
130	..By regulating time of return of breech block
131	..By regulating time of release of hammer
132	.Firing device operation or control (e.g., full automatic)
133	..Synchronizers
134	..Disabled at predetermined angles of fire
135	..Electrical
136	..Triggers and/or remote control
137	..Interlocks between firing and cartridge feeding
138	...Locks bolt open
139	..Semi-automatic (e.g., double sear)
140	...Convertible to full automatic
141	....Breech block, barrel or hammer disconnected
142	....With selective safety device
143	...Alternate control of hammer and breech block or barrel
144	...With means for disconnecting trigger and sear
145	....By breech block or barrel motion
146	....Hammer disconnected
147	...Hammer cocked and released by trigger
148	..With selective safety device
149	..With automatic sear or sear release
150	..With automatic sear or trigger safety
151	..With automatic hammer
152	...Operates breech lock
153	..Operates breech lock
154	..With automatic hammer cocking and/or safety means
155	.Movable chamber type (e.g., revolver)
156	..Operating as gas piston and/or recoil member
157	..Recoiling barrel with revolving chambers
158	.Movable butt piece
159	.Combined movable barrel and gas operated
160	.Movable barrel (e.g., rotary)
161	..Forwardly movable
162	..Rearwardly movable
163	...Barrel having motion in addition to axial, rectilinear
164	...With breech lock latch
165	...Long recoil
166	....Nonrectilinear breech block motion
167	....Nonaxial rectilinear breech block motion
168	....Pivoted locking member or toggle lock
169	...With accelerator and/or unlocking lever for breech mechanism
170	...With barrel latch
171	...Nonrectilinear breech block motion (e.g., tilting rotary)
172	....Rotary and sliding
173	...Sliding locking member
174	...Rotary locking member
175	...Toggle locking member
176	...Pivoted locking member
177	..Barrel buffers and brakes
178	..Barrel return means
179	.Gas piston-type lock actuator carried by breech block (e.g., firing pin)
180	.Breech block lock (positive or impositive)
181	..With latch
182	..Inertia member released lock
183	...Blow back initiated
184	..Nonrectilinear breech block motion (e.g., tilting rotary)
185	...Rotary and sliding
186	..Nonaxial, rectilinear, breech block motion
187.01	..Sliding locking member
187.02	...Cylindrical or ball bearing
188	..Rotary locking member
189	..Toggle locking member
190	..Pivoted locking member
191.01	.Gas piston type
191.02	..Annular piston
192	..Gas piston compresses breech opening spring
193	..Gas ports and/or regulators

1	MISCELLANEOUS
1.5	NECKED RECEPTACLE SEAL CUTTERS
2	CARTON OPENERS
400	CAN OPENER
401	.With control means energized in response to activator stimulated by condition sensor
402	..Unicyclic reciprocating punch
403	..With stopping upon completion of cut
404	...Responsive to reaction force between can and cutter
405	..Responsive to can
406	.With sanitizer
407	.Including spout former
408	.With other cutlery means
409	.Adapted for right or left hand operation
410	.With lid retainer or lifter
411	.With can closure means
412	.Including plural independent cutters
413	..Progressive fulcrum
414	..Including punch
415	.Including plural sequentially operated cutters
416	.With driven roller to continuously engage bead and relatively rotate can and opener
417	..Side cut
418	...Cutter comprising driven disc
419	..With means enabling quick release of cutter
420	..Roller drive means causes initial piercing
421	...Including prime mover
422	...Cutter comprising rotatable disc
423	..Including prime mover
424	...Cutter comprising rotatable disc
425	....Driven disc
426	..Cutter comprising rotatable disc
427	...Driven disc
428	.Including shear couple
429	.Progressive fulcrum
430	..Side cut
431	..Cutter pivoted to reaction member
432	..With guide
433	.With means to relatively rotate can and opener
434	..Comprising means to rotate can
435	.Including sweep cutter
436	..With can support
437	..With can penetrating pivot
438	...Variable cutter radius
439	....Freely slidable cutter
440	.....Cutter comprising rotatable disc
441	....Cutter comprising rotatable disc
442	..With means to grip can
443	.Including punch
444	..With prime mover to drive cutter relative to can
445	..Peripheral punch
446	..Plural-spaced cutting edges
447	...With can support
448	..With can support
449	..Traversing punch
450	..And fulcrum
26	MANICURE
27	.Guarded edge
28	.Nippers
29	.Shears
29.5	HAIR CUTTERS FOR INSIDE NOSE OR EAR
30	HAIR PLANERS
31	.Convertible
32	RAZORS
34.05	.Combined
34.1	..With additional cutter means
34.2	..With means to raise the hair and/or stretch the skin
35	..With means to facilitate sharpening
36	...Permanently attached sharpener
37	...Means for holding or guiding sharpener
38	....Blade-shifting mechanism
39	.....Safety impulse
40	..With blade magazine
40.1	...Strip feed
40.2	...Detachable magazine
41	..With waste-collecting, razor-cleaning and/or dispensing
41.5	...With fluid-current disposal means
41.6	...Hair-collecting means
41.7	..With blade usage indicator
41.8	..With blade flexure indicator
41.9	.With cooperating nipping blades
43	.With cooperating shearing blades
43.1	..With razor-adjusting means
43.2	...Adjusting spacing between blades
43.3	..With compound movement of blade
43.4	..Rotary blade
43.5	...Rotary inner blade
43.6	....And stationary outer blade
43.7	..Oscillating blade
43.8	...Oscillating inner blade
43.9	....And stationary outer blade
43.91	..Reciprocating inner blade
43.92	...And stationary outer blade
42	.With blade-moving means
44	..Vibratory
45	...Electric
46	...Traction
47	.Knockdown and/or folding
48	.Inclined edge
49	.Curved edge
50	.Multiple blade
51	.Detachable blade, guarded cutting edge
52	..Tensioned blade edge
53	..Longitudinal or old style
54	...With relative blade and guard adjustment
55	...Separable guard
57	..Pivoted blade
58	..Pivoted cap
59	...Multiple guard
60	....With operator and relative blade and guard adjustment
60.5	.....Sectional cap
61	...With operator and relative blade and guard adjustment
62	..Slidable blade
63	...With relative blade and guard adjustment
64	...With blade lock
65	...Multiple guard
66	..Slidable lock
67	..Hook and lock
68	..Bolt-connected
69	...Threaded
70	....Multiple guard
71	.....With relative blade and guard adjustment
72	......Flexible blade
73	.......Spaced guard edge
74	..Magnetic
74.1	..Multiple guard
75	..Aligning means
76	..Corner construction
77	..Guards
78	...Blade-supported
79	....With relative blade and guard adjustment
80	.....Rail guard
81	...Edge structure
82	....Modified teeth
83	...Rail
84	..Caps
85	.Handles
86	..Receptacle

	RAZORS
	.Handles
87	..Pivoted
88	...Longitudinal
89	...Angularly adjustable handle and head
90	.Attachments and accessories
451	STATIC PENCIL SHARPENER
452	.Plural, sequentially engaged cutters
453	.With debris receiver
454	..Conical or cylindrical work guide
455	..Surface type cutter
456	.Work piece drawn over transverse, single edge cutter
457	.Having conical or cylindrical work guide
458	..And mounting base or handle
459	...With diverse feature
460	..Open-ended for point protection during writing
461	..Adjustable or resilient cutter structure
462	.Surface type cutter
475	POWERED PLANER
476	.With rolling supports (e.g., wheels, casters)
477	.Tool rotates about axis perpendicular to work
478	BENCH PLANE
479	.Core box former type
480	.Strip cutter
481	.With gauge or guide
482	.Having plane extension
483	.With lubricant dispenser
484	.To form configured or beveled surface
485	..Changable
486	..Recess forming
487	.Having means for adjusting cutting blade
488	..Pivoted lever and screw
489	..Screw
490	.Adjustable mouthpiece
491	.Handle or handle attaching means
492	.Cutting blade clamp
493	.Cutting blade
494	BILLIARD CUE TRIMMER
495	CYLINDRICAL TENON CUTTER
90.1	MEANS FOR CUTTING ELONGATE, STRAND-ENCIRCLING SHEATH
90.2	.Helically wound metal sheath
90.3	..Including rotary cutter
90.4	.Longitudinally
90.6	..With additional means for cutting sheath other than longitudinally
90.7	..Adjustable to also cut sheath other than longitudinally
90.8	..With cutter-opposing, sheath-engaging surface
90.9	...Roller surface
91.1	...Pivotally connected to cutter
91.2	.With cutter-opposing, sheath-engaging surface pivotally connected to cutter
92	PIPE AND ROD CUTTERS
92.5	.Adapted to cut pipe or rod longitudinally
93	.Rotary
94	..External
95	...Pipe- or rod-encircling
96	....With clamping means
97	.....Rotary power source
98	.....Ratchet
99	....Ratchet
100	....Chain link type
101	....Disc cutter
102	...Disc cutter
103	..Internal
104	...Eccentrically pivoted
105	...Slidably projected
106	....Wedge
107	.....Screw feed
108	...Pivoted lever mounted
109	CIGAR TIP CUTTERS
110	.Rotary power source
111	.Hand
112	..Pivoted blade
113	..Reciprocating blade
113.1	CORE-PIT REMOVERS
113.2	.Including pivoted tool-pair members
113.3	.Combined
114	SEGMENTERS
115	PLASTIC MATERIAL CUTTERS
116	.Wire
117	..Plural
118	BUTTONHOLE TYPE
119	.With punch
120	.Shears
120.1	SHELL OPENERS
120.2	.Nutcrackers
120.3	..Arcuately moved jaws
120.4	...Plural or relatively movable pivot
120.5	..Lever-actuated jaws
358	PERFORATING OR INDENTING IMPLEMENTS
359	.Combined with other type cutter
360	.With portion positioned in work aperture
361	.Work-mounted
362	.Hand-guided, motor-driven
363	.Pivoted handles
364	..Turret of tools
365	.Traveling roller
366	.Pointed
367	..With impact drive
368	..With stripper, sheath or gauge
121	TREE HACKS
121.5	CORN STRIPPERS
122	CONVERTIBLE
123	COMBINED CUTLERY OR COMBINED WITH ANCILLARY FEATURE
123.3	.With means to apply transient fluid to tool
123.4	..To chain saw chain or guide therefor
123.5	.With skin-removal means
123.6	..Including relatively movable parts
123.7	..Including a pointed blade
124	.With material-holder or disposal
125	..Handle receptacle
127	..Twine guide
128	..Ejectors or strippers
129	...Fork
130	...Annular cutter
131	..Shears
132	...Multiple shearing position
133	....Suction-disposal means
134	...Grip type
135	....Spring-opened
136	..Knives and scrapers
136.5	...With closure or portable receptacle support
137	..Forks
138	.With sharpening feature
139	..Rotary sharpener
140	.With heater
141	.Spoons with fluid conductors
142	.Cutlery
143	..Sheathed
144	..Saws
145	..Nippers and shears
146	..Shears and knives
147	..Knives, forks, and spoons
148	..Knives and forks
149	..Knives and spoons
150	..Forks and spoons
151	SHEATHED
152	.Plural blade
153	.Folding sheath
154	.Compound blade movement
155	.Pivoted blade

	SHEATHED
	.Pivoted blade
156	..Detachable blade type
157	...End tang connected
158	..With blade-opening means
159	...Spring-opened
160	...Locked blade
161	..Locked blade
162	.Sliding blade
163	..Gravity-opened
164	.Elements
164.5	ICE PICK OR CHIPPER TYPE
164.6	.With impact-moving means
164.7	.With guard and/or guide
164.8	.Plural points or edges
164.9	SCRATCHING IMPLEMENTS
164.95	.Having traction-rotated tool (e.g., glass cutters)
165	CUTTING TOOLS
166.3	.Saw
369	..Including contiguous oppositely moving blade portions
370	..With work-underlying guard means
371	..With work-engaging member
372	...Affixed to work
373	...Slidable guide plate parallel to saw blade
374	...Slidable guide plate intersected by saw blade
375	....Including relatively adjustable saw blade and guide plate
376	.....To vary angle between saw and guide plate
377	.....To vary projection of saw blade
378	...Including means to press work to saw blade
379	..On vehicle moved during cutting
379.5	..On vehicle, moved relative thereto during cutting
380	..Band
381	..Chain
382	...With guard means
383	...With guide bar for cutting span
384	....Including nondriving guide pulley
385	.....And means to adjust guide pulley relative to guide bar
386	....Including means to adjust guide bar relative to its support
387	....Multisectioned guide bar
388	..Rotary
389	...With peripheral drive means
390	...With guard means
391	....Movable to nonguarding position
392	..With means to reciprocate saw
393	...In uniplanar compound path
394	...Including connecting rod articulated with saw blade or support
501	..Having plural cutting edges
502	...Oppositely directed cutting edges
503	...Simultaneously cutting
503.5	....Parallel cutting
504	..Having tooth or blade protective or strengthening means
505	..With gauge for limiting depth of cut
506	..Mounted in truss frame (e.g., bucksaw)
507	..Mounted in U-frame
508	...Offset blade
509	...Coping saw
510	...Extensible
511	....Length and depth
512	...Collapsible frame
513	...Blade-tensioning means
514	..With accessory and handle
515	...Lubricant dispenser
516	...Dust blower
517	...Handle
518	....Offset
519	....Angularly adjustable

520	....Double grip
521	....Spindle type (e.g., for double end cross-cut saw)
522	.....Having side clamping plates
523	.....Fastener passes through transverse passage in handle
524	.....Fastener passes through longitudinal extending passage in handle
525	....Scroll type
168	.Cold chisels
167	.Chisel
167.1	..Compound
167.2	..With gauge
169	.Scrapers
170	..Wheeled
171	..Hoe type
172	..Plural blade
173	.Plural cooperating blades
174	..Corer type
175	..Nippers
176	...Multiplex
177	...Adjustable-position cutter
178	...Form cutter
179	...With guide and/or gauge
180	...With motor
181	...Compound blade movement
182	...Reciprocating blade
183	....Lever and cam
184	....Lever and link
185	....Toothed slide and lever
186	...Pivoted blade
187	....With blade-moving means
188	.....One movable blade
189	......Lever and cam
190	......Lever and link
191	.....Pivoted handles
192	......Handles interlinked or geared
193	......Common pivot
194	..Shears
195	...Hair thinners
196	...Multiple shearing position
197	....Multiplex
198	....Body-supported
199	....Adjustable angle
200	....With cut regulator
201	.....Adjustable
202	......Automatic
203	....Convertible, power- or manual-operated
204	....Compound blade movement
205	....Rotary blade
206	.....With motor
207	.....With blade-tension means
208	....Reciprocating and/or oscillating blade
209	.....Reciprocating or oscillating power source
210	......With motor
211	......Pivoted handles
212	.......With spring return
213	........And blade-tension means
214	.......With blade-tension means
215	.....Rotary power source
216	......With motor
217	......Crank or cam, pitman and lever
218	......Crank or cam, lever and slide
219	......Crank or cam and lever
220	......Crank or cam and slide
221	.....With blade-tension means
222	......And friction reducing feature
223	....Blade assembly
224	.....With friction reducing feature
225	....Blades
226	...Multiplex
227	....With blade-moving means
228	...With motor
229	...Form cutter

	CUTTING TOOLS
	.Plural cooperating blades
	..Shears
	...Form cutter
230	....Zigzag
231	...With supports
232	....Hand or finger
233	...With guard, guide and/or gauge
233.5	....Comb type
234	...Spring joint
235	....Offset handles and blade
236	....Detachable blade
237	...Compound blade movement
238	....One movable blade
239	....Intermediate pivot
240	...Rotary blade
241	...Reciprocating blade
242	....Lever and link
243	....Toothed lever and slide
244	...Pivoted blade
245	....With blade-moving means
246	.....Push or pull type
247	.....Rotary power source
248	.....Offset blade and handle
249	.....One movable blade
250	......Pivoted handle
251	.......Lever and connecting link
252	.....Pivoted handles
253	....End pivot
254	....Intermediate pivot
255	.....Foldable
256	.....Right or left hand
257	.....Offset blade and handle
258	.....Blade and slot
259	.....Offset pivot
260	.....Detachable blade and handle
261	.....Spring opened or closed
262	......With latch
263	..Rotary blade
264	...With motor
265	...Two rotary blades
266	..Joints and blade-tension means
267	...With friction-reducing feature
268	...Spring tension
269	....Threadless pin type
270	...Nut lock type
271	..Stops and bumpers
272.1	.With blade moving means
273	..Base-supported
274	...Band knife
275	...With presser foot
275.4	..With support or attaching means
276	..Rotary blade
277	..Impact
277.4	..Including a motor
278	.With material receiving opening
279.2	..Plural blade or cutting edge
279.4	...Swinging-stroke vegetation cutter
279.6	...Border of opening limits cutting depth, e.g., peeler
280	..Push or pull type
281	...Spoke shave type
282	..With blade guide
283	..Adjustable
284	...Detachable guard
285	..Detachable guard
286	.With guard and/or guide
287	..Plural blade or cutting edge
288	..Diverse kinds
289	..Blade or material guide
290	...With support
291	....Hand- or finger-supported
292	...Traveling roller blade
293	...Adjustable
294	...Push or pull type
295	..Hand guard
296.1	.With support or attaching means
297	..Leg- or foot-supported
298	..Hand- or finger-supported
298.4	..Nonuse support
299	.Plural blade
300	..Sweep cutter
301	..Annular blade
302	...With radiating or crossed blades
303	..Radiating or crossed blades
304	..Parallel blades
305	...Push or stamp type
306	..Traveling roller cutter
307	...Disc blade
308	.Cleaver type
308.1	.Hatchet, ax, or adze
308.2	..Foldable to cover bit
308.3	..Detachable bit
309	.Sickle or scythe type
310	.Sweep cutter
312	.Plural handle or grip
313	..Draw knives
314	.Push and/or pull type
315	..Push or stamp type
316	...Annular blade
317	..Pull type
318	.Swing stroke type
319	.Traveling roller blade
320	.Adjustable blade
321	..Pivoted
322	FORKS
323	.With hand guard and/or support
324	SPOONS
325	.Perforated
326	.With cover and/or guard
327	.With support
328	.Reinforced
329	HOLDERS FOR DETACHABLE BLADES
330	.Pivoted part
331	..End pivot
332	.Knockdown holders
333	..One movable side
334	.U-strap holder
335	.Sliding-blade assembly
336	..Spring jaw type
337	.Interlocked blade and holder
338	..Spring jaw type
339	..Apertured blade
340	HANDLES AND BLADE CONNECTIONS
341	.Shear or nipper type
342	.Blade connections
343	..Cast-on handle
344	..Welded, riveted or bolted
345	MATERIALS
346	BLADES
346.5	.Razor blade
346.51	..Cutting couple element
346.52	..Having indicia
346.53	..Of specific material
346.54	...Including metallurgical characteristic
346.55	..Including details of cutting edge
346.56	...Toothed or waved edge
346.57	..Having three or more cutting edges
346.58	..Composite razor blade
346.59	...Interfitting sections
346.6	..Reinforces
346.61	..Apertured, notched or lugged
347	.Rotary
348	.Reinforced
349	.Detachable cutting edge
350	.Metallurgical feature
351	.Apertured, notched or lugged
352	.Reamer type
353	.Plural cutting edge
355	.Toothed or waved
356	.Longitudinally curved
357	.Edge structure
500	IMPLEMENTS ADAPTED TO BE DRIVEN BY DETACHABLE PORTABLE POWER-DRIVE MEANS (E.G., ELECTRIC DRILL)

DIGESTS

DIG 1	Rechargeable battery operated
DIG 2	Dry shavers
DIG 3	Envelope openers
DIG 4	Explosive
DIG 5	Lawn edgers

227	STRAIGHTLINE LIGHT RAY TYPE
228	.Process
229	.Aerial bomb sight
230	..Gyroscopically stabilized
231	..With ground speed indicator
232	.Marine or aircraft ground speed indicator
233	.Gun sight
234	..Bore type
235	..Ordnance
236	...Gyroscopically stabilized

STRAIGHTLINE LIGHT RAY TYPE
.Gun sight
..Ordnance
237 ...Self adjusting gun movement compensator
238 ....Compensates for moving target
239 .....And moving craft or gun platform
240 ....Compensates for trunnion tilt
241 ..Illuminated or luminescent
242 ..Critical material
243 ...Colored
244 ..Hood or cover
245 ..Telescopic type
246 ...Having adjustable reticle
247 ...Movable relative to base
248 ....Vertically and laterally adjustable
249 ....Movable to non-use position
250 ...Readily detachable (i.e., knockdown)
251 ..Having variable size sight aperture
252 ..Movable relative to base
253 ...Plural sights, pivotally selective
254 ...Vertically
255 ....And foldably
256 .....And laterally
257 ....And laterally
258 .....Rectilinearly
259 ....Non-rectilinearly
260 .....Pivots about transverse axis
261 ..Multisight
262 .Body related
263 .Structurally installed
264 ..Vehicle
265 ..Archery bow
266 ..Camera
267 .With telemetric means
268 .Celestial
269 ..Time computing
270 ...Including gnomonic indicator (e.g., sundial, etc.)
271 ....And compass
272 .With magnetic compass
273 ..And level or plumb
274 .With straight edge instrument or chart
275 R .Combined
275 G ...With gyroscope
276 .Multisight line
277 ..Common viewpoint
278 ..Relatively movable
279 ...Angularly and rectilinearly
280 ...Each separately adjustable
281 .Vertical and horizontal angle measurer
282 .Vertical angle
283 ..Having gravity responsive indicating means (e.g., pendulum, etc.)
284 ..Including distance finding feature
285 .Horizontal angle measurer
286 .Alignment device
287 ..Railway track
288 ..Vehicle chassis, running gear or headlamp
289 ..Game ball (e.g., football, etc.)
290 .Level (i.e., surveyor's type)
291 ..Self leveling
292 ..With tubular sighting means (e.g., telescope, etc.)
293 .Rod or target
294 ..Self computing type rod
295 ..With leveling or plumbing adjunct
296 ..Extensible rod sections
297 .Reticle
298 ..Adjustable
299 .Instrument support
300 INDICATOR OF DIRECTION OF FORCE TRAVERSING NATURAL MEDIA
301 .Process
302 ..Borehole or tube interior study
303 ..Including calculation or comparison
304 .Borehole direction or inclination
305 ..Etching or marking liquid determines orientation
306 ..Fluid (e.g., drilling fluid, etc.) responsive
307 ...Varied pressure or pressure pulses representative
308 ..Pendulum mounted or directed marker
309 ...Radiant energy or electrically produced marking
310 ...Includes magnetic directional indicator
311 ...Record movable to marking position
312 ..Electrical telemetering to read-out
313 ..Inclination and direction indications
314 ..Indicator image projected on sensitized record (e.g., photographic, etc.)
315 .Thermally sensitive
316 .Gyromagnetic compass
317 R ..Electrical telemetering
317 D ....Differential disparity correction
318 .Gyroscopically controlled or stabilized
319 ..Magnetic compass
320 ..Geographic position indication (i.e., latitude or longitude)
321 ..Plural gyroscopes (e.g., reference platform, etc.)
322 ...Diverse indications
323 ...Directive gyroscope stabilized by auxiliary gyroscope
324 ..Gyroscopic compass
325 ...Transmission system for remote readout
326 ...Selective correction for deviation
327 ...Fluid, suspension or control
328 ..Attitude indicator (i.e., pitch or bank)
329 ...Gyroscope mounted, lever indicator and skyplate
330 ...Spherical indicator
331 .With recorder
332 .With marker
333 .Structurally installed including relation to feature thereof
334 ..Hand implement (e.g., tool, rifle, camera, etc.)
335 .Vehicle running gear, or headlight, inclination
336 ..Wheel supported
337 ..Axle supported
338 .Railway rail spacing and inclination
339 .With cord type straight line guide or holder therefor
340 .With measurement in plural directions or of shape
341 ..With variable angle indication
342 .With independent linear measurement
343 .With angle or shape determination
344 .With damper or governor for sensor
345 ..Magnetic
346 ..Fluid
347 .Attaching means (i.e., adhesive, magnetic or vacuum viewing aid)
348 .With viewing aid (i.e., illuminator or illumination director)
348.2 ..Spirit level electric illuminator
349 .With preselected direction indicator
350 .With protector or shock absorber
351 .Diverse directional indicator
352 ..Includes magnetic compass
353 ..Line plumb and bubble level
354 .Combined
355 R .Magnetic field responsive
355 D ...Dip aligning needle
356 ..Error indicator, preventor, or compensator
357 ...Error-producting-field minimizing

	INDICATOR OF DIRECTION OF FORCE TRAVERSING NATURAL MEDIA
	.Magnetic field responsive
	..Error indicator, preventor, or compensator
	...Error-producting-field minimizing
358	....Adjustable positioned permanent magnet
359	.....Pivoted adjustment
360	..Utilizing cathode-ray tube or photoelectric cell
361	..Electro-magnet or inductor (e.g., flux valve, etc.)
362	...Inductor rotated or vibrated
363 R	..Electrical telemetering
363 K	....Photoelectric pickoff
363 L	....Electrical contact pickoff
363 N	....Electrolytic liquid pickoff
363 Q	....Resistance, capacitance or inductance pickoff
363 Y	....Fluid jet or pressure pickoff
364	..Liquid buoyed magnetic needle
365	.Level or plumb, terrestrial gravitation responsive
366	..Electrically actuated signal or indicator
367	..Plural, similar, separable liquid columns system
368	..Arresting means for movable indicator
369	..Line level type
370	..Work, or workman, attaching means
371	...Requiring no modification of the work
372	....Elastic bias type clamping
373	....Encircling clamp, loop, or strap
374	..Relatively movable, coacting, reference-surface sections
375	...Affecting level or plumb indication
376	..Add-on-type reference-surface section
377	..Liquid type, upper surface utilizing
378	...Float or piston
379	...Bubble
380	....Adjustable size
381	....Plural
382	.....Coacting at an angle
383	.....Relatively adjustable
384	....Liquid container adjustable on reference-surface section
385	.....Cam type adjuster (e.g., gear, screw, wedge, etc.)
386	......Opposing spring
387	......Adjustment indicium
388	.....Adjustment indicium
389	....Bubble-position indicia on reference-surface section
390	....Universal, or plural indicating sections on container
391	..Pendulum
392	...Plumb line (i.e., flexible, line suspended plumb bob)
393	....Line take-up reel
394	.....Spring biased
395	...Plural, coacting in intersecting planes
396	...Liquid buoyed
397	...Gimbal mounted
398	...Weight, variable quantity or center of gravity
399	...Indicium adjustably fixed to reference-surface section or to weight
400	....Cam type adjuster (e.g., gear, screw, etc.)
401	...Motion transmitting mechanism drives indicator
402	...Means limiting swing
403	STRAIGHTEDGE TYPE
404	.Wall guide and plumb (e.g., building construction)
405	..Batter board type
406	..Adjustable vertically
407	..Building is the vertical support
408	...Connected to brick
409	....By line tension only
410	....Having adjustable clamp
411	.Clapboard marking
412	.Shaft aligning
413	.Cord type
414	..With chalking feature
415	.Multiplane angularly adjustable
416	..Roof framing
417	...Having rafter cut indicia (e.g., pitch, rise, etc.)
418	.Square and pivoted straightedge
419	..And sliding
420	..Straightedge as a hypotenuse of the square
421	...Having angle or slope indicating means
422	..Having circumferential pivot, only
423	..With indicia for rafter cuts
424	..With protractor
425	...And sliding straightedge
426	...Located on straightedge
427	.Square and sliding nonpivotal straightedge(s)
428	..Straightedge bisects right angle of square (i.e., centering square)
429	.Square and fixed straightedge
430	.Base attached
431	..Navigation
432	..Perspective drawing
433	...With T-square straightedge
434	...With parallel straightedge arrangement (i.e., drafting machine)
435	..Rotary base
436	..Linear counter rule
437	..With guide or catch for T-square type
438	..Universal parallelism arrangement
439	...Wheel and band
440	....With counterbalance
441	...Double linkage
442	....With counterbalance
443	..Both ends connected
444	...By cord and roller
445	...By rack and pinion
446	...One end moveable along straightedge
447	..Set shift, positively
448	.With means for moving straightedge over a surface
449	..By rollers
450	..Set shift
451	.Combined with level
452	.Plural straightedges, relatively moveable
453	..Triangulation (e.g., solving trigonometric functions)
454	..Parallel type
455	..Intercontrolled bevel blades
456	..Multipivoted straightedges
457	...Navigational
458	...Folding rule type
459	...Two straightedges pivoted at the ends of a central straightedge
460	....At least one pivot is sliding
461	.....Central straightedge longitudinally adjustable
462	....Central straightedge longitudinally adjustable
463	....Three straightedges forming a triangle
464	..Sliding
465	..Single pivot
466	...Handsaw attachment
467	...Lettering guide
468	...T-head with pivoted straightedge

STRAIGHTEDGE TYPE
.Plural straightedges, relatively moveable
..Single pivot
...T-head with pivoted straightedge
469 ....Locking
470 ....Sliding
471 ...With angle indicating means
472 ...Pivoted straightedge and sliding nonpivoted
473 ...Sliding pivotal adjustment
474 .Plural straightedges nonadjustably fixed at right angles (e.g., T-square, triangles, squares)
475 ..With right angle truing adjustment
476 ..With special scale markings
477 ..Lettering guide
478 ..Folding or separable
479 ..T-square
480 ..Try square
481 ..Multiplane
482 .Plural nonadjustable straightedges forming non-right angles
483 .Rules
484 ..With attachment
485 ...For performing diverse function
486 ...Index
487 ....For subdividing
488 ....Optical (e.g., magnifying)
489 ...For supporting above work surface
490 ...Located on end
491 ...Selectable
492 ..Edge details
493 ..Particular material
494 ..Special scale markings
495 .Pivot joints
496 ..180 degree limit
497 ...Locking
498 ..90 degree limit
499 ...Locking
500 ..Locking
121 AREA INTEGRATORS
122 .Planimeters
123 .Electrical
124 .Rolling contact
700 DISTANCE MEASURING
701 .Process
702 .Error compensation (e.g., temperature)
703 .Environmental isolation
704 ..Thermal
705 ..Sealing
706 .Scale reading position sensor (e.g., grid counting)
707 ..Optical
708 ..Magnetic
709 .Convertable to another type measuring means
710 .Machine parts
711 ..Rolling contact
712 .Article support integral with measuring means
713 .Sounding type
714 ..With electric control means
715 ...Of line
716 ..Including electrical signal means
717 ..With sampling means
718 ...Hole type
719 ..Depth indication
720 ..Line with weight
721 ..For nongaseous material
722 ...Liquid (e.g. dipstick)
723 ....With means to adjust measuring rod
724 .....Having plural contacts
725 ....With cleaning means
726 ....With guide
727 ....With filter or vent
728 ....With lock means
729 ....Shape of indicator
730 ....With holder or housing for indicator
731 .....Including seal
732 .Of flexible material
733 ..Supply (e.g., bolt, roll)
734 ..By rolling contact
735 ...With computing means
736 ...With particular electric output or circuit
737 ...With recording or marking means
738 ...Having rectilinear scale
739 ...With signal means
740 ...With stop means
741 ....For motor
742 ....By Clutch
743 ...Combined
744 ...Belt type
745 ...Zero setting means
746 ...Rotating and stationary surfaces
747 ...Opposed rotating surfaces
748 ....Plural
749 .....Only three
750 ..Predetermined stop or signal means
751 ..With marking means
752 ..With ratchet means to move indicator
753 ..With gear means to move indicator
754 ..With take up reel
755 .By flexible tape
756 ..Cord type
757 ..Means to keep tape straight
758 ..With adhesive or securing means
759 ..Specified use
760 ..Combined
761 ..Specified reel housing feature
762 ...With meter
763 ....Including computing means
764 ...Plural tapes
765 ...Opening in housing for reading tape
766 ...Inside-outside measure
767 ...Including brake or lock
768 ...Including attachment
769 ...Housing shape, structure or material
770 ..Including attachment
771 ..Specified tape material
772 .Of length by rolling contact
773 ..With computing means
774 ..Having rectilinear indicator
775 ..Combined
776 ..Belt type
777 ..Inside tube
778 ..On running material (e.g., mill type)
779 ..Implement
780 ...With digital indicator
781 ....Including handle for implement
782 ...With handle
783 .Opposed contacts
784 ..Digital indicator
785 ..Fluid indicator
786 ...Liquid column indicator
787 ..Extensometer
788 ...With circuit means
789 ....Including differential transformer
790 ...Including means to clamp indicator to material
791 ..Optical indicator
792 ..Rotary indicator
793 ...Electrically controlled
794 ...Hand held implement
795 ....Beam type
796 .....Nonpivoted type with scale
797 ....Pivoted type
798 .....Center pivot
799 ......With screw or gear adjustment means
800 ......With spring adjustment means
801 ......With scale
802 ....Rectilinear push or pull actuator
803 ...Bench type
804 ....Lever actuator

	DISTANCE MEASURING
	.Opposed contacts
	..Rotary indicator
805	...With work support
806	..Rectilinear indicator
807	..Pivoted type with scale
808	...With adjustment means
809	..Extensible-rule type
810	..Beam type with scale
811	...With means to adjust one contact member
812	...Including means to lock one contact member
813	..Micrometer
814	...Differential screw
815	...With means for maintaining a constant or limited pressure on the contacts
816	...With wear compensation or backlash prevention means
817	...With lock
818	...With additional indicator
819	....Digital
820	....Electrical
821	...With preliminary setting arrangement
822	....By disengaging threaded element
823	....Micrometer slidably mounted on a beam
824	.....Other contact slidable on beam
825	....Spindle or micrometer slidable
826	....By use of interchangeable parts of different sizes
827	...Inside measurement only
828	...With attachment
829	....Particularly adapted for measuring threaded element
830	...With special scale markings
831	...Details (e.g., spindle or anvil adjustment, material
832	.Single contact with a work engaging support
833	..Adapted for a particular workpiece
834	...Coating or surface layer thickness
835	...Reeled material
836	...Depth of aperture or groove
837	..Fluid actuated indicator
838	..Screw adjustment
501	GAUGE
501.01	.Leather grading or size
501.02	.Continuous gauging

203.18	..Axle, vehicle or wheel supported
203.19	...Plane and radius
203.2	...Trammel
203.21	..Trammel
502	.With calibration device or gauge for nuclear reactor element
503	.Coordinate movable probe or machine
504	.With computer responsive to contact probe
505	.Having program control or an analogue to digital device
506	.Target, weapon or weapon projectile
507	.Lens
508	.Golf stance, swing or club analysis
509	.Bowling ball
510	..Grip
511	.Anatomical
512	..Human
513	...Dental
514	....With mouth or teeth contact
514.1	...Ring type
514.2	...Conformator
515	...Having a support or foot locator for body
516	.Point reproducer
517	.Bearing or bearing part
518	.Masonry construction
519	.Cam profile or keyway
520	.Center, point, distance between centers or centerline location
521	.Earth profile or road grade or shrub or tree trim guide
522	.Container
523	.With conveying wheel support
523.1	..For railway track
523.2	...With recording means
524	.Food portion
525	..Pie, cake, cheese, pizza or sandwich portion
526	.Flooring, floor or wall covering or molding
527	..Floor covering
528	.Wall panel outline marker for utility
529	.Pipe layout or fitting
530	.Pitchometer
531	.Taper
532	..External
533	.Straightness, flatness or alignment
534	.Angle
535	..Squareness
536	..Sine, cosine or tangent bar
537	...Article support
538	..Fixed pivot at one end
539	.Lock or key
540	..Cylinder lock tumbler decoder
541	.Postage stamp or mechanical coupling gauge
600	.Automotive
601	..Mechanical engine timing by piston contact in engine cylinder
602	..Distributor point setting
603	..Connecting rod

GAUGE
.Automotive
..Connecting rod
604 ...With piston
605 ..Piston, piston ring, or crankshaft
606 ..Power train
607 ..Fuel pump, injection nozzle or valve, or carburator
608 ..Frame Alignment
609 ..Brake
610 ...Drum or shoe
611 ..Engine Valve, valve-stem, or tappet
612 ..Torsion bar
613 .Collocating
614 ..Printing member registration
615 ...Photographic member or holder with respect to surface
616 ...Transparent registration sheet to align printing on member
617 ...Printing type or plate
618 ....Curved printing member with respect to its support
619 ....Page form registration with respect to its support or to another form on same support
620 ....Plate registration with respect to second plate or printing sheet
621 ....Plate registration with respect to plate support
622 ...Hand stamp registration with respect to printing location on sheet to be printed
623 ..Sheet registering device
624 ..Earth contacting or working
625 ...Trenching tool depth
626 ..Tool or surrogate
627 ...Die
628 ...Cutter or shaper
629 ....Screw thread
630 ....Cutter with respect to workpiece end
631 .....Shears
632 ....Axis of rotary cutter with respect to axis of cylindrical workpiece
633 ....Planar blade with respect to its holder or another part
634 .....With respect to its rotary holder
635 ......Plural blade holder
636 ....Bit with respect to its holder
637 .....Boring bar holder
638 ....Bit with respect to workpiece or workpiece holder
639 ....Drill or bit with respect to chuck or spindle holder
640 ....Circular cutter with respect to workpiece or workpiece support
641 ....With respect to support
642 ...Spindle or chuck with respect to workpiece or workpiece support
643 ...Millstone wth respect to millstone shaft
644 ..Centering or point location
645 ..Alignment
646 ..Clapboard lapping
647 ...Having tab for supporting bottom of clapboard
648 ..Shingle lapping Gauge
649 ...Having tab on underside of shingle
650 ..Shoe, shoe part or last
651 ..Railway track or railway vehicle part
651.1 ...Track type
652 ..Burner fuel emitting member with respect to electrode spacing
653 ..Insignia with respect to garment, e.g., uniform
654 ..Valve
655 ..Machine parts
656 ...Electrical dynamo
657 ...Rolls, or roll and coacting part
658 ...Typewriter
659 ...Watch
660 ...Wheel quartering or crank arm, connecting rod or crank pin with respect to one or the other
661 ...Plural axes center for common axis
662 .Button or buttonhole
663 .Proportional line segmenter
664 ..Parallelogram type
665 ..Dividers
666 .With point marker
667 ..For door or drawer hinge, pull or securing means
668 ..For wind-up tape or tape casing, or marker attachment for tape
669 ..Plural markers
670 ..Having marker centering means
671 ...For marking centers of hole
672 ...Having diverging-angle bisector workpiece-contacting members with marker on angle bisector
673 ...Having adjustable workpiece-contacting centering means
674 ....Pivoted caliper workpiece-contacting means
675 ....Rack and pinion operating workpiece-contacting means
676 ...Having workpiece-contacting tapered centering means
677 ..Having workpiece-contacting device with marking to align with workpiece marking
678 ..Angularly adjustable about an axis
679 ..Marker located with respect to two different directions
679.1 .Special scale markings
542 .Internal
543 ..Concentricity or eccentricity
543.1 ..Fluid type
544 ..Earth cavity or tube
544.1 ...Including means to rotate probe
544.2 ...Having means to actuate probe
544.3 ....Biased probe
544.4 ..Tapered probe
544.5 ..Having more than two probes
544.6 ...Only three probes
542.1 ..Telescoping caliper or stem gauge
545 .Comparison with a standard
546 ..Profile
547 ...Optical comparison
548 .Plural tests
549 .With support for gauged article
550 ..Concentricity
551 ..Profile
552 ...Having plural contact members
553 ...Member contacts successive points on the article
554 ....With recording of contact member position at each point on the article
555 ..Having indicator of probe position or movement
555.1 .Circular size
555.2 ..Aperture type
555.3 .."V" type
555.4 ..Flexible band type
556 .Having a movable contact probe
557 ..Plural probes
558 ..Electrical switch or transducer responsive to probe or probe is part of electrical circuit
558.01 .Pivoted probes (e.g., divider, caliper, etc.)
558.02 ..Proportional
558.03 ..Point parallelizing
558.04 ..Having adjustable legs
558.05 ...By screw means

	GAUGE
	.Pivoted probes (e.g., divider, caliper, etc.)
	..Having adjustable legs
	...By screw means
558.06	....Tangent
558.07	....Median
558.08	....Quick adjustment
558.09	....Having opposed threads
558.1	....Rotatable nut
558.2	..Plural legs or contact probes
558.3	..Removable probe
558.4	..Pivoted probe
558.5	..Median handle
559	.Movable contact probe per se
560	..Plural probes
561	..With electrical switch or transducer responsive to probe
561.1	.Conformator or adjustable curve template
561.2	..Flexible type
561.3	...Including plural adjustment means
562	.Template
563	..Single sheet type
564	...Alphabetical or numerical symbol type
565	...Geometrical figure, three dimensional to two dimensional figure or curve
566	...Line or guide
567	.Surface plate or gauge block
567.1	..Adjustable gauge block
568	.Work support adjustment
569	..Rotary
570	...Pin and slot type
571	.With scale
572	.Probe support
573	.Work support
574	POINT MARKER GUIDE
575	.Button or buttonhole maker guide
576	..With workpiece support
577	.With support for workpiece
578	.For plural markers
579	.For maker movement in direction of marker axis

CLASS 34 DRYING AND GAS OR VAPOR CONTACT WITH SOLIDS

DECEMBER 1990

1	MATERIAL SUBJECTED TO ELECTRICAL ENERGY
2	FEATHER TREATING
	PROCESSES
3	.Hair on head
4	.With selected radiant energy
5	.With freezing, congealing or thickening
6	.Sheet or web contact preventing by spacer sheets, webs or strands
7	.Retarding treating action by shielding
8	.With centrifugal force
9	.With contacting of material treated with liquids or solids
9.5	..Wood treated
10	.With fluid current conveying or suspension of treated material
11	.With treated material recirculation
12	.With operation on treated material other than drying
13	..With cooling
13.4	...Wood treated
13.8	..Wood treated
14	.With mechanical liquid removal
15	.With vacuum and/or gas or vapor pressure varying or control and/or fluid sealing
16	..Sheets, webs or strands
16.5	..Wood treated
17	.Diverse types of drying operations
18	..Sheets, webs or strands
19	.Combined
20	.Cooling by gas or vapor contact
21	.Hollow articles and/or forms
22	.Gas or vapor contact with material treated
23	..Sheets, webs or strands
24	...With spacing, rolling or coiling
25	..Material speed, thickness or quantity control
26	..Temperature control or varying and treatment of gas or vapor
27	...Vapor removal from gas
28	...With treated material motion
29	...Gas or vapor flow directing or control
30	..Temperature control or varying
31	...With treated material motion
32	..Treatment of gas or vapor
33	..With treated material motion
34	..Gas or vapor flow directing or control
35	..Heat conserving
36	..Special gas or vapor
37	...Vapors
38	..Piling or arranging material treated
39	.Radiant or conducted heating
40	..With evolved gas or vapor treatment
41	..Sheets, webs or strands
42	.Miscellaneous
	APPARATUS
43	.With automatic control
44	..Of plural operations
45	...Of operation sequence
46	...Of heater, contacting gas humidity and/or gas mixing
47	..Of gas mixing
48	..Of heater
49	...By web or strand tension or breaking
50	..Of contacting gas humidity
51	..Of gas or vapor pressure in treating enclosure
52	..Of rate of treated material motion
53	..Of time period
54	..Of flow of gas or vapor treating fluid
55	..Of starting and/or stopping
56	..Of treated material feeding and/or discharging
57 R	.With fluid current conveying of treated material
57 A	...Vertical gas projection
57 B	...Lateral air blast
57 C	...Inclined grate
57 D	...Mechanical rotating element
57 E	...Rotary gas current
58	.With apparatus using centrifugal force
59	..Rotary scattering member
60	.For diverse operations on treated material
61	..With two or more nondrying means
62	..With treated material cooling means
63	...Internal rotary drum drier
64	...Gravity flow-type drier
65	....With integral cooling chamber or section
66	...Cooler chamber integral with or similar to drier
67	...Atmospheric
68	..Diverse heater types and/or gas or vapor contact types only
69	..Diverse types of liquid removers only
70	...With expressing or wringing
71	...With means to remove liquid from treated material by contact with solids
72	.With means to treat gas or vapor
73	..By vapor condensation
74	...With other gas or vapor treatment
75	...Direct contact with cooling substance
76	...With force circulation
77	....Recirculation of treating gas or vapor
78	...Recirculation of treating gas or vapor
79	..Separation of substances from treating or exhaust gases or vapors
80	...By absorbent
81	....In or forming walls, ceiling or floor
82	...By filter
83	..Jet devices
84	...Gas or vapor circulators or flow promotors
85	.With apparatus cleaner and/or escaping material collector
86	.With waste gas heat and/or power conservers
87	.With means to interlock operable elements
88	.With display, inspecting or illuminating means
89	.With indicating or testing means
89.1	.Blotting means combined with means for purpose other than drying
89.2	..With ruler
90	.Combined
91	.Convertible
92	.Vacuum
93	.Solar
94	.Sheet or web contact preventing by spacer sheets, webs or strands
95	.Means to remove liquid from treated material by contact with solids
95.1	..Having manipulative means
95.2	...Attachable to hand (e.g., finger)
95.3	...For rolling contact
95.4	...For rocking contact
96	.For hair on head
97	..With gas or vapor flow for contact
98	...Plural distributors
99	...Head conforming distributor
100	....Recirculation of treating gas or vapor
101	...With hair supports
102	.Treated material recirculating means
103	.Forms
104	.For hollow article
105	..With conveying or handling means

APPARATUS
.For hollow article
106 ..With suspension means and bottom retainer
107 .For slender rigid articles
108 .Rotary drums or receptacles
109 ..Compartmented or pocketed
110 ..External
111 ...With belt or felt drier
112 ...With hopper feed or article securing means
113 ...Plural
114 ....Gas or vapor circulation for contact with treated material
115 .....Through material or introduction through drum
116 ....With belts or felts
117 .....With threading, stripping or guiding devices
118 .....Tightener
119 ....Heat exchange fluid supply and/or removal
120 ....Threading, stripping, or guiding devices
121 ....Mounting and/or driving means
122 ...Gas or vapor circulation for contact with treated material
123 ...With belts or felts
124 ...Heat exchange fluid supply and/or removal
125 ....Removal only
126 ..With additional translating means
127 ..Plural
128 ...One within another (e.g., nested)
129 ...With feed from one to another
130 ..With gas or vapor flow for contact with treated material
131 ...Recirculation of treating gas or vapor
132 ...With heating means
133 ....With drum or receptacle enclosing housing
134 ....Heat exchange and/or gas or vapor conducting conduits in drum or receptacle
135 ...Axial treated material feed type
136 ....Concurrent gas or vapor flow only
137 ....Counter-current gas or vapor flow only
138 ...Gas or vapor conducting conduits in drum or receptacle
139 ...With drum or receptacle enclosing housing
140 ..Vapor exhaust
141 ...Axial treated material feed type
142 ..Axial treated material feed type
143 .Stationary press type
144 ..Plural press units
145 ..Gas or vapor circulation for contact with treated material
146 ..Nonplanar press couples
147 .Spiral treated material path type
148 .Sheet, web or strand
149 ..Sheet elevator type
150 ..Sheet on edge
151 ..For flexible sheets, webs or strands
152 ...Running lengths
153 ....Winding reels
154 ....Plural webs or strands
155 ....With gas or vapor circulation for contact with treated material
156 .....Fluid current supports or guide
157 .....Suspended loops
158 .....With edge holding means
159 .....With zigzag runs of treated material
160 .....Elongated thin gas or vapor stream
161 ....With zigzag runs of treated material
162 ...Endless conveyers or movable grippers
163 ...Movable treated material holders
164 .Treated material vibrating type
165 .Gravity flow type
166 ..Trough or tube, with axially rotary conveyer or agitator
167 ..Plural gravity path, plural feed and/or discharge
168 ..With gas or vapor flow for contact with treated material
169 ...Recirculation of treating gas or vapor
170 ...Inverted imperforate ducts
171 ...Shelf-to-shelf or zigzag treated material flow
172 ....Dumping shelves or pockets
173 ....Rotary stirrer or shelf
174 ...Foraminous distributors or walls
175 ..With venting means or wall
176 ..With treated material tubes
177 ..With heating tubes
178 ..Shelf-to-shelf or zigzag treated material flow
179 .Stationary receptacle or tube with agitator or conveyer
180 ..Plural units
181 ..With gas or vapor flow for contact with treated material
182 ...Axial treated material feed type
183 ..Axial treated material feed type
184 .Rotary or swinging carrier or rack
185 ..With agitating means or discharging scrapers
186 ..Plural rotary or swinging units
187 ..With gas or vapor circulation for contact with treated material
188 ...Air scoops and/or suspended treated material supports
189 .Elevator type
190 ..Plural
191 .Reversible or pulsating treating gas or vapor flow
192 .Removable shelf or tray type
193 ..Plural nonvertically aligned
194 ..With shelf or tray handling means
195 ..With gas or vapor circulation for contact with treated material
196 ...Recirculation of treating gas or vapor
197 ...With heater
198 ....With liquid heater or vaporizer
199 ...Zigzag treating gas or vapor flow
200 ..With liquid heater or vaporizer
201 .Houses, kilns and containers
202 ..Article inserted type
203 ..With conveyers providing plural or zigzag treated material paths
204 ...Separable truck or tray
205 ...Plural independent paths for treated material
206 ...Pusher type
207 ...Plural run endless conveyer
208 ...Single run endless, both courses carrying treated material
209 ..Plural treating units or compartments
210 ...With gas or vapor circulation for contact with treated material
211 ....Superposed floors or chambers
212 ....Recirculation of treating gas or vapor
213 .....Parallel circulation only
214 ....Parallel circulation only
215 ....With heater
216 .....With conveyer and/or movable treated material support
217 ....With conveyer and/or movable treated material support

	APPARATUS
	.Houses, kilns and containers
218	..With gas or vapor circulation for contact with treated material
219	...Recirculation of treating gas or vapor
220	....Caused by heater action only
221	....Caused by jet action
222	....Movable gas or vapor distributor
223	....Plural gas or vapor forcing means
224	....Plural gas or vapor inlets and/or outlets
225	.....In wall, ceiling or floor
226	...Tortuous gas or vapor path
227	...Gas or vapor flow toward or from treated material entrance or exit
228	....Counter-current to treated material motion only
229	...Movable gas or vapor distributor
230	...Plural gas or vapor forcing means
231	...Deflecting baffle in treating chamber
232	...Plural gas or vapor inlets and/or outlets
233	....In wall, ceiling or floor
234	...Caused by heater only
235	..With venting means
236	.Treated material handling or conveying
237	.Trays or floors
238	..Single or plural trays only
239	.Supports
240	..Rods or rolls
241	.Gas or vapor distributing and applying agitators
242	.Chamber seals
243 R	.Miscellaneous

CLASS 36 BOOTS, SHOES AND LEGGINGS

DECEMBER 1990

1	MISCELLANEOUS
1.5	BOOTS OR SHOES AND DETACHABLE LEG COVERS
2 R	LEGGINGS AND GAITERS
2 A	..Spiral
2 B	..Molders
83	BOOTS AND SHOES
84	.Made of material other than leather
85	..Rigid material (e.g., metal, wood, etc.)
86	...Wood
87	..Plastic
88	.Foot-supporting or foot-conforming feature
89	..Ankle support
90	...For child's foot
91	..Arch support
92	..Heel support
93	..Form-fitting interior
94	...Toe spacer
95	...For relief of corn or bunion
96	..Foot shield
97	.With adjustment of shoe size
98	.With coating, treatment or impregnation of shoe
99	.Having plural similar parts (e.g., two tongues, etc.)
100	.Convertible from one style or color to another
101	..By detachable uppers
102	.Resilient or flexible shoe
103	.Having particular outsole (e.g., sectional sole)
104	..Flat sole
105	.Having particular heel (e.g., closure at rear of wearer's heel)
106	.Lacking particular shoe part (e.g., without upper)
107	.Having shoe-reinforcing plate
108	..Shank support
109	.With leg portion
110	.Shoe for cast on foot
111	.Animal shoe
112	.Shoe for children or dolls
113	.Occupational (e.g., Roof Climbing, Gardening, etc.) or Athletic Shoe
114	..Athletic shoe or attachment therefor
115	...For sports (e.g., skating, etc.) featuring relative movement between shoe and ground
116	....For walking on shifting media
117	.....Ski boot
118	......With leg extension
119	......With interior foot-retaining means
120	......With separate pivotal portion
121	.......Cuff-restraining means
122	.....Snow shoe (e.g., having binding, harness, etc.)
123	......Foldable or collapsible snowshoe
124	......With anti-slip means (e.g., cleat, etc.)
125	......With binding permitting foot to pivot
126	...For baseball
127	...For golf
128	...For football
129	...For track
130	...For bowling
131	...For riding (e.g., cycling, horse riding, etc.)
132	...Attachment (e.g., weight for shoe, etc.)
133	....Surface to control flight of kicked object
134	....Cleat (e.g., movable, detachable, etc.)
135	.....Blocking device
136	.Shoe attachment (e.g., ornament, pocket, etc.)
137	..Light-reflecting or illuminating means
138	..To facilitate removal or donning of shoe
139	..Noise maker

391 ..Overlying with end exposed (i.e., shingled)
392 ...With stop or follower
393 ...Plural index
394 ...Hinge element cooperating with base
395 ....Releasably attached to file item
396 .....Cooperating with sheet fold
397 ....Extended hinge
398 ...Hinge cooperating with outwardly directed flanges of base
399 ...File item hinges to adjacent file item
400 ...Hinge cooperating with aperture in base
401 ...Secured by means through aperture or notch or engaging a protrusion in the file item
402 ....Opposed prongs cooperating with aperture
403 ..Hinge cooperating with aperture or channel in base
404 ..Secured by means engaging aperture in file item or file item support
405 ..File item secured to carrier by aperture or pocket
406 DISPLAY DEVICE WITH GAS OR LIQUID MOVEMENT
407 .With dispersion of fluid medium
408 ..As soap bubble
409 DISPLAY DEVICE WITH FREE ARTICLE MOVEMENT
410 .Snowfall simulator
411 THREE-DIMENSIONAL MOVABLE FIGURE DISPLAY DEVICE
412 .Fluid operated
413 ..Automobile hood ornament
414 .Electromotor operated
415 .With translation of figure
416 .With eye or lip movement
417 .With wing movement
418 .With arm and leg movement
419 .With arm movement
420 .With leg movement
421 TWO-DIMENSIONAL MOVABLE FIGURE DISPLAY DEVICE
422 .Fluid operated
423 .Electromotor operated
424 .Operated by vibration of vehicle
425 ..With eye or lip movement
426 DISPLAY DEVICE WITH MAGNETICALLY MOVED OBJECT
427 DISPLAY WITH SPECIAL EFFECTS
428 .Simulated fireplace
429 .Electromotor operated
430 ..Rotatable
431 ...Illuminated
432 ....Rotating lamp
433 ....Disk
434 .....Polarized
435 ...Disk
436 ..Movable screen
437 ...Grid or artwork
438 ...Moving belt
439 .Fluid operated
440 ..Rotatable
441 ...Illuminated
442 .Selective or intermittent illumination
443 ..Alternate front and rear illumination
444 ..Colored lights
445 .Movable card
446 CHANGING EXHIBITOR
447 .Alphanumeric (monogram) device
448 ..Liquid crystal
449 ..Magnetic
450 ..Bar segment, e.g., figure eight
451 ...Illuminated
452 ..Illuminated
453 .Variable reading stationary exhibitor
454 ..Lenticular lens
455 .With sound
456 ..Exhibitor (e.g., toy doll) rotated or operated by turntable or phonograph
457 ..Exhibitor controlled by sound circuit
458 .Scale operated
459 .Door operated
460 .Door latch operated
461 .Cigar cutter or lighter operated
462 .Train-order holder
463 .With electric circuit control
464 ..Mechanical switch
465 ..Photoelectric and capacity switching
466 ..Electromotor operated
467 ...Web advancing means in combination with sensing or selector means
468 ..Magnetoclutch let off
469 ..Magnetoclutch take-up
470 .Motor operated
471 ..Double reel and web
472 ..Endless web
473 ..Rotatable
474 ...Disk
475 ...Hinged leaves
476 ..Shifter

	CHANGING EXHIBITOR
477	.Fluid operated

496	...Clutch take-up
497	..Hinged display item
498	...Clutch take-up
499	...Flaccid type
500	...Sequential exposure of display item
501	..Radially movable display item
502	..Illuminated
503	..Plural cylindrical or polygonal rotatable carrier
504	...Biaxial
505	....Carrier with common positive drive
506	..Cylinder or polygonal carrier
507	...Clutch take-up
508	.Shiftable display item or item support
509	..Including shift mechanism
510	...For random selection of item from group thereof
511	...Having continuous cycle of item or item support
512	....Endless carrier type
513	..Reciprocating
514	.Single reel and web
515	..Reel cabinet
516	...Revolving
517	..Spring rewind
518	.Double reel and web
519	..Cluth take-up
520	..Spring rewind
521	...With clutch
522	..Reversing gear
523	...Clutch take-up
524	.Endless conveyor
525	..Driven by frictional contact
526	..Hinged leave
527	..Radial leave
528	..Clutch take-up
529	.Folding web and reel
530	.Hinge mounted display item or item support
531	..With means to rotate
532	...With means to select
533	..Display item hinged on single axis
534	..Overlaying
535	..Hinge cooperating with aperture or channel in base
536	..Secured by means engaging aperture in item or item support
537	..Item secured to carrier by aperture or pocket
538	DUMMY SIGN
539	.Folding display
540	.Illuminated
541	ILLUMINATED SIGN
542	.Luminescent
543	..Ultraviolet source
544	..Electroluminescent
545	.Gas filled tube
546	.Edge illuminated
547	..Fiber optic, i.e., light pipe
548	.Polarized
549	.Extruded frame
550	.Light bulbs arranged in the outline of indicia
551	..Mounted on three-dimensional alphanumeric structure
552	.Three-dimensional alphanumeric structure
553	.Having multiple function (i.e., illumination per se)
554	..Lamp shade attached
555	..Flashlight attached
556	..Vehicle light
557	..Streetlight
558	..Elongated tubular light
559	.External light source
560	..Projected
561	..Concentration of natural light
562	...With auxilliary light source
563	.Indirect
564	.Lamp box
565	..Pavement embedded
566	..Mailbox receptacle
567	..Trash receptacle
568	..Directory, e.g., building type
569	...Map type
570	..Exit
571	..Collapsible
572	..Double face
573	..Compartmented
574	..Detachable or hinged cover
575	..Interchangeable plate
576	...Interchangeable letters or numbers
577	..Multiple spaced screen
578	..Light or weather seal
579	..Perforated face
580	...Stencil screen
581	.Colored light
582	.Reflective
583	..Reflectors arranged in the outline of indicia

DIG 1 Release trigger

CLASS 43 FISHING, TRAPPING AND VERMIN DESTROYING

DECEMBER 1990

1	MISCELLANEOUS
2	DECOYS
3	.Duck
4	FISHING
4.5	.Methods of fishing
5	.Fish landing devices combined with tackle, e.g., gaffs, grapples
6	.Harpoons and spears
6.5	.Gathering or catching device with conveyer to boat
7	.Nets
8	..Handling apparatus
9.1	..Trawl
9.2	...Having excluder device
9.3	...Having limiting or limit indicating feature
9.4	...Bottom running sled
9.5	...Bottom running roll
9.6	...Utilizing electrical shock to control fish or aquatic animal
9.7	...Having specific flow affected board device for holding net mouth open, e.g., an otterboard, etc.
9.8	...Having specific line element
9.9	...Having specific chafe preventing element
9.95	...Fabric construction
10	..Gill
11	..Dip
12	...Foldable
13	..Fish wheels
14	..Seines
15	.Automatic hookers or catchers
16	..Signaling
17	.Signal devices
17.1	.Electric current or sonic wave energy
17.2	.Releasing devices
17.5	.Illuminated, e.g., luminous
17.6	..Artificial bait
18.1	.Rod
19	..With line propelling or trajecting means
19.2	..With nonreeling motion means for rod and line, or line
20	..Reel section
21	...Motor operated
21.2	..Holders, supports, steadying devices
22	..Reel mounts
23	..Butts
24	..Line guides or tips
25	..Attachments
25.2	...Hook and tackle holders
26	..Cases
18.5	..Fiber glass or graphite fishing rod
26.1	.Motor-operated
26.2	..Artificial bait
27.2	.Trolley apparatus
27.4	.Fixed support line handling means, e.g., trawls
34	.Trap hooks
35	..Artificial bait
36	..Expanding
37	..Pull-actuated
41	.Enclosed or protected
41.2	..Casting guards
42	.Artificial bait
42.02	..Line surge action with biased reaction
42.03	..Automatically movable directing vane
42.04	..Shiftable on strike
42.05	...Lure slidable on line
42.06	..Substance emitting and/or water passage
42.08	..Interlocked hook lure and line connections
42.09	..Interchangeable body parts
42.1	..Flexible body's housing or guarding hook
42.11	..Plural lures and movably connected rigid lure members
42.12	...One member within the other, at least one spinning
42.13	...Plural movable members offset or at sides of body
42.14	...Plural rotating members
42.15	...Movably connected in series
42.16	....One member rotating
42.17	.....Sheet material member preceding and rotating
42.18	....Sheet material
42.19	..Spinner rotatably mounted on shaft
42.2	...Spiral or oppositely turned vanes
42.21	....Plug or minnow type
42.22	..Adjustable direction or buoyancy control
42.23	...Selective or shiftable lure to line connection
42.24	..Flexible or with flexible appendages, e.g., worms
42.25	...Feathers, strands, fibers, etc., only, e.g., flies
42.26	...Bodies with plural side-attached appendages
42.27	....Wing simulations
42.28	...Bodies with trailing appendages
42.29	....Detachable bait strip
42.3	....Two rearwardly directed appendages, e.g., frogs
42.31	..With confined shifting material and/or sound making
42.32	..Ornament
42.33	...Transparent, with reflector or pattern
42.34	...Projections and indentations for simulation and reflecting
42.35	..Hollow bodies
42.36	..Hook and line connection extending through or along body
42.37	..Mounted on hook
42.38	...Detachable
42.39	..Weighted
42.4	..With guards
42.41	...Hook housed or guarded by body
42.42	...Guards downwardly projecting
42.43	...Hook closing
42.44	..Hook pivoted to lure with motion-limiting means
42.45	..Solid bodies
42.46	...With spiral or vanes for spinning
42.47	...With sheet material vane
42.48	...Plugs
42.49	..Special line attachments
42.5	..Spoon type
42.51	...With spiral or oppositely directed vanes
42.52	...Nonmarginal and/or nonpivoted hook attachments
42.53	..Methods of making
42.7	.Snagging and shellfish rigs, e.g., jiggers
42.72	.With line shock absorber or resilient extension feature
42.74	.Spreaders or separators for plural lines and/or hooks
43.1	.Line-attached bodies, hooks and rigs
43.11	..Line storing
43.12	..Releasable from line, e.g., casting weights
43.13	..Line-guiding or twist-controlling, e.g., trolling vanes, otters
43.14	..With adjustable weight or buoyancy
43.15	..Plural diverse-type bodies
43.16	..Hooks
43.2	...Guards, e.g., weedless hooks
43.4	....Shiftable, collapsible, or line-operated

	FISHING
	.Line-attached bodies, hooks and rigs
	..Hooks
	...Guards, e.g., weedless hooks
43.6	....Hook closing
44.2	...Bait holders and retainers
44.4	....Bait encircling
44.6	....Opposed gripping jaws
44.8	....Mounted on, integral with, or rigidly connected to hook
44.81	...Weighted
44.82	...With plural piercing points
44.83	...With leaders and/or line-connection feature
44.84	....Branch or lateral line type
44.85	.....Adjustable along line
44.86	....With check or collect ring keeper
44.87	..Selectively free sliding or fixed on line
44.88	...Line strain or motion actuated, e.g., strike or pole tip released
44.89	..Bendable or deformable material for line connection, e.g., split shot
44.9	..With line passing through center of body
44.91	...With line-gripping means
44.92	..With relatively movable parts and/or resilient construction for attachment to line
44.93	...Movable wedge or collect ring type
44.94	...Spiral or pigtail line holder wrapped around stem
44.95	...Resiliently biased or elastic line clamping means
44.96	..Sinkers with ground-engaging means, e.g., trolley or surf anchors
44.97	..Sinkers with guards or retrieving features
44.98	.Lines and/or leaders
44.99	.Bait distributors, e.g., chumming devices
53.5	.Disgorgers and gags
54.1	.Holder
55	..Catch and natural bait
56	..Minnow buckets
57	...Aerating pump
57.1	..Hook
57.2	...Holder for snelled hook under tension
57.3	..Trotline holder
58	TRAPS
59	.Burglar
60	.Imprisoning
61	..Swinging or sliding closure
62	..Falling encaging member
63	..Jaw cage type
64	.Self and ever set
65	..Nonreturn entrance
66	...Victim-opened
67	...Victim-closed
68	..Sinking compartment
69	..Tiltable platform
70	...Trigger-released
71	..Rotatable platform
72	...Trigger-released
73	.Self-reset
74	..Rotating door or platform
75	..Smiting
76	.Victim-reset
77	.Impaling or smiting
78	..Rectilinear striker movement
79	...Impaling
80	....Burrow type
81	..Swinging striker
81.5	...Auxiliary striker holder
82	...Direct engaging latch
83	....Automatic catch
83.5	...Automatic set
84	.Explosive
85	.Choking or squeezing
86	..Movable loops
87	..Constricting noose
88	.Jaw
89	..Suspended
90	..Modified jaw
91	...Parallel oscillating
92	..Modified trigger mechanism
93	...Direct engagement
94	....Wedge or toggle
95	...Automatic catch
96	..Attachments
97	...Setting
98	.Electrocuting
99	..Body-removing or concealing
100	.Fish
101	..Weirs
102	..Elevatable cage
103	..Portable or floating
104	...Towable
105	..Foldable or collapsible
106	..Porpoise
107	.Insect
108	..Tree trunk
109	..Furniture
110	..Operator-controlled
111	..Mechanically operated
112	..Electrocuting
113	..Illuminated
114	..Adhesive
115	...Flypaper holders
116	...Flexible with drawable section
117	...Upright perch slidable receptacle
118	..Reticulate fabric
119	..Window screen or door
120	..Garbage can
121	..Crawling insect type
122	..Fly vases
123	..Bedbug type
124	VERMIN DESTROYING
125	.Fumigators
126	..Tree apparatus
127	..Smokers
128	...Bee type
129	..Vaporizers
130	...Steam
131	.Poison holders
132.1	.Insect
133	..Catchers
134	...Implements
135	....Spring-operated
136	....Adhesive
137	....Swatters
138	...Machines
139	....Suction
140	.....Traveling
141	....Blast
142	....Rotated agitator
143	....Oscillated agitator
144	..Burners

	CROSS-REFERENCE ART COLLECTION
	******************************
900	LIQUID INSECTICIDE SPRAYER

250 FLAMELESS OR GLOWLESS
251 .Activatable by or containing water
252 ..Free metal-containing
253 ...With organic or second elemental material
265 SOLIDIFIED LIQUID (E.G., GEL, ETC.)
266 .Liquid alkanol base
267 ..With carbohydrate (e.g., cellulose compound, cotton, etc.)
268 .Liquid hydrocarbon base (e.g., gasoline, etc.)
269 ..With plant derivative of unknown composition (except rosin or rosin derivatives) or carbohydrate
270 ..With organic nitrogen compound
271 ..With organic polymer polymerized through olefinic or acetylenic bond (e.g., methacrylate polymers, polypropylene, etc.)
272 ..With organic -C(=X)X- compound, wherein the X's are the same or diverse chalcogens (e.g., aluminum carboxylates, rosin salts, etc.)
275 CANDLE COMPOSITION
280 SOLID CARBONACEOUS FUEL DISPERSED IN A LIQUID MEDIUM (E.G., DISPERSED COAL, COKE, CARBON POWDER, PEAT, ETC.)
281 .The liquid medium is, or contains, hydrocarbon
282 ..Liquid hydrocarbon, or liquid hydrocarbon and water, are the only components
300 LIQUID FUELS (EXCLUDING FUELS THAT ARE EXCLUSIVELY MIXTURES OF LIQUID HYDROCARBONS)
301 .Emulsion fuel (e.g., water-gasoline emulsions, etc.)
302 ..Alkanol component
303 .Oxo still bottoms containing (i.e., distillation residues from reaction product of carbon monoxide, hydrogen, and olefin)
304 .Organic compound of indeterminate structure which is a reaction product of an organic compound with sulfur halide or elemental sulfur containing
305 .Phosphosulfurized or phosphooxidized organic compound of indeterminate structure containing (i.e., reaction products of organic compounds with phosphorus sulfides or oxides)
306 .Rosin, tall oil, or derivatives thereof containing (except abietic acids or fatty acids derived therefrom)
307 .Plant or animal extract mixtures or extracts of indeterminate structure containing
308 ..Containig triglycerides (e.g., castor oil, corn oil, olive oil, lard, etc.)
309 .Organic oxidate of indeterminate composition containing (e.g., paraffin wax oxidate or petroleum oxidate, etc.)
310 ..Chemically reacted organic oxidate (e.g., esterified, etc.)
311 .Sludge, pitch, tar, or tar distillate containing
312 .Quinone or anthraquinone containing (e.g., quinhydrone, benzoquinones, etc.)
313 .Carbohydrate containing
314 .Boron containing
315 ..Phosphorus attached directly or indirectly to the boron
316 ..Three carbons or three fluorines bonded directly to the boron
317 ..Nitrogen attached directly or indirectly to the boron
318 ..Three identical or diverse chalcogens bonded directly to the boron
319 ...Carbon, chalcogen, and boron in the same ring
320 .Silicon containing
321 .Free metal or alloy containing
322 .Containing acyclic oxygen single bonded to acyclic oxygen (i.e., peroxy compounds)
323 .Containing -X-N(=X) or -X-N(=X)(=X) bonded directly to carbon, wherein the X's are the same or diverse chalcogens (e.g., thionitrite esters, etc.)
324 ..Nitrates or Thionitrates (i.e., -X-N(=O)(=O) bonded directly to carbon)
325 ...With organic non-nitrate nitrogen compound
326 ...With organic non-nitrate chalcogen compound
327 .Organic azide compound, or organic compound having acyclic nitrogen double bonded to acyclic nitrogen (e.g., diazo compounds, etc.)
328 ..Azo compound (i.e., each of the nitrogens is single bonded to carbon)
329 .Heterocyclic carbon compound containing a hetero ring having chalcogen or nitrogen as the only ring hetero atoms
330 ..Compound of indeterminate structure prepared by reacting a heterocyclic compound of known structure
331 ...The heterocyclic compound reactant is a dicarboxylic acid anhydride (e.g., reaction product of succinic anhydride with a polyamine, etc.)
332 ...The heterocyclic compound reactant is an oxirane (e.g., reaction product of epihalohydrin with amine, epoxide reactions, etc.)
333 ..The hetero ring contains six members including nitrogen and carbon
334 ...Chalcogen in the hetero ring
335 ...Plural nitrogens in the hetero ring (e.g., piperazines, etc.)
336 ....Triazine or 1,3-diazine
337 ...Polymer or copolymer of a vinyl pyridine
338 ...Acyclic chalcogen or acyclic nitrogen bonded directly to ring carbon of the hetero ring
339 ...The hetero ring is unsubstituted or hydrocarbyl substituted only, or salts thereof (e.g., pyridyl salicylate salts, isoquinoline, etc.)
340 ..The hetero ring contains five members including nitrogen and carbon (e.g., pyrrolidones, porphines, etc.)
341 ...Chalcogen in the hetero ring
342 ...Plural nitrogens in the hetero ring (e.g., imidazolines, etc.)
343 ....At least three nitrogens in the hetero ring (e.g., triazoles, tetrazoles, etc.)
344 ....Having -C(=X)-, wherein X is chalcogen or NH, attached indirectly to the hetero ring by nonionic bonding
345 ....Carboxylic acid salt of the hetero ring compound, or a free carboxylic acid is present

LIQUID FUELS (EXCLUDING FUELS THAT ARE EXCLUSIVELY MIXTURES OF LIQUID HYDROCARBONS)
.Heterocyclic carbon compound containing a hetero ring having chalcogen or nitrogen as the only ring hetero atoms
..The hetero ring contains five members including nitrogen and carbon (e.g., pyrrolidones, porphines, etc.)
346 ...Polymeric or copolymeric compound having plural occurrences of the hetero ring (e.g., alpha-olefin maleimide copolymers, etc.)
347 ...Acyclic chalcogen bonded directly to each carbon adjacent to the ring nitrogen (e.g., succinimides, etc.)
348 ....Substituent on the ring nitrogen contains an acyclic -C(=X)- group, wherein X is chalcogen
349 ..The hetero ring contains six members including carbon and chalcogen (e.g., six-membered sorbitans, ketone peroxides, etc.)
350 ..The hetero ring contains five members including carbon and chalcogen
351 ...Acyclic chalcogen bonded directly to ring carbon of the hetero ring (e.g., five-membered lactones, anhydrides, sorbitans, etc.)
352 ...Ring carbons of the hetero ring are unsubstituted or hydrocarbyl substituted only
353 ..The hetero ring contains three or four members
354 .Aluminum or heavy metal, other than lead, containing
355 ..Inorganic metal carbonyl compound (e.g., iron carbonyl, etc.)
356 ...With organic -C(=O)O- containing compound (e.g., carboxylic acids, esters, etc.)
357 ..Inorganic compound of Zr, Cr, Cu, Zn, or Ni
358 ..Organic compound containing the heavy metal or aluminum
359 ...Metal carbonyl compound (e.g., cyclopentadienyl manganese tricarbonyl, etc.)
360 ....Substituted or unsubstituted cyclopentadienyl manganese tricarbonyl, with an organic compound having -C(=O)O- not bonded to heavy metal or aluminum
361 ...Five-membered, unsaturated carbocycle bonded directly to the heavy metal or aluminum (e.g., ferrocene, etc.)
362 ...Heavy metal or aluminum complex of compounds having two -C(=X)- groups, wherein X is chalcogen, bonded to the same carbon, or enols thereof (e.g., iron acetylacetonate, etc.)
363 ...Heavy metal or aluminum carboxylate salt or complex
364 ....The heavy metal is Cr, Zr, or a lanthanide
365 ...Heavy metal or aluminum sulfonate salt or complex
366 ...Heavy metal or aluminum salt of organic phosphorus acid
367 ...Nitrogen bonded directly or indirectly to the heavy metal or aluminum
368 ...Organic compound containing arsenic, antimony, or bismuth
369 .Containing -O-S(=O)(=O)O- or -O-S(=O)O- attached directly or indirectly to carbon by nonionic bonding (e.g., sulfate esters, sulfite esters, etc.)
370 .Containing organic -S(=O)(=O)O- compound (i.e., sulfonates)
371 ..Nitrogen or -C(=X)-, wherein X is chalcogen, attached indirectly to the sulfonate group by nonionic bonding
372 ..Hydrazine or organic nitrogen compound salts of sulfonic acids
373 ..Overbased sulfonate or carbonated alkaline earth metal sulfonate
374 ..With organic -C(=O)O- compound (e.g., carboxylic acids, esters, etc.)
375 .Containing compound having phosphorus bonded directly to chalcogen and directly or indirectly to carbon by nonionic bonding (e.g., alkyl acid phosphates, etc.)
376 ..Nitrogen attached to the phosphorus directly or indirectly by acyclic nonionic bonding
377 ...Lecithin or indeterminate structure reaction product thereof
378 ..Carbon bonded directly to the phosphorus
379 ..Chalcogen or halogen attached indirectly to the phosphorus by acyclic nonionic bonding
380 ..Organic nitrogen compound salt of organic phosphorus acids
381 ...Chalcogen or additional nitrogen in the organic nitrogen compound
382 ..Phosphorus triester
383 .Containing organic -C(=X)X- compound, wherein the X's are the same or diverse chalcogens, with at least one X being sulfur
384 .Organic compound containing -NC or -CN group
385 .Containing organic -C(=O)O- compound (e.g., fatty acids, etc.)
386 ..Compound of indeterminate structure prepared by reacting an organic -C(=O)O- compound
387 ..Nitrogen or oxygen bonded directly to the carbon of the -C(=O)O- group (e.g., carbamic and carbonic compounds, etc.)
388 ..The single bonded oxygen is bonded directly to an additional carbon, which carbon may be single bonded to any element but may be multiple bonded only to carbon (i.e., carboxylic acid esters)
389 ...Plural -C(=O)O- groups attached to each other directly or indirectly by nonionic bonding (e.g., polyesters, half ester-half acid compounds, etc.)
390 ....Halogen or sulfur attached indirectly to the -C(=O)O- by nonionic bonding
391 ....Nitrogen attached indirectly to the -C(=O)O- by nonionic bonding
392 .....Product polymerized through an olefinic double bond
393 ....Copolymer of olefinically unsaturated hydrocarbon monomer and additional monomer (e.g., ethylene-vinyl acetate copolymers, etc.)
394 .....With organic nitrogen compound
395 .....With additional synthetic nonhydrocarbon polymer

LIQUID FUELS (EXCLUDING FUELS THAT ARE EXCLUSIVELY MIXTURES OF LIQUID HYDROCARBONS)
.Containing organic -C(=O)O- compound (e.g., fatty acids, etc.)
..The single bonded oxygen is bonded directly to an additional carbon, which carbon may be single bonded to any element but may be multiple bonded only to carbon (i.e., carboxylic acid esters)
...Plural -C(=O)O- groups attached to each other directly or indirectly by nonionic bonding (e.g., polyesters, half ester-half acid compounds, etc.)
....Copolymer of olefinically unsaturated hydrocarbon monomer and additional monomer (e.g., ethylene-vinyl acetate copolymers, etc.)
396 .....One of the monomers contains a benzene ring (e.g., styrene, etc.)
397 ....Polymer or copolymer of nonhydrocarbon olefinically unsaturated monomers polymerized through an olefinic double bond (e.g., trimer esters, etc.)
398 ....Mono- di-, or polyester of polycarboxylic acids
399 ...Nitrogen attached indirectly to the -C(=O)O- group by nonionic bonding
400 ...Chalcogen or halogen attached indirectly to the -C(=O)O- group by nonionic bonding
401 ...Alkyl ester of formic or alkanoic acids
402 ....With alkanol or dialkyl ether
403 ..Plural -C(=O)O- groups attached to each other directly or indirectly by nonionic bonding
404 ...Carboxylic acid dimer, trimer, or homopolymer
405 ..Nitrogen attached indirectly to the -C(=O)O- group by acyclic nonionic bonding
406 ...The nitrogen is bonded directly to an additional -C(=O)- group
407 ....Plural nitrogens or plural chalcogens attached indirectly to the -C(=O)O- group by acyclic nonionic bonding
408 ..Organic nitrogen compound salt of carboxylic acids
409 ...Plural nitrogens in the organic nitrogen compound (e.g., diamines, aminoamides, guanidines, etc.)
410 ..Nitrogen or chalcogen attached indirectly to the -C(=O)O- group by nonionic bonding
411 ..With alkanol, ketone, or phenol
412 .Organic nitrogen compound containing
413 ..Nitro or nitroso bonded directly to carbon
414 ...The carbon is acyclic or alicyclic
415 ..Compound of indeterminate structure prepared by reacting a phenol, an aldehyde, and ammonia or substituted ammonia
416 ..The nitrogen is single bonded directly to nitrogen
417 ..Plural nitrogens bonded directly to the same -C(=X)- group, wherein X is chalcogen (e.g., ureas, etc.)
418 ..Having -C(=X)- bonded directly to the nitrogen, wherein X is chalcogen
419 ...Additional nitrogen attached indirectly to the -C(=X)- group by acyclic nonionic bonding
420 ..Carbon double bonded to the nitrogen
421 ...Plural nitrogens attached indirectly to each other by acyclic nonionic bonding
422 ..Quaternary ammonium salt or amine oxide
423 ..Chalcogen or phosphorus attached directly to the nitrogen by nonionic bonding
424 ..Benzene ring attached indirectly to the nitrogen by acyclic nonionic bonding
425 ...Additional nitrogen attached indirectly to the nitrogen by acyclic nonionic bonding
426 ..Benzene ring bonded directly to the nitrogen
427 ...Chalcogen attached directly or indirectly to the benzene ring by nonionic bonding
428 ....Acyclic carbon bonded directly to the nitrogen
429 ...The benzene ring is part of a polycyclo ring system
430 ...Plural nitrogens bonded to the same benzene
431 ....Plural rings bonded to the same nitrogen atom
432 ..Plural nitrogens attached indirectly to each other by acyclic nonionic bonding
433 ...Chalcogen attached indirectly to one of the nitrogens by acyclic nonionic bonding
434 ..Chalcogen or halogen attached indirectly to the nitrogen by acyclic nonionic bonding
435 .Sulfur or phosphorus attached directly or indirectly, by nonionic bonding, to carbon of an organic compound
436 .Organic oxygen compound containing (e.g., alicyclic alcohols, hypochlorites, etc.)
437 ..The oxygen is part of a -C(=O)- group
438 ...With alkanol or dialkyl ether
439 ...Acyclic ketone
440 ..Plural benzene rings bonded directly to each other or to the same acyclic carbon
441 ..Oxygen bonded directly to a polycyclo carbocyclic ring system
442 ..Plural oxygens bonded directly to the same monocyclic benzene ring
443 ..Plural oxygens attached indirectly to each other by acyclic nonionic bonding
444 ...Plural oxygens bonded directly to the same acyclic or alicyclic carbon (e.g., acetals, etc.)
445 ...All the oxygens are present as -OH groups (e.g., glycols, triols, etc.)
446 ..Alkanol compound with dialkyl ether compound
447 ..Ether
448 ...Dialkyl ether
449 ....Tertiary carbon bonded directly to the ether oxygen
450 ..Phenol or salt thereof
451 ..Alkanol
452 ...Mixture of alkanols
453 ...Dehydration processes, and products thereof
454 .Lead-containing organic compound
455 ..With inorganic additive

LIQUID FUELS (EXCLUDING FUELS THAT ARE EXCLUSIVELY MIXTURES OF LIQUID HYDROCARBONS)
456 .Halogen bonded directly to carbon
457 .Inorganic component (e.g., carbon dioxide, etc.)
458 ..Nitrogen or sulfur containing (e.g., carbon disulfide, etc.)
459 .Solid hydrocarbon polymer containing
490 PEAT
491 .Briquet
492 .Process including heat
500 PARTICULATE (E.G., POWDERED, ETC.)
501 .Treated to reduce spontaneous ignition
502 .Solid particle containing liquid fuel
503 .Mixed with particles of different size
504 .Mixed with particles of different composition
505 .Process including removal of undesirable
506 COMBINED WITH FRICTION IGNITING MASS OR SURFACE
507 .Hand manipulable (e.g., match, etc.)
508 ..Plural integral (e.g., string, etc.)
509 ...Parallel
510 ..With scratcher
511 MATCH SPLINT OR STICK
512 .Process of making
519 PROVIDED WITH WICK OR FUSE
520 FUEL PRODUCT HAVING PASSAGEWAY FOR GAS
521 .Plural elements, with passageway unobstructed from side to opposite side
522 .Single element having aperture
530 FUEL PRODUCT OF DEFINED SHAPE OR STRUCTURE
531 .Composed of moveable (e.g., articulated, etc.) or readily-breakable sections
532 .Shaped or arranged for easier ignition
533 ..And containing easier-igniting material
534 ...Material acts as at least part of a wrapper or packaging
535 .Cylindrical (e.g., log, etc.)
540 WITH INCOMBUSTIBLE CARRIER (E.G., TORCH, ETC.)
541 BUNDLED, COVERED OR WRAPPED
542 COATED OR IMPREGNATED FOR EASIER IGNITION
543 .Solid fiber or particle in coating (e.g., sawdust, etc.)
544 .With wax
545 .With normally-liquid material
550 CONSOLIDATED SOLIDS (E.G., BRIQUETTE, ETC.)
551 .Containing specified binder
552 ..With sewage, animal blood, or animal manure
553 ..With synthetic organic polymer prepared by polymerizing specified monomer (e.g., polyacrylonitrile, urea-formaldehyde resins, etc.)
554 ..With vegetable flour, vegetable meal, or dairy product
555 ..With glue or gelatin
556 ..With nonproteinaceous organic nitrogen compound (e.g., hexamethylenetetramine, alkanolamine salts, etc.)
557 ..With phosphorus- or boron-containing compound
558 ..With oxidant (e.g., nitrates, chlorates, chromates, permanganates, black manganese oxide, etc.)
559 ..With gypsum or silicon-containing material (e.g., clay, portland cement, water glass, etc.)
560 ...With nonfibrous carbohydrate (e.g., molasses, starch, etc.)
561 ...With pitch, tar, tar oil, or bitumen
562 ...With paraffin, liquid hydrocarbon, or wax hydrocarbon
563 ...With fibrous vegetable material, resin, or organic -C(=O)- compound (e.g., rosin, tall oil, tallow, pine resin, etc.)
564 ..Tar, pitch, or tar oil
565 ...With nonfibrous carbohydrate (e.g., molasses, starch, etc.)
566 ...With elemental metal, metal oxide, limestone, or inorganic metal salt (e.g., lime, etc.)
567 ...With fibrous vegetable material (e.g., cellulose, wood, paper, sawdust, etc.)
568 ...Solid fuel, or solid fuel and water, are the only other components of the composition
569 ..With bitumen or asphaltic material
570 ...With elemental metal, metal oxide, limestone, or inorganic metal salt (e.g., lime, etc.)
571 ...With paraffin, liquid hydrocarbon, or wax hydrocarbon
572 ..With paraffin, liquid hydrocarbon, or wax hydrocarbon
573 ...With resin or organic -C(=O)O- compound (e.g., rosin, tall oil, tallow, pine resin, carboxylic acid esters, etc.)
574 ...With preliminary purification of coal (e.g., oil agglomerates of desulfurized or deashed coal, etc.)
575 ...With elemental metal, metal oxide, limestone, or inorganic metal salt (e.g., lime, etc.)
576 ...With fibrous vegetable material (e.g., cellulose, wood, paper, sawdust, etc.)
577 ..With nonfibrous carbohydrate (e.g., molasses, starch, etc.)
578 ..With lignin, lignin derivative, or sulfite liquor (e.g., lignones, lignosulfonates, etc.)
579 ..With rubber, resin, or organic -C(=O)O- compound (e.g., rosin, tall oil, tallow, pine resin, carboxylic acids, etc.)
580 ..With limestone, elemental metal, elemental sulfur, or inorganic compound (except water)
589 .Vegetation or refuse
590 ..Wood, sawdust or paper
591 .Carbonized material (e.g., coke, etc.)
592 ."Low-rank" coal (e.g., lignite, etc.)
593 .Consolidation process using specified condition or technique
594 ..Predrying or moistening
595 ..Comminuting (e.g., grinding, etc.)
596 ..Pressing
597 ...With applied heat
598 ..Baking or drying of formed product
599 ..With chemical reaction (e.g., carbonizing.etc.)
600 WITH APPEARANCE MODIFYING ADDITIVE OR TREATMENT
601 WITH ANTIFREEZING ADDITIVE OR TREATMENT
602 WITH ANTIDUSTING ADDITIVE
603 WITH COMBUSTION IMPROVER
604 .Sulfur bindant
605 FROM VEGETATION OR REFUSE
606 .Wood, sawdust or paper
607 CARBONIZED COMPONENT (E.G., COKE, ETC.)
608 "LOW-RANK" COAL (E.G., LIGNITE, ETC.)
620 COAL TREATING PROCESS OR PRODUCT THEREOF

COAL TREATING PROCESS OR PRODUCT THEREOF
621 .Removal of undesirable
622 ..Sulfur
623 ...Using a transition metal-containing material
624 ...Using liquid aqueous material
625 ....And treatment with gas
626 ..Water (e.g., drying, etc.)
627 ..Ash or ash-former
628 MISCELLANEOUS FUEL COMPOSITION
629 APPARATUS FOR MAKING OR TREATING FUEL COMPOSITION
630 .Peat
631 ..Plural operations
632 ...With molding
633 ..Disintegrating
634 .Briquetting
635 ..Plural operations
636 ...With molding
639 .Liquid
640 WALL DEPOSIT PREVENTING OR REMOVING COMPOSITION (E.G., SOOT REMOVAL, ETC.)
641 SOLID FUEL COMBUSTION IMPROVING COMPOSITION
642 FLAME COLORANT COMPOSITION
643 MATCH SCRATCHER COMPOSITION OR STRUCTURE

****
CROSS-REFERENCE ART COLLECTIONS
****

901 FUEL COMBINED WITH MATERIAL TO BE HEATED
902 .Flameless or glowless, e.g., hair curler, etc.
903 METHOD INCLUDING MEASURING, TESTING OR AUTOMATIC CONTROL
904 METHOD INVOLVING ELECTRIC OR WAVE ENERGY
905 METHOD INVOLVING ADDED CATALYST

CLASS 47 PLANT HUSBANDRY

DECEMBER 1990

1.01	**MISCELLANEOUS (FIRST SUBCLASS)**
1.1	MUSHROOM CULTURE
59	WATER CULTURE
60	.Cultivating chamber

DIG 1	Recirculation of gases produced to lower part of fuel bed
DIG 2	Slagging producer
DIG 3	High pressure
DIG 4	Powdered fuel injection
DIG 5	Diffusion membrane for gas reaction or separation
DIG 6	Underground gasification of coal
DIG 7	Slurry
DIG 8	Internal combustion engine for gas making
DIG 9	Solar gasification
DIG 10	Computer resisted control

CLASS 49 MOVABLE OR REMOVABLE CLOSURES

DECEMBER 1990

1	THERMAL RELEASER OR ACTUATOR
2	.Nonfusible
3	.Common fuse releases closures for plural openings
4	.Pull cable with fusible connection
5	.Terminates counterweight condition
6	..Overbalanced by released weight supplementing counterweight
7	.Fusible closure latch or retainer
8	..Fusible connector disengages pawl or catch
9	IMPACT ABSORBING FLEXIBLE BARRICADE
10	FLOOD ACTUATED
11	.Float or vane controlled latch release
12	.Axially pivoted picket pole
13	CLOSURE CONDITION SIGNAL OR INDICATOR
14	.Indicator at remote station
15	JAIL TYPE CLOSURE WITH REMOTE CONTROL STATION
16	.Additional key or combination control of individual closure
17	.Enclosure for remote control
18	.Motor operated control
19	.Rotary gang bar
20	.Ganged closures with selector means
21	RESPONSIVE TO OR DIRECTLY ACTUATED BY AMBIENT FLUID
22	.Fluid softenable or soluble latch release
23	.Water accumulator type
24	WITH MASTER CONTROL FOR INDIVIDUALLY CONTROLLED CLOSURES
25	RADIANT ENERGY CONTROL
26	SAFETY MEANS RESPONSIVE TO OBSTRUCTION TO CLOSURE
27	.Sensing shoe on leading edge
28	.Closure drive stopping or reversal
29	TIME CONTROLLED
30	.Predetermined delay governs start of closure movement
31	CONDITION RESPONSIVE CONTROL
32	INITIAL MANUAL DISPLACEMENT ENERGIZES MOTOR DRIVE, E.G., TOUCH PLATE INITIATOR
33	CLOSURE SHIFTABLE TO PIT OR OBSTACLE BRIDGING POSITION
34	DISTORTABLE, E.G., FLEXIBLE STRAND TYPE BARRICADE
35	CHECK OR KEY CONTROLLED
36	CONTINUOUS CLOSURE OPENING IN INTERSECTING BARRIERS
37	CONVERTIBLE
38	REGISTERABLE OPENING IN FACIALLY OPPOSED CLOSURE AND BARRIER
39	.Radially positioned
40	CONVEX OR CONCAVE CLOSURE AND OPENING
41	ARCUATE CLOSURE ROTATES ACROSS ARCUATE OPENING
42	PLURAL WINGS RADIATE FROM COMMON PIVOT, I.E., REVOLVING
43	.With speed regulator
44	.Wings fold for through passage
45	..Move laterally of opening
46	.Successive position type, e.g., turnstile
47	..Drop-arm type
48	WITH SECTION FOR HAND SIGNALLING
49	WITH TRAFFIC DIRECTOR OR CONTROLLER, E.G., ONE-WAY
50	WITH PROTECTIVE GRILLE OR SAFETY GUARD
51	.Facing interconnected movable louvers
52	.Closure operator extends through grille
53	..Swinging handle actuator
54	.Carried by closure to vacated opening
55	.Adjustable to various size opening
56	.Moves relative to primary closure
57	.Removable
58	WITH ANIMAL BLOCKER REPELLER OR CHASER
59	.Electrically charged
60	.Actuated by closure movement
61	FACIALLY OPPOSED PRIMARY AND AUXILIARY CLOSURE FOR COMMON OPENING
62	.Auxiliary movable or removably mounted on primary
63	.Auxiliary mounted for movement
64	..Of interconnected movable louvers
65	..Connected for movement with primary
66	...Sliding primary imparts swinging movement
67	..Pivoted
68	SEQUENTIAL CLOSURES FOR PASSAGEWAY
69	MAIN CLOSURE ACTUATES SUPPLEMENTAL CLOSURE FOR TRACKWAY
70	COMBINED
71	WITH SIDE PANELS, E.G., AWNING
72	WINDOW POSITION OR MOVEMENT INTERRELATED WITH DOOR LATCH
73	CLOSURES INTERCONNECTED FOR CONCURRENT MOVEMENT
74	.Closures are louvers
75	..Mounted in movable frame
76	...Closures and frame axes parallel to each other
77	..Distinct groups
78	...Opposed movement
79	..Manipulation of control closure connects and disconnects remaining closures
80	..Sequential or independent movement
81	..Multidirectional
82	..Geared, interconnector or interconnector operator
83	...Plural paths to opposite interconnectors
84	...Gear coaxial of closure pivot
85	...Crank, worm and gear
86	..Cable, interconnector or interconnector operator
87	..Handle is actuator
88	...Interconnector or closure mounted
89	..With biasing means
90	..With position holder
91	..With weather seal
92	...Includes configuration of closures
93	.Closures on opposite approaches to crossing
94	.Closures on opposite or angularly related barriers
95	.Closures in spaced openings along barrier
96	..Levers acting between interconnector and closures
97	...Rock shaft interconnector
98	.One closure with complete independent movement
99	..Counterbalancing closures with adjustable or detachable cable interconnector
100	.Moves at different speeds
101	..Lever interconnected
102	..Cable interconnected
103	.Sequential movement
104	.Closures mounted for swinging
105	..Treadle or treadle bar interconnector
106	...Common interconnector actuated from opposite approaches
107	..Geared, interconnector or interconnector operator
108	...Drives lever pivoted on closure
109	..Link or link system interconnected
110	...With operator or energy stored opening means
111	....Allochiral link system from closures to input connection
112	.....Input acts at pivot of diverging links

CLOSURES INTERCONNECTED FOR CONCURRENT MOVEMENT
.Closures mounted for swinging
..Link or link system interconnected
...With operator or energy stored opening means
....Allochiral link system from closures to input connection
.....Input acts at pivot of diverging links
113 ......Links sliding carriage mounted
114 ....Actuating force applied through one closure to other closure
115 ..Cable interconnector sheaved on closure pivots
116 .Opposed similar movement
117 ..With actuator on opposite approaches
118 ..Motor driven
119 ..Counterbalance effect derived from opposed closure
120 ...Bipartite, center-opening type, e.g., elevator door
121 ...Cable interconnected
122 ..Lever interconnected
123 ..Cable interconnected
124 EXTENSIBLE BAR SECTIONS
125 MOUNTED FOR MOVEMENT TO FACIALLY STACKED POSITION
126 .From vertical to horizontal overhead stacked position
127 .From collinear to stacked position
128 COLLINEAR CLOSURES, ONE MOVES TO OFFSET POSITION
129 .Moved closure has additional movement
130 .Horizontal sliding
131 CLOSURE SURFACE MOVED TO INOPERATIVE POSITION FLUSH-WITH-GROUND
132 .Treadle actuated
133 ..Actuation raises closure to blocking position
134 ...Treadle on opposite approaches
135 WITH WIND VANE OR SAIL
136 SINGLE ACTUATOR SELECTIVELY MOVES INDIVIDUAL CLOSURES
137 UNITARY OR INTERRELATED FLUID OPERATOR AND CLOSURE CHECK
138 WITH MEANS TO VARY OPENING SPAN OR SPEED DURING MOVEMENT
139 OPTIONALLY MOVED, MANUALLY OR BY MOTOR
140 .With manually actuated operator
141 WITH SPECIFIED MEANS TO EFFECT EMERGENCY RELEASE TO CLOSURE
142 PLURAL CLOSURES, EACH WITH INDEPENDENT DIVERSE MOVEMENT
143 .One sliding and other swinging
144 ..One slides up to close, other vents about vertical axis
145 ..One slides vertically, other swings about horizontal axis
146 VERTICALLY RECIPROCABLE, ADDITIONAL SIDEWARD VENTING MOVEMENT FROM CLOSED POSITION
147 CLOSURE HANGS ON FLACCID CONNECTOR
148 DISPARATE SUPPORT FOR DISPLACED CLOSURE
149 MOUNTED FOR OPTIONAL MOVEMENTS
150 .Common counterbalance for sliding and swinging movements
151 ..Cable guide changes direction of counterbalancing force
152 .One movement multidirectional
153 ..Swings on link
154 ...Other movement is sliding on link at balance point of closure
155 ...Other movement is sliding within portal frame
156 ..Slides on pivoted support, other movement is relative vertical adjustment
157 ..Other movement is vertical sliding
158 .Mounted on rod for sliding or swinging
159 ..With latch for sliding movement
160 ...Rod latch
161 .Pivoted closure within framework of double hung sash
162 ..Vertical axis pivot
163 .One closure movable separately from or with other closure
164 ..Closure slide within swingable frame
165 ...Divided frame with pivoted section
166 ..Upper closure mounted on horizontally swinging closure, e.g., sliding window on swinging door
167 ...Power conduit for upper closure extends across hinge
168 ..Plural independently mounted movable closures
169 ..Within encompassing closure
170 ...With common edge
171 ...Viewing, ventilating or packet passage
172 .Edgewise separable stile-slide supports closure for vertical swinging
173 ..Coil spring bias coaxial of closure pivot
174 .Edgewise retractable bearing acting between closure and portal frame
175 ..Towards closure
176 .Pivot mounted on sliding member, e.g., slide-stile
177 ..Vertical axis pivot
178 ...With free stile slide-portal latch
179 ...Displaceable stop strip
180 ...Free stile slide-closure latch, closure carried
181 ..Vertical position holder actuated by pivoting closure
182 ..Diagonally opposed stop flanges on stile slide or closure
183 ..Key or latch between closure and stile slide
184 ...Longitudinal key
185 ....Retractable edgewise towards closure
186 ...Cap-type latch
187 ..Link-brace between closure and stile slide
188 .Separable hinge permits sliding of closure
189 ..Retractable portion
190 .Means adjusting closure vertically on vertical support pivot
191 ..Angularly adjusted about horizontal pivot
192 .On alternative axes
193 ..On opposite ends of closure
194 .Movable or removable guide
195 ..Pivoted
196 ...Closure swings with guide
197 UP-AND-OVER TYPE, E.G., MOVES FROM VERTICAL TO WITHDRAWN HORIZONTAL OVERHEAD POSITION
198 .Independently movable closure sections
199 .With operator
200 ..And counterbalance
201 .Upward sliding followed by distinct swinging
202 ..Pivoted guide
203 .On lever or link
204 ..Pivoted at closure
205 ...Multiple links angularly related
206 ...Actuating spring co-directional with or acts on links
207 SUPERIMPOSED CLOSURES, INDEPENDENT EDGEWISE MOVEMENT TO SIDE OF OPENING
208 MOUNTED FOR MULTIDIRECTIONAL OR OBLIQUE MOVEMENT

	MOUNTED FOR MULTIDIRECTIONAL OR OBLIQUE MOVEMENT
209	.Initial or terminal movement transverse to sliding movement edgewise of portal
210	..Common operator for both movements
211	..Transverse movement aligns closure for movement into housing
212	..Transversely movable track
213	..Skewed track
214	...Separate track section for rear of closure
215	...Rear of closure moves transversly on crank arm
216	..Moves transversely on link
217	...Closure pivoted to tilting link-carriage
218	...Crank arm-type link
219	....Paired sets of crank arms
220	.....Operator interconnected with sets
221	..Closure carried by track mounted carriage
222	...Tiltable carriage
223	...Closure hinged to carriage
224	...Inclined transverse movement
225	...Terminal cam
226	.In plane of closure, e.g., oblique
227	..Permits movement from housing to raised closed position
228	..Gravitates on tilted track
229	...Oscillating track
230	....Sectional or nonlinear
231	...Pendant closure
232	..Swings on co-planar pivotal link arm
233	...Longitudinal-spaced parallel links
234	..Closure actuated vertically to retard horizontal travel
235	...By track roller-closure displacement
236	.One direction imparts gravitational bias to swinging closure, e.g., rising hinge
237	..Biased by inclined cam and descending slide or roller
238	...Shiftable cam
239	...Mating inclined cam and slide surfaces
240	..Shiftable pivot
241	...On crank arm
242	...Mounted on eccentric or lever
243	....Pivot on hinge post cap lever
244	....Pivot on vertically oscillating lever
245	...Pivot pin shifted in slot
246	.Swings on plural axes, e.g., pivotal link arms
247	..Axes normal to each other
248	..Multiple links angularly related
249	...One link jointed
250	..With additional slide guiding closure movement
251	...Friction slide mount, e.g., biased
252	...Guide on portal frame
253	..Link at closure balance point
254	.Sequential translation and swinging
255	..Operated vertically to permit horizontal swinging
256	...Camming lever
257	..Translation shifts pivot axis
258	..Translates on pivoted axis
259	...Supporting frame extends laterally of its pivot
260	.Pivot axis moves along guide
261	.Swings about seat on portal frame, e.g., indeterminate axis
262	VEHICLE ACTUATED ROLLER OR CARRIAGE OR CARRIED COOPERANT
263	TREADLE OR IMPACT INITIATED OPERATOR
264	.Switch in approach to closure
265	.Fluid controller in approach to closure
266	.With alternative hand operator
267	.Two stage operator
268	.Sequential initiators for latch release and operator
269	.Spaced open and close initiators on opposite sides of closure
270	..Plural interconnected paired initiators
271	..Releases latch from either side
272	.Releases latch
273	.Load maintained, self returning
274	..Spring return
275	CLOSURE MOVED BY STEP BY STEP OPERATOR
276	STARTER TYPE OPERATOR, E.G., SEAL BREAKER
277	.Lever actuator engages strap-fastener or longitudinally shiftable bar
278	.Handle camming lever
279	OPERATOR INTERRELATED WITH CLOSURE LATCH RELEASE
280	.Motor driven
281	.Common actuator, different movements to unlatch and move closure
282	.Actuator or opposite approaches
283	..Latch for diverse positions of closure, separate trains
284	..Latch train and closure operator train from diverse points on actuator
285	..Lever interconnector, separate trains to latch and closure mover
286	..Force applied at closure pivot releases latch
287	...Geared
288	...Sheaved
289	..Closure or latch interposed in endless or looped cable
290	..Lost motion branched cable
291	..Lost motion pin or lever and slot
292	..Lost motion cam drive
293	..Closure moving force applied through latch releaser
294	...Duplicate links release common latch
295	...Crank link-type interconnector
296	...Bell crank-type interconnector
297	...Latch train includes closure mounted cable guide
298	...Link system interconnector
299	...Allochiral actuators to common latch release
300	.Common input, diverse trains to latch and closure mover
301	.One direction pull cable type
302	.Actuator at remote station
303	CLOSURE MOVEMENT ACTUATED RETRACTABLE SEALING, GUIDING OR LOCKING STRIP
304	.Strip mounted on sill
305	..Interengages strip on closure
306	.Strip movement in plane of closure
307	..Horizontally reciprocating plunger actuator
308	...Lever interconnects or cams strip
309	..Oblique movement
310	.Resilient means swings strip to retracted position
311	..Offset or lever actuator, axis parallel to strip axis
312	...Spring coaxial or strip axis
313	..Deflector in path of strip
314	...Jamb mounted
315	.Weight or gravity biased to retracted position
316	OPERATOR FOR RETRACTABLE SEALING, GUIDING OR LOCKING STRIP
317	.Opposed strips actuated concurrently
318	..With interconnected strip on adjacent side
319	.Interrelated with closure latch

OPERATOR FOR RETRACTABLE SEALING, GUIDING OR LOCKING STRIP
320 .Rotating shaft normal to plane or strip movement
321 .Includes lever
322 WITH SAFETY BRAKE OR CATCH
323 CLOSURE GUIDED FROM HOUSING BY RETRACTABLE SUPPORT
324 WITH OPERATOR FOR MOVABLY MOUNTED CLOSURE
325 .Reversibly flexible and rigid rod
326 .Moves closure in either direction from closed position
327 .Actuated from opposite approaches
328 ..By vertically oscillating lever
329 ...Link system connects lever to closure
330 ....Actuating force applied between link pivots, e.g., over center toggle type
331 ..Pull cable, lever interconnector
332 ..Cable with pulley or drum
333 .Coaxial of closure pivot
334 ..Motor driven
335 ..Coaxial gear
336 ...Rack drive
337 ...Worm drive
338 ..Link drives coaxial connector
339 .Operating lever or link and closure swing about parallel axes
340 ..Motor-driven lever
341 ..Gear-driven lever
342 ...Toothed lever end engages gear
343 ...Lever carries screw gearing component
344 ..Reciprocating rod drives lever
345 ..Multiple links
346 ..Lever end slide engages guide on closure
347 .One direction pull cable
348 .Drive within closure housing
349 ..Motor driven
350 ..Gear-driven lever moves within limits of housing
351 ...Multiple levers
352 ..Cable drive
353 ..Exposed handle drives concealed lever
354 .Through wall type
355 ..With weather seal or flap for drive element
356 .Push-rod actuator
357 .Remote actuating or initiating station
358 .Closure-mounted drive
359 ..Lever-actuated drive
360 .Operator drives closure along guide
361 ..Common input for drives adjacent opposed guides
362 ..Rack or screw parallel to closure guide
363 ..Lever
364 BUMP ACTUATED LATCH RELEASE FOR BIASED CLOSURE
365 CLOSURE MOUNT OR STOP ON INDEPENDENT MOVABLE OR REMOVABLE CENTER POST
366 BIPARTITE, CENTER OPENING
367 .Overlapping meeting edges
368 ..With disparate seal
369 ..Z-bar-type edge
370 .Sliding closures
371 SWINGING CLOSURES CLOSING SINGLE OPENING
372 STORED IN HOUSING
373 .With cover or lid for housing opening
374 .Reciprocates vertically in and out of housing
375 ..Vertical extension on closure bottom edge guided with housing
376 ..Inclined guide on side edge of portal opening
377 ..With cushioning means adjacent housing opening
378 ..One-piece housing facing and portal frame contains guide
379 LATCH RELEASE OF MOVEMENT-STORED ENERGY
380 MOVABLE CLOSURE AND ITS SUPPORT TRANSFERABLE AS UNIT
381 WITH MEANS MOUNTING CLOSURE FOR SWINGING
382 .Hinging position reversal means
383 .Hinge edge, finger guard, lock or disparate seal
384 ..Cylinder and sleeve type
385 .Transverse pivot, e.g., single pivoted corner
386 .With biasing means
387 ..Distinct weight
388 .Pivots on opposed portal members
389 ..Closure removable in inclined position
390 ..Closure portions on opposite sides of portal in open position
391 ...Inclined opposed member, e.g., vent window type
392 ...Diagonally opposed stops or seals
393 ....On pivot carrying portal members
394 .With latch or lock
395 ..Plural, e.g., gang
396 .Compensator for front end weight, e.g., sag preventer
397 .Unitary structural member and hinge element
398 .Concealed hinge
399 .Hinge leaf mounted on closure edge surface
400 .Closure nests within portal frame
401 ..Marginal closure flange overlaps portal frame
402 .Closure overlies portal frame
403 .Louver end caps, e.g., mounting clips
404 WITH MEANS MOUNTING CLOSURE FOR RECIPROCATION
405 .By link mount
406 .With plug, flap or bridger for meeting rail
407 .Guide mounted stop spaces closure from sill
408 .Drain or vent in guide or sash
409 .Pendant from horizontal guide
410 ..With guide for lower edge of closure
411 ...Threshold or sill guide
412 ..Overlapping angles shield track-closure crevice
413 .Horizontally sliding sashless type
414 .With distinct biasing means for slide or guide
415 ..Acting transversely of closure face
416 ...Biased side guide or parting strip
417 ..With means to adjust or retract biaser
418 ...Adjusting screw coaxial of coil spring
419 ..Nonmetallic biaser
420 ..Ball or roller bearing
421 ..Closure carried
422 ..Biaser permits self-adjustment of single guide for plural closures
423 ..Slide or guide with transverse restrainer
424 .Baffle plate guided in chamber slot
425 .Revolving guide component, e.g., roller or gear
426 ..Offset from plane of portal, e.g., freight car door
427 ..On support edgewise of passage
428 .Diverse or springy material guide or slide
429 ..Cooperates with counterbalance hardware
430 ...Counterbalance within jamb-guide gap
431 ..Interengaging sections on portal and closure

	WITH MEANS MOUNTING CLOSURE FOR RECIPROCATION
	.Diverse or springy material guide or slide
	..Interengaging sections on portal and closure
432	...On parting strip and adjacent closures
433	...Plural interdigitants
434	..Single guide or slide for facially adjacent closures
435	...Parting strip with integral, opposite wings
436	..Bearing includes transverse restrainer
437	...Closure mounted
438	....On closure edge
439	.....Cap type
440	...Channel guide
441	....Converging sides or ends
442	...Guide engages slot in closure
443	....On closure face
444	....Portion engages edge surface
445	.With counterbalance
446	..Connected to slide mount of removable closure
447	..Guide-concealed weight pocket
448	...Displaceable guide section permits access to weight pocket
449	.With latch or lock
450	..Plural open positions
451	...Friction holder
452	.With means to adjust guide position
453	.Slide or guide feature for closure removal
454	..Detachable or displaceable stile or slide strip
455	..Guide mounted for repeated movement
456	..Removable guide
457	...Interfitted retainers, guide and frame
458	.Interengaging meeting rails
459	.Guide includes deformed or cast component
460	HANDLE OR PROTECTOR
461	.Receptor for pole handle
462	.Edge protector
463	REMOVABLE CLOSURE
464	.With separable closure sections
465	.Releasable means on closure
466	.Displaceable sealing or binding strip
467	THRESHOLD
468	.Adjustable
469	.With diverse seal
470	..Closure carried
471	.With drain or vent
472	COMBINED SEAL, STOP AND STIFFENER, I.E., CLEAT
473	.With additional seal
474	.Eddy current or air space trap
475	CLOSURE SEAL, E.G., STRIKER GASKET OR WEATHERSTRIP
476	.With fluid drain, or closure face mounted deflector, e.g., sill seal
477	.Inflatable or fluid pressure responsive
478	.Magnetic
479	.At juncture of intersecting edges, i.e., corner seal
480	.With distinct biasing means
481	..With means to guide biased movement
482	.Feature for replacing, severing, segmenting or adjusting
483	.Interengaging sections on closures or on closure and portal frame
484	.Successive distinct seals
485	.Between overlapping closures or closure and portal frame
486	.At juncture or terminus of facing panels of closure
487	..Connected to insulation or breaker strip
488	.Encloses or carried by closure edge surface
489	.Anchoring channel of slot in portal frame or closure
490	.U-shaped member or portion mounts seal
491	..Cover or cushion enclosed distinct clamp member
492	.With snap fastener
493	.With holder, e.g., securing sheath
494	..Mounted by a fastener traversing seal
495	.Plural sealing surfaces or edges
496	.Spaced superposed flange cantilevered from edge of base, e.g., "U" strips
497	..Integral tubular striker portion
498	.Tubular
499	.Bulged sealing surface intermediate securing ends
500	.Windlace type
501	PANEL WITH CLOSURE FEATURE

323	.With critical nonabrading work treatment
324	..Including deformation
325	.With tool treating or forming
326	.With plural distinct abrading areas or steps

ABRADING PROCESSES
.With plural distinct abrading areas or steps
327 ..Utilizing mounted rigid grinding tool only
328 .Utilizing nonrigid tool
292 .Abrasive supplying
293 ABRASIVE TOOL MAKING PROCESS, MATERIALS AND COMPOSITIONS
294 .Bags or filled cloth
295 .Impregnating or coating of abrasive tools
296 .Pore forming
297 .Laminating
298 .With synthetic resin
299 .With rubber or reaction product thereof
300 .With natural resin or reaction product thereof
301 .With protein or reaction product thereof
302 .With carbohydrate or reaction product thereof
303 ..Cellulose or derivative thereof
304 .With fats, fatty oils or fatty oil acids and salts thereof
305 .With ester-type wax, bituminous material or tarry residues
306 .With hydrocarbon
307 .With inorganic materials
308 ..Clay, silica and silicates
309 ..Metals and metal oxides

CLASS 52 STATIC STRUCTURES, E.G., BUILDINGS

DECEMBER 1990

1 CONTROLLED BY CONDITION RESPONSIVE MEANS
2 R SHAPED OR STRENGTHENED BY FLUID PRESSURE
2 C .Loading dock doorway seal
2 A .Confined tubular element exerts force
2 B ..For sealing a closure panel
2 E .Serving as a form for hardenable material
2 F .Fluid pressure is subatmospheric
2 D .Including ingress/egress provision
2 K .Intersecting tubular elements form framework
2 G .Supported on rigid-walled structure
2 L .Upstanding column (e.g., mast, tower)
2 H .Comprising spaced, sheet-like members and fluid chamber therebetween
2 J ..Including subdividing elements
2 M .Sheet-like member comprises plural, edge-joined sections
2 N .Including hold-down means
2 P ..Comprising strand-like element
3 ARTICLE OR MATERIAL SUPPORTED COVER
4 .With article or ground penetrating retainer
5 .Flexibly connected strips or slats
6 WITH STADIUM OR AUDITORIUM FEATURE
7 .Movable stage
8 .Seating arrangement
9 ..Shiftable seating section
10 ...Power means
11 COVER WITH SURFACE WATER RECEIVER AT EAVE OR VALLEY
12 .With separator, e.g., strainer
13 .Between oppositely sloping sections
14 ..With additional subsurface liquid receiver
15 .Inwardly of edge
16 .With downspout
17 INSULATED RAILWAY CAR TYPE ROOF
18 CLERESTORY OR SAW-TOOTH ROOF
19 WITH ENTRANCE FOR PERSONS OR OBJECTS IN HORIZONTAL OR INCLINED COVER
20 .With additional enclosure structure, e.g., manhole
21 .Masonry or concrete
22 SPECIFIED ROOF SPACED FROM CEILING
23 COVER WITH EXTERIOR HOLD-DOWN
24 COVER WITH PROJECTING RESTRAINER, E.G., SNOW STOP
25 .Rod type with plural supports
26 .Restrainer having integral penetrator
27 WITH DISPARATE ARTICLE OR ITS SUPPORT
28 .Artificial illumination means
29 .Mounted for movement
30 ..Elevator in multi-story
31 ..Revolving or endless type conveyor
32 ..Swinging
33 .Articles form traffic path arrangement
34 .Lavatory fixture
35 ..Wall juncture construction
36 .Horizontal surface type article, e.g., bed, chair or shelf
37 .On or adjacent portal frame, e.g., window cleaner's hook
38 .Sign, e.g., name plate or ornament
39 .Supported from ceiling
40 .On shaft or tower
41 ROOF RUNNING BOARD OR SADDLE
42 .Shaped to accommodate seam
43 ..Also ridge cap
44 .Attached to seam
45 RAILROAD CAR ROOF CONSTRUCTION
46 .Continuous carline, e.g., discrete coextensive rafter
47 ..And longitudinal ridge
48 ..Purlin or cross-bracing
49 ..Superjacent covering strip
50 ..Laterally verging sections
51 ..Separate end fastener or support
52 ..Over juncture of covering sheets
53 .Transverse sustaining rib integral with covering
54 .Central discrete ridge member
55 ..Relatively movable covering sections
56 .Covering sheet with overhanging continuing edge section
57 ROOF FINIAL OR CRESTING
58 EXTERIOR-TYPE FLASHING
59 .Raggle block
60 .Interfitting parts
61 ..Within wall
62 .Extending into wall
63 ENCLOSURE INCLUDING FLACCID NONMETALLIC OR FORAMINOUS SURFACING
64 BARRIER OR MAJOR SECTION MOUNTED FOR IN SITU REPOSITIONING, E.G., REARRANGEABLE OR ROTATABLE
65 .Rotatable about vertical axis
66 .Roof movable as entity relative to its substructure
67 .Telescoping sub and main enclosures
68 .Wall extension convertible to roof
69 .Hinged to swing from vertical to nonvertical
70 .Three walls hinged at their intersections
71 .Barrier of hingedly connected sections
72 .Movable cupola or section thereof
73 RIGID BARRIER CANTILEVERED FROM VERTICAL SUPPORT
74 .Awning type
75 ..Longitudinal axis of slats inclined
76 ...With side panel
77 ....Diverse side and top panels
78 ..Horizontal slatlike surfacing
79.1 PREASSEMBLED SUBENCLOSURE OR SUBSTRUCTURE SECTION(S) OF UNIT OR BUILDING
79.2 .Vertically staggered
79.3 .Angularly stacked
79.4 .Nonrectangular substructure
79.5 .Collapsible for ease of transport
79.6 .Porch or vestibule
79.7 .Opening between subenclosures
79.8 ..Portal to portal
79.9 .With retaining or attaching means
79.11 ..Cast in situ
79.12 ..Separate frame
79.13 ..Distinct vertical tie
79.14 .Continuous cementitious barrier
80 COMPOUND CURVE COVER
81 .Geodesic type
82 CONICAL OR RADIALLY RIBBED COVER
83 COVER OR ENCLOSURE SUSPENDED BY FLEXIBLE MEANS
84 STEAMLINE CROSS SECTION, I.E., AIRFOIL
85 CURVILINEAR PORTAL WITH SETTABLE MATERIAL BACKER
86 VERTICALLY CURVED ARCH WITH TERMINAL SUPPORT
87 .With deck structure
88 .Monolithic arch
89 .Stonelike modules form arch
90 INCLINED COVER OR RAFTER, WITH SUPPORTING SUBSTRUCTURE
91 .Masonry or settable material at eave intersection
92 .Rafter rests on wall plate
93 .Stud end contacts rafter
94 GABLE OR EAVE TERMINAL CONSTRUCTION
95 .With conduit or passage means
96 .Covering continuation overlaps edge
97 EXTERNALLY PROJECTING LIQUID DEFLECTOR
98 FRANGIBLE SECTION OR MEANS
99 .In dissimilar material member
100 .Removable corner or internal section

101	ANIMAL BLOCKING LATERAL PROJECTION, TRAP OR SCARER
102	EARTH-SUPPORTED COPING OR EDGING
103	LAND MARKER OR MONUMENT
104	.With translucent feature
105	WITH INDICIA
106	JAIL-TYPE STRUCTURE
107	AREAWAY, E.G., WINDOW WELL
108	STRIPLIKE UNIT, REVERSIBLY FLEXIBLE AND RIGID
109	LAZY TONG EXTENSION UNIT
110	SHAFT, VEHICLE SHELL ATTACHED, E.G., ANTENNA
111	MECHANISM OPERATED RELATIVELY MOVABLE SHAFT ASSEMBLY
112	.Opposed barrier-engaging, e.g., rock drill column
113	.With spring-actuated return
114	.Moves about vertical axis
115	.Fluid pressure actuated
116	.Tilts relative to base
117	..Relatively moving sections
118	...Telescoping
119	...Lifting arm directly engages tower
120	...Gin pole hoist
121	.Longitudinally extensible by flexible drive or hoist
122.1	WITH LIFTING OR HANDLING MEANS FOR PRIMARY COMPONENT OR ASSEMBLY
123.1	.Mast or enclosure section elevated to superimposed position
124.1	.Vault component
124.2	..Having hand, hoist, or tackle engaging means embedded in settable material
125.1	.Lift slab
125.2	.Construction or component having means to engage hand or cable type lifting means
125.3	..Unitary engaging means in monolithic or single contruction or component
125.4	..Embedded in settable material
125.5	...Embedded socket element
125.6	..Engaging means cooperates with rigid, intermediate device which distributes load or lifts multiple components
126.1	.Position adjusting means, e.g., leveling
126.2	..For service duct or outlet
126.3	..For vertical barrier only
126.4	...Threaded element engages support surface
126.5	..For horizontal barrier only
126.6	...Adjustable pedestal
126.7	..Threaded element engages support surface
127.1	WITH ADJUNCTIVE MEANS FOR ASSEMBLY OR DISASSEMBLY
127.2	.Removable prop or brace combined with structure component
127.3	.Having component positioning means or control means for flowable material
127.4	..Opening or passageway for flowable material
127.5	.Specific hand or tool engaging surface on structure component
127.6	..Panel and frame connection
127.7	.Structure includes tool, or opening to provide access for a tool, used in operating a locking, latching, attaching, or adjusting means
127.8	..Panel joined to or released from peripheral frame
127.9	..Tool operates swinging arm latch
127.11	..Cam surface
127.12	..Threaded engagement means
128	BURIAL VAULT
129	.With corpse, or corpse product, treating feature
130	..Disinfectant means
131	.With fluid guiding port from ambient
132	..With internal air director
133	.Combined
134	.Mausoleum type
135	.Concentric barrier sections with dissimilar sealing lamina therebetween
136	.Compartmented
137	..Plural covers defining a compartment therebetween
138	.Hood type
139	.With separately placeable closure in abutting relation to wall edges
140	..With sealing material retaining construction
141	...Tongue and groove type
142	..Sectional side walls and floor construction
143	WITH TRANSPORTING FEATURE
144	WITH EXPOSED CONFIGURATION HAVING ACOUSTICAL FUNCTION
145	.Absorbing material behind foraminous facing sheet
146	VERTICAL STRUCTURE WITH BRACE, OR GUY, EXTENDING DIAGONALLY TO A BASE
147	.Attached discrete guard
148	.Flexible guy type
149	.With adjustable means
150	..At brace and shaft intersection
151	..For tie between shaft and brace
152	.Spaced or angularly related braces
153	SHAFT WITH EMBEDDING WING-TYPE BRACE
154	.Wings in different planes
155	PIERCING OR EXPANDING EARTH ANCHOR
156	.Disparate subterranean anchor components
157	.Auger-type penetrator
158	.Laterally held, translating driven piercer
159	.Guided in plane normal to shaft
160	.Spreader cam or plate
161	..Screw-operated
162	.Pivot means connecting separate fluke or hook
163	..Fluke or hook pivoted intermediate their ends
164	..Connected by pivoted brace or tie
165	.Supporting separate axially aligned shaft
166	DEADMAN-TYPE ANCHOR
167 R	MEANS COMPENSATING EARTH-TRANSMITTED FORCE, E.G., EARTHQUAKE
167 DF	.Dynamic force generator
167 CB	.Cross bracing
168	WITH PROTECTIVE LIQUID SUPPLY
169.1	SPECIFIED TERRANEAN RELATIONSHIP
169.2	.Geographic
169.3	..Divided terrane
169.4	.Inclined terrane
169.5	.With fluid-conducting means, e.g., drainage or ventilation
169.6	.Subterranean enclosure with portal opening, e.g., storm or root cellar, bomb shelter
169.7	.Open top, embedded container, tank or reservoir
169.8	..With laterally spaced foundation element
169.9	.Discrete, spaced foundation elements
169.11	.Means to control heat transfer, e.g., insulation or frostline positioning
169.12	.Mobile home skirt
169.13	.Shaft, i.e., elongated rigid structure
169.14	.With waterproofing means, e.g., covering, coating or lamina

	SPECIFIED TERRANEAN RELATIONSHIP
170	.Shaft reinforcement adjacent earth's surface
171	TRANSPARENT PANEL, E.G., WINDOW, WITH TREATING MEANS
172	.Hygroscopic material, e.g., internal drier
173 R	COMBINED
173 DS	..Docking seals
174	WITH TRAFFIC-GUIDING FEATURE
175	.Multilevel building with ramp
176	..Central ramp group
177	SPECIFIED WEAR OR FRICTION-TYPE TRAFFIC-CARRYING SURFACE
179	.Tread-nosing, e.g., shaped stair pad
180	.Perforate structure having twisted element or particular surface
181	.Exposed embedded element or inserted filler
182	STEPPED, E.G., STAIR
183	.Interconnected relatively movable components
184	.With additional building feature
185	..Multilevel building
186	..Closure
187	.Helical type
188	.Tread unit on horizontal tread member connected to riser
189	.Precast stonelike component
190	..Integral tread and riser
191	.Risers connected to common stringer
192	FLUENT MATERIAL HOPPER OR STORAGE CONTAINER WITH MATERIAL PORT
193	.Rod crossing port
194	.Elevated container, leg-supported
195	.With chute
196	.Framed port in wall
197	.Bottom outlet port, e.g., hopper bottom
198	ENCLOSURE OR COVER, WITH FLUID-GUIDING PORT BETWEEN AMBIENT AND ENCLOSED USABLE SPACE
199	.Roof vent
200	CUPOLA
201	BAY WINDOW
202	AUXILIARY IMPERFORATE PANEL-LIKE SHIELD ATTACHED TO MAIN PANEL, BARRIER OR FRAME
203	.Auxiliary pane attached to main pane
204	SPECIFIED FEATURE FORMING PORTAL OPENING THROUGH BARRIER
205	.Portal in interior partition, e.g., into compartment
206	.Wall with plural portals
207	..Lattice barrier with fixed and movable panels
208	.Panel or panel edging, directly clamped or adhered to barrier
209	.Drain or vent for reveal area
210	.Studding forms portal or frame section
211	.Architrave; i.e., finish strip on barrier or panel face
212	..Separable, lapped, reveal covering sections
213	.Retaining feature between frame and reveal
214	..Catch or resilient strip
215	..Buck
216	..Foraminous section of frame embedded
217	..For size-adjustment
218	FLUE WITH GASEOUS FLUID-DIRECTING FEATURE
219	FLUE CONNECTION TO BUILDING STRUCTURE
220	SERVICE DUCT WITHIN BARRIER
221	.With lateral outlet, e.g., electrical conduit
222	TENSIONED OR FLEXED SHEET FACING
223 R	PRECOMPRESSING FEATURE, E.G., PRESTRESSING
223 L	..Laterally compressed reinforcement tendon or stresser
224	.Curvilinear tube, radially compressed
225	.Laterally external stresser or tendon hold-down
226	..Inclined tendon
227	.Compressed abutting modules
228	..Additional member crossing compression means
229	..Form-sustainer with feature resisting transverse loading
230	.Plural strand tendon with core or sheath
231	MONOLITH WITH SUSTAINER AND MEANS TENSIONING ADDITIONAL REINFORCEMENT
232	IRREVERSIBLY REACTIVE COMPONENT
233	LOG WALL-TYPE CONSTRUCTION
234	MULTIROOM OR LEVEL
235	.Curtain-wall, i.e., panel attached outside floor or beam
236.1	.Nonrectangular
236.2	..Curvilinear
236.3	.Multilevel
236.4	..Staggered levels
236.5	..Continuous cementitious barrier*
236.6	..Floor intermediate wall ends
236.7	..Superimposed vertical structure with spacing horizontal structure
236.8	...Horizontal structure includes component of settable material
236.9	..Abutting vertical structure at horizontal structure juncture
238.1	.Partition secured to and crossed by preconstructed barrier
239	..Cubicle type, i.e., spaced from floor or ceiling
240	..With tensioning means
241	..Elongated terminal member
242	...Interfitted trim plate
243	..Spaced sustainers individually connected to barriers
243.1	..Movable element on partition engages overhead barrier, i.e., ceiling, to secure partition in place
244	TUBULAR STRUCTURE WITH EXPOSED TERMINUS EDGE PROTECTOR
245	CURVILINEAR BARRIER
246	.Supports transverse structure
247	.Anchored to disparate base
248	.Dissimilar material hoop tie
249	.Transversely layered
250	CONSTRUCTION FORMING INTERSECTION HAVING CAST STONELIKE BARRIER COMPONENT
251	.Cast reinforced vertical and horizontal members
252	..Distinct horizontal sustainers between columns
253	..Rods engage rings or plates at supports
254	.Corner with revealed embedded protector
255	..Cast in situ corner facings
256	...With separate anchor portions
257	...Longitudinally spaced discrete anchor portions
258	.Laterally related modules with concealed cast-sustainer
259	.Cast in situ material at module juncture
260	.Cast in situ column with radiating-type reinforcement
261	PLURAL FACIALLY SPACED INTERSECTIONS INCLUDING BARRIER AS A COMPONENT
262	.Barrier resting on top of vertical structures, e.g., walls
263	..On columns
264	.Floor supports walls
265	..Layered barrier
266	.Vertically superposed wall sections

PLURAL FACIALLY SPACED INTERSECTIONS INCLUDING BARRIER AS A COMPONENT
267 .Wall of contacting layers
268 ..Disparate material lamina between layers
269 ..Dissimilar material sheet-form facing
270 .Walls of modular construction
271 ..Joint key between superimposed modules
272 INTERSECTION: BARRIER OR MODULAR-TYPE CONSTRUCTION
273 .Flexible barrier covering: shaped or edge-attached
274 .With footing, e.g., foundation
275 .Laterally related modules, e.g., spaced surfacing forms corner
276 ..Multiplane overlapping angle and barrier sections
277 ...Arcuate angle section
278 ...Means attaching angle section to substructure
279 ..Abutting inner modules with outer L-type module
280 .Trihedral shafts-type corner
281 .Sustainer coextensive with junction of panels or modules
282 ..Exposed sustainer
283 .Barrier or module seated on projecting means on vertical structure
284 .Modular construction
285 ..Disparate material tie
286 ..Vertical and horizontal keys
287 .Conduit or trim member attached to in situ erected barrier
288 .Corner type: channel, trim or shield member
289 .Coplanar sustainers, e.g., joists to wall
290 OPPOSED STRIP SECTIONS (BASEBOARDS) AND OUTWARDLY EXTENDING SUSTAINER
291 ADJUSTABLE STRESSING MEANS, E.G., WARP CORRECTION
292 FOOTING, WALL OR SHAFT-SUPPORTING TYPE, E.G., FOUNDATION
293 .Supporting wall
294 .Concrete type
295 ..Embedded projecting tie
296 ..Supporting shaft
297 ...Shaft encompassed by base
298 .Socket
299 .Framework spans footings
300 VERTICAL STRUCTURE WITH UPPER TERMINAL BEARING PLATE OR CAP
301 .Shaft
302 PLUGGED VENT, OR PASSAGE, BETWEEN INTERIOR AND AMBIENT
303 .Communicating with enlarged space, e.g., hollow wall
304 ..Double pane panel
305 .Formed by preformed imperforate separator
306 VISIBLE TRANSLUCENT BLOCK OR EMBEDDED COMPONENT
307 .With preform of nontranslucent material
308 ..Forming edging for translucent panel
309.1 WITH SYNTHETIC RESINOUS COMPONENT
309.2 .Locally reinforced to receive a fastener
309.3 .Nonfoam adhesive
309.4 .Foam
309.5 ..Adhesive
309.6 ..Open cell
309.7 ..With an embedded, elongated component
309.8 ..Adjacent nonporous layer
309.9 ...Nonporous exterior faces
309.11 ....Tie between exterior faces
309.12 ...Cementitious material
309.13 .With nonresinous component
309.14 ..Exterior faces
309.15 ..Core
309.16 ..Embedded, elongated component
309.17 ..Cementitious material
310 MEANS REMOVING EXCESS MOISTURE FROM CAST IN SITU MASS
311 ORNAMENTAL: COLOR, THICKNESS VARIATION OR DISSIMILAR ELEMENTS FORMING PATTERN
312 .Trim strip with filler strip
313 .Wood grain pattern arrangement
314 .Facer formed to simulate multiple units
315 .Visible discrete elements in cast material
316 .Integral relief of face
317 DRAFT STOP BETWEEN STUDS, E.G., FIRE STOP
318 MONOLITHIC BARRIER WITH REVEALED INTERSECTING STIFFENERS, E.G., TERRAZO
319 CAST IN SITU CONCRETE BARRIER WITH LATERALLY PROJECTING RIB-TYPE SUSTAINER
320 .Block-type filler between sustainers
321 ..Transverse retainer-engaging sustainers
322 ..Preformed, settable material sustainer
323 ..Filler of cooperating, void-forming sections
324 ..With means underlying sustainer
325 ..Hollow, nonrectangular filler
326 .Means suspending backer or stiffener from sustainer
327 .Additional distinct coextensive section fixed to barrier or sustainer
328 ..Section on face of barrier opposite sustainer
329 ..Arched backer between sustainers
330 ...With flange web-type reinforcement
331 ..Distinct means between base of sustainer and section
332 ..Discrete panels forming section
333 ..Sustainer anchored within section
334 .Shear-resisting means between sustainer and barrier
335 .Sheet-form backer supported on upper terminal of sustainer
336 ..Ridges on corrugated backing crossing sustainer
337 .Intersecting sustainers of barrier material, e.g., lattice type
338 .With backer supported on internal surface of flange web-type sustainer
339 ..Arched backer
340 .Sustainer enclosed by embedding material
341 ..Reinforcement modified at sustainer crossing
342 OPENLY SPACED SLAT-TYPE LATH
343 .Woven or filament connected
344 SETTABLE MATERIAL RECEIVING BACKER FIXED TO FURRING, JOIST OR STUD
345 .With adjustable spacer
346 .Means accommodating movement of backer
347 .With isolating means on supported side of backer
348 .Intersecting or crossing members forming backer frame
349 ..Terminal engaging flange or flanged member
350 ..Member supported by flange of crossing member
351 .With tie anchored in load-bearing barrier
352 .Integral backer and elongated support
353 .With tie crossing laterally related backers
354 .Integral part of support between edges of coplanar backers
355 ..With discrete separable fastener for backer

SETTABLE MATERIAL RECEIVING BACKER FIXED TO FURRING, JOIST OR STUD
356 .Support structurally modified to retain backer
357 .Discrete clip engaging back of support and in front of backer
358 ..Elongated wire-type clip
359 ..Engaging flange, adjacent backer, of flange web-type support
360 ...Single clip engaging oppositely extending flanges
361 .Impaling-type fastener
362 ..Support penetrated
363 ...Backer penetrated
364 INSTALLED SCREED OR UNIT WITH SPECIFIED FEATURE RETAINING PENETRATING FASTENER
365 .Position adjusting means
366 .Adhesively secured
367 .Stonelike material base type, e.g., concrete set
368 ..Composite shaft: pierceable component
369 ..Integral means on holder penetrates ground member
370 ..Holder engages opposite sides of ground member
371 ..Screed of striplike material
372 ..Locked-together base and receiver
373 ...Shell with fastener-retaining feature
374 ....Filler
375 ...Base is preformed module or panel
376 .Composite, including pierceable nonmetal component
377 .Fastener deflecting
378 CAST IN SITU LOADING BEARING MONOLITH WITH COEXTENSIVE SECTION AND TIE
379 .Tie between block-type units
380 CAST IN SITU BARRIER CONSTRUCTION DEFINING ISOLATED SPACE
381 .Lined cavity formed within monolithic barrier material
382 ..Closed curvilinear cavity liner
383 .Spaced barrier sections with dissimilar material tie
384 FACING OF COPLANAR VENEER TILES HELD BY NONLOAD BEARING HOLDING MEANS
385 .Attached to additional substructure
386 .Integral projections on backer
387 ..Engaging edges of tile
388 .Mesh-type backer, e.g., woven fabric
389 .Tiles embedded in settable material
390 ADHERED COPLANAR VENEER TILE-TYPE FACER, E.G., PARQUET
391 .With additional discrete securing means
392 .Integral edge engaging spacing feature on tile
393 RELATIVELY YIELDABLE PREFORMED SEPARATOR
394 .Between overlapping edges of surfacing sections
395 .Separating bridger strip from juncture of panels
396 .Between stonelike-type components
397 .Spacing panel (pane) from disparate edging
398 ..Facially spaced similar panels
399 ...Spaced by unitary or contacting U-channels
400 ..Overlapping edge and face of panel
401 ..Metallic spring, e.g., strip separator
402 ..Held by separate spacer
403 .Elastomeric or felt spacer
404 INSULATING INSERT, E.G., FILLER IN CAVITY IN PRECONSTRUCTED OR CAST STRUCTURE
405 .Stonelike-type shell
406 .Envelope-type filler
407 .Filler spaced from inside face of cavity
408 DISPARATE PREFORMED SHEET LAMINA SEPARATING COMPONENTS OF IN SITU CONSTRUCTION
409 .Lapped multiplanar components
410 .Tie crossing dividing lamina
411 .Additional material forming bond
412 ..Extending into intersecting joints
413 ..Integral projections on planar face
414 MONOLITHIC CAST IN SITU BARRIER WITH DISPARATE MATERIAL SUSTAINER AND EMBEDDED REINFORCEMENT
415 FACERS, E.G., MODULES, MUTUALLY BONDED BY INTERNAL SETTABLE MATERIAL SECTION
416 .Lapped or bridger strip juncture-type surfacing
417 ..Dissimilar strip at juncture of facers
418 ..Embedded fastener
419 ..Material between superposed facers
420 ...Partial section, e.g., adhesive edge strip
421 .Hollow module and discrete dam for cast section
422 .Retaining feature on module exterior
423 .Shaft with dissimilar shell
424 .Laterally related modules, e.g., back-to-back
425 ..Continuous section filling space between modules
426 ...With transverse tie
427 ..Transverse, disparate material form member
428 ..Separable, bonded tie between modules
429 ..Flanges on modules enclosing section
430 ..Integral overlapping bonded projections
431 ..Module reinforcement anchored in section
432 .Facer reinforcement anchored in section
433 .Beam or girder type with feature resisting transverse loading
434 .Modules fixed to preformed sustainer
435 ..Flange web-type sustainer embedded in section
436 .Section between integral interfitting means on modules
437 .Section filling opposed channels in adjacent modules
438 ..Dissimilar material member in section
439 .Section filling hollow or channel module
440 .Means covering section surface
441 ..Distinct means separate from module
442 .Dissimilar material member in section
443 IMPERFORATE AREA BACKER FOR SETTABLE MATERIAL FACING
444 .Block-type backer with integral facing receiving feature
445 .Discrete particles adhered to backer
446 .Disparate coating material on backer
447 .Separate sections with connecting feature
448 ..Interengaging edge joint
449 .Cementitious material covered by adhered apertured sheet
450 .Corrugated
451 ..Laminated on planar sheet
452 ..With transverse filament
453 .Grooved backer
454 .Attached filament or mesh
455 SECTIONED IMPERFORATE FACING WITHIN PERIPHERAL FRAME, E.G., PLURAL PANEL DOOR
456 .Intersecting separators within frame
457 .Edge-abutted panels
458 ..Panel edge flanges connected
459 NONSUSTAINING BRIDGER STRIP OVER JUNCTURE OF PANELS

NONSUSTAINING BRIDGER STRIP OVER JUNCTURE OF PANELS
460 .Panels attached to substructure arrangement
461 .Bridger strip and coextensive elongated member at juncture
462 ..Lapped panel sections
463 ..With separable fastening element
464 ...Portion of bridger strip between panels
465 .Cap
466 ..With separate anchor element
467 ...Traversing cap
468 ..Extending between spaced coplanar edges of panels
469 ..Completely exterior
470 .Interfitted with surfacing section
471 ..In recess of section
472 ...Deformed section
473 LOUVERED PANEL
474 FACER, E.G., PANEL, HELD BY PREASSEMBLED OR PREPOSITIONED FRAME OR SHAFT
475 .Cornered peripheral frame
476 ..With releasable frame section retaining facer
477 ..Stonelike load bearing-type component
478 .Lapped multiplanar surfacing attached to substructure arrangement
479 .Face-to-face barrier sections
480 ..With spacing sleeper or subflooring
481 ..Sustainer between section faces
482 .Shaft with ductile-type deformable grip
483 .Facer lateral of adjacent shaft edge
484 ..Facer suspended by flexible or pivoted hanger
485 ...Complementary integral interengaging facer edges
486 ..Hook-supported hanger for facer
487 ..Cantilevered support for facer
488 ..Shafts form polygon
489 ..Separable clip-type fastener
490 .Stiffener between facer and shaft
491 .Preformed concrete sustainer
761 .Shaft substantially cylindrical in cross section
762 .Lateral flanges of adjacent facers held in opposed relation by shaft or separate means associated therewith
763 .Interkeyed edge configurations of adjacent facers cooperate with shaft
764 .Facer retaining means other than individually applied screw, rivet, or nail-type fastener or retainer permanently mounted on facer
765 ..Shaft or facer piercing element integrally formed on, or preassembled with, retaining means
766 ..Retaining means includes cam or wedge
767 ...Retaining means clamped against facer by turning cam-engaging screw
768 ..Retaining means pivots or includes pivoting actuating means
769 ..Retaining means includes spring holding a separate element against facer
770 ..Separate shaped, thin-walled retaining elements confront opposite barrier faces of facer, with fastener interconnecting elements or element and shaft
771 ...Retaining elements interconnected by intermediate member and fastener
772 ..Joint faces of adjacent facers held in spaced relation by shaft and retaining element confronting both facers
773 ..Springy, thin-walled, or wire retaining means resiliently abuts facer
774 ...Retaining means engages joint face of facer
775 ..Retaining element received in channel or aperture in shaft
776 ..Solid three-sided glazing strip
777 .Shaft and facer confront at two surfaces at joint face of facer
778 ..Shaft received in edge rabbet formed at intersection of barrier and joint faces of facer
779 ..Shaft received in channel in joint face of facer
780 ..Facer received in recess in shaft
781 ...Shaft formed of shaped, thin-walled material
503 HOLLOW MODULES FORM THROUGH PASSAGE IN BARRIER INTERIOR
504 .Facing of solid block-type modules
505 .Horizontal and vertical communication
506 FACER, E.G., MODULE, ATTACHABLE TO DISPARATE STRUCTURE
507 .Grille panel facer
508 .Facially opposed barrier sections form cavity
509 .With separate fastener extending beyond margin
510 .Integral rear-seating ledge on facer
511 .Mounting means attached to facer, e.g., upholstery panel
512 .Separate fastener held by penetrating fastener
513 .Discrete dissimilar tie between stonelike components
514 WITH MEANS FOR SPLIT-PREVENTION OR DAMAGED PART REPAIR
515 WITH DISPARATE PROTECTIVE COATING
516 .In situ applied layer coextensive with lapped sections
517 .Repellant treated
518 LAPPED MULTIPLANAR SURFACING; E.G., SHINGLE TYPE
519 .Interfitted sections
520 ..Fastener or anchor at juncture
521 ...Traversing surfacing
522 ..Resilient detent
523 ..Edge and slit
524 ...Interfitting slits
525 ...With tab
526 ..Tab and aperture
527 ..Coplanar tab on margin
528 ..Folded, rolled or indented in situ
529 ..Reentrant
530 ...Plural oppositely opening
531 ....With terminal flange extending beyond joint
532 ...At corner of section
533 ..Joint with fluid-handling feature
534 ...Formed by deformation of base material
535 ..Plural offset portions
536 ..Face-to-face tongue and groove, e.g., dado
537 ...Meshing corrugated sheet type
538 ...Plural opposed flanges
539 ..Tongue and groove
540 ..With laminated lap section
541 ..Rabbet
542 ..Perpendicularly directed flange
543 .With fastener or anchor
544 ..Interengaging connectable fastener parts
545 ..Engaging folded section of strip or facing
546 ..Fitted within edge slot or notch
547 ..Edge-embracing

LAPPED MULTIPLANAR SURFACING: E.G., SHINGLE TYPE
.With fastener or anchor
..Edge-embracing
548 ...With integral piercing point
549 ..Facing clamped to substructure by discrete external member
550 ..Embracing or interfitted with substructure
551 ..Subjacent fastener strip
552 ..Secured to or integral with cover section
553 .With spacing or space-forming feature
554 .With pattern-forming feature
555 ..Facing simulating plural elements
556 .Metal face end covering
557 .Plural tabs or facing elements simulator
558 ..Formed embossment or groove
559 ..Formed by slot
560 .Tapered
561 LATERALLY RELATED, INDIVIDUALLY ASSEMBLED COURSES
562 .Utilizing discrete dissimilar material tie
563 ..Engaging lateral integral projection on module
564 ..Engaging opposed deformations in course modules
565 ..Embedded in course module
566 .Header unit traverses course
567 ..Internal lock-held on header unit
568 .Connected by transverse hidden joining member
569 .Opposed lateral monolithic projections on modules
570 ..Locking type, i.e., against lateral separation
571 ...Additional lock means between projections
572 ..Opposed projections abutting
573 WITH MEANS ACCOMMODATING DIMENSIONAL VARIATION RESPONSIVE TO CHANGING CONDITIONS
574 ALTERNATING REVERSED IDENTICAL FORM MODULES
575 MODULE WITH NONPARALLEL OPPOSED JOINT FACES
576 CAVITY-FORMER WITHIN MODULE
577 EMBEDDED-TYPE VOID FORMER
578 MODULE OR PANEL WITH DISCRETE EDGEWISE CONNECTING FEATURE
579 .Z- or U-strips, aligned flanges forming major faces
580 .Opposed discrete edger-spacers, e.g., hollow panels
581 .Edge-to-edge open-work panels
582 .With separate dissimilar joining means
583 ..Embedded elements joined
584 ..Clamp-type joining means
585 ..Tie within preformed opposed openings, e.g., dowel
586 ...Tie length within edge or face groove, e.g., spline
587 ..Embedded projecting tying means
588 .Interfitted lateral flanges
589 .Keys on angularly related edges
590 ..Key joints exposed at face, e.g., pattern
591 ..Surface with four-direction lock
592 ..Ship-lap
593 .Integral key
594 ..Four-direction lock
595 ..Tongue and groove with internal space
596 OPAQUE STONELIKE MODULE
597 .Discrete clip-gripping facing sheet
598 .Lateral retaining feature on facing sheet
599 ..Terminal flanges
600 .Elongated reinforcing
601 ..Dissimilar material edging
602 ..Slab type with integral ribs
603 .With integral spacing projections
604 .Particularly related to adjacent module
605 .Grooves on juncture face
606 .With traversing passage
607 ..Additional intersecting, traversing passage or groove
608 .Nonrectangular cross section
609 ..Faces with offset edges
610 ...L-shaped
611 ...T-shaped
612 .With layered stonelike components
782 COMPOSITE PREFABRICATED PANEL COMPRISING: SEPARATE MECHANICAL FASTENER; MEANS FOR SUPPORT SECUREMENT; DISPARATE EDGING OR STIFFENER WHICH, IN A MULTI-PLY PANEL, EXTENDS OUTWARDLY OF A MAJOR OR EDGE FACE; OR SPACED SHEETS WITH INTURNED EDGE-FORMING FLANGES
783 .Rimmed table top formed of face-to-face sheets
784 ..With mechanical fastener (e.g., screw, bolt, or nail, etc.) for securing rim
785 .Sandwich or hollow with sheetlike facing members
786 ..Mirror
787 ..Internal receiver for elongated laterl fastener
788 ..Parallel, transparent panes, (e.g., double glass window panel, etc.)
789 ...Intermediate nonglass sheet
790 ...Internal spacer
791 ..Hermetically sealed, opaque panel
792 ..Dimpled or embossed sheet
793 ..Internal, diagonal, enlongated stiffener
794 ..Perforate or woven sheet
795 ..Corrugated component
796 ...Face-to-face corrugated sheets
797 ....Abutting trough to crest
798 .....Angled face-to-face corrugations
799 ...Corrugated intermediate sheet
800 ...Core of elongated, corrugated spacers
801 ...Single corrugated sheet and single flat sheet face-to-face
802 ..Inturned opposed flanges form panel edge
803 ...With driven, headed, or screw-threaded fastener
804 ...With separate clip or wire-type fastener
805 ...Flanges interfit
806 ..Multicellular core
807 ...Elongated striplike laterally spaced elements form core
808 ...Discrete cell elements
809 ..Insulating core
810 ..Having a single hollow cavity
811 .Face-to-face sheets in substantially continuous contact
812 ..Mirror
813 ..Separate attached, elongated edging or stiffener
814 .Corrugated or embossed panel with separate attached, elongated edging or stiffener
815 .Perforate panel with separate attached, elongated edging
816 ..Expanded metal
817 ..Elongated, laterally spaced strips or strands
818 ...Intersecting strips or strands

	COMPOSITE PREFABRICATED PANEL COMPRISING: SEPARATE MECHANICAL FASTENER; MEANS FOR SUPPORT SECUREMENT; DISPARATE EDGING OR STIFFENER WHICH, IN A MULTI-PLY PANEL, EXTENDS OUTWARDLY OF A MAJOR OR EDGE FACE; OR SPACED SHEETS WITH INTURNED EDGE-FORMING FLANGES
	.Perforate panel with separate attached, elongated edging
	..Elongated, laterally spaced strips or strands
	...Intersecting strips or strands
819	....Strip having orifice encompassing intersecting strip
820	....Strip interfits edge slot of intersecting strip
821	.Separate attached, elongated edging or stiffener
822	..Overlaps panel edge face and panel major face
823	...U-shaped channel overlaps panel edge and major faces
824	....Separate strips form U-shaped channel
825	.....With mechanical fastener (e.g., nail, bolt, screw, etc.) for securing strips
826	....With mechanical fastener (e.g., nail, bolt, screw, etc.) for securing channel
827	..Overlaps major face only
828	...Spaced inwardly of edge face
829	..Overlaps edge face only
830	...Extends laterally of edge
630	IMPERFORATE PANEL WITH INTEGRAL REINFORCING
631	CORNER FORMED BY LAMINATE WITH BENT FACING SECTION
632	SHAFT OR OPENWORK, AXIALLY EXTENSIBLE
633	OPENWORK, E.G., TRUSS, TRELLIS, GRILLE, SCREEN, FRAME OR REBAR CHAIR
634	.Truss with unitary chord and web, e.g., sheet metal
635	..Expanded metal
636	..Web portions connected between chords
637	.Superimposed three-dimensional units
638	..Diagonal and horizontal bracing extend from juncture of sections
639	.Curvilinear or peaked truss
640	..With means to vary camber
641	..Collapsible or demountable
642	..Laminated
643	..Structurally related trusses
644	..Arcuate chord
645	.Components adjustably or collapsibly connected
646	..Three-dimensional space-defining
647	.Wire connected to flange of I- or T-type member
648	.Three-dimensional space-defining
649	..Mast with distinct terminal structure, e.g., horned
650	..Parallel trellises or sheets held by disparate connector
651	..Additional laterally projecting means
652	...Spacer-positioner
653	..Circumferential encircling element, e.g., helical
654	..Internal transverse spacer for runners
655	..Inclined struts or ties meeting at intermediate runners
656	.Outside corner or peripherally bordered, i.e., framing
657	.."X" or corner brace
658	..Integral corner, e.g., bent shaft
659	.Embedded type free, discrete elements, e.g., set or rings
660	.Fabric or lattice, e.g., indeterminate grating
661	..Perforated with attached filaments
662	..Plural facially contacting layers
663	..Discrete component; wholly internal, e.g., architectural grille
664	..Intersecting strips or strands
665	...Separate connector at crossing
666	...Face-to-face slats, edges coplanar
667	....Slat orifice encompasses slat
668	....Interfitted edge slot
669	...Dissimilar cross section between crossings
670	..Expanded metal
671	...Laterally displaced sections, e.g., corrugated
672	....Nonexpanded, channel-shaped ribs
673	..Perforated
674	...Corrugated
675	...Material laterally displaced
676	..Mesh type with attached discrete bodies
677	.Spacer-positioner, e.g., rebar chair
678	..Adjustable support
679	..Penetrator with limiting stop
680	...Hook-type head integral with penetrating leg
681	...Penetrating leg traversing separate stop
682	....Cup, bulb or U-shaped stop
683	....Block-type stop
684	..Support member retaining means movable or deformable to final position
685	...Crossed supported member type
686	...Crossed supported member type
687	..Plural feet or seat
688	...Units attached to separate connector
689	...Single seat
690	.Side-by-side terminus shafts, e.g., truss
691	..Truss with inclined lower chord
692	..Truss with compound chord
693	..Diagonal bracing
694	...Continuous serpentine, e.g., Warren truss
695	...X-braced, i.e., connectors crossing
696	..Sheet metal-type spacer-connector
697	.Shaft with truss-braced cross-arm
698	ASSEMBLED IN SITU TYPE ANCHOR OR TIE
699	.With feature engaging form
700	..Integral penetrating means
701	..Separate forms fastener within socket member
702	.Depending cantilevered seat portion, e.g., joist anchor
703	.Traversing-type anchor
704	.Socket type
705	..Helical anchoring feature
706	..Traversing rod spaced internally of socket base
707	..With discrete attached embedded member
708	..Separate base and wall members forming socket
709	..Selective stops for element held
710	..Elongated supporting track type
711	..Internal stop for head of element held
712	.Sheet or wire tie
713	..Separably connected sections
714	..Integrally connected different form-fastening feature
715	..Sheet form with tabs oppositely extending from base sheet
716	IN SITU ATTACHED-TYPE CHANNEL OR TRIM STRIP, E.G., EDGING
717.1	.With separate means attaching to substructure
718.1	..Interengaging fastener and strip edges or flanges

719	CROSSED REINFORCING RODS WITH CONNECTOR
720	SHAFT, I.E., ELONGATED RIGID STRUCTURE
721	.Plural or composite, with intersecting member, e.g., bracket
722	.Stonelike component, e.g., concrete
723	..With feature resisting transverse loading, e.g., beam
724	...Dissimilar shell
725	..With dissimilar shell
726	.End-to-end connected sections
727	.Dissimilar material shell or facing
728	..Partial sleeve or collar
729	.I-beam cross section
730	.Longitudinally related striplike sections
731	..Forms hollow enclosure, e.g., box beam
732	..Angular component, e.g., L, T, Z section
733	.With attached projections, e.g., shear member
734	.Sinuous curve type
735	.With struck-out projections
736	.Axially twisted type
737	.Ribbed
738	..Longitudinal
739	...Normal
740	.Axially and peripherally spaced projections
741	PROCESSES
742	.Utilizing the earth
743	.Filling preformed cavity with flowable or sheet material
744	..Grouting or pointing
745	.Forming unit and moving into position
746	.Adhering preformed sheet-form member
747	.Assembling exposed modules, e.g., bricklaying, roofing, etc.
748	..Overlapping or interfolding edges, e.g., shingling
749	MACHINE OR IMPLEMENT
750	MISCELLANEOUS

394 MATCHBOOK MAKING
395 .Methods
396 METHODS
397 .Applying a partial cover
398 ..Partial covering of multiple cans, bottles (e.g., six-pack carrier)
399 ..Banding
400 .With adsorption or absorption of contents
401 .With nonreactive packaging materials
402 .With inhibitor
403 .Gas filling and/or evacuating and closing
404 ..With solder or wax sealing
405 ..Evacuating only and closing
406 ..With gas igniting
407 ..With steam filling
408 ..Including evacuating
409 .Annular package
410 .Forming a cover adjunct or application of a cover adjunct to a cover
411 ..Printing or protective coating
412 ..Package opening device (e.g., tear strip)
413 ..Handle
414 ..Binding string
415 ..Strip, stamp, nonencircling label, or space filler
416 ..Fastening or sealing
417 ...Applying the fastener to a gathered bag neck (e.g., staple or clip)
418 ...Sewing
419 ...Encircling sealing strip (e.g., adhesive tape)
420 ..For preformed receptacle with separate closure
421 ...Including gasket compressing
422 ....Against side of receptacle
423 ...Including casting or molding
424 ...Constricting closure by binding
425 .Sterilizing complete package
426 .Sterilizing cover only
427 .Skin packaging (e.g., vacuum forming by conforming cover over contents)
428 .With contents treating
429 ..Folding
430 ..Winding
431 ..Liquid treating
432 ..Vacuum or gas treating
433 ...Receptacle forming
434 ...Flexible preform cover (e.g., bags, pouches)
435 ..Cutting
436 ..Compacting or stretching
437 ...Agitating (e.g., vibrating or jarring)
438 ...Before association with cover material
439 ....By simultaneously conveying and compressing
440 ..Heating or cooling
441 .Conforming by stretching or shrinking of cover over contents
442 ..By heating
443 .Group forming of contents into a unit
444 ..Of slender rod-shaped contents (e.g., cigarette)
445 ..Of diverse contents (e.g., can and coupon)
446 ..With orienting (e.g., turning labels face out)
447 ..Stacking upon another before packaging
448 ..Single layer forming
449 .Plural covers
450 .Enclosing contents within progressively formed web means
451 ..Vertically formed, filled, and sealed tubular package
452 .Forming or partial forming a receptacle and subsequent filling
453 ..Forming a pocket or depression in cover material by applying heat or pressure (e.g., stretch forming)
454 ...Forming a capsule
455 ..Making a pocket in web material by folding and side sealing (e.g., flat bag making)
456 ..Forming three-dimensional receptacle from web or blank
457 ..Opening or setting up collapsed, preformed receptacle
458 ...Box, carton
459 ...Bag, tube, center-folded web
460 .Envelope or triangular flap fold
461 .Wrapping contents including cover forming
462 ..With slotted or scored wrapper blank
463 ..With heat sealing of wrapper
464 ..Cup or pouch forming about contents from web or blank
465 ..Cinching or wiping around to form initial wrap
466 ..U-fold forming initial wrap
467 .Filling preformed receptacle and closing
468 ..Opening prior to filling and closing
469 ..Flexible, expandable receptacle (e.g., bag, tube)
470 ..Aerosol container
471 ..With separate closure attaching (e.g., cap or plug)
472 ..With protective media (e.g., shock absorbing)
473 .Filling preformed receptacle
474 ..With diverse contents
475 ..With successive like contents or layers of like contents
476 .Closing package or filled receptacle
477 ..By heat sealing
478 ...Separate closure
479 ...Of preformed nonfreestanding container deformed by contents (e.g., bag, tube)
480 ..Closing preformed container deformed by contents
481 ...By collapsing mouth portion (e.g., to form single flap)
482 ....Folding or rolling-in
483 ....Twisting
484 ..Closing a preformed, freestanding, rigid or semi-rigid container (e.g., box, carton, bottle)
485 ...By applying a separate preformed closure (e.g., lid, cap)
486 ....With receptacle deforming or shaping
487 ....With preliminary closure shaping
488 ....By conforming closure to container
489 ....By plugging closure into container
490 ....By screwing closure on container
491 ...By folding multiple preformed flap
492 .Opening only
48 MULTIPLE BOTTLE OR CAN CARRIER TYPE PACKAGE
49 BOTTLE IN SHAPED COVER OR CARTON
50 PACKAGE UNFOLDING OR OPENING WITH INSERTION OF ADDITIONAL CONTENTS
51 REGISTER CONTROL
52 WITH MEANS RESPONSIVE TO A SENSED CONDITION
53 .Separate delivery of incomplete or defective package
54 .Separate delivery of incomplete or defective contents or contents group
55 .Concurrent control of contents and receptacle feeds
56 ..Stopped by contents, manual reset

	WITH MEANS RESPONSIVE TO A SENSED CONDITION
	.Concurrent control of contents and receptacle feeds
	..Stopped by contents, manual reset
57	...By absence of contents
58	..Triggered by presence of contents
493	.Of individual contents or group feed or delivery
494	..Responsive to incomplete group or subgroup (no group - no feed)
495	..Responsive to complete group or subgroup
496	...Responsive to the presence of only the lead article of a completed group
497	....Plural lead articles
498	...By sensing each individual article of the group or subgroup
499	....Individual sensors (one for each article in the group or subgroup)
500	....Single sensor for successively sensing each article of the group or subgroup (e.g., counter)
501	..By totalizing of individual contents
502	..By weight of contents
503	..By volume of contents
504	..By dimension of contents
505	..Responsive to presence or absence of cover material (e.g., wrapper, receptacle, lid)
506	...Responsive to absence of cover material (no can - no fill)
64	.Of receptacle or cover feed or adjunct feed or application
65	..Of marker by defective package component
66	..Severed length determined by contents size
67	..Responsive to presence or absence of preformed receptacle
68	...With closure ejection means
69	...During infeed
70	...With solenoid control means
71	...With intermediate clutch
72	...And presence or absence of closure
73	..Skip feed by absence of contents
74	..Triggered by presence of contents
75	.Of package and filled receptacle closing or opening
76	..Triggered by presence of package
77	INTERRELATED OR SAFETY CONTROLS
507	WITH ALARM, SIGNAL, OR INDICATOR
508	.Visual or audible alarm
79	GAS FILLING AND/OR EVACUATING OF RECEPTACLE AND CLOSING
80	.Including soldering means
81	..Solder and/or flux deposit only
82	..Iron application only
83	...Electric arc or resistance type
84	.Pressure responsive and/or regulation
85	.Enclosure responsive
86	.Within enclosure
87	..With screen or graduated orifices
88	..For receptacle head only
89	..Machine positioned receptacle and/or closure
90	...Through lock or valve means
91	....Rotary pocket or pockets
92	.....Common in-out
93	......With separate coacting pockets
94	....Including closure handling means
95	...Multiple individual receptacle chambers
96	....Integral unit
97	..With closure assembling means
98	...Resilient hold-down
99	...Gravity plunger or platen
100	....With drop control
101	...Mechanically actuated plunger or platen
102	....With equalizer means
103	...Atmospheric pressure
104	....With fluid system intensifier
105	....Flexible diaphragm
106	....Pressure platen
107	.....Individual receptacle
108	......Base contacting
109	..With cap lifter
110	.Within tunnel
509	SKIN PACKAGING
111 R	WITH CONTENTS TREATING
111 RC	..With reactive chemical
510	.Vacuum or inert atmosphere
511	..With receptacle forming
512	..With preformed bag
113	.Reshaping
114	..Coil spring encasing
115	..Cushioning material inserting means (e.g., pill bottle cotton)
116	..Folding or rolling
117	...Sheet material or garments
118	....Rotary winding
119	.....Slotted or divided mandrel
120	....Slot and blade doubling
121	..Crushing
122	..Molding or plastic deformation
513	..Cutting
514	...Food or edible material
515	....Fruit or vegetable
516	....Bread, pastry, or confection
517	....Meat or fish product
518	....Diary product
519	.....Butter
520	...Film, sheet or weblike material
521	...Stuffing (e.g., mattress ticking)
522	...Strand, tube, or rodlike material (e.g., drinking straw)
523	..Compacting or stretching
524	...Mattress filling
525	...By agitation
526	...Compressing with or through cover
527	...Compressing contents within preformed receptacle
528	...Compressing while engaging contents with wrapper or band
529	...Compressing before packaging
530	....Through restricted passage
127	.Heating or cooling
128	WITH COVER ADJUNCT APPLICATION OR FORMATION
129	.Closure spot, packing disk, or sealing gasket
130	.Disk seated into and depressed with portion of hood
131	.Printing or protective coating
132	.Lever actuator for closure constriction
133	.Package opening device
134	.String or handle
135	..Binding string
136	...Bottle hood securing
137	.Strip, stamp, gap filler or non-encircling label
138 R	.Staple or clip
138 A	...Bag neck tying
139	.Sewing
139.3	.Encircling sealing strip
140	WITH COVER MATERIAL PRODUCTION
141	WITH FUGITIVE PRECONDITIONING OF COVER MATERIAL
142	TAPERED OR HEADED ARTICLES
143	.Inverting one or more units
144	..Receptacle reversing
145	FACING (E.G., FRUITS AND VEGETABLES)
146	.Variable contour facing plate

147	GROUP FORMING OF CONTENTS UNIT AND SUBSEQUENT OR FURTHER PACKAGING
148	.Long slender articles (e.g., cigarettes)
149	..Adjacent rows of unequal numbers
150	..Superposing rows
151	..Hopper with multiple channeled outlet
152	.Formed in vertically spaced ways and simultaneously removed
153	..Plural groups
154	.From plural or different supply sources
155	..Diverse forms or shapes of units
156	...Package reinforcing sheet or trough
157	...Insert or separating sheet
158	.Joined receptacle or pockets
531	.Layer, stack, or column
532	..Assembling, gathering, and stacking coins or similar disclike articles
533	..Assembling sticks of chewing gum
534	..Receptacle advances as row groups are deposited therein
535	..Lowered support or raised wall
536	...Within receptacle
537	..Forming successive coplanar layers and depositing in cover means
538	...Varying strokes of depositing means
539	..Simultaneous deposit to fill compartmented receptacle
540	..Stacking one article or group of articles upon another
541	...Building up the stack from the bottom
542	..Grouping articles on edge in a linear relationship
543	..Forming single generally horizontal groups comprising plural rows and columns
544	..Orienting one or more units of the group
167	COMBINED
168	SELECTIVE OR ALTERNATE SUPPLY OF PLURAL COVERS AND/OR PLURAL CONTENTS
169	SLIDING TRAY AND SHELL TYPE PACKAGE
170	PLURAL LAYER PACKAGE MATERIAL
171	.Plural packages in outer cover
172	.Concurrently formed with multi-layered blank
173	.Filling preformed receptacle and subsequent covering
174	.Wrapping and subsequent filling of preformed receptacle
175	.Lining preformed receptacle
176	.At least one layer a band
545	PROGRESSIVELY SEAMED COVER WEB OR WEB FOLDS
546	.Multirow
547	.With package severing and subsequent closing of severed end
548	.With closing of web between package units
549	..By twisting
550	..Longitudinal tube formed from single web
551	...Vertically disposed tube
552	....Concurrent severing
553	..Plural webs
554	...Vertically disposed tube
555	...Simultaneously longitudinal and transverse seaming
556	APPARATUS FOR CONTRACTION OF COVER BY STRETCHING OR SHRINKING
557	.By heat shrinking
558	APPARATUS FOR FORMING OR PARTIALLY FORMING RECEPTACLE AND SUBSEQUENTLY FILLING
559	.Forming a pocket, depression, or hollow compartment by application of heat or pressure (e.g., stretch forming)
560	..Capsule
561	..Molding or extruding a container
562	.Forming a pocket or pouch by folding and side sealing (e.g., flat bag making)
563	.Forming a receptacle around a mandrel or former and removing therefrom prior to filling
564	.Forming by opening or setting up collapsed receptacle
565	..Gable-top carton (e.g., milk carton)
566	..Horizontally loaded box or carton
567	..Flexible tubular stock - preformed continuous tube
568	..Longitudinally prefolded web stock
569	..Letter-type envelope
570	..Bag or sack
571	...Magazine
572	....Filled before removal from magazine
573	....Combined extractor and opener
574	.Forming receptacles whereby the receptacle is subsequently filled while on the forming means
575	..Hollow forming mandrel or plunger
576	...Tubular receptacle stored on mandrel
577	...Gathered mouth receptacle
578	..External former
579	...Former mounted on conveying means
580	PARTIAL COVER APPLICATION
581	.Spindle or core
582	.Band or tube
583	..Bag neck banding
584	..Cigar banding
585	..Preformed tube
586	..U-fold forming initial banding
587	..Applied by rotation of contents
588	..Applied by rotation of band
589	..Applied by guiding band end about contents
590	..Applied by manipulating opposed band ends about contents
591	..Applied about series contents
592	..Applied by manual operation
593	..End or band interleaved with contents (e.g., book or magazine band)
594	.Uncovered reduced projection or handle (e.g., lollypop)
201	CONVERTIBLE
202	PLURAL LINE PACKAGING
203	WRAPPING MACHINES
204	.Annular package
205	.Granular contents material
206	.Packet or envelope type
207	.Notched or corner-slit cover blanks
208	..With cover notching or slitting
209	.Prepositioned cover and contents transported to wrapping means
210	.Cinched or wiped around initial wrap
211	..By rotation of contents
212	...Stacked contents (e.g., coins)
213	....Hand manipulated type
214	...Cover at least in part adhered to contents
215	...Apron type
216	...Rolling movement
217	...With end twisting
218	.Fixed package support during wrapping
219	..Hand manipulated type
220	.Cover-wiping passage or pocket for initial wrap
221	..Cup- or pouch-forming initial wrap
222	...Four-sided corner flap forming chute or pocket
223	....Package advanced through succeeding fold chute
224	....Package advanced by folding carrier
225	.....Rotary turret or carrier
226	...With end crimper or in-folder
227	...With end twister

WRAPPING MACHINES
.Cover-wiping passage or pocket for initial wrap
228 ..U-fold forming initial wrap
229 ...Outturned longitudinal seam
230 ...Package advanced through succeeding fold chute
231 ....Via intermediate non-folding carrier
232 ...Package advanced by folding carrier
233 ....Continuously moving carrier
234 ....Rotary turret or carrier
235 DEPOSITING ARTICLES AND ARRANGING MATERIAL IN PREFORMED RECEPTACLES
236 .Long slender articles (e.g., matches)
237 .Plural filling stations and/or contents sources for single receptacle
238 ..Diverse forms or shapes of units
239 ..Article and fluent material
240 ..Successive filling stations
241 .Contents support extends through receptacle (e.g., garment baggers)
242 .Bottom filling
243 ..With turnover
244 .Successive deposits of articles
245 ..Lowered support
246 ..Compartmented receptacle
247 .Simultaneous deposit of plural articles
248 .With means to retard free fall of articles into receptacle
249 .With movement of receptacle to or from filling station
250 ..With means to supply successive receptacles
251 ...Contents or receptacle transfer between conveyers
252 ....By reciprocable pusher
253 ...Rotary
254 .Disc packers
255 .Guide or inserted form or support for article contents
256 ..Garment baggers
257 ..With size adjusting means
258 ..With injector (e.g., filling plunger)
259 ...Endless belt
260 ..With retractible, collapsible or separable portion to permit withdrawal or to dump contents
261 ..Expansible
262 ...Spring form
263 ..Receptacle divider
264 WITH MEANS APPLYING CLOSURES OF INTERNALLY STOPPERED RECEPTACLES
265 WITH MEANS APPLYING ATTACHED OR CONNECTED CLOSURES OF BAIL STOPPERED RECEPTACLES
266 R FILLING PREFORMED RECEPTACLES AND CLOSING
266 A ..Envelopes
267 .With compound fill-close station
268 .With common fill-close stations
269 ..Closing mechanism tripped by vented air
270 ..Closure release by withdrawal of fill means or receptacle
271 ..Unidirectional infeed motion only
272 ..Turret mounted (plural heads rotatively indexing and progressively acting)
273 ..Swivel or slide relation to receptacle aperture
274 ..Including closure port valve means
275 ..Closure within or forming wall of pressure chamber
276 .Diverse heads rotatively indexing and progressively acting (turret)
277 ..Planetating or epicyclic orbit
278 ..Concentric orbits
279 ..Plural axes
280 ...Common infeed means
281 .With separate closure
282 ..Endless conveyor for receptacle
283 ..Common infeed means for fill and close means
284 .Opposite end closing
285 CLOSING PACKAGES AND FILLED RECEPTACLES
286 .Plural independently closed covers
287 .Separate closure applying
288 ..Cover to milk can
289 ..With preliminary receptacle shaping
290 ..With preliminary closure shaping and/or treatment
291 ...Unfolding, opening and/or stretching capsules or cots
292 ....With suction or blast
293 ....Removal from support by receptacle
294 .....Stretcher cammed by receptacle
295 ....With cot dispenser or ejector
296 ...Cutting and/or shaping means
297 ....Concentric with or at infeed of closure
298 .....Blank cut-off only
299 ..Receptacle delivery by case or row
300 ..With receptacle support and/or feed by shoulder engagement
301 ..Receptacle delivery to alternately acting headers
302 ..Sequentially acting plural headers
303 ...In vertical orbit
304 ...With single closure supply stack for headers
305 ..By hand operation with magazine supply
306 ..Closure delivery from supply into or below bottom of header
307 ...Closure delivery into inverting header
308 ...Turret supporting closure below header
309 ..Closure delivery from supply through top of header
310 ..Closure delivery from supply laterally into header
311 ...Closure at infeed normal to closure in stack
312 ...Horizontal infeed
313 ..Closure selected by moving receptacle
314 ...With subsequent securing
315 ...With wiper or leveler means
316 ....Roller
317 ..Screw or lug closure applying means
318 ...With reverse rotation means
319 ..Closure inserting means
320 ...With vent means
321 ...Closure flexing means (straightening or buckling)
322 ...With closure guide withdrawal means
323 ....Receptacle push-off means
324 ...Closure compressing means
325 ....Roller
326 ....Sliding segment die
327 ....Pivoted segment die
328 ...Plunger structure
329 ..Closure securing means
330 ...Internal
331 ...Thread and crimp
331.5 ...Screw or lug type
332 ...Reverse closure flexing or turn-back means
333 ...Repeated on different portions of same closure
334 ...Rotary tool or die
335 ....With centrifugal means
336 .....Cam release
337 .....Centrifugal release
338 ....Planetating
339 .....Axially rocking
340 .....Radial, rocking or axial pivot

	CLOSING PACKAGES AND FILLED RECEPTACLES
	.Separate closure applying
	..Closure securing means
341	...Die
342	....With closure support
343	.....Magnetic
344	....Sectional
345	.....With resilient faces
346	......Split or two part die
347	......Helical spring
348	.....Fluid pressure actuated
349	.....Rotary cam
350	.....Toggle
351	.....Axial cam
352	......Convex
353	......Radially reciprocating jaws
354	.....Bell crank
355	.....Biased for deformation
356	.....Split or spring collet type
357	....Resilient annulus
358	.....Helical spring
359	....Filler or forcer
360	.....Reverse flex of resilient element
361	.....Fluid pressure or resilient element
362	.....Confined elastomer block
363	....With handle
364	....Second class lever mounted
365	....Toggle mounted
366	...By crimping of receptacle
367	..Orienting or aligning means
368	..With height compensating means and/or package ejection means
369	...With package ejection means only
370	.Twisters
371	.Outturned seam closure
372	..With excess cover material trimming
373	..Heating or cooling means
374	.Multiple flaps
375	..Heating or cooling flap seam
376	.Single flap type closure
377	..Hinged cover
378	.Pleated and/or folded cover overhang
379	..Heating or cooling means
380	..Serially formed
381 R	RECEPTACLE OPENING OR FLAP MANIPULATION
381 A	..Separate closure removing
382	.Hinged closure opening
383	.With adhesive applicator member
384	.Bag opening
385	..Air blast
386	..Suction
387	FLAP OR SEAM HOLDERS
388	.Heated or cooled
389	COVER FEEDING OR FEEDING AND CUTTING
390	AIDS TO MANUAL PACKING
391	.Power-driven conveyor
392	.Receptacle inversion

1 PROCESSES OF GAS SEPARATION
2 .Involving electric or magnetic field
3 ..Magnetic separating
4 ..And maintaining measuring or controlling gas characteristic
5 ..And adding solid, gas or vapor
6 ..And nonelectrical gas separaing
7 ...By or with liquid addition to gas
8 ....Liquid addition precedes electrical precipitating
9 ...By heating or cooling
10 ..And adding liquid to gas
11 ..And heating or cooling
12 ..And removing material from collector electrode
13 ...By scraping, vibrating or liquid flushing
14 ..Continuously moving electrode
15 .Sonic type
16 .By gas diffusion into solid barrier
17 .Involving difference in molecular velocity, density, or momentum of gases
18 .Involving condition or characteristic measuring or regulating (e.g., conductivity)
19 ..Of acidity or nonaqueous constituent
20 ..Of temperature or humidity
21 ..Of pressure or pressure differential
22 .By using liquid-solid slurry
23 .Involving compressing and cooling gas
24 ..With heat absorber mixed in gas
25 .Involving plural pressure varying or indirect heat transferring steps on solid sorbent or gas
26 ..With sweep gas for carrying desorbed gas
27 ..heat transfer steps
28 ...On solid sorbent
29 .Water from gas by sorptive or oleaginous agent
30 ..Plural separating treatments of gas by same or different agent
31 ...And regenerating of any agent
32 ..And regenerating of agent
33 ...Solid agent
34 ....Moving bed
35 ..Solid sorbent
36 .Degasifying liquid or suspension in liquid; or with liquid denuding
37 ..By dissolving gas or absorbate in selective solvent
38 ..Plural successive degassing treatments on same liquid or portion thereof
39 ...Boiler feed water deaerating
40 ...Pressure varying or indirect heat transferring
41 ....With liquid flow modifying (e.g., spraying, deflecting, etc.)
42 .....And heat transferring
43 ....At least one pressure varying treatment
44 .....And gas contacting
45 ..And emulsion breaking or multiple liquid separating
46 ..And subsequent handling of evolved gas or residue liquid
47 ...Evolved gas removed by sweep gas
48 ...Additional gas sorbing by or recycling of liquid
49 ...For indirect heat exchanging
50 ....Gas is condensed
51 ...Gas recycling or further separating
52 ..By gas contacting, agitating, or liquid flow modifying
53 ...Gas contacting
54 ....Gas is steam
55 ..By reducing pressure
56 ..Subsequent to sorbing by liquid
57 .Involving reducing pressure
58 ..Pressure over solids reduced
59 .With denuding of solids by charge gas or steam
60 ..Moving solid bed
61 ...Steam
62 ..Charge gas
63 .Separating acetylene
64 ..Solution in liquid
65 ...With separate dissolving step for other constituent
66 .Separating inert gases (Ne, Xe, Rn, A, etc.)
67 .Chromatography type
68 .Separating inorganic vapors, gases, mists (including carbon oxides and cyanides)
69 ..Nonsorptive type or separation
70 ..Ammonia or ammonium compounds
71 ..Halogens or their compounds
72 ..Metals or their compounds
73 ..Sulphur or phosphorus or their compounds
74 .On solid sorbent
75 ..Molecular sieve
76 ..With preliminary separation
77 ..Moving sorbent bed
78 ...Physically moved enclosing housing
79 ...Gravitating bed
80 .Involving heat exchanging or fluid contacting
81 ..Cold wall-hot wall thermal diffusion
82 ..Condensing to solid
83 ..Fluid contacting
84 ...Fluid is liquid
85 ....And separation of liquid from mixture with liquid or solid
86 ....And agitation or beating of liquid body
87 ....And foaming or defoaming
88 ....To separate gasoline from gas
89 ....With recycle of liquid or gas
90 ....On surface extending mass, or with filtering or deflecting of gas-liquid mixture
91 .....Moving deflecting or filtering surfaces
92 .....Rotating gas-liquid mixture
93 ....In plural serial stages
94 .....Liquid sprays
95 ....Gas discharged against or beneath surface of liquid body
96 .And cleaning of filter or deflector
97 .Filtering
98 ..Through particulate solids
99 ...Moving bed
100 MAGNETIC SEPARATING MEANS
101 ELECTRICAL PRECIPITATORS, (E.G., ELECTROSTATIC TYPE)
102 .Including radio-active or ultraviolet light ionizer
103 .Electrostatically induced charge (e.g., by gas flow)
104 .With signal or alarm means
105 .Voltage or current sensing and control means
106 .With automatic control of gas, treating or conditioning means
107 .With charged solid or liquid particle addition to gas
108 .Electrode cleaner, apparatus part flusher or discharger or wet collector (e.g., wet film electrode)
109 ..Electrode or part thereof moved on or against another

ELECTRICAL PRECIPITATORS, (E.G., ELECTROSTATIC TYPE)
.Electrode cleaner, apparatus part flusher or discharger or wet collector (e.g., wet film electrode)
110 ..Shut-down or voltage adjustment inter-related with cleaning (e.g., gas flow or current)
111 ...Cyclical or sequential operation
112 ..Vibrating, jarring or rapping means
113 ..Movably mounted electrode
114 ...Nonliquid contact cleaning
115 ...Immersion into liquid bath
116 ....Endless belt carried or belt type electrode
117 ..Fluid contacting means (e.g., suction means)
118 ...Liquid applying means for electrode (e.g., projection type)
119 ....Weir or overflow wet film type
120 ...Apparatus purging or flushing means (e.g., gas or liquid)
121 ..Electrode scraping, brushing or wiping means
122 .With vapor or liquid contact (separation, cooling or conditioning)
123 .With alternating current field
124 .With serially arranged diverse separator
125 ..Gas flow bypass or regulation to second stage
126 ..Precedent non-electrical separator
127 .With spiraling inflow, centrifugal or whirl generating surface means
128 .With gas flow distribution or control means
129 ..For contact with ionizing electrode or uniform flow in treating zone
130 ..Collecting electrode modified or arranged to affect gas flow
131 ...Total gas flow through interstitial, perforated, foraminous, or porous collector
132 ....Zig-zag running length type
133 ..Flow regulation means for parallel sections
134 .With gas treating or conditioning means
135 ..Heating or cooling means
136 .Diverse or serially distinct electrical fields
137 ..One set of electrodes common to plural fields
138 ..Serially arranged ionizing and collecting or agglomerating fields
139 .With voltage supply means or circuitry (e.g., power pack, closure interlock, etc.)
140 .Electrode retaining or supporting means
141 ..Plural electrode unit assembly type (e.g., unitized)
142 ...Disposable (e.g., collapsible or foldable cardboard)
143 ...Parallel disc or plate collector cell
145 ..Parallel disc or plate collector
146 ..With insulation feature
147 ..Tensioning means
148 ..Suspensory means
149 ..Movably supported during use or for orientation
150 .With specific discharge electrode (e.g., coil, mat or corona suppression)
151 ..Filamentary or filar form
152 ..Sharpened point, serrated or tip discharge
153 ..Vibration damping
154 .Specific collector means (e.g., sheet type or running length web)
155 ..Dielectric material containing or covering
156 ..Multiple similar elements or sections (e.g., built up)
157 ..With arc over or back discharge suppression means (e.g., drip points)
158 BARRIER FOR SELECTIVE DIFFUSION OF GASES
159 DEGASIFYING MEANS FOR LIQUID; OR WITH MEANS STRIPPING SORBED FLUID FROM SOLID
160 .With automatic or timer control
161 ..For solids desorbing system
162 ...Timer control
163 ...Pressure, temperature or humidity responsive
164 ..Level responsive
165 ...Float control of separator inlet or outlet valve
166 ....Plural floats
167 ....Control of plural valves
168 .....One is gas outlet valve
169 ....Control of outlet valve
170 .....Gas outlet valve
171 .With separator for multiple liquids
172 ..Reservoir with three or more outlets, each for diverse fluid
173 ...Spherical
174 ...Horizontal
175 ...With heat exchanger
176 ...With internal inlet liquid diverting surface
177 ....Helical or spiral path
178 .Defoaming
179 .Plural solid sorbent beds
180 ..With means to separate desorbing fluid
181 ...Movable beds
182 .Tank or tank part movably mounted on support (e.g., de-aeration of aircraft lubricating oil)
183 .With mist eliminator or de-entrainer in gas path
184 ..Gas spinner or whirler
185 ..Baffle, filter or screen
186 ...Plural, serially arranged
187 ....Concentric tubular members
188 .....Alternate central and peripheral gas paths
189 .Means to reduce pressure
190 ..And flow modifier
191 ...Helical path
192 ...Baffle
193 ....Plural baffles in series
194 ...Spray nozzle
195 ..And heating or cooling means
196 .By gas contactor
197 ..Chromatography type
198 ..Steam
199 .Flow slinger, spreader, rotation controller or disperser
200 ..With preliminary heat exchanger
201 ..Upstream of, surrounding or forming discharge end of inlet
202 ...Plural, serially arranged
203 ...Rotator
204 ....Tangential inlet
205 .....With tangential outlet
206 ..Plural, discrete members in series
207 ..Rotation causing trough
208 .By heating means
209 COLD WALL-HOT WALL THERMAL DIFFUSION TYPE SEPARATOR
210 WITH AUTOMATIC CONTROL MEANS FOR GAS OR NON-GASEOUS CONSTITUENT DISCHARGE
211 .Ejection of residue container or separating unit (e.g., filter or bag)
212 .Gas cutoff or diversion

WITH AUTOMATIC CONTROL MEANS FOR GAS OR NON-GASEOUS CONSTITUENT DISCHARGE
.Gas cutoff or diversion
213 ..Gas pressure responsive separate reactor surface means
214 ..Bag presence responsive means
215 ..By response to accumulated separated liquids or solids
216 ...By float
217 ..Temperature or humidity responsive
218 .Regulation of separated constituent discharge
219 ..By liquid accumulation responsive float
220 WITH LIQUID CONTACTING MEANS (E.G., GAS OR MEDIA CLEANING)
221 .Drip openings from deliquescent material holder
222 .With indirect heat exchange means for gas
223 .Diverse means for contacting or applying liquid
224 .For portion of total gas flow
225 .Liquid control responsive to flowing gas force
226 .With means varying gas flow to control saturation or dispersion
227 .With treating liquid automatic control or level maintaining means
228 .With treating liquid conditioning or separating means
229 .With means to control liquid return flow to supply or sump
230 .Movably mounted liquid distributor (e.g., moving nozzle)
231 ..Distributor is gas contacting means (e.g., wet pad)
232 ...With distributor immersing means
233 .Liquid applied to particulate or porous media for gas contact
234 ..Media extends into bath
235 .With fixed gas whirler or rotator means for gas separation
236 ..Liquid applied in central of concentric flow paths
237 ..Liquid contact preceding or within whirler or rotator means
238 ...Spray or film contact
239 ..Reversal of gas flow by surface of body of liquid
240 .With means forming flowing liquid film or sheet for gas contact
241 ..On impervious backing (e.g., corrugated plates)
242 .With liquid cleaning or flushing means for media
243 ..Immersion cleaning
244 .Gas flow contacts liquid bath
245 ..With back pressure relief or auxiliary liquid trap or baffle
246 ..With anti-splash means or means for retaining liquid during upset or tilt
247 ..With movable means in bath for commingling gas and liquid
248 ..Separator positioned above liquid bath
249 ...With means for forming liquid into a spray or heap
250 ...Superposed filter
251 ....With flow guide preventing entire leading filter surface contact
252 ....Surrounding gas flow path
253 .....With separable liquid sump
254 .....With anti-creep means
255 ....Submerged inlet for sub-surface contact of liquid
256 ..Submerged inlet for sub-surface contact
257.1 .Gas separating means downstream of contacting means
257.2 ..Parallel vanes
257.3 ..Overlapping vanes
257.4 ..Centrifugal
257.5 ..Impact plate
257.6 ..Perforated plate
257.7 ..Heat exchange
258 ..With preliminary separating means
259 ..Filter type separating means
260 .With deflecting means preliminary to liquid contact
261 WITH INLET MEANS FOR DIVERSE FLUID OR SOLID FOR GAS TREATMENT
262 .Solid or vaporized solid
263 .Steam
264 .With outlet for condensed vapors
265 .Downstream of separator
266 .With flow control for each inflow gas
267 WITH HEATING OR COOLING MEANS FOR GAS, OR WITH INSULATION
268 .Two confined fluids in indirect contact
269 ..Heat exchanger is part of separator or is contiguous therewith
270 WITH SAMPLING, WEIGHING, TESTING OR METERING MEANS
271 WITH TIMING OR CHANGEABLE PROGRAMMING MEANS
272 .Of cleaning mechanism for media
273 ..Sequential cleaning of plural units
274 WITH SIGNALS AND INDICATORS (E.G., INSPECTION MEANS)
275 .Moisture sensitive
276 WITH SOUND DAMPING OR ACOUSTICAL MEANS (I.E., NOISE ATTENUATION)
277 SONIC TYPE
278 SHELF OR EDGE TYPE
279 WITH STERILIZING MEANS
280 WITH DRIP OR ESCAPING MATERIAL COLLECTOR (NOT OF SEPARATED CONSTITUENT AS SUCH)
281 .From deliquescent material holder
282 WITH NON-LIQUID CLEANING MEANS FOR SEPARATING MEDIA
283 .With automatic control of cleaning means
284 .With sequential cleaning of plural units
285 ..Ferris wheel type filter unit arrangement
286 ..With gas flow arresting means
287 ...Interconnected with cleaning means
288 .Interdependent or interoperated gas flow cutoff or apparatus shut down and media cleaning
289 .Interdigitated comb and separating media
290 .For moving indefinite or continuous length separating media
291 .Plural diverse cleaning means
292 .Sonic type
293 .With separating media pneumatically vibrated or flexed
294 .Relatively movable pneumatic nozzle (e.g., scanning nozzle)
295 .Solid agent cleaning member movingly contacts apparatus
296 ..Agent has defined traversing motion relative to separating media
297 ...With motion effecting means interrelated with separating operation
298 ....Gas flow actuates member
299 ...With resulting flexing or distortion of resilient or collapsible separating media
300 ..Vibrating, jarring or rapping means
301 .Cohesive filter media cleaning
302 ..Pneumatic reverse flushing

WITH NON-LIQUID CLEANING MEANS FOR SEPARATING MEDIA
.Cohesive filter media cleaning
..Pneumatic reverse flushing
303 ...Draft diverted from one side of filter to other
304 ..Filter manipulation, shaking or flexing for precluding or removing encrustation
305 ...Attendant actuated manipulating means
306 AIRCRAFT ANTI-INGESTION MEANS (E.G., AIRCRAFT DEBRIS GUARD)
307 FILTER OR APERTURED DEFLECTOR UNIT DISCONTINUOUS ACROSS GAS FLOW WITHIN FLOW CONDUIT
308 .Multiple members serially spaced in flow conduit
309 WITH SEPARATING MEDIA BYPASS OR SYSTEM GAS PRESSURE RELIEF (E.G., RUPTURABLE OR DEFORMABLE)
310 .Pressure relief means to or from atmosphere
311 ..Relief means is downstream of media (e.g., ambient air bypasses filter)
312 .Valved bypass means
313 ..Gas force responsive
314 ..Shunt means for total flow
315 PLURAL SERIAL BASICALLY DIVERSE SEPARATING MEDIA
316 .At least one a sorber for gaseous or vaporous fluids
317 .At least one mounted for continuous motion
318 .Plural stages in unitary casing
319 ..Including expansion chamber
320 ..Deflector and fibrous, filamentary, particulate solids, or cohesive sheet filter type
321 ...Multiple of one type in series of parallel in flow path
322 ....Serially spaced with at least one of other type intermediately positioned
323 ....Filters
324 .....In parallel
325 ....Serially spaced deflectors
326 .....With connected trough or channel
327 ...Filter is most upstream
328 ...Movable or movable mounted for adjustment or nonuse
329 ...Filamentary brush type or fibrous mass
330 ....Tubular or annular for radial gas flow
331 ...Conical deflector with curved or parabolic radially extending wide downstream end
332 ...Cohesive sheet-like filter
333 ....Multiple contiguous layers or coils with radial gas flow
334 ....Bag type
335 .....Including imperforate upstream bag end deflector
336 ....Conical
337 ....Cyclone or centrifugal whirl type deflector
338 WITH RECYCLE MEANS
339 .For concentrate entrained in effluent gas outlet means
340 ..Return conduit is external of apparatus
341.1 MULTIPLE BAG TYPE FILTERS IN CHAMBER
341.2 .Gas flow from inside to outside of filter
341.3 ..Modular compartments
341.4 ..Horizontally mounted filters
341.5 .Modular compartments
341.6 .Partitioned bag filter chamber
341.7 .Horizontally mounted filters
342 MULTIPLE SEPARATORS, EACH WITH DISCRETE AND LONGITUDINALLY CONFINED GAS INLET OR OUTLET FLOW PATH
343 .Combined serial and parallel arrangement
344 .With flow equalizing, controlling or distributing means
345 .Centrifugal
346 ..Parallel
347 ...Gas inlet and outlet at linearly opposite ends of separating zone
348 ...Plural gas inflow openings, slots or whirl vanes in each separator
349 ...Tangential inlet to each separator
350 .Filters or sorbers
351 WITH MEANS FOR ADVANCING CLEAN PORTIONS OF CONTINUOUS OR INDEFINITE LENGTH SEPARATING MEDIA INTO GAS STREAM
352 .Advancing means initiated by flow, pressure, or pressure differential of gas
353 .Multiple distinct units
354 .Indefinite or running length
355 WITH LIQUID TRAP SEAL OR VALVE
356 WITH MEANS FACILITATING TRANSPORTABILITY OR HANDLING OF APPARATUS
357 .Handle feature for apparatus or part thereof
358 WITH GROUND SUPPORT MEANS (NONFLOW CONDUCTING)
359 WITH PORTION OF COVER REMOVABLE
360 WITH ELECTRICAL GROUNDING MEANS
361 FLEXIBLE OR COLLAPSIBLE BAG TYPE
362 .With bag ejecting means
363 .Toroidal or annular bag
364 .Impervious bag with pervious portion
365 .Bag carried strain relief means between bag supports
366 .With separable nonfiltering residue container
367 .Valved, self closing or apparatus contained bag closing means
368 .Spaced interior inflow path or with means modifying gas flow in bag
369 .Closure means other than coupler to flow line for filter or cover bag
370 ..Use position residue removal means
371 ...Inner filter bag removal
372 .With additional nonbag type filter
373 .Housing closure secures bag
374 .With flow line coupling means
375 ..Flexible conduit joints line to bag
376 ..Coupling part inseparable from bag
377 ...Resilient or expansible
378 .With securing or supporting means
379 ..Bag internally supported
380 .Nested bags or folded wall with spaced or unsecured faces
381 .Seaming, reinforcing or bag structure
382 ..Multi-ply, strata or laminated
383 WITH REMOTE FAN OR PUMP AND UNCONFINED FLOW TO SEPARATOR
384 STORAGE OR FOOD RECEPTACLE COVER ASSOCIATED SORBER
385.1 COMBINED OR CONVERTIBLE
385.2 .In environmental air enclosure
385.3 .In motor vehicle
385.4 .In vented container
385.5 .Involving mining or metallurgical apparatus
385.6 .Involving communication receiving or transmitting apparatus
385.7 .Involving shielding apparatus
385.8 .Involving ash tray
386 CHROMATOGRAPHY TYPE APPARATUS
387 APPARATUS INCLUDING SOLID SORBENT FOR VAPOROUS OR GASEOUS CONSTITUENT

APPARATUS INCLUDING SOLID SORBENT FOR VAPOROUS OR GASEOUS CONSTITUENT
388 .Soluble type (e.g., calcium chloride)
389 .Molecular sieve type
390 .Moving bed
391 RESTRICTED ANNULAR MIXTURE INLET TO COLLECTOR ZONE AROUND GAS OUTLET CONDUIT ATTACHED BAFFLE
392 WITH GUIDE MEANS EFFECTING REMOVAL OF CONSTITUENT LAYER OUT OF GAS STREAM
393 .Movably mounted for adjustment
394 .At escape means for heavier constituent
395 ..And separable residue receptacle
396 ..Annular outlet around gas outflow path
397 ..Spaced, overlapped walls
398 ..Plural, angularly spaced
399 .Spiral guide
400 MOUNTED OR SUPPORTED FOR CONTINUOUS MOTION
401 .Plural distinct separating media or stages
402 ..Overlapping moving separators
403 ..Plural moving separators serially arranged
404 .Moved by system fluid in confined flow path
405 ..Fluid flow normal to axis of moving member
406 .Differentially deflected system fluid constituents
407 ..Concentrate flow groove, guide or channel on moving member
408 ..Separated gas conducted axially through rotating member
409 ...Hollow shaft
410 WITH SEPARATED GAS OUTFLOW CONTROL (E.G., APERTURED CONDUIT)
411 .Movable gas outlet conduit
412 ..Longitudinal
413 .Baffle or flow guide
414 ..Within or downstream of gas outlet conduit
415 ...Movable baffle of flow guide
416 ...Flow straightener
417 .Valve
418 WITH INFLOW GAS CONTROL OR DISTRIBUTION
419 .Multiple inlets
420 .Check valve
421 WITH MEANS FOR LIQUID SEPARATION
422 SEPARATING MEDIA ADJUSTABLE TO VARIOUS POSITIONS OF USE OR TO NONUSE
423 MEANS WITHIN GAS STREAM FOR CONDUCTING CONCENTRATE TO COLLECTOR
424 WITH CONCENTRATE BACKFLOW OR RE-ENTRAINMENT PREVENTING MEANS
425 .Closure between separating and collecting zones
426 .Baffle intermediate concentrate collector zone and gas outlet conduit
427 ..Adjustably mounted
428 RESIDUE ACCESS, HANDLING OR REMOVING MEANS
429 .Separable collection container
430 .With means effecting or assisting discharge or residue (e.g., endless belt)
431 ..Gaseous or liquid
432 .With movable or manipulable means controlling escape of residue
433 ..Manually actuated
434 DEFLECTOR
435 .Wear liners or surface characteristics (e.g., anti-erosion)
436 .Removably supported deflector surface
437 .With gas pump or fan
438 ..Within separator
439 ..Downstream of separator
440 .Parallel and continuous nonplanar members (e.g., crimped, corrugated, curved)
441 .Concentric, nested conduits with closed and open ends for flow reversal
442 .Plural deflectors overlapped and spaced serially in gas flow
443 ..Plural deflectors in row across gas flow
444 ...Deflectors in alternate rows aligned (i.e., staggered)
445 ..Deflectors apertured or closely spaced from flow path wall
446 ...Space or aperture opposed by solid deflector surface
447 .Fixed gas whirler or rotator means
448 ..With outlet gas conduit wall common to surrounding gas inlet or concentrate outlet or collector
449 ...Gas inlet and outlet have common wall
450 ...With outlet from collector
451 ....Tangential outlet pipe
452 ..With plural concentrate outlets in arcuate, axially extending whirl chamber wall
453 ..With concentrate outlet means in one of parallel plates mounting spaced whirler vanes
454 ..With tangential concentrate outlet pipe
455 ..Plural nonradial gas passages in peripheral wall (e.g., tuyere)
456 ..Helical vane or baffle within flow conduit
457 ...Between gas flow path wall and central core
458 ..Inflow pipe projects within casing
459.1 ..Tangential gas inlet opening in casing
459.2 ...Inclined inflow
459.3 ...Scroll
459.4 ...Inflow nozzle or vane
459.5 ...Varying inlet area
460 ...With tangential gas outlet
461 ..Continuous confined flow path
462 .Impingement baffle
463 ..Conical with apex facing upstream
464 ..Corrugated, ribbed, crimped or with projections
465 ..Planar
466 WITH SEPARATED NONGASEOUS MATERIAL CONDUCTING OR TREATING MEANS
467 WITH GAS FLOW EFFECTING MEANS
468 .Injector or jet pump type
469 .Manual, weight or traction operated gas pump
470 .Plurality of impellers arranged in parallel or performing diverse functions
471 .Impeller within or proximate to space encompasses by separating media
472 .Upright or multi-chambered casing
473 .Impeller upstream of separating media
474 WITH PARTICULATE SOLIDS MOVEMENT DURING USE OR AGITATING MEANS THEREFOR
475 WITH MEANS ADJUSTABLE TO CONTROL COMPACTNESS OF SEPARATING MEDIA
476 WITH MEANS INTRODUCING GAS INTO MIDST OF SEPARATING MEDIA
477 STRANDS OR BRISTLES WITH UNSUPPORTED OF FREE EXTREMITIES (E.G., BRUSH TYPE)
478 WITH SEPARATE FLOW LINE ACCESS MEANS OR FILTER MEDIA PASSAGE MEANS OFFSET TO FLOW PATH
479 .For discrete filter particles
480 .Access means is clamping or coupling means for unit filter media
481 .Unit transversely slidable through flow path

482 TWO OR MORE SEPARATORS (E.G., SPACED FILTERS IN FLOW LINE OR CASING)
483 .With framework for edge to edge relation
484 .Spaced for parallel flow of gas
485 .Three or more serially spaced
486 .Plies or layers of different characteristics or orientation
487 ..Differing mesh sizes
488 ..Variation in shape or size
489 ..Orientation of elements
490 WITH MEANS SECURING OR RETAINING SEPARATING MEDIA
491 .Fastening means pierces or penetrates media
492 .Internal frame or support means
493 .Hinged or pivoted retainer or clamp on backing frame or in flow line
494 .Grid or tray type for bottom support only
495 .Unit or cohesive sheet-like media in flow line or frame
496 ..With adjustable connector or size adjusting means
497 ..Edge supporting or securing means for nonplanar sheet form filter (e.g., zig-zag)
498 ...Spiral or cylindrical
499 ...With additional transversely arranged members
500 ..Flexible sheet type maintained in nonplanar configuration
501 ..With additional support means not positively engaged or joined to media (e.g., across face of filter)
502 ..Gasket or sealing means
503 ..Media within joinable or separable flow line sections
504 ..Aligned stop, media and removable retainer
505 ..Flow line end coupling (e.g., pipe end)
506 ...Flange or track on flow line for slidably retaining media
507 ...Resilient attaching means
508 ..Suspended or supported by bracket or from top of frame
509 ..Distorted media in flow line or resilient retaining means
510 ..Annular unit held between dished or plate-like end members for top and bottom support
511 ..Edge supported or secured only
512 .Discrete fibrous or particulate solids
513 ..Resilient securing means
514 ..Fused or bonded to a supporting or backing member
515 ..Foraminous container
516 ..Held between openwork
517 ...Between telescoped or nonplanar retainers
518 ...Between perforated plates
519 ...Between reticulated end closures
520 SPIRAL FILTER MEDIA
521 ZIG-ZAG, CORRUGATED OR CONICAL
522 SPECIFIC MEDIA MATERIAL
523 .Ceramic or sintered
524 .With coating, impregnant or bonding agent
525 .Metal mesh or expanded material
526 ..Wadded or compressed
527 .Fibrous or strand form
528 ..Organic (e.g., vegetable)
529 MISCELLANEOUS (E.G., SHAPES)

1	MISCELLANEOUS
2	CONVERTIBLE
3	.Cutter and detachable conveyer ..Rake
4	...Vertical axis
5	.Cutter and detachable catcher
6	GANG
7	.Rotating cutting reel
8	MARINE
9	.With conveyer
10.1	MOTORIZED HARVESTER
10.2	.With condition-responsive operation
10.3	..Release or slip of drive in response to overload
10.4	..Retraction of cutter-unit in response to obstruction
10.5	.With randomly-operative control of motor (e.g., for starting or stopping motor)
10.6	.With plural sources of power
10.7	..For disparate functions
10.8	.With selective control of drive means
10.9	..By valve for controlling fluid-pressure motor
11.1	..By means for varying speed-ratio of drive
11.2	..By means for reversing drive
11.3	..By brake and disengageable drive (e.g., clutch)
11.4	..By controlling plural drive trains
11.5	...Including clutch-assemblages
11.6	..By means for regulating tautness of belt drive
11.7	..By clutch-assemblage
11.8	...Connecting motor to cutter or transit wheels
11.9	.Having fluid-pressure or stored-energy motor
12.1	.With means for reconditioning cutter or picker
12.2	.With means for using heat or exhaust from engine
12.3	.With means for lubricating drive train
12.4	.With drive train for imparting compound movement to finger-like elements
12.5	..Rotating and orbiting elements
12.6	.With separable or vibration-damping drive train
12.7	.Including cutter yieldably mounted on its drive means
12.8	.Including driven air-blower unit
12.9	..For drawing vegetation to harvester
13.1	...To suction head
13.2	....With beater at suction head
13.3	..For discharging crop from harvester
13.4	...By blower on cutter-driving shaft
13.5	.Including plural operating units and drive
13.6	..Separately-acting cutter units
13.7	...For disparate cutting operations
13.8	....In series arrangement
13.9	.....With conveyer between units
14.1	..Separately-acting opposed-roller-couple units
14.2	...With opposed-gatherer-couple unit
14.3	..Gatherer unit and vegetation-cutter unit
14.4	...Horizontal-axis-reel gatherer
14.5	..Cutter unit and conveyer unit
14.6	...With thresher or crop-separator unit
14.7	.Including motorized vehicle causing transit of harvester
14.8	..With drive train to harvester powered by ground-engaging wheels
14.9	..With hitch permitting movement of harvester relative to vehicle
15.1	...With drive from motor for re-positioning harvester
15.2	....Cutter assemblage re-positioned
15.3	...With flexible drive train to repositionable harvester
15.4	...By means for steering harvester
15.5	...By means for adjusting harvester laterally
15.6	...By hitch for separating harvester from vehicle
15.7	...By resilient or universal-action hitch
15.8	....For "floating" harvester
15.9	...Hitch for pivoting harvester about horizontal axis
16.1	....Tined crop-pickup rake on transverse pivot
16.2	....Longitudinally-extending axis
16.3	....With latchable lever means for pivoting harvester
16.4	.Having driven means for handling or treating crop
16.5	..For separating one material from another
16.6	..Delivering to receptacle or hopper
16.7	.Having motor on ground-supported carrier
16.8	..With dispenser of fluent material
16.9	..Motor used for plural devices or functions
17.1	..And cutter adjustable relative to ground
17.2	...By adjusting ground wheel or skid relative to carrier
17.3	..And element guiding vegetation to cutter
17.4	..And guard
17.5	..And rotatable blade on motor shaft
17.6	..And drive train to reciprocating or oscillating cutter
27.5	TOBACCO
28	COTTON
29	.Flail or whip
30	.Pneumatic
31	..Individually directed
32	..Nozzles
33	.Strippers
34	..Comb
35	...Moving
36	.Pickers
37	..Individually directed
38	...Endless belt
39	....Manually operated
40	..Rotary or oscillating
41	...Spindle
42	....Belt carried
43	.....Cam-track guide
44	....Rotary carrier
45	.....Flexible spindle
46	.....Reciprocating
47	.....Cam-track guide
48	...Drum
49	..Endless belt
50	..Spindles
51	CORNSTALK TYPE
52	.Stalk breakers
53	.Cutters
54	..Broom corn
55	...Reel gatherer
56	..Toppers with catchers
57	...Reel gatherer
58	....Horizontal axis
59	...Endless-chain gatherer
60	..With choppers
61	...With catchers
62	..With strippers
63	..With toppers
64	..With pickers or huskers
65	...Reel gatherer
66	...Endless-chain gatherer

CORNSTALK TYPE
.Cutters
67 ..Self-binders
68 ...Upright binder
69 ....Endless-chain gatherer
70 .....Binder position adjustable
71 ..With dischargers
72 ...Crane type
73 ....With gatherers
74 .....Reel
75 .....Endless chain
76 ...Endless apron
77 ....Reel gatherer
78 ....Endless-chain gatherer
79 ...Horizontally moving and tilting
80 ....With gatherers
81 .....Reel
82 .....Endless chain
83 ...Tilting
84 ....With gatherers
85 .....Spiral
86 .....Reel
87 ......Horizontal axis
88 .....Endless chain
89 .....Fixed
90 ...Retracting support
91 ....Reel gatherer
92 ...Reel gatherer
93 ...Endless-chain gatherer
94 ..With gatherers
95 ...Spiral
96 ...Reel
97 ....Horizontal axis
98 ...Endless chains
99 ...Fixed
100 ....Fixed cutter
101 ..Fixed cutter
102 ..Cutting members
103 .Pickers or huskers
104 ..Roller
105 ...Plurality of rows
106 ....With endless-chain gatherers only
107 ...Auxiliary ear detacher
108 ....With endless-chain gatherers only
109 ...Movable gatherer
110 ....Spiral
111 ....Endless chain only
112 .....Adjustable roller frame
113 ..Fixed snapper
114 ...Comb
115 ....With knife
116 ..Moving comb
117 ..Moving knife
118 ...On endless chain
119 .Gatherers or guides
120 .Sheaf loaders
121 .Sheaf carriers
500 STALK CHOPPERS
501 .Gathering by air current
502 .With driven pickup
503 .Rotating on vertical axis
504 .Rotating on horizontal transverse axis
505 ..With transverse ledger plate
121.4 CUTTERS WITH PLANT OR CROP CONTACTING GAUGE (E.G., BEET TOPPERS)
121.41 .Laterally self-aligning gauging and cutting means
121.42 .With preliminary foliage arranging
121.43 .Plural cuts at successive heights and/or slitting
121.44 .With cut top disposal
121.45 ..Movable disposing members
121.46 .Gauge and cutter relatively adjustable responsive to height and/or size of plant
122 CUTTING, CONVEYING AND THRESHING
123 .Reciprocating cutter
124 ..Central swath, co-axial wheels
125 ..Longitudinally hinged cutter frame
126 SEED GATHERERS OR STRIPPERS
127 .Fixed comb
128 ..Rotary beaters
129 ...Central swath, co-axial wheels
130 .Moving comb
131 CUTTING, CONVEYING AND BINDING
132 .Wire-twister type
133 .Straw-band type
134 .Folding platform
135 .High outside binder
136 ..Folding binder frame
137 ..Binder position adjustable
138 ...Knotting
139 ..Knotting
140 .Upright binder
141 .Endwise delivery
142 ..Knotting
143 .Low down
144 ..Curved path
145 ...Knotting
146 ..Inside delivery
147 ...Knotting
148 ..Outside delivery
149 ...Through bull wheel
150 ...Knotting
151 ..Knotting
152 .Knotting
153 CUTTING AND CONVEYING
154 .Endless cutter
155 .Oscillating cutter
156 .Rotary cutting reel
157 .Rotary cutting disk
158 .Reciprocating-cutter type
159 ..Folding platform
160 ..With binder's platform
161 ...Self-raking mechanism
162 ...Belt-carried endless path
163 ..Hand-raking mechanism
164 ..Self-raking mechanism
165 ...Gaveling tongs
166 ...Dumping catcher
167 ...Rotating
168 ....Reciprocating head
169 ....Vertical axis
170 .....Switch
171 ......Automatic control
172 ....Auxiliary manual control
173 ...Reciprocating
174 ....Belt actuated
175 .....Reciprocating belt
176 ...Vertical circuit
177 ....Belt carried
178 ...Horizontal circuit
179 ....Belt carried
180 ..Rake heads and arms
181 ..Endless carrier
182 ...Deflected course
183 ...Intermittent
184 ...With discharging catcher
185 ...Elevated delivery
186 ...Central cutter, co-axial wheels
187 ....Tilting platform
188 .....Pivoted tongue
189 .Swathing attachments
190 .Windshields
191 .Binder's platforms
192 CUTTING AND WINDROWING
193 CUTTING AND RAKING
194 CUTTING AND CATCHING
195 .Side cutter
196 ..Rear
197 ..Front
198 .Rotating cutting reel
199 ..Catchers
200 ...Discharging
201 .Manually propelled
202 .Catchers

	CUTTING AND CATCHING
	.Catchers
203	..Discharging
204	...Revolving
205	...Upwardly swinging rear gate
206	...Rearwardly dropping member
207	SHELLED-GRAIN CATCHERS
208	PLATFORM ADJUSTMENTS
209	.Side hill
210	.Main frame
211	..Traction operated
212	..Vertically and longitudinally tilting
213	...Simultaneous vertical adjustment
214	..Vertical
215	...Segment rack and pinion
216	....Simultaneous
217	...Simultaneous
218	TONGUE ADJUSTMENTS AND SUPPORTS
219	STANDING-GRAIN GATHERERS
220	.Rotating reel, horizontal axis
221	..Adjustable position
222	...With driving means
223	....Sliding angular gear
224	....Belt with adjustable tension
225	....Concentric
226	..Supplementary bat movement
227	..Adjustable bats
228	TRANSPORTING ATTACHMENTS
229	CUTTING
230	.Railroad
231	..Rotating cutting reel
232	..Reciprocating cutter
233	.Hedge or plant-row trimmers
234	..Plurality of cutters
235	...All rotary disk
236	...All reciprocating
237	..Single cutter for top or side
238	.Successive cuts at different heights
239	.Hand-operated cutter
240	..Oscillating
241	...Single pair of shears
242	..Reciprocating
243	...Hand crank
244	.Endless cutter
245	..Side cut
246	.Oscillating cutter
247	..Vertical cut
248	..Side cut
249	.Rotating cutting-reel type
249.5	..Interchangeable cutting assembly
250	..Sharpening
251	..Auxiliary cutter
252	..Cutter in front of wheel tread
253	..Co-axial wheels central cut
254	...Internal gear single pinion
255	.Rotating-cutting-disk type
256	..Vertical cut
257	.Reciprocating central cutter
258	..Co-axial wheels
259	...Double sickle
260	...Pitman drive
261	....With lever
262	...Cam drive
263	....With lever
264	.Reciprocating side cutter
265	..Through-wheel drive
266	..Reversible
267	..Horizontally folding
268	..Rear cut
269	...Co-axial wheels
270	....Cam or lever drive
271	..Front cut
272	...Co-axial wheels
273	....Power-operated lift

APPARATUS AND PROCESSES

.Skip type stranding machines
58.32 ..With cradle driving or holding means
58.34 ..With cradle supported by tube section joint and/or tube supporting or driving disc
58.36 ..With strand guiding means
58.38 ...Rotating strand guide
58.49 .Unitary multiple twist devices
58.52 ..With stranding or plying (e.g., doubling)
58.54 ...Plural multiple twist devices
58.55 ....Tandemly arranged
58.57 ...With false twist
58.59 ..With false twist
58.61 ..Plural co-axial loops
58.63 ..Spaced, driven flyer members
58.65 ..Take-up type
58.67 ...With packaging by revolving strand guide and/or reciprocating package holder
58.68 ...With slip connection between flier drive and package
58.7 ..With strand feeding means
58.72 ..With package control means
58.74 ...For vibration damping
58.76 ...Magnetic
58.78 ...Gear
58.79 ....Friction type
58.81 ...Gravity
58.83 ..With strand guiding, guarding or controlling means
58.84 ...Including transitory strand-storage means
58.86 ...Including tensioning means
400 .Open end spinning
401 ..Friction
402 ..Electrostatic
403 ..Fluid
404 ..Rotating chamber type
405 ...With strand controlled stopping
406 ...With housing for drive or support
407 ....Having operator access
408 ...With fiber separating and/or feeding
409 ....Plural or variable feed
410 ....Coaxial roll
411 ....With fluid flow controlling or directing
412 ....With specific feed device for opening roll
413 ....With specific rotor feed channel
414 ...Rotor with fiber accreting portion
415 ....With fluid flow controlling or directing
416 ....Specific wall configuration
417 ....With specific yarn guiding device
59 .Delivery twist type
60 ..With twisting couple
61 ...With stopping or starting
62 ..With winding
63 ...With cabling
64 ..With cabling
65 ..Planetary type
66 .Receiving twist type
66.5 ..Rotating cradle package holder
67 ..Flier type
68 ...With capstan
70 ...Bobbin lag or drag type
71 ...With traversing strand guide or receiver
72 ..Bobbin lag or drag type
73 ..Spindle tip type
74 ..Cap type
75 ..Ring and traveler type
76 ..Centrifugal pots and guides
312 ...With strand or package manipulation
77 ...With driving connections
313 .With rewinding
314 .Stranding
315 .With drafting
316 ..Domestic
317 ..Variable draft
318 ...False twist type
319 ..Intermittent
320 ...Mule type
321 ....Spindle drive control
322 .....Quadrant
323 ......Faller controlled
324 ....Faller control
325 .....Copping rail
326 ....Feed control
327 ..With carding
328 ..False twist type
329 ...Interstage
330 ...With self-contained drawing means
331 ...Friction type
332 .False twist device
333 ..Having fluid jet twisting means
334 ..Friction type
335 ...Revolving roll-pair type
336 ...Having a frictional belt
337 ...Having a frictional disc
338 ....On plural axes
339 .....With discs overlapping
340 ......With nonperipheral surfaces of discs substantially abutting
341 ...Having a frictional tube, or a twisting head therefor, through which yarn passes
342 ....Plural twist tubes
343 ....Including mounting, support, or housing
344 ..Having a tube, or a twisting head therefor, through which yarn passes, with a yarn gripper
345 ...Plural tubes
346 ...Including mounting, support, or housing
347 ....Magnetic support
348 ..Including mounting, support, or housing
349 ...Magnetic support
350 .With fluid jet
351 .With other type crimping or texturing
78 .Stopping or starting
79 ..Traverse controlled
80 ..Strand controlled
81 ...Electric
82 ...Twisting couple and feed
83 ...Feeding means stopping
84 ....Roll separating
85 ....Strand shifting
86 ....Severing
87 .....With clamping
88 ..Spindle stopping
89 ...Laterally movable spindle
90 .Feeding
91 ..Irregular
92 .Driving
93 ..Speed adjusting
94 ...Constant variation
95 ....With traverse controlled variation
96 ....Fly frame
97 ...Drawing rollers
98 ...Traverse controlled variation
99 ..Traversing
100 ..Electric
101 ..Turbine
102 ..Gear
103 ...Friction
104 ..Band
105 ...Tensioning
352 .Strand guiding or guarding
353 ..Catching or holding
354 ..Separator or balloon limitor

	APPARATUS AND PROCESSES
	.Strand guiding or guarding
	..Separator or balloon limitor
355	...Having antifriction coating or material
356	...Readily removable or adjustable

900 PLASTIC
901 CROSS PIN

200.1 REACTION MOTOR (E.G., MOTIVE FLUID GENERATOR AND REACTION NOZZLE, ETC.)
201 .Rotating or cyclic movement during axial thrust
202 .Ion motor
203.1 .Electric, nuclear, or radiated energy fluid heating means
204 .Method of operation
205 ..By chemical reaction
206 ...Utilizing indirect heat exchange
207 ...Utilizing plural reaction zones within a system
208 ...Injecting air into the reaction zone
209 ....Including using additive material
210 .....Injected separately
211 ...Injecting separate streams of fuel and oxidizer (e.g., hypergole, etc.) into the reaction zone
212 ....Using igniter aid
213 .....Injected separately
214 ....Oxidizer in the form of a mixture
215 ....Fuel in the form of a mixture
216 .....One component free metal
217 ...Injecting mixture of fuel and oxidizer into the reaction zone
218 ...Decomposing a compound in the reaction zone
219 ...Using solid material in reaction zone
220 ....Including injecting modifying fluid
221 .Motive fluid principally liquid
222 ..Plural discharge outlets
223 .With destruction sensing and preventing means
224 .Interrelated reaction motors
225 ..Sequentially operated
226.1 ..Air and diverse fluid discharge from separate discharge outlets (e.g., fan jet, etc.)
226.2 ...Having thrust reverser
226.3 ...Having means to effect a variable bypass ratio
227 .Motive fluid principally steam
228 .With thrust direction modifying means
229 ..With plural selectively usable motive fluid ejecting means
230 ..Jet stream deflecting means
231 ...By secondary fluid injection
232 ..Motive fluid outlet movable relative to motor part
233 .Condition responsive thrust varying means
234 ..Solid propellant depletion control
235 ..Motive fluid outlet area and fuel flow control
236 ...Plural spool motor-compressors
237 ...Outlet area sensed to control fuel or oxidizer flow
238 ...Motive fluid temperature sensed to control fuel flow or outlet area
239 ...Compressor or turbine speed sensed to control fuel flow or outlet area
240 ..Oxidizer and fuel flow control
241 ..Plural burners in series
242 ..Outlet area control
243 ..Fuel flow control
244 .Motive fluid from diverse generators alternatively ejected through outlet
245 ..Propellant supply used in one operation reduced before starting another
246 .Turborocket
247 .Intermittent combustion
248 ..Air bypass passage
249 ..Aerodynamic valve
250 .Plural propellants to burn sequentially
251 .Solid and fluid propellant
252 .Gel propellant
253 .Solid propellant
254 ..Including means to terminate or regulate motive fluid production
255 ..Including propellant support means
256 ..Including ignition means
257 .Liquid oxidizer
258 ..Including injector means
259 ..Including pressurizing means
260 ..Including heating means
261 .Including afterburner
262 .Air passage bypasses combustion chamber
263 .Plural motive fluid generating means or plural outlets
264 .Including motive fluid treating means
265 .Means to flow film on surface
266 .Including heat exchange means
267 ..For a liquid
268 .Including counter rotating rotors
269 .Including mechanical air compressor or air flow inducing means
270.1 .Air supplied by ram effect
271 .Motive fluid outlet means
595 INTERNAL COMBUSTION TYPE FREE PISTON DEVICE SUPPLIES MOTIVE FLUID TO MOTOR
596 INTERNAL COMBUSTION TYPE FREE PISTON DEVICE WITH PRESSURE FLUID STARTING MEANS
597 FLUID MOTOR MEANS DRIVEN BY WASTE HEAT OR BY EXHAUST ENERGY FROM INTERNAL COMBUSTION ENGINE
598 .With supercharging means for engine
599 ..With means to change temperature of supercharged flow
600 ..With condition responsive valve means to control supercharged flow and exhaust products
601 ...With coordinated engine fuel control
602 ..Having condition responsive valve controlling engine exhaust flow
603 ...With coordinated fuel control means for engine
604 ..With heat exchanger to transfer energy from engine exhaust to motive fluid for motor
605.1 ..Supercharging means driven by engine exhaust actuated motor
605.2 ...With exhaust gas recirculation
605.3 ...With motor bearing lubrication or cooling
606 ...With means to provide additional motive fluid for motor
607 ...With additional drive means for supercharging means
608 ....With condition responsive drive means control
609 ...Fluid motor and engine each drive at least one means to supercharge the engine
610 ....Supercharging means convertible from series to parallel
611 ...Having condition responsive means to control supercharged flow to engine
612 ...Plural superchargers
613 .With means to store combustion products prior to entry into fluid motor means
614 .Having fluid motor motive fluid treating, controlling or conditioning means
615 ..Having condition responsive control of motive fluid
616 ..Having means to transfer heat energy between engine exhaust and motive fluid for fluid motor
617 ...And having means to add fluid to motive fluid
618 ...Motive fluid is vaporized liquid
619 ..Having means to add a diverse fluid to combustion products

FLUID MOTOR MEANS DRIVEN BY WASTE HEAT OR BY EXHAUST ENERGY FROM INTERNAL COMBUSTION ENGINE
620 .Fluid motor means is expansible chamber type with movable parts of motor and engine being interconnected
621 ..Movable wall portions are rigidly interconnected
622 ..Expansible chamber of fluid motor means receives exhaust alternately from two or more expansible chambers of engine means
623 ..Fluid motor is rotary type
624 .Fluid motor means is a turbine with output means mechanically interconnected with internal combustion engine output
272 INTERNAL COMBUSTION ENGINE WITH TREATMENT OR HANDLING OF EXHAUST GAS
273 .Methods
274 ..Anti-pollution
275 .By electrolysis, electrical discharge, electrical field, or vibration generator
276 .Having means analyzing composition of exhaust gas
277 .Having sensor or indicator of malfunction, unsafeness, or disarray of treater (e.g., fusible link, etc.)
278 .Material from exhaust structure fed to engine intake
279 ..Separated reactive constituent of exhaust fed to engine
280 .Having auxiliary device mechanically driven by exhaust gas
281 .Having exhaust gas collection and storage, or use as a pressure fluid source
282 .By means producing a chemical reaction of a component of the exhaust gas
283 ..With means handling crankcase, carburetor, or gas tank vapor
284 ..Automatic or timed reactor purge or heat-up in engine starting operation
285 ..Engine fuel, air, or ignition controlled by sensor of reactor condition
286 ..Condition responsive control of heater, cooler, igniter, or fuel supply of reactor
287 ..Condition responsive control of reactor feed, pressure, or by-pass
288 ...Exhaust gas diverted from reactor or treating agent mixer
289 ...Air feed to reactor modulated or diverted by control
290 ....Responsive to engine speed or intake manifold pressure
291 ...Of or by pressure in reactor or of engine exhaust
292 ....Valve at reactor outlet controlled
293 ....Check valve feeds air to exhaust system
294 ..Reactor control correlated with cyclic or external engine control
295 ..Having means for regenerating, replacing, or feeding liquid or solid reagent or catalyst
296 ...Flow reversing structure
297 ..Reactor plus a washer, sorber or mechanical separator
298 ..With means cooling reactor or reactor feed
299 ..Using a catalyst
300 ...Having a means for heating the catalyst
301 ...Reducing type catalyst
302 ...Catalyst in engine manifold or at exhaust port
303 ..Having heater, igniter, or fuel supply for reactor
304 ..Oxidizer feed passage at engine exhaust valve, manifold or port
305 ...Distributed to plural individual ports or valves
306 ...To port zone and downstream of port
307 ..Pressurizing means feeds reactive air to reactor
308 ...Exhaust actuated air aspirator
309 .Having retainer or flow director for exhaust gas condensate
310 .Treated by washing, or having liquid contact structure
311 .By sorber or mechanical separator
312 .Pulsed, timed, tuned or resonating exhaust
313 ..Correlated exhausts from plural cylinders
314 ..Two-cycle engine
315 .Pump draws exhaust gas from engine
316 ..Fluid jet or stream aspirates exhaust gas
317 .Exhaust and external fluid mingling structure
318 ..External fluid is steam
319 ..Exhaust aspirates external fluid
320 .Exhaust gas or exhaust system element heated, cooled, or used as a heat source
321 ..Cooled manifold
322 .Having vibration attenuating, or expansion and contraction relieving structure
323 .Common receiver having inlets from plural cylinder (i.e., exhaust manifold)
324 .Divider, collector, valve means, or boundary layer device controlling exhaust gas flow
625 INTERNAL COMBUSTION ENGINE WITH STRUCTURE ROTATING OR STARTING IT BY PRESSURE FLUID
626 .Having means for compressing, generating or storing pressure fluid
627 ..Having condition responsive control of means
628 ..Storage vessel charged by internal combustion engine acting as a pump
629 ..Pressure fluid motor convertible to pressure fluid pump
630 .Having manual selector of engine valve settings or of fluid flow branches
631 ..Including means selecting direction of engine rotation
632 ONE SHOT EXPLOSION ACTUATED EXPANSIBLE CHAMBER TYPE MOTOR
633 .Having means for feeding fluid fuel
634 .Having plural charge holding means
635 .Having mechanical means securing working member in fired position
636 .Having latch, rupture or safety means resisting movement of working member or firing means from unfired position
637 .Having orifice or conduit restricting flow of combustion products from combustion zone to motor chamber
638 .Having shock absorbing, damping or slow down means for working member
39.01 COMBUSTION PRODUCTS USED AS MOTIVE FLUID
39.02 .Processes
39.03 ..Regulation of power output
39.04 ..Multiple expansion
39.05 ..Addition of steam and/or water
39.06 ..Ignition and/or fuel injection
39.07 .With nonmotor output

	COMBUSTION PRODUCTS USED AS MOTIVE FLUID
39.08	.With lubricators
39.091	.With safety device
39.092	..Debris anti-ingestion preventer
39.093	..Ice preventer or de-icer
39.094	..Fuel flusher or drainer
39.1	..Excess pressure relief
39.11	..Flame screen
39.12	.With combustible gas generator
39.13	.Automatic starting and stopping of combustion products generator
39.141	.With starting device
39.142	..Separate starting device or motive fluid source
39.15	.Multiple fluid-operated motors
39.161	..Re - expansion
39.162	...Counter - rotatable
39.163	...Selectively connectable
39.17	...With treatment between stages
39.181	..Different fluids
39.182	...Steam and combustion products
39.183	...Air and combustion products
39.19	.Different fluids
39.23	.With variable oxidizer control
39.2	.With regulation of power output
39.21	..Plural generators, selectively operable
39.22	..Varying cycle frequency relative to prime mover speed
39.24	..Automatic
39.25	...Motive fluid to prime mover
39.26	...Oxidizer, fuel and water or steam
39.27	...Oxidizer and fuel
39.281	...Fuel
39.282	....Torque sensor
39.29	...Oxidizer
39.3	...Water or steam
39.31	.With mounting or supporting structure
39.32	.With expansible connections
39.33	.Convertible and combined
39.34	.Rotating combustion products generator and turbine
39.35	..Continuous combustion type
39.36	.Coaxial combustion products generator and turbine
39.37	.Plural combustion products generators in ring coaxial with turbine
39.38	..Intermittent combustion type
39.39	...Common rotary distributing valve
39.4	...Common cam member
39.41	.With exhaust pump for combustion products generator
39.42	.With reversible turbine
39.43	.With dual function turbine
39.44	.With closed pocket turbine
39.45	.With gear, pressure exchanger, or screw-type compressor
39.461	.Using special fuel or oxidizer
39.462	..Monofuel type
39.463	..Plural distinct fuels
39.464	..Solid, slurry, emulsive, or suspensive type fuel
39.465	..Gaseous fuel at standard temperature and pressure
39.47	..Solid fuel containing oxidizer
39.48	.With fluid pressure feeding of oxidizer, fuel or water
39.49	.With air injection by fuel or steam jet
39.5	.With exhaust treatment
39.511	..Regenerator
39.512	...Rotary heat exchanger
39.52	..Exhaust gas recycling
39.53	.With addition of steam and/or water
39.54	..Added in prime mover
39.55	..Added in combustion products generator
39.56	..Mixed in space above water
39.57	...Combustion products pass through water
39.58	..Added in mixing nozzle or in turbine nozzle
39.59	..Added in separate mixing chamber
39.6	.External-combustion engine type
39.62	..With plurality of combustion products generator per cylinder
39.63	..Continuous combustion
39.64	.Alternate cycle
722	.Combustion products generator
723	..Having catalyst in combustion zone
724	..Plural with intercycling by pressure fluctuations
725	..Having noise reduction means
726	..With means to pressurize oxidizer for combustion or other purposes
727	...With oxidizer accumulator
728	...Having oxidizer cooling means
729	...Reciprocating positive displacement type
730	..With liquid heat exchanger
731	..With combuston products accumulator
732	..Having initial fuel-rich combustion zone
733	...Separate fuel injectors for plural zones
734	..Having fuel supply system
735	...Fuel injected into turbine
736	...Fuel preheated upstream of injector
737	...Fuel and air premixed prior to combustion
738	....Premix tube within combustion zone
739	...With fuel supply manifold for separate injectors
740	...With fuel injector
741	....Fuel control valve integral with injector
742	....Unitary injector having plural fuel flow paths
743	....Surface film injector
744	....Rotary fuel injector
745	.....Slinger type
746	....Plural distinct injectors
747	.....Injectors in distinct radially spaced parallel flow combustion products generators arranged to combine discharges
748	....With attendant coaxial air swirler
749	...Having bluff flame stabilization means
750	..Having means to recycle combustion products internally of combustion zone
751	..Having diffuser for air inlet
752	..Combustor liner
753	...Ceramic
754	...Porous
755	...Having means to direct flow along inner surface of liner
756	....Air directed to flow along inner surface of liner dome
757	....In an axial direction
758	...Air introduced within liner counter to flow of combustion products
759	...Air scoop extends into air flowing outside liner
760	...Air outside liner flows counter to combustion products flow within liner
39.75	..With turbine
39.76	..Intermittent combustion type
39.77	...Resonating
39.78	...Rotating, oscillating, or reciprocating
39.79	...With fluid actuated valve
39.8	...With pressure actuated valve
39.81	...With fuel metering valve
39.821	..With ignition device
39.822	...Catalytic type

	COMBUSTION PRODUCTS USED AS MOTIVE FLUID
	.Combustion products generator
	..With ignition device
39.823	...Pyrotechnic squib or charge type
39.824	...Hypergolic type
39.825	...Single shot liquid type
39.826	...Pilot or torch type
39.827	...Spark type
39.828	...Incandescent type
39.83	.Cooling of auxiliary components
639	MOTOR ACTUATED BY ACCUMULATING AND DUMPING LIQUID OR FLUENT MATERIAL
640	.Rocking member having opposite accumulating means
641.1	UTILIZING NATURAL HEAT
641.2	.Geothermal
641.3	..With direct fluid contact
641.4	..With deep well turbopump
641.5	..With fluid flashing
641.6	.With natural temperature differential
641.7	..Ocean thermal energy conversion (OTEC)
641.8	.Solar
641.9	..With distillation
641.11	..With elevated structure
641.12	...Air is working fluid
641.13	..With single state working substance
641.14	...Gaseous
641.15	..With solar concentration
516	MOTOR OPERATED BY EXPANSION AND/OR CONTRACTION OF A UNIT OF MASS OF MOTIVATING MEDIUM
517	.Unit of mass is a gas which is heated or cooled in one of a plurality of constantly communicating expansible chambers and freely transferable therebetween
518	..Having means to change operational phase relationship of working member and displacer
519	..Expansible chamber having rotatable or oscillatory displacer
520	..Having free floating displacer or transfer piston
521	..Having means to increase or diminish quantity of motivating mass
522	..Having means to control rate of flow of mass between chambers
523	..Having electrical heating means for mass
524	..Having means to control temperature of heating or cooling chamber
525	..Motor having plural working members
526	..Motor having regenerator for mass
527	.Mass is a solid
528	..Mass heated because of resistance to flow of electric current
529	..Mass is bimetallic
530	.Mass is a liquid
531	..Liquid is vaporized
508	FLUID WITHIN EXPANSIBLE CHAMBER HEATED OR COOLED
509	.Special motive fluid
510	.Air rarefied by combustion
511	.Fluid mingling (e.g., condensation)
512	.Having means within the working chamber to effect the pressure of fluid therein
513	..Electric heating means
514	.Concurrent fluid supply and vaporization
515	.Having control means for heating or cooling means
642	MOTIVE STEAM GENERATED FROM HOT WATER CHARGE BY REDUCING PRESSURE ABOVE CHARGE
643	MOTIVE FLUID ENERGIZED BY EXTERNALLY APPLIED HEAT
644.1	.Heating motive fluid by nuclear energy
645	.Process of power production or system operation
646	..Including start up, shut down, cleaning, protective or maintenance procedure
647	..Including operating at or above critical pressure
648	..Including production of withdrawable product or steam for external use
649	..Including mixing or separating materials of different chemical compositions in a motive fluid flow path
650	..Producing power by heating and cooling a single phase fluid
651	..Including vaporizing a motive fluid other than water
652	..Of accommodating, fluctuating or peak loads
653	..Including superheating, desuperheating, or reheating
654	..Including mingling motor exhaust steam with boiler feed water
655	.Noncommunicating heat transferring motive fluid system (e.g., cascade, etc.)
656	.Having ancillary structure for starting
657	.Having apparatus cleaning, sealing, lubricating, purging, standby, or protecting feature
658	..Damage to heat receiving element prevented by automatic means maintaining minimum flow
659	.Including heat, steam, or compressed gas storage means
660	.Having condition responsive control
661	..Of or by heat rejecting means or its bypass
662	..Involving feed from source means to separate motor stages or utilizing means
663	..Of branched feed to, condition of, or heating means for motive fluid between motor stages
664	..Of or by heat source material or element
665	...And of or by boiler liquid level or feed
666	..Of bypass of superheater or desuperheater
667	..Of means controlling boiler or its feed
668	.Power system physically related to vehicle structure
669	.Motor mounted in or on boiler
670	.Power system involving change of state
671	..Motive fluid comprises a material other than steam or water
672	...Motor exhaust used in combustion zone
673	...One fluid absorbs or reacts with another
674	...Air and steam supplied to motor
675	..Gravity motor actuated by weight of condensed vapor
676	..Including plural distinct boilers, heat supplies or external sources of vapor
677	..Serially connected motor with intermotor supply or withdrawal of motive fluid
678	...Withdrawn fluid heats boiler feed indirectly
679	..Having motive fluid reheater between serially connected motors
680	...Motive fluid bypassing upstream motor heats reheater
681	..Motor exhaust mixes with combustion products of boiler heater

MOTIVE FLUID ENERGIZED BY EXTERNALLY APPLIED HEAT
682 .Single state motive fluid energized by indirect heat transfer
683 ..Motor exhaust fed into combustion device
684 ..Including interstage reheat means
325 PRESSURE FLUID SOURCE AND MOTOR
532 .Shock or resonant wave type of energy transmission
533 .Pulsator
534 ..Having signal, indicator or recorder of apparatus condition
535 ...Responsive to leakage of pulse fluid
536 ..Plural correlated pulsators transmitting unlimited rotary input to unlimited rotary output
537 ..Programmed, self-cycled or self-pulsed
538 ...Including electrical control or actuation
539 ...Cam drive of plural masters
540 ...Including timer or time delay means the cycle
541 ...Having means terminating cycle at parking or holding position
542 ...Pneumatic device having pulse air bleed or supply means
543 ...Self-operated pulse fluid purge or quantity adjustment structure
544 ...Continuously acting self-pulsing master with manually settable slave release or output control valve
545 ..Having electricity or magnetically operated structure
546 ..Pulsator synchronizes movement of plural outputs
547.1 ..With control of or by a separate power fluid, etc.
547.2 ...By pressure responsive valve dividing flow between motor and an auxiliary load
547.3 ...By manually operated valve dividing flow between motor and an auxiliary load
548 ...Flow in recirculating circuit controlled
549 ...Master structure provides non-overlapping periods of pressurization of diverse pressure ranges in distinct pulsator circuits
550 ...Master driven by manual power control lever on power failure and having means adjusting lever throw or master resistance responsive to failure of power fluid supply
551 ...Manual master and controller of motor driven master actuated by separate linkages to a common operating lever
552 ...Mechanical feedback to manual control controls power fluid to establish position of working member of master
553 ....With distinct piston or diaphragm exposed to pulsator pressure imparting feel to manual control
554 ....Having load deformable means between master working member and motor thrust means adjusting bias of manual control
555 ...Manual movement of master produces a pressure that controls the power fluid
556 ....Power fluid input controller operated by piston or diaphragm acted on one side by pressure of a manual master and on the other by pressure of a power driven master
557 ....Pressurized fluid from manual master charges slave and controls power fluid to separate master
558 .....Fluid from the manual master fed to slave through a passage in the working member of the power master
559 ......Passage extends across the expansible chamber of the motor of the power master
560 ...Power fluid also fed into a separate expansible chamber directly driving output means
561 ..Pressure balancing free piston or diaphragm between parallel pulsators
562 ..Master piston of one pulsator circuit drives master piston of a parallel circuit through a resilient, fluid or lost motion connection
563 ..Expansible chamber of output pressurized directly by motive fluid and indirectly by a master driven by the motive fluid
564 ...Delivery pressure of master lower than pressure driving master
565 ..Master and diverse non-pulsator drive of output member or members
566 ...Manual master and alternate nonmanual pressure fluid source feed output motor
567 ..Including plural separately operable master actuators or master units driving a common slave
568 ..Having distinct means for holding a pulsator element in set position
569 ...Distinct externally operable valve sealing pulse fluid in slave
570 ...Mechanical latch, brake or detent
571 ..Double-acting slave unit or opposed slaves having a single output
572 ...Having pulse fluid pressure or quantity compensating or adjusting means
573 ....Self-acting phase balancing means acting at midpoint or end of stroke
574 ..Automatic control of plural stage pressure generation or utilization
575 ...Automatic trapping of fluid back of delivery piston forms temporary pulsator driving piston during one stage
576 ...Of separate movement of plural delivery pistons
577 ....Central externally driven piston drives surrounding piston means through a load responsive connector
578 ...Unitarily movable displacer delivers fluid from two delivery chambers, one chamber being ineffective under high pressure delivery
579 ..Slave of first master drives master of another slave
580 ...Parallel masters driven by first pulsator
581 ..Plural structurally related master pistons, cylinders or pulsator circuits
582 ..Having safety standby structure becoming operative upon apparatus malfunction

PRESSURE FLUID SOURCE AND MOTOR
.Pulsator
583 ..Pulse fluid vessel embracing output piston and fluid displacing element
584 ..Having separately and manually operated structure for charging, discharging bleeding, or adjusting pulsator volume
585 ..Holder for reserve liquid feeds master
586 ...Having means to establish holding pressure in pulse liquid
587 ....Pressure maintained through inlet or piston cylinder of master
588 ...Master piston traps liquid on advance across a feed port in cylinder wall
589 ...Master piston or its actuator mechanically operates valve between holder and master cylinder
590 ..Condition responsive device limits return flow from biased slave
591 ..Having valve, director, or restrictor in pulse fluid flow path
592 ..Having, surge chamber, fluid supply means, or means compensating for fluid expansion, contraction or leakage
593 ..Having fluid motor driving piston of master unit
594 ..Having cam, or lever system driving master
326 .Utilizing a mixture, suspension, semisolid or electro-conductive liquid as motive fluid
327 .Methods of operation
328 .Having a signal, indicator or inspection means
329 .Condition responsive control means responsive to, or compensating for, motive fluid compressibility, temperature variation or viscosity variation
330 .Coaxial impeller and turbine unit
331 ..Reversible turbine or turbine system
332 ...Having pitch control or motive fluid flow guide or reaction blade means
333 ...Having means to brake or free flow guide means
334 ...Having means to remove or insert flow guide means from or into motive fluid flow path
335 ...Having plural individually actuatable units
336 ..Having filtering, de-aerating, cleaning or bleeding structure
337 ..Having heating or cooling means
338 ..Having shock, vibration or surge control structure
339 ..Having lubricating means
340 ..Plural turbines drive relatively movable output members
341 ..Having brake or clutch controlling movement of a flow guide located in the impeller-turbine flow path
342 ...With means adjusting blade orientation or blade exposure in flow path
343 ...Speed or fluid condition responsive brake or manually adjustable brake
344 ....Braked casing
345 ...One-way clutch between the movable guide, an impeller, turbine or a second movable guide
346 ...Plural movable guides, one having a one-way clutch to frame
347 ..Having condition responsive or manually settable control means to regulate unit output
348 ...Distributes motive fluid between plural units, stages or guides
349 ...Adjusts impeller or turbine axially
350 ....Variable face clearance
351 ...Controls scoop operation for removing liquid from rotating casing
352 ...Of means within an impulse, reaction or energy transfer flow path being adjustable to modify flow of motive fluid
353 ....Motive fluid guide vane transferable axially into or out of motive fluid flow path
354 ....Pitch or orientation of flow directing guide or blade controlled
355 .....Speed responsive
356 .....Motive fluid pressure responsive
357 ...Of means adjusting the mass of level of motive fluid at the impeller energy transfer zone
358 ....Including continuously driven auxiliary pump
359 ....Exhaust valve
360 .....Motive fluid pressure responsive
361 ..Having separate guide or reaction means in circuit including impeller and turbine
362 ...Rotatable guide or reaction means coaxial with the impeller
363 ..Plural impeller-turbine units
364 ..Impeller or turbine integral with unit housing
365 ...Fluid deflecting means
366 ...Toroidal impeller and turbine
367 ....Having core or ring member at interface
368 .Control by independently operated punch card, tape, digital computer, counter, template, or programmer cyclic control
369 .Cyclically operable reciprocating or oscillating motor or output stroke device
370 ..Pneumatic motor
371 ..Having means to store and release energy usable to energize motor work output means
372 ...Pneumatic counter-balance of gravity load on motor (e.g., deep well pump rod, etc.)
373 ..Progressive change of stroke length in successive strokes
374 ..Correlated independently movable output members
375 ..Correlated power input pumps and/or pressurized fluid sources
376 ..Motor control means having timer or time delay means
377 ...Provides dwell or press period at end of stroke
378 ..Having purging, surge accommodating, or leaking handling or replenishing structure
379 ..Having condition responsive cycle abort means or means for manual control of motor output
380 ..With means to shut down system after a complete to and fro cycle of the motor means
381 ..Having condition responsive control of variable displacement pump
382 ...Cam or gear carried by stroke device varies displacement pump
383 ..Automatic or cyclic means provided plural distinct motor speeds in cycle

	AUTOMATIC
194	.Blow back breech block
195	..Pistol grip magazine
196	...Breech slide type
197	..Box magazine
198	.Buffers and brakes
199	.Receiver closures and/or breech block return means
4.05	EXPLOSION OPENED BREECH
4.1	.Rotary breech block
4.2	.Transverse sliding breech block
4.5	.Blow back breech block
6	FUSE SETTERS
6.5	.Combined with projecting, launching or releasing devices
	PNEUMATIC
7	.Explosive charge
8	ACCELARATING
9	MACHINE GUNS
11	.Axially moving breech block
12	.Revolving barrels
13.05	.Revolving cylinders
13.1	..Nonparallel bores
1.41	MULTIPLE BARREL GUNS
14.05	BARRELS
14.1	.With heat exchanger
14.2	.Flash shield
14.3	.Recoil absorbers and climb arrestors
14.4	.Silencers
14.5	.Recoil increasers
14.6	.Sabot strippers
15	.Wound
16	.Composite
17	BREECH CLOSURES
18	.Key locked
19	.Screw
20.2	..Interrupted
20.4	...Motor operated
21	...Fixed ammunition
22	.Transverse
23	..Sliding and swinging
24	..Sliding
25	..Swinging
26	.Gas checks
27.11	FIRING

1.11	WAGING WAR
1.14	EXPLOSIVE OPERATED APPARATUS
1.4	CHARGING MECHANISMS FOR GUNS
1.1	MISCELLANEOUS

CLASS 91 MOTORS, EXPANSIBLE CHAMBER TYPE

DECEMBER 1990

1	WITH SIGNAL, INDICATOR OR INSPECTION MEANS
2	CUTOFF OR CONTROL AFTER PREDETERMINED NUMBER OF CYCLES OR REVOLUTIONS
3	JET CONTROL TYPE
4 R	HYDRO-PNEUMATIC
4 A	..With float mechanism
5	WORKING MEMBER MOVED BY STORED MOTIVE FLUID CHARGE
6	FLUID SUPPLY THROUGH DIVERSE PATHS TO SINGLE EXPANSIBLE CHAMBER
6.5	.Three or more cylinders arranged in parallel, radial or conical relationship with rotary transmission axis
7	.Selective cyclic and noncyclic operation or parking
8	.Semi-compound type
9	..Changeable by shiftable distributor
10	..With condition responsive change-over valve
11	.Changeable from multiple expansion to simple operation
12	.Cyclically operable motor with port reversing
13	..By shifting distributor seat
14	..By shifting distributor
15	..Selector valve between distributor and motor
16	.Drifting or coasting on lower pressure
17	..With speed responsive cutoff of drifting fluid
18	..Pressure control of drifting fluid
19	.Diverse paths used to control extent of working member travel
20	.Position responsive
21	..Rotating working member or chamber
22	..Preliminary inlet to contracting chamber (e.g., cushioning)
23	...By bypassing from expanding chamber (399)
24	..Additional inlet path opened in response to position
25	...Working member or part carried thereby uncovers inlet port
26	....First path has check valve or selectively adjustable throttle
27	..Plural simultaneous paths, one cutoff in response to position
28	.Second path activated in response to pressure or flow in first path
29	..By pressure rise in first path
30	.Serially arranged reversing valves
31	.One path includes restriction
32	.Activation of one path disables second path
33	..Pressure operated
34	SINGLE ACTING, CHANGEABLE TO OR FROM DOUBLE ACTING
35	INDEPENDENTLY OPERATED TIMER, DELAY, PATTERN OR CYCLIC CONTROL
36	.Of independently movable working members
37	.Pattern or template control
38	.Fluid actuated valve with volume chamber delay means
39	.Independent distributor actuation for cyclic control
40	..Fluid actuated distributor motor
41	WITH CORRELATED CONTROL OF MOTIVE FLUID AND LOCKING MEANS
42	.By electrical control means
43	.Working member position control of motive fluid and locking means
44	.Sequential operation of locking means and motive fluid control
45	.Common or interconnected valve means control motive fluid and fluid for locking means
46	WITH INTERRELATED CONTROL OF MOTIVE FLUID AND LUBRICANT
47	CONSTANTLY APPLIED MOTIVE FLUID WITH CONTROLLED VENTING
48	.Plural separately controlled vents
49	.Fluid vented through working member
50	.Cyclically operable
51	.Motive fluid constantly applied to and vented from opposed chambers
52	CONSTANTLY OPEN THROTTLED EXHAUST WITH CONTROLLED MOTIVE FLUID SUPPLY
53	ENGINE ROTATING OR STARTING TYPE
54	CONVERTIBLE; OR CHANGEABLE BY DISASSEMBLY OR ASSEMBLY
55	COMBINED
59	TORQUE RESPONSIVE MOTIVE FLUID CONTROL
61	ROTARY AND RECIPROCATING WORKING MEMBERS
151	SERIALLY FORMED EXPANDING WORKING CHAMBERS (E.G., ENDLESS)
152	MULTIPLE EXPANSION
153	.Duplex
154	..Cut-off or reversing
155	.With fluid actuated distributor
156	.Concentric working chambers
157	.Relative valving adjustment between high and low pressure working chambers
158	..Adjustment for valving for plural chambers
159	.Expansion between relatively movable working members
160	..Double acting high and low pressure working members
161	..Fluid acts on each working member in single direction
162	...High and low pressure faces on each working member
163	.Fluid expanded through working member
164	.Dual, rigidly connected high and low pressure faces
165	APPLICATION OF MOTIVE FLUID AT DIFFERENT PRESSURES TO OPPOSED WORKING MEMBER FACES
166	.Double acting motor reversed by pressure variation of motive fluid
167 R	EXTENSION OF UNIT HAVING SEPARATELY CONTROLLED WORKING CHAMBERS EQUALS SUM OF INDIVIDUAL CHAMBER EXTENSIONS
167 A	..Vane
168	.Control of motive fluid for one working member in response to position of second
472	THREE OR MORE CYLINDERS ARRANGED IN PARALLEL RADIAL OR CONICAL RELATIONSHIP WITH ROTARY TRANSMISSION AXIS
473	.Condition responsive control of drive transmission
474	.Separate fluid supply or discharge paths
475	.Having yieldable drive transmission
476	.Separate motive fluid control for each working chamber
477	..Each piston acts as valve for different working chamber
478	..Means varies cyclic relation between reciprocating member and control valve therefor
479	..Control by moving cylinder or liner
480	..Mechanically actuated valves
481	...Radial cylinders
482	.Means varies cyclic relation between reciprocating member and control valve therefor

THREE OR MORE CYLINDERS ARRANGED IN PARALLEL RADIAL OR CONICAL RELATIONSHIP WITH ROTARY TRANSMISSION AXIS
.Means varies cyclic relation between reciprocating member and control valve therefor
483 ..By adjustment of transmission or reaction element
484 .Control valve seating surface contact maintained by fluid pressure bias
485 ..Disc valve
486 .Motive fluid bypass to or from assembly
487 ..Separate passage directs motive fluid to or from valve interface
488 ..Fluid conducting passage disposed within piston
489 ..Valved
490 .Motive fluid supply or discharge through piston
491 .Radially disposed cylinders
492 ..Plural banks
493 ..Rigidly connected pistons reciprocate within rigidly connected cylinders
494 ..Cylinders and pistons form or coact with respective common elements having limited relative rotary movement
495 ...Cylinders or pistons pinned to common element
496 ..Positive bidirectional drive or reciprocating members
497 ..Stroke control
498 ..Cooperating valve ports in cylinder and relatively movable central member
499 .Cylinders parallel to rotation axis
500 ..Plural angularly disposed cylinder banks
501 ..Cylinders contain plural oppositely movable pistons
502 ..Including plural axially spaced working chambers (e.g., double-acting working members)
503 ..Rotary spool valve
504 ..Stroke control
505 ...By varying reaction plate inclination relative to cylinder axes
506 ....Motor operated
507 ..Positive bidirectional drive of reciprocating members
169 SINGLE CHAMBER FORMED BY MUTUALLY RELATIVELY MOVABLE CYLINDER, SLEEVE AND PISTON
170 R RELATIVELY MOVABLE WORKING MEMBERS WITH ONE HAVING MOTIVE FLUID CONTROLLED BY, MOVABLY INTERCONNECTED WITH OR MOVED BY ANOTHER
170 MP ..Mine props
171 .Synchronizing in response to sensed difference in positions
172 .One working member oppositely biased by another
173 .One working member forms movable chamber for another
174 .With connection to relatively movable output member disposed between spaced unitary end faces
176 .Moving cylinders
177 .Oscillating working members
178 .Single valve unit controlling plural working chambers
179 ..Oscillating valve
180 ..Rotary valve
181 .Interconnected working members in communicating chamber portions
182 .Means connecting working members actuates common part controlling motive fluid for the members
183 .With means interconnecting working members to cause relative motion
184 ..Working member covers port to control motive fluid
185 ..Motive fluid control by pitman swing or intermittent contact with working member
186 ..Connection includes toothed gearing or rocking lever
187 ..Means varies cyclic relation between working member and control valve therefor
188 ..Motive fluid control actuator includes cam or crank rigid with means connecting working members
189 R .Position of one working member controls motive fluid for another
189 A ...Piston or rod directly valves passage
190 ..Changeable to plural self-controlled working members
191 ..Each cyclically controls another (e.g., duplex)
192 ...With three or more working members
193 ...Fluid operated valve controlled by relatively movable working member
194 ...Rotating output shaft type (e.g., locomotive or reversing means)
195 ...With self-control
196 MOVING CYLINDER
197 .Plural rigidly connected rotary cylinders
206 .With integral exterior working face
207 ..Both faces urged in single direction
208 ...Fluid to exterior face controlled by motive fluid pressure
209 ...Fluid to exterior face controlled by cylinder position
210 .Oscillating cylinder
211 ..Cooperating valve ports in cylinder and fixed member
212 ...Ported end bearing
213 ...Ported trunnion
214 ...Ported arcuate slide face on which cylinder moves
215 ..Cylinder carried valve operated by fixed actuator
216 R .Cylinder and piston have relative reciprocation on fixed axis
216 A ...Moving cylinder having follow-up
216 B ...Cyclical moving cylinder
217 ..Reciprocating piston and cylinder
218 CYCLICALLY OPERABLE
219 .With dwell
220 .With condition responsive stop means
221 ..Speed
222 .Distributor in piston (422)
223 ..Oscillating piston (e.g., vane)
224 ..Distributor establishes communication between opposite faces of piston
225 ..Piston traverses pilot port to control distributor motor motive fluid
226 ..Communication into piston through peripheral port
227 ...Port controlled by piston position
228 ..Piston carries separate inlet and exhaust valves
229 ..Distributor operated by abutment with cylinder head
230 .Codirectional separately supplied working members
231 ..One working member supply is distributor controlled
232 .Valveless distribution
233 ..Distribution by reciprocating working member moving about an axis

CYCLICALLY OPERABLE
.Valveless distribution
234 ..Working member formed to provide internal fluid flow passage
235 .Working chamber receives controlled motive fluid supply from opposed chamber having constant supply (321) (417)
236 .Multiple exhaust passages (e.g., compression control)
237 ..Exhaust valve has separate valve controlled second exhaust passage therein
238 ...Pressure controlled second passage
239 ..Distributor for inlet or first exhaust controls second exhaust passage
240 ..Fluid pressure actuated valve for second exhaust passage
241 ...Compression actuated discharge to motive fluid supply
242 ...Exhaust pressure controlled
243 ..Working member controlled exhaust port with valved second exhaust passage
244 ..Controlled by separate relatively movable valves
245 .Clearance control
246 .Correlated throttle valve and distributor
247 .Timing control by relative adjustment of plural movable fluid control elements
248 ..Electrical adjustment
249 ..With relative adjustment of plural adjustable fluid control elements
250 ...Adjustable inlet and exhaust events
251 ....With adjustable release and compression events
252 ..Cut off adjustable relative to admission
253 ...Inlet controlled by relatively cyclically moved elements
254 ....Biased cut off with adjustable trip
255 ....Adjustable fluid control for fluid actuated cut off
256 ....Cut off adjustable relative to reciprocating admission element
257 .....Oscillating admission element
258 .....Arcuate adjustment of cut off
259 .....Cut off adjustable codirectional with admission element movement
260 ...Biased inlet valve with adjustable tripping means
261 ....Inlet valve movable about an axis
262 ...Adjustable cam or cam follower actuated inlet valve
263 ...Adjustable fluid control for fluid actuated inlet valve
264 .Relatively movable serial distributors
265 .Relatively movable inlet and exhaust valves
266 ..Oscillating working member
267 ..Lost motion drive from inlet to exhaust valve
268 ..Exhaust valve closed or held closed by inlet fluid (442)
269 ..Biased valve with trip
270 ..Inlet and exhaust valve movable about an axis
271 ..Reciprocating inlet and exhaust valves
272 ...Codirectional with working member movement
273 ....Axially seating valves
274 .With independent throttle adjustment for one side of double-acting motor
275 .Electrically or magnetically actuated or adjusted distributor (459)
276 .Distributor forms traversed movable portion of working chamber wall (423)
277 .Adjustable working member reversal position (e.g., stroke control)
278 ..Selective diverse supply or exhaust paths for distributor motor
279 ..Adjustable lost motion connection
280 .Pulsator-actuated distributor (460)
281 .Working member controlled motive fluid for distributor motor
282 ..Fluid supply through diverse paths to distributor motor chamber
283 ...Path controlled by independently operable means
284 ..Independent means to adjust distributor motor supply or exhaust passage
285 ...Separately adjusts one chamber of double-acting distributor motor
286 ..Distributor or distributor motor mechanically moved cyclically to control actuating fluid for distributor motor
287 ...Movement of relatively movable pilot mechanically moves distributor
288 ...Distributor motor mechanically moved about axis
289 ..Adjustable means to retard or lock distributor motor
290 ..Working member traverses pilot port in working chamber side wall
291 ...Port controls separate motor for intermediate pilot valve
292 ....Distributor controls passage from port
293 ...With passage from port controlled by pilot valve
294 ....Pilot valve operated by separately controlled fluid motor
295 ...Plural ports control relatively movable distributor motors
296 ...Constantly open exhaust from distributor working chamber
297 ...With passage for pilot fluid in working member
298 ....Working member passage supplies distributor motive fluid
299 ...With distributor reversal by fluid compressed by working member
300 ...With distributor reversal by constantly supplied motive fluid
301 ...With control of distributor motor supply or exhaust port by distributor working member
302 ...Pilot port relieved into working chamber having working member controlled exhaust port
303 ..Working member adapted to directly mechanically reverse distributor
304 ..Pilot valve controlled distributor motor (461)
305 ...Plural pilot valves
306 ....Independent
307 ...Pilot valve relieves constantly supplied distributor motor fluid
308 ...Fluid-operated pilot valve
309 ...With distributor motor reversal by constantly applied fluid pressure
310 ...Pilot valve moves about an axis
311 ...Pilot valve moves laterally relative to working member reciprocatory path
312 ...Distributor motor working member is valve seat for pilot valve
313 ...Pilot valve actuator extends into working chamber
314 ...Working member reverses pilot through part movable relative to both
315 ..Distributor moves about an axis

CYCLICALLY OPERABLE
.Working member controlled motive fluid for distributor motor
316 ..Distributor moves laterally relative to working member reciprocatory path
317 ..Working member compresses fluid to reverse distributor
318 ..Motive fluid build-up at end of working stroke reverses distributor
319 ..Working member traverses pilot passage to control distributor motor
320 ...Port in piston between opposed working faces
321 .Motive fluid constantly applied to one working member face (235) (417)
322 .With independently operable means to lock distributor
323 .Relatively movable distributors for opposed working chambers
324 ..Distributor moves about an axis
325 .Working member controlled inlet or exhaust port (e.g., semi-valveless)
326 .Distributor moves transverse and parallel to same line
327 .Distributor moves about axis parallel to working member reciprocatory path
328 .Distributor peripherally engages (1) working chamber wall, or (2) cylinder between opposed working faces
329 .Distributor located in cylinder between spaced working faces
330 .With independently operable means to move or means to adjust movement of distributor
331 ..Means adjusts motion transmission from working member to distributor
332 ...Adjusting means comprises motor
333 ...Speed controlled
334 ...To reverse direction of rotation of interposed shaft
335 .With throttle valve or distributor throttle adjustment
336 ..Speed controlled
337 .With means independent of distributor reversing parts to cyclically hold distributor
338 ..Positive hold (e.g., tripped type)
339 .Oscillating working member
340 ..Distributor reversed by rotated part
341 R .Distributor actuator extends into working chamber
341 A ...Valves in partition between tandem pistons
342 ..Axially slidable through working face
343 ..Moves laterally relative to working member reciprocatory path
344 .Biasing means moves distributor after predetermined travel (i.e., snap action)
345 ..Distributor moves about axis
346 ..Spring biased
347 ...Coil spring moves laterally relative to coil axis
348 .Distributor actuator between space piston faces
349 ..Distributor moves about axis
350 .Working member reverses distributor through part movable relative to both
351 ..Meshing rotary gear
352 ..Distributor moves about axis
353 ..Distributor moves laterally relative to working member reciprocatory path
354 ..Rotated part
355 CUTOFF AFTER SINGLE COMPLETE CYCLE
356 .Reversal responsive to motive fluid pressure change
357 SELECTIVELY USABLE OR POSITIONABLE WORKING MEMBER CONTROLLED VENT IN CHAMBER WALL (402)
358 R WORKING MEMBER POSITION FEEDBACK TO MOTIVE FLUID CONTROL
358 A ..Valve locking means
359 .Regenerative or positive feedback type
360 .With safety means operable upon input signal loss
361 .Electrical input and feedback signal means (459)
362 ..Means provides incremental movements (e.g., stepper type)
363 R ..Follower type
363 A ....Fail safe control
364 .With means to vary feedback signal in response to rate of working member movement
365 .With main valve position feedback to pilot valve
366 .Speed governor controlled input signal (458)
367 .Plural input signal means for single motor valve (453)
368 .Follower type
369.1 ..With relatively movable working and output members reacting on input member
369.2 ...Rubber block reaction means
369.3 ....And transverse valve key
369.4 ...Lever reaction means
370 ..With motor chamber pressure reaction on valve
371 ...With valve means limiting reaction pressure
372 ...Spring-loaded valve
373 ....With lost motion between input and reaction member
374 ..Plural movable valve parts
375 R ...Valve part moves about an axis
375 A .....Torsion bar
376 R ...One movable part unitary with working member
376 A .....Vane
377 ....Lost motion linkage connecting valve, load and working member
378 ....Axially movable spool-type valve
379 ..Disproportional rate of response
380 ..Screw and follower (e.g., nut)
381 ..Differential gearing
382 ..Cam and follower
383 ..Cable
384 ..Floating link
385 .Bias-type input and feedback signal means
386 ..Feedback bias means adjustable
387 ..Spring-type feedback bias means
388 .Fluid operated
389 .Adjustable
390 POSITION MAINTAINING TYPE
391 R WITH ALTERNATIVE MANUAL ACTUATION OF LOAD
391 A ..Alternate pedal positions
392 WORKING MEMBER POSITION RESPONSIVE MOTIVE FLUID CONTROL
393 .Position initiated timing or delay means
394 .Working member carries part within working chamber which controls port in chamber end wall
395 ..Part movable with respect to working member
396 ..Part forms throttle member
397 .Alternate control of inlet and exhaust for same chamber at opposite ends of stroke
398 .Simultaneous control of inlet and exhaust of same chamber

	WORKING MEMBER POSITION RESPONSIVE MOTIVE FLUID CONTROL
399	.Bypassing between expanding chamber and closed or throttled contracting chamber (e.g., cushioning) (23)
400	.Venting expanding chamber
401	..Through working member
402	..Working member overrides exhaust port (357)
403	.Position controls actuating fluid for valve
404	.Exhaust control
405	..Throttling (e.g., cushioning)
406	...Exhaust valve with bleed passage therein
407	...By successively controlling or controlling less than all of plural exhaust passages
408	....Working member covers exhaust port (409)
409	..Working member covers exhaust port in contracting chamber (408)
410	.Working member controls relatively movable inlet valve
508	PLURAL RELATIVELY MOVABLE OR RIGIDLY INTERCONNECTED WORKING MEMBERS
509	.Having (1) stand-by or (2) redundant means enabling load to be driven upon failure of primary load moving means
510	..Stand-by means utilizes an auxiliary motive fluid source for another working member to drive same load
511	.Condition responsive means for modifying working member operation
512	..Condition is that of a load driven by a working member other than working member having its operation modified
513	..Condition is position of fluid control member of motor other than motor whose operation is modified
514	..Pressure responsive valve divides motive fluid between motors
515	...For synchronization of motors
516	...To give one motor priority to motive fluid over another
517	..Condition sensed is working member speed or working fluid pressure of another motor (i.e., fluid pressure or flow to or from expansible chamber of the other motor)
518	..Motive fluid control valve responsive to pressure in supply line to or exhaust line from motor which it modifies
519	.With means for selectively changing the speed or force exerted on load by the selective application of motive fluid in a single direction to one or more working members
520	.Motors connected in series
521	.Separate valve means actuatable by a common nonmanual actuator or separately actuatable means with common manual actuator
522	..With means to independently actuate valve means
523	..Simultaneously actuated separate valve means
524	..Successive actuation of separate valve means
525	.With means to control the working fluid to one working member for movement relative to another without controlling the working fluid to the other working member by said means
526	..With multiway valve in series with control means
527	..Valve controlled by remote means (e.g., radio, electromagnetic, etc.)
528	..Control means is fluid pressure operated valve
529	...Fluid pressure operated valve controlled by a pilot valve
530	..Control means includes separate control valves for each working member
531	...With additional control valve in series with at least one separate control valve in supply line to one of motors
532	.With means for proportioning motive fluid supply to plural motors
533	.Single valve for plural rigidly connected working members
534	.Single valve for relatively movable working members driving common load
535	.Relatively movable working members of unequal cross-sectional areas
536	.Single valve for relatively movable working members
415	DIFFERENTIAL
416	.Opposing pressure applied by bypassing
417 R	.Motive fluid constantly applied to one working member face (235) (321)
417 A	...Staplers having two diameter pistons
418	WITH MOTIVE FLUID VALVE
419	.Responsive to (1) motive fluid temperature or state, or (2) motor position or orientation
420	.Contracting chamber exhaust valve controlled by expanding chamber pressure or flow
421	.Expanding chamber inlet controlled by contracting chamber pressure or flow
422	.Valved piston (222)
423	.Valve part forms traversed movable portion of working chamber wall (276)
424	.Two hand control
425	..With motor-controlled holding means for valve
426	.With fluid pressure holding means for valve
427	.Plural manual control stations
428	.Manual control carried on or operated from load or output element
429	.Dither valve
430	.Valve parts continuously relatively moved for nonvalving function
431	.Continuous motive fluid flow through chamber in motor idle condition
432	.Inlet check valve with means for disconnectable supply line (468)
433	.Both inlet and exhaust controlled by motive fluid pressure in supply line or chamber
434	..With manual valve actuating means responsive to motive fluid pressure (e.g., "feel")
435	.Controlled by rate of movement of working member
436	.Inlet fluid supplemented by controlled fluid pressurized in opposed contracting chamber
437	.Independent control of bypass between opposed working chambers
438	..Held closed by motive fluid pressure
439	...Bypass through supply line
440	.For exhausting contracting working chamber to expanding opposed nonworking
441	.With ambient fluid inlet valve to expanding working chamber
442	.Self-opening exhaust valve held closed by inlet pressure (268)

	WITH MOTIVE FLUID VALVE
443	.To provide unequal inlet and exhaust flow rates to single working chamber
444	.Relatively movable serial valves
445	..Stop valve between working chamber and inlet and exhaust valve
446	..Including motive fluid pressure or flow responsive valve (468)
447	...Between working chamber and inlet and exhaust valve
448	..In supply path
449	.Plural separately controlled waste passages for single working chamber
450	..One passage controlled by inlet and exhaust valve
451	...Another passage controlled by motive fluid pressure or flow responsive valve (468)
452	..One passage controlled by motive fluid pressure or flow-responsive valve (468)
453	.Plural actuators for single valve means (367)
454	.Relatively movable inlet and exhaust valves for single working chamber
455	..One valve forms unitary part of valve controlling opposed working chamber
456	..One valve moves about an axis
457	..Single actuating means moves both valves
458	.Speed governor operated (366)
459	.Electrically operated (275) (361)
460	.Pulsator actuator for valve (280)
461	.Pilot valve (304)
462	.For double-acting motor
463	..With means to provide unequal flow rates to or from opposed working chambers
464	..Means to simultaneously open working chambers to inlet or exhaust
465	..Relatively movable unitary inlet and exhaust valves for opposed working chambers
466	..Unitary inlet and exhaust valve means for opposed working chambers
467	...Valve means moves about an axis
468	.Self-acting valve (432) (446) (451) (452)
469	.Unitary inlet and exhaust valve for single working chamber
470	..Valve moves about an axis

DIG 1	Digital
DIG 2	Exhaust throttled motor control
DIG 3	Large area valve
DIG 4	Magnets

1 WITH TEMPERATURE COMPENSATION
2 ONE WORKING MEMBER RECIPROCATES AND ANOTHER ROTATES COMMON OUTPUT MEMBER
3 WITH DISENGAGEABLE ROTARY DRIVE FOR MOVING WORKING MEMBER
5 R WITH (1) SIGNAL OR INDICATOR OR (2) INSPECTION WINDOW IN EXPANSIBLE CHAMBER WALL PORTION
5 L ..With lock
6 R EFFECTIVE AREA OF WORKING MEMBER END FACE SELECTIVELY VARIABLE
6 D ..With diaphragm
7 WITH OVERCENTER MEANS TO BIAS WORKING MEMBER IN OPPOSITE DIRECTIONS OVER DIFFERENT PORTIONS OF STROKE
8 WITH MEANS TO CONTROL FLOW OF NON-WORKING ARRESTING FLUID FOR WORKING MEMBER
9 .Flow control means positioned between chambers having a common wall movable with working member
10 .Work member position control
11 ..With auxiliary adjustable throttle (12)
12 .Adjustable throttle (11)
12.1 DISPLACEMENT CONTROL OF PLURAL CYLINDERS ARRANGED IN PARALLEL, RADIAL, OR CONICAL RELATIONSHIP WITH ROTARY TRANSMISSION AXIS
12.2 .Parallel cylinders
13 ..WITH ADJUSTABLE MEANS TO VARY STROKE OF WORKING MEMBER
13.1 .Having motor-operated adjustment
13.2 .Flexible wall-type working member
13.3 .Stroke of one working member adjustable relative to another
13.4 .Predetermined discrete incremental adjustment positions
13.41 ..Adjustment by assembly or disassembly
13.5 .Independent adjustment of opposite stroke limits of single reciprocating working member
13.51 .Axial adjustment of spaced, rigidly interconnected working member faces
13.6 .Adjustable abutment positioned within working chamber
13.7 .BY adjusting or limiting motion of relatively movable power transmission element
13.8 .Adjustment means includes external axially extending threaded piston stem
14 WORKING MEMBER MOVES LOAD AND LATCHING MEANS FOR LOAD
15 WITH RELEASABLE STOP OR LATCH MEANS TO PREVENT MOVEMENT OF WORKING MEMBER
16 .With timing or delay means
17 .Engages member coaxial with and rotatable relative to working member
18 .Includes interfitting parts engageable at plural positions including position intermediate stroke limits
19 ..Self-engaging
20 .Engages power element movable relative to working member
21 R .Plural selectively operable actuators for releasable means
21 MR ...Manual release
22 .Relatively movable working members with interdependent means
23 .Means includes element interfitting between working member and fixed part
24 ..Element actuated or retained in operative position by relatively movable fluid responsive member
25 ...With pivoted link between element and member
26 ...Resilient element
27 ..Fluid actuated (28)
28 .Fluid actuated (27)
29 WITH RELEASABLE LATCH MEANS BETWEEN WORKING MEMBER AND POWER TRANSMISSION ELEMENT AXIALLY SLIDABLE THEREIN
30 WITH RESILIENT DETENT
31 RECTILINEARLY MOVING WORKING MEMBER AND COAXIAL OR PARALLEL ELEMENT SLIDABLY INTERENGAGED FOR RELATIVE ROTARY MOVEMENT
32 .Working fluid-actuated interengaging means permits unidirectional rotation of element relative to fixed part
33 .Element extends through working member portion
34 BELLOWS TYPE EXPANSIBLE CHAMBER
35 .Expansible chamber formed by concentric bellows
36 .With non-bellows type expansible chamber
37 .Plural bellows
38 ..Non-working liquid moved by first bellows effects movement of second bellows
39 ..With common movable wall
40 .With separate biasing means
41 .With vibration damping means
42 .With separate ring-like reinforcing element abutting pleat
43 .With stop means to limit axial movement of bellows
44 .With guide means
45 .Superposed peripherally interconnected elements
46 ..With nonmetallic portion
47 .Specific or diverse material (103)
48 PLURAL FLEXIBLE WALL WORKING MEMBERS
49 .Diaphragm type having working fluid contacting areas of different size
50 .Oppositely movable walls of common chamber (69) (75)
51 MUTUALLY RELATIVELY MOVABLE CYLINDER OR SLEEVE, MEMBER SEALINGLY SLIDABLE THEREIN AND OUTER CYLINDER THEREFOR
52 .Cylinder or sleeve forms working member
53 .With additional cylinder relatively slidable exteriorly of outer cylinder
54 ROTATING CYLINDER
55 .Fluid conduit coaxial with axis of rotation
56 .Plural cylinders
57 ..Axes of cylinders parallel to axis of rotation
58 ..Axes of cylinders intersect axis of rotation at common point
58.1 KNOCKDOWN OR FLOW CONDUIT STORAGE OR RETRIEVAL MEANS
59 CONVERTIBLE, OR CHANGEABLE BY ASSEMBLY OR DISASSEMBLY
60 WITH FLEXIBLE OR RESILIENTLY BIASED NON-WORKING MEMBER MOVABLE WALL IN CONSTANT COMMUNICATION WITH WORKING CHAMBER
60.5 SELECTIVE CLEARANCE CONTROL
61 RELATIVELY MOVABLE WORKING MEMBERS
62 .First working member moves second coaxial working member through separating abutment surfaces
63 ..With separate biasing means for a working member
64 .One a flexible wall type
65 .Rigid stem on first working member portion extends through second working member
66 .Moving cylinders
67 .Oscillating working members
68 .Interconnected with common rotatable shaft

RELATIVELY MOVABLE WORKING MEMBERS
.Interconnected with common rotatable shaft
69 R ..Oppositely movable walls of common chamber (50) (75)
69 A ....One piston rod passes through opposite piston rod
69 B ....Single crankshaft offset from center of work chamber
70 ...Shaft axis parallel to axes of working members (71)
71 ..Shaft axis parallel to axes of working members (70)
72 ..Shaft axis intersected by axes of working members
73 ...Parallel working members
74 ....Shaft extends transversely through working members
75 .Oppositely movable walls of common chamber (50) (69)
76 .Interconnected by linkage having relatively movable members
77 GROUND EMBEDDED EXPANSIBLE CHAMBER
78 WITH FLUID PURIFYING MEANS
79 .Means separates gas from liquid
80 WITH FORCE EXERTING MEANS TO MOVE FLUID FROM NON-WORKING CHAMBER
81 WORKING MEMBER FORMS RESERVOIR FOR NON-COMPRESSIBLE WORKING FLUID
82 WITH MEANS TO CONTROL FLUID FLOW FROM NON-WORKING CHAMBER
83 LIQUID POOL SEALING RELATIVELY MOVABLE CHAMBER WALLS
84 RESILIENT MEANS INTERPOSED BETWEEN WORKING MEMBER AND RELATIVELY MOVABLE POWER TRANSMISSION ELEMENT
85 R WITH CUSHIONING MEANS EFFECTIVE OVER A PORTION ONLY OF STROKE
85 A ..Metal spring
85 B ..Fluid spring
86 WITH REMOVAL CONDUIT FOR LIQUID SEEPAGE FROM EXPANSIBLE CHAMBER
86.5 PASSAGE IN CYLINDER FOR APPLICATION OF SEPARATE FLUID TO CYLINDER AND PISTON SIDE WALL INTERFACE
87 WITH NON-SEALING CLEANING MEANS
88 SEALED OPENING IN LONGITUDINAL WALL OF CHAMBER FOR RECEIVING WORKING MEMBER PORTION
89 COLLAPSIBLE CHAMBER WALL PORTION (E.G., HINGED OR FLEXIBLE WALL)
90 .Wall portion formed of flexible material
91 ..Envelope having restricted fluid opening
92 ...Non-metallic
93 ..Annular flexible wall portion peripherally sealed to spaced relatively fixed concentric rigid members
94 ..With separate biasing means
95 ...Adjustable
96 ..Diaphragm type
97 ...Axially spaced flexible wall portions with interposed incompressible means
98 R ...Entire periphery secured to rigid working chamber forming wall
98 D .....Rolling diaphragm
99 ....With undistortable member secured to central portion of diaphragm
100 .....Member includes coextensive plate-like elements secured to opposite side of diaphragm
101 ....Abutment connection between diaphragm and power transmission element
102 ....With separate seal means between diaphragm and member
103 R ...Specific or diverse material (47)
103 F .....With reinforcement embedded in diaphragm
103 SD .....Synthetic diaphragm (non-metal and non-rubber)
103 M .....Metal diaphragm
104 ...Corrugated
105 ..Coaxial radially spaced relatively movable undistortable members joined by flexible wall
106 FLUID CONDUIT IN CONSTANT COMMUNICATION WITH RELATIVELY ROTATABLE WORKING CHAMBER
107 ANNULAR WORKING MEMBER OR ANNULAR LINEARLY EXTENDING CHAMBER THEREFOR
108 .Axially extending hollow stem on working member
109 PISTON WITH RIGID AXIALLY EXTENDING HOLLOW STEM
110 .Hollow stem forms axially extending fluid passage
111 ..Plural laterally spaced passages
112 ..Passage communicates with lateral port extending through piston side wall portion
113 .Relatively movable elongated part within stem
114 ..Part and stem relatively axially adjustable
115 ...Part forms actuator for piston side wall portion adjusting means
116 WITH AXIALLY EXTENDING ELEMENT MOUNTED ON WORKING MEMBER FOR RELATIVE ROTARY MOVEMENT ONLY
117 R MOVING CYLINDER
117 A ..Stationary piston or movable piston with moving cylinder
118 .Pivoted
119 ..With fluid conduit extending through pivoted connection
120 OSCILLATING WORKING MEMBER OR CYLINDER THEREFOR
121 .Oscillatory shaft with radially extending vane
122 ..Plural angularly related vanes
123 ..With lost motion connection between vane and shaft
124 ..With resiliently biased vane peripheral portion
125 ..Vane includes non-metallic peripheral sealing portion
126 WITH DIFFERENTIAL RADIAL THRUST PRODUCING MEANS FOR WORKING MEMBER
127 .Fluid pressure type
128 WITH ASSEMBLY OR DISASSEMBLY FACILITATING MEANS
129 ABUTMENT CONNECTION BETWEEN WORKING MEMBER AND POWER TRANSMISSION ELEMENT
130 R WITH SEPARATE BIASING MEANS FOR WORKING MEMBER
130 A ..Bias normally held inoperative by fluid pressure
130 B ..Bias other than coil spring
130 C ..Bias external of both expanding and contracting chamber
130 D ..Plural coil springs
131 .Biasing means maintains working member intermediate stroke end limits
132 .Tension spring
133 .Adjustable
134 .Fluid spring
135 .Biasing means engages working fluid contacting portion of working member
136 WITH TOOTHED GEAR, SPLINE OR THREAD RIGID WITH WORKING MEMBER

137	WITH FLEXIBLE TRANSMISSION ELEMENT SECURED TO WORKING MEMBER
138	WITH LINKAGE OR TRANSMISSION ENGAGING PORTION INTERMEDIATE SPACED WORKING MEMBER END FACES
139	WITH CYLINDER WALL CONTACTING GUIDE ARTICULATED TO PISTON
140	WITH LINKAGE OR TRANSMISSION HAVING RELATIVELY MOVABLE MEMBERS
141	WITH SEPARABLE FLUID DEFLECTING SHIELD OR BAFFLE ON WORKING MEMBER
142	WITH RESERVOIR FOR NON-COMPRESSIBLE WORKING FLUID
143	WITH MOVEMENT DAMPING MEANS (E.G., FLUID FLOW RESTRICTOR)
144	WITH ENCOMPASSING HEAT EXCHANGE MODIFYING SPACE OR JACKET
145	COMBINED
146	PLURAL UNITARILY MOUNTED CYLINDERS OR FRAME THEREFOR (161)
147	.With casing or support for rotary shaft
148	..Three or more radially arranged cylinders
149	..V-type
150	..Coaxial cylinder (151)
151	.Coaxial cylinders (150)
152	..With different cross-sectional areas
153	WITH LUBRICATING MEANS
154	.Lubricant entrained by working fluid
155	.Portion of expansible chamber device includes solid lubricating material
156	.Valve means in lubricant passage
157	.Lubricant passage extends axially through articulated piston rod
158	.Piston has lubricant retaining or conducting means
159	..Pocket or chamber
160	..Port or passage extending through side wall portion
161	WITH SUPPORT OR FRAME (146)
161.5	.Wheel supported
162 R	SPACED CYLINDER AND PISTON WALLS DEFINE PASSAGE BETWEEN OPPOSED PISTON SIDE WALL ENDS
162 P	..Passage in piston
163	FLUID CONDUIT OR PORT IN FIXED WALL OF WORKING CHAMBER
164	.Port in separable chamber end closure
165 R	WITH GUIDE OR SEAL ON CYLINDER END PORTION FOR PISTON OR MEMBER MOVED BY PISTON
165 PR	..Prevent rotation
166	.Additional guide is spaced chamber end wall
167	.Guide movable laterally
168	.Non-metallic seal means between piston or member and end portion
169.1	CYLINDER DETAIL
169.2	.With reinforcing member
169.3	..Extending through working member
169.4	...Coaxial sleeve or tube
170.1	.Nonmetallic piston contacting portion
171.1	.Cylinder or liner retained in casing by casing closure or closure associated means
172	PISTON
173	.With rotation imparting fluid impinging surface on piston part
174	.Liquid between axially spaced side wall portions
175	.Spaced faces joined by rigid stem (e.g., spool)
176	.With enclosed insulating space in piston part
177	.Non-circular
178	.With ball or roller anti-friction means on side wall portion
179	.Articulated connecting rod end forms portions of piston face
181 R	.With fluid passage in piston face
181 P	...Passage thru piston to opposite chamber
182	..Passage communicates with packing receiving recess
183	...Valved
184	...Passage in opposed piston faces
185	....Passages communicate with common packing receiving recess
186	.With ported chamber in piston part for circulating heat exchange fluid
187	.With separable means for pivotally mounting connecting rod to piston
188	..Means retained by annulus positioned about piston periphery
189	..Piston formed of separable end face and side wall portion
190	...Means secures end face portion to side wall portion
191	..Fastener for separable means extends through end face portion
192	.Plural integral radially extending resilient metallic sealing tongues on side wall portion
193	.With spring means for biasing side wall portion radially
194	..Biased portion comprises peripheral axially extending flexible lip
195	..Open ended hollow skirt comprises biased portion
196	...Spring part positioned in skirt slit
197	...Adjustable bias (199)
198	...Split annular type spring (200)
199	..Adjustable bias (197)
200	..Split annular type spring (198)
201	.Radially adjustable side wall portion
202	..Adjustable portion comprises open-ended hollow skirt
203	...Adjustment effected by wedge member movable relative to skirt (207)
204	..Adjustment effected by selectively removable spacer or skim element between relatively movable parts
205	..Side wall portion positioned between relatively axially adjustable rigid end members
206	...With beveled abutting surfaces between side wall portion and an end member
207	..Adjustment effected by wedge member movable relative to side wall portion (203)
208	.Open-ended hollow skirt type (e.g., trunk type)
209	..Frusto conical skirt
210	..With weight balancing means
211	..Element of diverse material extending through skirt wall abuts circumferentially extending resilient ring
212	..With nonmetallic portion
213	..End face surface includes areas of diverse material
214	..Spaced wall skirt
215	..Separate resilient elements secures end face portion to skirt portion
216	..Plural separable parts
217	...Interconnected by relative rotation of parts
218	....With means to prevent relative rotation of parts
219	...Interconnected without separate fastening means
220	...Threaded fastener
221	....Fastener extends through end face

PISTON
.Open-ended hollow skirt type (e.g., trunk type)
222 ..Specific or diverse material; or welded, brazed or soldered joint
223 ...Coated
224 ...End face and skirt periphery of diverse material
225 ...Element of diverse material for limiting radial movement of skirt part
226 ....Bi-metallic restraining element
227 ....Element positioned about periphery of skirt
228 ....Element portion embedded in piston part
229 .....Annular element
230 ......Element encircles connecting rod pin supporting boss
231 ...Welded, brazed or soldered (260)
232 ..Spaced skirt parts jointed by resilient arcuate web
233 ..Oval-shaped skirt portion
234 ..Skirt includes slit
235 ...Slit transverse to skirt axis
236 ....With additional angularly related slit
237 ..Circumferentially spaced portions at free end of skirt
238 ..Connecting rod pin supporting boss laterally spaced from skirt portion
239 ..With rib or strut means on piston part
240 .Side wall portion includes peripheral axially extending flexible lip
241 ..With embedded reinforcing means in lip portion (254)
242 ..Plural axially spaced lips
243 ...Oppositely facing
244 ....Lips formed on separable elements
245 ..Lip forms peripheral portion of imperforate cup shaped element
246 ..Metallic lip
247 .Fluid pressure responsive axial movement of end face portion radially moves side wall portion
248 .Nonmetallic portion
249 ..Flexible
250 ...Flexible side wall portion between separable axially spaced rigid members
251 ....Wall portion comprises plural axially aligned flexible elements
252 .....Three or more elements
253 ...Axially spaced flexible side wall forming elements with interposed rigid spacer member
254 ...With imbedded reinforcing means (241)
255 .Plural separable parts
256 ..Fastening means for parts include resilient element
257 ..Side wall portion interposed between separable axially spaced rigid members
258 ...Rigid members connected by coaxial rigid stem or rod
259 ..Side wall portion and relatively movable piston part having abutting inclined surfaces
260 .Welded, brazed or soldered (231)

40.08	.....Air passes over lamp
40.09	.....Having adjustable valve
40.1	....Having perforated or porous element
40.11	.....Having portion or element movable during normal use
40.12	....Having plural vanes
40.13	.....Concentric
40.14	....Having elongated output slot
40.15	.....Single, annular output slot
40.16	.....Having portion or element movable during normal use
40.17	......Pivoted
40.18	...Air nozzle
40.19	...Having air duct extending into room
40.2	...Having louver
40.21	....With concentric vanes
40.22	.....Having separate, adjustable internal damper
40.23	.....Adjustable vane
40.24	....Movable louver
40.25	.....Temperature responsive
40.26	.....Aligned multiple movable sets of vanes
40.27	......Serially arranged sets
40.28	.....Repositionable set
40.29	.....Rotating disks
40.3	.....Continuously oscillating
41.1	..With adjustable valve
41.2	...Axially movable
41.3	...Sliding
42.01	.Having outlet airway
42.02	..With air pump
42.03	...And having specific emergency smoke handling structure
42.04	...Having specific air pump actuator
42.05	...Pump induces draft in exit duct
42.06	...Having plural suction intakes
42.07	...Ceiling or wall mounted
42.08	....Having vibration absorbing or preventing structure
42.09	....Having readily movable air regulating louver, damper, or cover
42.1	.....Upstream of air pump
42.11	...With movable access cover
42.12	...With readily movable air regulating louver, damper, or cover
42.13	...Having exterior neck with enlarged, weather resistant cover
42.14	..For skylight
42.15	..Having emergency smoke handling feature
42.16	..Having readily movable air regulating louver, damper, or cover
42.17	...Internal damper
42.18	....Continuously horizontal damper panel
42.19	....Pivoted damper panel
42.2	...Along roof ridge
42.21	..Along roof ridge
42.22	..Slant roof ventilator
42.23	..Having exterior neck with enlarged, weather resistant cover
44	.Window wind deflectors
45	.Flue heaters
46	..Chimney

CLASS 99 FOODS AND BEVERAGES: APPARATUS

DECEMBER 1990

275 BEVERAGE
276 .Primary-alcoholic fermentations with subsequent and/or prior operations
277 .Post-primary-alcoholic fermentation operations
277.1 ..Aging, refining and purifying
277.2 ...With agitating means
278 .Hopping, wort-making or ante-primary alcoholic fermentation operations
279 .Infusors
280 ..Automatic control
281 ...Of heat
282 ....And infusive contact
283 ...Of infusive contact
284 ..Convertible
285 ..With signal, indicator or observation means
286 ..With prior handling or treating (e.g., roasting or grinding)
287 ..With agitating or compacting
288 ..With cooking or heating means
289 R ..With infusive material feeding and/or discharging
289 T ....Tape
289 D ....Drum brewer
289 P ....Plate brewer
290 ..Combined
291 ..Plural infusors
292 ..Pressure-vacuum or reflex type
293 ..Steamer or condenser type
294 ...With additional liquid supply means
295 ..Cartridge type
296 ..Invertible type
297 ..Plunger type
298 ..Plural bed or filter type
299 ..With infusive rate or interval control means
300 ..With liquid supply or directing means
301 ...Liquid trap
302 R ...Force feed infusor
302 C .....Centrifugal
302 FB .....Flexible bulb
302 P .....Piston
303 ....Underfeed
304 ...Gravity feed infusor
305 ....With supply regulator
306 ....Drip chamber type
307 ....With force feed supply
308 .....Recycling or repercolating
309 ......Selective supply
310 ......Fountain type
311 ....With overflow
312 ....With distributor
313 .....Fountain type
314 ......With distributor
315 .....With distributor
316 ..Plural compartment
317 ...Inner foraminous receptacle
318 ....Movable or adjustable
319 ......Vertical
320 ......Float
321 ....Textile type
322 ....Suspended
323 ..Infusing receptacles
323.1 .With gas treating means
323.2 ..Carbonic acid and flavoring material
323.3 .Hot beverage means
323.4 CEREAL-PUFFING
323.5 .Corn-popper type
323.6 ..Coin control
323.7 ..Automatic control or time means
323.8 ..With addition of flavoring material
323.9 ..With feeding, conveying or discharging
323.11 ...Separating discharge
323.12 VINEGAR-MAKING
324 COOKING
325 .Automatic control
326 ..Of heat and material
327 ...By time
328 ....And heat responsive means
329 R ...By heat responsive means
329 P .....Power operated carriage
329 RT .....Relative movement, toast and support
330 ..Of cooking fluid
331 ..Of heat or heater
332 ...By time
333 ....And heat responsive means
334 ..Of material
335 ...By time
336 ....Egg boiler or deep fat fryer type
337 .Intercontrol or safety control
338 ..Of heat and material
339 .Diverse cooker types
340 .Convertible
341 .With observation means
342 .With signal, indicator or tester
343 ..Gauge or gauge markings
344 ..Alarm
345 .With basting or solid applying means
346 ..Liquid elevating means
347 ..Condensing or self basting
348 .With stirring
349 .With material pressing means (e.g., ham boilers)
350 ..Band or binder type
351 ..Spring biased
352 .With other treating or handling of material
353 ..Changing form or shape
354 ...Ring or hollow article (e.g., dough-nut)
355 ..Subsequent treating or handling
356 ...Receptacle filling or closing
357 .Combined
358 .Electrode type
359 .Filled receptacle type
360 ..With conveyor
361 ...Successive treating zones or units
362 ....Single endless conveyor
363 ...Variable length of path
364 ...Rollway type
365 ....Helical type
366 ...Valved receptacle inlet or outlet
367 ..Plural treating units or zones
368 ...Fluid interchange
369 ..With hold-down or presser
370 ..Plural treating fluids
371 ..Movable retort or support
372 .Opposed heated mold or surface type (e.g., waffle iron)
373 ..With feeding, conveying and/or discharging
374 ..Plural units
375 ..With drip or waste receptor, director or trimmer
376 ..Detachable or convertible surface
377 ..Movably supported surfaces
378 ..Electric feature
379 ..Adjustable separation
380 ..Movably connected mold sections
381 ...Composite article forming or receiving
382 ...Hollow article forming or receiving
383 ....Edible container
384 ...Elongate article forming or receiving
385 .Slice toaster or broiler (e.g., grid types)
386 ..With conveyer
387 ...With magazine supply
388 ..With marking or uniform coloring
389 ..Opposed heater type
390 ...Movable or adjustable heater
391 ...Movable or adjustable carrier or grid
392 ....Removably guided

	COOKING
	.Slice toaster or broiler (e.g., grid types)
393	..Movably or adjustably supported carrier or grid
394	...Hand-held type
395	...With turning feature
396	...Interchangeable position type
397	...Rotary invertible
398	....Displaceable pivot
399	...Removably guided
400	..With drip or crumb receiving means
401	..With heat distributor, baffle or enclosure
402	..Hanged or separable grids
403	.Boiler or deep fat fryer type
404	..With conveyer
405	...For buoyant material
406	....Fluid current
407	..With feeding and/or discharging
408	..With crumb or sediment segregating or handling
409	..With turning, agitating or inverting
410	..Elevated, steaming or draining position
411	...Unilaterally supported
412	...Bayonet type support
413	...Rim engaging support
414	...Bail or flexibly suspended
415	...Bottom resting support
416	..Plural food support
417	...Superposed or steaming
418	..Bottom resting support
419	.Spit or impaling type
420	..With conveyer
421 R	..Movably or adjustably supported
421 A	....Hand held
421 H	....Horizontal axis
421 HH	.....Horizontally adjustable
421 HV	.....Vertically adjustable
421 M	....Heat actuated motor
421 P	....Planetary
421 TP	....Temperature
421 V	....Non-horizontal axis
422	.Imperforate sheet or griddle type
423	..With feeding, discharging and/or movably supporting
424	...Pivoted section
425	..Drip segregating, receiving or directing
426	.Confining, conforming or molding support
427	..Movably mounted
430	..Mold with dynamic scoring or severing means
431	..Dipping form
432	..Mold for forming sheet material, e.g., pie crust
433	...Including pie rim clamp or guard
439	..Press-couple mold
428	..Shaping core mold
440	..For ball or egg shaped article
441	..For elongate or sausage shaped article
442	..For ring shaped or hollow article
443 R	.With conveyor or movably supported
443 C	...Conveyor
444	.With drip segregating, receiving or directing
445	..Channelled gridiron
446	..Subjacent receptacle or director
447	.With heat distributor
448	.Plural food support
449	.Collapsible, expansible or sectional support
450	.Foraminous support
450.1	EDIBLE LAMINATED PRODUCT MAKING APPARATUS
450.2	.Means forming or reshaping plural sheets or webs
450.3	..Pie machine
450.4	.Means assembling preforms into a sandwich
450.5	..Manually assisted
450.6	.Shell forming means and filling means
450.7	.Means feeding diverse center material
450.8	..Puncturing injector
451	ELECTRIC, RADIANT OR VIBRATIONAL TREATING MEANS
452	MECHANICAL, FLUID OR HEAT TREATMENT OF DAIRY FOOD
453	.With temperature or atmosphere modification
454	..By vacuum
455	..By lowering temperature
456	.With isolation of a watery constituent
457	..Including roller-press and drain
458	..By reticulated member
459	...With prior mechanical treatment (e.g., churning)
460	.By actuated surface
461	..Including plural, relatively movable surfaces
462	...Plural revolving surfaces having parallel axes
463	....Planetating surfaces
464	..Including rolling surface
465	..And reticulated member
466	..Including revolving surface
467	SUBJECTING FOOD TO AN ENCLOSED MODIFIED ATMOSPHERE
468	.Automatic control or time means
469	.With removal of solid foreign matter
470	.With sequential heating and cooling
471	.In gravity-feed enclosure
472	.Vacuum-producing means
473	.Including means to influence movement of gas within enclosure
474	..By forcing gas to circulate
475	...By plural means
476	...Rotary pump
477	..With means to move food
478	...Non-rectilinear movement
479	....Circular movement of food support
480	..By movable damper
481	..By static deflector (e.g., smoke)
482	.With separate support for fume-producing material
483	NON-COOKING HEAT TREATMENT OF FOOD
484	COMBINED
485	MEANS TO TREAT FOOD
486	.Automatic control or time means
487	..Regulating amount of liquid applied to food
488	..Of grain flow
489	..By food
490	...Core-pit detector
491	...To adjust or position tool
492	..By safety means
493	.With condition-indicator
494	.By stuffing or applying particulate material
495	.By isolating a fluid constituent
496	..By separating liquids having distinct characteristics
497	...Separating egg-white from yolk
498	....And removing shell
499	....By receptacle separating one egg-yolk from one egg-white
500	.....Having means to pivotally move receptacle
501	..By a rotary food-entering member
502	...With axial actuation
503	...With a rotating foraminous separator
504	...With coacting food-holder
505	...Manually actuated

	MEANS TO TREAT FOOD
	.By isolating a fluid constituent
506	..By static food-entering member
507	...And means to move food to member
508	...And foraminous separator
509	..With cutting
510	...By comminuting
511	....And a centrifugal extractor
512	.....With handling means
513	....With foraminous separator adjacent comminutor
514	.Recovery of propagative seed
515	.Internal severing by flexable tool or yieldable tool support
516	.By applying fluid
517	..With cooling
518	..With disjoining hull from grain
519	...By projecting grain against surface
520	...Plural hulling zones
521	....Including coacting, relatively rotating imperforated surfaces
522	....Having plural, rotary, multiperforated surfaces
523	...With means to vary spacing between hulling surfaces
524	...And varying flow of grain
525	...Directing gas adjacent hulling zone
526	....Internally and externally of hulling zone
527	....By valved gas passages
528	....With screen to separate products
529	....Interrelated drive means for huller and gas-move
530	.....Gas-mover integral with huller
531	.....Gas-mover coaxially separated from huller
532	..By injecting needle
533	...With means to move needle or work
534	..Particular liquid
535	...Brine
536	...Water
537	.Subdividing into plural products
538	..Separating one internal portion from another
539	...Removing external portion
540	....Skin
541	.....By paring
542	......And removing cylindrical core
543	.......And slicing
544	....Removing cylindrical core
545	.....And slicing
546	....By cutting stem-end or blossom-end
547	...Removing core-pit
548	....By separator moving with moving food (e.g., flying)
549	....And orienting core-pit axis relative to separator
550	.....By irregularity in outer surface of food
551	....By gripping and twisting
552	....Severing and pitting simultaneously
553	.....By arcuate cutter separating pit
554	.....By removing severed portion from immobilized pit
555	.....By forcing pit
556	......Through orifice
557	....By plural impaling means
558	.....By parallel, cooperating cylinders, one resilient, one impaling
559	....By incision-type-punch and die
560	.....And food handling means
561	......Apertured, orbitally traveling, handling means
562	....By pitting severed food
563	.....Severing followed by pitting
564	....By arcuate cutter or gripping means
565	....By forcing flesh or pit through opening
566	.....Ribbed rotating disc or cylinder
567	..Separating one external portion from the remaining food
568	...Removing shell
569	....With sorting
570	.....By fluid
571	....By sudden-impact
572	....By means to set, look and actuate separating means according to shell size
573	.....Including pawl and ratchet lock means
574	....By rotating separating means
575	.....Relative movement between adjacent irregular surfaces
576	.....Disc or saw separating means
577	....By biased breaking member
578	.....Biased away from shell-contacting position
579	....With adjustment of a separating member
580	....With discharge feature
581	....By relatively movable shell contacting means
582	.....With means to restrain food prior to or during shell-breaking
583	.....With means to fasten apparatus to support
584	...Removing skin
585	....By pinching roller
586	....By resilient conduit
587	....By gripper means
588	....By paring tool
589	.....And means to move food past stationary or vibrating tool
590	.....Arcuately shaped tool
591	.....Plural tool means
592	......With sectioning means
593	.....Tool rotates about its own axis
594	.....With means to hold and rotate food
595	......And means to translate food past tool
596	......Cutter has arcuate path around food
597	.......Tool pivots transversely on reciprocating carrier
598	........Tool pivots in plane perpendicular to food axis
599	.......Tool arm pilots on rotatable carrier
600	....Grain hulling
601	.....With means to segregate diverse materials
602	......By hulling means
603	.......Moving perforated surface
604	........With nonperforated hulling surface area
605	.......Cylindrical or conical perforated enclosure
606	........With axially extending nonperforated hulling portion
607	........With additional hulling surface characteristics on enclosure
608	........Enclosing a rotating, yieldably hulling element
609	.....With mechanism to feed or discharge material
610	......Integral with moving hulling member
611	......With discharge control
612	.....By plural hulling zones
613	......Serial zones
614	.......Axially spaces zones
615	........With interior partition
616	.....By endless-belt hulling surface
617	.....By rotating surface
618	......Adjustably or yieldably mounted hulling surface

	MEANS TO TREAT FOOD
	.Subdividing into plural products
	..Separating one external portion from the remaining food
	...Removing skin
	....Grain hulling
	.....By rotating surface
	......Adjustably or yieldably mounted hulling surface
619	.......Including a screw-threaded mounting
620	......Deformable hulling surface
621	......With additional rotating surface
622	......Radial hulling surface
623	....By abrading or resilient separating means
624	.....Two elements move at different speeds
625	......Adjacent separating elements
626	.....Including brush means
627	......With rotating container
628	.....Relatively moving adjacent surfaces
629	.....Including tumbling means
630	......Having a container which rotates, or has internal rotating abrading
631	.......Vertical container with rotating bottom
632	........With agitator or flow control means
633	.........Having irregularly shaped bottom
634	.......With food deflector
635	...Removing stem-end or blossom-end
636	....Including blossom-end
637	....Stemming
638	.....And cluster breaking
639	.....By means adjacent apertured handling means
640	.....By rollers
641	.....By relative motion of irregularly shaped element
642	....By penetrating cutter
643	....With conveyor and positioning means
644	INCLUDING MEANS TO PERMIT INVERSION OF FOOD
645	SHIELD OR SPACING ELEMENT
646 R	MISCELLANEOUS
646 S	..Silos
646 C	..Container
646 LS	..Liquid-solid

1 BINDING
2 .Methods
3 ..Compacting and binding
4 .With automatic or material-triggered control
5 .With material winding or folding
6 .With material severing
7 .With material depositing or discharging
8 .Binder applying
9 ..Preformed continuous annular binder
10 ..With precutting of binder to length
11 ..Plural flexible section binder
12 ..Through annular material
13 ..Helically along material
14 ..Indexing material between successive placements
15 ..By rotation of material
16 ..By swing of material gripping jaw
17 ..Binder supported across passageway for material
18 ...With material conveyer
19 R ....With threader crossing material path
19 A ......Needle brake
20 .....Delivering binder to end gripper
21 ......Concurrently delivering to joiner
22 ....Indexing gripper
23 ......Shifting gripper delivers binder to joiner
24 .....Threaders
25 ..Curved guide channel for pushed binder
26 ...Material receiving loop channel
27 ..Orbit traveling binder placer
28 ...Reversing for successive placements
29 .Binder tighteners and joiners
30 ..Sleeve or clamp joining
31 ..Twisters
32 .Binder tighteners
33 R .Joiners
33 PB ...Plastic band
34 .Binder retaining material holders
35 METHODS
36 .With pre-enclosing in textile
37 .With separation from material of liquid expressed
38 .With heating or cooling
39 .With cutting or comminuting
40 .With winding or folding
41 .Forcing through constricted passage
42 .Successive compressions from different directions
43 AUTOMATIC OR MATERIAL TRIGGERED CONTROL
44 .Of insertion of separator between successive material charges
45 .Of material addition, deposition or discharging
46 .Of parallelism of platens
47 .Of roll separation or speed
48 .Of actuating means
49 ..Material presence or position starting
50 ..By pressure applied to material
51 ...With dwell time control
52 ...Reversing
53 INTERRELATED OR SAFETY CONTROLS
54 PORTABLE RECEPTACLE LID APPLYING
55 .With receptacle transfer means
56 .With lid fastening
57 .With gathering of contents
58 .With lid locating means
59 .Receptacle mountable
60 .Upwardly displaced receptacle
61 .Concurrently pressing spaced areas of lid
62 ..Loops or bails receiving receptacle
63 ..Approaching arms embracing receptacle
64 ..Translating projecting arms
65 COMPACTING ENSILAGE WITHIN SILO
66 .With depositing or distributing
67 .Silo wall guide rollers
68 .Vertical center post guided rollers
69 .Tamper suspended within silo
70 R WITH ADDITIONAL TREATMENT OF MATERIAL
70 A ..Crop crushing
71 .Adding materials
72 ..Recycling
73 ..Liquid and/or steam
74 ...To material being fed or conveyed
75 ....Interstage
76 .Winding or folding sheet, web or strand
77 ..With subsequent transfer to repressing press
78 ..With shape retaining means
79 ..With winding mandrel stripper
80 ..Folding zigzag
81 ...Pivoted receiver
82 ..Circularly deposited through eccentric opening
83 ...With presser roll along opening
84 ...With pusher moving to opening
85 ...Receding receiver
86 ..Mandrel and opposed presser roll
87 ..Apron type (embracing belt loop)
88 ..Between opposed belts
89 ..Within group of three or more rolls
90 .Separating materials (vacuumizing here)
91 ..Plural solids
92 .Heating, cooling or drying
93 R ..In press
93 P ....Platen press
93 PB .....Brake lining
93 RP ....Roll press
93 S ....Screw press
94 .Cutting, breaking, piercing or comminuting
95 ..In press material handling train
96 ...In feed train
97 ....Cutter
98 R ..In press
98 A ....Hay bale hole puncher
99 WITH ALARM, SIGNAL, INDICATOR OR TEST MEANS
100 WITH GROUND TRAVERSING WHEELS OR GUIDES
101 WITH CLOTH ABOUT CAKE ENFOLDER
102 COMBINED
103 CONVERTIBLE
104 WITH DRAIN MEANS FOR EXPRESSED LIQUID
105 .Plural liquids (peel oil)
106 .Liquid impelling means
107 .Drain tube inbedded in material
108 ..With piercing point or edge
109 ..Stacked boxes or plates
110 .Drainage through or along pressure surface
111 ..With valve or adjustable flow regulator
112 ..With clearer or cleaner
113 ..Stacked boxes or plates
114 ...Flexibly connected
115 ...Boxes or plates
116 ..Movable surface
117 ...Helix
118 ...Endless conveyer
119 ....Trough forming
120 .....Material enclosing
121 ...Roll
122 ..Textile containing pressure surface
123 ...Pendant bag type
124 ...Textile sustaining hoops
125 ..Fixed abutment or end wall surface
126 .Drainage through or along surface spanning pressure surfaces
127 ..Box, frame, cage or annular wall
128 ...Assembled rings or hoops
129 ...Assembled slats or staves
130 .External strainer
131 .Expressed liquid collector or receptor
132 ..Demountably supporting press

WITH DRAIN MEANS FOR EXPRESSED LIQUID
.Expressed liquid collector or receptor
..Demountably supporting press
133 ...Drinking receptacle type
134 ..With dispenser
135 ...Pouring spout
136 .Guards or shields
137 PLURAL DIVERSE PRESSES
138 .With subsequent press conveying while pressing
139 ..Successive diverse presses each conveying
140 ..Loaded from other type press by transfer
141 ..Loaded by transversely moving platen or packer
142 ...Moving through inlet
143 ...Plural transversely moving platens
144 CONCURRENT PRESSING AND CONVEYING
145 .Helix type compressor
146 ..Right and left helices
147 ..Overload release (yieldable choke)
148 ..With valve or choke adjustment
149 ..Detachable choke
150 ..Helix interengaging abutment
151 .Endless conveyer type
152 ..With conveyer charging or discharging means
153 ..Co-acting presser roll
154 ..With intermediate backup device
155 R .Roll type
155 G ...Glass making
156 ..Non-rotary co-acting press element
157 ..External and internal rolls
158 R ..Intersecting or inclined roll axes
158 C ....Opposed discs
159 ..Vertical roll axes
160 ..With backing roll
161 ..Plural stage or pass
162 R ...Common roll
162 B .....Roll crown control
163 R ....Yieldable
163 A ......Calendar pressure regulation
164 .....Adjustable line of force
165 .....Differentially
166 ....With turn plate or roll
167 ...Chute or conveyer between stages
168 ...Roll adjustment
169 ...Yieldable
170 ....Fluid pressure
171 ....Spring
172 ...Roll drive
173 ..With material handling or guiding
174 ...Roll strippers
175 ...Roll bearing guards
176 ..Roll pairs
177 .Moving compression chamber
178 ..Platen or piston type
179 .Plunger and casing type
180 ..With successive charge separating means
181 ...Plunger carried separator supply
182 ...Separator series on endless belt
183 ...Pusher inserted
184 ...Separator structure
185 ..Plural compression chambers
186 ...Aligned oppositely conveying
187 ..With material rebound restrainer or tucker
188 R ..With feeding or discharge handling
188 BT ....Bale thrower
189 ...Conveying to or through inlet
190 ..With inlet closure
191 ..Adjustable choke
192 ...Overload relieving (yieldable)
193 PLURAL PRESSES
194 .Stacked boxes or plates
195 ..Plural stacks
196 ..With charging and/or discharging
197 ...Fluent supply
198 ...Cake loosening or ejecting
199 ..With positioning or supporting means
200 ...Link
202 ..Hinged plates
203 ..Box or pot type
204 ...With compression lock
205 ...With openings (e.g., for removing or loosening cake)
206 ...Separable sections
207 .With material transfer from press to press
208 .Concurrently actuated
209 ..Alternately compressing
210 ROLL AND PLATEN
211 WITH FLEXIBLE OR DEFORMABLE PRESSURE SURFACE
212 .Circumferentially tightened loop
213 INTERFITTING CUPS - FRUIT JUICER TYPE
214 RECIPROCATING PRESS CONSTRUCTION
215 .With material depositing means
216 ..Feeder controlled plunger actuation
217 ..Box traversing spreader
218 .With material displacing means (e.g., ejector)
219 .With platen position or compression lock
220 .With material rebound restrainer
221 .Plural or indexing material supports or receptacles
222 ..Belt
223 ..Rotary
224 ..Slidable
225 ..Partitioned or compartmented box
226 .With transversely displaceable piston or movable platen
227 ..Portable receptacle mountable
228 ..Pivoted or detachable beam
229 R .With transversely displaceable box, receptacle or stationary platen
229 A ...Compressing in separable container
230 .Central strain rod type
231 .C-frame type
232 .Plural movable platens on intersecting paths
233 .Oscillatory or hinged platen or piston
234 ..Plier type
235 ...With impaling support for material
236 ..Parallel spaced pairs
237 .Plural movable platens on side by side paths
238 .Combined reciprocating and rotating piston or platen
239 ..Piston advanced by box rotation
240 .Box and piston type
241 ..Piston carried box frame scrapers
242 ..Adjustable size
243 ..Plier type (i.e., plural handles)
244 ..Plural opposing pistons
245 ..Box guided piston
246 ..Movable or removable box section
247 ...Separable box head and box frame
248 ....Insert of false head
249 ....With guided motion
250 .....Pivoted
251 .....Axially slidable
252 ...Separable box frame sections
253 ....Piston operator actuated frame section
254 ....Counterbalanced
255 ....Hinged
256 .Platen tripped stop or reverse
257 .Range of movement adjustment
258 R .Platen level compensating
258 A ...Parallel pressure surfaces
259 .With plunger return cushioning

	RECIPROCATING PRESS CONSTRUCTION
260	.With actuation releasing for rebounding or biased return
261	..Over center releasing
262	..Disengaging rack and pinion
263	..Interruption in rotated camming surface
264	.Opposed platens both actuated
265	.Spring or weight
266	..Return bias
267	...Opposing flexible element actuator
268	..Interposed in actuating mechanism
269 R	.Fluid pressure actuation
269 A	...Inflatable bag to push platen
269 B	...Ram type intensifier
270	..Combined with mechanical actuation
271	...Mechanical force mutiplier
272	....Toggle
273	.Speed or power variable by power path selection
274	.Intermittent actuator
275	..Plural
276	...Acting at opposite ends of cross bar on movable platen
277	...Cross connected alternately acting
278	.Flexible element actuator
279	..Varying radius windlass
280	.With mechanical force multiplier
281	..Transversely forced linkage joint (single toggles here)
282	...Shaft turned cam or crank and pitman
283	...Lever in linkage
284	....Lever carried toothed sector
285	....Plural
286	...Plural toggle joints
287	....Screw and nut between joints
288	..Rack and pinion
289	..Screw and nut
290	...Plural screws
291	..Cam or tapering wedge
292	...Rotary or swinging
293	..Fixed fulcrum lever
294	..Plural oppositely moving struts
295	PLATENS OR PRESSURE SURFACES
296	.Flexibly connected opposed
297	.Porous mats
298	CLOTHS FROM CAKE STRIPPERS

333 .Plug
334 SMOKE GENERATING
335 PYROTECHNICS
336 .Flare
337 ..With parachute
338 ...Multiple flares
339 ...Plural or vane-type parachutes or means to restrain complete initial parachute opening
340 ...With means to eject parachute or flare from casing
341 ..Marine type
342 ..With means to eject flare from casing
343 ..With support means
344 ...Spike form
345 ..With plural, successively ignited flares
346 .Gun-type cartridge
347 .Rocket
348 ..With vane, wings, parachute, or balloon
349 ..With support means
350 ..With means to rotate by gas discharge
351 ..With means to eject object from casing
352 ..Including plural, successively ignited charges
353 .Toy torpedoe
354 .With parachute or balloon
355 .Simulation
356 .Combined
357 .With means to eject an object from a casing
358 .With support means
359 ..Wheel, rotor, or whirler
360 .With plural, successively ignited charges
361 .Firecracker
362 HAVING GROUND PROPULSION MEANS
363 FUEL AIR EXPLOSIVE
364 INCENDIARY
365 .Liquid or jelly
366 OIL DISTRIBUTING
367 GAS OR MIST DISPERSING
368 .Grenade
369 .Drop bomb
370 .Cartridge or projectile
371 BOMB LANCE
372 HAVING RADIALLY DIRECTED PROPELLING HOLES
373 .Including external propellent charge
374 HAVING REACTION MOTOR
375 .Pneumatically self-propelled type
376 .With cartridge means
377 .Having separation means
378 ..Explosive
379 .Having warhead fuse or arming means
380 .Having propellent charge ignitor means
381 .Having pressurization or variable control means for the propellant
382 DROP BOMBS
383 .With laterally directed barrels
384 .With direction controlling means
385 .Fin stabilizer only
386 .With drop-retarding means
387 ..Parachute
388 ..Vane or rotor
389 .Fragmentation
390 .Marine type
391 ..Depth regulation
392 ...Hydrostatic
393 .Cluster type
394 .Rebounding or multiple bursting charges
395 .Practice
396 .Igniting means
397 ..With target contact anticipator
398 NONRECOCHETING PROJECTILE
399 MARINE-TYPE PROJECTILE
400 WITH EXTENDABLE ARMS
401 MINES
402 .Counter measure
403 ..By explosion
404 .Pop-up type
405 .Aerial type
406 .Marine type
407 ..Practice (e.g., drill)
408 ..Flooder means
409 ..Field or group
410 ...With manipulating means
411 ...Laying, anchoring, or manipulating
412 ...Depth regulation
413 ....Anchor cable length
414 ....Hydrostatic pressure
415 ...Antisweep anchorage
416 ..Igniting means
417 ...Magnetic
418 ...Wave responsive
419 ...Electrical
420 ....Including arming means
421 ....Contact type
422 ...Contact type
423 ....Extending firing means
424 .Igniting means
425 ..With position sensing means
426 ..Automatic deactivation or self-destruction
427 ..Electrical, magnetic, wave, or radiant energy actuated
428 ..Pressure actuated
429 ...Spring biased
430 CARTRIDGES
431 .Combustilbe, destructible, or caseless
432 ..Expendable cartridge
433 ..Telescoping powder charge
434 .Telescoping powder charge

CARTRIDGES
435 .Wear reducing additive for barrel
436 .Noncircular projectile or cartridge
437 .Recoilless
438 .Multiple projectiles
439 .Projectile structure
440 .Having liquid/gas propellent means
441 .With projectile and explosive cap
442 .With bore cleaning means
443 .Having divided propelling charge
444 .Practice projectile type
445 ..Mortar
446 ..Cartridge adapter
447 ..Reduced charge
448 .Shot
449 ..Shot container
450 ...Collapsible wad
451 ....Integral wad
452 ...Having integral closure means
453 ...Having integral wad
454 ...Including divided shot charge
455 ...Including filler means in the shot area
456 ...With additional means to keep container closed
457 ..With control of shot spread
458 ..With tracer means
459 ..Including coated shot
460 ..Having shot of different size or shape
461 ..Collapsible wad
462 ..Closure means
463 ...Integral
464 .Case
465 ..Nonmetallic
466 ...Plastic cases
467 ....With metal base or reinforcement
468 ..Iron case
469 ..Breech end structure
470 ...With primer means
471 ....Rim fired
472 ....Electric
473 SHELLS
474 .Continuous rod warhead
475 .Focused or directed detonation
476 ..Shaped charge
477 .With means to form bursting charge after projection
478 .Having divided bursting charge
479 .With bursting charge cushioning means
480 .With laterally directed barrels
481 .With safety means
482 .Grenade
483 ..With gun or other projector engaging or cooperating means
484 ...With bullet passage through grenade
485 ...With bullet stopping means
486 ..With throwing handle, handgrip, or strand
487 ..With igniting means
488 ...Impact-operated
489 .With secondary shells
490 .With range increasing means
491 .Shrapnel
492 ..Focused fragmentation
493 ..Structurally weakened casing
494 ..Multiple fragments
495 ...Casing
496 ...Embedded
497 ....With explosive
498 .Practice
499 .With igniting means
500 ..Axially movable impacting means
501 PROJECTILES
502 .Nonlethal or deterrent
503 .Tubular
504 .Line carrying or filamentary material distributing
505 ..Chaff dispensing
506 .Fragmenting
507 .Dumdum or mushrooming
508 ..With cavity
509 ...Hollow
510 ....With expanding member
511 .Lubricating
512 .Narcotizing
513 .Target marking
514 .Having jacket
515 ..Nonmetallic
516 ..Composite
517 .Composite
518 ..Hardened core within a chamber
519 ..With separate hardened nose
520 ..Sabot or carrier
521 ...Subcaliber
522 ....Base enclosed
523 .....With projectile exposed to propellent gas
524 ..Rifling or driving means (e.g., band)
525 ...Wedge expanded
526 ...Including annular member
527 ....Nonmetallic
528 ...Band protector
529 .Practice or cleaning
530 JACKETED OR CARTRIDGE GAS GENERATOR
531 .For gas-powered tools or means
532 WADS
200 IGNITING DEVICES AND SYSTEMS
201 .Laser or light initiated
202 .Propellant ignitors
202.1 .Accidental fuse ignition prevention means
202.2 ..Having electromagnetic field effects diminishing or elimination means
202.3 ..Fuse device resistive shunt
202.4 ...Voltage responsive variable resistance shunt (e.g., semiconductor shunts)
202.5 .Electrical primer or ignitor
202.6 ..Having an additional ignitor or water destructible fuse
202.7 ..Having an exploding bridgewire
202.8 ..Having a spark gap or conductive composition or charge
202.9 ..With electric terminals
202.11 ..Having an electric matchhead
202.12 ..Assemblies (e.g., packaging)
202.13 ..Having a powder train time delay
202.14 ..With housing
204 .Percussion primers or ignitors
205 .Heat, friction, or chemical primers or ignitors
206 .Ignition or detonation circuit
207 ..Including activated generator
208 ...Turbine
209 ...Magnetic
210 ...Piezoelectric crystal
211 ..Proximity fuze
212 ...Magnetic
213 ...Light or infrared
214 ...Radio wave
215 ..Including logic means
216 ..Including impact or inertia switch
217 ..Plural sequentially fired ignitors or detonators
218 ..Electronic switch discharges capacitor
219 ...Ionized gas, i.e., glow tube or thyratron
220 ...Silicon controlled rectifier
221 .Arming devices
222 ..Blocking or interrupting type
223 ...Fluid pressure operated
224 ....Fluidic device
225 ....Rotating vane
226 .....Rotor or slide release
227 .....Impacting device release
228 ....With or including a timing device

	IGNITING DEVICES AND SYSTEMS
	.Arming devices
	..Blocking or interrupting type
	...Fluid pressure operated
229	....Rotor or slide
230	....Impacting device release
231	...Centrifugal and setback operated
232	....With or including a timing device
233	.....With setback latch
234	....Impacting device release
235	....Rotor or slide with setback release
236	.....Firing pin is latch
237	...Centrifugal operated
238	....With or including a timing device
239	....Latch for impacting device
240	.....Spiral band
241	.....Pivoted weight
242	.....Spring biased piston
243	.....Expanding weight
244	....Rotor or slide
245	.....Centrifugally released latch
246	.....Deceleration released latch
247	...Inertia operated
248	....With or including a timing device
249	.....With setback latch
250	.....Fluent material
251	....Rotor or slide with setback release
252	....Impacting device latch
253	.....Ball and detent
254	...Slide or rotor
255	....Timing device operated
256	....Spring operated
257	...Timer operated impacting device latch
258	...Externally released latch
259	....Bore riding pin
260	....Manually released
261	.....To actuate impacting means
262	..Switch
263	...Vane or fluid pressure operated
264	...Timing device operated
265	.Multiple mode fuzes
266	..Impact and time delay
267	...Spin decay
268	...Mechanical time delay
269	...Power train delay
270	..Mode selecting means
271	...Delay or impact
272	.Impacting devices
273	..Graze or multiangle
274	..Spring driven with latch
275	..With frangible restraint
275.1	.Fuse cord (e.g., blasting cord)
275.2	..With one-way connector or arrangement
275.3	..With combustible time-delay cord connection means
275.4	..To or from connector having booster charge
275.5	..With explosive charge
275.6	..With igniting means
275.7	..With cord holding device to couple cords
275.8	..Detonator cord
275.9	.Fuse
275.11	.Initiating devices
275.12	.Holders for fuse or fuse cord to blasting cartridge, igniting device, or detonator
276	.Time controlled
277	..With fluent material
277.1	..Munition powder train
277.2	...Train length selection means
281	EXPLOSIVE CAPS FOR TOY GUNS
282	PROPELLENT CHEMICAL CHARGE CONTAINER
283	POWDER FORM
284	.Spiral type
285	.Composite type
286	..Having different burning rates
287	...Rocket motor type
288	..Powder grain shape formed of fixed shape segments
289	.Having embedded reinforcing or burning control means
290	.Having burning inhibiting means
291	.Rocket propellent grain
292	.Powder grain

SPECIAL CAR BODIES
.Dumping
..Hopper type
...Longitudinal doors
251 ....Center-sill separator
252 ....Side-chute bridge
253 ...Transverse doors
254 ..Inclined bottom
255 ...Opposite doors
256 ...Side-spout gondola
257 ...Shifting
258 ..Side-door gondola
259 ...Plow car
260 ..Coupled side and bottom
261.1 ..Tilting body
261.2 ...End dumping car
262 ...Inwardly dumping section
263 ...Outwardly dumping section
264 ...Rolling tilt
265 ....With motor
266 ....Worm gear
267 ....Screw
268 ...Cam-track tilt
269 ...Side and tilt
270 ...Pivoted
271 ....With motor
272 ....Off center
273 .....Power hoist
274 .....One-side dump
275 ......Horizontal rotary
276 ...Displaceable sides
277 ....Bodily movable
278 ...Body prop and tie
279 ...Aprons and baffles
280 ..Doors
281 ...Interchangeable hinge
282.1 ...Sliding
282.2 ....Having resilient sealing gasket
282.3 ....Driven by rack and pinion
283 ...Offset pivot
284 ...Link swing
285 ...Buffers
286 ..Door actuators
287 ...Serial and selective
288 ...Multiple door
289 ....Interconnected
290 .....Links
291 ......With hook
292 .....Chains
293 ...Creeping shaft
294 ....Rack and pinion
295 ....Chain wind
296 ...Crank shaft
297 ....Creeping
298 ....U-crank
299 ...Crank and link
300 ...Chain winder
301 ....Creeping-shaft lock
302 ....Tension lock shifter
303 ....Terminal hook
304 ...Toggle or strut
305 ...Rack and pinion
306 ...Lever or chain
307 ...Screw or worm
308.1 ..Having door latch
308.2 ...Toggle
309 ...Shifting-shaft
310 ...Door actuator operated
310.1 ...Bolt pivoted about axis parallel to door plane
310.2 ...Sliding bolt
311.1 ..Control
311.2 ...Lost motion
312 ...Ratchet-handle
313 ...Shaft lock
314 .Sleeping
315 ..Arrangement
316 ..Berths
317 ...Vertically movable
318 ....With hoist
319 ...Collapsible
320 ...Hammock type
321 ...Hinged
322 ...Seat back and upper
323 ..Partitions
324 ..Curtains and rods
325 ..Article holders
326 ..Ladders and steps
327 .Dining
328 .Merchandising
329.1 .Passenger

CLASS 106 COMPOSITIONS, COATING OR PLASTIC

DECEMBER 1990

COATING OR PLASTIC COMPOSITIONS

1.05 .Metal-depositing composition or substrate-sensitizing compositions for metal-depositing compositions
1.11 ..Sensitizing composition
1.12 ..Metal-depositing composition contains mixtures of elemental metal and a metal compound other than solely as a Group IA metal compound
1.13 ...Elemental metal is Group IB (Cu, Ag, Au)
1.14 ....Elemental metal is Ag
1.15 ...Elemental metal is noble metal of Group VIII (Ru, Rh, Pd, Os, Ir, Pt)
1.16 ...Elemental metal is Group IIB (Zn, Cd, Hg) metal
1.17 ....Elemental metal is Zn
1.18 ..Metal-depositing composition contains elemental metal of Group IB (Cu, Ag, Au)
1.19 ...Elemental metal is Ag
1.21 ..Metal composition contains elemental noble metal of Group VIII (Ru, Rh, Pd, Os, Ir, Pt)
1.22 ..Metal-depositing composition contains mixtures of metal compounds other than solely as Group IA metal compounds, e.g., electroless
1.23 ...At least one metal is a Group IB (Cu, Ag, Au) metal
1.24 ...At least one metal is a noble metal of a Group VIII (Ru, Rh, Pd, Os, Ir, Pt) metal
1.25 ..Metal-depositing composition contains polyvalent metal compound
1.26 ...Group IB (Cu, Au) metal
1.27 ...Group VIII metal
1.28 ....Group VIII noble metal (Ru, Rh, Pd, Os, Ir, Pt)
1.29 ...Group IIB (Zn, Cd, Hg) metal
2 .Coating repellent
3 .Polishes
4 ..Protein or derivative containing
5 ..Carbohydrate or derivative containing
6 ..Natural resin or derivative containing
7 ...With fatty oil
8 ..Fat, fatty oil, fatty oil acid or salt thereof containing
9 ...Fatty oil
10 ..Wax, bituminous material or tarry residue containing
11 ..Hydrocarbon containing
12 .Saturating or indurating
13 .Fog, frost or ice preventive
14.05 .Corrosion inhibiting coating composition
14.11 ..Contains water
14.12 ...Phosphorus material
14.13 ...Carboxylic acid, ester, alcohol or sulfur or metal derivative
14.14 ....Inorganic material other than water
14.15 ...Organic nitrogen-containing material, e.g., amine, amide, etc.
14.16 ....Heterocyclic nitrogen-containing material
14.17 .....Inorganic material other than water
14.18 ....Amine salt of carboxylic acid
14.21 ...Inorganic material or elemental component thereof, e.g., S, metal, etc.
14.22 ..Contains animal, vegetable, fish oil or a fraction or derivative thereof
14.23 ...Carboxylic acid, ester, alcohol or metal or sulfur or amine or amide derivative thereof
14.24 ....Carboxylic acid, ester, or amine or amide derivative
14.25 ...Inorganic material or elemental component thereof
14.26 ..Contains petroleum oil or a fraction thereof
14.27 ...Carboxylic acid, ester, alcohol or sulfur or metal derivative thereof
14.28 ....Metal salt of carboxylic acid
14.29 ....Metal salt of sulfonic acid
14.31 ...Organic nitrogen-containing material, e.g., amine, amide, etc.
14.33 ...Inorganic material or elemental component thereof, e.g., S, metal, etc.
14.34 ..Contains wax, bitumen, asphalt, gum, natural resin, varnish, lacquer, or paint
14.35 ...Caboxylic acid, ester, alcohol or sulfur or metal derivative
14.36 ....Metal salt of carboxylic acid
14.37 ...Organic nitrogen-containing material
14.38 ...Organic sulfur-containing material
14.39 ...Inorganic material or elemental component thereof
14.41 ..Contains mixture of at least two organic compounds
14.42 ...Organic nitrogen-containing material
14.43 ...Organic sulfur-containing material
14.44 ..Contains mixture of organic material and at least one inorganic material or elemental component thereof
14.45 ...Elemental S or inorganic sulfur-containing compound
14.5 .Hectographic or copying
15.05 .Contains fireproofing or biocidal agent
16 ..Natural resin or derivative containing
17 ...With fat, fatty oil, fatty oil acid or salt thereof
18 ..Fat, fatty oil, fatty oil acid or salt thereof containing
18.11 ..Contains fireproofing agent
18.12 ...Silicon containing
18.13 ...Boron containing
18.14 ...Phosphorus containing
18.15 ....Nitrogen-containing phosphorus compound
18.16 .....Inorganic compound contains a phosphorus and a nitrogen atom
18.17 .....Contains phosphorus directly bonded to nitrogen
18.18 ....Phosphorus compound is organic
18.19 .....Phosphorus compound which is organic contains halogen
18.2 .....With halogen-containing compound
18.21 ...Nitrogen-containing organic compound
18.22 ....Nitrogen compound contains a sulfur atom
18.23 ...Elemental sulfur or sulfur-containing organic compound
18.24 ...Halogen-containing organic compound
18.25 ....With at least one inorganic material which is other than water
18.26 ...Metal-containing material
18.27 ....Group IIB metal atom (Zn, Cd, Hg)
18.28 ....Group VA metal atom (As, Sb, Bi)
18.29 ..Wax containing
18.3 ..Boron containing
18.31 ..Phosphorus containing
18.32 ..Nitrogen-containing compound
18.33 ...Nitrogen compound contains a sulfur atom
18.34 ..Elemental sulfur or sulfur-containing organic compound
18.35 ..Halogen-containing organic compound
18.36 ..Group IIB metal containing (Zn, Cd, Hg)
19 .Marking
20 ..Inks
21 ...Invisible

	COATING OR PLASTIC COMPOSITIONS
	.Marking
	..Inks
22	...Organic dye containing
23	....With pigment
24	...Protein or derivative containing
25	...Carbohydrate or derivative containing
26	....Cellulose or derivative
27	...Fat, fatty oil, fatty oil acid or salt thereof containing
28	....Fatty oil
29	.....With natural resin or derivative
30	...Natural resin or derivative containing
31	...Wax, bituminous material or tarry residue containing
32	...Hydrocarbon containing
32.5	.Erasable surface
33	.Leak stopping
34	.Stains
35	.Dental
36	.Tractive or friction surface
37	.Sound recording
38	.Shoe filling
38.2	.Molds and mold coating compositions
38.22	..Compositions for coating and lining molds
38.23	...Carbohydrate or derivative containing
38.24	...Fat, fatty oil, fatty oil acid or salt thereof containing
38.25	...Wax, bituminous or resinous material or tarry residue containing
38.27	...Inorganic materials only
38.28	....Elemental carbon containing
38.3	..Alkali metal silicate or inorganic settable ingredient containing
38.35	...With organic material
38.4	..Protein or derivative containing
38.51	..Carbohydrate or derivative containing
38.6	..Natural resin or derivative containing
38.7	..Fat, fatty oil, fatty oil acid or salt thereof containing
38.8	..Wax, bituminous material or tarry residue containing
38.9	..Inorganic materials only
600	.Alkali metal silicate containing
601	..Pore forming or product thereof
602	...Perlite, slag, ash or ceramic material
603	...Organic material containing
604	...Process employing steam, electrical, magnetic or wave energy or product thereof or specified particle size or shape
605	..Hollow, foam, cellular or porous materials containing
606	..Portland type cement containing
607	...Soil, diatomaceous earth or clay containing or material for treating soil or earth, (e.g., soil stabilization, etc.)
608	...Organic material containing
609	....Carbohydrate containing
610	..Natural resin containing (e.g., rosin, shellac, turpentine, tall oil, etc.)
611	..Calcium sulfate containing
612	..Lime containing
613	...Organic material containing
614	..Protein containing
615	...Carbohydrate containing
616	...With other organic material
617	..Carbohydrate containing
618	...Cellulose
619	....Wood, paper, or paper pulp
620	..Higher fatty acid or ester, amide or salt thereof containing
621	...With other organic material or asbestos
622	..Wax, paraffin, oil shale, or bituminous material containing (e.g., asphalt, pitch, tar, etc.)
623	..Free metal or alloy containing
624	..Ash, slag, slag wool, rock wool, mineral wool, asbestos, or organic garbage or sewage material containing
625	...Asbestos containing
626	..Mica, elemental carbon, zeolite or talc containing
627	..Sulfur containing (e.g., alum, etc.)
628	..Boron containing
629	..Phosphorus containing
630	...Organic material containing
631	..Perlite, rock, stone, shale, slate, flint, granite, feldspar or limestone containing
632	..Clay containing
633	..Soil or diatomaceous earth containing, or material for treating soil or earth (e.g., soil stabilization, etc.)
634	..Organic material containing
635	..Zirconium, titanium, zinc, lead, iron, or tin compound containing (Zr, Ti, Zn, Pb, Fe, Sn)
636	..Particle size specified
637	..Fluorine containing
638	.Inorganic settable ingredient containing
639	..For use underwater
640	..Free metal or alloy containing (e.g., dust, powder, etc.)
641	...Aluminum
642	....Organic material containing
643	...Iron or steel
644	....Fiber bar or wire containing
645	..Protein containing (e.g., glue, gelatine, albumin, blood, etc.)
646	...Hollow, foam, cellular or porous material
647	...Soil, diatomaceous earth, clay, rock, stone, granite, flint, slate, shale, or material for treating soil or earth (e.g., soil stabilization, etc.)
648	....With organic material other than protein
649	...Cereal grain or derived therefrom or vegetable flour or meal (e.g., gluten, corn flour, rice, rye, etc.)
650	...Calcium sulfate containing
651	....With organic material other than protein
652	.....Carbohydrate
653	......Plant or vegetable fiber (e.g., wood, sawdust, etc.)
654	....Portland type cement, slag, talc, mica, asbestos, ash, or alum containing
655	...With organic material other than protein
656	....Carbohydrate
657	..Natural resin containing (e.g., shellac, turpentine, balsam, copal, etc.)
658	...Calcium sulfate, aluminous or oxy salt type cement
659	...Rosin or tall oil (e.g., colophony, etc.)
660	..Wax containing (e.g., petroleum wax, beeswax, montan wax, carnauba wax, spermaceti, etc.)
661	..Higher fatty acid or ester, amide or salt thereof containing (e.g., fish oil, vegetable oil, soap, etc.)

COATING OR PLASTIC COMPOSITIONS

.Inorganic settable ingredient containing
..Higher fatty acid or ester, amide or salt thereof containing (e.g., fish oil, vegetable oil, soap, etc.)
662 ...Soil, diatomaceous earth, shale, slate or clay, containing, or material for treating soil or earth (e.g., soil stabilization, etc.)
663 ...Linseed oil or tallow containing
664 ...Portland type cement containing
665 ...With other organic material
666 ...Stearic acid or derivative
667 ...Lime containing
668 ..Bituminous material or tarry residue, pitch, or coal containing
669 ...Soil, diatomaceous earth, or clay, containing, or material for treating soil or earth (e.g., soil stabilization, etc.)
670 ...Calcium sulfate containing
671 ...With other organic material
672 ..Hollow, foam, cellular or porous material containing or method of forming cellular or porous product
673 ...Peroxide or hypochlorite containing
674 ...Carbohydrate containing
675 ...Perlite or vermiculite containing (e.g., jeffersite, etc.)
676 ...Glass containing
677 ...Organic material containing
678 ....Organic sulfur or organic phosphorus
679 ...Slag, cinder or ash containing
680 ...Calcium sulfate containing (e.g., anhydrite, plaster of Paris, gypsum, etc.)
681 ...Soil, diatomaceous earth, clay, shale, slate or rock material containing or material for treating soil or earth (e.g., soil stabilization, etc.)
682 ...Physical introduction of gas (e.g., by mixing, agitation, injection, whipping, etc.)
683 ..Oxy salt type cement
684 ...Soil, diatomaceous earth, clay, slate or shale containing or material for treating soil or earth (e.g., soil stabilization, etc.)
685 ...Magnesium oxy-chloride (e.g., Sorel cement, etc.)
686 ....Organic material containing
687 .....Carbohydrate (e.g., cellulose, etc.)
688 ....Specified filler, dye or pigment (e.g., silica, feldspar, carbon, talc, asbestos, slag, mineral wool, etc.)
689 ...Organic material or specified filler
690 ..Phosphate based cement
691 ...Specified filler or organic material containing
692 ..Aluminous cement (e.g., high alumina, calcium aluminate, etc.)
693 ...Cement clinker preparation
694 ...Soil, diatomaceous earth, clay, shale, slate, or rock-type material containing or material for treating soil or earth (e.g., soil stabilization, etc.)
695 ...With other cement material (e.g., Portland, calcium sulfate, etc.)
696 ...Organic material containing
697 ..Organic garbage, refuse sewage, or waste material containing or treating (other than sulfite waste liquor)
698 ..Perlite containing
699 ..Asbestos containing (e.g., amosite, chrysotile, etc.)
700 ...Slag, ash or organic material containing
701 ....Calcium sulfate containing (e.g., gypsum, plaster of Paris, anhydrite, etc.)
702 ...Soil, diatomaceous earth, clay, slate, shale or rock containing or material for treating soil or earth (e.g., soil stabilization, etc.)
703 ...Portland type cement
704 ...Lime containing
705 ..Ash containing (e.g., fly ash, volcanic ash, coal ash, etc.)
706 ...Soil, diatomaceous earth, clay, shale, slate or rock containing or material for treating soil or earth (e.g., soil stabilization, etc.)
707 ...With slag, coke, cinder, stack dust, kiln dust or flue dust
708 ...Organic material containing
709 ...Portland type cement
710 ...With additional lime
711 ..Mineral fibers or glass fibers containing (e.g., slag wool, cotton wool, mineral wool, rock wool, etc.)
712 ..Color additive (other than whitener)
713 ..Portland type cement
714 ...Slag containing (e.g., blast furnace slag, etc.)
715 ....Calcium sulfate specified (e.g., gypsum, anhydrite, plaster of Paris, etc.)
716 ...With mica, talc, cinder, glass, vermiculite, coke breeze or kiln dust
717 ...Boron, elemental carbon or phosphorus containing
718 ...Soil, diatomaceous earth, clay, slate or shale, containing or material for treating soil or earth (e.g., soil stabilization, etc.)
719 ....Organic material containing
720 .....Carbohydrate
721 ....Silica or lime added
722 ....Calcium sulfate specified (e.g., gypsum, anhydrite, plaster of Paris, etc.)
723 ...Process involving steam, electrical, magnetic or wave energy, vibration or vacuum or product thereof
724 ...Organic material containing
725 ....Organic sulfur compound
726 .....Cellulose or silica containing (e.g., sand, etc.)
727 ....Organic nitrogen compound
728 ....Carboxylic acid, ester or salt thereof
729 ....Carbohydrate
730 .....Starch, dextran, cellulose ether or gum
731 .....Plant material (e.g., vegetable fiber, wood, etc.)
732 ....Calcium sulfate specified (e.g., gypsum, anhydrite, plaster of Paris, etc.)
733 ...Titanium, vanadium, chromium, molybdenum, tungsten, manganese, iron, copper, zinc, tin or lead compound containing (Ti, V, Cr, Mo, W, Mn, Fe, Cu, Zn, Sn, Pb)
734 ...Halogen containing (F, Cl, Br, I)
735 ...Calcium sulfate specified (e.g., gypsum, anhydrite, plaster of Paris, etc.)
736 ...Sulfur containing (e.g., alum, etc.)

COATING OR PLASTIC COMPOSITIONS
.Inorganic settable ingredient containing
..Portland type cement
737 ...Silica containing (e.g., sand, quartz, etc.)
738 ...Rock, gravel, stone or carbonate containing (e.g., limestone, dolomite, etc.)
739 ...Portland type cement per se (e.g., clinker preparation, etc.)
740 ....Process involving spray drying, atomizing of solid material, steam, nonatmospheric pressure, cleaning step or avoiding contamination of equipment
741 ....Color control or modification (e.g., steps to produce white cement, etc.)
742 .....Cooling in reducing atmosphere
743 ....Control of a parameter of operation in response to a measurement or test or to vary a result in a process
744 ....Employment of a fluidized bed
745 ....Waste material employed as raw material or fuel (not kiln dust)
746 ....Electrical, magnetic or wave energy employed (e.g., electric arc, etc.)
747 ....Use of heat transmitting or conducting solid material for cooling solid material from gas or for modifying temperature of solid material
748 ....Aftertreatment of clinker
749 .....Refire or recalcine clinker
750 .....Specified cooling (e.g., recycling heated coolant, etc.)
751 ....Involving kiln dust (e.g., recovery, treatment, processing thereof or product, etc.)
752 ....Treatment or removal of alkali, sulfurous or chloride impurities from raw material or fuel
753 ....Agglomerate, pellet, molded or shaped form of raw material
754 .....Sheet, film, layered, brick, briquette, block, fiber, strand, cake or egg-shape
755 .....Fuel containing
756 ....Classifying, sorting, separating, screening, sizing, grading or subdividing solid material (e.g., centrifugal separation, flotation, etc.)
757 ....Comminuting or grinding, other than nominal, of raw material or fuel (e.g., to desired size or relative sizes, etc.) or recited particle of specified size
758 ....Raw material and fuel premixed or specified fuel
759 ....Flow of gases to produce turbulence (e.g., spiral, helical, Venturi, centrifugal, etc.)
760 ....Shape, angle, intensity or condition of fuel or flame specified (e.g., jet, oscillating, plural streams, spray, temperature, etc.)
761 ....Recycling exhaust gas, reusing heat from process, or purifying exhaust gas
762 .....Processing of exhaust gas prior to recycling (e.g., purifying, separating constituents, etc.)
763 ....Ash containing raw material
764 ....Organic material or sea shell containing raw material
765 ....Calcium sulfate containing raw material
766 ....Phosphorus, boron, chromium, molybdenum, vanadium, or nickel containing raw material (P, B, Cr, Mo, V, Ni)
767 ....Slag containing raw material
768 ....Potassium, halogen or sulfur containing raw material (K, F, Cl, Br, I, S)
769 ....Iron or manganese containing raw material (Fe, Mn)
770 ....Slurry employed
771 ....Preprocessing or processing of raw material before firing (e.g., preheating, etc.)
772 ..Calcium sulfate (e.g., gypsum, anhydrite, plaster of Paris, etc.)
773 ...Soil, diatomaceous earth, clay, slate or shale, containing or material for treating soil or earth (e.g., soil stabilization, etc.)
774 ....Organic material containing
775 ...Anhydrous calcium sulfate (e.g., anhydrite, etc.)
776 ....Organic material or slag containing
777 ....Keene's cement
778 ...With organic material
779 ....Carbohydrate
780 .....Cellulose (e.g., wood, cork, bark, etc.)
781 ....Silicon, sulfur, nitrogen or phosphorus containing organic material
782 ...Slag, cinder, mica, talc, glass, boron or elemental carbon containing
783 ...Layered or coated material, nominal molding or shaping, or other physical process (e.g., steam, electrical, magnetic or wave energy, manipulative steps, etc.)
784 ...Particle size specified
785 ...Stabilizer, retarder, or setting agent specified
786 ...By-product gypsum (e.g., phosphogypsum, etc.)
787 ...Alum or halogen containing
788 ...Silica containing (e.g., sand, quartz, etc.)
789 ..Slag
790 ...Organic material, soil, diatomaceous earth, clay, slate, shale, or rock-type material containing or material for treating soil or earth (e.g., soil stabilization, etc.)
791 ...Lime containing
792 ..Lime
793 ...Soil, diatomaceous earth, clay, slate or shale, containing or material for treating soil or earth (e.g., soil stabilization, etc.)
794 ....Organic material or halogen containing
795 ...Organic material containing
796 ...Silica-lime mixtures
797 ....Fiber containing or step of molding or shaping of material
798 ....Iron, sulfur or aluminum containing (e.g., alum, etc.)
799 ...Aluminum or sulfur containing (e.g., alum, etc.)
800 ...Magnesium compound containing (e.g., quicklime, dolomite, talc, etc.)
801 ..Magnesium compound (e.g., vermiculite, talc, soapstone, dolomite, etc.)

COATING OR PLASTIC COMPOSITIONS
.Inorganic settable ingredient containing
802 ..Organic material containing
803 ...Soil, diatomaceous earth, clay, slate or shale containing, or material for treating soil or earth (e.g., soil stabilization, etc.)
804 ...Carbohydrate containing
805 ....Cellulose or plant material
806 ...Organic silicon, organic boron or organic phosphorus
807 ...Mineral oil or hydrocarbon oil
808 ...Organic nitrogen
809 ...Organic sulfur
810 ...Organic acid or derivative
811 ..Soil, diatomaceous earth, clay, slate or shale containing, or material for treating soil or earth (e.g., soil stabilization, etc.)
812 ...With added silica (e.g., sand, etc.)
813 ..Synthetic zeolite or so-called mineral polymer containing
814 ..Mica, cinder, glass or elemental carbon containing
815 ..Boron, sulfur, or halogen containing (e.g., alum, etc.)
816 ..Particle size specified
817 ..Rock, stone, gravel, trass, shell or carbonate containing (e.g., limestone, etc.)
818 ..Process involving a temperature of zero degrees C. or below
122 .Pore forming
123.1 .Cellulose liberation liquor containing
123.2 ..Tall oil
124 .Protein or derivative containing
125 ..Gelatine, glue or derivative
126 ...With carbohydrate or derivative
127 ....Cellulose or derivative
128 .....Cellulose ether or ester
129 ....Gum or derivative
130 ....Starch or derivative
131 ...With fat, fatty oil, fatty oil acid or salt thereof
132 ....Fatty oil
133 ...With natural resin or derivative
134 ...With wax, bituminous material or tarry residue
135 ...With solvent or dispersing medium
136 ...With flux or plasticizer
137 ...With filler, dye or pigment
138 ..Casein or derivative
139 ...With carbohydrate or derivative
140 ....Cellulose or derivative
141 .....Cellulose ether or ester
142 ...With fat, fatty oil, fatty oil acid or salt thereof
143 ....Fatty oil
144 ...With natural resin or derivative
145 ...With wax, bituminous material or tarry residue
146 ...With solvent or dispersing medium
147 ...With flux or plasticizer
148 ...With filler, dye or pigment
149 ..Prolamine or derivative
150 ...With carbohydrate or derivative
151 ....Cellulose or derivative
152 ...With wax, bituminous or resinous material or tarry residue
153 ...With flux, solvent or dispersing medium
154.1 ..Seed protein or derivative
155 ..Feathers, hair or leather
156 ...With wax, bituminous or resinous material or tarry residue
157 ..With carbohydrate or derivative
158 ...Cellulose or derivative
159 ..With fat, fatty oil, fatty oil acid or salt thereof
160 ..With wax, bituminous or resinous material or tarry residue
161 ..With flux, solvent or dispersing medium
162 .Carbohydrate or derivative containing
163.1 ..Cellulose or derivative
164 ...Viscose
165 ....Spinning solutions
166 .....With delustering agent
167 ...Cuprammonium cellulose
168 ...Regenerated cellulose
169 ...Cellulose ether or ester
170 ....Emulsions
171 ....With fat, fatty oil, fatty oil acid or salt thereof
172 .....With natural resin or derivative
173.1 ....With natural resin or derivative
174 ....With terpene or derivative
175 .....With ether, ester or alcohol
176 ....With heterocyclic compound
177 ....With phosphorus containing compound
178 ....With carboxylic acid, salt or ester thereof (except wax)
179 .....Ether group containing
180 .....Polyhydric alcohol ester
181 .....Polycarboxylic acid, salt or ester thereof
182 .....Oxo- or oxy-acid or ester thereof
183 .....Lower fatty acid or ester thereof
184 ......With aldehyde or ketone
185 ......With ether or alcohol
186 ....With amine or amide
187 ....With aldehyde or ketone
188 ....With ether
189 ....With alcohol or phenol
190 ....With halogen containing carbon compound
191 ....With hydrocarbon, wax, bituminous material or tarry residue
192 ....With delustering agent
194 ....With metal salt
195 ....Cellulose nitrate
196 ....Cellulose acetate
197.1 ....Cellulose ether
197.2 .....Carboxymethyl cellulose
198 ....Processes

****

199 ...With fat, fatty oil, fatty oil acid or salt thereof
200 ...With natural resin or derivative
201 ...With wax
202 ...With bituminous material or tarry residue
203 ...With solvent or dispersing medium
204 ...With filler, dye or pigment
204.1 ...Cork
205 ..Carbohydrate gum
206 ...With fat, fatty oil, fatty oil acid or salt thereof
207 ...With wax, bituminous or resinous material or tarry residue
208 ...With solvent or dispersing medium
209 ...With filler, dye or pigment
210 ..Starch containing
211 ...With fat, fatty oil, fatty oil acid or salt thereof
212 ...With wax, bituminous or resinous material or tarry residue
213 ...With solvent or dispersing medium
214 ...With filler, dye or pigment

COATING OR PLASTIC COMPOSITIONS
.Carbohydrate or derivative containing
215 ..With fat, fatty oil, fatty oil acid or salt thereof
216 ..With wax, bituminous or resinous material or tarry residue
217 ..With filler, dye or pigment
218 .Natural resin or derivative containing
219 ..With fat, fatty oil, fatty oil acid or salt thereof
220 ...Fatty oil
221 ....Two or more kinds of fatty oil
222 ....Drying oil
223 .....With sulfurizing or sulfonating agent
224 .....With wax
225 .....With bituminous material or tarry residue
226 .....With terpene or derivative
227 .....With hydrocarbon
228 .....With filler, dye or pigment
229 ....With wax, bituminous material or tarry residue
230 ..With wax
231 ...Ester type wax
232 ..With bituminous material or tarry residue
233 ...With sulfurizing or sulfonating agent
234 ...With hydrocarbon
235 ...With filler, dye or pigment
236 ..With solvent or dispersing medium
237 ...Alcohol containing
238 ...Water containing
239 ...Hydrocarbon containing
240 ..With flux
241 ..With filler, dye or pigment
242 ...Fibrous
243 .Fat, fatty oil, fatty oil acid or salt thereof containing
244 ..Fatty oil
245 ...With wax
246 ...With bituminous material or tarry residue
247 ....With sulfurizing or sulfonating agent
248 ....With filler, dye or pigment
249 ...With sulfurizing or sulfonating agent
250 ...Two or more kinds oil
251 ....With filler, dye or pigment
252 ...Drying oil
253 ....With filler, dye or pigment
254 .....Zinc compound
255 ......Lithopone
256 .....Lead compound
257 ......White lead
258 ......Red lead
259 .....Iron compound
260 .....Calcium compound
261 .....Carbonaceous
262 .....Pigment treatment
263 ....With preserving or stabilizing agent
264 ....With drier
265 ....With hydrocarbon
266 ...With filler, dye or pigment
267 ...With hydrocarbon
268 ..With wax
269 ..With bituminous material or tarry residue
270 .Wax containing
271 ..With solvent or dispersing medium
272 ..With filler, dye or pigment
273.1 .Bituminous material or tarry residue
274 ..With sulfurizing or sulfonating agent
275 ...With filler, dye or pigment
276 ..Rock asphalt
277 ..Bituminous emulsion
278 ..With solvent or dispersing medium
279 ..With flux
280 ...With filler, dye or pigment
281.1 ..With filler, dye or pigment
282 ...Fibrous
283 ...Water containing
284 ...Coal tar or pitch containing
284.1 ..Phosphorus containing
284.2 ..Halogen containing
284.3 ..Metal compound containing
284.4 ..Nitrogen containing
284.01 ...Specified particle or screen-mesh size stated
284.02 ...Heavy metal or aluminum containing
284.03 ...Alkali or alkaline earth metal containing
284.04 ....Lime, limestone or chalk containing
284.05 ...Elemental carbon containing
284.06 ...Nitrogen containing
285 .Hydrocarbon containing
286.1 .Inorganic materials only containing at least one metal atom
286.2 ..Containing two or more diverse metal atoms in a single compound
286.3 ..Fe or Co containing
286.4 ..Group IV metal atom (Ti, Zr, Hf, Ge, Sn, or Pb) containing
286.5 ..Aluminum containing
286.6 ..Group II metal atom (Be, Mg, Sr, Ca, Ba, Ra, Zn, Cd, or Hg) containing
286.7 ..Group I metal atom (Li, Na, K, Rb, Cs, Fr, Cu, Ag, or Au) containing
286.8 .Inorganic materials only
287.1 .Silicon containing other than solely as silicon dioxide or as part of an aluminum-containing compound
287.11 ..N-containing Si compound
287.12 ..-OH bonded directly to Si atom
287.13 ..C bonded directly to Si atom
287.14 ...H or alkyl directly bonded to Si
287.15 ...C radical bonded to Si is unsaturated
287.16 ..Si-O-C bonded compound
287.17 .Aluminum compound containing
287.18 .Heavy metal compound containing
287.19 ..Group IVA or IVB (Ti, Zr, Hf, Ge, Sn, Pb)
287.2 .Heterocyclic (only N, O, S, Se, Te)
287.21 ..Two hetero ring atoms
287.22 ..Epoxy ring containing
287.23 .O-containing organic compound
287.24 ..Carbonyl group containing
287.25 ...N containing
287.26 ..Hydroxy group containing or alcoholate
287.27 .Halogen containing
287.28 ..Organic halide
287.29 .Phosphorus or nitrogen containing
287.3 ..Nitrogen containing
287.32 .Sulfur containing
287.34 .Silicon dioxide containing
287.35 .Miscellaneous

MATERIALS OR INGREDIENTS
400 .Pigment, filler, or aggregate compositions, e.g., stone, shale, pebbles, rock, etc.
401 ..Composition contains identified material other than water
402 ...Lake containing
403 ...Elemental metal or alloy containing
404 ....Aluminum containing
405 ...Fly ash, coal ash, or bottom ash or derived therefrom
406 ...Cork, bark, vegetable shell, hull or cob or material derived therefrom
407 ...Organic refuse or waste material containing or derived therefrom
408 ...Alkali blue pigment containing
409 ...Hollow, porous or foam particle containing
410 ...Phthalocyanine or derivative containing

MATERIALS OR INGREDIENTS
.Pigment, filler, or aggregate compositions, e.g., stone, shale, pebbles, rock, etc.
..Composition contains identified material other than water
...Phthalocyanine or derivative containing
411 ....Mixed phthalocyanines or derivatives
412 ....Special process of milling, grinding, comminuting, plural stage or zone mixing or product
413 ....With organic compound
414 ...Ultramarines, e.g., ultramarine green, etc.
415 ...Mica, shell, scale, platelet, or lamellate
416 ....Clay containing or derived therefrom
417 ....Mica containing
418 .....Iron or bismuth compound containing (Fe or Bi)
419 ...Zinc compound containing (Zn)
420 ....Zinc sulfide containing
421 .....Lithopone (zinc sulfide + barium sulfate)
422 ......Metal compound other than barium or zinc containing
423 ......Subsequent treatment or product thereof
424 .....Calcium compound containing
425 ....Zinc oxide containing
426 .....Aluminum compound or silicon containing, e.g., clay, etc.
427 .....Sulfur or phosphorus containing
428 .....Titanium compound containing
429 .....Organic material containing
430 ....Titanium compound containing
431 ....Silicon or aluminum compound containing
432 ...Lead compound containing, e.g., litharge, etc. (Pb)
433 ....Lead chromate containing, e.g., molybdate orange, chrome yellow, etc.
434 .....Silicon containing
435 ....Silicon containing
436 ...Titanium compound containing (Ti)
437 ....Oxidation of titanium tetrahalide or product
438 ....Zirconium compound containing (Zr)
439 ....Iron, tungsten, molybdenum, or cerium compound containing (Fe, W, Mo, Ce)
440 ....Nickel, cobalt, copper, or cadmium compound containing (Ni, Co, Cu, Cd)
441 ....Antimony, chromium, arsenic, or tin compound containing (Sb, Cr, As, Sn)
442 ....Aluminum compound or silicon containing
443 .....Phosphorus containing
444 .....Alkali or alkaline earth metal containing
445 .....Organic material containing
446 .....Silicon containing
447 ....Organic material containing
448 .....Organic nitrogen containing material
449 ....Alkali or alkaline earth metal containing
450 ...Zirconium compound containing (Zr)
451 ....Vanadium or praseodymium containing (V, Pr)
452 ...Cadmium compound containing (Cd)
453 ...Chromium compound containing (Cr)
454 ....Silicon containing
455 ...Antimony containing (Sb)
456 ...Iron compound containing (Fe)
457 ....Silicon containing, e.g., slag, turkey umber, Fullers earth, etc.
458 ....Compound containing carbon triple bonded to nitrogen, e.g., prussian blue, iron blue, etc.
459 ....With other metal compound
460 ....Organic material containing
461 ...Alkaline earth metal compound containing, other than glass, e.g., ettringite, gypsum, barium sulfate, anhydrite, etc.
462 ....Phosphorus or boron containing
463 ....Carbonate containing
464 .....Calcium containing, e.g., calcite, dolomite, chalk, whiting, etc.
465 ......Organic material or silicon containing
466 ....Soil or inorganic silicon compound containing, e.g., granite, chrysotile, asbestos, etc.
467 .....Aluminum compound containing, e.g., zeolites, perlite, etc.
468 ......Clay or material derived from clay containing, e.g., bentonite, montmorillonite, etc.
469 .....Talc, e.g., soapstone, etc.
470 .....Calcium silicate, e.g., dicalcium silicate or silicate hydrate, tobermorite, wollastonite, etc.
471 ....Organic material containing
472 ...Elemental carbon containing, e.g., carbon black, etc.
473 ....Sulfur containing, treatment therewith or product
474 ....Metal compound containing
475 ....Silicon containing
476 ....Organic material containing, e.g., wax, paraffin, etc.
477 .....Fat, oil, higher fatty acid or derivative, e.g., tallow, mineral oil, essential oils, salts, amides and esters of fatty acids, soap, etc.
478 ....Oxidation of carbon black or product thereof, e.g., treating of carbon black to increase volatile content or to lower pH, etc.
479 ...Bismuth, vanadium, molybdenum, or tungsten compound containing (Bi, V, Mo, or W)
480 ...Cobalt, nickel, or copper compound containing (Co, Ni, or Cu)
481 ...Silicon containing
482 ....Inorganic silicon compound, e.g., diatomaceous earth, soil, glass, sand, etc., or material derived therefrom
483 .....Aluminum compound containing, e.g., feldspar, mullite, etc.
484 ......Special process of milling, grinding, crushing or comminuting or product
485 ......Special process of pelletizing or agglomerating or product
486 ......Clay or material derived therefrom containing
487 ....Organic material containing
488 ....Bleaching treatment or product
489 .....Glass containing
490 .....Organic silicon material containing
491 .....Organic material containing
492 .....Treatment of alkali silicate with mineral acid or product
493 ...Organic pigment containing
494 ....Mixed pigments containing
495 .....Quinacridone pigment or derivative
496 ....Pigment containing -N=N- group

MATERIALS OR INGREDIENTS
.Pigment, filler, or aggregate compositions, e.g., stone, shale, pebbles, rock, etc.
..Composition contains identified material other than water
...Organic pigment containing
497 ....Quinacridone pigment or derivative
498 ....Ring containing atom other than carbon
499 ...Organic material containing
500 ....Rosin, natural resin or derivative, e.g., shellac, dammar, colophony, turpentine, etc.
501 ....Carbohydrate, protein, gum, or lignin, e.g., pectate alginate, albumin, glue, etc.
502 ....Wax, paraffin, bituminous material, asphalt, oil shale, tar or pitch containing
503 ....Sulfur or phosphorus containing
504 ....Fatty, oil, higher fatty acid or derivative e.g., tallow, mineral oil, essential oils, salts amides and esters of higher fatty acids, soaps, etc.
505 ....Carboxylic acid or derivative, e.g., tannin, etc.
506 ....Ring containing atom other than carbon
310 .Driers
311 .Vehicles or solvents
312 .Opacifiers for enamels
313 .Ceramic fluxes
819 .Additive materials for inorganic cements which contain a hydraulic settable material
820 ..Expanding, foaming or porosity producing additive
821 ..Protein containing additive
822 ..Wax, tallow, oil, natural resin or higher fatty acid or salt, amide, or ester thereof containing additive (e.g., rosin, tall oil, hydrocarbon oil, etc.)
823 ..Organic material containing additive (e.g., carbohydrate, bituminous material, etc.)
316 .Miscellaneous

CLASS 108 HORIZONTALLY SUPPORTED PLANAR SURFACES

DECEMBER 1990

1	TILTABLE SURFACES
2	.Biased
3	.Sectional
4	.About plural axes
5	.With horizontal adjustment
6	.Pivotally adjustable about horizontal axis
7	..Mechanical actuator tilts surface
8	..Oppositely tiltable with respect to horizontal plane
9	..Surface adjusting link spaced from axis
10	...Vertically adjustable axis
11	CONVERTIBLE
12	.Reorientatable support
13	.Alternately usable surfaces
14	.Receptacle
15	.Vertical surface
16	.Rack support
17	.Multiplanar to coplanar position
18	.Support becomes inoperative
19	..Alternately usable legs
20	POWER DRIVEN
21	.Intermittent drive
22	.Along circuitous path
23	WITH ILLUMINATION MEANS
24	WITH DRAIN
25	WITH RECEPTACLE
26	.Detachable or relatively movable
26.2	..Inkwell
27	WITH PERIPHERAL GUARD
28	WITH DIVERSE SUPPORT FOR ARTICLES
29	.Rod or bar
30	..Hook
31	..Superposed
32	.Inclined surface
33	WITH HOUSING
34	.Formed by collapsible surface
35	..Surface and support pivotally interconnected
36	...Paired legs
37	.Counterbalanced surface
38	.Surface forms closure
39	.Surface adjusts to plural operative positions
40	.Surface slidably hinged to housing wall
41	.Formed from support
42	WITH STRUCTURAL INSTALLATION
43	.Body related
44	.Vehicle supported
45	..Instrument panel
46	..Support enters window recess
47	.On top and side of upright wall
48	.Having wall and floor relationship
49	.Bed supported
50	COMBINED
51.1	INDUSTRIAL PLATFORM
51.3	.Formed from folded semi-rigid material (e.g., cardboard, etc.)
52.1	.Handler entry between load and support
53.1	.Stacking
53.3	..Nesting
53.5	..Tiering
54.1	.Adjustable
55.1	.With load-confining means
55.3	..Support surface having article engaging projection or recess
55.5	..Means for receiving load hold down means
56.1	.Knockdown or setup
56.3	..Support element attachable to or separable from support surface
57.1	.Invertible
59	PLURAL RELATED HORIZONTAL SURFACES
60	.With partition
61	..Horizontally adjustable
62	.Invertible surface
63	..Superposed sections convert to coplanar sections
64	.Laterally connected individual units
65	.Coplanar extension surface
66	..Circular segment
67	..Flexible material or hingedly interconnected slats or panels
68	...Guided in arcuate path
69	..End leaf
70	...Surface lowers into coplanar position with leaf
71	...Elevating mechanism
72	....Link
73	....Cam and slide
74	.....Also moves principal surface
75	.....Cam slot
76	...Elevatable
77	...Drop leaf
78	....Leaf supports moves in plane parallel to primary surface
79	.....Supports includes leg
80	....Diagonal brace
81	.....Toggle-type
82	.....With trip mechanism
83	..Intermediate leaf
84	...Elevating mechanism
85	....Responsive to end section movement
86	...Concealed in stored position
87	...With equalizer for opposed end section movement
88	...Divided pedestal supports end sections
89	...End sections secured mutually or to insert
90	.Detachable enlarging or substitute surface
91	.Nested or stacked units
92	.Terraced
93	..One surface concealed beneath another surface
94	..Rotatable
95	...Vertically adjustable
96	..Vertically adjustable
97	..Detachable surface clamped to stationary surface
98	...Clamping leg
99	..Folding
100	...Opposite edges of surfaces vertically aligned
101	..With separable components
102	.Horizontally adjustable
103	..Rotatable about vertical axis
104	...Inner section rotates relative to fixed outer section
105	...Vertically adjustable
106	.Vertically adjustable
107	..Removably mountable in plural positions
108	...Cantilever support
109	....Support members face each other
110	...Interlocked with surface configuration of support
111	.With separable or folding components
112	..Hingedly sectioned surface
113	...Leg and surface sections collapse concurrently
114	..Laterally interconnected coplanar surfaces
115	FOLDING
116	.With vertical adjustability
117	..Sliding pivot connects surface and support
118	.Mutually pivoted crossed legs supports surface
119	..Surface pivoted to one, separably supported on other
120	..Sliding pivot connects surface and leg

FOLDING
121 .All legs pivot toward common surface edge
122 ..On common axis
123 ..Conjointly actuated by interconnected brace
124 .Surface separably supported by means spaced from fixed pivot
125 .Legs pivot perimetrically of surface
126 ..Conjointly
127 .Legs pivotally converge toward surface center
128 .Folding arms support surface
129 .Legs fold axially parallel to surface edges
130 ..Paired legs conjointly actuated
131 ..Releasable means holds paired legs in predetermined position
132 ...Legs folded adjacent surface
133 ...Spring biased
134 .Laterally attached surface
135 ..Detachable assembly
136 BIASED SURFACE
137 HORIZONTALLY ADJUSTABLE
138 .Concurrent horizontal and vertical movements
139 .Rotates about vertical axis
140 ..And moves lineally
141 ..Vertically adjustable
142 ..With means to limit or inhibit rotation
143 .Mounted on slide-and-guide
144 VERTICALLY ADJUSTABLE
145 .Articulated link shifts surface
146 .With biased holding means, e.g., latch
147 .With force multiplying means
148 .Holding means cooperates with smooth face
149 SUPPORTING STRUCTURE EXTENDS UPWARDLY OF SURFACE
150 PEDESTAL SUPPORTED
151 SURFACE MEMBER EMBRACES SUPPORT
152 ATTACHED LATERALLY OF SUPPORT
153 WITH SEPARABLE COMPONENTS
154 .Surface and support interlocked by spaced detachable constrainer
155 .Surface secured to leg-connecting parallel member
156 .Independent legs support surface
157 .Surface separable from support entity
158 ..Threaded connection
159 ..Surface vertically removable, horizontally immovable
160 SURFACE WITH BRACED HINGED LEG

CLASS 109 SAFES, BANK PROTECTION AND RELATED DEVICES

DECEMBER 1990

1 R	MISCELLANEOUS
1 S	..Shelter (e.g., bomb)
1 V	..Safe or vault ventilation
2	BANK PROTECTION DEVICES
3	.Trapping mechanisms
4	..Counter type
5	..With protected transaction partitions
6	..Plural closures
7	...Interrelated fastening means
8	...Rotary plural blade closure
9	.Guard booths
10	.Safety transaction and display partitions and counters
11	..With movable protective shields
12	...Plural shields
13	....For plural openings or partitions
14	...Roller type
15	...Strip or slat type
16	....Axially pivoted
17	...Sliding
18	....Gravity shield
19	..With deal trays
20	..With fluent material releasing, generating and/or distributing means
21	..With alarm, signal or indicator
21.5	..Protected voice transmitting path
22	CONVERTIBLE
23	COMBINED
24	.With jackets
24.1	.Depository with verification indicia applying means
25	.With marking devices
26	.With means to prevent successful use of explosives
27	..Pressure relief mechanism
28	..With drain or sump
29	.With fluent material releasing, generating and/or distributing means
30	..With auxiliary lock
31	..With alarm, signal or indicator
32	..With operator and/or controller
33	...Fusible, combustible or thermal actuator
34	..Shock broken
35	.With electrical surface charging means
36	.With explosive devices
37	..Wall contained detonator
38	.With alarm, signal or indicator
39	..Movable receptacle initiated
40	..Plural initiators
41	...Wall penetrating and closure movement initiators
42	..Wall penetrating initiated
43	..Closure movement initiated
44	..Lock or handle initiated
45	INCIDENTALLY MOVABLE SAFE OR COMPARTMENT
46	.With dumping mechanism
47	.Receding movement
48	.Revolving for interior access
49	.Complementary sections
49.5	SHIELDS AND PROTECTORS
50	SUPPORTS AND MOUNTINGS
51	.Detachable from interior only
52	.Lock to support
53	PLURAL COMPARTMENT
54	.With secret compartment
55	.With deposit means between compartments
56	.Plural safes
57	..Enclosed
58	WALL AND PANEL STRUCTURES, CLOSURES AND CLOSURE ADJUNCTS
58.5	.Port type
59 R	.With closure fastening means
59 T	...For rotatable closure
60	..Door ajar fasteners
61	..Combined boltwork and pressure mechanism
62	..Pressure mechanism
63	...With entrapping prevention means
63.5	..With means to render the closure fastening means ineffective
64	.Closures
65	..With discontinuous heat path
66	..Deposit type
67	..Plural
68	...Inner and outer
69	..Plural motions
70	...Sliding and swinging
71	...Rotary and axial movement
72	....Lug or interrupted thread type
73	..Sliding, rotary or oscillating movement
74	..With interfitting swinging closure and jamb parts
75	..With seals
76	..Composite
77	..Jamb
78	.Walls and panels
79	..With joints and connections
80	..Composite
81	...With movable parts
82	...Metallic and nonmetallic
83	....With metallic reinforcement in nonmetallic binder
84	....With nonmetallic filler
85	...Metallic
87	.Floor bridges

185 WITH CONTROL MEANS RESPONSIVE TO A SENSED CONDITION
186 .Feed control
187 ..Supplemental burner
188 ..Of noncombustible fluid, e.g., air, etc.
189 ...Pressure sensor
190 ...Temperature sensor
191 WITH PROGRAMMED OR CYCLIC CONTROL MEANS
192 .Timer
193 WITH SAFETY MEANS
194 CREMATORY
195 FORGE
196 STRAW BURNER AND FEEDER
197 .External structure detachable from firebox
198 LOCOMOTIVE
199 .Having noncombustible fluid feed means
200 ..And noncombustible fluid treatment means
201 ...Preheater
202 ..Undergrate feed
203 WITH EXHAUST GAS TREATMENT MEANS
204 .Recirculation means
205 ..Air supply means
206 ...Including pump
207 ....Eductor
208 .Furnace having multiple firebox
209 ..By undergrate means
210 .Afterburning means
211 ..Means directing main flame or combustion products for afterburning
212 ..Liquid or gaseous fueled
213 ...Swirl inducing
214 ..Including means to add air
215 .Means contacting exhaust gas with liquid
216 .Means separating particles from exhaust gas
217 ..Outlet screen
218 WITH FUEL TREATMENT MEANS
219 .Preliminary refuse treatment means
220 ..Sorter
221 ...Dewatering
222 ..Comminutor
223 ..Compactor
224 ..Dryer
225 ...Furnace with multiple hearth
226 ...Rotary drum type
227 ...Having means to effect or facilitate refuse movement
228 ....Mechanical conveying means
229 .Means for liberating gas from solid fuel
230 ..Coking means
231 ...Undergrate
232 .Means for pulverizing solid fuel
233 COMBINED
234 .With boiler
235 REFUSE INCINERATOR
236 .Means for cleaning by combustion
237 .For explosive or radioactive material
238 .For liquid refuse
239 .For stump in situ
240 .Vehicle mounted
241 .Portable
242 .Closed vessel
243 .Refuse suspended in or supported by a fluid medium
244 ..Suspended in a gaseous medium
245 ...Fluidized bed of noncombustible particles
246 .Rotary drum
247 .Rotary grate movable about a vertical axis
248 .Refuse supported above grate
249 .Reverberatory type
250 .With electric heater
251 .Including air supply means extending vertically within refuse
252 ..With supplementary burner
253 .With means shielding burner for refuse
254 .With air preheater
255 .With means for advancing or handling refuse or residue
256 ..Means for feeding through chimney
257 ..Continuous advance
258 ..Refuse agitating
259 ..Residue handling, e.g., ash, etc.
260 INCLUDING FLUID FUEL BURNER
261 .Powdered solid fuel
262 ..Alternate fuel
263 UTILIZING POWDERED FUEL
264 .Having rotary flow means
265 .Having secondary air mixing means
266 .With residue handling means (e.g., ash, etc.)
267 INCLUDING MEANS TO FEED SOLID FUEL
268 .Movable grate
269 ..Endless chain
270 ...Including air supply means
271 ....And chain seal
272 .....Between runs
273 ...Inclined run
274 ...Mobile support
275 ..Rotary
276 ...About horizontal axis
277 ...Conical type
278 ..Oscillatory
279 ...Manual actuation means
280 ...Multiple retort
281 ..Reciprocatory
282 ...Including power feed
283 ....Underfeed
284 .....Power feed perpendicular to grate
285 ..Raking bar type
286 .Power driven
287 ..Having circular grate
288 ...And forced air supply
289 ..Pusher ram
290 ...Parallel to grate
291 ....Inclined step grate
292 .Separate feed
293 .Supply hopper, e.g., magazine, etc.
294 ..Cage grate
295 HAVING MULTIPLE FIREBOX
296 .Including fluid supply means
297 INCLUDING NONCOMBUSTIBLE FLUID SUPPLY MEANS
298 .Hollow grate
299 ..Having flow controller
300 ...For forced air supply
301 .Having treatment means
302 ..Preheater
303 ...And furnace gas mixer
304 ...Remote from combustion chamber
305 ...Bridgewall
306 ...Water or steam
307 ....Below grate
308 ...Internal to or attachable to wall
309 ..And flow modifying means
310 ...Deflector
311 ....Grate mounted
312 .....Below grate
313 ...Feed nozzle
314 .Supplying through hollow bridgewall
315 DOWNDRAFT
316 .Grateless
317 INCLUDING FIREBOX
318 .Having arch
319 ..And flame shaper
320 ..Adjustable dimension firebox
321 ..Door arch
322 BAFFLE OR HEAT RETAINER STRUCTURE
323 .Refractory type

	BAFFLE OR HEAT RETAINER STRUCTURE
	.Refractory type
324	..Having concavity for engaging pipe exterior
325	...And structure to bridge pipes
326	.Metallic type
327	SOLID FUEL FEED STRUCTURE
328	.Movable grate
329	..Endless chain
330	...Having sprocket drive
331	ARCH OR ROOF STRUCTURE
332	.Planar surface area
333	..Inclined
334	...And convex surface area
335	.Concave surface area
336	WALL STRUCTURE
337	.Bridgewall
338	BRICK ELEMENT
339	.Having hanger
340	..And metal casing
341	PROCESS
342	.Treating fuel constituent or combustion product
343	..To prevent corrosion of furnace
344	..Combustion product
345	...Exhaust gas, e.g., pollution control, etc.
346	.Incinerating refuse
347	.Burning pulverized fuel
348	.Supplying fluid
101 R	FUEL FEEDERS
101 A	..Shiftable stoker
101 C	..Automatic control
101 CF	..Fuel control
101 CA	..Feeder responsive to fuel bed temperature
101 CB	..Feeder responsive to fuel bed pressure
101 CC	..Feeder responsive to fuel bed weight
101 CD	..Feeder responsive to fuel bed height
102	.Shavings and sawdust
103	.Boiler controlled
104 R	.Blower
104 A	...Locomotive distributor plates
104 B	...Burners per se
105	..Hopper
105.5	..Locomotive stroker type
105.6	...Underfeed to jet only
106	..Pulverizer
107	.Bridge wall
108	.Hopper
	..Pusher
109	...Reciprocating
110	...Screw
	.Spreader
111	..Carrier
112	...Door
113	..Oscillating
114	..Reciprocating plunger
115	..Rotary
	.Chute
116	..Door
117	...Multiple charge
118	.Vertical drop
119	SPARK ARRESTERS
120	.Furnace conductor
121	.Combined stack and smoke box
122	.Smoke box
123	..Draft regulator
124	..Divided
125	..Hood
126	..Vertical drum
127	..Ejector
128	..Water receptacle
129	..Discharge valve
145	SPARK AND SMOKE CONDUCTORS
146	.Train
147	DRAFT REGULATORS
148	.Separation of gases
150	.Steam injector
157	..Feeding air
158	...Door operated
	.Stack
159	..Portable
160	..Air jet
161	...Steam injected
162	.Fan exhaust
163	.Damper
165 R	ASH RECEIVING AND HANDLING DEVICES
165 A	..Fly ash disposers
166	.Ashpans
167	..Dumping
168	...Conjoined floor sections
169	...Reciprocating discharge valve
170	...Scraper
171	..Steam and water attachments
172	FRONTS
173 R	DOORS
173 A	..Soaking pit covers
173 B	..Explosion relief doors
173 C	..Compound doors
174	.Feeding air and steam
175 R	.Feeding air
175 A	...Automatic door dampers
176	.Operators
177	..Motor
178	..Pedal
179	.Fluid screens
	DOORS AND CASINGS
180	.Cooling
181	DOOR CASINGS AND ARCHES
182	.Feeding air

184	SMOKESTACKS
349	MISCELLANEOUS

CLASS 111 PLANTING

100	PLANT SETTING
101	.Excavating transplanter
102	.Through mulch
103	.Laterally shifted to final position
104	.Plant dispensing (i.e., singulation from a bulk source)
105	..Supply in organized array
106	.Manually operated implement
107	..With furrow opener
108	..With irrigator
109	.Drilling machine (i.e., furrow opener)
110	..With irrigator
111	..Runner opener
112	..Rotating or orbiting opener
113	...Power operated
114	.Plant containing receptacle impressed into soil
115	.Dibbler
116	..Auger type
117	..Angled
118	LIQUID OR GAS SOIL TREATMENT
119	.Treating substance includes ammonia (e.g., flashing control)
120	.Drilling machines (i.e., furrow opener)
121	..Rotating or orbiting opener
122	...Power operated
123	..Chisel opener
124	..Shoe opener
125	..Runner opener
126	..Moldboard opener
7.1	.Hand manipulated
7.2	..Implement carried supply
7.3	...Work operated valve
7.4	...Non-gravity fluid feed
127	.Injector nozzle situated above soil surface
128	.Rotating dibble injector
129	.Multiple fluid treatment
8	DRILLING AND BROADCASTING
9	.Main and auxiliary frame machines
130	BROADCASTING
131	.Including powered tiller
132	..Material dispensed ahead of tiller
133	..Material dispensed behind tiller
11	.Machines with scatterer
12	..Main and auxiliary frame
13	.Main and auxiliary frame machines
14	DRILLING
15	.Hill-planting machines
16	..Check correcting
17	...With automatic regulator
18	..Frame and planting-element arrangement
19	...With tractive-belt feed drive
20	...Sectional main frame
21	....Break joint
22	...Main and auxiliary frame
23	....Rotary-marker operator
24	....Hopper-carrying auxiliary
25	..Depositing and marking mechanisms
26	...Powder marking
27	...Driving marking
28	....Revolving
29	...Driven marker
30	....Plunging
31	.....Hill covering
32	....Revolving
33	..Marking mechanisms
34	..Depositing mechanisms
35	...Interchangeably operable
36	...Primarily axle-driven
37	....Intermittently controlled
38	.....Check-wire tripped
39	......Both feeder and valve
40	......With wire-actuated valve
41	....With wire-actuated valve
42	...Endless-belt tripped
43	...Line-wire driven
44	....Reel carried
45	....Check-wire tripped
46	....Both feeder and valve
47	....Trip-fork mechanisms
48.1	....Guide
49	....Wire-end-anchoring devices
50	...Manually operated
51	...Accumulators
52	.Frame and planting-element arrangement
53	..Sectional main frame
54	...Flexible
55	....With auxiliary frame
56	....Break joint
57	...Extensible
58	....V-shaped
59	..Main and auxiliary frame
60	...Plurality of auxiliaries
61	....Unitarily controlled
62	...Floating auxiliary
134	....Gauge means for auxiliary frame
135	.....Rotating gauge means
136	......Packing means gauges opener
137	......Adjustable gauge wheels separate from packer
138	.....Sled frame
63	....Hopper carrying
64	.....Detachable
65	......Single row
66	....Tool-bar type
67	.....With lift and ungear
68	...With crank-axle lift
69	..With adjustable planter elements
70	..Rigid
71	...Single row
72	....Manually operated depositing mechanism
73	....Multiple depositing
74	....Revolving hopper
75	....Vibrating hopper
76	....Vibrating delivery chute
77	....Rotating dispenser
78	.....Axle mounted
79	.Single-row implements
80	..Multiple depositing
81	..Planter-element arrangement
82	..Hand propelled
83	.Lister units
84	.Drag-bar units
139	.Including trash control accessory
140	..Coulter
141	..Dozer (i.e., deflector)
142	...With tine
143	..Having holddown
144	.Including mulching accessory
145	..Harrow
146	...Spring tooth
147	.Including subsoiler (i.e., deep soil tiller)
148	..With furrow smoother
149	.Furrow opener
150	..Including dispensed material deflector
151	..Including trip mechanism
152	..Shoe opener
153	..Runner opener
154	..Boot opener (e.g., tooth or tine)
155	...Spring formed tool or standard
156	..Chisel opener
157	..Rotary opener
158	...Power rotated
159	....With tine
160	.....Rotatable about vertical axis
161	.....Material deposited into tiller operated zone
162	.....Material deposited behind tiller
163	...Disk
164	....Plural cooperating disk openers
165	.....Staggered arrangement
166	.....Scalloped or fluted
167	....Flat

DRILLING
.Furrow opener
..Rotary opener
...Disk
168 ....Dished
169 .....Scalloped or fluted
170 .Having depositor feature
171 ..Endless conveyor with traps
172 ...Chain
173 ..Screw conveyor
174 ..Fluid current conveyor
175 ...Flow divider head
176 ...Material speed reducing means
177 ..Rotating dispensing element
178 ...Roll or drum
179 ....Air pressure differential drum
180 .....Vacuum blocker rotates
181 .....Excess material remover
182 .....Protrusions on drum pheriphery
183 ...Plate type trap
184 ....Vertical
185 .....Air pressure differential
186 ..Plural depositors for disparate material
187 ...To various depths
188 ...At least one solid, one liquid
189 .Including seed tamper in furrow
190 .Furrow closer
191 ..Rotating furrow closer
192 ...Disk
193 ....Plural
194 ...Packer wheel
195 ....Plural
196 .....Pinch adjustment
197 ..Drag
198 ...Chain
89 DIBBLING
90 .Revolving-hopper implements
91 ..Revolving-dibble-carrier implements
92 .Manually-operated implements
93 ..Machine attached
94 ..Spacing in hill

CLASS 112 SEWING

400	PRODUCTS
401	.Uniplanar sectional web, sheet or layer
402	.Sewn web or sheet
403	..Including decomposable thread or component
404	..Including feathers, beads or reflective material
405	..With longitudinally non-coextensive super-imposed panel or sheet
406	..Including external fastener sewn thereto
407	...Hook and/or eye
408	...Button
409	..Fringed
410	..Tufted or looped surface
411	...With tufts or loops formed by floating strand-like portions
412	..Of strands or strand portions joined by sewing
413	..Elastic strand or component
414	...Including non-planar component
415	..Specific strand arrangement or relationship
416	...Knitted, netted or knotted
417	..With strip, strand or strand portion between layers or components
418	..With strip sewn in or over seam or over edge (e.g., welt or stay)
419	...Channel-shaped edge binding
420	..Fibrous or particulate layer between other layers
421	..Including component of varying thickness
422	..Non-planar uniform-thickness material
423	...Bent flange or reverse fold at edge
424	....Including concealed or blind stitching
425	.....Overedge or along offset fold
426	....Included in seam joining contiguous components
427	...Pleated, tucked or shirred
428	...Plural components
429	..Filamentary material or strand-like tape sewn to surface
430	...Interlooped floating strands or strand portions
431	...Around aperture (e.g., buttonhole)
432	...Connecting parallel straight lines of stitching
433	....Included in overedge stitching
434	....Uniting contiguous components
435	.....Plural intersecting float threads
436	...Incorporated with or held by overedge stitching
437	..Apertured or open-work (e.g., buttonhole)
438	..Chain stitch
439	..Ornamental stitching (e.g., embroidery)
440	..United components
441	...By stitching along edge

66	..Eyelet making
67	..Start and stop mechanism
68	..Cutting
69	..Thrum mechanism
70	..Clamp feeding
71	...With rotatable needle bar
72	...Right line and rotary
73	...Vibrating needle
74	...Spreading
75	...Gauging
76	...Clamps
77	...Attachments
78	.Embroidering
80.01	..Tufting (replacing subclass 79)
80.02	...Rooting hair in doll or wig
80.03	...Hand implement
80.04	....With power drive
80.05	....Having hollow or channelled needle
80.06	....Having non-eyed needle
80.07	...Yarn manipulation by fluid flow
80.08	....Having hollow needle
80.15	...Dual sided
80.16	...Including hollow or channelled needle
80.17	...Including non-eyed needle
80.18	...With condition responsive stop motion means
80.23	...With optical, electronic, or magnetic pattern program means
80.24	....Having pattern drum

	SPECIAL MACHINES
	.Embroidering
	..Tufting (replacing subclass 79)
80.3	...With specific fabric supporting, manipulating, cutting, or treating means
80.31	....Means to shift fabric laterally of feed
80.32	....Means to feed fabric
80.33	....Fabric vertically moveable at tufting position
80.4	...Including specific needle supporting or manipulating means
80.41	....Means to shift needle laterally of fabric feed
80.42	....Means to vertically adjust stroke
80.43	....Means to selectively drive one of plural needles
80.44	....Means to disconnect needle and drive
80.45	....Supporting structure
80.5	...Including specific loop catcher
80.51	....Bill with clip or gate
80.52	....Plural loop catchers having different shapes or orientations
80.53	.....Stationary relative to one another
80.54	....Variable height loops
80.55	....With loop cutting means
80.56	.....Selective cutting means
80.57	.....Rotary cutter
80.58	.....Knife pivots on loop catcher
80.59	.....Cutting means stationary relative to loop catcher
80.6	.....Including supporting structure (e.g., knife block)
80.7	...Including specific yarn manipulating, cutting, or treating means
80.71	....Cutting or treating means
80.72	....Feed via intermeshing slats
80.73	....Feed roller
81	..Hemstitch
82	...Universal feed
83	..Horizontal needle
84	...Pattern controlled

222	.Hull cleaning
223	.Riggings
224	.Calking, paying, etc.
227	LEAK STOPPERS
228	.Interior
229	.Aprons, mats, etc.
230	MOORING DEVICES
231	.Ferry slip
232	OIL DISTRIBUTERS
233	.Ship structure
234	.Drags and floats
242	TOWING OR PUSHING
243	.Cable fairing
244	.Submerged object
245	..Having depth-control means
246	.Steering
247	.Having means responsive to excess strain
248	.Nested vessels
249	.Coupling means
250	..Boom type
251	..Flexible lashing
252	..Having trip mechanism
253	.Towing by means of cable
254	..With cable storage means, e.g., reels
268	WITH HOIST OR DECK ENGINE
269	MACHINERY ARRANGEMENT
238	TORPEDO LAUNCHING
239	.Outboard
240 R	TORPEDO GUARDS
240 A	..Underwater
240 B	..Pivotally attached
240 C	..Boat net
240 D	..Ship guard
240 E	..Barrier nets
241	.Nets
270	MISCELLANEOUS

CLASS 116 SIGNALS AND INDICATORS

DECEMBER 1990

1	MISCELLANEOUS
2	COMBINED FUNCTIONS
3	.Horns with lamps
4	.Alarms with indicators
5	..Burglar or fire
6	.Burglar alarms
7	..Light producing
8	..Locks
9	...Door-knob controlled
10	....Combined knob and bell
11	...Detonating
12	..Door securing
13	...Braces
14	...Chain or link
15	...Detonating
16	..Sash fastening
17	...Detonating
18	CODE SIGNALING
19	.Ship's course
20	.Heliographic
21	SHIP'S TELEGRAPHS
22 R	PERIODIC
22 A	..Animal frightening devices
23	.Detonating
24	.Horns and whistles
25	.Bells
26	NAUTICAL
27	.Submarine
28 R	VEHICLE
28 A	..Curb feelers
28.1	.Transmission indicator
29	.Station indicators
30	.Car and train markers
31	.Steering-wheel-position indicators
32	.Collision-released identification tags
33	.Theft preventing
34 R	.Tire inflation or deflation
34 A	...Sidewall operated
34 B	...Internal protuberance operated
35 R	.Motion and direction
35 A	...Indicator movable about plural axes
36	..Combined with vehicle control
37	..Speed controlled
38	...Governor actuated
39	..Pneumatically operated
40	..Lazy-tong operated
41	..Fan type
42	..Window-exhibited sign or shutter
43	...Rotatable
44	...Sliding
45	..Movable cover or screen
46	..Rotatable
47	...Pointer
48	....Illuminated
49	...Illuminated casing
50	..Sliding
51	..Pivoted
52	...Laterally swinging arm
53	....Multiple arms
54	....Illuminated
55	.Pneumatic train pipe
56	.Vehicle-energy actuated
57	..Speed limit
58 R	..Pneumatic
58 A	....Parking brake actuated
59	..Diaphragm horns
60	..Bells
61	...Friction wheel
62	...Bicycle pedal
62.1	.Speedometer (e.g., odometer)
62.2	..With scale conversion (e.g., English-metric)
62.3	..With means to indicate range or set speed
62.4	..With diverse indicators
63 R	STREET TRAFFIC
63 P	..Portable
63 C	...Cone
63 T	...Triangle
64	ELEVATOR
67 R	ALARMS
67 A	..Reeled material end
68	.Elevator or hoist
69	.Rain
70	.Fluid-pressure variation
71	.Gristmill
72	.Poison container
73	.Operation counting
74	.Speed limit
75	.Burglar
76	..Till
77	..Portable
78	...Drop detonating
79	...Knob attached
80	...Key or keyhole
81	...Cord controlled
82	...Floor supported
83	...Detonating
84	...Pickpocket
85	..Closure operated
86	...Door and window
87	....Detonating
88	.....Reciprocating hammer
89	......Rotary release
90	....Gear and friction wheel
91	....Clockwork bell
92	.....Door knob
93	.....Automatic wind
94	.....Cable control
95	....Single-stroke bell
96	.....Door knob
97	....Door knob
98	..Tread operated
99	..Portable receptacle
100	.Closure operated
101	.Thermal
102	..Expansion control
103	...Fluid
104	..Ignition control
105	...Explosive
106	..Fusible control
107	.Buoy
108	..Whistling
109	.Liquid level
110	..Float
111	...Clockwork bell
112	.Fluid flow
113	.Shoal water
200	INDICATORS
201	.Methods
202	.Visual light signal
203	.Impact type
204	.Magnetically actuated
205	.By touch
206	.Chemically activated type
207	..By heat
208	.Element wear type
209	.By location
210	..Inflatable type
211	..Dye marker type
212	.Stress type
213	.Camera type
214	.By smoke or odor
215	.Gravity type
216	.Temperature responsive or compensating means
217	..Fusible substance
218	...With resilient or fluid pressure biased means
219	...With absorbing or diffusing material
220	..And fluid pressure indicator
221	..Bimetal element
222	.Game type
223	..Rotary
224	...With rectilinear indicator
225	..Rectilinear

	INDICATORS
226	.Elevator position
227	.Liquid level
228	..Float
229	...On pivoted arm
230	.Machine tool position
231	..Plural scales
232	...Scale conversion (e.g., English-metric)
233	.Machine tool variable transmission
234	.Page type
235	..With line indicator
236	...With resilient gripper
237	..With resilient gripper
238	..With means to secure to book back
239	..With means to secure to book cover
240	.Line indicator
241	.Frequency tuner type
242	..Plural scales and indexes
243	..Indicia on movable web
244	..Pipette type
245	..Rotary scale or index
246	...Projection type
247	....With color variations
248	...Plural scales
249	....On concentric axes
250	.....With illumination means
251	....With illumination means
252	...Drum structure
253	....With illumination means
254	...Single scale
255	....With plural groups of indicia
256	.....And illumination means
257	....With illumination means
258	.....Dish-shaped scale
259	..Rectilinear moving scale
260	..Hinged scale
261	..Rotary input to linear index movement
262	...Draw cord type
263	..With illumination
264	.Fluid flow
265	..At exterior of fluid-craft
266	..Pressure
267	...With magnetic means
268	...Differential
269	...Plural input with single readout
270	...Flexible indicator
271	...Rotary indicator
272	...Rectilinear indicator
273	..Movable means in flow path
274	...Rotary only
275	...Lever or cantilever
276	..Sight glass
277	.Valve position
278	.Flexible ribbon, band, or link with indicia
279	.Push-button type
280	.Diverse
281	.Rectilinear indicator with actuating means
282	..With rotary input means
283	..With rectilinear input means
284	.Rotary indicator with actuating means
285	..With rectilinear input means
286	..With illumination means
287	...Edge
288	....Pointer
289	..With means to change rate of movement of pointer
290	..Scale and pointer move during indication
291	..Including means to adjust index position (e.g., zeroing, etc.)
292	..Including means to adjust scale position
293	..Plural pointers, one of which moves the other (e.g., maximum-minimum, etc.)
294	..Including means to lock indicator in position
295	...Scale
296	..Including maximum and minimum indicating means
297	..Including stop means for pointer
298	..Disk with indicia
299	..Drum with indicia
300	..Plural indicators
301	...Coaxial pointers
302	...Including mask means
303	..Pivoted
304	..With scale reading aid
305	..Specified housing structure
306	.Operator movable
307	..With diverse art device
308	..Time scale
309	..Rotary indicator
310	...Illuminated scale
311	...Including means to restrain movement
312	....By resilient means
313	.....Pivoted indicator
314	.....Helical spring type
315	....By a protrusion in notch, slot, or gap
316	...Plural
317	....Indicia on contoured surface
318	....Indicia on flat surface of disk
319	...Tab, arm, sector, or pointer
320	....With scale
321	..Sliding indicator
322	...Flexible type
323	...With guide
324	....And means to restrain movement
325	..Peg type
326	...Piercing
327	.Index structure
328	..Pointer type
329	...Plural
330	...With balance means
331	...With angular adjusting means
332	...Specified shape
333	.Balance means
334	.Scale structure
335	..Color
336	..Frequency tuner type
337	..Drum type
137 R	HORNS, WHISTLES AND COMPRESSIONAL WAVE GENERATORS
137 A	..Supersonic wave generators
138	.Motor exhaust or suction
139	.Manually actuated air compressor
140	.Variable tone
141	.Chime
142 R	.Diaphragm horns
142 FP	...Fluid pressure operated
142 FV	....Using vacuum
143	..Rotary striker
144	...Toothed wheel
145	....Parallel diaphragm
146	...Ball contacts
147	SIRENS
148	BELLS
149	.Sound modification
150	.Swinging
151	.Pneumatic actuation
152	.Gong type
153	..Door knob contained
154	..Rotary
155	..Pivoted striker
156	...Multiple
157	...Multiple stroke
158	....Rotary striker
159	.....Lever operated
160	.....Plunger operated
161	....Escapement
162	.....Clockwork type
163	....Double

	BELLS
	.Gong type
	..Pivoted striker
164	...Spring impact
165	...Pull cord or rod
166	..Bicycle clamp
167	.Fixed, with pivoted striker
168	.Spiral-spring type
169	.Tube or rod type
170	.Animal and sleigh type
171	.Hand
172	.Bell pulls, cranks and push buttons
173	FLAGS AND FLAGSTAFFS
174	.Nonfouling
175	.Metallic flags

DIG 1	Combined with diverse elements
DIG 2	Corrections by cursor lines
DIG 3	Sniftable indicia
DIG 4	Variable pulley
DIG 5	Using light guides
DIG 6	Pointer structure
DIG 7	Fluid actuated
DIG 8	Inflatable indicator
DIG 9	Balloons
DIG 10	Bimetal detents
DIG 11	On ski binders
DIG 12	Door knockers
DIG 13	Inclinometers for earth working devices
DIG 14	Tapes as carriers
DIG 15	Projection
DIG 16	Road structure
DIG 17	Tactile
DIG 18	Wave generators
DIG 19	Wave generator with resonating element
DIG 20	Automobile transmission position
DIG 21	Shaft position indicators
DIG 22	Heated air
DIG 23	Movable index
DIG 24	With suction cups
DIG 25	Air filter condition indicator
DIG 26	Light rod
DIG 27	Blowout plates
DIG 28	Push button structure
DIG 29	TV tuner
DIG 30	Remote TV tuner
DIG 31	TV channel selector
DIG 32	Content indicator by weight
DIG 33	Indicator for elevated cables
DIG 34	Tension indicating
DIG 35	Electroluminescent dials
DIG 36	Illuminated dial and pointer
DIG 37	Multiple movable scales
DIG 38	Hot box alarm
DIG 39	Dial magnifiers
DIG 40	Flare devices
DIG 41	Color comparison
DIG 42	Oil filter
DIG 43	Navigation devices
DIG 44	Portable personal alarms
DIG 45	Parallax
DIG 46	Interchangeable scales
DIG 47	Scale conversion, e.g., English-Metric

663	CONTROL MEANS RESPONSIVE TO A RANDOMLY OCCURRING SENSED CONDITION
664	.Sampling of associated base
665	.Condition of coated material
666	.Temperature responsive
667	..Of coating material or applicator
668	.Responsive to attribute, absence or presence of work
669	..Selective application at a specific position
670	..Defect in the workpiece sensed
671	..Proximity of work to electrically charged applicator sensed
672	..Running length work
673	...Edge of running length of web material sensed
674	...Having means to sense speed of running length of work
675	..Removal of article sensed
676	..Presence of work at or passage of work through coating station sensed
677	...With means to remove or to prevent depositing of excess coating material
678	....by means to interpose barrier
679	...Having means to control coating application
680	....By means to initiate movement of applicator or applicator adjunct
681	.....By means to move applicator or applicator adjunct from inoperative position to operative position
682	....By means controlling the operation of a timing means
683	....Of a pump
684	....Of a valve
685	.....Fluid motor actuated
686	...by means to control conveyor operation
687	....By means to intermittently advance conveyor
688	.Responsive to condition of coating material
689	..Concentration of coating material in carrier medium
690	...During application
691	...Photoelectric sensor
692	..Pressure responsive
693	..Means to raise coating material to a predetermined level inside an enclosed container
694	..Level of supply
695	INTERFACING CONTROL OF PLURAL OPERATIONS
696	PROGRAM, CYCLIC, OR TIME CONTROL
697	.Having prerecorded program medium
698	.Having selection means for alternate operational sequences
699	.Having timer
700	..Timing motor with cam or disk
701	...Notched rotating disk
702	..Sequential timing of plural operations
703	..Time delay means
704	.Sequential energization of plural operations
705	.Having means to reverse operation at end of travel path
706	.Cyclic operation of singular element
707	INTERCONTROL OR SAFETY INTERLOCK
708	CONDITION RESPONSIVE CONTROL
709	.Responsive to diameter of wound material spool
710	.Valve actuator
711	..Integral actuator extends through or is formed on valve seat
712	WITH INDICATING, TESTING, INSPECTING, OR MEASURING MEANS
713	.With means for visual observation
714	.With means to return indicator to zero point
13	EDIBLE BASE OR COATING TYPE
14	.Stringing or decorating of coating
15	.With cutting of work
16	.Plural coating devices
17	.With apparatus cleaning or conditioning
18	.Solid means acting on coating after application
19	.Tumbling particulate work (i.e., rumble)
20	.With work drying, cooling, heating or noncoating gas contact
21	..To remove or spread applied coating by gas blast
22	.With vibration of work
23	.Combined
24	.Projected of forced flow of coating material
25	..Intermittent
26	.Immersion
27	..Superposed hopper or liquid column
28	..Moving coating container or tank
29	..Liquid coating supply and/or discharge to or from coating container
30	..Means for moving work into, through or out of coating
31	.Drain troughs or implements
31.5	BODY MEMBER PRINTING TYPE (E.G., FINGER PRINTING)
32	WITH FOLDING, UNFOLDING OR FESTOONING
33	WITH STRETCHING OR TENSIONING
34	.Transverse
35	WITH CUTTING, PUNCHING OR TEARING OF WORK
36	.Strand form work
37	.Web or sheet work
38	..Slitting
39	...And cut off
40	..Cut off
41	...Pivoted cutter
42	...Reciprocating cutter
43	...By tearing
44	WITH MEANS TO DEFORM WORK
45	COATED SURFACE PROTECTING MEANS, E.G., SLIP SHEETS
46	WITH PRINTING
47	CARBONIZING, FLAME CONTACT OR BURNING OFF OF COATING INGREDIENT
715	GAS OR VAPOR DEPOSITION
716	.Means to coat or impregnate particulate matter
717	.Object embedded in particulate mass
718	.Running length work
719	.Multizone chamber
720	.Having means to expose a portion of a substrate to coating medium
721	..Substrate contacting mask
722	.With treating means (e.g., jarring)
723	..By means creating additional electric field
724	..By means to heat or cool
725	...Substrate heater
726	.Crucible or evaporator structure
727	..Movable crucible
728	.Work support
729	..Moving work support
730	...Rotary
731	....Inverting
732	...Porous
733	.Chamber seal
50	WITH VACUUM OR FLUID PRESSURE CHAMBER
50.1	.With means to apply electrical and/or radiant energy to work and/or coating material
620	WITH MEANS TO APPLY ELECTRICAL AND/OR RADIANT ENERGY TO WORK AND/OR COATING MATERIAL

	WITH MEANS TO APPLY ELECTRICAL AND/OR RADIANT ENERGY TO WORK AND/OR COATING MATERIAL
621	.Electrostatic and/or electromagnetic attraction or projection of coating material to work
622	..Hollow or reentrant work surface interiorly coated
623	..Including electromagnetic field
624	..Control of deposition of coating material or selective area, e.g., pattern or edge effect
625	...Plural electrodes selectively energized
626	..Projection from edge, e.g., electrostatic atomization
627	..With assisting projection or spray of coating material through free space
628	...With electrode for collecting fugitive or off-target coating material
629	...Fluid current projector, e.g., spray type
630	....With means to transport work
631	.....With movable coating projector
632	.....Transport lines with loop return
633	.....Plural transport lines
634	.....Through vapor-confining chamber
635	.....Shielded or insulated hangers or supports
636	...Gravity flow of coating material
644	..Nonuniformly charged work or coating material carrier, e.g., xerographic
645	...Multicolor
647	...With development electrode
648	....Segmented or plural sequential
649	....Flexible
650	....Perforate or screen
651	....Roller
652	...With cleaning
653	...Particulate or solid toner
654	....Powder cloud or fluidized bed
655	....Cascade
656	....Brush applicator
657	.....Magnetic
658	......Stationary magnet with moving toner carrier
659	...Liquid projector
660	....Fountain
661	...Roller applicator
662	...Immersion
638	..Work passes between spaced electrodes
639	.With electromagnetic and/or electrostatic removal of excessive deposit, e.g., detearing
640	.With means to orient coating particles
641	.Radiant heating
642	..Radiant drying of coated work
643	...With additional diverse drying means
52	WITH MEANS TO CENTRIFUGE WORK
53	.Plural axes of rotation of work
54	.Reciprocating centrifuge
55	.Coating inside of hollow work
56	WITH MANIPULATION OF WORK AFTER COATING TO DISTRIBUTE OR REMOVE COATING
57	.Vibrating or jarring
58	WITH HEAT EXCHANGE, DRYING, OR NON-COATING GAS OR VAPOR TREATMENT OF WORK
59	.With solid heat exchange means contacting work
60	..Heated roll type
61	.With treatment of waste gases, e.g., solvent recovery
62	.To manipulate work by gas blast
63	.To remove or spread applied coating by gas blast
64	.With housing surrounding or engaging coating means
65	..Running length work
66	.Plural treatments
67	..Running length work
68	.Running length work
69	.Cooling
70	WITH CLEANING OR RECONDITIONING WORK SUPPORT OR CONVEYER
71	WITH SUPPORT FOR EXTRANEOUS ARTICLE OF MATERIAL
72	WITH MEANS TO PREPARE WORK SURFACE FOR COATING
73	.Liquid treatment
74	..Fluxing
600	WITH TREATMENT OF COATING MATERIAL
602	.Of recirculated coating material
603	..By separation
606	.By fiber preparation
608	.By milling or comminution
610	.By separation
612	.By agitation
75	COMBINED
76	RUBBING TRANSFER OR SOLID COATING MATERIAL ONTO WORK
77	.Running length work
78	..Strands or cords
79	HALF TONE PRINTING FILM HOLDERS
100	SOLID MEMBER OR MATERIAL ACTING ON COATING AFTER APPLICATION
101	.Heated or cooled member
102	.Nonuniform treatment (over treated area of work)
103	.Diverse members
104	.With means to clean or recondition members
105	.Inside of hollow work
106	.Web or belt member
107	.Rotating work
108	.Work-supported and guided carriage
109	.Absorbent or porous mass or pad member
110	.Rotary member
111	..Axis of rotation perpendicular to plane of coated surface
112	..Axis of rotation coincident or parallel to line of motion of work
113	..With reciprocation along axis of rotation
114	..Opposed rotary members
115	...Axes of both in same horizontal plane
116	...Flexible work
117	....Running length work
118	..Running length work
119	...Member opposed to work back-up
120	.Reciprocating member
121	.Opposed members
122	..Running length work
123	.Running length work
124	..Zigzag or jogged work path
125	..Die passage
126	..Member opposed to work back-up
200	SOLID APPLICATOR CONTACTING WORK
201	.With means to support applicator on body or clothing
202	.Heater or cooler for applicator or for film-transfer feed member
203	.With cleaner or conditioner for applicator
204	.With nonuniform removal of coating material from applicator
205	.Expansible or contractible to effect work contract
206	.Combined with other type coating applier
207	.Work-supported and guided carriage
208	..Strand, rod or bar traversing
209	.With work-handling or work-supporting

	SOLID APPLICATOR CONTACTING WORK
	.With work-handling or work-supporting
210	..With means to alter relative rates of work and applicator motions
211	..Pattern or definite circumscribed area of application
212	...Relief or intaglio applicator
213	...Mask or stencil
214	..Coating inside of hollow work
215	...Inside only
216	..Plural applicators or plural-applying surfaces on single applicator
217	...Diverse applicator types
218	...Rotating work
219	....Parallel, spaced or overlapping applications
220	...Plural applicators and separate work for each
221	...Parallel, spaced or overlapping applications
222	....Adjustable spacing or overlap
223	...Work moving past sequentially arranged applicators
224	....Rotary applicator opposite rotary applicator or rotary back-up
225	...Simultaneously operating on work
226	....Opposed applicators
227	.....Rotary
228	......Open side applicator support
229	..Yarn wound drum indexed for stripping
230	..Rotating turret, wheel, or drum work conveyer
231	...Sheet form work
232	..Rotating work during coating application
233	...Work rotated by applicator
234	..Strand form work
235	..With winding or unwinding of work for supply or removal
236	..Sheet stacking, unstacking or handling
237	...Coating applicator supported by stack
238	..Reciprocating work holder
239	..Endless belt-type work conveyers
240	..Compound motion of applicator during application
241	..Reciprocating or oscillating applicator
242	...Along surface of work
243	...To and from coating material supply
244	..Rotary applicator
245	...With means to strip work from applicator
246	...With means to guide work to follow perimeter of applicator
247	...Intermittently acting work back-up
248	...Opposed back-up and rotary applicator
249	....Rotary back-up
250	.....Open side applicator and back-up support
251	....Open side applicator and back-up support
252	...With guide or gauge for edge or face of work
253	..Movable back-up presses work against fixed applicator
254	.Coating inside of hollow work
255	.Plural applicators and/or plural sources of coating material
256	.Movably mounted applicator
257	..Web or belt applicator
258	..Rotary applicator
259	...Force or fountain feed
260	...Wick feed
261	...With doctor or film distributing feeder engaging applicator
262	....Rotary
263	..Applicator movable to coating material supply
264	.Pads or absorbent or porous applicators
265	..Deformable to contact supply
266	..Forced feed or movable transporter from coating material supply to applicator
267	..Gravity feed from separate coating material supply to applicator
268	..Wick feed to applicator
269	..Reversible pad and/or plural removable pad sheets
270	..Sponge cup type
271	..Heat-liquefied coating material
300	PROJECTION OR SPRAY TYPE
301	.With mask or stencil
302	.With projector heating, cleaning or conditioning
303	.Coating moving mass of solid particulate work
304	.Projector combined with nonprojecting coater
305	.Work-supported and guided carriage
306	..Inside of hollow work
307	..Strand, rod or bar form work
308	.Applying solid particulate material
309	..Dust chamber type
310	..Plural supplies of particulate material
311	...With common projector
312	..Recirculation or nonradiant heating of supply of particulate material
313	.Plural projectors
314	..Work moving past sequentially arranged projectors
315	..Simultaneously acting on work
316	...Opposed
317	.Inside of hollow work
318	..Rotating work
319	.Rotating turret work support
320	.Rotating work
321	..Moving projector
322	..Endless conveyer for work
323	.Moving projector
324	.Endless conveyer for work
325	.Flexible web or strand work
326	.With hood or offtake for waste material
400	IMMERSION OR WORK-CONFINED POOL TYPE
401	.Capillary passages or barometric column feed
402	.Floating film or layer of coating material
403	..Plural superposed layers of coating material in pool
404	.Work extending through pool-confining wall area
405	..Running length work
406	.Mask or stencil
407	.Work-confined pool
408	..Inside separate hollow work
409	..Rotating work
410	..With pump or nongravity discharge against work
411	...Plural pools
412	..Plural pools
413	..Movable or adjustable doctoring edge
414	...Rolling doctor
415	..Superposed pool
416	.Rotating work during application
417	.Tumbling particulate work
418	..Rotary drums or receptacles
419	.Running length work, longitudinally traveling
420	..Strand form work
421	.With means to move tank or pool
422	.With pool surface skimming or conditioning
423	.With means for moving work through, into or out of pool
424	..Pinch rolls

	IMMERSION OR WORK-CONFINED POOL TYPE
	.With means for moving work through, into or out of pool
425	..Reciprocating or oscillating conveyer
426	..Rotating conveyer for work
427	.With opposed relatively movable members acting on immersed work
428	.With work supports or guides
429	.With tank structure, liquid supply, control, and/or nonradiant heating means
500	WORK HOLDERS, OR HANDLING DEVICES
501	.Combined with drip pans or surplus collection
502	.Impaling type
503	.Gripper or clamped work type
504	WORK SURFACE SHIELDS, MASKS OR PROTECTORS
505	.Work-attached
506	MISCELLANEOUS
	CROSS-REFERENCE ART COLLECTION

2	..Crustacean
3	..Fish
4	..Mollusk
5	..Aquariums
6	.Silkworm
6.5	ENTOMOLOGICAL CULTURE DEVICE
6.6	.Egg treatment, production or storage
6.7	WORM CULTURE
6.8	AVIAN EGG TREATMENT OR PRODUCTION
14.01	MILKERS
14.02	.Methods of milking
14.03	.Milking station arrangements, e.g., parlors
14.04	..With traveling platform
14.05	.Releasers
14.06	..Alternating
14.07	..With pulsator-controlled discharge
14.08	.With automatic control
14.09	.With cooling means
14.1	.With supporting means
14.11	..Vehicle
14.12	..Surcingle
14.13	..With biasing means
14.14	.With signals, indicators, registers and timers
14.15	..Flow indicating
14.16	...Transparent inspection means and/or flow line section
14.17	..Quantity indicating
14.18	.Combined
14.19	.Catheter
14.2	..With vacuum
14.21	..Catheter per se
14.22	.With hand compression
14.23	..Conduit and/or teat cover with receiver
14.24	.With mechanical compression
14.25	..With milk conveying vacuum
14.26	..Fluid-operated
14.27	.With fluid compression
14.28	..With electromagnetic control
14.29	..Plural pulsators operating in series
14.3	...With continuous vacuum derived from pulsating line
14.31	..With progressive collapse
14.32	..Valved trap chamber control
14.33	...Vapor barrier means, e.g., baffle, filter
14.34	...Multiple chamber
14.35	....With common discharge valve
14.36	..With milk conduit air inlet, e.g., anti-surge
14.37	..Pulsator combined with claw
14.38	..Pulsator combined with teat cup
14.39	..Pulsator mounted on receiver
14.4	...With continuous vacuum on milk channel
14.41	..Pulsator control with continuous vacuum on milk channel
14.42	..With pump between teat cups and receiver, e.g., milk pump
14.43	.With receiver between teat cups and pump, e.g., vacuum pump
14.44	.With fluid pressure regulator
14.45	.With nonuse securing means
14.46	.Receiver
14.47	.Teat compressor or cup
14.48	..Adjustable
14.49	...With liner separable from shell
14.5	..Reciprocating
14.51	..Connecting conduit
14.52	..Predetermined collapse
14.53	..Plural fluid chambers
14.54	.Claw
14.55	..Fluid control
30	BROODERS AND INCUBATORS
31	BROODERS
32	.Central heater
33	.Fireless

235.14	.Tube structure
235.15	.Headers and connections
235.16	.For plural fluids
235.17	.Having baffles
235.18	.Having seals
235.19	.D-type tube
235.21	..Multiple D-type tubes
235.22	.Wall loop
235.23	.Having specific tube patterns
235.24	.Screens
235.25	..Floor screens
235.26	.Having slag and ash disposal
235.27	.Locomotive-type
235.28	.Having rotary flame
235.29	.Having forced circulation system
235.31	.Having specific intenal drum and head structure
235.32	.With combustion
235.33	.With convection zone regulation
235.34	.With parallel multiple fireboxes
235.35	.With serial multiple fireboxes
238	.Offset firebox
239	.Superimposed firebox
240.1	.Having plural fireboxes
240.2	..Series connected
240.3	..Parallel connected
241	.Firebox in drum
242	.Capillary
243	..Fluid fuel
	.Coil or loop
244	..Central standpipe
245	...Fluid fuel

CLASS 123 INTERNAL-COMBUSTION ENGINES

1 R	MISCELLANEOUS
1 A	..Fuels, lubricants and additives
2	COMBINED DEVICES
3	.Generating plants
200	ROTARY
201	.Reversible
202	.With means to control degree of compression
203	.With combusted gas treatment or handling
204	.With compression volume means in uninterrupted communication with expansion volume means
205	.With fuel injection means
206	..And pump or control means
207	..Into intake port
208	..Into intake chamber
209	..Into prechamber
210	.With ignition means
211	..Plural
212	.With plural compression volume means
213	..In series
214	.With plural expansion volume means
215	..In series
216	.With charge treatment means
217	..Exhaust gas recirculation
218	..Rotor shape
219	..Stratification
220	..Preheating
221	.With transfer means intermediate single compression volume means and single expansion volume means
222	..Isolated charge in movable transfer element
223	..Reciprocating or oscillating compression volume means
224	...Radially spaced from expansion volume means
225	....Abutment acts as compression means
226	....Compression means disposed in rotor
227	.....Vane acts as compression means
228	..Compression volume means circumferentially disposed relative to expansion volume means
229	...Transfer means in rotor
230	...Compression volume is also expansion volume
231	...Vane
232	...Interengaging rotors
233	....Nonparallel axes
234	..Compression volume means axially disposed relative to expansion volume means
235	...Transfer means in rotor
236	...Vane
237	...Abutment
238	...Interengaging rotors
239	..Compression volume means radially disposed relative to expansion volume means
240	...Concentric
241	.With compression, combustion, and expansion in a single variable volume
242	..Planetating rotor
243	..Vane
244	..Abutment
245	..Alternately approaching and receding elements
246	...Eccentric interengaging rotors
247	.Only combustion and expansion of charge in engine
248	..Abutment
249	..Interengaging rotors
18 R	OSCILLATING PISTON
18 A	..Toroidal cylinder
19	LIQUID PISTON
21	CONVERTIBLE CYCLE
22	INTERNAL COMBUSTION AND AIR
23	SOLID FUEL
24 R	GUNPOWDER
24 A	..Single shot gun powder motors
25 R	WATER AND HYDROCARBON
25 A	..Water in charge
25 B	..Water plus heat into charge
25 C	..Water into cylinder
25 D	..Water plus heat into charge
25 E	..Water introduced by mixing with other materials
25 F	..Water plus heat by mixing with other materials
25 G	..Washers and cleaners
25 H	..Washers and cleaners with heat
25 J	..Automatic water control
25 K	..Automatic water control; thermostatic
25 L	..Automatic water control; suction
25 M	..Automatic water control; speed
25 N	..Automatic water control interconnected with throttle
25 P	..Steam injection
25 Q	..Cooling regulation
26	ADDITIONAL AIR SUPPLY
250	ENGINE MEANS HAVING INTERNAL VAPORIZING IN PRECHAMBER WITH ALL COMBUSTION IN MAIN CHAMBER
251	.Whirling in prechamber
252	.Vaporizing by a hot surface of prechamber
253	PRE AND MAIN COMBUSTION CHAMBERS IN SERIES
254	.Chamber temperature control means
255	.Vaporizing in prechamber
256	.Plural prechambers
257	.Two-cycle
258	.Pre and main inlet valves timed relatively (e.g., one valve opens or closes before the other)
259	.Having volumetric relation between pre and main combustion chambers
260	.With ignition means particularly positioned relative to pre and main combustion chambers
261	.With injection means particularly positioned relative to pre and main combustion chambers
262	.Having fluid whirling means
263	..Whirling in prechamber only
264	.Prechamber is carried by a valve
265	.Pre and main chambers form an "L" head
266	.Prechamber assembly inserted in spark plug hole
267	..Separate fuel or combustible mixture added to prechamber
268	.Valveless prechamber
269	.Piston shape complements prechamber discharge
270	.Prechamber liner or coating
271	..With liner mounting means
272	..Including combustion catalyst liner or coating means
273	.Prechamber mounting means
274	.Having combustible mixture forming means
275	..By fuel injection into pre or main combustion chamber
276	...Fuel injected into prechamber formed in piston
277	...By fuel injection into prechamber with carbureted main chamber
278	...By fuel injection into main chamber with carbureted prechamber
279	.Piston carried prechamber
280	.Atomizer, deflector, or shield in prechamber
281	.Prechamber shape is a figure of revolution

	PRE AND MAIN COMBUSTION CHAMBERS IN SERIES
	.Prechamber shape is a figure of revolution
282	..Figure of revolution is multishaped to form a prechamber
283	..Cylindrical
284	..Spherical
285	.Prechamber having a specific shape
286	.Having specific connecting passage means between pre and main combustion chambers
287	..With ignition means in connecting passage
288	..Having fuel, a combustible mixture or air added in the connecting passage
289	..Fluid flow through passage controlled by working piston
290	...With whirling
291	...Multiple connecting passages
292	..With valve means or variable orifice means in the passage
293	..Having multiple passages
294	COMBUSTION CHAMBER MEANS HAVING FUEL INJECTION ONLY
295	.Combustible mixture stratification means
296	.Injector is an integral part of engine valve
297	.Combination igniting means and injector
298	.Injection of fuel onto igniter, deflector, heater or atomizer
299	.Using multiple injectors or injections
300	..Alternating multiple injectors (e.g., series injection)
301	.Injected fuel spraying into whirling fluid
302	.Air entering combustion chamber through plural inlets
303	..Having inlet uncovered by working piston
304	.Injecting diverse fuels or different states of same fuel
305	.Having a particular relationship between injection and ignition characteristics (e.g., nozzle location, spray pattern, timing relative to igniter location, timing)
27 R	BURNING BY HIGHLY COMPRESSED AIR
27 GE	..Gas engines (diesel type) convertible from liquid to gas or operable with liquid and gas
27 A	..Oil engine air preheated
	OIL ENGINES
	.Pump supply to air inlet
37	MULTIPLE EXPLOSION
38	ATMOSPHERIC
39	NONCOMPRESSION
41 R	REVERSIBLE
41 E	..Electrical
41.01	COOLING
41.02	.Automatic coolant flow control
41.03	..Float control
41.04	..Shutters, air valves, dampers or adjustable cowls
41.05	...Temperature and engine operation responsive
41.06	...Servomotor-operated type
41.07	...Interrelated shutter and throttle control
41.08	..Valves for fluid coolant
41.09	...Coolant source bypass
41.1	....Radiator or condenser source
41.11	..Air impeller
41.12	...Temperature-responsive
41.13	.Interrelated coolant flow and throttle control
41.14	.System drained and/or heat-storing
41.15	.Indicators and safety devices
41.16	.Coolant sealed in cylinder valve or piston
41.17	.Coolant released into cylinder or valve passages
41.18	.Convertible
41.19	.Refrigerating cycle
41.2	.With vapor generation and/or condensing
41.21	..Coolant circulation with condensing
41.22	...Intake or carburetor connection
41.23	...Entrained in secondary circuit
41.24	...From top of jacket to bottom of radiator
41.25	...Water bypasses condenser
41.26	...Vapor only circulated
41.27	...Overflow vent to condenser
41.28	.Multiple cylinders with equalized cooling
41.29	.Parallel flow
41.3	.Mixed air and liquid
41.31	.With cooling of additional parts or materials
41.32	..With spark plug heat exchange
41.33	..With lubricant heat exchange
41.34	.Internal cooling of moving parts, e.g., hollow valves, pistons and movable cylinder
41.35	..Piston
41.36	...Telescoping piston and stationary conduits
41.37	...Hollow piston rod
41.38	....Wrist pin type, e.g., nonrigidly connected
41.39	...Side wall opening
41.4	..Rotary valves
41.41	..Poppet-type valves
41.42	.Liquid coolants other than water and water treatment
41.43	.Movably mounted tank or radiator
41.44	.With liquid coolant circulating means
41.45	..Jet pumps
41.46	..Common drive for pump and fan
41.47	..Engine shaft driven
41.48	.Devices for cooling liquid by air flow
41.49	..Fan type
41.5	.Yielding or resilient walls
41.51	.Plural radiators and/or tanks in series
41.52	.Engine or cylinder-mounted heat dissipators
41.53	..Hopper type
41.54	.With vent
41.55	.Combined
41.56	.Air-cooled
41.57	..With liquid cooling
41.58	..Flow-regulating means
41.59	...Adjustable discharge
41.6	..Steam dividing vanes, baffles, conduits or the like for multiple cylinders
41.61	...Individual deflecting cylinder baffles
41.62	...Air duct with discharge ports or conduits
41.63	..With impelling means
41.64	...Jet type
41.65	...Fan type
41.66	....Suction
41.67	..Jacketed cylinder
41.68	...Spiral passages
41.69	..Finned cylinder and/or head
41.7	..Engine encasing air duct, e.g., cowling
41.71	.Plural materials
41.72	.With jacketed head and/or cylinder
41.73	..Jet or spray within jacket
41.74	..Multiple cylinder
41.75	..Reentrant head
41.76	..With cooled valve seats or guides

	COOLING
	.With jacketed head and/or cylinder
	..With cooled valve seats or guides
41.77	...Poppet-type valves
41.78	...Cylinder side-wall valves
41.79	..With passages, baffles, etc.
41.8	...Spiral passages
41.81	..Cylinder jacket supported solely by cylinder
41.82 R	..With head-cooling arrangements
41.82 A	....Composite head
41.83	..Cylinder detachable
41.84	...Flanged cylinder or liner
41.85	.Valve seats or guides
41.86	CRANKCASE VENTILATION
42	OSCILLATING CYLINDER
43 R	ROTATING CYLINDER
43 A	..Parallel to shaft
43 AA	...Parallel to shaft cam track
43 B	..Toroidal cylinders
43 C	..Cam transmission
44 R	.Radial
44 A	...Wheel
44 B	...Combustion chamber is center of star
44 C	...Two-cycle
44 D	...Valve casing-cylinders have no valves but have ports which register with ports in casing
44 E	...Cam transmission
45 R	ROTARY RECIPROCATING PISTON
45 A	..Piston and crankshaft coaxial
46 R	FREE PISTON
46 A	..Two chambers; one piston
46 B	..Phasing means between two or more units
46 SC	..Single chamber; one piston
46 E	..Electric generating means
46 H	..Hammer
47 R	VALVED PISTON
47 A	..Charge passes from crankcase through valve in piston
47 AA	..Lost motion connection actuates valve
47 AB	..Inlet and exhaust valve in piston
48 R	ADJUSTABLE COMBUSTION CHAMBER
48 A	..Piston in head adjusted manually or mechanically
48 AA	..Piston in head adjusted
48 B	..Piston varied by means in crankshaft, connecting rod or piston
48 C	..Cylinder or sleeve-moved
48 D	..Auxiliary chamber
50 R	RECIPROCATING CYLINDER
50 A	..Four-cycle
50 B	..Two-cycle
51 R	MULTIPLE PISTON
51 A	..Four-cycle
51 AA	...Four-cycle separate crankshaft for piston
51 AC	...Two or more combustion chambers between the piston
51 B	..Two-cycle
51 BA	...Two-cycle separate crankshaft for piston
51 BB	...Piston offset from crankshaft
51 BC	...Plural combustion chamber and plural piston
51 BD	...Inlet or exhaust ports in two or more planes
52 R	MULTIPLE CYLINDER
52 A	..Two or more crankshafts
52 B	..Annular piston
52 M	..Manifolds
52 Mb	..Balancing tubes
52 ML	..Manifold has return loop to inlet
52 MV	..Manifold for V-type engines
52 MF	..Back flow-prevention valve
52 MC	..Manifold and block construction
53 R	.Simultaneous expansion
53 A	...Four-stroke cycle
53 AA	....Four-stroke cycle, two crankshafts
53 B	...Two-stroke cycle
53 BA	....Two-stroke cycle, two crankshafts
53 BP	...Single piston divides cylinder into two chambers
53 C	...Three or more crankshafts
54 R	.Cylinders offset
54 A	...Crankshaft between parallel cylinders
54 B	...Crankshaft at one side of opposed cylinders
55 R	.Cylinders radiating
55 A	...Star
55 AA	....Radial cylinder cam transmission
55 AB	....Shields, cowls and manifolds
55 AC	....Star-type valve gear
55 VF	...Four cylinder "V" type
55 VS	...Six cylinder "V" type
55 VE	...Eight cylinder "V" type
55 V	...More than eight cylinder "V" type
55 SR	...Semiradial
56 R	.Cylinders opposite
56 A	...Four-cycle
56 AA	....Cylinder opposite and offset
56 AB	....Cylinder opposite and crankshaft offset
56 AC	....Cylinder opposite and aligned
56 B	...Two-cycle
56 BA	....Cylinder opposite and offset
56 BB	....Cylinder opposite and crankshaft offset
56 BC	....Cylinder opposite and aligned
56 C	...Cam transmission
57 R	.Cylinders tandem
57 A	...Four-cycle
57 B	...Two-cycle
58 R	.Cylinders parallel
58 A	...Cam plate type
58 AA	....Single bank of cylinders
58 AB	....Motion converting means between two banks
58 AM	....Multiple cam drive
58 B	...Swash plate type
58 BA	....Single bank of cylinders
58 BB	....Motion converting means between two banks of cylinders
58 BC	....Multiple swash plate drive
58 C	...Shaft rotates through piston
59 R	.Cylinders longitudinal
59 A	...Four-cycle
59 B	...Two-cycle
59 BA	...Lengthwise scavenging
59 BS	...Step piston (see sub. 65S)
59 BL	...Lengthwise scavenging of cylinders
59 AB	...Long reciprocating valve
59 BM	...Exhaust gases of pressure pulse for charging cylinders
59 EC	...Exhaust to next cylinder ready to fire
59 AL	...Long rotary valve
59 AT	....Tapered
59 AC	...Sleeve valve
59 AD	...Disc valve
59 NB	...Inclined base
59 PC	...Plural carburetors
60	..Cranks coincident
	DOUBLE-ACTING
61 R	.Two-cycle
61 V	...Lengthwise scavenging of cylinders from cylinder head to piston
62	..Combined pump and motor cylinder
63	.Four-cycle
64	SIX-CYCLE
65 R	TWO-CYCLE
65 PE	..Exhaust ports
65 A	..Inlet and exhaust ports in two or more planes
65 B	..Pumps

	TWO-CYCLE
65 BA	..Blowers
65 PD	..Port deflectors
65 E	..Scavenging by inertia of exhaust gas and charging by use of pressure waves
65 S	..Step piston (see sub. 59 BS)
65 V	..Valves
65 VA	...Sleeve valve
65 VS	...Sleeve driven by auxiliary crankshafts
65 VB	..Lengthwise scavenging list above
65 VC	..Lengthwise scavenging exhaust above
65 VD	..Intake and exhaust valve in top of cylinder
65 W	..Whirl through piston-controlled ports
65 WA	...Whirl in top of cylinders and lengthwise scavenging
65 WV	..Vacuum intake
65 SP	..Single port for inlet and exhaust
65 EM	..Exhaust manifolds
65 P	..Ports
66	.Combined pump and motor cylinder
67	.Divided pump discharge
68	.Pump compression
69 R	.Separate air and gas pumps
69 V	...Lengthwise scavenging of cylinder by gas from cylinder head to piston
70 R	.Pump and cylinder adjacent
70 V	...Lengthwise scavenging of power cylinder
71 R	.Pump and cylinder coaxial
71 V	...Lengthwise scavenging of cylinder from head to piston
71 VA	...Sleeve valve
72	.Pump and cylinder inclined
	.Rear compression
73 R	..Crankcase
73 A	....Fuel to crankcase
73 AA	....Ported piston
73 AV	.....Valved
73 AB	....Inlet valve in head
73 AC	....Varies compression space
73 AD	....Lubricant oil and fuel mixing devices
73 AE	....Auxiliary piston moves synthronously with piston to enlarge volume of crankcase or incoming charge
73 AF	....Crankcase compression with auxiliary pump means
73 B	....Fuel to bypass
73 BA	.....Lengthwise scavenging of cylinders from head
73 C	....Fuel to cylinder
73 CA	.....Lengthwise scavenging of cylinders from head
73 CB	.....With liquid pump to separate inlet
73 CC	.....With gas or vapor pump to separate
73 D	....Disc valves
73 DA	.....Charge to crankcase through crankshaft
73 E	....Reentrant cylinder head
73 F	....Stepped piston
73 FA	.....Ported
73 S	....Supercharging of crankcase
73 V	....Valves for crankcase
73 SC	....Returns charge to crankcase or rejects to exhaust
73 PP	....Distinct passages from crankcase to cylinder
73 SP	....Slow-speed operation
74 R	..Cylinder
74 A	....Fuel to rear of piston
74 AA	.....Lengthwise scavenging from head
74 AP	....Reduced portion of piston acts as guide
74 AC	....Cross head between piston and crank
74 AE	....Enclosed crankcase
74 B	....Lengthwise bypass
74 C	....Lengthwise cylinder combustion space
74 D	....Slide valve between chamber of pump and crankcase
306	MEANS TO WHIRL FLUID BEFORE, UPON OR AFTER ENTRY INTO COMBUSTION CHAMBER
307	.Structural projection on working piston causes whirling
308	.Having multiple oxidant inlet means
309	.Specific spark plug location
310	COMBUSTION CHAMBER HAVING MULTIPLE SPARK GAPS
311	FOUR-CYCLE
312	.Engine cylinder having a reciprocating sleeve valve
313	..Having a junk ring seal
314	..Having sleeve valve lubrication means
315	.Multiple exhaust
316	.Having subcharger associated with the cylinder
317	.Crankcase compression of air or combustible mixture to be subsequently pumped into the working cylinder
318	.Rear compression of air or combustible mixture to be subsequently pumped into the working cylinder
76	.Scavenging
77	.Single revolution
78 R	.Variable clearance
78 A	...Piston in head adjusted mechanically
78 AA	....Piston in head adjusted by fluid means
78 B	...Varying means is in the piston
78 BA	....Varying means is in the piston connection
78 C	...Cylinder or sleeve moved
78 D	...Auxiliary chamber
78 E	...Varying means is in the connecting rod
78 F	...Varying means is in the crankshaft
79 R	.Single poppet valve
79 A	...Rotary valve and poppet which extends through rotary valve
79 C	...Concentric valves; relatively movable
80 R	.Rotating valve
80 BA	...Rotary valve is perpendicular to cylinder
80 BB	...Rotary valve is parallel to cylinder
80 C	...Sleeve valve
80 D	...Disc valve
80 DA	...Rotary plug
81 R	.Oscillating valve
81 B	...Oscillating valve - not sleeve or disc
81 C	...Sleeve valve
81 D	...Disc valve
82	.Rotating side shaft
83	.Rotating transverse shaft
84	.Adjacent supply and exhaust valves
85	.Aligned supply and exhaust valves
86	.Opposite supply and exhaust valves
87	.Longitudinal valve and lever
88	.Transverse valve and lever
89	.Transverse valve and bell crank
319	ENGINE SPEED REGULATOR
320	.Responsive to deceleration mode (e.g., engine acting as a brake)
321	..Valve timing altering means (e.g., axially sliding cam shaft)
322	...Electrical means adapted to alter valve timing
323	..Exhaust throttling or blocking
324	..Part of the air or combustible mixture to the engine cylinder omitted
325	..Deceleration responsive cutoff of fuel to engine (e.g., pollution control)

ENGINE SPEED REGULATOR
.Responsive to deceleration mode (e.g., engine acting as a brake)
..Deceleration responsive cutoff of fuel to engine (e.g., pollution control)
326 ...Rich resupply of fuel at end of deceleration
327 ..Auxiliary air fed to the engine
328 ..Idle jet bypassed by a slight opening of the throttle
329 ..Having means to retard spark (e.g., ignition timing)
330 .Engine speed reduction by overriching the combustible mixture (e.g., choking engine)
331 ..By electric means
332 .Engine speed reduction by fuel cutoff
333 ..By electric means
334 .Engine speed reduction by partial or complete omission of the ignition
335 ..By electric means
336 .Having plural throttle valve structure
337 .Specific throttle valve structure
338 .Fuel injection pump bypass control
339 .Idle speed control
340 .Regulation responsive to a plurality of sensed engine conditions
341 ..Vacuum sensing
342 .Regulator changes length of accelerator linkage
343 .Regulator accessory (e.g., cleaner, adjusting tool, etc.)
344 .Charge proportion varying (e.g., the fuel-air ratio is varied)
345 .By changing valve lift
346 ..Intake valve lift altered
347 .By changing valve timing
348 ..Intake valve timing altered
349 .Having condition responsive means with engine being part of a closed feedback system (e.g., cruise control)
350 ..Electrical sensing or regulating
351 ...Engine overspeed sensing with an indicator, or alarm, and speed regulation
352 ...Engine speed sensing having an error signal producing circuit
353 ....Having variable duty cycle multivibrator (e.g., length of "time on" in each cycle)
354 ....Having variable frequency multivibrator (e.g., number of "time ons" per unit of time)
355 ....Having phase difference detector
356 ....Circuit resonates (e.g., tuned) at governed speed
357 ....Electric fuel injection pump governor
358 .....Max-min governor (i.e., no control in between)
359 .....Fail-safe feature (e.g., cuts off fuel pump)
360 ....Circuit controls a fluid throttle operator (e.g., vacuum)
361 ....Circuit controls an electric throttle operator
362 ...Cold engine control
363 ..Mechanical sensor or regulator
364 ...Fuel injection pump governor (e.g., diesel)
365 ....Governor override
366 .....Engine starting or warm-up control
367 .....Variable throttle or control rod stop
368 .....Idle control after starting (e.g., warm engine)
369 ....Three-dimensional cam control
370 ....Acceleration responsive
371 ....Deceleration responsive
372 ....Biased axial link (e.g., sliding rod with spring return)
373 ....Pivoted link connected to pump rack
374 .....Movable fulcrum (e.g., slot and pin)
375 ...Fuel injection pressure governor
376 ...Throttle positioning
377 ....Safety override of dangerous manual position
378 ..Fluidic sensor or regulator
379 ...Fuel injection pump governor
380 ....Barometric sensor
381 ....Fuel viscosity sensor (e.g., temperature sensing)
382 ....Manifold pressure sensor
383 .....Supercharger
384 ....Floating piston-type governor (e.g., Bessiere)
385 ....Liquid fluid governor
386 .....Lubrication pressure sensor
387 .....Fuel pressure sensor
388 .....Override for basic mechanical governor
389 ...Intake manifold vacuum responsive
390 ...Fuel injection pressure governor
391 ...Responsive to intake airflow
392 ...Responsive to cooling fan airflow
393 ...Responsive to exhaust gas
394 ..By combustion air or air-fuel mixture cutoff
395 .Open loop condition responsive
396 ..Resistance or override acts on input connection to regulator
397 ...Shutdown safety device
398 ...Throttle position lock
399 ..Having an electrical device between input and speed regulator
400 ..Mechanical connection between input and speed regulator
401 ..Fluidic device between input and regulator
402 .Charge volume varying (e.g., total amount of mixture fed to engine is varied; relative amounts of air and fuel are fixed)
403 ..Throttling (e.g., volume varying using throttle valve)
404 ..Suction operated supply valve lift regulating
405 ..By engine operated valve
406 SPARK IGNITION TIMING CONTROL
407 .Vacuum timing control
408 ..Multiple diaphragms
409 ..Fluid delay in fluid path line from vacuum source
410 ..Including sensor responsive to barometric pressure to alter vacuum level
411 ..Increasing vacuum retards the spark
412 .Barometric pressure responsive controller
413 .By mechanical or hydraulic link to throttle valve or accelerator
414 .Having engine shaft position sensor
415 .Analog electronic control
416 .Digital electronic control
417 ..Having microprocessor
418 .Speed responsive
419 ..Responsive to instantaneous changes in engine speed (e.g., roughness)
420 ..Centrifugal timing mechanism
421 .Ambient or engine temperature responsive
422 .Acceleration responsive
423 .Deceleration responsive

SPARK IGNITION TIMING CONTROL
424 .Starting or cold running condition responsive
425 .Cylinder pressure or cylinder temperature responsive
426 .Feedback correction
427 .Timing control derived from ignition capacitor
428 .Having circuit that alters response of an oscillatory engine shaft position sensing circuit
429 COMBUSTION CHAMBER MEANS COMBINED WITH AIR-FUEL MIXTURE FORMING MEANS
430 .Stratification in combustion chamber
431 .Having a single combustible mixture inlet combined with means for injecting additional fuel into the combustion chamber
432 .Air or combustible mixture entering the combustion chamber through plural inlets
433 ..One inlet is uncovered by piston travel
434 CHARGE FORMING DEVICE (E.G., POLLUTION CONTROL)
435 .Including cylinder pressure or temperature responsive means
436 .Including means responsive to instantaneous change in engine speed
437 .Auxiliary control of carburetor fuel metering
438 ..By electrical or electronic control system
439 ...Variable venturi carburetor
440 ...Exhaust gas condition responsive
441 ..By mechanical speed sensor
442 .Injection or carburetion system having a series of throttle valves
443 .Alternate or simultaneous lean-rich
444 .Having fluidic logic control means
445 .Fuel injection system
446 ..Fuel pump flow regulation
447 ...With accumulator
448 ...Sequential distributor
449 ....Rotary and reciprocating distributor
450 ....Rotary distributor
451 ....Reciprocating distributor
452 ...Nonsequential distributor
453 ....Enrichment of the combustible mixture for cold starting or cold running
454 ....Equal pressure valve type
455 ....Distributor and metering unit are in common housing
456 ....Common rail system
457 ...Regulating means adjust fuel pressure
458 ....Electric regulator
459 ....Bleed off valve
460 ....Series regulator
461 ....Having vapor returned to tank or pump inlet
462 ....By throttle control
463 ....Manifold pressure responsive
464 ....Temperature responsive
465 ....Barometric responsive
466 ....Having an antitampering device
467 ..Drip prevention means at injector nozzle
468 ..Having a specific shape, material, or location of fuel line
469 ...Specific fuel line mounting means
470 ..Injection nozzle mounting means
471 ...Nozzle isolated from manifold vacuum effect
472 ..Electrically actuated injector
473 ...Mechanically actuated switching
474 ....Ignition distributor used as switch
475 ...Actuated by ignition pulse
476 ...Magnetically actuated switching
477 ...Radiation actuated switching
478 ...Actuator circuit (e.g., engine condition responsive electronic circuit actuates injector valve)
479 ....Backup systems, fail-safe, failure indicator
480 ....Having microprocessor
481 ....Engine cylinder cutout
482 ....Circuit activates valve for continuous fuel flow
483 ....Having plural multivibrators
484 ....Having single multivibrator
485 ....Having ramp generator
486 ....Having a digital memory addressed by an engine parameter
487 ....Having an up or up-down counter in circuit
488 ....Subcircuit operates on a parameter sensor output before input to main fuel control (e.g., function generator)
489 ....Exhaust gas sensing
490 ....Injector solenoid drive
491 ....Starting condition responsive
492 ....Acceleration or full load condition responsive
493 ....Deceleration condition responsive
494 ....Having specific transducer
495 .With fuel pump
496 ..Variable rate of injection stroke
497 ..Electric fuel pump
498 ...Piezoelectric drive
499 ...Solenoid drive
500 ..Variable beginning and ending of pumping stroke
501 ..Variable beginning of pumping stroke
502 ...Fluid pressure control
503 ..Variable ending of pumping stroke
504 ..Variable stroke
505 ..Fuel pump and intake air controls interconnected
506 ..Having pressure relief valve
507 ..Pumping member driven by a piston or valve of the internal combustion engine
508 ..Pumping member driven by the internal combustion engine valve operating mechanism
509 ..Specific location or mounting of pump
510 .Fuel flow regulation between the pump and the charge forming device
511 ..Regulator means adjusts fuel pressure
512 ...Engine parameter responsive
513 ...Environmental condition responsive
514 ..Excess fuel returned to tank
515 ..Regulator controls flow of a plurality of fuels
516 ..Air or fuel vapor purging system
517 ..Carburetor float bowl drain
518 .Having fuel vapor recovery and storage system
519 ..Having an adsorbent canister
520 ...Purge valve controlled by engine parameter
521 ....Responsive to secondary air pressure
522 .Liquid fuel evaporating by submerged air supply
523 .Liquid fuel evaporating by extended fuel film
524 ..Screen or mat
525 .Combined liquid and gaseous fuel
526 ..Diesel engine convertible from liquid to gas
527 .Gaseous fuel and air mixer
528 ..Supercharged engine
529 ..Safety device (e.g., cutoff)
530 .Constant flow fuel supply

CHARGE FORMING DEVICE (E.G., POLLUTION CONTROL)
531 .Auxiliary air or gas used to inject fuel
532 ..Air is bled from the cylinder on the compression stroke in that cylinder
533 ..Having a separate pump for the air or gas
534 ..Air is bled from another engine cylinder
535 ..Constant fuel level
536 .Combustible mixture ionization, ozonation, or electrolysis
537 ..Before intake valve (e.g., in manifold)
538 ..Fuel only
539 ..Air only
540 .Cooling of combustible mixture
541 ..Fuel only
542 ..Air only
543 .Heating of combustible mixture
544 ..Lighter fuel is used during starting
545 ..Heating meduim surrounds combustible mixture
546 ..Combustible mixture surrounds heating medium
547 ..Combustible mixture and heating meduim adjoin one another
548 ..Trap for liquid particle vaporization
549 ..Electric heater
550 ..Combustion heater
551 ...Part of combustible mixture is burned
552 ..Automatic control
553 ..Intermediate fluid used for heating
554 ..Combustible mixture, air, and fuel are heated separately
555 ..Air and fuel heated separately
556 ..Air only
557 ..Fuel only
558 ...Fuel is heated to ignition temperature
559.1 .Supercharger
559.2 ..Pressure exchange with exhaust gas
559.3 ..With clutch
560 ..Two-cycle compressor feeds a four-cycle engine
561 ..Variable ratio compressor driven supercharger
562 ..Multiple superchargers
563 ..Intercooler
564 ..Boost control
565 ..Supercharger is driven independently of the engine
566 ..Funnel type supercharger (e.g., ram-air)
567 .Oxidant is solely oxygen
568 .Exhaust gas used with the combustible mixture (e.g., emission control e.g.r. valve)
569 ..Diesel engine
570 ..Exhaust gas cooled before recirculation
571 ..Electrical control of e.g.r. valve (e.g., between exhaust gas and intake manifold)
572 .Crankcase vapor used with combustible mixture
573 ..Vapor treated before mixing with combustible mixture (e.g., cooling)
574 ..Specific control valve (e.g., PCV valve)
575 .Diverse fuel supply
576 ..Fuel switched in response to engine starting condition
577 ..Fuel switched, condition responsive to load
578 ..Fuel switched in response to engine temperature
579 .Multiple carburetors
580 ..Each carburetor feeds a cylinder or group of cylinders (e.g., split engine)
581 ..Separate carburetor for starting
582 ..Separate carburetor for high load
583 ..With linkage between carburetor throttle valves
584 ...Staged opening of carburetor throttle valves
585 .Auxiliary air or oxygen added to combustible mixture
586 ..Oxidant controlled by throttle
587 ..Oxidant controlled by intake manifold vacuum
588 ..Oxidant controlled by engine temperature
589 ..Oxidant controlled by exhaust gas content
590 .Charge mixing device intake (e.g., device which insures the atomization of the combustible mixture)
591 ..Having liquid fuel collector
592 ..By fan means
593 ..By screen means
594 HIGH TENSION IGNITION SYSTEM
595 .Retrofit conversion ignition unit
596 .Using capacitive storage and discharge for spark energy
597 ..Regulating sensed ignition capacitor voltage
598 ..Having an oscillator
599 ..Having a magneto
600 ...Triggering voltage obtained from capacitor charging winding
601 ...Specific design of charge or trigger winding core
602 ...Having controllable timing means
603 ...Antireverse protection
604 ..Inductive capacitive discharge system
605 ..Having a specific capacitor, ignition coil means, or switching element circuit path
606 .High frequency ignition system
607 ..Free running oscillator supplies coil primary
608 ..Having a specific spark plug
609 .Having dwell control
610 ..Using a monostable multivibrator
611 ..Dwell maintained at constant value
612 .Having engine component position sensor
613 ..Optical sensing
614 ..Including a zero crossing detector
615 ..Includng an oscillator
616 ..Piezoelectric sensor
617 ..Inductive or magnetic sensor
618 .Having specific trigger circuitry
619 ..Oscillatory trigger circuit
620 .Additional spark energy supply
621 .Having an ignition coil with multiple primary or secondary windings
622 ..Separate circuit for each winding
623 .Having supply voltage regulation
624 .Having ballast resistor cut out or control
625 .Responsive to engine or environmental condition
626 ..Oscillator or trigger circuit responsive to engine condition
627 .Having auxiliary spark gap in series or parallel with the coil
628 .Having a continuous high voltage output to the high voltage distributor
629 .Monostable multivibrator controls timing of coil primary current
630 .Safety device
631 ..Reverse engine rotation protection

	HIGH TENSION IGNITION SYSTEM
	.Safety device
632	..Ignition switch opened when engine stops
633	.Radio interference protection
634	.Having a specific ignition coil
635	.Specific coil location
636	.Multiple spark ignition system
637	..System fires single spark plug per cylinder
638	..System fires multiple spark plugs per cylinder
639	..System using vibrator for multiple sparks upon starting
640	.Dual systems
641	..One for starting
642	.Piezoelectric voltage generator
643	.Electronic cylinder sequencing
644	.Current or voltage sensing in coil primary
645	.Maverick spark suppressor
646	..Point bounce or arc suppression system
647	.Having a specific mounting of system component
648	.Having SCR triggered by lowering cathode voltage below ground
649	.Multiple primary current interrupters
650	.Power supply, ignition coil primary and interrupter element all in series
651	..Interrupter is multiple transistor circuit
652	..Interrupter is single transistor
653	..Additional capacitor other than breaker point capacitor is in series with coil primary or secondary
654	..Additional capacitor other than breaker point capacitor is in parallel with coil primary or secondary
655	..Diode is in series with coil primary or secondary
656	..Diode is in parallel with coil primary or secondary
90.1	POPPET VALVE OPERATING MECHANISM
90.11	.Electrical system
90.12	.Hydraulic system
90.13	..With manifold and distributor
90.14	.Pneumatic system
90.15	.With means for varying timing
90.16	..Cam-to-valve relationship
90.17	..Camshaft or cam characteristics
90.18	...Axially shiftable camshaft
90.19	.With temperature compensation
90.2	.With compound movement of cam follower
90.21	.Follower displaced axially of camshaft
90.22	.Plural valve trains, single actuator
90.23	..Intake and exhaust
90.24	.Valve driven closed
90.25	..By valve-opening rocker
90.26	..By cam-actuated unitary follower
90.27	.Overhead camshaft
90.28	.With nonvalving movement (e.g., about valve stem)
90.29	..Oscillating movement converted internally
90.3	..Positive rotation provided by internal means
90.31	.Camshaft drive means
90.32	.With alternate interruption of drive train
90.33	.Lubrication
90.34	..Camshaft
90.35	..Tappet as conduit
90.36	..Rocker fulcrum as conduit
90.37	..Seals and shields
90.38	..Housings
90.39	.Rocker
90.4	..Plural valves
90.41	..Individually fulcrumed
90.42	...Rotation prevention
90.43	...Lash adjustment at fulcrum
90.44	..Cam engaged
90.45	..Lash adjustment
90.46	...Hydraulic
90.47	..Yieldable engagement
90.48	.Tappet
90.49	..Cushion and silencer
90.5	..Rotation prevention
90.51	..Composition, surface treatment manufacture
90.52	..Lash adjustment
90.53	...Self-operating
90.54	....Screw
90.55	....Hydraulic
90.56	.....Pressure flow upwardly into pressure chamber
90.57	.....Vent or bleed means for pressure chamber
90.58	.....Self-contained
90.59	.....With provision for horizontal positioning
90.6	.Cam
90.61	.Rod
90.62	..Self-adjusting
90.63	...Hydraulic
90.64	..Pull type
90.65	.Spring
90.66	..Attenuated
90.67	..Seat and retainer
143 R	IGNITERS
143 A	..High compression igniters
143 B	..Special charge igniters
143 C	..Insulated casing enclosing wires leading to plugs, distributor, etc.
144	.Flame
145 R	.Incandescent
145 A	...Electric (incandescent ignitors using electricity as a source of heat)
146	..Valve controlled
146.5 R	.Sparkers
146.5 A	...Timers
146.5 B	...Ignition locks
146.5 C	...Fluid level or pressure-actuated ignition switches
146.5 D	...Devices for opening the ignition circuit when engine stops in order to save battery
147	..Low tension
149 R	..Dynamos
149 A	....Inductor type
149 B	....Impulse starters
149 C	....Timing means
149 D	....Flywheel type
149 E	....Oscillating armature type
149 F	....Special waveforms
149 FA	.....Double current generators
149 G	....Movable pole shoes and bell-magnets
149 H	....Reciprocating
150	..Combined adjusting and exhaust regulating
151	..Combined sparker and valve
152	..Combined valve and sparker operating
169 R	..Plugs
169 CL	....Cleaners automatic
169 CM	.....Cleaners manual
169 CA	....Compound insulation
169 CB	....Core retaining
169 DW	....Disk wrappings type
169 EL	....Electrodes
169 EA	....Adjustable gap
169 EB	....Replaceable electrode
169 EC	....Adjustable and replaceable
169 C	....Cool
169 E	....Insulated electrodes
169 G	....Intensity in gap only
169 P	....Insulating protecting

	IGNITERS
	.Sparkers
	..Plugs
	....Insulating protecting

153	..Make and break
154	...Electromagnetic
155	...Pneumatic
162	...Piston-operated
156	...Reciprocating electrode
157	...Rocking-electrode hammer action
158	...Rocking and rigid electrodes
159	...Rocking and yielding electrodes
160	...Oscillating electrodes
161	...Rotary electrodes
163	...Stationary-electrode structure
164	...Adjusting mechanism
192 R	COMPENSATING DEVICES
192 B	..Balancing arrangements
197 R	TRANSMISSION MECHANISM
197 A	..Piston
197 AB	..Connecting rod
197 AC	..Crankshaft and connecting rod
197 C	..Transmission with clutches
179 R	STARTING DEVICES
179 A	..Starting plus some engine function
179 B	...Function is electrical
179 BG	....Electrical function is ignition
179 C	..Manual control
179 D	..Generators and auxiliary
179 E	..Auxiliary engine
179 F	..Fluid-starting motors
179 G	..Starting and fuel control
179 H	..Charge and cylinder heating
179 J	..Inertia starters
179 K	..Interlock between the starter and transmission
179 L	..Fuel injection
179 M	..Electric motor structure
179 N	..Auxiliary magneto
179 SE	..Small engine starters (lawn mowers)
179 CC	..Centrifugal clutch
179 P	..Combined power and manual starters (work together or alternately)
179 AS	..Airplane starters (for fluid-operated see 123/179 F) (for hand-operated see 123/185 D)
179 S	..Potential motor starters - spring motors
179 T	...Spring is wound by the wheels of the vehicle
180 R	.Combustible-mixture supply
180 A	...Taking out fuel, carborating same, and reinjecting
180 AC	...Acetylene or alcohol used as the starting fuel
180 E	...Electrical attachments
180 EH	...Exhaust heating
180 P	...Pumps
180 T	...Thermostats
187.5 R	.Primers
187.5 P	...Priming cups
183	.Gunpowder
182	.Compression relieving
185 R	.Mechanical
185 A	...Cable or rope
185 B	...Wound on a pulley - with spring provided to keep cable or rope taut
185 BA	....Spring is helical wound
185 BB	....Lever connected to the rope or cable
185 C	....Lever or slide
185 CA	....Lever or slide actuates a gear segment
185 D	...Means to be started is an airplane or toy airplane
185 F	...Connection between the main shaft of the engine and the operating means is a friction means
185 G	...Connection between the main shaft of the engine and the operating means is a threaded member
185 N	...Connection between the main shaft of the engine and the operating member is a worm gear
185 P	...Operating member is a crank
185 S	....Means provided to prevent counter rotation of crank
186	..Spark delaying
184	.Igniters
142.5 R	WITH HEATING MEANS
142.5 E	..Electric heaters for heating cooling system
657	COMBUSTION CHAMBER
658	.L- or T-shaped
659	.Having groove to aid combustion
660	.An acoustic cavity used to attenuate detonation shock waves (e.g., Bodine)
661	.having squish area
662	.Multiple annular combustion chambers
663	.Annular combustion chamber
664	.Combustion chamber shape is a figure of revolution
665	..Spherical
666	..Hemispherical
667	.Asymmetric combustion chamber
668	.Having coating or liner
669	..With means for mounting coating or liner
670	.Having catalytic cambustion aid
671	.Cylinder head shape conforms to piston shape
193 R	CYLINDER AND PISTON CONSTRUCTION
193 C	..Novelty in cylinder
193 CH	..Novelty in cylinder and/or head
193 CP	..Novelty in cylinder and/or piston
193 H	..Head
193 P	..Piston
188 R	VALVES
188 A	..Poppet valves (some sodium filled and some hollow)
188 AA	..Poppet valve materials, structures, etc.
188 B	..Reciprocating valves - not poppet or sleeve
188 C	..Sleeve
188 P	..Packing
188 VA	..Valve accessories
188 S	..Seat valve relation
188 GC	..Guides and/or lubricant and/or cooling
188 AF	..Auxiliary function
188 SA	...Spring and wear compensation
188 SB	...Spring seats
188 M	..Intake manifold shape to valve
188 N	..Shepherd-type engine
188 AP	..Pivoted poppet
188 SC	..Springs concentric with valve stems
189	.Detachable
190 R	.Rotary
190 A	...Single function, i.e., exhaust and intake by separate tube
190 AA	...Rotary valve-controlled crankcase
190 B	...Double function
190 BA	....Double-function valve between two or more cylinders
190 BB	....Long rotary double-function valve
190 BC	.....Tapered
190 BD	....Single double-function valve in horizontal plane above cylinder
190 BE	.....Tapered

	VALVES
	.Rotary
	...Double function
190 BF	....Single double-function valve in horizontal plane on the side of the cylinder
190 C	...Sleeve
190 CA	....Sleeve valve lubrication
190 D	...Disc, cone, sphere valves
190 DA	....Valve controls plural cylinders
190 DL	...Lubricants
190 E	...Seals
195 R	FRAME CONSTRUCTION
195 A	..Auxiliaries, brackets
195 C	..All covers
195 E	..Electrical
195 P	..Outboard motor frames
195 S	..Sheet metal frames
195 AC	..Inclined cylinder
195 H	..Horizontal stress members
195 HC	..Horizontal cylinder
196 R	LUBRICATORS
196 A	..Filtering
196 CP	..Crankcase, pressure control
196 AB	..Heating and cooling
196 M	..Upper cylinder lubricants
196 S	..Safety devices
196 V	..Sleeve valve lubrication
196 W	..Vertical shaft
198 R	ACCESSORIES
198 A	..Decarbonizers and antiknocks
198 B	..Antitheft valves and locks
198 C	..Pumps
198 D	..Safety devices
198 DA	..Bearing wear, cylinder, oil drain, auto ignition
198 DB	..Fuel cut-off
198 DC	..Ignition cut-off control
198 E	..Covers, trays, vibrators, corrosion inhibitors, air filters
198 F	..Cylinder cut out
198 P	..Pressurizing - crankcase, clutch housing, transmission housing

DIG 13	Gas

CLASS 124 MECHANICAL GUNS AND PROJECTORS

DECEMBER 1990

2	COMBINED WITH CAP EXPLODER
3	ELECTROMAGNETIC
54	ELECTRICALLY ACTUATED PROJECTILE STRIKER
4	CENTRIFUGAL
5	.Hand
6	.Mechanical
7	..Spring
8	...Rotating about vertical axis
9	....Automatically varied throwing angle
10	PINCH
55	PROJECTOR FOR IMPELLING PUFF OF GAS ONLY
56	FLUID PRESSURE
57	.Self-contained in projectile or projectile-carrying cartridge
58	.Adapter for coverting projector force or projectile
59	.Having common supply to plural projector barrels
60	.Provided by surge of pressure into evacuated projector barrel
61	.Applied to intermediate projectile-engaging member
62	.Provided by user's mouth or lungs
63	.Provided by movement of user-actuated, projector-mounted pressure member
64	..To create surge of pressure
65	...By plunger moving within cylinder
66	....By spring-driven plunger
67	.....Within cylinder having diameter larger than projector barrel
68	......With recoil-absorbing mechanism
69	..To store pressure in valved container
70	.With check valve permitting recharge, and control valve for discharge, of fluid pressure
71	.With control for discharge of fluid pressure
72	..For continual projection of successive projectiles (e.g., for "rapid fire", etc.)
73	..By valve means
74	...For discharge of pressure from removably mounted cartridge
75	...Opened by fluid pressure-actuated means
76	...Opened by spring-actuated means
77	...Opened by electrically actuated means
16	SPRING
17	.Elastic band
18	..Self-projected band
19	...Repeating
20.1	..Having handle (e.g., crotch type slingshot)
20.2	...Magazine handle
20.3	...Arrow or dart projector
21	..Guided projectile
22	...Dart or arrow projector
23.1	.Bow
24.1	..Having projectile guide
25	...Crossbow
25.5	...Having projectile supply
25.6	..Compound bow
25.7	..Having projectile supply
26	.Guided projectile
27	..Gun type
28	...Converted firearm
29	...Mounted
78	PROJECTILE IMPELLED BY COACTING WHEELS
79	PROJECTILE IMPELLED BY USER-PROVIDED FORCE
80	ELEMENT
31	.Trigger or releasing mechanism
32	..Electrical
33	..Chance operated
34	..Remote
35.1	..Cord or band
35.2	...Bow lock or archery trigger for compound or long bow string
36	..Swinging arm release
37	..Plunger release
38	...Variable force
39	...Continuous firing
40	..Safety lock
41.1	.Projectile holder or carrier
42	..Disk
43	...Disk target clip or carrier
44	..Boomerang
44.5	..For longbow or compound bow
44.6	..Magnetic restraint
44.7	..Fluid overcomes restraining force
45	.Magazine
46	..Disk target
47	...Gravity fed
48	..Rotary
49	..Gravity fed
50	...Having cut-off
51.1	..Mechanical projectile feed
52	...Spring
53	....Having cut-off
53.5	...Fluid projectile feed
81	.Means for producing projectile spin or deflection
82	.Means for feeding projectile or ejecting cartridge
83	.Projector barrel
84	..On convertible or adjustable projector
85	..With surrounding cylinder
86	.For archery projector
87	..Bow sight
88	..Bow handle or attachment thereto
89	...For stabilization thereof
90	..Bow string or attachment thereto
91	...Nock-point locator
92	...Silencer

901	FORMING PIEZOELECTRIC CRYSTALS

CLASS 126 STOVES AND FURNACES

DECEMBER 1990

415	POOL OR POND HAVING SOLAR HEAT UNIT
416	.Remotely located unit
417	SOLAR HEAT COLLECTOR
418	.With means to protect collector against damage by external force
419	.Condition responsive means controls working fluid or solar radiation shading means
420	..To prevent freezing of working fluid
421	..Secondary working fluid controlled in response to condition of primary fluid
422	..Responsive to collector temperature
423	..Responsive to working fluid level
424	.With tracking means
425	..Controlled by timer or sun position sensing means
426	.Rollable or foldable collector unit of nonrigid material
427	.With auxiliary heat source for working or heated fluid
428	.With means to utilize heated fluid from a collector to heat the interior of a building
429	..With means to circulate air from room of building through collector
430	..With heat storage mass
431	..With heated fluid passage in floor or wall of room to heat same
432	.Having means conveying working fluid through collector
433	..Having evaporator and condenser sections (e.g., heat pipe)
434	..Fluid filled close loop having thermosiphonic circulation
435	..With means to exchange heat between plural fluids
436	..With heat storage mass
437	..With storage tank for heated fluid
438	..With concentrating reflector
439	...Spaced, opposed interacting reflecting surfaces
440	..With concentrating lens
441	..With radiation trap
442	..Tubular
443	...Surrounded by transparent enclosure
444	...Spaced parallel sheets form tube
445	....Having internal partition means
446	...Having heat absorbing fin or plate
447	....Plural tubes connected to common absorber plate
448	...Laterally spaced fluid conduit sections
449	..Absorber having extended surface, e.g., protrusions, permeable mass, corrugation
450	..Collector housing
451	.Energy concentrator with support for article heated (e.g., solar oven)
452	PROCESS OF HEATING BY USE OF SOLAR HEAT
204	BODY WARMERS
205	.Bed heaters
207	.Heated block
206	.Composition fuel
208	.Liquid or gaseous fuel
209	..Combined heater and lantern
210	..Water heater
401	TOOL HAVING FLUID FUEL BURNER
402	.Branding iron
403	..Gas
404	..Hydrocarbon reservoir
405	.Burning tool
406	..Gas
407	..Hydrocarbon reservoir
408	.Curling iron
409	..Hydrocarbon reservoir
410	.Roll heating type
411	.Sadiron
412	..Hydrocarbon reservoir
413	.Soldering iron
414	..Hydrocarbon reservoir
226	TOOL HEATERS
236	.Soldering iron
237	..Gas heaters
238	...Tool-controlled valve
239	..Liquid fuel
240	...Combined heater and solder pot
241	...Lamp
229	.Liquid or gaseous fuel
231	..Gas burner attachments
232	...Combined lighting and heating
233	...Jet mixer
234	...Tool-controlled valve
235	..Lamp attachments
230	..Flatiron
227	.Flatiron
228	..Attachments
284	GLUE POTS
281	DOUGH RAISERS
282	.Lamp type

343.5 A	..Other than snow (asphalt, etc.)
19.5	COMBUSTION ENGINE-HEATED COOKING STOVES, OVEN OR HEATING VESSELS
500	FIREPLACES OR ACCESSORIES
501	.Hopper feed of solid fuel
502	.Condition responsive control
503	..Of fluid fuel feed
504	..Of flue damper
505	.With article warming shelf on grate
506	.With food cooker
507	.With filter
508	.With room humidifier
509	.For heating plural rooms
510	..Fireplace in dividing wall
511	...Rotatable fire chamber
512	.Fluid fuel
513	.With liquid heater
514	..And means conducting liquid to room heater
515	.Inlet air supply from outside fireplace room
516	..With air pump
517	...And air flow regulator
518	..With air flow regulator
519	.Circular viewability of flame
520	.Insertable into existing window
521	.With air pump
522	..Tubular heat exchanger
523	.With heat exchanger for room heating air
524	..Tubular
525	...Secondary outlet leads air to flame
526	...With air flow regulator
527	..Secondary outlet leads air to flame
528	..Air flow path between exterior surface of heat exchanger and facing building surface
529	...And additional flow path through hollow walled heat exchanger
530	...With air flow regulator
531	..Hollow side walls in heat exchanger
532	..With means facilitating ash removal
533	..With air flow regulator
534	...And adjustable flue damper
535	..And adjustable flue damper
536	.Adjustable flue damper
537	..Screw operator
538	..Variable predetermined positions
539	..From exterior of front face of fireplace
540	.Grate structure
541	..Relatively movable parts
542	...Including means facilitating ash removal
543	....With removable ash pan

	FIREPLACES OR ACCESSORIES
544	.Front barrier or guard
545	..With particular seal
546	..Vertically adjustable
547	..Solid front cover
548	...And perforated screen
549	...And auxilliary air flow adjuster
550	..Smoke collecting hood
551	..Screen slidable on track
552	.Heat reflecting structure
553	..Adjustable
554	.With means facilitating ash removal
555	..Removable ash pan
344	WATER HEATERS
345	.Kettle furnace
346	..Canning
348	..Steam generators and cookers
349	..Tilting
347	..Horizontal combustion chamber
369	.Steaming apparatus
369.1	..With additional heating fluid
369.2	..Plural steam chambers
369.3	...Selective supply
361	.Stand boilers
362	..Circulation
363	..Supports
364	.Stovepipe
365	..Circulation
	.Submerged
367	..Portable
366	..Closed systems pipes
368	..Stationary
373	.Vessels
374	..With automatic control
375	..With heat accumulator
376	..Fluid-heated
377	...Steam- or water-heated
378	....Closed chamber or coil
379	....Jet
380	..With liquid supply
381	..With condenser
382	...Condensing liquid
383	..Overflow directors or receptors
384	...In vessel closure
385	...Annular receptor
386	....With return
387	..With heat-type agitator or circulator
388	..With signal or indicator
389	..With vent passage
390	..Heating-surface construction and arrangement
391	...Fire tube type
392	...Water tube type
350 R	.Liquid and gaseous fuel
350 A	...Automobile radiator heater
350 B	...Vaporizers and humidifiers

1.6	SURGICALLY IMPLANTED VIBRATORY HEARING AID
630	DIAGNOSTIC TESTING
631	.Endoradiosonde
632	.Measuring or detecting nonradioactive constituent of body liquid by means placed against or in body throughout test
633	..Infrared, visible light, or ultraviolet radiation directed on or through body or constituent released therefrom
634	...Light-conducting fiber inserted in body
635	..Electroanalysis
636	..Holder for color indicator
637	.Measuring physical characteristic of blood by means placed against or in body
638	.Bleeding detection
639	.Structure of body-contacting electrode or its positioning means
640	..Electrode adhesively mounted on body
641	...Lead attached to electrode by head and socket-type connection
642	..Electrode in body
643	..Electrode held on body by suction
644	..Electrode or its positioning means extends circumferentially of body portion
645	.Testing aqueous humor pressure or related condition
646	..Measuring impedance to flow of aqueous humor (tonography)
647	..Measuring acoustic impedance of eye
648	..Fluid jet directed against eye
649	..Eye vibrated
650	..Pressure indicator includes liquid column
651	..Pressure indicator includes pointer swingable over scale and mechanically driven by eye contacting means
652	..Measuring force required to produce standard or measured eye flattening (applanation)
653 R	.Detecting nuclear, electromagetic, or ultrasonic radiation
653 A	...Magnetic resonance imaging or analysis
653 AF	....Of fluid flow
653 CA	....Using detectable material placed in the body (e.g., contrast agent, etc.)
653 SC	...Magnetic resonance system component
654	..Detectable material placed in body
655	...Piston-type ram forces material into body
656	...Using flexible catheter
657	....Catheter guide means
658	....Catheter structure
659	..Nuclear radiation
660.01	..Ultrasonic
660.02	...Used as indicator of another parameter (e.g., temperature, pressure, viscosity)
660.03	...With therapeutic device
660.04	...Plural display mode systems
660.05	....Having B-scan and doppler
660.06	...Tissue attenuation or impedance measurement or compensation
660.07	...Anatomic image produced by reflective scanning
660.08	....With mechanical and electronic scanning
660.09	....Mechanical scanning
660.1	.....Hand-held unit
661.01	....Electronic array scanning
661.02	...Through-transmission (e.g., time-Of-flight) imaging
661.03	...One dimensional anatomic display or measurement
661.04	....Cardiographic
661.05	....Echoencephalography
661.06	....Opthalmic
661.07	...Doppler effect (e.g., foetal HR monitoring)
661.08	....Blood flow studies
661.09	.....Pulse doppler
661.1	......With volumetric measurement
662.01	.....CW doppler
662.02	...Contrast enhancement
662.03	...Structure of transducer or probe assembly
662.04	....Doppler effect (e.g., foetal HR monitor probe)
662.05	....Associated with puncturing instrument
662.06	....With portion of probe inserted into blood vessel (e.g., catheter) or body orifice (e.g., endoscope-mounted)
663.01	....With beam directing or shaping means in the wave path (e.g., lens, reflector)
664	..Infrared radiation
665	..Visible light radiation
666	...Cardiovascular testing
667	....Pressure in blood vessel
668	.Cardiovascular
669	..Measuring resistance of capillary blood vessels to hemorrhage
670	..Simultaneously detecting cardiovascular condition and diverse body condition
671	...Detecting respiratory condition
672	..Measuring pressure in heart or blood vessel
673	...Testing means inserted in body
674	....Pressure indicator includes liquid column
675	....Pressure transducer structure
676	...Ophthalmodynamometer
677	...Force applied against skin to close blood vessel
678	....Hand-supported occluder
679	....Tester having two occluders, or single occluder and separate pressurized pulse sensing cuff or cushion
680	....Electric signal generated by sensing means responsive to pulse or Korotkoff sounds
681	.....Pulse-induced pressure fluctuation in occluder generates electric signal
682	.....Pressure in inflatable occluder automatically raised above systolic pressure
683	......Repeating pressurization cycle
684	....Pressure indicator includes liquid column
685	....Valve structure
686	....Occluder structure
687	..Detecting blood vessel pulsation
688	...Waveform graph-type pulse recorder
689	...Pulse indicator
690	....Entire testing assembly supported on wrist
691	..Measuring blood flow in body portion other than heart
692	...Sensing means inserted in blood vessel
693	...By detecting electrical impedance of body portion
694	...By detecting volume of body portion

DIAGNOSTIC TESTING
.Cardiovascular
695 ..Heart
696 ...Detecting heartbeat electric signal
697 ....Testing artificially regulated or assisted heart
698 ....Fetal heartbeat
699 ....Orthogonal heartbeat electric signals combined to form vector signal
700 ....Detecting heartbeat electric signal and diverse cardiovascular characteristic
701 ....Sound generated by successive heartbeat electric signals to represent heart action
702 ....Detecting arrhythmia
703 .....Variation in duration of segment of PQRST signal waveform (e.g., QRS complex, etc.) detected
704 .....Vertical variation of segment of PQRST signl waveform (e.g., amplitude of QRS complex, etc.) detected
705 .....Tachycardia or fibrillation detected
706 ....Detecting signal repetition rate
707 .....Detecting means associated with exercise machine
708 ....Detecting R portion of signal waveform
709 ....Switching means for activating different monitoring systems, signal displays, or signal recorders
710 ....Signal display or recording
711 .....Magnetic recording
712 .....Cathode-ray tube used for display or included in recording means
713 ...Blood output per beat or time interval
714 ...Detecting heartbeat by sensing movement of oscillatable body-supporting means
715 ...Detecting heart sound
716 .Respiratory
717 ..Halitosis detection
718 ..Measuring metabolic rate by breath test
719 ..Qualitative or quantitative analysis of breath component
720 ..Measuring respiratory flow impedance or lung elasticity
721 ..Detecting body movement attending breathing
722 ...Capacitor-type transducer
723 ...Detector responsive to movement induced variation in impedance of body to electric current
724 ..Thermistor-type transducer generating electric signal in response to breath flow
725 ..Measuring breath flow or lung capacity
726 ...Element rotated by breath flow
727 ...Breath exhaled into or inhaled from expansible chamber
728 ....Bellows or expansible bag
729 ....Liquid surface forms portion of chamber boundary
730 ..Breath collection
731 .Detecting brain electric signal
732 ..With feedback of signal to patient
733 .Detecting muscle electric signal
734 .Measuring electrical impedance or conductance of body portion
735 ..Locating acupuncture points
736 .Temperature detection
737 .Detecting foreign object or calculus by probing
738 .Monitoring fertility cycle
739 .Sensitivity to vibration
740 .Sensitivity to impact
741 .Sensitivity to electric stimulus
742 .Sensitivity to thermal stimulus
743 .Sensitivity of skin to allergens or radiation
744 .Touch or pain response of skin
745 .Eye or testing by visual stimulus
746 .Ear or testing by auditory stimulus
747 .Injecting gas into body canal or cavity
748 .Measuring fluid pressure in body
749 .Sampling non-liquid body material (e.g., bone, muscle tissue, epithelial cells, etc.)
750 ..Irrigation
751 ..Cutting
752 ...Applying suction to sample
753 ....Body pierced by tubular cutter or rod-type punch
754 ...Body pierced by tubular cutter or rod-type punch
755 ...Motorized
756 ..Brushing
757 ..Scraping with edged instrument
758 ...Applying suction to sample
759 ..Wiping or dabbing
760 .Liquid collection
761 ..Means specifically structured for collecting urine of human female
762 ..Plural collection means (e.g., plural reservoirs or plural absorbent pads, etc.)
763 ..Hand-supported collector with rigid intake tube (e.g., a hollow needle, etc.)
764 ...Penetrable seal in liquid flow path to collection reservoir
765 ...Mechanical means for drawing liquid into collection reservoir
766 ...Means for controlling liquid flow
767 ..Wall of collection reservoir formed of flexible material
768 ..Flexible collection tube inserted in body
769 ..Collection receptacle bodily placed within body
770 ..Collector combined with lancet
771 ..Indicator
772 .Flexible catheter guide
773 .Detecting sound generated within body
774 .Measuring anatomical characteristic or force applied to or exerted by body
775 ..Associated with birth
776 ..Gum
777 ..Mouth, tongue, or jaw
778 ..Vagina or uterus
779 ..Foot
780 ..Esophagus, stomach, or lower alimentary canal
781 ..Spine
782 ..Body movement (e.g., head or hand tremor, motility of limb, etc.)
3 .Specula
4 ..Endoscopes
5 ...Fenestrated
6 ...Illuminating
7 ....Cystoscopes and urethoscopes
8 ....Gastroscopes
9 ....Otoscopes
10 ..Pharyngoscopes
11 ...Illuminating
12 ..Non-pivoted gags
13 ...Illuminating
14 ...Veterinary
15 ..Tongue depressors

200.22	..Gas flow induced by expansion chamber device (e.g., piston/cylinder ram, squeeze bulb, etc.)
200.23	.Pre-pressurized container holding medicament
200.24	RESPIRATORY METHOD OR DEVICE
200.25	.Artificial gill, or means for separating entrained air from liquid stream
200.26	.Means placed in body opening to facilitate insertion of breathing tube
200.27	.Gas stream directed away from face mask to penetrate contaminated atmosphere
200.28	.Body or head supported means, other than face mask or hood, with gas stream to screen face or penetrate contaminated atmosphere
200.29	.Underwater exhalation dispersing means
201.11	.Draw-type snorkel
201.12	.Corrective or magnifying lens combined with face mask having eyepiece or transparent viewing portion
201.13	.Inhaled gas heated or humidified by exhaled gas
201.14	.Viewing strip slidable relative to mask
201.15	.Means for keeping viewing member (e.g., eyeglass, transparent face shield, etc.) clear
201.16	..Wiper
201.17	..Mask with porous lower filtering portion and impervious upper portion shielding user's eyeglasses from exhaled breath
201.18	.Means for preventing nasal inhalation
201.19	.Means for transmitting, or facilitating, voice communication from face mask, hood, or helmet
201.21	.Using liquified oxygen
201.22	.Including body or head supported means covering user's scalp
201.23	..And nose and mouth also covered
201.24	...Face mask, visor, or like face-covering means hinged to scalp covering means
201.25	...Means for removing substance from respiratory gas
201.26	...Including means inserted in mouth
201.27	...Diving or swimming apparatus
201.28	...Having valve, or valve control, structure
201.29	...Garment associated with head cover
202.11	....Flight suit
202.12	.Hypobaric body chamber
202.13	.Combined with or convertible to a nonrespiratory device, or having nonrespiratory function other than hyperbaric treatment
202.14	..Having buoyancy chamber
202.15	..Having means for facilitating ingestion of food or drink
202.16	..Means effecting nonrespiratory medical treatment
202.17	...Device usable either as inhaler or means for rubbing medicament on body surface
202.18	..Pillow or other support exclusively for head
202.19	..Garment
202.21	.Smoking device simulator
202.22	.Means for indicating improper condition of apparatus
202.23	.Means for preventing electric shock or arcing
202.24	.Means for protecting user from pressure wave or flame resulting from gas ignition
202.25	.Ozone or ion generation
202.26	.Gas produced by electrolysis or chemical reaction
202.27	.Means for quickly connecting or disconnecting apparatus components
202.28	.Means using rescuer's breath for supplying respiratory gas to another person
202.29	..Movable wall separating breath of rescuer and victim
203.11	..Valved
203.12	.Means for mixing treating agent with respiratory gas
203.13	..Means for supplying anesthetic under patient's control
203.14	..Control means responsive to condition other than user's airway pressure
203.15	..Particulate treating agent carried by breathed gas
203.16	..Means for mixing respiratory gas with water vapor and another treating agent
203.17	...Electrically heated means producing water vapor
203.18	..Means for mixing treating agent with oral exhalation and directing mixture into nasal passage
203.19	..Means for controlling gravity flow of treating agent from holder
203.21	..Means broken or pierced to supply treating agent
203.22	..Means for supplying, or permitting inhalation of, separate streams of treating agent/respiratory gas mixture through nasal passages
203.23	..Pocket-type draw tube having discharge aperture for air/treating agent mixture at end thereof
203.24	...With gas flow control means other than pivotal or removable closure
203.25	..Means for varying treating agent/respiratory gas ratio
203.26	..Means for heating treating agent, respiratory gas, or mixture thereof
203.27	...Electric
203.28	..Including expandable bag, bellows, or squeeze bulb
203.29	..Including face mask covering nose and mouth
204.11	..Treating agent holder solely supported by head
204.12	...Holder solely supported by nose
204.13	..Treating agent evaporated from extended surface absorbent (e.g., sponge, fibrous wick, screen, etc.)

RESPIRATORY METHOD OR DEVICE
.Means for mixing treating agent with respiratory gas
204.14 ..Respiratory gas passed over surface of liquid treating agent in reservoir
204.15 .Means for cooling respiratory gas or respiration device
204.16 ..Substance removed from respiratory gas by cooling
204.17 .Means for heating respiratory gas or respiration device
204.18 .Means for supplying respiratory gas under positive pressure
204.19 ..Permanent magnet included in gas flow control means
204.21 ..Electric control means
204.22 ...Means for sensing partial pressure, or amount, of component in gas mixture
204.23 ...Means for sensing condition of user's body
204.24 ..Fluidic control device utilizing Coanda effect or jet impingement to alter fluid flow
204.25 ..Gas stream passed through jet nozzle or venturi passage
204.26 ..Gas supply means responsive to breathing
204.27 ...Snap action toggle included in control mechanism
204.28 ...Bag or bellows included in control mechanism
204.29 ..Control means responsive to variation in ambient pressure
205.11 ..Means for varying air/oxygen ratio
205.12 ..Means for removing substance from respiratory gas
205.13 ..Respiratory gas supplied from expandable bag, bellows, or squeeze bulb
205.14 ...Means for adjusting gas volume delivered to user from bag, bellows, or bulb during inflation-deflation cycle
205.15 ...Held in pressurizable housing
205.16 ...Biased to contracted or expanded position by mechanical means (e.g., weight, spring, etc.)
205.17 ...Rebreathing bag or bellows
205.18 ..Gas supplied by piston pump
205.19 ..Suction means for assisting exhalation
205.21 ..Means broken or pierced to supply gas
205.22 ..Gas container supported on body
205.23 ..Indicator structure
205.24 ..Valve, or valve control, structure
205.25 ..Face mask covering a breathing passage
205.26 ..Atmosphere enclosure (e.g., oxygen tent, hyperbaric chamber for pressurizing whole body, etc.)
205.27 .Means for removing substance from respiratory gas
205.28 ..Carbon dioxide
205.29 ..Particulate filtering
206.11 ...Including means inserted in nasal passage
206.12 ...Face mask covering a breathing passage
206.13 ....Mask attached to ear
206.14 ....Mask adhesively attached to face
206.15 ....With gas flow control valve
206.16 ....With frame, shaping means, reinforcement, or filter formed of wire
206.17 ....With separate filter encircling element, or housing, securing filter on mask
206.18 ....Covering nose only
206.19 ....Body of mask, other than viewing means, formed of porous filter material (e.g., surgical mask formed entirely of cloth, etc.)
206.21 .Face mask covering a breathing passage
206.22 ..Means for handling liquid (e.g., saliva, breath condensation, etc.) accumulated in mask
206.23 ..Mask/eyepiece sealing structure
206.24 ..Mask/face sealing structure
206.25 ...Adhesive
206.26 ...Closed air-filled passage adjacent mask edge (e.g., tubular bead, etc.)
206.27 ..Means holding mask readily accessible for use
206.28 ..Covering nose and mouth
206.29 ...Including means inserted in mouth
207.11 ...Structure of means securing mask to head
207.12 ...Valve for controlling gas flow
207.13 ..Covering nose only
207.14 .Respiratory gas supply means enters mouth or tracheotomy incision
207.15 ..Breathing passage occluder
207.16 ..Valve for controlling gas flow
207.17 ..Holding strap extending curcumferentially of head or neck
207.29 DEVICE FOR CREATING A TRACHEOTOMY INCISION
207.18 .Respiratory gas supply means enters nasal passage

CLASS 131 TOBACCO

DECEMBER 1990

	TOBACCO TREATMENT
	.With fluid or fluent material
	..Including means to convey tobacco
307	...Including expressing rolls
308	..Containing enzymes to cause fermentation
309	..Other than water, steam, or air
310	...Organic
311	.Including leaf disintegration
312	..And separation of fibers of different character
313	.Leaf stemming
314	..With stem cleaning
315	..And straightening, smoothing, flattening, or cleaning
316	...Booking
317	....Stemmed by rotary or endless cutter
318	..By fluid current
319	..By tearing
320	...Including transverse stem cutting
321	...Card clothing type
322	..By cutting
323	...Stem die type
324	.Leaf straightening, brushing, smoothing, rolling, corrugating, or flattening with or without stem crushing
325	..And cleaning
326	..Booking
327	.Leaf associating or disassociating
328	MAKING OR USING TOBACCO USERS' APPLIANCE
329	TOBACCO USERS' APPLIANCE
330	.Device used for smoking
173	..Smoke washing type
174	..Wind or ash guarding or ash receiving
175	...Cigar or cigarette holders
176	...Pipe covers
177	....With tamper or tamper type
178	..Combined or convertible
179	...Plural smoking devices
180	...With storage means, feeder, and/or plural bowl
181	....Follower
182	...With ejector
183	....Tobacco support type
184.1	...With cleaner, stirrer, or tamper
184.2	....Pipe bowl type
184.3	....With cleaner extending or operable through external passage
185	...With igniter and/or match scratcher
186	...With support
187	..Cigar and cigarette holders
188	...With piercing device
189	....Smoke conducting
190	...With movable gripper or holder
191	..Tubes
192	..Foldable or collapsible
193	..Base burner type
194	..Heat exchanging and/or insulating
195	...Cooling air passages
196	...Spaced inner bowl
197	....Plural reversely extending passages
198.1	..Supplemental or substitute air inlet
198.2	...Adjustable air inlet type
199	..Longitudinally divided
200	..Smoke treating
201	...Material separator and trap
202	....Filter and/or absorber
203	.....Absorber only (no filtering)
204	......Lined or coated bowls or stems
205	.....Tobacco supports
206	......With valve or external passage closure
207	.....Absorbent or particulate
209	....Spiral passage
210	....Serial checks or baffles
211	....Chamber enclosed tubes or nipples
212.1	.....Smoke direction changing
212.2	......Concentric ducts
213	....Plural reversely extending passages
214	....Bowl detachable from neck cup
215.1	....With valve in smoke path or removable, external passage closure
215.2	.....With filter
215.3	.....Valve
216	..Special smoke passages
217	...Spiral passage
218	...Plural reversely extending
219	..Lined or coated
220	...Bowl
221	..Reversible bowl
222	..Bowl detachable from neck cup
223	..With valve or external passage closure
224	..Tobacco supports
225	..Joints and connections
226	..Bowls
227	..Stems, bits or tips
228	...With sleeve or cap
229	...Outlet end shapes and orifices
230	..Materials and compositions
231	.With ash receiver
232	..Smoking device cleaner
233	..Tip cutter, perforator or slitter
234	..Igniter or scratching surface
235.1	..Extinguisher
236	...Liquid type
237	...Movable extinguishing member
237.5	...Split tube type
238	..And devices for other use
239	...Match holder
240.1	..Cigar, cigarette, or smoking device rest or holder
241	...With special receiver support
242	...With closure or covered compartment
242.5	...With cigar or cigarette ejector, dumper, or advancer
242.6	...With grid or grille
	.Smoking device cleaners
243	..Combined or compound
244	..Fluid type
245	..Stem
246	..Bowl
247	.Pipe tampers
248	.Cigar and cigarette end cutters, combined
249	..With igniter or scratching surface
250	..With receptacle or holder
250.1	...Dispensing type
251	...Match receptacle
252	..With perforator or slitter
253	.Cigar tip perforators or slitters
254	..Pin or drill
255	..Punch
256	.Cigar or cigarette extinquishers
257	.Supports
258	..Finger ring type
259	..Staff type
260	..Smoking device
331	SMOKE SEPARATOR OR TREATER
332	.Having a polymer
333	.By electric, magnetic, or radioactive action
334	.By chemical reaction, e.g., ion-exchange, chelating, catalytic, etc.
335	.By adding constituent to smoke stream
336	..Air
337	..Having destructible, fusible, soluble, or deformable container for treatment material
338	.Having means to vary smoke flow rate
339	.Interior surface causes particular flow characteristic
340	..By use of specific filter mass
341	.Plural diverse elements

	SMOKE SEPARATOR OR TREATER
	.Plural diverse elements
342	..Including particulate material
343	..Plasticizer or adhesive coating
344	..Occupying plural, separate, distinct zones
345	.Including a cellulose ester or ether
346	.With indicator or inspection means
347	TOBACCO OR TOBACCO SUBSTITUTE PRODUCT OR COMPONENT PART THEREOF
348	.Pipe cartridges
349	.With ash retainer or means to prevent or retard burning
350	.With means to pierce or protect cigar end structure
351	.With means to facilitate ignition
352	.Compositions, e.g., smoking or chewing mixture or medium
353	..Reconstituted tobacco
354	...Material coated with tobacco dust or particle
355	...Tobacco particles bonded by nontobacco adhesive
356	...Having tobacco extracts or tobacco paste
357	...Tobacco sheet formed from wet ground or wet beaten tobacco
358	...Wrapper
359	..Tobacco substitute, i.e., nontobacco
360	.Cigar or cigarette
361	..End structure
362	...Coated or impregnated
363	...Filler penetrating
364	..Blank or filler
365	..Wrapper or binder
366	.Plug tobacco
367	..Having specific shape
368	..With indentification, marking, label, or tag
369	METHOD OR APPARATUS FOR MAKING TOBACCO SUBSTITUTE
370	METHOD OR APPARATUS FOR MAKING RECONSTITUTED TOBACCO
371	.Dust impingement
372	.Slurry
373	.Impregnation of web
374	.Paper process
375	.Extrusion

DIG 1	Pipe literature

200 METHODS
201 .Artifcial hair structure making or attaching
202 .Hair treatment by application of specific chemical composition
203 ..For deformation, setting or holding (e.g., curling or waving)
204 ...Relaxing or reducing agent followed by fixing or neutralizing agent (e.g., "permanent")
205 ....Including specified treatment interval
206 ...And application of heat
207 ...And use of specific device
208 ..Dyeing or bleaching
209 ..Plural separately applied or supplied named compositions
210 .Hair deformation or set (e.g., curling, waving)
211 ..And application of heat
57.1 HAT FASTENING DEVICE
58 .Chin or back head strap or band
59 .Head clamping
60 .Hair carried
61 .Cord or loop with hairpin
62 .Rotary hooks or spirals
63.1 .Includes pivotally mounted hair engaging element
64.1 ..And similar opposed element linked therewith
65.1 .Includes slidably guided hair engaging element
66.1 ..And similar opposed or skewed element linked therewith
68.1 ..Having pointed tip (e.g., attached pin)
69.1 ...And tip holding or protecting means
71.1 ...And position holding means for element
72.1 .Includes holding or protecting means for tip of hair engaging element
212 HAIR DEVICE
213 .Dressing or cutting guide or gauge
213.1 ..Including comb or means to mount comb
214 ..Trim gauge or guide
215 .Mustache
216 .Eyelash or eyebrow
217 ..Crimper or curler
218 ..Including cosmetic applicator (e.g., mascara applier)
219 .Comb
101 ..Hat anchoring
102 ..With mirror
103 ...On teeth guard or sheath
104 ..With manicure device
105 ..With false hair attached
106 ..With back mounted foundation frame
107 ..With annular row of teeth
108 ..With hair contacting absorbent web, cord, or pad
109 ...In contact with tooth
110 ....At juncture with back
111 .....In aperture through tooth
112 ..With orifice for applying fluent material
113 ...In tubular tooth
114 ....At tooth tip
115 .....Flow restrictor through orifice
116 ...Between teeth
117 ..With removable heat storing means
118 ..With heater
119 ..With teeth cleaner
119.1 ..Motor driven
120 ..With brush or bristles
121 ...Teeth sheathed in brush back or handle
122 ..With winding mandrel
123 ...Comb retractable into mandrel
124 ..With hair smoothing bar or pin
125 ..With deposit or collection groove
126 ..Plural combs or spaced tooth rows
127 ...With intermediate retainer tongue
128 ...Spaced spring or strand connectors
129 ...Swingably or slidably connected
130 ....On head receiving band
131 ....By parallel links
132 ....Pivoted end on end
133 .....Opposite ends interlock
134 .....Pivoted axis parallel to teeth
135 ....Longitudinal pivot
136 ....Back sliding along back
137 ...Transversely staggered teeth
138 ...Intermeshing teeth
139 ...Oppositely directed rows
140 ...Offset or twisted back
141 ...Longitudinally spaced rows
142 ...Side by side or parallel rows
143 ..With teeth guard or sheath
144 ..With hair engaging retainer member
145 ...Pivoted on comb
146 ..With attaching clasp or loop
147 ..With storage cavity in back
148 ..Combined
149 ..With finger hole or recess
150 ..With projecting handle
151 ..Rotatable or pivoted teeth
152 ..Separably mounted teeth
153 ...On tie rod through stack
154 ...In back apertures
155 ..Channel encased back
156 ..With teeth spreadable by flexing back
157 ..Constriction in kerf
158 ..Back beveled or rounded between teeth
159 ..Rounded teeth tips
160 ..Bent or slanted teeth
161 ..With long and short teeth
162 ..Layered or coated
163 ..Compositions and materials
220 .Having heat generating composition
221 .Having hair treating composition
222 .Flexible wrap for curl
223 .Having hair shaping surface or form (e.g., crimper or curler)
224 ..Having cooperating crimping jaws
225 ...Including plural grooved jaw
226 ..Having winding form or mandrel (e.g., curler)
227 ...With heater, fluid supply, or surrounding fluid housing
228 ....Including fluid supply or inlet for introducing fluid (e.g., steam) into surrounding housing
229 ....Electrical heater
230 .....Having end outlet for hair
231 .....Separable squeeze-open clip
232 .....And transversely pivoted jaw for clamping hair to mandrel (e.g., curling iron)
233 ....Including heat storage means heated prior to application
234 .....And pivoted hair fastening jaw or clip
235 ....Having end outlet for hair
236 ....Including hair clamp spaced laterally from mandrel (e.g., scalp protector)
237 ...Rotatable form or mandrel
238 ....Including motor or mechanical rotating means
239 ....Including clutch or ratchet
240 .....And spaced scalp protector
241 ....And laterally spaced clamp or pad (e.g., scalp protector)
242 ....Including means to accomodate separable curl retainer (e.g., bobby pin)

	HAIR DEVICE
	.Having hair shaping surface or form (e.g., crimper or curler)
	..Having winding form or mandrel (e.g., curler)
243	...Having scalp protector
244	....Laterally spaced clamp having pivoted jaws
245	...Hair retained
246	....Including bendable wire fastener, form, or mandrel
247	....Pliant form or mandrel having connectable ends
248	....Including string or elastic band fastener
249	.....And discrete clasp or pivoted mandrel portions
250	.....Cylindrical or hollow form or mandrel
251	....And separable fastener
252	.....Circumferential clamp
253	....Including pliant fastener or connection to mandrel
254	....Including relatively movable hair fastener attached to form or mandrel
255	.....Pivoted to form or mandrel
256	......Plural pivoted fasteners or fastener sections
257	.......Including pivoted bail
258	......Pivoted bail
259	......Including retaining clasp
260	.....Including retaining clasp
261	....Plural forms or mandrels
262	....Having peripheral projections
263	...Having pivoted hair clamping jaw or plural pivoted mandrels
264	...Having means to accomodate separable curl retainer (e.g., bobby pin)
265	...Having movable or collapsible handle or mandrel sections
266	...Including relatively movable hair contacting element (e.g., curl ejector winder)
267	...Including end plate
268	...Including grooved form or mandrel surface (e.g., spiral rib)
269	..Having electrical heater
270	.Including means to isolate or part a tress of hair for chemical treatment (e.g., frosting cap or purse)
271	.Electrical appliance or attachment (e.g., hair styler or attachment)
272	..Including liquid or vapor reservoir or outlet
273	.Hair fastener
274	..Hairnet or cage
275	..Ornament holding (e.g., bow or ribbon)
276	..Clip or hairpin
277	...Squeeze-open clip
278	...Including retaining clasp (e.g., barrette)
279	....Pivoted arms
280	...Hairpin having plural prongs (e.g., bobby pin)
281	....And third prong, discrete retainer, or opener
282	.....Pivoted or sliding
283	....Crossed prongs
284	....Contacting prongs
53	.Hair structures
54	..Foundation frames
55	...Rolls or rats
56	..Making
73	NAIL DEVICE (E.G., MANICURING IMPLEMENT)
73.5	.Combined
73.6	..With motor
74.5	..With fluent material feed

75	..With storage cavity
75.3	.Compound tools
75.4	..With cutter
75.5	...Plural cooperating blade
75.6	..With abrader, file or buffer
75.8	.Driven type
76.2	.Folding, retractable or sheathed tool
76.4	.Abrader, file or buffer
76.5	..With separable holder
285	.Template or mask
286	TOILET KIT
287	.Having sliding drawer
288	.Illuminated
289	.Shaving
290	..Having brush and soap receptacle or receiver
291	..Having mirror
292	..Having blade conditioning means
293	.Powder box and applicator (e.g., compact)
294	..Combined, or having plural cosmetic or applicator compartments or receivers
295	...Pivoted compartments or receivers
296	....And mirror pivoted between covers
297	...Including compartment or receiver for stick applicator (e.g., lipstick)
298	..Having powder dispenser
299	...Including discharge assistant
300	..Having plural closures
301	..Having mirror
302	...And wiper for mirror
303	...And cake holding, mounting, or ejecting means
304	...Particular mirror mounting
305	....Circular powder box
306	...And powder sifter
307	..Having powder sifter
308	.Including toothbrush
309	..And pick, scraper, floss, or mirror
310	..Plural toothbrushes or receivers therefor
311	..Having receptacle in toothbrush handle
312	.Having flexible carrying case
313	.Including brush
314	.Having plural compartments or receviers
315	..In case having hinged or pivoted closure
316	.Including mirror
317	.Including cosmetic applicator
318	..Stick applicator
319	TEMPLATE OR MASK
320	SHAPED COSMETIC APPLIER
321	TOOTHPICK
322	.And motor driven mechanism or fluid applicator
323	.Having thread holder (e.g., flossing implement)
324	..And container or support for thread supply
325	...Including rotatably mounted thread spool
326	...Including relatively movable thread clamping surfaces
327	..Including relatively movable thread clamping surfaces
328	.Folded or housed in tool handle
329	.Having specified shape
330	SPREADER OR MANIPULATOR FOR HAIR FASTENER (e.g., bobby pin opener)
331	.Body worn
332	.Including dispenser or ejector
333	MISCELLANEOUS

901	COMB TOOTH SHAPE
902	LIQUID TREATING FORMS AND MANDRELS

PROCESSES
1 .Including application of electrical radiant or wave energy to work
2 .For metallic, siliceous, or calcareous basework, including chemical bleaching, oxidation or reduction
3 ..Including acidic agent
4 .Including forming a solidified or hardened coating for cleaning
5 .Including melting
6 .Using solid work treating agents
7 ..In particulate or comminuted form
8 ..Hollow work, internal surface treatment
9 ..Longitudinally traveling work, of bar, strip, strand, sheet or web form
10 .Including regeneration, purification, recovery or separation of agent used
11 ..Gas or vapor form agent condensed or absorbed on work
12 ..By distilling, or liquefying vapors of, used agent
13 ..By crystallizing, precipitating, or eliminating dissolved solids from used agent
14 .Work in coiled form during treating agent application
15 .Longitudinally traveling work of bar, strip, strand, sheet or web form
16 .Including distortion or deformation of work
17 ..Produced by temperature change, centrifugal force, or fluid pressure shock
18 .Combined (e.g., automatic control)
19 .Including work heating or contact with combustion products
20 ..Carbon removal (e.g., from engines)
21 .Including use of vacuum, suction, or inert atmosphere
22.1 .Hollow work, internal surface treatment
22.11 ..Pipe, tubing, hose, or conduit
22.12 ...With pressurized fluid or fluid manipulation
22.13 ...With inorganic alkaline material treating agent
22.14 ...With organic treating agent (e.g., solvent, surfactant, or reactant yielding soluble product, etc.)
22.15 ...With steam utilization
22.16 ..With inorganic salt treating agent
22.17 ..With inorganic alkaline material treating agent
22.18 ..With pressurized fluid or fluid manipulation
22.19 ..With organic treating agent (e.g., solvent, surfactant, or reactant yielding soluble product, etc.)
23 ..Work or work parts movable during treatment
24 ..Movable fluid applying nozzle and/or with plugging or sealing of work passage or opening
25.1 .Work handled in bulk or groups
25.2 ..Kitchen or tableware
25.3 ..Food
25.4 ..Manufactured articles
25.5 ..Work stationary or moved countercurrently
26 .Using sequentially applied treating agents
27 ..One a neutralizer for another
28 ..One an acid or an acid salt
29 ..One a soap or an alkaline agent
30 ..Including steam, gaseous agent or temperature feature
31 .Gas or vapor condensation or absorption oowork
32 .With work or work parts movable during treatment
33 ..Centrifugal force and/or rotated work body
34 .With treating fluid motion
35 ..Caused by heating
36 ..Plural, separately fed, and either simultaneously applied or admixed, treating fluids
37 ..Gas or vapor blasts or currents
38 .Paints, varnishes, lacquers, or enamels, removal
39 .Carbon removal
40 .Oils, grease, tar, or wax removal, by dissolving
41 .Metal base work, acid treating
42 .Miscellaneous
APPARATUS
43 .With relatively movable finder and orienter of apertures or passages in work
44 .Operating or controlling device engaged and moved by work or separate work holder
45 ..For vehicle or wheel-form work
46 ..Devices other than valves (e.g., automatic work counters)
47 ...Pumps
48 ..Endless belt or rotary work carriers
49 ..Through-way work carriers or guides
50 ..Plural means to supply or apply plural different fluids separately or admixed
51 ..With means for moving work or work-holder by fluid impact thereagainst
52 ..Engaging element having rotary swinging, rocking or pivoted motion
53 ...External and internal fluid applying means
54 ..External and internal fluid applying means
55 ...External applying jet means
56 R .Automatic controls
56 D ...Dishwashing machine
57 R ..With electric control
57 D ....Dishwashing machine
57 DL .....With door latch control feature
58 R .Electrically controlled
58 D ...Dishwashing machine
58 DL ....With door latch control feature
59 .With work assembling or disassembling means
60 .With interstation fluid flow means
61 .Sequential work treating receptacles or stations with means to transfer work or fluid-applying devices
62 ..With initial work emptying, inverting, orienting or puncturing means
63 ..With means for treating work other than with fluids, draining or heating
64 R ..For sheet, web, strand or bar form work, longitudinally traveling
64 P ....Photographic
65 ..With screw work conveyor
66 ..With work transfer from one movable carrier to another
67 ...Including endless belt type
68 ....With splash, spray or jet applying means
69 ...Between plural rotary carriers on same axis
70 ..With endless belt work transfer means
71 ...Horizontal axes
72 ....With splash, spray or jet applying means
73 .....With work immersing means

APPARATUS
.Sequential work treating receptacles or stations with means to transfer work or fluid-applying devices
..With endless belt work transfer means
...Horizontal axes
....With splash, spray or jet applying means
.....With work immersing means
74 ......With separate movable means to cause fluid motion
75 ....Sequential endless-carrier immersing means
76 ..Traversing hoist-type work transfer means
77 ...Curved or non-rectilinear traverse work-path
78 ..With rotary or swinging work transfer means
79 ...Axially rotary
80 ....Turntable type
81 .....With synchronized or coordinate valve
82 ..With guide rails, rods or beams for work or work holders
83 ...Vertical, inclined, curved or movable or with rollers or work immersion means
84 .Plural, separate, work treating or holding receptacles or stations; manual transfer type
85 ..With movably mounted work holder or receptacle
86 ...For motion during fluid application
87 ....Plural, mutually counterbalancing work supports
88 ..With fluid supplying or movable applying means
89 ...With movable means to cause fluid motion
90 ...With heater or heat exchanger
91 ..With valved liquid drain from one or more stations
92 ..With detachable work holder or receptacle
93 .With solid agent dissolving or supplying means
94 .With plural means for supplying and/or applying plural different fluids respectively
95 ..With ordered sequential fluids applying means
96 ..With coordinated outlet non-impelling control and other device or plural way drain or liquid outlet (e.g., reversing valve)
97 ..With coordinated inlet non-impelling control and non-inlet-control
98 ..With coordinated or multiple valves therefor
99 ..With plural-fluids applying conduits
100 ...With fluids premixing or contacting means
101 ....With means for recirculating or reversing fluid flow through conduits
102 ....With steam, air or gas applying conduits
103 ..With means for recirculating or reversing fluid flow through conduits
104.1 .Having self cleaning means
104.2 .With means for collecting escaping material
104.3 ..Cleaned material
104.4 ..Foreign material separated from liquid
105 .With heating, cooling or heat exchange means
106 ..With heat-generatable liquid-flow pressure means
107 ..Heat-exchange means external to work-treating chamber, vat or zone
108 ..Recirculation of treating liquid through conduit means
109 .With treating fluid purifying or separating means
110 ..By filter or strainer only (except work-spraying head)
111 ...With liquid-moving recirculation, or flow reversing, and straining means
112 .With brake or clutch
113 .With alarm, signal, indicating, testing, inspecting, illuminating or display means
114 .With liquid seal
115 R .Combined or convertible
115 G ...With garbage grinder
116 .With means to operate movably interconnected parts of work
117 .Movably mounted fluid-holding receptacles
118 ..Rocking or rolling, bottom supported or shifting axis
119 ..Rotary or swinging motion
120 ...Horizontal axis only
121 ...Vertical axis only
122 R .For sheet, web, strand or bar form work, longitudinally traveling
122 P ...Photographic
123 .For vehicle or wheel form work
124 .With endless belt work conveyer
125 ..With guide rails for work or work holder (not for belt)
126 ..With non-endless-belt work conveyer or manipulator
127 ..With plural endless belts
128 ..With means to release work held on belt
129 ..With movably mounted spray or jet applying conduits or nozzle and/or interconnected conveyer and valve
130 ..With separate movable means to cause fluid motion (e.g., pump, splasher, agitator)
131 ..With spray or jet applying conduits or nozzles
132 .Spiral work path and/or spiral work conveyer (e.g., screw)
133 .With work feeding and/or discharging means
134 ..Rotary, swinging or pivoted, work support feeding or discharging conveyers (except mere gates or stops)
135 .With means to hold work holder in draining position above treating liquid
136 .Work holder in form of valved plunger
137 .With means to movably mount or movably support the work or work support
138 ..Movably mounted work holder operable by fluid contact
139 ...With separate movable splasher or pump
140 ..Motor operated apparatus
141 ...Fluid motor or turbine
142 ..Movable support having plural work holders movably mounted thereon (e.g., ferris-wheel type)
143 ..Interconnected tank closure and other movable element
144 ..With movably mounted spray or jet applying conduits or nozzles
145 ...Immovably mounted on movable work support

	APPARATUS
	.With means to movably mount or movably support the work or work support
146	..Interconnected movable work support and valve
147	..With movable work support and separate movable means to cause fluid motion (e.g., pump, splasher, agitator)
148	...And spray or jet applying conduit or nozzle
149	..Axially rotary chuck, mandrel, rod or axle type holder
150	..Work of container-form constituting sole liquid holder
151	..With spray or jet applying conduits or nozzles
152	...For work having hollows or passages
153	...Rotary, pivoted or swinging work holder
154	..With non-impelling fluid deflector or baffle
155	..With means to drain from or supply liquid to the tank
156	..Work support having a float and/or swing drive or bias
157	..Rotary, revolving, swinging or oscillating motion work holder or carrier
158	...With plural work receiving chambers or holders and/or with cover carried by work receiving chamber
159	....Horizontal axis
160	...Carried by pivotally mounted links or levers or by strands
161	...Compound motion
162	...Actuating means extending through or carried by tank cover
163	...With liquid impeller mounted on work support
164	..Work support reciprocated by pivoted links or lever or by strands
165	..Rail or rod form guides for work or work holder
166 R	.For work having hollows or passages
166 C	...Conduit cleaner
167 R	..With movably or flexibly mounted spray or jet applying conduits or nozzles
167 C	....Conduit cleaner
168 R	...With movable means to cause fluid motion (e.g., pumps)
168 C	.....Conduit cleaner
169 R	..With movable means to cause fluid motion (e.g., pumps, followers)
169 A	....Automotive parts cleaner
169 C	....Conduit cleaner
170	..With means to apply fluids both internally and externally
171	..With plural fluid-supplying pipes
172	.With movably or flexibly mounted spray or jet applying conduits or nozzles
173	..As pump or element thereof
174	..With separate pump, splasher or agitator
175	...Conduit or nozzle attached to or operatively interconnected with treating chamber closure
176	...With fluid discharge reaction nozzle
177	..Attached to or operatively interconnected with treating chamber closure
178	..Coordinated with valve therefor
179	..Fluid discharge reaction nozzle
180	..With guiding means to restrict motion to rotation, to swinging, or to an annular closed or to a curved path
181	...With motor therefor
182	.With non-impelling fluid deflector or baffle other than conduits or nozzles
183	..Movably mounted, adjustable or removable
184	.With movable means to cause fluid motion (e.g., pump, splasher, agitator)
185	..Compound motion
186	..With means to drain from and/or supply liquid to tank
187	..Pivoted (e.g., rotary swinging or oscillating)
188	...Motor operated
189	...Movable in annular path that surrounds work-space
190	...Delivering fluids to work-space through annular, work-space-surrounding conduit
191	...Delivering to conduits or nozzles
192	...Actuating means extending through or carried by tank cover
193	...Plural fluid-moving means (excludes single with plural vanes)
194	...About horizontal axis
195	..Through or one-way fluid flow pumps
196	..Vertically reciprocable (e.g., dashers)
197	...Actuating means carried by or extending through tank cover
198	.With spray or jet supplying and/or applying means
199	..Work circumposable or opposed fluid-applying jets or plural pipes
200	..With closable work-treating chambers
201	.Miscellaneous

CLASS 136 BATTERIES, THERMOELECTRIC AND PHOTOELECTRIC

200 THERMOELECTRIC
201 .Processes
202 .Nuclear energy type
203 .Peltier effect device
204 ..Including additional heat exchange means
205 .Electric power generator
206 ..Solar energy type
207 ..Including an electric heater
208 ..Plural junction concentrically or annularly arranged around source of temperature differential
209 ...Plural concentrically arranged fluid source conduits
210 ....At least one conduit for liquid coolant
211 ..Plural hot or cold junction arranged in a single line
212 ..Plural hot or cold junctions arranged in a single plane
213 .Radiation pyrometer
214 ..Including a ray concentrator (e.g., lens, mirror, etc.)
215 ...Lens type
216 ..Evacuated
217 .Including a pilot burner
218 ..Having moving fluid (e.g., air, fuel, liquid, etc.) cooling means for cold junction
219 ..Thermocouple extends through fuel supply conduit
220 ..Thermopile-containing
221 .Including means to resiliently press junction element against sensed surface
222 .Including means to standardize nonsensing junction by heating or cooling
223 .Having an evacuated space
224 .Thermopile
225 ..Having strip, film or plate-type thermocouples
226 ..Having wound wire-type thermocouples
227 ..Two or more couples of dissimilar composition
228 .One junction element surrounded by another junction element
229 .Having additional contact means for sensing solid work
230 .Having housing, mounting or support
231 ..Including sample port for sensed material
232 ..Covered and sealed sensor junction
233 ...Contacting covering over junction (e.g., embedded, coated, etc.)
234 ...Molten metal immersion type
235 ..Thermocouple leads having disengageable pressure-type electrical connectors
236.1 .Having particular thermoelectric composition
237 ..Having particular bonding material for junction
238 ..Chalcogenide containing (S, O, Te, Se)
239 ..Group IV element containing (C, Si, Ti, Ge, Zr, Sn, Hf, Pb)
240 ..Group V metal containing (V, As, Nb, Sb, Ta, Bi)
241 ..Group IB metal containing (Cu, Ag, Au)
242 .Adjuncts
243 PHOTOELECTRIC
244 .Panel or array
245 ..Lightweight and collapsible or foldable
246 ..With concentrator, orientator, reflector, or cooling means
247 ...Fluorescent concentrator
248 ...Hybrid conversion system
249 ..Monolithic semiconductor
250 ..Particulate or spherical semiconductor
251 ..Encapsulated or with housing
252 .Cells
253 ..Radioactive, ionic, or thermo photo
254 ..Photoemissive, capacitive, magnetic, or ferroelectric
255 ..Schottky, graded doping, plural junction or special junction geometry
256 ..Contact, coating, or surface geometry
257 ...Luminescent layer or optical filter
258 ..Polycrystalline or amorphous semiconductor
259 ..With concentrator, housing, cooling means, or encapsulated
260 ..Cadmium containing
261 ..Silicon or germanium containing
262 ..Gallium containing
263 ..Organic active material containing
264 ..Selenium or tellurium containing
265 ..Copper, lead, or zinc containing

CLASS 137 FLUID HANDLING

1	PROCESSES
2	.With control of flow by a condition or characteristic of a fluid
3	..Mixing of plural fluids of diverse characteristics or conditions
4	...Controlled by consistency of mixture
5	...Controlled by conductivity of mixture
6	...Controlled by heat of combustion of mixture
7	...Controlled by pressure
8	..For producing uniform flow
9	..For producing proportionate flow
10	..By speed of fluid
11	..For regulating boiler feed water level
12	..By fluid pressure
12.5	.Carbonated beverage handling processes
13	.Affecting flow by the addition of material or energy
14	.Involving pressure control
15	.Cleaning, repairing or assembling
15.1	HIGHSPEED FLUID INTAKE MEANS (E.G., JET ENGINE INTAKE)
15.2	.With condition responsive control means
38	CONTROL BY CHANGE OF POSITION OR INERTIA OF SYSTEM
39	.With second control
40	.Position relative body of water (e.g., marine governors)
41	..Float controlled
42	..Pressure or head controlled
43	.Vent opening or closing on tipping container
44	.By shifting of liquid level
45	.By pendulum or swinging member
46	..With servo connection to valve
47	SPEED RESPONSIVE VALVE CONTROL
48	.Acceleration responsive valve control
49	.With manual valve control
50	.Speed change and excess speed valve control
51	.With other condition responsive valve control
52	..Governor drive failure responsive
53	.Centrifugal mass type (exclusive of liquid)
54	..With multiple valves
55	..Periodically actuated valve
56	..Rotating valve and rotating governor
57	..Excess speed responsive
58	..With fluid servo-motor
59	FREEZE CONDITION RESPONSIVE SAFETY SYSTEMS
60	.With freeze waste
61	.Stop and waste
62	.Low temperature responsive drains
65	COMBUSTION FAILURE RESPONSIVE FUEL SAFETY CUT-OFF FOR BURNERS
66	.Thermo-electric
67	DESTRUCTIBLE OR DEFORMABLE ELEMENT CONTROL
68.1	.Frangible
68.2	..Explosive actuation
69	..With counter biasing element
70	..Frangible element retains pressure responsive valve closed
71	..With pressure responsive valve
72	.Heat destructible or fusible
73	..With second sensing means
74	..In fluid flow path
75	..Safety cut-off
76	...With heater for destructible or fusible element
77	...With external closing means
78.1	AMBIENT CONDITION CHANGE RESPONSIVE
78.2	.For controlling soil irrigation
78.3	..Soil moisture sensing
78.4	.Burner gas cutoff
78.5	.Atmospheric
79	..Temperature
80	...With additional diverse control
81.1	..Pressure
81.2	.Underwater
803	FLOW AFFECTED BY FLUID CONTACT, ENERGY FIELD OR COANDA EFFECT (E.G., PURE FLUID DEVICE OR SYSTEM)
804	.Responsive to condition external of system
805	..And causing change or correction of sensed condition
806	.Utilizing diverse fluids
807	.Utilizing particular fluid
808	.Means to cause rotational flow of fluid (e.g., vortex generator)
809	..Plural vortex generators
810	..Vortex generator as control for system
811	..Vortex generator in interaction chamber of device
812	..By tangential input to axial output (e.g., vortex amplifier)
813	...With means to vary input or output of device
814	.System comprising plural fluidic devices or stages
815	..Plural power inputs (e.g., parallel inputs)
816	...Variable or different-value power inputs
817	....Pulsating power input and continuous-flow power input
818	...With variable or selectable source of control-input signal
819	...To cascaded plural devices
820	....With feedback passage(s) between devices of cascade
821	....With pulsed control-input signal
822	.Plural power inputs to single device
823	..Intersecting at interaction region (e.g., comparator)
824	...Co-lineal, oppositely-directed power inputs (e.g., impact modulator)
825	.Means to regulate or vary operation of device
826	..To vary frequency of pulses or oscillations
827	..By non-fluid energy field affecting input (e.g., transducer)
828	...Acoustical or thermal energy
829	..By movable element
830	...Operating at timed intervals (e.g., to produce pulses)
831	...Electrically-actuated element (e.g., electro-mechanical transducer)
832	...Means (e.g., valve) in control input
833	.Structure of body of device
834	.Device including passages having V over T configuration
835	..And feedback passage(s) or path(s)
836	..With particular characteristics of control input
837	...Multiple control-input passages
838	..And multiple or joined power-outlet passages
839	..And enlarged interaction chamber
840	..And vent passage(s)
841	.Device including passages having V over gamma configuration
842	.Device including linearly-aligned power stream emitter and power stream collector
82	PRESSURE MODULATING RELAYS OR FOLLOWERS
83	.Jet control type
84	.Plural series units
85	.With counter-balancing pressure feedback to the modulating device
86	..With counter-counter balancing pressure feedback

87 SELF-PROPORTIONING OR CORRELATING SYSTEMS
88 .Mixture condition maintaining or sensing
89 ..Dividing and recombining flow
91 ..By specific gravity
92 ..By viscosity or consistency
93 ..By optical or chemical property
94 .Fuel controlled by boiler or water system condition
98 .Self-proportioning flow systems
99 ..Interconnected flow displacement elements
99.5 ...Movable trap chamber
100 ..Flow comparison or differential response
101 ...Flow dividers (e.g., reversely acting controls)
101.11 ...Main line flow displaces or entrains material from reservoir
101.19 ...With electrical controller
101.21 ..Flow displacement element actuates electrical controller
101.25 ..Liquid level response
101.27 ...Float controlled weir or valve
101.29 ...Swinging outlet pipe controller
101.31 ..With measuring type discharge assistant
102 .Supply and exhaust type
103 ..Vacuum or suction pulsator type (e.g., milking machine)
104 ...With trip linkage or snap action
105 ...With pulsation responsive pilot valve
106 ..Reversing or 4-way valve systems
107 ..Waste responsive to flow stoppage
109 .Self-controlled branched flow systems
110 ..Dividing and recombining
111 ..Plural inflows
112 ...Alternate or successive inflows
113 ....Control by depletion of source
114 ...One inflow supplements another
115 ..By-pass or relief controlled by main line condition
116 ...With pressure opening outlet valve
116.3 ...With pressure reducing inlet valve
116.5 ....Relief port through common sensing means
117 ...Responsive to change in rate of main line flow
118 ..Plural outflows
119 ...Alternate or successively substituted outflow
120 ....Control by filling auxiliary gravitating or float operating tank
121 ....Control by filling outlet tank or receiver
122 .....Float controlled
123 SIPHONS
124 .Plural
125 ..Tank truck mounted
126 ..Sequentially discharging in parallel
127 ...From plural tanks
128 ..Main siphon with auxiliary starting, stopping or resetting siphon
129 ...Sinking or bucket-type float operated main siphon, float emptying auxiliary siphon
130 .With discharge-controlling receiver
131 ..With float
132 .Periodic or accumulation responsive discharge
133 ..With manual control
134 ..Control by filling auxiliary tank
135 ..Float-operated inlet to siphon
136 ..Release of trapped air
137 ...Through float-operated vent
138 ...Through liquid trap seal
139 ....Auxiliary liquid trap seal
140 .With strainer, filter, separator or sediment trap
141 .With recorder, register, signal, indicator or inspection window
142 .With flow starting, stopping or maintaining means
143 ..Siphon venting or breaking
144 ..With leakage or entrained air removal
145 ..Pressure applied to liquid in supply chamber
146 ..Plunge or immersion starting
147 ..Pump or liquid displacement device for flow passage
148 ...Piston
149 ....Co-axial within flow passage
150 ...Collapsible bulb
150.5 ..Siphon inlet movable to and from seat
151 ..With valve or closure in-flow passage
152 .With means for mounting and/or positioning relative to siphon chamber
153 .Elements
154 DIVERSE FLUID CONTAINING PRESSURE SYSTEMS
155 .Gas lift valves for wells
156 .Gas pressure discharge of liquids feed traps (e.g., to boiler)
157 ..Gas pressure controlled by amount of liquids in boiler or discharge receiver
158 ...Pressure connection at liquid level in boiler or discharge receiver
159 ..Gas pressure controlled by amount of liquid in trap
160 ...Plural trap chambers
161 ....Gravitating
162 ...Gravitating vessel
163 ....Sinking or bucket type float
164 ....Pivoted vessel with fluid passage through pivot
165 ...Float responsive
166 ....Liquid control valve positively actuated
167 ....Gas condensing type
168 ....Gas inlet and outlet valves unitary
169 ..Gas pressure controlled by manual or cyclic means
170 ...Movable trap chamber
170.1 .Foam control in gas charged liquids
170.2 ..Level or pressure responsive
170.3 ..Separate handling of foam
170.4 ..With conditioning trap or chamber
170.5 ...Recarbonation
170.6 ...With trap or chamber by-pass
171 .Fluid separating traps or vents
172 ..Liquids separated from liquid
173 ..Plural discriminating outlets for diverse fluids
174 ...Common actuator for control valves
175 ...Choke or restricted passage gas bleed
176 ....From above liquid level
177 ..Discriminating outlet for liquid
178 ...With alternately operated inlet and outlet valves
179 ...With non-discriminating gas vent or liquid discharge
180 ....Abnormal pressure responsive liquid blow-off or drain
181 ....Manual control
182 ...With auxiliary inlet or by-pass valve
183 ...With fluid responsive valve
184 ....Successively opened valves
185 ....Gas collecting float (e.g., inverted bucket)
186 .....Downstream from valve
187 ....Level responsive
188 .....Weight or pressure

DIVERSE FLUID CONTAINING PRESSURE SYSTEMS
.Fluid separating traps or vents
..Discriminating outlet for liquid
...With fluid responsive valve
....Level responsive
.....Weight or pressure
189 ......Gravitating vessel
190 ....Sinking or bucket type float
191 ....Servo-control
192 .....Float
193 ......With main line gas outlet from trap chamber
194 ......With outlet extending above liquid in trap
195 ......Servo-control
196 ......With pressure balanced outlet valve
197 ..Discriminating outlet for gas
198 ...With reverse flow stop or pressure regulating valve
199 ...Fluid sensing valve
200 ....With vaporized liquid stop
201 .....With separate return for condensate
202 ....Float responsive
203 ..With liquid emptying means
204 ...Self-emptying
205 .Liquid filling by evacuating container
205.5 .Main line flow displaces additive from shunt reservoir
206 .Gas pressure storage over or displacement of liquid
207 ..Surge suppression
207.5 ..With return of liquid to supply
208 ..Plural units
209 ..With gas maintenance or application
210 ...Gas carried by or evolved from liquid
211 ....Gas injectors
211.5 ...Gas injected by liquid pressure or flow
212 ...Unitary mounting for gas pressure inlet and liquid outlet
213 ..With liquid level responsive gas vent or whistle
214 ...Combined high and low level responsive
215 BACK FLOW PREVENTION BY VACUUM BREAKING (E.G., ANTI-SIPHON DEVICES)
216 .Air vent in liquid flow line
216.1 ..With liquid seal in liquid flow line
216.2 ...Automatic valve in vent line
217 ..Valved
218 ...With co-acting valve in liquid flow path
219 LARNER-JOHNSON TYPE VALVES; I.E., TELESCOPING INTERNAL VALVE IN EXPANDED FLOW LINE SECTION
220 .Line condition change responsive
221 .Internal servo-motor with internal pilot valve
222 ..Pilot controlled passage in nose or needle
223 INFLATABLE ARTICLE (E.G., TIRE FILLING CHUCK AND/OR STEM)
224 .With pressure-responsive pressure-control means
224.5 ..Pulsating
225 ..Diaphragm, bellows or expansible tube
226 ..Co-axial inflation and relief valves
227 .With gauge or indicator
228 ..With deflating means
229 ..Selectively connected
230 .Stem attached relief valve
231 .With coupling means
232 .With cap
233 ..Valve actuating, assembling or locking means on cap
234 ...Valve manually seated
234.5 .Removable valve head and seat unit (valve insides)
234.6 WITH VEHICLE GUIDE OR SUPPORT, E.G., SERVICE STATION
236.1 DISTRIBUTION SYSTEMS INVOLVING GEOGRAPHIC FEATURES
237 WITH CLEANER, LUBRICATION ADDED TO FLUID OR LIQUID SEALING AT VALVE INTERFACE
238 .Cleaning or steam sterilizing
239 ..Reverse fluid flow
240 ..With separate material addition
241 ..Steam sterilizing
242 ..Mechanical cleaning
243 ...Valve grinding motion of valve on seat
243.1 ....Concentric stem
243.2 ....Spring pressed
243.3 ....Lost motion permits grinding
243.4 ....With swivel-preventing means
243.5 ....Nut releasable from body and/or stem
243.6 ....With independent grinding actuator
243.7 .....Separable
244 ...Cleaning member reciprocates in passage
245 ....By-pass cleaning
245.5 ....Independent actuation
246 .Liquid supplied at valve interface
246.11 ..Plural feed
246.12 ..Line pressure feed
246.13 ..Feed by or with actuation
246.14 ..Loss control
246.15 ..Screw feed
246.16 ...With check valve
246.17 ....Excess relief
246.18 ....Jacking
246.19 ...Jacking
246.2 ...Seating
246.21 ..Spring biased piston feed
246.22 ..External pressure
246.23 ..Gravity or capillary feed
247 WITH LIQUID VALVES OR LIQUID TRAP SEALS
247.11 .Liquid seal in liquid flow line; flow liquid forms seal
247.13 ..Valves
247.15 ...Line condition change responsive
247.17 ....Plural valves or valve seats
247.19 ....Pivoted valve
247.21 ....Ball valve
247.23 .....Seats vertically up
247.25 ..Seal replenishers
247.27 ..Plural inlet
247.29 ..Divided and recombined passages
247.31 ..Tangential inlet flow
247.33 ..Downward partition encircles projecting outlet
247.35 ..Submerged inlet pipe end
247.37 ..Hinged seal bowl
247.39 ...Distinct seal bowl in flow line connected casing
247.41 ..U-seals
247.43 ...Topside access beneath cover plate closed floor opening
247.45 ...Enlarged upflow leg
247.47 ....Topside access opening
247.49 ...Even diameter legs
247.51 ....Access opening
248 .Seal for relatively movable valving parts
249 ..Horizontally moving valve
250 ...Rotary
251.1 .Liquid valves
252 ..Branched passage for sealing liquid
253 ..With auxiliary means for varying liquid level
254 ..With baffle
255 PLURAL TANKS OR COMPARTMENTS WITH PARALLEL FLOW

	PLURAL TANKS OR COMPARTMENTS WITH PARALLEL FLOW
256	.Sequentially filled and emptied (e.g., holding type)
257	..With relative rotation of tank group and filling head
258	...With rotary filling and emptying head
259	.With housings, supports or stacking arrangements
260	.Battery or electrolytic cell replenishment
261	..Barometric supply
262	.Flow dividing compartments
263	.Tank type manifold (i.e., one tank supplies or receives from at least two others)
264	.Tank within tank
265	.With cross connecting passage
266	.With manifold or grouped outlets
267	..Tank truck type
268	WITH HOLDER FOR SOLID, FLAKY OR PULVERIZED MATERIAL TO BE DISSOLVED OR ENTRAINED
269	CONVERTIBLE
269.5	.Reversible check
270	.Unit orientable in a single location between plural positions
270.5	..Reversible stop and vent or waste
271	.Units interchangeable between alternate locations
272	HYDRANT TYPE
273	.Water crane type
274	..Spout operated valve
275	..Rotating riser
276	...Spout articulated to riser
277	...Vertically movable riser
278	..Extensible spout
279	..Spout articulated to riser
280	.Plural riser
281	.Expansible chamber operated by valve actuator for draining riser
282	.With pump or ejector
283	.Removable valve and valve seat
284	..With extension to facilitate removal
285	.Removable valve with supplemental check valve
286	.Movable riser actuated valve
287	..Reciprocating riser
288	...Piston type valve
289	.Balanced valve
290	.Valve actuator extends laterally from bottom of riser
291	.Valve actuator outside riser
292	..Lever actuator
293	..With casing, flush with ground or pavement surface
294	.With casing
295	..Flush with ground or pavement surface
296	..Cap, cover or hood
297	..With heater
298	.With actuator lubricating means
299	.With valve at outlet
300	.With supplemental valve
301	.Protection against freezing
302	..Stop and waste
303	...With disabling means
304	...Separate relatively movable valves with single actuator
305	....Unidirectional abutting connection between main valve or actuator and waste valve
306	....With screw or gear in actuating mechanism
307	...Reciprocating relatively fixed valves
308	....Waste through lower valve guide
309	REVERSING VALVES - REGENERATIVE FURNACE TYPE
310	.With cooling
311	.Rotary reversing valve
312	WITH LEAKAGE OR DRIP COLLECTING
313	.Relatively movable receptacle or drain pipe and outlet
314	.Collector for waste liquid derived from solid, gas or vapor
315	WITH REPAIR, TAPPING OR ASSEMBLY MEANS
316	.With holding means functioning only during transportation assembly or disassembly
317	.Tapping a pipe, keg, or apertured tank under pressure
318	..With aperture forming means
319	..Imperforate closure removing and holding tap
320	..With valved closure or bung
321	...Combined rotary and longitudinal movement of valve
322	...Longitudinal movement of valve
323	...Rotary movement of valve
324	..With core ejectors
325	...Impact operated
326	.Foot valve extraction from top of enclosure
327	.With disassembly tool engaging feature
328	..Wrench engaging lugs
329	.With provision of alternate wear parts
329.01	..Valve heads and/or seats
329.02	...Opposite duplicate surfaces of unitary structure
329.03	....Homogeneous material
329.04	.....Valve heads
329.05	...Different portions of continuous surfaces
329.06	...Successively used adjacent independent elements
329.1	.Removable valve with normally disabled supplemental check valve
329.2	..Check valve disabled by normally movable main valve part
329.3	...Ball check
329.4	...Spring bias
330	NON-VALVING MOTION OF THE VALVE OR VALVE SEAT
331	.Rotary motion of a reciprocating valve
332	..Turbine on valve
333	..Manual rotating means
334	WITH HEATING OR COOLING OF THE SYSTEM
335	.With burner
336	..Flue extending through fluid
337	.Hot and cold water system having a connection from the hot to the cold channel
338	.Air heated or cooled (fan, fins, or channels)
339	.With diversion of part of fluid to heat or cool the device or its contents
340	.Circulating fluid in heat exchange relationship
341	.With electric heating element
342	WITH FLUID SYSTEM SUPPORT FOR WORKMAN OR NON-SYSTEM MATERIAL
343	WITH CASING, SUPPORT, PROTECTOR OR STATIC CONSTRUCTIONAL INSTALLATIONS
899	.Vehicle
345	..Locomotive
346	...Boiler or steam dome
347	..Railway car
348	...Car frame
349	...End of car
350	...Roof, wall or floor
351	..Automotive
352	...Steering post or wheel
353	...Dash
354	...Floor or frame
355	...Fender or running board
355.12	..With hose reel storage means
899.1	..Guided by means of track or guideway

WITH CASING, SUPPORT, PROTECTOR OR STATIC CONSTRUCTIONAL INSTALLATIONS
.Vehicle
899.2 ..Aerial or water-supported (e.g., airplane or ship, etc.)
899.3 ..With retractable or nonuse-positionable support wheel
899.4 ..Vehicle supports fluid compressor and compressed fluid storage tank
355.16 .With hose storage or retrieval means
355.17 ..With means for plural hoses
355.18 ..With flow regulation responsive to hose movement
355.19 ...Reel type
355.2 ..With retrieval means
355.21 ...Power stop or brake
355.22 ....Responsive to position of hose in casing
355.23 ...Biased to retracted position
355.24 ....Boom type
355.25 ....Weighted
355.26 ..Reel with support therefor
355.27 ...Ground supported
355.28 ..Basket or holder for folded coiled hose
356 .Static constructional installations
357 ..Buildings
358 ...Outside access to portions of the system
359 ...Escutcheon type support
360 ...Wall
361 ....Recessed gas outlet box
362 ...Floor installation
363 ..Ground supporting enclosure
364 ...Valve and meter wells
365 ....With means to center well on valve
366 .....Detachable base plate
367 .....Vertical casing aligned by valve casing
368 ....Combined with actuator
369 .....Telescopic well casing
370 ....Telescopic well casing
371 ....Covers
372 ...Pipe line transport
373 ..Tapering or tower type
374 .Furniture and housing furnishings
375 .Jacketed
376 .Tank supports
377 .Guards and shields
378 ..Resilient abutment for preventing breakage
379 ..Nozzle abutment for scratch or damage prevention
380 ..Cover for beer cooler aperture for faucet
381 ..Sanitary covers or shields
382 ..Valve guards
382.5 ...With means for accommodating a detachable actuator
383 WITH LOCK OR SEAL
384 .With seal
384.2 .Common lock and valve actuator
384.4 ..Combination lock
384.6 ..Biased valve
384.8 ..Mechanical movement between lock and valve
385 .Locks against rotary motion
386 LIQUID LEVEL RESPONSIVE OR MAINTAINING SYSTEMS
387 .Washing machine cycle control
388 .Liquid excluding devices for gas inlet or outlets
389 .With second diverse control
390 ..Manual control
391 .Control of both inflow and outflow of tank
392 .Electrical characteristic sensing
393 .With control fluid connection at desired liquid level
395 .Control of outflow from tank
396 ..Self-emptying tanks
397 ...By float
398 ..By float
399 ...Low level safety cut-off
400 .With supplemental or safety closing means or bias
401 ..Sinking or bucket type float
402 ..Gravitating tank
403 .By weight of accumulated fluid
404 ..In sinking or bucket type float
405 ..Oil burner fuel overflow preventing safety cut-offs
406 ..In communicating measuring vessel
407 ...Top and bottom connections
408 ..In gravitating tank
409 .By float controlled valve
410 ..Valve opened by external means, closing or closing control by float
411 ..Single float controls plural valves
412 ..Servo relay operation of control
413 ...Fluid pressure
414 ....Flexible diaphragm valve
415 ....From tank
416 ..Quick acting
417 ...Pilot float released
418 ...Over center mechanism
419 ....Shifting weight
420 ...Trip mechanism
421 ....Weight or spring bias
422 ...Lost motion mechanism
423 ..Plural floats
424 ..With counter-balance
425 ..Within tank
426 ..Level adjustment or selection means
427 ..With float leakage disposal
428 ..In separate communicating float chamber
429 ..Rectilinearly traveling float
430 ...Float co-axial with valve or port
431 ....Float is spreader or anti-splash means
432 ....Float surrounds inlet pipe
433 ....Float rigid with valve
434 ..Float arm operated valve
435 ...With valve retarder or cushion means
436 ...With flow guide or restrictor
437 ....External hood or deflector or annular outlet surrounding the inlet pipe
438 ...Movable nozzle or inlet terminal
439 ...Valve removable from outside container
440 ...With U-shaped inlet pipe having terminal valve
441 ...With refill pipe
442 ...Assembly mounted on and having reciprocating valve element co-axial with inlet pipe
443 ....Horizontal or side entering pipe
444 ....Vertical inlet riser
445 ...With toggle or second lever connected to valve
446 ...With interposed cam, gear or threaded connection
447 ...Rotary valve element
448 ...Pivoted valve
449 ...Ball valves
450 ...Balanced valves
451 ...Flexible valve
453 .Barometric
454 ..With shut-off between supply tank and receiver
454.2 REMOVABLE VALVE HEAD AND SEAT UNIT
454.4 .Pump type
454.5 .Threaded into valve casing

REMOVABLE VALVE HEAD AND SEAT UNIT
454.6 .Retained by bonnet or closure
455 LINE CONDITION CHANGE RESPONSIVE VALVES
456 .Safety cut-off requiring reset
457 ..Thermal
458 ..Responsive to both high and low pressure or velocity
459 ..Responsive to change in rate of flow
460 ...Excessive flow cut-off
461 ..High pressure cut-off
462 ..Reset by pressure equalization valve or by-pass
463 ..Fluid released trip
464 ..Fluid counter-biased or unseated valve
465 ...With mechanical stop against reopening
466 ...With fluid pressure seating of valve
467 .Fluid opened valve requiring reset
467.5 .Consistency responsive
468 .Thermal responsive
469 .Pop valves
470 ..Pop closing valves
471 ..Pop pressure reactor in inflow to valve
472 ..Pop pressure reactor in branched released path
473 ...Separate relief valves or valves for each branch
474 ..Lost motion between pop pressure reactor and valve
475 ..Adjustable choke
476 ...Annular lip or baffle
477 ....On movable valve part
478 ....Screw threaded
479 .Combustion engine induction type
480 ..Valve in auxiliary inlet to induction line
481 ..With manual modifier
482 ..With suction compensator
483 ..With separate reactor surface
484 ..Unbalanced pivoted valve (e.g., unbalanced butterfly type)
484.2 .Line flow effect assisted
484.4 ..Reactor surface normal to flow
484.6 ..Reactor surface separated from flow by apertured partition
484.8 ...Through separate aperture
485 .Pilot or servo controlled
486 ..Responsive to change in rate of fluid flow
487 ...Control by pressures across flow line valve
487.5 ..Electrically actuated valve
488 ..Fluid pressure type
489 ...Choked or throttled pressure type
490 ....Pilot valve within main valve head
491 ....Choked passage through main valve head
489.3 ....Loose fitting piston
489.5 ....Pilot controls supply to pressure chamber
492 ...Single acting fluid servo
492.5 ....Spring biased
493 .Bi-directional flow valves
493.1 ..One head and seat carried by head of another
493.2 ...Supporting valve only spring biased
493.3 ...Supporting valve spring carried by supporting valve
493.4 ....Spring stop on supported valve stem
493.5 ....Spring abuts guide for supported valve stem
493.6 ...Both valves spring biased
493.7 ..Axes of ports perpendicular
493.8 ..Axes of ports parallel
493.9 ..Axes of ports co-axial
494 .With separate connected fluid reactor surface
495 ..With manual or external control for line valve
496 ..Valve closes in responses to reverse flow
497 ..Responsive to change in rate of fluid flow
498 ...Valve closes in response to excessive flow
499 ...Turbine or swinging vane type reactor
500 ...Expansible chamber subject to differential pressures
501 ....Pressures across fixed choke
502 ....With Venturi tube having a connection to throat
503 ....Pressures across flow line valve
504 ...Movable deflector or choke
505 ..With opening bias (e.g., pressure regulator)
505.11 ...With relief valve
505.12 ...Multi-stage
505.13 ...Senses inlet pressure
505.14 ...Bias variable during operation
505.15 ....Ancillary reactor surface responds to inlet pressure
505.16 ....Liquid transfer
505.17 ....Weight
505.18 ...Balanced valve
505.19 ...Liquid level responsive gas flow control
505.2 ...With protective separator
505.21 ...Main flow through isolated reactor chamber
505.22 ...Through external pipe
505.23 ....Modified valve casing
505.24 ....Adjustable external lever
505.25 ...Apertured reactor surface surrounds flow line
505.26 ...Reactor surface separated by apertured partition
505.27 ....In valve stem
505.28 .....Also through reactor surface
505.29 ....Valve stem passes through the aperture
505.3 .....Plural reactor surfaces
505.31 .....Reactor is an inverted cup having liquid seal
505.32 ......With movement dampener
505.33 ......Valve head in inlet chamber
505.34 .....Valve head in inlet chamber
505.35 ......Rectilinear valve stem rigid with reactor surface
505.36 ....Reactor surface is diaphragm
505.37 .....With valve closing bias
505.38 ...Reactor surface closes chamber
505.39 ....Valve head in inlet chamber
505.4 .....Reactor surface is inverted cup (float)
505.41 .....Rectilinear valve stem rigid with reactor surface
505.42 .....With valve closing bias
505.43 ......In reactor chamber
505.44 ....Valve head on yoke
505.45 .....Yoke has valve closing bias
505.46 ....Reactor operatively connected to valve by mechanical movement
505.47 ...With mechanical movement between actuator and valve
506 ..Plural valves biased closed
507 ..With means for mounting or connecting to system
508 ..Valve seat or external sleeve moves to open valve
509 ..Valve seating in direction of flow
510 ...Flexible diaphragm or bellows reactor
511 .Direct response valves (i.e., check valve type)
512 ..Plural

	LINE CONDITION CHANGE RESPONSIVE VALVES
	.Direct response valves (i.e., check valve type)
	..Plural
512.1	...Dividing and recombining in a single flow path
512.15	....Integral resilient member forms plural valves
512.2	...One valve carries head and seat for second valve
512.3	...Diverse types
512.4	...Integral resilient member forms plural valves
512.5	...With common biasing means
513	...Mechanically interconnected
513.3	..With leak passage
513.5	...Permits flow at valve interface
513.7	...Bypass in valve casing
514	..With retarder or dashpot
514.3	...End of valve forms dashpot chamber
514.5	...End of valve moves inside dashpot chamber
514.7	....Enlarged piston on end of valve stem
515	..In couplings for coaxial conduits, e.g., drill pipe check valves
515.3	...Valve seat threaded into a coupling element
515.5	...Valve seat formed on or carried by a coupling element
515.7	...Valve seat clamped between coupling elements
516	..With means for selecting area of valve or seat
516.11	..Single head, plural ports in parallel
516.13	...Concentric ports
516.15	...Annular head
516.17	....Central post on seat
516.19	.....Stop
516.21	......With guide
516.23	.....Guide
516.25	..Plural seating
516.27	...Sequential
516.29	....Resilient gasket
517	..Biased open
518	...Oppositely swinging vanes
519	...Weight biased
519.5	....Ball valves
520	....Edge pivoted valve
521	...Pivoted valves
522	..With external means for opposing bias
523	...With means for retaining external means in bias opposing position
524	..With bias adjustment indicator
843	..Resilient material valve
844	...Having expansible port
845	....Apertured plate
846	....Having exit lip
847	.....With biasing means
848	.....Side vent
849	.....Multiple slit
850	.....Internally extending mount
851	...Center flexing strip
852	...With valve member flexing about securement
853	....Sleeve
854	....Central mount
855	....Flap or reed
856	.....With stop
857	.....With spring
858	.....With weight
859	....Peripherally secured diaphragm
860	...Annulus
526	..Vacuum relief type
527	..Pivoted valves
527.2	...Head retained by removable closure
527.4	...Valve head movably connected for accommodation to seat
527.6	...Valve mounted on end of pipe
527.8	...Weight biased
528	..Reciprocating valves
529	...Plural biasing means
530	...Cam means for adjusting and fixing bias
531	...Varying effective lever arm
532	...Weight biased
533	....Valve body is the weight
533.11	.....Ball valves
533.13	......Removable cage
533.15	......Separable seat
533.17	.....Guided head
533.19	......Cage
533.21	......Guide stem
533.23	.......With closing stop
533.25	.......Oppositely disposed
533.27	.......Head slidable on guide rod
533.29	.......Guide and seat integral unit
533.31	.......Guide and closure integral unit
534	....Weight coaxial with valve
535	...Spring biased
536	....With means to protect spring from fluid
537	....Spring under tension
538	....Piston-type valves
539	....Ball valves
539.5	.....With follower
540	....Spring coaxial with valve
540.11	.....Broken valve parts retainer
541	.....Spring in inlet
542	.....Valve stem extends through fixed spring abutment
543	......Yoke or cage-type support for valve stem
543.13	.....Spring abuts removable valve stem guide
543.15	.....Head slides on guide-rod concentric with spring
543.17	.....Spring guides valve head
543.19	.....Cage-type guide for stemless valves
543.21	.....Guide means integral and coplanar with valve disk
543.23	.....Head between spring and guide
544	WITH MEANS FOR SEPARATING SOLID MATERIAL FROM THE FLUID
545	.Plural separating elements
546	.Sediment chamber
547	.Movable strainer
549	.Hollow strainer, fluid inlet and outlet perpendicular to each other
550	.Planar strainer normal to flow path
551	WITH INDICATOR, REGISTER, RECORDER, ALARM OR INSPECTION MEANS
552	.Plural
552.5	..Unobvious - "combination lock" type
552.7	.Time
553	.Position or extent of motion indicator
554	..Electrical
555	..Selection from plural branches
556	..Indicator element rigidly carried by the movable element whose position is indicated
556.3	...Movable indicator element is a pointer
556.6	....Pointer integral with handle
557	.Fluid pressure responsive indicator, recorder or alarm
558	.Liquid level responsive indicator, recorder or alarm
559	.Inspection means
560	COMBINED
561 R	SYSTEMS
561 A	..Non-valved flow dividers
562	.Faucet connected, sink drained
563	.Closed circulating system
564	..With thermal circulating means (thermo-siphons)

SYSTEMS

564.5	.Main line as motive fluid for follower-type feeder
565	.With pump
565.1	..Downstream cyclic distributor
565.2	...Distributor part unitary with movable pump part
566	..Plural
567	...Parallel
568	..With reserve or surge receiving means
569	..With pump bypass
570	..Drain valve actuator mounted on pump
571	.Plural tanks or compartments connected for serial flow
572	..Separable with valved-connecting passage
573	..Fluid progresses by zigzag flow
574	..Plural compartments formed by baffles
575	..Plural top-to-bottom connected tanks
576	..With communicating opening in common walls of tanks or compartments
577	.Tank with movable or adjustable outlet or overflow pipe
577.5	..Horizontally traversing outlet
578	..Float-supported outlet
579	..Swinging outlet pipe or spout
580	.With running joint between movable parts of system
581	.Movable tank
582	.With antisplash means not in flow passage
583	.System with plural openings, one a gas vent or access opening
584	..Access and outlet
585	...Tank access opening and bottom outlet
586	....Access opening interlock or telltale on outlet valve actuator
587	..Tank with gas vent and inlet or outlet
588	...Vent and inlet or outlet in unitary mounting
589	..With vented outlet
590	.Tank with internally extending flow guide, pipe or conduit
590.5	..Nondraining overflow type
591	..Inverted "U" passage
592	..Inlet internally extending
593	.Head-establishing standpipe or expansion chamber (e.g., surge tanks)
624.11	.Programmer or timer
624.12	..With independent valve controller
624.13	..Repeating cycle
624.14	...Self-cycling
624.15	...Variable
624.16	....Attachable and removable element
624.17	....Adjustable cam
624.18	..Plural, sequential, valve actuations
624.19	...Plural trips or trip actuations
624.2	...Variable cycle
624.21	..Clock alarm mechanism controlled
624.22	..Biased latch, cam operated
624.27	.Line condition change responsive release of valve
625	.Multi-way valve unit
625.11	..Sequential distributor or collector type
625.12	..Sequentially progressive opening or closing of plural ports
625.13	...With subsequent closing of first port
625.14	....Flow combining with flow dividing
625.15	....Rotary
625.16	.....Plug
625.17	..Selective reciprocation or rotation
625.18	..Plural noncommunicating flow paths
625.19	...Rotary plug
625.2	..Supply and exhaust
625.6	...Pilot-actuated
625.61	....Variable orifice-type modulator
625.62	.....Opposed orifices; interposed modulator
625.63	....Common to plural valve motor chambers
625.64	....Electric
625.65	...Motor-operated
625.66	....Fluid motor
625.21	...Rotary valve
625.22	....Plug type
625.23	.....For plural lines
625.24	.....Axial and radial flow
625.25	...Reciprocating valve
625.26	....Combined disk or plug and gate or piston
625.27	....Plural disk or plug
625.67	....Piston valve
625.68	.....With internal flow passage
625.69	.....With annular passage (e.g., spool)
625.28	..Dividing into parallel flow paths with recombining
625.29	...Valve with bypass connections
625.3	...With metering feature
625.31	...Rotary
625.32	....Plug
625.33	...Reciprocating
625.34	....Spool
625.35	.....With internal passage
625.36	.....Unequal heads
625.37	....Piston
625.38	.....With internal flow passage
625.39	......Sequential opening or closing of serial ports in single flow line
625.4	..Multiple inlet with single outlet
625.41	...Rotary valve
625.42	..Selective opening of plural ports
625.43	..Four port reversing valves
625.44	..Pivoted valve unit
625.45	...Gate
625.46	..Rotary valve unit
625.47	...Plug
625.48	..Reciprocating valve unit
625.49	...Combined disk or plug and gate or piston
625.5	...Plural disk or plug
626	.Plural petcocks
627	.Sequential distributor or collector type
627.5	.Sequentially closing and opening alternately seating flow controllers
628	.Sequentially progressive opening or closing of plural valves
629	..Pressure equalizing or auxiliary shunt flow
630	...One valve seats against other valve (e.g., concentric valves)
630.11	....Locomotive throttle
630.12	....Gate
630.13	....With balancing chamber
630.14	....First valve moves second valve
630.15	....Actuator moves both valves
630.16	..With subsequent closing of first opened port
630.17	...Simultaneously moved port controllers
630.18	..Screw-actuated differential valves
630.19	..Lost motion
630.2	...Cam determines sequence
630.21	...Rotary concentric valves
630.22	...First valve actuates second valve
635	.With preselecting means for plural valve actuator
636	.With selective motion for plural valve actuator
636.1	..Oppositely movable cam surfaces
636.2	..Rotation about either of two pivotal axes
636.3	..Rotation of actuator arm about its pivot and its axis

	SYSTEMS
	.With selective motion for plural valve actuator
636.4	..Reciprocation along and rotation about same axis
637	.Valves with separate, correlated, actuators
637.05	..Correlated across separable flow path joint
637.1	..Interlocked
637.2	..Coaxial stems
637.3	...Rotary
637.4	....And reciprocating
637.5	....Concentric, central valve removable
594	.Plural noncommunicating flow paths
595	..With common valve operator
596	.Supply and exhaust
596.12	..With bypass
596.13	...Controlled by supply or exhaust valve
596.14	..Pilot-actuated
596.15	...Common to plural valve motor chambers
596.16	...Electric
596.17	..Motor
596.18	...Fluid motor
596.1	..Biased exhaust valve
596.2	...Biased closed
597	.Multiple inlet with multiple outlet
598	.Hydraulic brake line (e.g., hill holders)
599	.Dividing into parallel flow paths with recombining
599.1	..Flow passage with bypass connections
599.2	..Second valve assembly carried by first valve head
600	..With foam controlling means (e.g., beer, soda faucets)
601	..With common operator for valve in each path
602	.Multiple inlet with single outlet
603	..Faucet attachment
888	..Combining by aspiration
889	...Combining of three or more diverse fluids
890	...Plural motivating fluid jets
891	...Flow control by varying position of a fluid inlet relative to entrainment chamber
892	...With selectively operated flow control means in inlet
893	....Flow control means is located in aspirated fluid inlet
894	.....Single actuator operates flow control means located in both motivating fluid and aspirated fluid inlets
895	...With condition responsive valve
896	..With means to promote mixing or combining of plural fluids
897	...With selectively operated flow control means
898	....Single actuator operates plural flow control means
605	..With flow control
606	...Valve in each inlet
607	....With common valve operator
861	.With flow control means for branched passages
862	..With common valve operator
863	...For valve having a flexible diaphragm valving member
864	...For valve having a ball head
865	...With gearing
866	...Threaded actuator
867	...Pivoted or rotary motion converted to reciprocating valve head motion
868	....Spring biased
869	...Having fluid actuator
870	...With electrical actuation
871	...Spring biased
872	..With valve or movable deflector at junction
873	...Movable deflector spout in lateral port
874	...Valve or deflector is tubular passageway
875	...Pivoted valve or deflector
876	...Rotary valve or deflector
877	..Biased valved
878	...Spring bias
879	....For valve having a ball head
880	....With threaded actuator
881	....Spring coaxial with valve
882	.....Biased open
883	..Single inlet with multiple distinctly valved outlets
884	..Sectional block structure
885	..With fluid actuator
886	..With threaded actuator
887	..Containing rotary valve
613	.Flow path with serial valves and/or closures
614	..Separable flow path section, valve or closure in each
614.01	...Common joint and valve seat faces, or sections joined by closing members
614.02	...Each valve and/or closure operated by coupling motion
614.03	....Linear motion of flow path sections operates both
614.04	.....Valves actuate each other
614.05	...Valve- or closure-operated by coupling motion
614.06	...Coupling interlocked with valve, or closure or actuator
614.11	..Common actuator
614.12	...Delivery cock with terminal valve
614.13	...Alternately seating
614.14	....Biased valve
614.15	...Opposed screw
614.16	..One valve head provides seat for other head
614.17	...Also carries head of other valve
614.18	..One valve head carries other valve head
614.19	..Biased valve with external operator
614.2	..Direct response normally closed valve limits direction of flow
614.21	..Coaxial oppositely directed seats
615	.Articulated or swinging flow conduit
616	..Actuates valve
616.3	...Plural motions of valve
616.5	...Reciprocating valve
616.7	...Rotary valve

CLASS 141 FLUENT MATERIAL HANDLING, WITH RECEIVER OR RECEIVER COACTING MEANS

1 PROCESSES
1.1 .Battery grid pasting
2 .Filling dispensers
3 ..Aerosol or gas-charged type
4 .Gas or variation of gaseous condition in receiver
5 ..With filling with fluent non-gaseous materials
6 ...Counter-pressure type
7 ...With evacuation of container
8 ..Vacuum
9 .Plural materials
10 .Bag filling
11 .With material treatment
12 ..Compacting
13 MODIFICATION OF FILLING CYCLE IN STARTING AND STOPPING
14 SIPHON BOTTLE CHARGING ARRANGEMENTS
15 .For receiver with diverse filling opening
16 .With plural heads, stations or materials
17 .With gas capsule supporting or manipulating means
18 FILLING OR REFILLING OF DISPENSERS
19 .With cutter or punch for gas pressure cartridge
20 .Aerosols
20.5 .Coating-implement-type receiver
21 .By operation of means causing or controlling dispensing
22 ..Removable dispenser is supply container closure
23 ...Expansible chamber dispenser
24 ....Resilient wall
25 ..Expansible chamber of fluid pressure applying or controlling means
26 ...Dispenser carried expansible chamber pump
27 ...Container with follower
28 ...Container mounted jet pump
29 .Closure type with manually controlled vent
31 CAPILLARY TYPE
32 BATTERY GRID PASTING
33 .Separate sources applied to opposite sides
34 CENTRIFUGAL FILLING
35 PLURAL CONNECTED RECEIVERS FILLED BY SERIAL FLOW
36 .Succeeding receiver advanced to filling position
37 DIVERSE FLUID CONTAINING PRESSURE FILLING SYSTEMS INVOLVING RECEIVER GAS CONTENT MODIFICATION
38 .Tire inflation
39 .Filling means controlled by gas condition in receiver
40 ..Control by level in filled receiver
41 ...Air pump external to flow line
42 ....Float controlled vacuum line cut-off
43 .....Vacuum line vented to atmosphere
44 .Gas and other material separating passage or chamber
45 ..Material returned to supply
46 .System fluid used in seal or in valve or lift operation
47 .Gas control or supply varied, shifted or supplemented during cycle
48 ..Gas cycle for pre-treatment of receiver or contents material
49 ..Plural or diverse gassing and/or filling cycles
50 ..Shifted to vent or fill pipe
51 .Gas condition control in housing for receiver
52 .With separate storage of gas displaced from receiver
53 ..With receiver vent to measuring trap
54 .With plural diverse passages for gas to receiver or head
55 ..Vent to drain fill pipe
56 ..Three or more
57 ..Receiver vented to atmosphere before separation (e.g., snift)
58 ...Constant bleed
59 .Filling with exhausting the receiver
60 ..Receiver coupling comprises movable pump element
61 ..Vacuum cut-off before filling
62 .With lateral travel of registering head and receiver
63 .Gas treatment
64 ..Of filled receiver
65 EVACUATION APPARATUS
66 .With filling with gas
67 FLUENT CHARGE IMPELLED OR FLUID CURRENT CONVEYED INTO RECEIVER
68 .Valve bag type
69 WITH MATERIAL TREATMENT
70 .With fluid contact (e.g., jetting)
71 .Compacting
72 ..Agitation of head and receiver
73 ..Compacting material in receiver
74 ...Agitation
75 ....Of suspended receiver
76 .....Valve bag chair
77 ....With distortion of or impact on receiver side walls
78 ....Agitating means associated with receiver conveyer
79 .....Rotary conveyer
80 ...In filled receiver
81 ..With contraction of trap to form charge
82 .Heating or cooling
83 WITH TESTING OR WEIGHING RECEIVER CONTENT
84 CONVERTIBLE
85 WITH SOIL REMOVING, COATING, LUBRICATING, STERILIZING AND/OR DRYING
86 .Drip collection
87 ..Collector shiftable to non-use position
88 ..Collector associated with receiver support
89 .With cleaning, coating or drying means
90 ..Nozzle cleaner
91 ..Treatment by fluids
92 ...Pre-treatment of receiver
93 .Suction hoods and off-takes
94 WITH SIGNAL, INDICATOR, RECORDER, INSPECTION MEANS OR EXHIBITOR
95 .Level or pressure in receiver
96 ..Hose nozzle or faucet mounted
97 WITH GUARD OR SCREEN FOR OPERATOR
98 COMBINED
99 PLURAL DIVERSE FILLING LINES
100 PLURAL MATERIALS, MATERIAL SUPPLIES OR CHARGES IN A RECEIVER
101 .Lateral travel of registering head and receiver
102 .Plural charges from the same source
103 .Separate stations for a single receiver
104 .Selectively utilized sources
105 .With common discharge
106 ..Dumping or draining
107 ..With mingling in or successive path through trap
108 SCOOP TYPE FILLER WITH ASSOCIATED RECEIVER
109 .Receiver within scoop or inserter
110 ABSORPTION AND/OR IMMERSION

	ABSORPTION AND/OR IMMERSION
111	.With handling means for receiver
112	.Receiver secured to supply closure
113	RECEIVER FILLED THROUGH BOTTOM OR WHILE INVERTED
114	WITH MANIPULATION OF FLEXIBLE OR COLLAPSIBLE RECEIVER OR SUPPLY
115	DRIP PREVENTION BY FLOW REVERSING AND/OR OVERFILL REMOVAL
116	.By means reversing direction of flow
117	..Expanding chamber in disengaged head
118	..By tilting receiver and adjoined filler
119	..Interconnected supply valve cut-off and vacuum control
120	..Siphonic return to supply
121	.Separate removal station
122	..With subsequent filling
123	..Combined displacement receptacle and vacuum means
124	..Receiver tilting or inverting means
125	..Wiping, scraping or spatulating means (e.g., trimming)
126	.Simultaneous filling and removing
127	..Double acting or plural pumps
128	DRIBBLE OR REDUCED FLOW AT END OF CYCLE
129	WITH CONVEYING MEANS TO SUPPLY SUCCESSIVE RECEIVERS
130	.Sampler type
131	.Continuous flow type
132	..Receivers with overlapping flanges or apertured shields
133	..Receiver carrier forms moving support for supply
134	..With spaced receivers and redirected flow
135	.With lateral motion of registering head and receiver
136	..Bodily lifted or swinging siphon filling means
137	..Laterally reciprocating head or trap
138	..Interrupted or irregular cycle
139	...Automatic control by contents material
140	...No can - no fill
141	....Power control by receiver
142	.....Cam track switching
143	.....Vertical axis trigger
144	..Rotary set of heads
145	...Common vertical axis for conveyer
146	....With vertically reciprocating plunger or valve piston for each head
147	....With cam or abutment operated valve or head
148	....With lift means for receiver
149	.....With additional cushion or yielding lift
150	.....Cam lift or lowered movement
151	....Manually placed receivers
152	....Adjustable to receiver size
153	.Automatic control of filling cycle by contents material
154	.Receiver with asymmetrical or flap closed inlet
155	.Safety-stop or non-operating interlock between supply and conveyers
156	.Fill triggered by receiver
157	..Individual receiver controls the filling cycle therefor
158	...Charge-forming prevention or charge disposal
159	...Power control by receiver
160	....Servo-system
161	....Clutch control
162	...Power derived from lateral motion of receiver
163	.Horizontal axis conveyer
164	.Receiver supported on side during filling
165	.With relatively movable receiver grip or centering means
166	..Bag type receiver
167	.With variable rate of receiver travel in cycle
168	.Conveyer with additional receiver conveying or manipulating means
169	..Plural receiver lines to or from single
170	..Lateral shift at filling station between parallel receiver paths
171	..With change in receiver orientation
172	..With lifting or lowering means for receiver for filling
173	..With receiver dispenser
174	...Cup-type dispenser
175	...Reciprocating discharge means and receiver guideway
176	..Conveyer with relatively movable receiver discharge means
177	.Nozzle, guide or conveyer adjustable to receiver size
178	.Successive groups or non-sequential filling of a receiver series
179	..From a single uniform line of receivers
180	.Continuously moving conveyer with receiver stop
181	.With head, manifold or supply lowering means
182	..Separate movable or removable sleeve or funnel supply terminal
183	.With interconnected contents discharge means
184	..With predetermined number of cycles
185	...Single group filled by rows
186	..Plural lines
187	..With contents gripping or penetrating discharge means
188	..With valve period adjustment
189	..By contact with conveyer projection
190	..Ratchet drive for conveyer
191	..Cam and gear drives
192	AUTOMATIC CONTROL OF FLOW CUTOFF OR DIVERSION
193	.Responsive to relative recession of supply means and receiver engaging means
194	..Ejection or release of filled receiver
195	..Discharge assistant control by filled receiver
196	.Control by test receiver or chamber or by filled preceding receiver
197	.In gas filled receivers
198	.Level or overflow responsive
199	..Funnel type closed by float
200	...Valve latched in open position
201	...Normally open with closed position holding means
202	...Plural series valves
203	...Valve stem accessible at top of funnel
204	....Single valve and float stem
205	...Pivoted valve
206	..Manually initiated valve with both manual and level cut-off controls
207	...With receiver positioned interlock
208	...With nozzle dislodgment valve trip means
209	...Manual control disabler or disconnect
210	...Separate controls for plural series liquid flow line valves
211	....Self-opening valve
212	.....Float initiates closing control

	AUTOMATIC CONTROL OF FLOW CUTOFF OR DIVERSION
	.Level or overflow responsive
	..Manually initiated valve with both manual and level cut-off controls
	...Separate controls for plural series liquid flow line valves
	....Self-opening valve
	.....Float initiates closing control
213	......Float arm operated valve
214	.....Pressure initiated closing control
215	......Liquid back pressure completes closing
216	....Float operated valve
217	...Diverse controls for single valve
218	....Valve latched open
219	.....Electromagnetic trip
220	.....Float controlled trip means
221	......With sensitivity or level adjustment
222	.......Adjustable receiver engaging or coacting means
223	......With spring means biasing valve to close
224	.......Reciprocating valve
225	.....Air displacement trip means
226	......By response to receiver pressure increase
227	..External initiator as second diverse control
228	...Series flow line valves
229	....Float control cut-off
230	WITH SIPHON FLOW CONTROL BY EQUALIZED LEVELS
231	PORTABLE SYSTEMS OR TRACK MOUNTED SUPPLY MEANS
232	.Track mounted
233	..Track on receiver supporting means
234	PLURAL FILLING MEANS
235	.Adjustable lateral spacing of heads or receivers
236	.Diverse flow manifold
237	.For plural receivers simultaneously filled
238	..Supply apportioned prior to delivery
239	...Tilting tray or trough means
240	...Grid or cellular insert type divider
241	...Inverted for discharge to receivers
242	..With discharge means
243	...With means for selective operation
244	...Manifold or divider
245	....Displacement type
246	..With receiver ejecting and/or accommodating means
247	.Aids to manual filling
248	.Alternating
249	WITH CHARGE FORMING MEANS CONTRACTING TRANSVERSELY TO FLOW PATH
250	WITH MEANS TO MOVE SUPPLY MEANS AND/OR RECEIVER TO, FROM OR DURING FLOW RELATION
251	.Relatively receding discharge assistant and receiver engaging means
252	..With external form for receiver
253	..With lift or power drive for receiver support
254	..Receiver support bias varied with position of support
255	..With feeder and additional flow modifier or retarder at foot of fill tube
256	..Continuous feeding during filling (e.g., rotary auger)
257	...Receding receiver support or engaging means
258	..Axially reciprocating discharge assistant
259	...Rotatable reciprocating discharge assistant
260	...Reciprocating filling tube type discharge assistant
261	...With synchronized intermittent supply (e.g., check valve)
262	...With receding receiver support
263	.Relatively receding filling tube and receiver engaging means
264	..With flow stop or severer at foot of fill tube
265	.With means to separate filled receiver and internal form
266	.With adjustable movable component
267	.Unitary receiver support and flow controller
268	..Rotary or oscillating
269	.With clamp for receiver interconnected with movable head or lift
270	.Both supply means and receiver support having movement
271	.Swinging support for receiver
272	..Tilting type support for separating receiver from filling head
273	..Inversion of receiver
274	...Receiver with gravity operated valve
275	.Receiver lift or lower for filling
276	..With interconnected external means to control discharge
277	..Fluid operated lift
278	..Yielding lift
279	.With movable support for hose connected head or supply
280	.Scraping or leveling by lateral relative movement of supply means and receiver
281	.With means for manipulating a filled receiver for separation from head or support
282	..From an external form
283	.With movement of receiver in horizontal plane
284	.Movably mounted supply
285	MULTIPLE PASSAGE FILLING MEANS FOR DIVERSE MATERIALS OR FLOWS
286	.With baffle, spreader, displacer, drip ring, filter or screen
287	.With gas expanded seal
288	.Adjustable outlet element controls level
289	.Vent laterally shiftable
290	.With flue or vent externally returning to supply
291	.With valve operated by receiver engaging means
292	..Valve operator interconnected with receiver inlet engaging means
293	...Plural valves operated
294	....With mechanical or lost motion connection
295	...Concentric open vent
296	..Biased coaxial valve stem and nozzle
297	.Funnel type
298	..Concentric vent forms valve stem
299	..Concentric external vent
300	..Vent extends along wall to top
301	.With valve
302	..Plural valved passages
303	...Float operated vent cut-off
304	...Swingable nozzle operated liquid supply valve
305	...Rigidly interconnected or intergral valves
306	...Gravity seated inversion opened valve
307	..With trap or chamber in vent passage
308	..Air vent to supply cut-off by liquid in receiver

	MULTIPLE PASSAGE FILLING MEANS FOR DIVERSE MATERIALS OR FLOWS
309	.With air inlet to liquid supply
310	.Passage formed by head and receiver spacing means
311 R	FILLING MEANS WITH RECEIVER OR RECEIVER COACTING MEANS
311 A	..Drip prevention
312	.Extensible or expansible inserted coupler or centering means for receiver
313	.Flexible or collapsible receiver
314	..With bag or liner securing means
315	...Valve bag clamp and/or chair
316	...With inserted or external form for bag
317	...With flow controlling means
318	.Filling by retracting receiver or cartridge
319	.Manually coupled and inverted
320	..With discharge assistant, trap or valve
321	...Receiver operated supply discharge means or controller
322	...Combined supply closure and trap
323	.Siphon type
324	.Continuous flow or overflow type supply
325	.Receiver with plural compartments or openings (e.g., vents)
326	..With means to cap or close an opening
327	...Receiver open at both ends
328	.Filling means or support provides handle for receiver
329	.With puncturing connecting means
330	..Mounted on receiver
331	.Funnel type
332	..With connector, guide or support for separable supply
333	..Supply or flow path not concentric with receiver inlet
334	...Laterally extending spout
335	..Valves open when funnel rests on receiver
336	..Valve closed by lifting on funnel handle
337	..Flexible, collapsible or folding
338	...Stored in or on receiver
339	..Anti-swirl, anti-splash, cover or shield
340	..With additional support
341	...With nonsystem support
342	....Nonuse
343	.....Supported on supply container
344	..With valve actuator or extended stem
345	...Relatively movable
346	.Interlocked discharge means, support and/or coupling
347	..With coupling means responsive to material flow
348	.Supply means carried receiver flow control opening means
349	..Coupling controls receiver inlet flow
350	...For inlet with externally engaged flap or closure member
351	.Receiver actuated discharge means
352	..Movable supply or head
353	..Receiver coupling telescopes flow path elements
354	...Mechanical or lost motion connection
355	...Connection external to tube or tube sections
356	...Control by contact at bottom of receiver
357	..Receiver applied to plunger-type follower
358	..Scoop or drawer type
359	..Receiver weight operated discharge means
360	..Actuator juxtaposed outlet
361	...Servo-system
362	...Relatively movable actuator
363	.Filling supply supported by receiver
364	..Dumping or draining type
365	..Material guide
366	...Supply container hand manipulated
367	.Adjustable contact area or plural interchangeable or selectively usable coupling means or flow paths
368	.Adjustable gauge collar, displacement member or seal
369	.With receiver support, guide means, or shield
370	..Guide or shield
371	...Reciprocating guard or guide
372	...Receiver neck or inlet rim engaging support
373	...For movement of receiver laterally of supply outlet
374	..Fill tube extending to or near bottom of receiver
375	..With support for removable supply container
376	..With adjustable support for supply
377	..Receiver swingably supported or supported by bail
378	..Plural interchangeable or selective or adjustable support for receiver
379	..Nonuse position or cover
380	...Receiver supported by supply container
381	....Closure type
382	.Flexible hose terminal with receiver engaging means
383	.With receiver and supply securing means
384	..Rotatable collar or sleeve
385	..Telescoping jaws
386	..Fixed flange on supply means for engagement of receiver
387	FILLING HEAD SHIFTABLY OR SEPARABLY CONNECTED TO SUPPLY
388	.Flexible or collapsible coupling section
389	..Hand-held head
390	INSERTED OR EXTERNAL FORM OR PROTECTOR
391	MATERIAL GUIDES OR SUPPLY WITH RECEIVER SUPPORTS (I.E., AIDS TO MANUAL FILLING)
392	MISCELLANEOUS (E.G., FILLING HEADS)

CLASS 149 EXPLOSIVE AND THERMIC COMPOSITIONS OR CHARGES

DECEMBER 1990

1	CONTAINING LIQUEFIED GASEOUS FUEL OR LIQUEFIED OXYGEN SUPPLYING MATERIAL
2	STRUCTURE OR ARRANGEMENT OF COMPONENT OR PRODUCT
3	.Coated component
4	..Component base contains both organic and inorganic explosive or thermic constituents
5	..Component base contains an inorganic explosive or inorganic thermic constituent
6	...Coating contains organic compound
7	....Component base contains an inorganic explosive or inorganic thermic salt
8	.....Coating contains organic explosive or thermic component
9	..Component base contains organic explosive or organic thermic constituent
10	...Component base contains nitrocellulose and nitroglycerine
11	...Coating contains organic compound
12	....Coating contains organic explosive or organic thermic component
13	.....Coating contains nitrated toluene
14	.Contiguous layers or zones
15	..Layer or zone contains an inorganic explosive or inorganic thermic component
16	...Layer or zone contains at least one inorganic component from the group of azide, fulminate, phosphorus and phosphide
17	.Solid particles dispersed in solid solution or matrix
18	..Continuous phase contains organic material
19.1	...Organic material contains polysaccharide resin or synthetic resin
19.2	....Including organometallic or organo (silicon/boron) compound
19.3	....Resin contains fluorine, bromine or iodine
19.4	....Polyurethane
19.5	....Polyester
19.6	....Resin contains oxirane groups or interunit ether linkages
19.7	.....Polysaccharide or derivative thereof
19.8	......Nitrocellulose
19.9	....Polymerized conjugated diene
19.91	....Polymerized ethylenically unsaturated compound
19.92	....Process
19.93	.....Prior treatment of dispersed phase
20	...Dispersed solid contains inorganic explosive or inorganic thermic component
21	.Particles of diverse size or shape
22	CONTAINING FREE BORON OR BINARY COMPOUNDS OF BORON (EXCEPT WITH OXYGEN) OR BORANES
23	CONTAINING NITRATED METALLO-ORGANIC COMPOUND
24	.Nitrated organic compound of lead
25	..With additional nitrated metallo-organic compound
26	..With metal azide or metal fulminate compound
27	..With organic explosive or organic thermic component
28	...With inorganic explosive or inorganic thermic component
29	CONTAINING FREE PHOSPHORUS OR BINARY COMPOUND OF PHOSPHORUS (EXCEPT WITH OXYGEN)
30	.With free metal, or alloy or metalloid
31	.With inorganic oxygen-halogen salt
32	..Binary compound of phosphorus (except with oxygen)
33	CONTAINING INORGANIC METAL FULMINATE
34	.With nitrated organic compound or inorganic oxygen-halogen salt
35	CONTAINING INORGANIC METAL AZIDE
36	CONTAINING HYDRAZINE OR HYDRAZINE DERIVATIVE
37	METAL OR ALLOY OR METALLOID, EACH IN PARTICULATE FORM, WITH AT LEAST ONE METAL OXIDE, INORGANIC OXYGEN CONTAINING SALT OR ORGANIC METAL-OXYGEN SALT
38	.With nitrated organic compound
39	..Nitrated aromatic compound
40	.Plural oxygen yielding compounds
41	..Inorganic nitrogen-oxygen salt
42	.Inorganic oxygen-halogen salt
43	.Inorganic nitrogen-oxygen salt
44	.With an organic nonexplosive or organic nonthermic component
45	CONTAINING INORGANIC NITROGEN-OXYGEN SALT
46	.Ammonium nitrate
47	..With nitrated organic compound
48	...Nitrocellulose, under 10 percent
49	...Nitrocellulose, 10 percent or over
50	....With other nitrated organic compound
51	...Nitroglycerine
52	....With other explosive or thermic compound
53	.....Nitrated organic compound
54	....With vegetable matter component
55	...Nitrated aromatic compound
56	....With other explosive or thermic component
57	....With an organic nonexplosive or organic nonthermic component
58	...Nitrated starch or nitrated sugar
59	....With other explosive or thermic component
60	..With vegetable matter or resin or rubber
61	.Alkali metal or alkaline earth metal nitrate salt
62	..With nitrated organic compound
63	...Nitrocellulose
64	....With other explosive or thermic component
65	.....Nitroglycerine
66	...Nitroglycerine
67	...Nitrated aromatic compound
68	....Nitrated phenol
69	....Nitrated toluene
70	..With metal oxygen-halogen salt
71	...With carbon or sulfur
72	..With carbon and sulfur
73	...With an organic nonexplosive or organic nonthermic component
74	CONTAINING NITROGEN OXIDE OR ACID THEREOF
75	CONTAINING INORGANIC OXYGEN-HALOGEN SALT
76	.Ammonium perchlorate
77	.Alkali metal oxygen-halogen salt
78	..With nitrated organic compound
79	...Nitrocellulose
80	...Nitrated toluene or nitrated phenol
81	..With iodine or iodide
82	..With carbon or sulfur
83	..With an organic nonexplosive or organic nonthermic component
84	...Organic dye or coloring agent
85	...With an inorganic nonexplosive or inorganic nonthermic component
86	....Cyanide compound or oxide of iron, chromium or manganese

87 CONTAINING FREE METAL OR METAL HYDRIDE WITH HYDROCARBON OR HALOGENATED HYDROCARBON
88 CONTAINING NITRATED ORGANIC COMPOUND
89 .Nitroparaffin
90 ..Plural nitroparaffins
91 ..With additional nitrated organic compound
92 .Nitrated acyclic, alicyclic or heterocyclic amine
93 .Nitrated pentaerythritol
94 .Nitrocellulose, under 10 percent
95 ..With nitroglycerine
96 .Nitrocellulose, 10 percent or over
97 ..With nitroglycerine
98 ...With organic nonexplosive or organic nonthermic component
99 ..With nitrated aromatic compound
100 ..With nonexplosive or nonthermic component
101 .Nitroglycerine
102 ..With additional nitrated organic compound
103 ...Nitrated aromatic compound
104 ...Nitrated glycol compound
105 .Nitrated aromatic compound
106 ..Plural nitrated aromatic compounds
107 ...One a nitrotoluene
108 .Nitrated starch or nitrated sugar
108.2 CONTAINING FREE METAL OR FREE CARBON
108.4 FUME OR WASTE AFFECTING
108.6 IGNITING COMPOSITIONS
108.8 STABILITY OR VISCOSITY AFFECTING
109.2 CONTAINING PARTICULAR FUEL AND PARTICULAR OXIDIZER
109.4 MISCELLANEOUS COMPOSITIONS
109.6 PROCESSES OF MAKING

****

123 TAGGED COMPOSITIONS FOR IDENTIFYING PURPOSES
124 METHODS FOR RECLAIMING OR DISPOSING OF ONE OR MORE MATERIALS IN A COMPOSITION

CLASS 150 PURSES, WALLETS, AND PROTECTIVE COVERS

DECEMBER 1990

100	PURSE OR HANDBAG TYPE
101	.With means to deter theft of contents (e.g., puzzling closure or secret compartment)
102	.Theft or loss resistant
103	.Changeable decorative appearance (e.g., color, etc.)
104	..Removable element
105	...Cover
106	.Combined
107	.With handle or carrying strap
108	..Adjustable
109	..Handle includes secondary receptacle
110	..Single
111	.Plural
112	.Compartmented
113	..Removable (detachable) compartment or compartment-forming member
114	..Secondary compartment integral with purse-overlapping closure flap
115	..Compartment mouth-frames hinged along common axis
116	..Including means permitting limited movement of an interior compartment between storage and loading positions
117	..Independently closable compartments
118	.With closure
119	..Lid type
120	..Hinged mouth-frame elements
121	...Four or more hinged elements
122	....Six or more hinged elements
123	...Including means for releasably securing closed frame elements together
124	...Including separate element for securing purse or handbag material to frame
125	....Insert for channeled frame element
126	...Channeled frame element
127	.Wall detail
128	..Specified seam structure
129	..Multilayer or ply
130	..Reinforced
131	POCKET OR PURSE-CARRIED CONTAINER (E.G., WALLET, BILLFOLD, CARD OR COIN CONTAINER, ETC.)
132	.Paper money container (e.g., wallet, billfold)
133	..With means to deter theft of contents (e.g., secret compartment)
134	..Theft or loss resistant
135	..With means for holding a pad of checks
136	..Combined with coin receiver
137	..Including resilient or biased clip for retaining bills
138	..Including separable content-holding structure
139	..Including content-holding section movable relative to paper money compartment
140	..Including means for separating two or more paper money bills from one another
141	..Including means permitting removal of paper money while folded
142	..Including relatively slidable container wall sections to accommodate thicker contents or prevent buckling while folded
143	..With closure
144	..Including expandable pocket
145	..With transparent portion or window
146	..Joint or seam structure
147	.Card container (e.g., for credit or fare card, identification or driver's license, etc.)
148	..Removable compartment
149	..With closure
150	.Coin container (i.e., for holding coins in bulk)
151	..Having means permitting insertion of coin into closed container
152	..Flap-type closure
153	...Flap forms support for display and selection of coins
154	PROTECTIVE COVER MADE OF FLACCID MATERIAL
155	.For a door knob or handle
156	.For a faucet

342.1	....With simultaneous inflating means
343.1	..Sectional casings
344.1	...Circumferential
345.1	....Rigid inner sections
500	..With means restricting relative movemet between tire and inner tube (e.g., anti-creep feature)
501	..With means to protect inner tube from rim
502	..Automatic sealing of punctures (e.g., self-healing)
503	...Using flowable coating or composition
504	....On inner surface of tubeless tire
505	.....Sealant in plural layers or plural pockets
506	....Within or part of construction of inflating inner tube
507	.....Sealant in plural layers or plural pockets
508	...By compression
509	...With reinflating means
510	..Tire characterized by its air impervious liner or inner tube
511	...Inner tube
512	....With reinforcement element
513	..With means to protect tire from rim
514	..Means other than rim closing the tire opening
515	...Positive casing closure
516	..With means enabling restricted operation in damaged or deflated condition
517	...With sidewall insert to facilitate load support in emergency
518	...Utilizing additional inflatable supports which become load bearing in emergency
519	....Inflated or expanded in emergency only
520	...Utilizing additional noninflatable supports which become load supporting in emergency
521	...Internal lubricating or cooling
522	...Means facilitating folding between sidewall portions (e.g., run flat sidewalls)
523	..Arrangement of grooves or ribs in sidewall
524	..Having annular inlay or cover on sidewalls (e.g., white sidewalls)
525	..Characterized by chemical composition or physical properties of external sidewall materials
526	..Characterized by belt or breaker structure
527	...Physical structure of reinforcing cords
528	...Folded ply structure
529	....Utilizing two or more cord materials
530	...Consisting of only one ply
531	...Utilizing at least one ply the cords of which run circumferentially (zero-degree belt)
532	...With cushioning or other special rubber ply layer
533	...Reinforcing plies made up from wound narrow ribbons
534	...Structure where each bias angle reinforcing cord ply has no opposingly angled ply
535	...Structure made up of two or more sets of plies wherein the reinforcing cords in one set lie in a different angular position relative to those in other sets
536	...Structure using multiple reinforcing elements made of differing materials
537	...Breaker or belt characterized by the chemical composition or physical properties of elastomer or the like
538	...Breaker or belt characterized by its dimensions or curvature relative to the carcass or any other part of the tire
539	..Characterized by the structure of the bead portion of the tire
540	...Structure of inextensible reinforcing member
541	...Apex or filler strip
542	...Flipper strips
543	...Chafer or sealing strips
544	...Bead contour for engagement with mounting rims (e.g., lips, ribs or grooves)
545	...Multiple bead cores at each terminal edge or tire supporting surface
546	...Bead characterized by the radial extent of apex, flipper or chafer into tire sidewall
547	...Bead characterized by the chemical composition and or physical properties of elastomers or the like
548	..Characterized by the carcass, carcass material, or physical arrangment of the carcass materials
549	...Cushion means inward of outermost carcass ply
550	...Carcass ply extends from at least one bead region without being folded about bead rings
551	...Carcass ply only folded about one bead ring
552	...Carcass ply turnup structure around bead rings
553	....Folded from outside to inside of bead core
554	....Characterized by the extent of the fold up into the sidewall of the tire relative to the other tire dimensions
555	...Sidewall stiffening or reinforcing means other than main carcass plies or foldups thereof about beads
556	...Physical structure of reinforcing cords

	TIRES, RESILIENT
	.Pneumatic tire or inner tube
	..Characterized by the carcass, carcass material, or physical arrangment of the carcass materials
557	...With two or more differing cord materials
558	...Carcass characterized by the reinforcing cords of each carcass ply being arranged substantially parallel
559	....Reinforcing cords run in opposite directions in successive carcass ply, i.e., bias plies
560	....Reinforcing cords of at least one carcass ply extend transversely across the tire from bead to bead, (i.e., radial ply)
561	.....Combined with a bias angled ply
562	...Cords curve from bead to bead in plural planes, (e.g., s-shaped cord paths)
563	...Reinforcing cord of a carcass ply arranged in a crossing relationship within the ply, (e.g., woven, braided or knitted plies)
564	...Carcass characterized by the chemical composition or physical properties of the elastomers or the like
565	..Adhesion promoter: rubber to rubber or reinforcement to rubber
367	.Patches
368	..Mechanically secured
369	...Inside and outside, bolt connected
370	..With plugs
371	..Bandages
372	...Mechanically secured
373	....To felly or rim
375	.Wheel securing means
376	..Plural tire
377	..Retracting wheel section
378 R	..Integral rims
378 W	....Rim welded to disc
379.3	...Interlocking tire and rim
379.4	....With elongate bead guard
379.5	....Bead and rim interlock
380	....Tire embraced rim
381.3	....Deep channel rim
381.4	.....With elongate circumferential bead guard
381.5	.....With channel cover
381.6	.....With channel filler
382	....Clincher rim
383	.....Pneumatic tire
384	...With anit-creep lugs
385	..Axial
386	..Radial
387	...With circumferential tire incorporated clamps
388	..With annular tire incorporated clamps
389	...With mechanically joined ends
390	....Adjustable
391	.....Pneumatic tire
392	...Adjustable
393	..Reinforced tire base structure
394	...Metallic external base ring
395	...With annular exterior clamps
396	..Separable rim parts
397	...Exterior clamps
398	....Lateral acting
399	...Interior clamps
400	....Spreaders
401	.....Combined sectional channel
402	...Sectional channel
403	....Duplicate sections
404	.....Pneumatic tire
405	....Pneumatic tire
406	.....Split side flange
407	......End connected
408	......With rim engaging end lugs
409	.....Locking rim secured
410	......Split locking ring
411	.....Overlapping section
412	......Bayonet or threaded joint
413	.....Bayonet or threaded joints
414	.....Hinged section
415	.Inflating devices
416	..Vehicle body carried supply
417	...Rotary joints
418	..Wheel carried supply
419	...With positive pump operating means
420	....Gearing
421	....Cam
422	.....Eccentric bearing
423	....Obstacle
424	.....Ground
425	......Casing interposed
426	.......Casing enclosed pump
427	..Combined wheel and valve stem
428	...With dust cap
429	..Combined tire and valve stem
430	...Reinforcements or patches
431	..Combined valve stem cap and tool

1	METHODS
600	.Single crystal formation
601	..Including measuring, testing or sensing
602	..Including passage of noninduced current or plasma through solid-liquid interface
603	..Formation in solid state
604	..Zone melting with a melting point depressant, e.g., solvent zone melting, etc.
605	..With addition or removal of a dopant
606	...Dopant enters vapor state
607	..Including floating a solid or liquid in a liquid layer
608	..Including shaping or passage of melt through an aperture
609	..Deposited material passes through a vapor, liquid and solid sequence
610	..Deposited vapor forms a single crystal
611	...Vapor flow is: through a restriction, through a movable or divergent outlet(s) or intermittent
612	...Including prior treatment or positioning of substrate
613	...Deposition results from decomposition
614	...Deposited material formed in vapor state
615	..Fusion of falling powder, e.g., verneuil process, etc.
616.1	..Using a unidirectional moving solid-liquid interface through a melt, e.g., freeze gradient, bridgement, etc.
616.2	...Si or Group III and V compound
616.3	...With use of seed or seed material, e.g., Kyropoulos type, etc.
616.4	...With specified direction of solidification or imposition of a temperature gradient, e.g., Bridgeman or Stockbarger types, etc.
616.41	....Solidification from the bottom up
617.1	..Speed pulling, e.g., Czochralski, etc.
618.1	...Including relative eccentric movement between seed and melt support
619.1	...Including cooling or temperature gradient within melt
620.1	...Ribbon, sheet or of irregular or nonuniform shape
620.2	...Compound of Group III and V or Group I and IV or Group II and VI, e.g., mixed, binary, tertiary or quaternary materials, etc.
620.3	...Si, Ge, Sn, or Pb
620.4	....Silicon, per se
620.5	...B, Al, Ga, In or Tl
620.7	..Zone melting
620.71	...Ribbon, sheet, or of irregular or nonuniform shape
620.72	...High energy radiation or plasma
620.73	...Crucibleless zone melting
620.74	....Including opposite axial or relative eccentric movement between solid parts of the crystalline material
620.75	....Including cooling or temperature gradient within melt
620.76	...Horizontal crucible
621	..From liquid solution
622	...Moving substrate (seed) during formation
623 R	...Maintaining an aqueous liquid above normal boiling point, e.g., hydrothermal, etc.
623 Q	.....Quartz
624	...Molten solution
625	.Etching
626	..Measuring, testing or inspecting
627	...By electrical means or of electrical property
628	..Altering the etchability of a substrate by alloying, diffusion or chemical reacting
629	..With uniting of preforms, e.g., laminating, etc.
630	...Prior to etching
631	....Delamination subsequent to etching
632	....With coating
633	...Differential etching
634	....Metal layer etched
635	..With in situ activation or combining of etching components on surface
636	..With thin film of etchant between relatively moving substrate and conforming surface, e.g., chemical lapping, etc.
637	..With relative movement between the substrate and a confined pool of etchant
638	...With removal of adhered reaction product from substrate
639	...With substrate rotation, repeated dipping or advanced movement
640	..Projection of etchant against a moving substrate or controlling the angle or pattern of projected etchant
641	...Curved surface etched
642	..Recycling or regenerating etchant
643	..With treatment by high energy radiation or plasma, e.g., ion beam, etc.
644	..Forming or increasing the size of an aperture
645	..With mechanical deformation, severing or abrading of a substrate
646	..Etchant is a gas
647	..Etching according to crystalline planes
648	..Etching isolates or modifies a junction in a barrier layer
649	...Discrete junction isolated, e.g., mesa formation, etc.
650	..Sequential application of etchant material
651	...Sequentially etching the same surface of a substrate
652	....Each etching exposes surface of an adjacent layer
653	.....Etched layer contains silicon, e.g., oxide, nitride, etc.
654	..Differential etching of a substrate
655	...Composite substrate
656	....Substrate contains metallic element or compound
657	....Substrate contains silicon or silicon compound
658	...Design or pattern formed by manual drawing or engraving
659.1	...Resist coating
660	....Pattern applied by transfer
661.1	....Plural resist coatings
662	..Silicon, germanium, or gallium containing substrate
663	...Glass substrate
664	..Metal substrate
665	...Aluminum
666	...Copper
667	..Metal oxide substrate
668	..Organic substrate
39	.Plaster board making
40	..With bending or folding of facing sheet
41	..With water-proofing with added material

	METHODS
	.Plaster board making
42	..With embedding of reinforcing material during or subsequent to core formation
43	..Pore forming in situ
44	..With preliminary treatment of facing sheet
45	..With subsequent treatment of plaster board
46	...Perforating
47	.Making electrical conductors of indefinite length
48	..With filling of void or cavity with fluent material
49	..Splicing
50	..With mechanical working of conductor
51	..Covering of conductor
52	...With preformed material
53	....Wrapping of sheet material (e.g., tape) about conductor and/or conductor assembly
54	.....By longitudinally bending sheet
55	.....Plural spaced conductors
56	.....Plural covering operations
57	.Maintaining the natural appearance of plants or animal parts
58	.Contour or profile photography to reproduce three-dimensional objects
59	.Relief or intaglio representations of three-dimensional objects (e.g., relief modeling of photographs)
60	.Surface bonding and/or assembly therefor
61	..Simulated products of nature
62	..With manual drawing or engraving
62.2	..With formation of lamina by bulk deposition of discrete particles to form self-supporting article
62.4	...Liberation or formation of fibers
62.6	...By joining portions of batt to itself
62.8	...To similarly formed batt
63	..Manually arranging different colored or shaped discrete elements to form design
64	..With measuring, testing or inspecting
65	..Of multiple spaced elements between and transverse of parallel webs (e.g., Venetian blind ladders)
66	..Adhesive application of fasteners to articles (e.g., slide fastener to garment)
67	..Utilizing phosphorescent or fluorescent material
68	..With fur removal from animal pelt
69	..Application of end closures to containers
70	..Encasing movable or loosely confined element between adhering lamina (e.g., drawstrings)
71	..Of lamina to building or installed structure
72	..Setting or embedding tufts or discrete pile elements onto backing (e.g., rugs, brushes, etc.)
73.1	..With sonic or ultrasonic treatment
73.2	...Rod, strand or filament
73.3	...With sonic or ultrasonic cutting
73.4	...Sheet or web splicing
73.5	..Friction treatment (e.g., welding)
73.6	..Vibratory treatment
74	..With application of centrifugal force
75	..With balancing of product
76	..With parchmentizing or transparentizing
77	..With pore forming in situ to form cellular lamina
78	...Foaming
79	....Subsequent to assembly of laminae
80	..With refrigeration or freezing
81	..With melting or gasification of permanently associated solid material in situ in airtight cavity
82	..With flame contact of lamina
83	..With swelling of material of lamina
84	..With shrinking of material of lamina
85	...Subsequent to assembly of laminae
86	....Of lamina covering cylindrical or spherical body
87	..Providing escapeways for gases trapped or generated between layers
88	..Fray-prevention by bonding
89	..With vitrification or firing of ceramic matieral
90	..Utilizing layer to prevent migration or bleeding between laminae
91	..With separate permanent mechanical joining means (riveted, sewed, stapled, etc.)
92	...With penetrating of fastener
93	....Sewing
94	..Reclaiming, renewing or repairing articles for reuse
95	...Toroidal shapes (e.g., tire or tube)
96	....Adhesively secured tire retreads
97	....Puncture repairing
98	...With removal of defective area to be repaired
99	..Optically transparent glass sandwich making (e.g., window or filter)
100	...Variegated colored lamina or interlayer
101	...With cutting or breaking or partial removal of interlayer and/or lamina
102	...With deformation or shaping of interlayer and/or lamina
103	...With application of plural sequential pressures
104	...With air evacuation between laminae
105	...Directly applied fluid pressure
106	...With preformed intermediate adhesive layer
107	...Sandwich edge sealing
108	..Mounting transparent lamina over window opening (e.g., slide-mounting)
109	..Multipane glazing unit making (e.g., air-spaced panes)
110.1	..Making flexible or resilient toroidal shape, e.g., tire, inner tube, etc.
111	...Moving work progressively to separate assembly stations
112	...Solid tire type (i.e., nonpneumatic)
113	....Having cushioning void or cavity
114	...Incorporation of solid nonrubber material at exposed tread surface of tire (e.g., anti-skid)
115	...Applying flowable puncture sealing material
116	...Applying differently colored material at sidewall (e.g., white wall)
117	...Building tires directly from strands or cords
118	...Tubular (airtight) torus (e.g., auto tube-making)
119	....Multichamber safety tube
120	....Valve-applying
121	....Applying reinforcing material to external tube surface
122	....Joining tube ends to form torus
123	...Of plural layers
124	....At least one layer including metal cords
125	....With injection molding of outer lamina

METHODS
.Surface bonding and/or assembly therefor
..Making flexible or resilient toroidal shape, e.g., tire, inner tube, etc.
...Of plural layers
126 ....Axially assembling preformed flexible endless bands
127 .....With tread-preforming
128.1 ....Applying tread material to fully-formed carcass
128.6 .....With specified treatment of tread material before application to carcass
129 ......Shaping
130 .....By winding or including application of inextensible lamina under tread bond
130.3 .....With specified procedure for interlocking of laminae or removal of air from therebetween, e.g., "stitching", etc.
130.5 .....With specified procedure for cooling or heating, e.g., for vulcanization, etc.
130.7 .....With specified procedure for bead, carcass or sidewall formation
131 ....Bead-applying
132 .....Folding fabric about bead
133 ....Applying fabric to form (e.g., carcass building)
134 .....Fabric splice end treatment
135 ...Bead portion of carcass treatment
136 ..Tire bead ring making
137 ..Flexible endless drive belt making
138 ...Forming grooves on inner surface
139 ..."V" or trapezoid section belt
140 ....With plastic shaping or molding
141 .....Wrapping of belt prior to shaping
142 ....With cutting to "V" or trapezoid section
143 ..Helical wire or plural ring reinforced flexible tube making
144 ...Assembling preformed helical coil or rings with separate tube
145 ..With encapsulating of permanently fluent material in hollow or porous lamina or filling of space between adhered laminae
146 ...Prior to bonding of laminae (e.g., golf balls)
147 ....With inflation of airtight cavity
148 ..With weaving, knitting, braiding, twisting or needling
149 ...About tubular lamina
150 ..With electro-deposition
151 ...On adherent surface of lamina prior to assembly
152 ..With temporary disassembling and subsequent bonding of same laminae
153 ..With abrading or grinding of lamina
154 ...Subsequent to assembly
155 ..With destruction of solid transitory material, e.g., dissolving, melting, etc.
156 ..With fluid pressure to prevent collapse of hollow structure during assembly and/or joining
157 ..Joining indefinite length laminae end-to-end
158 ...Of wire, rod, tube or filament
159 ...With cutting of joining ends
160 ..Bonding in stressed condition of at least one prestressed element
161 ...Of stressed filaments
162 ...During winding of lamina
163 ...Bonding of sheets or webs only
164 ....Running length web
165 ...Stressing spherical or tubular body
166 ..Bonding of flexible filamentary material while in indefinite length or running length
167 ...With formation of filaments
168 ...With removal of filamentary material subsequent to lamination thereof
169 ...With winding of filamentary material
170 ....About spherical lamina
171 ....With winding of separate sheet or web
172 ....Winding about and uniting to core
173 ....Winding about subsequently removed core or mandrel
174 .....With cutting of filamentary material to form web or sheet
175 .....Of filamentary material only
176 ...To web of indefinite length
177 ....With axis of filamentary material nonparallel to axis of web
178 ....Plural filaments
179 .....Between plural webs
180 ...Of filamentary material only to form article
181 ....Article is sheet or web
182 ..Of at least two bonded subassemblies
183 ..With creping, wrinkling, crinkling
184 ..With winding of web or sheet
185 ...Uniting to separate core
186 ....Spherical core
187 ....Tubular core
188 .....Sequential winding of separate webs
189 ...About irregular or configured mandrel surface
190 ...Sequential winding of separate webs
191 ...With additional assembly (other than winding)
192 ....Prior to winding
193 ...With cutting of wound body (excludes nominal cutoff)
194 ...With reshaping of wound body
195 ...Longitudinally progressive helical winding
196 ..With permanent bending or reshaping or surface deformation of self-sustaining lamina
197 ...By separating laminae between spaced secured areas (e.g., honeycomb expanding)
198 ...By inward collapsing of portion of hollow body
199 ...Running or continuous length work
200 ....Longitudinal bending
201 .....Prior to or during assembly with additional lamina
202 .....Overedge bending or overedge folding
203 .....And edge-joining of one piece blank to form tube
204 ....Folding
205 ....Transverse corrugating
206 .....Subsequent to assembly of laminae
207 .....With deformation or cutting of corrugated lamina
208 .....Treating material of corrugated lamina or dry adhesive thereon to render tacky
209 ....Surface deformation only (e.g., embossing)
210 ...To form undulated to corrugated sheet and securing to base with parts of shaped areas out of contact
211 ...With slitting or removal of material at reshaping area prior to reshaping

METHODS
.Surface bonding and/or assembly therefor
..With permanent bending or reshaping or surface deformation of self-sustaining lamina
212 ...By bending, drawing or stretch forming sheet to assume shape of configured lamina while in contact therewith
213 ....Encasing or enveloping the configured lamina
214 ....With preshaping of lamina
215 ....Flexible sheet to cylinder lamina
216 ...Overedge bending of lamina about edges of sheetlike base
217 ...Bending of one piece blank and joining edges to form article
218 ....Hollow cylinder article
219 ...Surface deformation only of sandwich or lamina (e.g., embossed panels)
220 ....Subsequent to lamination
221 ...Subsequent to assembly
222 ....Of parallel stacked sheets only
223 .....Bending of one lamina only
224 .....To form dished or receptacle-like product
226 ....Folding only
227 ...By folding
228 ..Of preshaped laminae between closed similarly shaped press platens or clamps
229 ..With stretching
230 ..Direct contact transfer of adhered lamina from carrier to base
231 ...With formation of lamina of continuous length by molding or casting on endless carrier
232 ...Carrier is configured mold
233 ...Metal foil lamina
234 ...Of portion only of lamina from carrier
235 ...Plural transferring operations and/or with additional laminating
236 ...Solvent other than water to release lamina
237 ...Coating of transferred lamina
238 ...Running or continuous flexible web carrier
239 ...Plural superimposed laminae transferred
240 ....Transfer of printing or design
241 ...To base coated with adhesive
242 ..With lamina formation by molding or casting
243 ...Forming plural continuous web laminae
244.11 ...By extrusion
244.12 ....Encapsulating or enclosing a lamina
244.13 ....Hollow article or lamina
244.14 .....Differential fluid pressure used
244.15 .....Specific nonuniform lamina or article, e.g., netting or rib and groove, etc.
244.16 ....With printing
244.17 ....Electrical, magnetic, or wave energy used
244.18 ....With cutting, severing, or perforating
244.19 .....After bonding, e.g., as finishing step, etc.
244.21 ....Differential fluid pressure used
244.22 ....Bonding spaced preforms
244.23 ....Pretreatment
244.24 ....Post-treatment
244.25 ....Article or at least one lamina of nonuniform thickness or discontinuous
244.26 ....Bonding in specified environment
244.27 ....Pressure assisted bonding
245 ...In configured mold
246 ...On temporary planar support (e.g., film casting)
247 ..With stripping of adhered lamina
248 ...With cutting of one lamina only while adhered
249 ...And assembly with different lamina
250 ..With cutting, punching, tearing or severing
251 ...And simultaneously bonding (e.g., cut-seaming)
252 ...Perforating lamina
253 ....Subsequent to assembly of laminae
254 ...Splitting sheet lamina in plane intermediate of faces
255 ...Spiral peeling
256 ...Prior to assembly
257 ....Partial cutting (e.g., grooving or incising)
258 ....Cutting to shape joining edge surfaces only
259 ....Continuous longitudinal slitting
260 .....Bonding face to face of laminae cut from single sheet
261 ....Punching and bonding pressure application by punch
262 .....Closure cap liner applying type
263 ....Separate cutting of separate sheets or webs
264 ....Of plural laminae from single stock and assembling to each other or to additional lamina
265 .....Applying plural cut laminae to single face of additional lamina
266 .....Joining of cut laminae end-to-end
267 ...Flash, trim or excess removal
268 ...Partial cutting bonded sandwich (e.g., grooving or incising)
269 ...Of continuous or running length bonded web
270 ....One web only
271 ....Continuous longitudinal slitting
272.2 ..With direct application of electrical, magnetic, or radiant energy to work
272.4 ...Involving magnetically susceptible lamina or incorporating into the work a particulate susceptor material having magnetic properties
272.6 ...Exposure of work to corona or glow discharge
272.8 ...Exposure of work to laser
273.1 ...Developing electrostatic charge
273.3 ...Before final assembly, e.g., to cure lamina, etc.
273.5 ....Before and after final assembly
273.7 ...Applying pressure before electrical, magnetic, or radiant energy
273.9 ...Work constitutes conductor of electrical circuit
274.2 ....Conductor is a coil
274.4 ...Exposure of work to electrode
274.6 ....Continuously moving work in relation to electrode
274.8 ....With application of adhesive
275.1 ...Only part of contacting lamina surfaces bonded, e.g., seaming, etc.
275.3 ....With application of adhesive
275.5 ...To polymerize or cure material in work
275.7 ...With application of adhesive
276 ..With mass application of nonadhesive fibers or particles between laminae
277 ..With printing
278 ..With coating of nonadherent face of lamina
279 ...Coating with fibers or particles

	METHODS
	.Surface bonding and/or assembly therefor
	..With coating of nonadherent face of lamina
280	...Subsequent to bonding
281	..Combined, e.g., with cleaning, etc.
282	..Simultaneous heating and cooling
283	..Adhesive applied as dry particles
284	...Treating particle with liquid to render tacky
285	..Direct application of vacuum or fluid pressure during bonding
286	...To remove gas from between assembled laminae
287	...To the lining of hollow body
288	..Simultaneous pressure application to at least two separate sandwiches
289	..Utilizing parting or release material to prevent adhesion
290	..Bonding of facing continuously contacting laminae at spaced points only
291	...By nonuniform adhesive application
292	..Of laminae having opposed facing areas out of contact
293	..Inserting of lamina in hole, aperture or recess of other lamina and adherence to side walls thereof
294	...Core within tube
295	..Adhesive applying to restricted area and spreading thereof by assembly pressure
296	..Strands, rods, tubes or sticklike bodies to each other only
297	..Of discrete laminae to single face of additional lamina
298	...Embedding of laminae within face of additional laminae
299	...All laminae planar and face to face
300	....With covering of discrete laminae with additional lamina
301	.....Opposed laminae are running length webs
302	....Lamina is running length web
303	.....Feeding of discrete laminae from separate sources
303.1	..Inserting lamina into preformed plastic body
304.1	..Butt edge joining of laminae
304.2	...Joining of nonplanar elements, e.g., configured hollow objects, etc.
304.3	...With joiner member or reinforcement
304.4	....Carpet or fabric joined
304.5	...With preliminary edge treatment or joining of edges of irregular shape, e.g., tongue and groove, beveled, etc.
304.6	...By heat
304.7	...Of carpet or fabric
305	..By applying after assembly an adhesive, solvent or chemical activating agent
306.3	..By pressure or drying only, without tack, e.g., for easy delamination, etc.
306.6	..Using single, preformed, diverse bonding lamina between other laminae
306.9	...Including curing of nonfully polymerized material
307.1	..By curing of nonfully polymerized self-sustaining lamina
307.3	...With coating or impregnating a face to be adhered
307.4	....Indefinite plurality of similar impregnated thin sheets, e.g., "decorative laminate" type, etc.
307.5	....Coating solidified, e.g., by drying, etc., before assembly
307.7	...Including uncurable lamina, e.g., metal, paper, etc.
308.2	..By tackifying substance of self-sustaining lamina to be bonded, e.g., autogenous bonding, etc.
308.4	...Only part of contacting laminae surfaces bonded, e.g., seam, seal, etc.
308.6	...With treating agent application to a surface
308.8	....Plural agents applied sequentially or to different laminae or using water as sole agent
309.3	....Diverse laminae
309.6	...Involving defined plastic flow or melting of entire lamina
309.9	...With heating of lamina prior to assembly
310	..Of laminae having a different coating on at least two mating surfaces
311	..Sequential heating and cooling during pressure applying
312	..Sequential different pressure applying
313	..Interposing intermediate laminate between non-coated laminae
314	..Sequentially applying different liquids or liquefiable materials to adhering face of lamina
315	...At least two liquids rubber and/or resin-containing
316	...First applied liquid acid-containing
317	...Protein-containing liquid
318	...Carbohydrate-containing liquid
319	...One liquid containing inorganic material only
320	..Heating of dry adhesive on lamina prior to assembly contact
321	..Heating adhesive by contacting with heated lamina
322	..Heating lamina prior to assembly or adhesive applying
323	..Interposing subsequently removed flexible element between lamina and a pressure applying surface
324	..Running or continuous webs of indefinite length
324.4	..By tackifying a single lamina of intermediate laminate
325	..Particular adhesive
326	...Organic containing
327	....Synthetic resin containing
328	.....With carbohydrate and/or protein or derivatives thereof
329	.....Silicon resin
330	.....Epoxy resin
330.9	.....Nitrogenous resin
331.1	......With polymerization completion, i.e., curing, after assembly
331.2	.......N only in unlinked side-chain or side-ring
331.3	.......Derived from aldehyde or ketone
331.4	.......Iso- or thio-cyanate moiety reacted in curing
331.5	.......N in a ring
331.6	......N only in unlinked side-chain or side-ring, e.g., polyvinyl, pyridine, etc.
331.7	......Derived from iso- or thio-cyanate, e.g., polyurethane, etc.
331.8	......Derived from acyclic compound containing N
331.9	.......And aldehyde, ketone or carbocyclic moiety-containing compound
332	.....Polycarboxylic acid ester resin
333	.....Halogenated hydrocarbon resin

	METHODS
	.Surface bonding and/or assembly therefor
	..Particular adhesive
	...Organic containing
	....Synthetic resin containing
334	.....Hydrocarbon resin
335	.....Phenolic-aldehyde resin
336	....Protein and/or carbohydrate containing and/or derivatives thereof
337	....Bituminous containing
338	....Natural rubber containing
344	.Delaminating per se
345	DIFFERENTIAL ETCHING APPARATUS
346	PLASTER BOARD MAKING APPARATUS
347	.With surface deformation means
348	.With edge treatment means
349	SURFACE BONDING MEANS AND/OR ASSEMBLY MEANS THEREFOR
350	.Automatic and/or material-triggered control
351	..Plural interrelated sensing means
352	..To stop operation of complete machine
353	..Of cutter
354	...And separate means feeding cut pieces in sequence and applying to serially conveyed articles
355	...Responsive to feed of article to which cut piece is applied
356	..Of application of fluent material to work
357	...By presence or absence of work to which applied
358	..Of application of bonding pressure
359	..Of temperature and/or motion of heat exchange means
360	..Means responsive to weight or dimension
361	..Of feed or motion of indefinite length work or transfer carrying tape
362	..Of feed of articles to assembly station
363	...Responsive to presence, absence, or condition of article to which applied
364	....Sheet feeding
365	.With safety interlocks
366	.With timing means
367	.With electrical controls
368	..For starting or stopping machine operation
378	.With testing, measuring and/or indicating means
379	.With inspecting and/or illuminating means
379.6	.With means applying wave energy or electrical energy directly to work
379.7	..To an electrically conductive lamina or component incorporated into the work
379.8	..With means to assemble laminae or position them relative to each other
379.9	...With plural diverse heating means
380.1	...With tube-forming means
380.2	...With electrode or coil member contacting work
380.3	....Electrodes on opposing sides of smallest dimension of work
380.4	.....With means moving one electrode toward the other electrode
380.5	......With means to change the configuration of a lamina, e.g., folding, deforming, etc.
380.6	..With electrode having a mechanical function, e.g., pressing, etc.
380.7	...Cutting, tearing, or breaking function
380.8	...Shaping or deforming function, e.g., patterned electrode, etc.
380.9	..With radiant heater not touching work
381	.Chamber enclosing work during bonding and/or assembly
382	..Evacuated or fluid pressure chamber
383	.Means encasing separate nonadhered part between adhered laminae
384	.With printing
385	..Simultaneous with bonding
386	...Printing member also bonds
387	..Printing
388	..After bonding
389	.Including cleaning, conditioning or renewing means for apparatus
390	.With coating means for work (other than laminating adhesive)
391	.Work-secured and/or work-guided
392	..Pipe wrapping type
393	.With braiding or weaving means
394.1	.Tire body building type
395	..Means delaminating protective liner from lamina
396	..Multiple discrete building forms and/or means advancing a building form through multiple work stations
397	..Means building tires from strands or narrow tapes
398	..Means operating on the bead portion of the tire
399	...Means trimming fabric adjacent bead
400	...Means folding carcass fabric about a bead
401	....Inflatable bag type
402	....Disc or roller type
403	...Means placing bead ring on tire carcass
404	..Solid tire building type
405.1	..With fabric or tread stock feeding means
406	...Means selecting stock from multiple source
406.2	...For transporting discrete ring-shaped lamina
406.4	...With cutting, heating, laminating, or shaping means upstream of assembling means
406.6	....Stretching means
407	..Centerless core or off-center support of annular tire structure
408	..Relative traversing motion between rotating tire supporting structure and pressing or bending means
409	...Compound traversing motion
410	....With changing direction of force of pressing or bending means with respect to the axis of rotation of the supporting structure (e.g., curved drum)
411	.....Pressing means manually advanced toward the axis of rotation of the supporting structure
412	...Resilient or deformable surface pressing or bending element
413	...Plural sequential pressing or bending elements
414	..Building drums per se
415	...Axially or widthwise adjustable or collapsible
416	...Resilient and/or inflatable core
417	...Collapsible
418	....Rack and pinion type actuator
419	....Resilient spring actuated
420	....Toggle linkage lever type actuator
421	..Stitching elements per se
421.2	..Tire chamber and means regulating interior casing pressure

SURFACE BONDING MEANS AND/OR ASSEMBLY MEANS THEREFOR
.Tire body building type
421.4 ..With means for folding lamina while on drum
421.6 ..Tire support with pressing or heating means
421.8 ..Ring-shaped lamina stretching means
422 .Tire bead ring winding type
423 .Means assembling part within hole or aperture (telescoping)
424 ..Electric lamp or space discharge device envelope basing type
425 .Longitudinally progressive helical winding means
426 ..With means cutting wound body to form sheet or web
427 ...Strands secured to web
428 ..Forming and/or covering indefinite length article
429 ...Rotating core or mandrel
430 ...By winding plural strands or webs
431 ....About circular section core or mandrel
432 .....Plural discrete axially spaced winding means
433 .Indefinite or running length flexible strand, rod, tube or filament uniting
434 ..Means applying transverse spacers to spaced parallel strands
435 ..Pile fabric making type
436 ..To indefinite or running length web
437 ...With means forming web by calendering
438 ...With means folding web longitudinally
439 ...Transversely of web
440 ....Reciprocating feed means for strand
441 ..Means gathering strands or filaments only into indefinite length
441.5 .Envelope sealing type
442 ..With stamp applying means
442.1 ..With bending or folding means
442.2 ..With feeding means
442.3 ...Reciprocating feed
442.4 ..Work traversing type
443 .With bending, folding, winding, or wrapping means
444 ..Pneumatic blast to bend work
445 ..About preformed sphere
446 ..Rotating mandrel or article
447 ...Means registering sheet with selected peripheral portion of rotating article
448 ...Translating axis of rotation
449 ....Rolling mandrel or article
450 .....Winding flexible web
451 .....Article rolls across sheet stack
452 ......By gravity
453 ......Belt feed
454 .....By gravity
455 .....Belt feed
456 ....Axis translates in circular path
457 ...Centerless core or mandrel
458 ...Means serially feeding mandrel or article to applying station
459 ..For an indefinite or running length flexible web
460 ...Tire bead or endless belt covering type
461 ...Longitudinal bending
462 ....Corrugating
463 ....Plural sequential bending means
464 ....And means feeding discrete articles to web
465 ....Single web only
466 .....Tube-making type
467 ....And means uniting noncoextensive plural webs
468 ...Means bending to configuration of part to which secured
469 ...Transverse withdrawal of shaping or shape-retaining elements
470 ...And means applying separate web to shaped web
471 ....While still on shape-retaining means
472 .....Fluted roll-shape retainer
473 ......Separate means holding web in flutes
474 ...Pleating means
475 ..To configuration of part to which secured
476 ...Plural discrete bending means, each acting on separate article
477.1 ...Plural, distinct, sequential bending or folding means
478 ....Intersecting bend axis
479 .....Means bending sheet over edges of planar part
480 ......With separate member pressing bent sheet corner at axis intersection
481 ....Arcuate bending
482 ....Having intersecting axes of force
483 ...Flexible sheet across through passage for work
484 ....Sheet applied to passage
485 .....With additional separate smoothing means
486 ...Member travels along configured part
487 ....Flexible bristle wiping surface
488 ....Bodily deformable pad type
489 ....Opposed movable biased members
490 .....Positively actuated to intermittently defeat bias
491 ......Cam defeats bias
492 ...By swinging folding member approaching part
493 ...Deformable pad
494 .With stretching or tensioning means
495 ..By driven web feeding means
496 ...To transversely stretch or tension the web
497 .With gas, vapor or flame contact means for work
498 .With work cooling means
499 .With separate (nonpress) heating means for work
500 .With casting, plastic molding or extruding means
501 ..With means generating at least one self-sustaining web (e.g., film casting)
502 .Means joining flexible indefinite length or endless bodies end-to-end (e.g., film, tape, belt splicers)
503 ..Tube splicing type (e.g., inner tube)
504 ..Moving web (flying splice or with web accumulating means)
505 ..Means applying adhesive tape to joint only
506 ...With severing means for tape before application
507 ..Longitudinally moving web support moving web ends into association
508 ...With scraper or adhesive applying means
509 ..With scraper or adhesive applying means
510 .With cutting, punching, piercing, severing or tearing
511 ..Plural severing means each acting on a different work piece
512 ..Severing followed by associating with part from same source
513 ..Means making hole or aperture in part to be laminated

SURFACE BONDING MEANS AND/OR ASSEMBLY MEANS THEREFOR
.With cutting, punching, piercing, severing or tearing
..Means making hole or aperture in part to be laminated
514 ...And securing separate part over hole or aperture
515 ..Cutting element simultaneously bonds (e.g., cut seaming)
516 ..Means feeding plural workpieces to be joined
517 ...Severing before bonding or assembling of parts
518 ....Severing means or member secured thereto also bonds
519 ....Delivering cut part to indefinite or running length web
520 .....Cutter also delivers cut piece
521 ....Delivering cut part in sequence to serially conveyed articles
522 ...Cutting indefinite length web after assembly with discrete article
523 ..Work traversing type
524 ...With liquid applying means
525 ....Slitting and severing
526 ....Cutting after bonding
527 ...Fixed cutter
528 ..Stamp from multiple row sheet type
529 ..With means projecting fluid against work
530 ..Cutter actuated by or secured to bonding element
531 ...With liquid applicator
532 ....Common actuator for bonding and liquid applying means
533 .....Liquid applied to web before cutting
534 ......Roller applicator
535 .With means shaping, scarifying or cleaning joining surface only
536 .Combined and/or convertible
537 .With bond interfering means (slip sheet, etc.)
538 .With work feeding or handling means
539 ..For plural parts or plural areas of single part
540 ...Lamina transferred to base from adhered flexible web or sheet type carrier
541 ....Discrete spaced laminae on adhered carrier
542 .....Means serially presenting discrete base articles or separate portions of a single article
543 ...Indefinite or running length work
544 ....Means joining indefinite length work edge to edge
545 .....Means applying adhesively secured tape to seam
546 .....Means applying fluid adhesive to work edge
547 ....Means applying fluent adhesive or adhesive activator material between layers
548 .....At spaced areas
549 .....Plural indefinite length or running length workpieces
550 ......Fluid applied to nip between indefinite length webs
551 ......Fluid applied to plural workpieces
552 ....Means bringing articles into association with web
553 ....Discontinuous, spaced area, and/or patterned pressing
554 ....Webs of different width, longitudinally aligned
555 ....Progressive continuous bonding press (e.g., roll couples)
556 ...Means bringing discrete articles into assembled relationship
557 ....Plural lines and/or separate means assembling separate sandwiches
558 ....All articles from single source only
559 ....At least three articles
560 .....At least two applied side by side to common base
561 ......Plural ranks
562 ......Sheet form common base
563 .....Stacked serially
564 ....Magazine stack directly contacting separate work
565 .....Magazine movable to work
566 ....Means simultaneously conveying plural articles from a single source and serially presenting them to an assembly station
567 .....Turret or rotary drum-type conveyer
568 ......For flexible sheets
569 ....Means separating articles from bulk source
570 .....Stacked sheet source
571 ......Rotary or pivoted picker
572 ......Translating picker
573 ..Magazine stack directly contacting work
574 ..Work traversing type and/or means applying work to wall or static structure
575 ...With liquid applying means
576 ...Grip or clamp for web end
577 ...Implement carried web supply
578 ..With liquid adhesive or adhesive activator applying means
579 .With handle or handgrip
580 .Presses or press platen structures per se
580.1 ..With sonic or ultrasonic means
580.2 ...Specified structure of sonic or ultrasonic work contacting surface
581 ..Relieved or configured pressing face
582 ...Rotary
583.1 ..Heated
583.2 ...Impulse heating
583.3 ...With significantly flexible platen
583.4 ...Nonuniform heating
583.5 ...With endless belt
583.6 ...C-frame type
583.7 ....Electric heating
583.8 ...Hinged platen
583.9 ....Electric heating
583.91 ...Plural adjustable pressure points
584 DELAMINATING APPARATUS

DIG 1	Labelling flat, essentially rigid surfaces (1/00)
DIG 2	.Affixing labels to one flat surface of articles, e.g., of packages, of flat bands (1/02)
DIG 3	.Affixing labels, e.g., wrap-around labels, to two or more flat surfaces of a polyhedral article (1/04)
DIG 4	..Of a box, e.g., cigarette box (1/06)
DIG 5	Labelling other than flat surfaces (3/00)
DIG 6	.Affixing labels to elongated objects, e.g., wires, cables, bars, tubes (3/02)
DIG 7	..Applying bands or labels to cigars or cigarettes (3/04)
DIG 8	.Affixing labels to short rigid containers (3/06)
DIG 9	..To container bodies (3/08)
DIG 10	...The container being positioned for labelling with its centerline horizontal (3/10)
DIG 11	....By rolling the labels onto cylindrical containers, e.g., bottles (3/12)
DIG 12	...The container being positioned for labelling with its centerline vertical (3/14)
DIG 13	....By rolling the labels onto cylindrical containers, e.g., bottles (3/16)
DIG 14	..To container necks (3/18)
DIG 15	..To bottle closures (3/20)
DIG 16	...Affixing metal foil coverings (3/22)
DIG 17	...Affixing labels indicating original state of bottle snap or screw closure (3/24)
DIG 18	.Affixing labels to nonrigid containers, e.g., bottles made of polyethylene, boxes to be inflated by internal air pressure prior to labelling (3/26)
DIG 19	Labelling fabrics or comparable materials or articles with deformable surface,e.g., paper, fabric rolls, stockings, shoes (5/00)
DIG 20	.Using adhesives (5/02)
DIG 21	..Thermo-activatable adhesives (5/04)
DIG 22	.Using staples (5/06)
DIG 23	Affixing tags (7/00)
DIG 24	Details of labelling machines or apparatus (9/00)
DIG 25	.Devices for moving articles, e.g., containers, past labelling station (9/02)
DIG 26	..Having means for rotating the articles (9/04)
DIG 27	.Devices for presenting articles in predetermined attitude or position at labelling station (9/06)
DIG 28	.Label feeding (9/08)
DIG 29	..Label magazines (9/10)
DIG 30	..Removing separate labels from stacks (9/12)
DIG 31	...By vacuum (9/14)
DIG 32	...By wetting devices (9/16)
DIG 33	..Label feeding from strips, e.g., from rolls (9/18)
DIG 34	.Gluing the labels or articles (9/20)
DIG 35	..By wetting (9/22)
DIG 36	..By heat (9/24)
DIG 37	.Devices for applying labels (9/26)
DIG 38	..Air-blast devices (9/28)
DIG 39	..Rollers (9/30)
DIG 40	...Cooperating rollers between which articles and labels are fed (9/32)
DIG 41	..Flexible bands (9/34)
DIG 42	..Wipers; pressers (9/36)
DIG 43	.Label cooling or drying (9/38)
DIG 44	.Controls; safety devices (9/40)
DIG 45	..Label feed control (9/42)
DIG 46	...By special means responsive to marks on labels or articles (9/44)
DIG 47	.Applying date marks, code marks, or the like to the label during labelling (9/46)
DIG 48	Manually controlled or manually operable label dispensers, e.g., modified for the application of labels to articles (11/00)
DIG 49	.Having printing equipment (11/02)
DIG 50	.Having means for moistening the labels (11/04)
DIG 51	.Having means for heating thermoactivatable labels (11/06

1	MISCELLANEOUS
1.1	RUBBER TIRE MOUNTING AND/OR DEMOUNTING APPARATUS
1.11	.With carrier
1.13	.For divided tire bands
1.14	..Wire tightening and/or securing
1.17	.For collapsing or shifting tire axially
1.2	..Circumferentially distributed force
1.21	...Radially inwardly directed (e.g., tubeless tire compressors)
1.22	..Circumferentially traveling
1.24	...Pedestal type
1.26	..Pushing elements on opposed faces of tire and/or rim
1.28	...Both on tire
1.3	..Single bar pry or lever type
1.33	.For tire retaining ring
1.35	.For split rims (i.e., rim breakers)
1.36	..Three or more rim engaging elements
1.37	...Including link or lever carried abutment
1.38	...Plural force-mechanisms
1.39	....Individually operated
1.4	.....Auxiliary type
1.41	....Axial toggles or coplanar cam
1.42	..Circumferentially divided engaging element type
1.43	..Two hand lever type
1.44	..Plural force-mechanisms
1.45	..Screw and nut actuated
1.46	..Sliding or rack actuated members
1.47	..Pivoted linkage movable in tire plane
1.48	...Two link type
1.49	...Single link or pry type
1.5	FOR METALLIC SPOKED WHEELS
1.55	.Spoke securing
2	RIM COMPRESSORS
3	SPOKE SETTERS
4	.Work holders and guides
5	TIRE SETTERS
7	.Trestles and tanks
8	TIRE TIGHTENERS
9	.Felly expanders
10	..Spoke clamping
11	TIRE REMOVERS
12	SPOKE EXTRACTORS
13	GROOVING, SLITTING AND/OR LACERATING OF RUBBER TIRES
14	WHEEL HOLDING MEANS
15	.Including inflatable wheel gripping element
16	.Including relatively movable wheel gripping jaws
17	..With screw-nut actuating device
18	..With cam or wedge type actuating device
19	.Means mounted to swing between locations
20	.Means rotates around relatively fixed axis
21	.Adjustable or adaptable for different sizes or shapes

CLASS 159 CONCENTRATING EVAPORATORS

DECEMBER 1990

2.1	SUPERHEATING AND PRESSURE RELEASE
2.2	.With extruder
2.3	..Multistage
3	SPRAY TYPE
4.01	.Gaseous current
4.02	..Combustion product gas
4.03	..Antibridging
4.04	..Countercurrent
4.05	..Intermediate gas outlet or inlet
4.06	..Bottom sprayer
4.07	..Horizontial sprayer
4.08	..Impinging jets
4.09	..Multistaging
4.1	..Heat recovery
4.2	..Spinning sprayer
4.3	..Rotary drum with sprayer
4.4	..Steam drying or atomizing
5	FILM TYPE
6.1	.Centrifugal
6.2	..Wiped film
6.3	...Horizontally
7	.Moving-film support
8	..Gaseous current
9.1	...Rotary drum or disk
9.2	....Treated material inside drum
10	....Exterior surface
11.1	.Rotary drum or disk
11.2	..Internal film
11.3	...Rotary disk
12	..Inclosing chamber
13.1	.Moving film
13.2	..Contacting tube
13.3	...Outside of tube
13.4	..With gas wiping
14	..Climbing
15	..Zigzag
16.1	GASEOUS BLAST OR CURRENT
16.2	.Submerged combustion
16.3	.Steam injection
17.1	MULTIPLE EFFECTS
17.2	.Parallel fluid flow
17.3	.Variant multistaging
17.4	.Contiguous evaporators
18	.Superimposed
19	.Combined closed and open
20.1	.Variable or counter flow
20.2	..With effect switching means
21	COMBINED CLOSED AND OPEN PANS
22	CLOSED EVAPORATING CHAMBERS
23	.Indirectly heated
24.1	..Regenerative
24.2	...Heat recovery or regeneration
24.3	....Thermocompression
25.1	..Rotatable agitator or coil
25.2	...Vertical axis agitator
26.1	..Heated tube
26.2	...Inclined
27.1	...Vertical
27.2	....Detached separator
27.3	....Multieffect in one casing
27.4	....Downflow
27.5	....Floating calandria
28.1	..Heating elements
28.2	...Baffled
28.3	...Spur tubes
28.4	...Coils
28.5	...Tublar inserts
28.6	...Plate-type evaporator
29	.Directly heated
30	.Samplers
31	.Liquid traps or separators
32	OPEN PANS
33	.With rakes
34	.Tiltable, removable, or portable
35	.Interposed liquid receptacle
36	.Steam and furnace heated
37	.Steam heated
38	.Furnace heated
39	..Liquid tubes in flue
40	..Flues in pan
41	..With dampers
42	STRAINERS OR SKIMMERS
43.1	FLUID FEED OR DISCHARGE DEVICES
43.2	.With alternating operating means
44	.Automatic
45	APPARATUS FOR GRAINING AND SEPARATING CRYSTALS
46	PRELIMINARY HEATERS AND HEAT ECONOMIZERS
47.1	PROCESS
47.2	.Involving urea
47.3	.Involving waste liquid
48.1	.Spraying
48.2	..Producing liquid product
49	.Film

CLASS 160 CLOSURES, PARTITIONS AND PANELS, FLEXIBLE AND PORTABLE

DECEMBER 1990

1	AUTOMATIC CONTROL
2	.Non-thermal automatic initiator
3	..Force initiated
4	...Weight
5	..Weather and/or light initiated
6	.Non-fusible thermal initiator
7	.With starting or driving means
8	.With retarding means
9	.With releasing means for operator and/or counterbalance
10	WITH SIGNAL, INDICATOR OR SIGN
11	WITH WIPER OR CLEANER
12	WITH INSECT EXITS
13	.Applied to slidably interconnected frames or panels
14	.Zigzag or crimped surface
15	.Spaced or overlapping sections
16	.Conical, prismatic or other protuberances
17	.Bar, grooved or apertured
19	WITH HOOD, CANOPY, SHIELD STORAGE CHAMBER OR OUTRIGGED RIGID PANEL
20	.Outrigged rigid panel, with flexible panel sides
21	.Changeable size
22	.For outrigged flexible panels (i.e., awnings)
23.1	.For roll type
24	..Portable
25	..With plural flexible or portable panels
26	..Casement housed roll
27	...Fabric free edge connected to movable closure
28	..Fabric free edge connected to movable closure
29	..Movable hood, canopy, shield, storage chamber or outrigged rigid panel
30	...Mounted upon movable closure
31	..Combined with frame or demountable side guides
32	.For plural strip, slat or panel and/or pleating type
33	..Casement housed
34	..Venetian blind and/or collapsing
35	..Pleating or edge hinged gathering type
36	..Edge hinged, slidably mounted
37	.Slidable into storage chamber
38	.Structure
39	..Extensible
40	WITH FILLER AND FILLER TYPE
41	.For roll type
42	..Between outrigged roll type
43	.Between parallel plane, relatively slidable panels
44	WITH LIQUID SUPPLYING AND/OR DRAINING MEANS
45	WITH OUTRIGGERS (I.E., AWNINGS)
46	.Floor or ground engaging outrigger
47	.With groove engaging mounting means
48	.With rigid closure
49	..Movable rigid closure related
50	.With non-outrigged flexible panel
51	..Convertible
52	..With non-outrigged roll type
53	.Umbrella type
54	.Plural outrigged type
55	..One roll type
56	.Non-planar fabric arrangements
57	..Planar surface, with sides
58.1	...Sides foldable, rollable, or collapsible
59	.Multi-positional
60	.Convertible
61	.Plural strip, slat or panel type
62	..Telescopic and/or collapsible
63	.With fabric having diverse areas
64	.Adjustable size
65	.With braced outrigger
66	.Roll type
67	..Shiftable position roll
68	..Fabric free edge connected operator
69	..Multi-part outrigger
70	...Two part, intermediate pivot
71	...Telescopic
72	..Swinging outriggers
73	...With pivotal motion preventing means
74	...Sliding pivot
75	..Sliding outriggers
76	.With fabric frame
77	..Pivoted
78	.Multi-part outrigger
79	..Two part, intermediate pivot
80	..Telescopic
81	.Swinging
82	..With sliding pivot
83.1	.Rigid or nonmovable
84.1	PLEATING TYPE
84.2	.Lazy-tong links pivot about axes transverse to panel
84.3	.Lazy-tong links pivot about axes parallel to panel
85	PLURAL RUN TYPE
86	.Endless
87	PLURAL AND/OR WITH RIGID CLOSURE
88	.Non-planar, non-parallel arrangement
89	.Diverse types
90	..With rigid closure
91	...Diverse rigid closures
92	...Swinging rigid closures
93	....Intermediate axis
94	.....With opposite, parallel, offset flexible panels
95	....Flexible or portable panel related to rigid closure operating or fastening means
96	....Facing flexible or portable panel and mounted for optional or conjoint movement
97	....Flexible or portable panel complementary to form complete closure
98	...Roll type flexible panel
99	....Connected to slidable rigid closure
100	.....Fabric free edge connected closure
101	...Flexible panel between slidable parallel plane rigid closures
102	...Flexible panel connected to and moved by slidable rigid closure
103	...Flexible or portable panel related to rigid closure operating or fastening means
104	...Grille or shutter type
105	...Flexible panel removably mounted in slidable rigid closure guides
106	...Removably mounted over fabric in frame
107	...Plural strip, slat or panel type
108	..Roll and hanging or drape type only
109	...Shiftable position
110	....With extensible pole, roller, bar or support therefor
111	....Vertically slidable
112	...With extensible pole, roller, bar or support therefor
113	.Plural strip, slat or panel assemblies
114	..Non-planar
115	..Multiple section unit
116	...One closing passage through another
117	...Mounted on opposite sides of single opening
118	...Track guided
119	..Mounted on opposite sides of single support
120	.Roll type
121.1	..Single roll

	PLURAL AND/OR WITH RIGID CLOSURE
	.Roll type
122	..Differently directed fabrics
123	.Hanging or draped type
124	..Side-by-side arranged, on single pole or or track
125	..Shiftable pole
126	..Laterally overlapping fabrics and/or co-elevational parallel tracks
127	COMBINED
128	CONVERTIBLE
129	.Plural movably interconnected strip, slat or panel type
130	PLURAL STRIP, SLAT OR PANEL TYPE
131	.Longitudinally crooked strip, slat or panel
132	..Bow or U-shape, pivoted together at ends
133	.Roll type
134	.Fan type
135	.Portable
136	.Parallelogram type
137	..Plural differently movable parallelogram section with a common side
138	..With operator
139	...Unit collapsing only
140	....Diverse types of operators
141	.....One operator a spring
142	.....One operator a weight
143	......Weighted parallelogram element extension
144	....Spring
145	.....In brace
146	....Weight
147	.....Strand carried
148	.....Weighted parallelogram element extension
149	....With gearing
150	....With strand and pulley
151	....Unit carried operator
152	..With means to hold unit in partially collapsed or collapsed position
153	...Combined tension and compression means
154	...Pivoted compression bar
155	....Friction catch
156	...Tension members
157	....Flexible member foreshortened at end
158	....Friction catch
159	..Unit collapsing on guides
160	..Unit pivoted to support
161	..Unit structures
162	...With additional set of plural strips, slats or panels
163	....Plural diverse additional sets
164	....Additional set composed of interconnected strips, slats or panels
165	....Pivots parallel to unit plane
166.1	.Venetian blind type
167	..Changeable position assemblies
168.1	..With accumulating means
169	...Accumlated at stationary end
170	...Drum or roller wound strand
171	....Axially traversed drum or roller
172	...With side guides
173	...Units and subcombinations thereof
174	..Adjustable strip, slat or panel angle
175	...With latch or detent
176.1	...With angle adjusting means
177	...Units and subcombinations thereof
178.1	..Subcombination or structure thereof
178.2	...Cord lock
178.3	...Slat support (e.g., tape ladder)
179	.Plural fabrics in a single frame
180	.One closing opening in another
181	.With mounting or supporting means
182	..Removable frame type support
183	..Non-planar non-parallel arrangement on support
184	..Strip, slat or panel not interconnected for relative motion
185	..Strip, slat or panel interconnected for diverse relative motions
186	..Arranged to provide plural passageways on opening
187	...Strip, slat or panel pivotally interconnected
188	..With operating means
189	...Counterbalance and additional operator
190	...Counterbalance only
191	....Spring
192	...Spring
193	...Strand
194	..Movably mounted track
195	...Pivotally mounted
196.1	..Unit hung from horizontal track
197	...Strips, slats or panels slidably interconnected
198	...Track parallel to axis of interconnection pivots
199	...Strip, slat or panel constrained for pivotal folding
200	...With independently movable strip, slat or panel
201	..Track guided
202	...Strips, slats or panels slidably interconnected
203	...Unit pivoted to support, pivot displaced from unit plane
204	...Track parallel to interconnection pivot axis
205	...With independently movable strip, slat or panel
206	...Strip, slat or panel constrained for pivotal folding
207	....Vertical track
208	...A single strip, slat or panel connected to track
209	...With means to force against mount or support
210	..Pivotally mounted unit
211	...Strips, slats or panels slidably interconnected
212	...Support pivot at angle to interconnection pivot axis
213	...Constrained for pivotal folding
214	..Slidably mounted unit
215	..Removable unit
216	...Strip, slat or panel slidably interconnected
217	...Pivotal interconnection necessary to removal and insertion
218	.Movably interconnected
219	..Unit having diverse areas
220	..Interconnected for plural relative motions
221	...Doubly extensible by sliding only
222	..Slidably interconnected
223	...Plural individually interconnected strips, slats or panels
224	...With operator and/or anti-friction means
225	...With relative slidable motion preventing means
226	...Embracing type
227	....Integral embracing means
228	...Tongue, bead, bolt or dog into groove or slot
229.1	..Edge-to-edge interconnected
230	...Single covering fabric
231.1	...Interconnected by strand, fabric, rubber, or plastic
231.2	....Interconnected by rubber or plastic

	PLURAL STRIP, SLAT OR PANEL TYPE
	.Movably interconnected
	..Edge-to-edge interconnected
232	...Hollow, filled or covered elements
233	...With relative pivotal motion preventing means
234	....Acting to keep unit planar only
235	...By curled or bent side edges
236	.Strip or slat structure
237	WITH FABRIC HAVING DIVERSE AREAS
238	ROLL TYPE
239	.Framed
240	..Adjustable size frame
241	.Plural roll
242	.Shiftable position roll
243	..Roll translated for winding or unwinding operation only
244	...Fabric free edge adjustable
245	...Spring roller
246	..Straight line non-axial translation in fabric plane only
247	...Center operated, roll support
248	...Rack and pinion operated
249	...One side, non-strand operated
250	...Extensible roller and/or roll support
251	...Step-by-step
252	...Strand shifted
253	....Pulley or drum lift on roller
254	....Winding drum
255	.....With roll guide
256	....Roll intermediate guides for translating strands
257	....With position holding means
258	.....Strand holder
259	......Roll guided
260	....Roll guided
261	...With elevator rod
262	.Crooked roll, non-cylindrical or flexible roller
263	.Adjustable dimension roll
264	.With fabric reinforcements
265	.With fabric free edge connected operator
266	.With guides or fabric edge holders
267.1	..Fabric side edge and stick
268.1	..Fabric side edge
269	...Clamping
270	...Slot or channel type
271	....Fabric receiving
272	.....Guide mounted in a channel
273.1	.....With interlock between fabric and guide
274	..Stick guided only
275	...With positive stop or detent
276	....Reciprocable detent
277	...Guides of bar or strand form
278	....With release mechanism
279	....Guide strand axially through or into stick
280	...Leading edge holders movable axially of stick
281	....With release mechanism
282	.....With guide engaging rollers and friction elements
283	......And roll brake
284	.....With guide engaging rollers
285	....With guide engaging rollers and friction elements
286	.....And roll brake
287	....With guide engaging rollers
288	....With axially acting friction elements
289	...With friction elements
290.1	.With fabric leading edge fastening means
291	.With brake or stop
292	..Plural
293.1	..Limit of travel
294	...For spring operated roller
295	....Screw operated brake or stop
296	..Speed limiting
297	..Ball or roller, form brake or stop
298	..Friction
299	...For spring operated roller
300	..Pawl or detent
301	...For spring operated roller
302	....Spring urged pawl or detent
303	....Pawl or detent mounted off the roller
304.1	....Sliding pawl or detent
305	..For spring operated roll
306	...With means to prevent uncoiling of spring on removal from support
307	..For strand operated roll
308	...Strand operated brake or stop
309	.With rotating means
310	..Electric operation or control
311	..Motor or fluid pressure control
312	..Plural, diverse
313	..Spring
314	...External of roll
315	...With winding or tensioning means
316	...Nested helical springs
317	...Plural
318	...With spring anchor
319	..Strand
320	...With weight or handgrip
321	...Endless
322	...With compensating and shock absorbing spring
323.1	.With supporting or journaling means or with roller end structure
324	..With pintle clamping or holding means
325	..With pintle journaled in rolled
326	..With roller gudgeons
327	NON-FRAMED PLURAL EDGED HELD FABRIC
328	.With fabric stretching means
329	..Resilient stretching means
330	HANGING OR DRAPE TYPE
331	.Motor operating means or electric or fluid pressure control
332	.Chain, cable and/or strand type
333	.Shiftable position pole
334	..Plural motions
335	..Swingable
336	...Vertical swing
337	...With pole operating means
338	..Vertically shiftable
339	...With strand operator
340	.With fabric operating means
341	..Laterally gathered fabric
342	...Lazy tongs
343	...Spring or screw
344	...Strand
345	....Hollow or slotted track
346	.....With anti-friction means
347	....With anti-friction means
348	.With pleating means
349.1	.With bottom or intermediate holding, weighting, or draping means
349.2	..Intermediate holding means
350	.Portable
351	PORTABLE
352	NON-PLANAR (E.G., THREE DIMENSION)
353	WITH PLURAL FRAMES
354	WITH NON-RIGID FRAME OR BORDER ELEMENTS
368.1	WITH MOUNTING, FASTENING, OR SUPPORTING MEANS
368.2	.Shiftable support for overlying shield, e.g., pillow sham type
369	.For framed type
370	.With guide for strand
370.1	.Grain car type temporary closure
370.2	.Automobile windshield weather protector or glare shield
371	FRAMED TYPE

	FRAMED TYPE
372	.Adjustable frame size
373	..With excess or extensible fabric
374	..Double extensible
374.1	...Expandable at corner joint, e.g., artist's canvas stretcher frame
375	..Shiftable edge bar section only
376	...With spring thrust
377	.Collapsible or knockdown
378	.Fabric stretching
379	.With intermediate reinforcing bars, members or braces
380	.Two superimposed frame elements, fabric clamping
381	.With corner structure
382	FABRIC FASTENING MEANS
383	.To elongated element
384	..Additional things fastened
385	..With modified fabric
386	...Plural layers in panel portion
387	...With fabric hem
388	...With loops
389	...With strips or strands
390	...With fabric openings or pockets
391	..Longitudinally divided or with fabric receiving externally exposed channel or groove
392	...Internal fastener larger than groove or channel fabric exit
393	....With end cap and/or sleeve
394	....Sheet material elongated element
395	...Elongated fastener in channel or groove
396	....With end cap and/or sleeve
397	....Sheet material elongated element
398	...With pointed, piercing and/or hook elements
399	...Externally applied clamp, clasp, sleeve or end cap
400	..Sheet or strand
401	..By sleeve and/or end cap
402	..By externally applied clamp or clasp
403	..By elongated fastener
404	..By pointed, piercing and/or hook elements

CLASS 162 PAPER MAKING AND FIBER LIBERATION

1	PROCESSES OF CHEMICAL LIBERATION, RECOVERY OR PURIFICATION OF NATURAL CELLULOSE OR FIBROUS MATERIAL
2	.Animal fibers
3	.Mineral fibers
4	.Waste paper or textile waste
5	..With organic agent
6	..With chlorine, chlorine compounds, oxygen, ozone, or per-compounds
7	..With sulfur or sulfur compound
8	..With alkali metal, alkaline earth metal, or ammonium compound
9	.With chemical or physical modification of liberated fiber
10	.With non-fiber material added to product
11	..Fiber supplied constituent
12	..Added to web or article
13	.With formation of web or article
14	.Including recovery of organic by-product
15	..From digester relief gases
16	..From waste liquor
17	.Continuous chemical treatment or continuous charging or discharging
18	..With compression, squeezing or compacting of fibrous material during charging
19	..Plural diverse stage treatment
20	.With decortication or mechanical preparation of textile fibers
21	.Defibration by projection or explosion
22	..With chemical other than water or steam
23	.Mechanical defibration in the presence of heated gas or gas under pressure
24	.Chemical treatment after start or completion of mechanical defibration
25	..With additional chemical treatment before start of defibration
26	.Simultaneous mechanical defibration and chemical treatment
27	.Mechanical defibration of logs or blocks after chemical treatment
28	.With plural or specified mechanical defibering step
29	.With regeneration, reclamation, reuse, recycling or destruction of digestion fluid
30.1	..With destruction of organic ingredient in or smelting of liquor
30.11	...Treatment of kraft pulping chemicals
31	...Flames combustion
32	...Liquor from digestion using organic compound or including element other than Na, Ca, Mg, O, C, H or S
33	...With mixing of liquors from different digestions
34	...Plural diverse digestion of same fibrous material
35	...Residue converted into liquor different from original liquor
36	...Sulfur dioxide or sulfite containing spent liquor
37	..Digestion fluid reused on different fibrous materials
38	...With addition of chemicals prior to reuse
39	....In digester
40	...Without treatment or modification
41	..Recirculation (includes separation from fibers)
42	...With treatment of fluids during recirculation
43	....Removal and/or separation of portion of recirculating fluid
44	.....With recombing
45	....With addition of chemicals to recirculating fluid
46	...Steam only
47	.With heat recovery
48	.With cleaning, preserving or conditioning of apparatus
49	.With testing, sampling or analyzing
50	.Utilizing electrical or radiant energy
51	.Digestion odor control
52	.Charging and/or discharging fibrous material
53	.Vacuum treatment
54	.Freezing
55	.With classifying, separating or screening of pulp (solids from solids)
56	.With squeezing, compression, rubbing, kneading
57	.With agitation or forced circulation
58	..In rotating vessel
59	..Closed circuit circulation
60	.With washing
61	.Regulatory
62	..Concentration of chemicals
63	.Gas, vapor or mist contact
64	..Sulfur dioxide
65	..Oxygen, ozone or air
66	..Chlorine containing material
67	...Chlorine dioxide
68	..Steam only
69	.Non-continuous liquid phase
70	.Treatment with particular chemical
71	..Treatment of ground-wood or sawdust
72	..Organic
73	...With inorganic chlorine containing material
74	...Chlorine containing
75	...Fat, fatty oil or higher fatty acid
76	...Acids, salts or esters
77	...Alcohols or phenols
78	..Per-compound (e.g., peroxide, perborate)
79	..Heavy metal or aluminum containing
80	..Phosphorus, boron or silicon containing
81	..Nitrogen oxide, acid, or salt thereof
82	..Sulfur containing
83	...Sulfur dioxide or sulfite
84	....Plural diverse stage treatment
85	.....Chlorine containing material in at least one stage
86	.....Alkali metal, ammonium, alkaline earth metal or magnesium hydroxide or carbonate in at least one stage
87	..Chlorine containing
88	...Plural diverse stage treatments
89	....Alkali metal, ammoninum, alkaline earth metal or magnesium hydroxide or carbonate in at least one stage
90	..Alkali metal, ammonium, alkaline earth metal or magnesium hydroxide or carbonate
91	.Particular raw cellulosic materials
92	..Fossilized, (e.g., peat)
93	..Bark
94	..Bamboo
95	..Cotton fibers or linters
96	..Sugar cane, bagasse or cornstalks
97	..Cereal grasses or straws
98	..Bast (e.g., flax, hemp, jute, ramie, sisal)
99	..Non-wood
100	PROCESSES AND PRODUCTS
101	.Pore forming in situ (e.g., gas generation)
102	.Utilizing non-aqueous suspending medium
103	.Including solid non-waterlaid preform

	PROCESSES AND PRODUCTS
	.Including solid non-waterlaid preform
104	..Between separately formed webs
105	..Metallic
106	...Electrical conductor
107	..Glass
108	..Woven fabric or parallel strands
109	.Non-uniform, irregular or configured web or sheet
110	..Watermarking
111	..Creping and/or crinkling
112	...With coating and/or laminating
113	...With additional deformation
114	..By perforating
115	..By fluid pressure
116	..By configured forming mold
117	..Subsequent treatment by irregular or configured die
118	.With winding or roll forming
119	..With coating
120	..With cutting and/or removing material
121	..With heat
122	..With pressure
123	.Multi-layer waterlaid webs or sheets
124	..With non-fiber added between layers
125	..Layers of differnent properties
126	...Color
127	...Organic additive
128	...Inorganic additive
129	...Fiber
130	....Dimension
131	....Orientation
132	..Separately formed webs subsequently united
133	...On common felt or carrier (non-mold)
134	.With printing and/or variegated coloring
135	.With coating after drying
136	..With treatment subsequent to coating
137	..Plural layer coating
138	.Electrical or magnetic product characteristic
139	.Cigarette paper
140	.Safety, identification and fraud preventing paper
141	.Plural fiber containing
142	..Undigested cellulosic fiber
143	..Animal or proteinaceous
144	...Leather
145	..Mineral
146	..Synthetic (including chemically modified cellulose)
147	..Waste paper or textile waste
148	..Non-wood
149	..Fibers of different dimensions
150	.Undigested cellulosic fiber
151	.Animal or proteinaceous fiber
152	.Mineral fiber
153	..Asbestos
154	...With Portland cement
155	...With organic additive
156	..Glass
157.1	.Synthetic fiber (including chemically modified cellulose)
157.2	..Synthetic resin
157.3	...Polyamide, polyester or polyurethane
157.4	...Polymerized unsaturated compound
157.5	....Hydrocarbon or halohydrocarbon
157.6	..Cellulosic
157.7	...Regenerated cellulose, viscose or rayon
158	.Non-fiber additive
159	..Fire proofing agent
160	..Preservative or antioxidant
161	...Biocidal
162	..Coloring agent
163	..Fiber supplied constituent
164.1	..Synthetic resin
164.2	...Ion exchange resin or molecular sieve
164.3	...Epoxy containing reactant
164.4	...Silicon containing
164.5	...Sulfur containing
164.6	...Nitrogen containing
164.7	...Ester type
165	...Phenol-aldehyde
166	...Amine- or amide-aldehyde
167	....With additional organic reactant
168.1	...Polymerized unsaturated compound
168.2	....Nitrogen containing compound
168.3	.....Acrylamide containing
168.4	......Heterocyclic N or S or epoxy component
168.5	.....Heterocyclic N or S or epoxy component
168.6	....Hetero S or epoxy component
168.7	....Ester type
169	....From polyene compound
170	..Natural hydrocarbon gum (rubber)
171	..Bitumen
172	..Wax
173	..Hydrocarbon
174	..Protein
175	..Carbohydrate
176	...Cellulose (non-fibrous)
177	...Cellulose derivative (e.g., cellulose ester)
178	...Gum
179	..Fat, fatty oil, or higher fatty acid
180	..Natural resin
181.1	..Inorganic
181.2	...Metal salt other than silicate
181.3	....Sulfate or sulfite
181.4	...Metal oxide or hydroxide
181.5	....Metal other than alkali metal, magnesium, or alkaline earth metal
181.6	...Silicon containing additive other than clay
181.7	....Alkali metal silicate
181.8	...Clay
181.9	...Free metal or free carbon containing
182	..With preparatory chemical treatment of fiber
183	..Incorporation procedures
184	...Application to formed web
185	....Part added to furnish or pulp
186	....On mold
187	.Hydration and/or gelatinization
188	.Non-uniform internal structure
189	.Reclamation, salvage or reuse of materials
190	..White water
191	..Broke or trim
192	.Utilizing electrical or wave energy
193	.Lead strip forming and/or guiding
194	.With cutting and/or slitting
195	..Fluid deckle or shower
196	.With folding or twisting (e.g., roving)
197	.With stretching, tensioning, decurling, flexing or breaking
198	.With measuring, inspecting and/or testing
199	.Conditioning, preparing or repairing of apparatus
200	..Wire stringing
201	.Combined processes
202	.Running or indefinite length work forming and/or treating processes (e.g., web)
203	..Forming single web between opposed forming surfaces
204	..Subsequent treatment of formed web
205	...Pressure
206	....With heating and/or cooling
207	...Heating, cooling, gas or vapor contact
208	..Treatment of slurry on mold surface

PROCESSES AND PRODUCTS
.Running or indefinite length work forming and/or treating processes (e.g., web)
..Treatment of slurry on mold surface
209 ...Vibration or agitation
210 ...Pressure member
211 ..Inhibiting or restricting drainage through mold
212 ..Directing slurry into association with mold
213 ...Projecting or slinging stock
214 ...Pressure forming
215 ...Counter or transverse of mold movement
216 ...Mechanical treatment of slurry in head box or approach flow
217 ..Suction through mold
218 .Article forming processes (pulp molding)
219 ..Plural stage deposition
220 ..Pressing with flexible diaphragm
221 ..Treatment subsequent to removal from forming mold
222 ...Surface treatment
223 ...Reshaping (i.e., changing configuration)
224 ...Heat and/or mechanical pressure
225 ....Boards or sheets
226 ..Applying heat to work on forming mold
227 ..Applying mechanical pressure to work on forming mold
228 ..Accretion from bulk
229 ...Vibration of mold and/or slurry
230 ..Separation from mold or core
231 .Articles
232 APPARATUS
233 .Digester
234 ..With mechanical defibering means
235 ...Concurrent
236 ....Continuous
237 ..Continuous
238 ..Automatic control
239 ..With recovery means
240 ...With incinerator or evaporator
241 ..Plural
242 ..Combined
243 ..With pulp agitating or circulating means
244 ...Rotating digester
245 ..Removable basket or retaining means
246 ..Charging and/or discharging means (including blow pits)
247 ...Target, impact, explosion
248 ..Forced circulation or percolation of fluid only
249 ...With heating
250 ..Heating means
251 ..Strainers
252 .Automatic control
253 ..Of plural operations
254 ..Of stock working device
255 ..Of lead strip former and/or break sensing
256 ..Of mold movement
257 ...Transverse movement of wire
258 ..Of stock consistency
259 ..Of stock feed to forming device
260 ..Of product cutting device
261 .With beating, refining, and/or disintegrating means
262 .Electric controls or systems
263 .Measuring, testing, inspecting, indicating or illuminating
264 .White water or broke recovery, recirculation or treatment
265 .With coating or impregnating means (including printing)
266 ..Acting on product on mold
267 .Molding pulp and non-pulp insert or preform
268 ..Running or indefinite length work
269 .With product stacking or piling means
270 .Flexing, bending, straightening or decurling means
271 ..Sheet or web
272 .Apparatus repair, cleaning or conditioning
273 ..Wire changing and/or tensioning
274 ..Of porous or foraminous member (e.g., felt or mold)
275 ...Means applying fluid
276 ....To cylinder
277 ....Reciprocating
278 .....With suction means
279 ....And suction means
280 .Web creping or crinkling type
281 ..Cylinder and doctor
282 ...Circumferentially grooved cylinder
283 .With product winding or reeling means
284 ..Tube winding type
285 ...With tube cutting or slitting means
286 .With cutting, scoring, perforating or tearing
287 .With folding, rolling or twisting means
288 .Molding and burnishing means
289 .Running or indefinite length product forming and/or treating means
290 ..Molding and heat exchange means
291 ..Moving impermeable member applying stock to mold
292 ..Means flinging or projecting stock against mold
293 ..Product slides relative to molding surface (e.g., extrusion molding)
294 ..Mold intermittently moving relative to supply
295 ..Concave molding surface in longitudinal or transverse section
296 ..Irregular or configured molding surface (e.g., corrugated)
297 ..Pneumatic pressure or vacuum means acting directly on stock on mold surface
298 ..Plural separate streams of stock applied to mold
299 ...Longitudinally spaced points of application
300 ..Plural molds or plural spaced areas of application on a single mold
301 ...Common vat or stock feed
302 ....Tangent cylinder molds
303 ...Molds converge to unit web
304 ...Webs united on common carrier (e.g., felt)
305 ..Molds with subsequent separate pressing means
306 ..Means removing web product from molding surface
307 ...Blow off acting through mold
308 ..Means treating stock on molding surface
309 ...Irregular treating member or acting non-uniformly across web product
310 ....Fluid jet or suction means (e.g., shower deckle)
311 ...Submerged in supply
312 ...Solid treating member
313 ....Moving
314 .....Rotary
315 ..Means directing stock into contact with molding surface
316 ...On to under surface only of mold
317 ...Confined stock stream on forming surface (e.g., pressure forming)

	APPARATUS
	.Running or indefinite length product forming and/or treating means
	..Means directing stock into contact with molding surface
318	...Cylinder mold with endless forming belt about
319	....Superposed or lateral stock pool
320	...Superposed or lateral stock pool type
321	....Cylinder mold
322	...With diverse non-pulp material inlet
323	...Immersion vat type (e.g., cylinder machine vat)
324	....Stock flow direction reversing means
325	....Stock directed transversely of mold direction
326	....Stock applied at plural points on mold periphery
327	....Baffles diverting or directing flow against cylinder mold
328	.....Concentric with cylinder
329	......Adjustable to or from cylinder
330	....Fluid level control
331	....Side seals
332	....Mold hanging
333	.....Centerless
334	....Mask, deckle or apron
335	....With drain or suction means, for white water
336	...Flow box, slice, and/or approach flow
337	....Recirculation skimming or excess stock take-off
338	....Transversely crossing inlet into flow box
339	....Closed to atmosphere
340	.....Air cushion at above atmospheric pressure
341	....Vibratile or moving member treating stock
342	.....Immersed rotary member (e.g., rectifier roll)
343	....With vanes or pulp stream dividing means
344	....Slice
345	.....Plural, longitudinally spaced
346	.....Width adjustment
347	.....Flexible or pivoted
348	..Flexible endless band type mold (e.g., Fourdrinier)
349	...Concurrently moving back up
350	...Variable slope
351	...Means retarding or controlling drainage through mold
352	....Wire bottom scrappers or deflectors
353	...Mask, deckle, or apron
354	...Table structure
355	....Vibrating or shaking (e.g., shake frames)
356	.....Perpendicular to plane of wire
357	..Cylinder molds per se
358	..Press and felt
359	...With separate heated drying means
360.1	...Plural sequential pressings
361	..Solid means acting on formed web
362	...Marking or embossing
363	..Suction devices
364	...Systems
365	...Reciprocating
366	...Adjustable width
367	...Traveling suction face
368	....Rotary pervious cylinder
369	.....With non-rotating internal suction box
370	......Plural suction areas
371	......Box carried seals
372	.....Shell structure
373	...Roller face (suction not through rollers)
374	...Wear face structures and materials
375	.With heat exchange means
376	..Heated foraminous forming mold
377	..Heated die
378	...Contacting work on forming mold
379	....Plural successive heated dies
380	.Slurry supply conditioning or condition maintaining
381	.Combined
382	.Foraminous forming mold for discrete articles (pulp molding)
383	..Differing areas of porosity or of suction on single mold surface (including masking)
384	..Centrifugal
385	..With moving slurry supply container
386	..With handle or hand grip
387	..Accretion from bulk (i.e., immersed mold)
388	...Means moving mold through, into or out of slurry
389	....Relatively moving or separate mold and suction backup
390	....Plural and/or compartmented slurry container
391	....Rotary or swinging carrier
392	.....With compressor
393	....Reciprocating carrier
394	.....With compressor
395	....With compressor
396	..Press felting (i.e., pressure member acting on pulp on mold)
397	...Plural molds (cavities)
398	....Plate or sheet type (i.e., opposed flat platens)
399	...Plate or sheet type
400	....With cores (e.g., molding of apertured plates)
401	...Flexible diaphragm
402	....About foraminous core
403	...Contracting matrix
404	....About foraminous core
405	...Expanding and/or contracting core
406	...About foraminous core
407	..Mold charging means
408	...Pressure charging
409	...Plural discrete areas of mold
410	..Article ejecting
411	..Dipping molds per se
415	.Compressor
416	..Configured die (non-planar)

CLASS 164 METAL FOUNDING

DECEMBER 1990

1 PROCESS
2 .Printing plate (e.g., stereotype, etc.) forming
3 ..Utilizing pressure application
4.1 .With measuring, testing, inspecting, or condition determination
451 ..Of continuous or semicontinuous casting
452 ...And regulating an operation
453 ....Pouring
454 ....Product withdrawing
455 ....Cooling
456 ..During foundry sand treating or mold making
457 ..During feeding of metal to mold
458 ..During cooling of mold
5 .Including recycling of process material
6 .Shaping a forming surface (e.g., mold making, etc.)
7.1 ..Utilizing a vacuum during shaping
7.2 ...To apply consumable shielding film to shaping surface
8 ..Utilizing a frozen mercury pattern
9 ..Final product part or material, utilized in forming or included in shaping member
10 ...Utilizing plural preform bodies
11 ....Preform body embedded in or held by core member
12 ..Setting or hardening shaping surface by igniting mold surface or by utilizing a forced gaseous medium
13 ..Shaping plate type pattern
14 ..With subsequent coating of casting surface with cast product treating or release material
15 ..Shaping fluent material to form mold
16 ...Chemically reactive gas hardening of forming material
17 ...Shaping forming surface by mechanically removing material therefrom or subdividing forming surface to provide plural parts
18 ...Forming discrete molds sequentially
19 ...By spraying or slinging material against shaping surface
20 ....Particulate solid material
21 .....Resin containing
22 .....Employing compressed air as ram or piston to force sand against shaping surface
23 ...Composite, plural part or multilayered mold
24 ....Sequentially forming mold portions on same shaping member
516 .....Utilizing aqueous slurry material
517 ......With particular material for treating or perfecting casting
518 ......With particular binder
519 ......With particular refractory material
27 ....Shaping plural separable mold parts
28 .....Including shaping core member
29 .....Cope and drag sections
30 ....Positioning or maintaining position of core relative to the mold
31 .....Utilizing plural cores
32 ......Maintaining cores in spaced relationship within single cavity
33 ....Lining mold surface
34 ...With destruction of pattern to disassociate
35 ....Extracting pattern in liquid state
36 .....Utilizing fluent extracting medium
37 ...By compacting material against shaping surface
38 ....Diverse pressure applications
39 ....Vibrating or jolting during shaping
40 ....Utilizing pattern as compacting member
520 ...Utilizing particular mold materials
521 ....Self-hardenable molding material
522 ....Water soluble mold material
523 ....To perfect casting surface
524 ....To prevent casting oxidation
525 ....Particular binder material
526 .....Resin containing
527 ......And inorganic material
528 .....Inorganic material
529 ....Particular refractory material
44 ...Including pattern withdrawal
45 ..Pattern making
46 .Disposition of a gaseous or projected particulate molten material on a shaping surface
47 .Shaping liquid metal against a forming surface
459 ..Continuous or semicontinuous casting
460 ...Including product cutting or breaking
461 ...Forming a composite article
462 ...Forming filament, wire, or ribbon
463 ....Utilizing continuously advancing surface
464 ...Forming a hollow article
465 ....Using a core or mandrel
466 ...Utilizing magnetic force
467 ....Molten metal shaped by electromagnetic field
468 ....Applying electromagnetic stirring force to molten metal within mold or product
469 ...Utilizing electric arc or electron beam melting
470 ....Electric arc melting with slag or flux
471 ...Utilizing induction heating
472 ...Including lubricating of mold surface
473 ...Incorporating additional material or chemically reactive agent
474 ...Utilizing a vacuum
475 ...With inert or reducing gaseous atmosphere
476 ...With metal working
477 ...With diverse treatment
478 ...Having mold or product vibration or reciprocation
479 ...Having continuously advancing shaping surface
480 ....Utilizing roll couple mold
481 ....Utilizing endless plural belts
482 ....Utilizing wheel-band mold
483 ...Starting up or ending casting process
484 ...Specific product withdrawal
485 ...Specific mold or product cooling
486 ....Directly applying liquid coolant to product
487 .....Direct chill casting
488 ...Specific molten metal dispensing
489 ....Including flow stream deflection or other than vertical dispensing
490 .....Dispensing into horizontal mold
491 ...Adjusting mold size
48 ..Direct application of electrical or wave energy to work
492 ...To electrically heat work material
493 ....By electrical induction
494 ....By electron beam
495 ....By arc discharge
496 .....Composite article forming
497 .....With application of slag or flux
498 ...Utilizing magnetic energy
499 ....For stirring molten metal
500 ....In transporting molten metal
501 ...Utilizing sonic or supersonic wave energy

	PROCESS
	.Shaping liquid metal against a forming surface
53	..In situ reactive heating
54	...Composite article forming
55.1	..Incorporating addition or chemically reactive agent to metal casting material
56.1	...To scavenge
57.1	...Adding metal-containing material
58.1	....To produce casting having nonhomogenous composition
59.1	.....Utilizing preform body
61	..Utilizing a vacuum
62	...Applying diverse pressure
63	...To transport casting material to mold (e.g., vacuum forming, etc.)
65	...During introduction to metal
66.1	..Applying an inert or reducing gaseous atmosphere to work
67.1	...Atmosphere effected by chemical reaction
68.1	...While melting casting material
69.1	..With step of subdividing or removing material from product or preform (e.g., cutting, mechanically or by heat; sandblasting; chemical milling; etc.)
70.1	...With product trimming, cutting, or breaking prior to removal from mold
71.1	..With vibratory treatment of casting material
72	..Coating mold surface with a treating agent
74	...Gas producing coating
75	..With coating of preformed workpiece
76.1	..Combined
77	..Slush casting type
78	..Incorporating product dividing member
79	..Employing a pore producing agent
80	..Casting metal introduced into mold as a solid
81	..Utilizing a liquid shaping surface
90	..Forming product having interconnected movable parts
91	..Composite article forming
92.1	...Repairing or restoring article for use
93	...Co-molding diverse metals utilizing removable or fusible partition
94	...Sequential casting to form single product
95	....Different metals
96	.....Metals simultaneously molten
97	...Incorporating particulate material
98	...Shaping metal and uniting to a preform
99	....Co-molding diverse metals
100	....Including preconditioning preform
101	.....Chemical treatment
102	......By fluxing
103	.....Preheating
104	......Utilizing a liquid heat transfer agent
105	......Of preform in mold
106	....Cast metal reshapes preform
107	....Preform utilized to affect cast metal (e.g., to chill, to cap, etc.)
108	....Uniting plural preforms or spaced preform portions
109	.....Stacked planar lamina preforms
110	.....Discrete contacting preforms
111	....Preform particularly provided with means to provide interlock with cast metal
112	....Positioning or maintaining position of preform relative to mold surface
113	..Pressure forming
114	...By centrifugal force
115	....Plural constant speeds
116	....Tilting of axis of rotation
117	....Axially progressive casting
118	....Positive heating or cooling of mold
119	...By direct fluid pressure
120	...Pressure applied after introduction of metal
121	..Preconditioning of apparatus
122	..Controlling solidification (other than ambient cooling)
122.1	...Unidirectional solidification
122.2	....Single crystal formation
123	...By application of insulation to melt surface
124	...By direct application of flame or gas
125	...Localized or zone heat dissipation
126	....By utilizing a cooling liquid
127	....By utilizing a chill member
128	...By utilizing a cooling liquid
129	..Forming plural articles
130	...Sequentially
131	..Removing article from forming surface
132	...Core removal
133	..Introduction control or manipulation of charge
134	...Separation of unwanted component from melt
135	...Charge introduced as a plurality of streams
136	...By movement of mold, charger, or part thereof
137	..Assembling of mold parts
138	..Utilizing particular shaping surface material
139	APPARATUS FOR CASTING PRINTING PLATES (E.G., STEROTYPE, ETC.)
140	.Including means for severing or trimming product while associated with mold
141	.Including melting chamber
142	..Having valved gate
143	..Having pressure changing means
144	.Including positive mold heating or cooling means
145	.Including stripping means
146	INCLUDING MEANS TO DIRECTLY APPLY MAGNETIC FORCE TO WORK OR TO MANIPULATE OR HOLD SHAPING MEANS
147.1	.By electromagnetic means
502	..In continuous casting apparatus
503	...Electromagnetic mold
504	...Electromagnetic stirring means
148.1	..For holding or assembling shaping parts
149	MEANS LUBRICATING RELATIVELY MOVING AND CONTACTING APPARATUS PARTS
150	WITH SIGNAL, INDICATOR OR INSPECTION MEANS
151	.Pressure indicating means
152	WITH SAFETY CONTROL MEANS
153	.Apparatus safety means
154	CONTROL MEANS RESPONSIVE TO OR ACTUATED BY MEANS SENSING OR DETECTING A CONDITION OR VARIABLE (AUTOMATIC CONTROL)
155	.Control of feed material enroute to shaping area
449	..Responsive to material level in continuous casting apparatus
450	...Including electrode or float sensor
156	..Including electrode or float sensor responsive to material level

CONTROL MEANS RESPONSIVE TO OR ACTUATED BY MEANS SENSING OR DETECTING A CONDITION OR VARIABLE (AUTOMATIC CONTROL)

413 .Control of product withdrawal means in continuous casting apparatus

414 .Control of coolant applied to continuously cast product

157 WITH CONTROL MEANS RESPONSIVE TO INDEPENDENT TIMING MEANS

158 WITH POSITIVE CLEANING MEANS FOR APPARATUS

159 MEANS TO SHAPE A FORMING SURFACE

160.1 .Including means applying vacuum directly to mold material

160.2 ..And means to apply consumable shielding film to shaping surface

161 .Including means for sweeping or cutting forming surface

162 ..Means for shaping sprues or risers

163 ..Including rotating core bar

164 ..Rotatable pattern

165 .Shell type mold making machine

166 ..Including plural distinct forming stations

167 .And separate metal casting means

168 ..Including means for assembling shaped mold parts

169 .Including means for compacting particulate fluent mold materials

170 ..Flexible or deformable pressure means

171 ...Utilizing contiguous or independent diaphragms

172 ..Plural rammers

173 ...Fluid pressure actuated means

174 ..By die expressing

175 ..By centrifugal means

176 ..Pipe mold type forming means

177 ...By moving pattern to effect shaping

178 ....Rotating

179 .....Bead forming type

180 ..Having means for withdrawing forming surface from shaping means

181 ...Withdrawing station downstream of compacting station

182 ...Means withdrawing pattern plate intermediate cope and drag member

183 ...Having means for inverting pattern, flask, or shaping member

184 ....Means rotating press head and mold support

185 ....Rock-over type machine

186 ...Core making machine

187 ...Pattern member acting as compressing member

188 ....Including stripping plate

189 ...Utilizing vibrating means

190 ...Stripping plate

191 ...Drop pattern plate or support

192 ..Including means for feeding material by gravity

193 ...Means for delivering measured charge

194 ...Distinct feeding and compacting stations

195 ..Diverse means for applying pressure forces

196 ...Vibrating and squeeze type

197 ....Integral vibrator and squeeze head

198 ..Sand slinger type compactor

199 ...With boom-mounted slinging means

200 ..Blow type compactor

201 ...Including means for relatively moving blow means into engagement with shaping member

202 ...Including foraminous blow discharge means

203 ..By vibrating means (e.g., jarring, jolting, etc.)

204 ...Including cooperating static rammer means

205 ...Roll or rock-over type machine

206 ...By fluid actuated vibrator means

207 ..Press type compactor

208 ...Roller compacting means

209 ...Having invertible table

210 ...Plunger coacting with successively presented molds

211 ...Including a swinging press head

212 ...Fluid pressure means reciprocating or oscillating mold shaping member

213 .Including means for separating forming surface from shaping means

214 ..Means effecting parallel draw of cope and pattern plate respectively from each other and the drag

215 ..Means rotatably withdrawing pattern

216 ...Screw thread pattern

217 ..Utilizing a stripping plate

218 ...Pattern withdrawn vertically downwardly

219 ....Means effecting parallel motion

220 ....Including a mold material supporting stool

221 ....By lever and link

222 ..Including pattern having relatively moving parts

223 ..By vibrating means

224 ..Having means to invert flask or pattern

225 ..By drop pattern plate or support

226 ..By pin lifting arrangement for contacting mold

227 ..Means for displacing mold part from stationary shaping member

228 .Means for shaping core (e.g., core boxes, core molds, etc.)

229 ..Including character forming member (indicia)

230 ..Including means positioning preform part for forming composite core member

231 ...Preform part to be incorporated in cast product

232 ..Detachable or movable member for producing a recess or cavity in core member

233 ..Hinged core box sections

234 ..Including vent or vent forming means

235 .Pattern

236 ..Insert or chill supporting

237 ..Including flask member

238 ...Pattern or pattern holding member supported by aperture in flask or flask member

239 ...Pattern plate

240 ....Rotatable or pivotal pattern plate

241 ..Pattern plate

242 ...Gated pattern

243 ...Pattern mounted on both sides of plate

244 ..Sprue, gate or runner

245 ..To produce undercut

246 ...Destructible type pattern

247 ...Rotatable or pivotal pattern or pattern section

248 ...Loose piece type

249 ..Composite or plural part

250.1 MEANS TO DIRECTLY APPLY ELECTRICAL OR WAVE ENERGY TO WORK

505 .In continuous casting apparatus

506 ..Electron beam melting means

507 ..Induction heating means

508 ..Arc electrode melting means

509 ...Electroslag remelting type apparatus

510 .Electrical discharge knockout means

511 .High frequency vibration means

MEANS TO DIRECTLY APPLY ELECTRICAL OR WAVE ENERGY TO WORK
512 .Electron beam melting means
513 .Induction coil means
514 .Arc electrode
515 ..Electroslag remelting type apparatus
253 MEANS TO APPLY VACUUM DIRECTLY TO WORK OR TO HOLD OR MANIPULATE SHAPING MEANS
254 .Means applying vacuum or suction directly to molten casting material
255 ..Through porous mold body
256 ..Enclosed system including a receptacle and mold
257 ...Vacuum or suction means for feeding molten metal into charging chamber receptacle
258 ...Including melting chamber receptacle
259 MEANS PROVIDING INERT OR REDUCING ATMOSPHERE
415 .In continuous casting apparatus
260 INCLUDING VIBRATOR MEANS
416 .In continuous casting mold
261 .Fluid pressure type
262 WITH PRODUCT SEVERING OR TRIMMING MEANS
263 .Associated with continuous casting means
264 .Gate member acting as severing means
265 .Punch out type gate severing means
266 WITH METAL REFINING MEANS
267 WITH COATING MEANS
268 .Associated with a continous or semicontinous casting means
269 WITH MEANS FOR HANDLING EXPELLED CAST PRODUCT
270.1 COMBINED
417 .Including continuous casting apparatus
271 MEANS TO SHAPE METALLIC MATERIAL
272 .Metal revolving or tumbling type shaping means
418 .Continuous or semicontinuous casting
419 ..Including means to convey preformed product part to mold
420 ..Plural distinct shaping outlets
421 ..Hollow casting
422 ...Rotary mold
423 ..Filament or wire casting
424 ..Including shape-perfecting means
425 ..Including starter bar
426 ...Disconnectable
427 ..Continuously advancing mold part
428 ...Roll couple mold
429 ...Endless shaping means
430 ....Articulated segments (e.g., caterpiller type, etc.)
431 .....With plural belts of flexible material
432 ....Plural belts of flexible material
433 ....Casting wheel and flexible band
434 .....With dispensing feature
435 ..Having deformable mold wall or thermal expansion compensating means
436 ..Adjustable mold size
437 ..Including means to dispense or distribute metal charge
438 ...Movable dispenser
439 ...Mold contiguous wth or within dispenser
440 ....Dispensing into horizontal mold
441 ..Including product supporting or withdrawal means
442 ...Roller
443 ..Having casting material cooling means
444 ...Direct cooling of material
284 .Pressure shaping means
285 ..Including a pressure gas or pressure vapor generator
286 ..Centrifugal casting means
287 ...Having balancing means
288 ...Including means to hold or position preformed product part
289 ...Having mold radially disposed from axis of rotation
290 ....Plural mold cavities
291 ...Having mold expansion or warpage compensator
292 ...Having mold or mold part clamping means
293 ....Centrifugally actuatable
294 ....Including brake means
295 ...Including means to remove product from mold
296 ...Having plural mold cavities
297 ...Having coolant applying means
298 ...Horizontal or near horizontal axis of mold rotation
299 ....Including axial feeding trough
300 .....Rotatable around axis
301 .....Movable along axis during feeding
302 ..Including core means
303 ..Injection type
304 ...Including valved mold gate
305 ...Including means to vent die cavity or gate
306 ...Direct pneumatic charging means
307 ....Manually operated pressure generator
308 ....Flask sealing cap contains a pressure conduit
309 ....Hot chamber type
310 .....Including means to segregate a charge
311 ......Front loading nozzle
312 ...Piston-cylinder charger
313 ....Opposed piston injector
314 ....Hydraulic piston pressure means
315 .....Having multi-way valve control unit
316 ....Hot chamber type
317 .....Piston contains injection conduit
318 .....Fluid actuated piston
319 ..Inelastic compression means for confined metal
320 ...Core or internal compression member
321 ...Fluid pressure actuated
322 .Plural independent molds
323 ..Including mold translocating means
324 ...Endless serial mold circuit
325 ....Rotating table or wheel type translocating means
326 .....Having a vertical axis of rotation
327 ......Mold have separable part
328 ....Including cam means to control assembly or disassembly of parts
329 ....Chain conveyor
330 .....Molds having separable parts
331 .....Including mechanical ejector for product
332 .Including means to hold or position preformed product part in shaping area
333 ..Means for positioning plural preforms
334 ..Means other than mold surface supports preform
335 .Including ladle or crucible type melt receptacle
336 ..Rotatable with mold or dipper type dispenser
337 ..Having flow control or conduit means intermediate the receptacle and mold
338.1 .Including means to heat mold
338.2 ..In situ chemical reactive heating means
339 .Including means to assemble mold parts
340 ..Core positioning means
341 ..Having auxiliary means for locking assembled parts in place
342 ..Permanent mold parts

	MEANS TO SHAPE METALLIC MATERIAL
	.Including means to assemble mold parts
	..Permanent mold parts
343	...Fluid pressure means actuator
344	.Including means to eject or separate product from shaping surface
345	..Means to remove core
346	...Sectional or plural part core
347	..Utilizing ejector pin means
348	.Including means to apply coolant to mold or casting
349	.United particle type shaping surface (e.g., sand, etc.)
350	..Mold having individual mold cavities for forming plural products
351	...Including core in at least one cavity
352	..Including metal chill
353	...As part of shaping surface
354	....Chill is a core or core part
355	....Plural spaced chill sections
356	....Hollow annular center section chill (i.e., ring)
357	...Consumable chill
358	..Including apertured strainer means for separating unwanted component from casting material
359	..Including means to compensate for shrinkage (e.g., shrink head, etc.)
360	...Blind riser
361	..Shell type mold
362	..Having means to restrict turbulence of flow during casting
363	..Bottom gate or side pouring mold
364	..Comprised of separable parts
365	...Including a core
366	....Having embedded sand reinforcing, aligning, or supporting component
367	.....Hollow component
368	....Plural cores or core having plural parts
369	..Core
370	...Having integral alignment means
371	.Chill, shaping type
372	..Vented
373	..Circular
374	FLASK OR FLASK SECTION
375	.Including roll or rock-over means
376	.Investment type (e.g., dental, etc.)
377	.Size adjustable
378	..Height adjustable
379	.Including means to retain or reinforce mold sand or to position reinforcement
380	..Sand strip
381	...Mechanically retractable
382	..Depending reinforcement (e.g., gagger, etc.)
383	..Flask wall surface construction retains sand
384	.Plural part flask or flask section
385	..Including guide means to align superposed flask sections
386	...Including locking means to prevent vertical displacement
387	...Within and surrounded by flask wall
388	...Guide means is adjustable or elastic
389	....Resilient or flexible guide means
390	....By bolt movable in a slot
391	...Hinged type superposed sections
392	..Having separable sides (e.g., snap-type, etc.)
393	...At least one side joint hinged
394	MOLD JACKET OR SLIP BOX
395	.Having size adjustment feature
396	..Self adjusting type
397	CORE CENTERING OR SUPPORTING MEANS
398	.Chaplet
399	..Having anchor means
400	.Collapsible or knock down type core bar
401	STRIPPER OR EJECTOR
402	.Including means for inverting pattern
403	.Fluid actuated pattern stripping means
404	.Means to separate cast product from shaping surface
405	..Ingot strippers
406	...By stripping pin projecting through bottom of mold
407	...Means moving mold vertically upwardly during stripping
408	....Fluid pressure type stripper
409	MEANS TO INVERT A PATTERN PLATE OR A MOLD (E.G., TURN-OVER DEVICE, ETC.)
410	VENT OR VENT FORMING APPARATUS
411	REINFORCEMENT FOR MOLD MATERIAL
445	STARTER BAR
446	.Disconnectable
447	PRODUCT-SUPPORTING OR WITHDRAWAL MEANS FOR CONTINUOUS CASTING APPARATUS
448	.Roller
412	MISCELLANEOUS, APPARATUS

CLASS 165 HEAT EXCHANGE

1 PROCESS
2 .Heating and cooling
3 ..Humidity adjusting
4 REGENERATOR
5 .Cleaning
6 .Movable heat storage mass with enclosure
7 ..With fluid handling system
8 ..Rotary heat collector
9 ...Seals
9.1 .Checker brick structure
9.2 ..Gradated flow area, heat capacity or heat resistance
9.3 ..Having gas supply or exhaust manifold structure
9.4 ..In casing
10 .Heat collector
11.1 WITH ALARM, INDICATOR, SIGNAL, REGISTER, RECORDER, TEST OR INSPECTION MEANS
11.2 .Remotely controlled inspection means
12 TIME OR PROGRAM ACTUATOR
13 AUTOMATIC CONTROL
14 .Heating and cooling
15 ..With cabin pressure control
16 ..With ventilation control
17 ..Defrosting
18 ..With control of heat storage
19 ..With gas and liquid contact fluid flow control
20 ...By humidity sensor
21 ..With humidity sensor controlling humidity
22 ..Correlation of plural zone controls and central system control
23 ..Responsive to vehicle body motion
24 ..With manual control
25 ...Manual selector modifies automatic control
26 ..Single sensor controls both heating and cooling
27 ..Selective heating or cooling
28 ...Room and ambient temperature sensors
29 ..Heat pump with supplemental heat source controlled
30 ..Opposed compensating heating and cooling
31 ..Pressure response or control
32 .Temperature or pressure
33 ..With correlated manual actuation
34 ..Branched flow of exchanging fluid
35 ...By-pass of heat exchanger
36 ....Mixture temperature sensing
37 .....With pressure response
38 ....Pressure controlled
39 ..Flow of one heat exchanging material controlled by the condition of another
40 ..Flow of heat exchanging material controlled by its own condition
41 WITH VEHICLE FEATURE
42 .Heating and cooling
43 ..Vehicle contained common power and heat supply
44 .Utilizing motion of vehicle
45 GEOGRAPHICAL
46 FLEXIBLE ENVELOPE OR COVER TYPE
47 STRUCTURAL INSTALLATION
48.1 .Heating and cooling
48.2 ..Solar
49 ..Radiant building panel
50 ..Room heat exchangers with central fluid supply
51 .Engine
52 ..Exchange between engine supply and exhaust lines
53 .Related to wall, floor or ceiling structure of a chamber
54 ..In a chamber connected passage traversing the structure
55 ..Projecting shield forms passage with the structure
56 ..Hollow or recess in the structure connected for exchange fluid flow
57 ...Ported to the chamber
58 HEATING AND COOLING
59 .With ventilation
60 .Gas-liquid contactor
61 .Heating and cooling of the same material
62 ..Refrigerating system conversion
63 ..Refrigeration producer
64 ..Heat generator
65 ..Heater and cooler serially arranged
66 ...Heat exchange between supply and exhaust lines
67 WITH EXTERNAL SUPPORT
68 .Legs
69 RESILIENT VIBRATION DAMPER ISOLATING EXCHANGER ELEMENT
70 WITH LEAKAGE COLLECTOR
71 WITH PURGE, OR DRAINAGE, COCK OR PLUG
72 COVERED ACCESS OPENING
73 .Cover is, or carries, heat exchanging means
74 ..Heat exchanging means projects into the covered chamber
75 .Heating or cooling means within the covered chamber
76 WITH REPAIR OR ASSEMBLY MEANS
77 .Hinge
78 .Guide
79 .Positioner or retainer for settable material
80.1 WITH RETAINER FOR REMOVABLE ARTICLE
80.2 .Electrical component
80.3 ..Air cooled, including fins
80.4 ..Liquid cooled
80.5 .Including liquid heat exchange medium
81 EXPANSION AND CONTRACTION RELIEVING OR ABSORBING MEANS
82 .Relieving or absorbing means supports temperature modifier in heat exchanger
83 ..Flexible fluid confining wall
84 WITH MEANS FLEXING, JARRING OR VIBRATING HEAT EXCHANGE SURFACE
85 AGITATOR OR IMPELLER MOTOR OPERATED BY EXCHANGE FLUID
86 MOVABLE HEATING OR COOLING SURFACE
87 .Hollow screw type impeller
88 .Rotor carrying separate chambers for two exchanging fluents
89 .Rotary drum
90 ..With means applying fluids for exchange through drum wall
91 ...With drum surface scraper
92 .Hollow strirrer or scraper
93 ..Material advancer in shelf to shelf device
94 WITH SCRAPER REMOVING PRODUCT FROM TEMPERATURE MODIFYING SURFACE
95 WITH CLEANING MEANS FOR HEAT EXCHANGER
96 WITH ADJUSTOR FOR HEAT, OR EXCHANGE MATERIAL, FLOW
97 .Flow reversed or crossed within temperature modifying zone
98 .Adjustable radiator face covering means
99 ..Discharge grille or diffuser
100 .Branched flow
101 ..Controls flow through parallel heating or cooling means
102 ..Tortuous and straight through branches within heating or cooling drum
103 ..By pass of heating or cooling means

104.11	INTERMEDIATE FLUENT HEAT EXCHANGE MATERIAL RECEIVING AND DISCHARGING HEAT
104.12	.Reversible chemical reaction
104.13	.Plural intermediate fluent heat exchange materials
104.14	..Always out of direct contact with each other
104.15	.Solid fluent heat exchange material
104.16	..Fluidized bed
104.17	..Utilizing change of state
104.18	..Including means to move heat exchange material
104.19	.Liquid fluent heat exchange material
104.21	..Utilizing change of state
104.22	...Including means to move heat exchange material in liquid state
104.23	....By direct application of electrical energy to heat exchange material
104.24	....By application of heat other than in heat receiving area
104.25	....By application of mechanical energy
104.26	...Utilizing capillary attraction
104.27	...With pressurizing means or degassifying means
104.28	..Including means to move heat exchange material
104.29	...Utilizing formed bubble
104.31	...By application of mechanical energy
104.32	..With pressurizing means or degassifying means
104.33	..Cooling electrical device
104.34	.Including means to move gaseous heat exchange material
108	RECIRCULATION
109.1	WITH AGITATING OR STIRRING STRUCTURE
110	WITH FIRST FLUID HOLDER OR COLLECTOR OPEN TO SECOND FLUID
111	.Separate external discharge port for each fluid
112	..With downstream pressure or temperature modifier
113	...Surface-type heat exchanger
114	..With baffle at inlet to less dense fluid discharge port
115	.Trickler
116	..Shelf to shelf
117	..Pipe exterior to pipe exterior
118	..Vertical cone or drum
119	WITH SOLIDS SEPARATOR FOR EXCHANGE FLUID
120	WITH IMPELLER OR CONVEYOR MOVING EXCHANGE MATERIAL
121	.Mechanical gas pump
122	..Heating or cooling means and gas pump in housing
123	...With injector-type gas pump
124	...Verging gas flow
125	....Radial flow through annular heating or cooling means
126	....Single inlet, plural outlets
127	.....Gas pump for each outlet stream
128	THERMOSYPHONIC FLUE TYPE
129	.Heating or cooling means within distinct flue forming enclosure
130	.Flue formed between facing second fluid containing conduits
131	.Flues formed by vertical corrugations of heat transmitter
132	HEATING OR COOLING MEANS IN OPEN COMMUNICATION WITH RESERVOIR
133	WITH COATED, ROUGHENED OR POLISHED SURFACE
134.1	WITH PROTECTOR OR PROTECTIVE AGENT
135	WITH THERMAL OR ACOUSTICAL BLOCKER
136	.Insulation and temperature modifier within barrier member
137	CONVERTIBLE
138	COMBINED
139	INTERNALLY BRANCHED FLOW, EXTERNALLY PORTED
140	THREE NON-COMMUNICATING FLUIDS
141	.Concentric flow chambers
142	SPUR TUBE PROJECTS INTO ENCLOSURE
143	PLURAL CASING-CONDUIT UNITS< LINE OR COMMON HEADER CONNECTED
144	LINE CONNECTED CONDUIT ASSEMBLIES
145	.In common casing
146	GRADATED HEAT TRANSFER STRUCTURE
147	.Tapered conduit means
148	RADIATOR CORE TYPE
149	.With edge cover or frame means
150	.Serially connected tube sections
151	.Side-by-side tubes traversing fin means
152	.Deformed sheet forms passages between side-by-side tube means
153	..With tube manifold
154	NON-COMMUNICATING COAXIAL ENCLOSURES
155	.With communicating coaxial enclosure
156	.Helical conduit means
157	CASING OR TANK ENCLOSED CONDUIT ASSEMBLY
158	.Manifold formed by casing section and tube sheet of assembly
159	.With distinct flow director in casing
160	..Longitudinal
161	...Additional transverse baffle
162	.With support in casing
163	.Conduit coiled within casing
164	FLOW PASSAGES FOR TWO CONFINED FLUIDS
165	.Interdigitated plural first and plural second fluid passages
166	..Stacked plates or shells form interplate passages
167	...With plate traversing passages interconnecting alternate spaces
168	CONDUIT WITHIN, OR CONFORMING TO, PANEL OR WALL STRUCTURE
169	.Wall forms enclosure
170	.Opposed plates or shells
171	.Means spanning side-by-side tube elements
172	SIDE-BY-SIDE TUBULAR STRUCTURES OR TUBE SECTIONS
173	.With manifold type header or header plate
174	..With internal flow director
175	..Inlet and outlet header means
176	...Side by side
177	TUBULAR STRUCTURE
178	.With support or flow connector
179	.Projecting internal and external heat transfer means
180	.Diverse materials
181	.With discrete heat transfer means
182	..With means spacing fins on structure
183	..Longitudinal extending
184	...Helical
185	HEAT TRANSMITTER
186	MISCELLANEOUS

366	.Multiple wells
367	.Riser
368	.Wellhead
244.1	PROCESSES
245	.Specific pattern of plural wells
246	.Using microorganisms
247	.Nuclear energy or radioactivity for treating
248	.Electric current or electrical wave energy through earth for treating
249	.Vibrating the earth or material in or being placed in the earth pores
250	.With indicating, testing, measuring or locating
251	..Including in situ combustion
252	..Including production of earth fluid by driving fluid
253	..Indicating the location, presence or absence of cement
254	..Determining position of earth zone
255	..Determining position of object in well
256	.In situ combustion
257	..Injecting while producing by in situ combustion from same well
258	..Plural distinct superimposed formations
259	..Including fracturing or attacking formation
260	..Injecting specific fuel or catalyst for burning into formation
261	..Injecting specific material other than oxygen into formation
262	..Solid fuel or particles in well
263	.Cyclic operation of plural wells
264	.Sampling well fluid
265	.Separating material leaving well
266	..Injection and producing wells
267	..Separating outside of well
268	.Injection and producing wells
269	..Fluid injected from longitudinally spaced locations in injection well
270	..Introduced materials chemically inter-react in formation pores or surfactant produced in situ
271	..Including fracturing or attacking formation
272	..Including heating
273	..Three or more separate fluids injected
274	..Two separate fluids injected
275	..Injected fluid comprises water and material other than inorganic gas
276	.Providing porous mass of adhered filter material in well
277	.Repairing object in well
278	.Graveling or filter forming
279	.Material placed in pores of formation to treat resident fluid flowing into well
280	.Specific propping feature for a fracture
281	.Separate steps of (1) cementing, plugging or consolidating and (2) fracturing or attacking formation
282	.Specific low fluid loss feature for fluid attacking formation
283	.Specific low fluid loss feature for fracturing fluid or cement causes fracture
284	.Fluid flow causes pellet to block opening in wall of conduit
285	.Cementing, plugging or consolidating
286	..Tamping, vibrating, exploding or using receptacle
287	..Removable molding or forming means
288	..Including heating
289	..Discharging cement from casing at different levels
290	..By tubing which is subsequently lifted
291	..With piston separator
292	..Using specific materials
293	...Cement or consolidating material contains inorganic water settable and organic ingredients
294	...Cement or consolidating material is organic or has organic ingredient
295	....Organic material is resin or resinous
296	.Preventing flow into strainer while lowering by blocking openings
297	.Perforating, weakening, bending or separating pipe at an unprepared point
298	..Perforating, weakening or separating by mechanical means or abrasive fluid
299	.With explosion or breaking container to implode
300	.Chemical inter-reaction of introduced materials
301	.Freeing stuck object, grappling or fishing in well
302	.Heating, cooling or insulating
303	..Placing preheated fluid into formation
304	.Dissolving or preventing formation of solid oil deposit
305.1	.Placing fluid into or fracturing the formation
306	..Fluid enters and leaves well at spaced zones
307	..Attacking formation
308	..Fracturing
309	.Producing foam or gas in well by foaming or gas producing material

	PROCESSES
310	.Entraining or incorporating treating material in flowing earth fluid
311	.Cleaning or unloading well
312	..Liquid introduced from well top
313	.Parallel string or multiple completion well
369	.Producing the well
370	..Including varying downhole pressure
371	..Including non-expulsive material placed in well
372	..By fluid lift
373	.Operating valve, closure, or changeable restrictor in a well
374	..Operated by fluid pressure controlled above ground
375	...By auxilliary fluid control line
376	.Destroying or dissolving well part
377	.Disassembling well part
378	.Assembling well part
379	..Above ground parts
380	..Conduit
381	.Placing or shifting well part
382	..Providing support for well part (e.g., hanger or anchor)
383	..By fluid driven piston
384	..With bending of tubing
385	..Flexible cable or wire
386	..Fluid flow control member (e.g., plug or valve)
387	..With sealing feature (e.g., packer)
50	WELLS WITH LATERAL CONDUITS
51	MEANS FOR FORMING FILTER BEDS (E.G., GRAVEL PLACING)
52	PLURAL WELLS
53	AUTOMATIC
54	.Float controlled valve
54.1	WITH MEANS FOR SEPARATELY PUMPING FROM PLURAL SOURCES IN WELL
54.5	MEANS FOR CUTTING CABLE OR ROPE BELOW GROUND
54.6	.Cutting means actuated by contacting element suspended in well by cable or rope
55	MEANS FOR PERFORATING, WEAKENING, BENDING OR SEPARATING PIPE AT AN UNPREPARED POINT
55.1	.With disparate below ground feature
55.2	.Perforating or splitting cutter
55.3	..Wedge or cam actuated
55.6	.Cutter rotates circumferentially of pipe
55.7	..Internal
55.8	...Tool moved radially by fluid pressure
56	SCREEN AND OUTSIDE CLEANING PIPE
57	WITH HEATING, REFRIGERATING OR HEAT INSULATING MEANS
58	.Fuel supply or hot billet in well
59	.Burner in well
60	.Electrical heater in well
61	.Heater surrounding production tube
62	.With eduction pump or plunger in well
63	WITH EXPLOSIVE OR GAS GENERATING MEANS IN WELL
64	WITH TIME OR DISTANCE MEASURING, TEMPERATURE RESPONSIVE OR COUNTING MEANS
65.1	WITH ELECTRICAL MEANS
66	.Indicating
66.4	.Electrical motor (e.g., solenoid actuator)
66.5	.Magnetic
67	WITH BELOW AND ABOVE GROUND MODIFICATION
68	.Eduction pump or plunger in well
68.5	..With above ground (1) motor carried by casing or casing support or (2) well fluid pump
69	.With receptacle for insertion into well
70	.Head for tool, piston or cleaner (e.g., cement head)
71	.With above ground casing sinking means
72	.Above ground actuating means for below ground device
73	..Tubing or casing actuated
74	.With below ground screen
75.1	ABOVEGROUND APPARATUS
76	.Convertible
77	.Forcing tubing or cable into an existing well
77.5	.With means facilitating connecting or disconnecting tubing or rod sections
78	.With tube rotating means
79	.With transporting means or unconnected cap
80	.Retractable pipe section extending through valve
81	.Fluid catcher around pipe coupling
82	.Releasable seal or cleaner for inner member
83	..Radially inwardly releasable latches
84	.With seal for reciprocating member
85	.With assembly or disassembly means (e.g., handling, guiding or tool feature)
86	.Inner member anchor or seal with valve
87	..Axially movable valve
88	.Inner member anchor or seal with lateral port
89	..Plural inner pipes
90	.With nozzle for inserting fluid
91	.With flow restrictors (e.g., chokes or beans)
92	.Cap or head pivoted to tube or casing
93	.Split cap or head
94	.Laterally adjustable cap or head
95	.Central valve or closure and lateral port
96	.External anchoring or bracing means
97	.With valve on cap or head
97.5	.Parallel pipes extending along distinct paths through wellhead
98	GRAPPLE AND WELL ANCHORED LIFTING MEANS
99	WITH JUNK RETRIEVING MEANS
100	LATERAL PROBE OR PORT SEALED AGAINST WELL WALL
101	PACKER OR PLUG AND PUMP OR PLUNGER MEANS EXERTING OUTWARD PRESSURE
102	CONVERTIBLE
104	WITH MOTOR FOR ROTARY OR OSCILLATING MOTION
105	WITH EDUCTION PUMP OR PLUNGER
105.1	.Having sediment trap or deflector
105.2	..Carried by reciprocating plunger or plunger rod
105.3	..Sediment trap formed in pumping chamber
105.4	..In pump discharge flow path
105.5	.Having liquid-gas separator
105.6	..Gas fed to entrainment type pump
106	.With packer or plug
107	.Receptacles
108	..Piston actuates foot valve
109	..Telescoping
110	..Lateral port always below piston and used in well
111	..Bail engaging piston rod
112	.With leak means
113	COMBINED (E.G., WITH NON-ELECTRICAL INDICATING)
114	CENTRAL MEMBER WITH PRE-SET PACKER OR PLUG IN SAME CONDUIT
115	CENTRAL CHAMBER SEALED WITH RESPECT TO PREPOSITIONED MODIFIED SURROUNDING CONDUIT
116	.Surrounding conduit carries packer or plug

117	RECEPTACLE OR PART THEREOF LEFT IN WELL
117.5	MEANS FOR GUIDING INSERTABLE ELEMENT LATERALLY OF WELL AXIS (E.G., WHIPSTOCK)
117.6	.Secured in operative position by movable means engaging well conduit (e.g., anchor)
117.7	MEANS ANCHORED AGAINST ROTATION IN ONE CONDUIT SECTION FOR RELATIVELY ROTATING ANOTHER SECTION
118	PACKER OR PLUG WITH EXPANDING ANCHOR
119	.Relatively movable packers or plugs
120	.Anchor actuated by fluid pressure
121	..Pressure transmitted by cup type packer or plug seal
122	..Pressure transmitted by packer or plug expanded by confined fluid from central chamber, pump, or plunger
123	.With detachable setting means
124	..Screw threaded
125	..Radially movable latch
126	.With controllable passage between central chamber and space below packer
127	..Spaced packer or plug seals
128	..Passage controllable by movement of central chamber
129	.With controllable bypass outside central conduit
130	..Packer expanded by upper valve
131	.With controllable passage between central conduit and space above packer or plug
132	.Portion extends beyond end of surrounding conduit
133	.With controllable passage through packer
134	.Support and holddown expanding anchors
135	.Plug
136	.Spring set anchor
137	..Spring moves anchor slip relative to wedge or cam
138	.Wedge or cam and friction drag
139	..Threaded element rotated
140	..Anchor above packer or plug seal
141	PACKER OR PLUG SEALING PORTION CLOSES PORT BETWEEN CENTRAL PIPE AND OUTSIDE SPACE WHEN UNEXPANDED
142	PACKER WITH CONTROLLABLE PASSAGE BETWEEN CENTRAL CHAMBER AND SPACE BELOW PACKER
143	.Central conduit detachable
144	..Bottom supported casing or screen section
145	.Bypass closing and passage opening to upward flow contrained to occur simultaneously
146	.Passage connects with space below packers and continuously open passageway connects with space between packers
147	.Passage connects with space between packer or plug seals
148	.Upwardly biased check valve and means for opening or bypassing it
149	.With passageway between central chamber and space above packer
150	..Passageway controllable by movement of central chamber
151	..Passageway valve directly responsive to fluid pressure
152	.Passage controllable by movement of central chamber
153	PISTONS, FLUID DRIVEN INTO WELL (E.G., CEMENTING PLUGS)
154	.Surrounding conduit valve or closure opened by piston
155	.With downflow past piston
156	.With stop
157	SCREEN WITH WASHING POINT OR SHOE
158	.Detachable wash pipe
162	RECEPTACLES
163	.With separate air chamber having openable passage
164	.With destroyable closure and valve
165	.With valved or closed top
166	.Valve control means contacting well conduit wall
167	.Bottom receiving and side discharge valves
168	.Readily releasable bottom valve
169	.Lateral ports used in well
170	BRUSHING, SCRAPING, CUTTING OR PUNCHING-TYPE CLEANERS
171	.Perforation cleaners
172	.Bow spring type
173	.On tubing or casing
174	.Retractable on support while lowering
175	.Reciprocable relative to central member extending from well top
176	.On sucker rod
177	AGITATING, WIPING, VIBRATING OR FRACTURING MEANS
178	WITH JAR MEANS FOR RELEASING STUCK PART
179	PACKERS OR PLUGS
180	.Adjustable over pipe or set over prepositioned pipe
181	.With detachable setting means
182	..Packer or plug locked expanded
183	.With controllable bypass outside central conduit
184	.With controllable passage between central conduit and space above packer or plug
185	.With central conduit and fluid port to space outside
186	..Port between sealing portions and bypass around
187	.Expanded by confined fluid from central chamber, pump or plunger
188	.Controllable passage through packer
189	.For non-concentric members
191	.Spaced sealing portions
192	.Plugs
193	..Free falling type (e.g., dropped ball)
194	...With sleeve valve
195	.Deformable portion engages conduit restriction
196	.Central support has shoulders expanding sealing portion, or telescopes
202	.Cup type
203	.Non-deformable type
205	SCREEN WITH VALVE, CLOSURE, CHANGEABLE RESTRICTOR OR PORTION REMOVABLE IN WELL
206	EXPANSIBLE ANCHOR OR CASING
207	.Expansible casing
208	.Liner hanger
209	.Set by wedge or cam at any point by drop only (e.g., tubing catcher)
210	..With friction drag for setting by turning movement also
211	..With spring
212	.Fluid pressure actuated
213	.Bowed anchor means
214	.Spring set
215	..Spring moves anchor slip relative to wedge or cam
216	.With wedge or cam and friction drag
217	.Expansible means translated by wedge or cam
222	WHIRLING OR LATERAL DISCHARGE OR PROJECTABLE NOZZLES
223	.Rotary or projectable
316	VALVES, CLOSURES OR CHANGEABLE RESTRICTORS
317	.Destructible element

VALVES, CLOSURES OR CHANGEABLE RESTRICTORS
318 .Operated by dropped element
319 .Fluid operated
320 ..Variably opened
321 ..Fluid pressure biased to open position position
322 ...Retrievable
323 ...Locked open or closed
324 ...With fluid pressure equalizing means
325 ..One way, e.g., check valve type
326 ...Flexible valve element
327 ...Shoes with check valve
328 ....Loose ball closure
329 ..Loose ball closure with limited reverse flow
330 .Rotated operator
331 ..Lug in branched slot, e.g., "J" slot
332 .Longitudinally movable operator
333 ..Contact with bore bottom
334 ..Vertical movement of conduit
227 SCREENS
228 .Porous material
229 .Inserted screen plug
230 .Woven mesh
231 .Spiral
232 ..With spacing lug for adjacent turns
233 ..With perforated pipe
234 .Strip or rod
235 .Stacked annular sections
236 .Concentric pipes
237 DETENTS OR CLUTCHES
238 .Flow permitting means bridging fluid conduit
239 .Operated by dropped weight
240 .Lug in closed branched slot
241 CENTERING OR FRICTION DRAG MEANS
242 CONDUIT WALL OR SHOE STRUCTURE ONLY
243 MISCELLANEOUS (E.G., ANCHOR PIPES)

CLASS 169 FIRE EXTINGUISHERS

DECEMBER 1990

43	PROCESSES
44	.With mixing of extinguishing compounds
45	.Of preventing fire
46	.Of extinguishing fire
47	..By projecting extinguishant directly onto seat of fire
48	APPARATUS WHICH ISOLATES FLAMES FROM NON-BURNING AREA
49	.With means to isolate fire from atmosphere and extinguish
50	..Acted upon by operator in use
51	MOUNT, CABINET OR GUARD
52	.Movable relative to fire
53	..On air-borne vehicle
24	..Fire engines
25	..Water towers
54	SPECIAL APPLICATIONS
55	.For railway car heaters
56	.Condition responsive control
57	..Having fusible plug, support, or holder
58	..Having frangible extinguishant holder
59	..Fusible cable
60	..Sensor, control and actuator
61	...Electrical control
62	.For vehicles
63	.For motion picture apparatus
64	.For mine
65	.For cooking installation
66	.For storage tank
67	..Extinguisher having transport or erection means
68	..With specific extinguishant applying means
69	.For oil or gas well
70	.With specific extinguishant applying means, or means for providing access to fire
5	FLUID SYSTEMS
6	.Chemical pressure generating
7	..Automatic
8	...Pressure controlled
9	.Gas-pressure discharge
10	.Gravity
11	.Gas
12	..Combustion products
13	.Pump supply
14	.Plural source, mixing in transit
15	..Stream impregnating
16	.Distributing systems
17	..Dry pipe
18	..Hand controls
19	AUTOMATIC VALVES
20	.Pressure controlled
21	..Lever system
22	..Differential area
23	ALARMS
26	AUTOMATIC RECEPTACLES
27	.Chemical mixing
28	.Explosive
29	.Mechanical discharge
30	PORTABLE VESSELS
71	.Gas pressure
72	..With means facilitating total discharge
73	...By collapsing chamber holding agent
74	..With particular outlet structure
75	..With means preventing accidental discharge, relieving pressure, or indicating condition within vessel
76	..With means permitting repeated discharge
77	..Power extinguishant
78	..Produced by chemical mixing
79	...Upon inversion of internal container
80	...Upon inversion of vessel
81	....Breaks reactant container
82	....Reactant container closure released by gravity
83	...Upon breaking internal container
84	..Produced by combustion
85	..Pressurizing agent stored apart from agent
86	...With means to prevent freezing of expanding gas
87	...Vessel inverted to release gas
88	...Lever or trigger operated to release gas
89	..Discharge head
33	.Piston discharge
34	.Buckets
35	.Tubes
36	.Grenades
37	SPRINKLER HEADS
90	.Shut off valve
38	.Collapsible strut
39	..Compound
40	.Lever
41	.Direct support

CLASS 171 UNEARTHING PLANTS OR BURIED OBJECTS

1 METHODS OF RECOVERING BURIED OBJECTS
2 PLURAL ALTERNATELY USABLE UNEARTHING UNITS
3 STABILIZING COLTER OR FIN
4 WITH ADDITIONAL EARTH OR PLANT ROLLING IMPLEMENT
5 WITH VERTICAL CUTTER FOR VEGETATION
6 WITH EARTH MARKER OR TRAILING EARTH CONDITIONER
7 PERIODIC DUMPING IN PILES
8 DRIVE TRIGGERED BY DESIRED OBJECT
9 SUPPORT OVERLOAD RELEASE AND RESET; DRIVE OVERLOAD RELIEF; OR AUTOMATIC CONTROL
10 WITH PRELIMINARY REMOVAL OR UNDESIRED EARTH MATERIAL
11 REMOVABLE OR ALTERNATE COLLECTION RECEPTACLES
12 WITH APPARATUS CLEANER IN NONRECOVERY ZONE OF UNEARTHING UNIT
13 WITH TOOTHED MOVING STRIPPER OR PICK-OFF FOR UNDESIRED OBJECT
14 RECOVERED OBJECT PASSES THROUGH SEPARATOR INTERSTICES
15 .Assorting by size
16 RAILROAD BALLAST REMOVAL AND ASSORTING OR SEPARATING
17 SEPARATION OR ORIENTATION BY FLUID CURRENT OR SUSPENSION
18 SEPARATION BY PHYSICAL CHARACTERISTICS
19 WITH RAKE OR LATERAL DEFLECTOR FOR GROUND CONTACTING RECOVERED OBJECTS
20 WITH MANUAL OPERATION STATION (E.G., TOPPING, SEPARATION INSPECTION)
21 HOLDING AND SEVERING PLANT PORTION IN SITU
22 .Plural level cutters
23 WITH SELECTIVE DELIVERY TO ALTERNATE LOCATIONS (E.G., BY-PASS)
24 WITH COMMINUTING OR MULTIPLE CUTTING OF RECOVERED PLANT PART
25 WITH CLEANING OF RECOVERED OBJECT BY BRUSHING OR WIPING
26 WITH ABOVE-GROUND MEANS FOR DETACHMENT OF PLANT PART
27 .Detachment by pulling, beating, shaking or crushing
28 ..By opposed rotary gripping elements
29 .Separate successive topping stations
30 .By non-driven rotatable cutter (e.g., rolling)
31 .Conveyer feed to or from cutter
32 ..Cutter positioned by gauge
33 ..With driven gauge
34 ..With gauge
35 ...Moved into transverse horizontal position for cutting
36 ..Held by conveyer during cutting
37 ...With lateral disposal of cuttings
38 ...Opposed belt conveyers
39 ...Wheel-like conveyer
40 .With deflector or conveyer for detached plant part
41 .Moving topping cutter
42 ..Rotary or endless
43 COMBINED OR CONVERTIBLE
44 POWER MEANS TO SHIFT UNEARTHING UNIT PART
45 TRACTOR POWERED TRAILING UNEARTHING UNIT
46 UNEARTHING UNIT DETACHABLE FROM VEHICLE CHASSIS
47 UNEARTHING UNIT LATERALLY SHIFTABLE ON SUPPORT
48 SEPARATE DRAFT CONNECTIONS TO UNEARTHING UNIT AND UNEARTHING UNIT SUPPORT
49 MOVED OBJECT VOID FILLING OR EARTH HOLD DOWN
50 EXTRACTOR
51 .With agitator for extractor or extractor-carried object
52 .With movable stripper
53 .Plant impaling or snagging (e.g., roots or tops)
54 ..Retractible to strip
55 .Opposed plant engagers
56 ..Jaw means relatively movably mounted on carrier means
57 ..Screw
58 ..Disc or roller
59 ..Claw type
60 ..One a belt or belt carrier member
61 ...Opposed belts or belt carried members
62 .With digger or root cutter
63 STONE GATHERING AND/OR UNEARTHING BY IMPELLING ABOVE-GROUND PLANT OR OBJECT PORTION
64 .With underground stalk or root severing
65 .Impeller inclined to line of draft
66 GROUND ENGAGING CHAIN SEPARATORS
67 WITH PRELIMINARY DEFLECTOR FOR SURFACE MATERIAL
68 .Driven deflector
69 .Moving deflector
70 TRANSVERSELY MOVING SINGLE TINE ROW
71 PLOW OR BLADE CONTINGUOUS TO VIBRATING SEPARATOR
72 .With resilient support or drive connection
73 .Transversely curved or inclined separator
74 .With side walls or guides
75 .Plural separator sets of with articulated elements
76 ..Relatively moving interdigitated sets
77 .Non-circular rolling support for a separator
78 .Ground supported trailing separator
79 .Supported on longitudinally spaced links
80 .Swinging about longitudinal or inclined axis
81 .Shifting laterally
82 UNEARTHING UNIT ROCKING OR FULCRUMED ON GROUND
83 LEADING PLOW OR CUTTER WITH CONTIGUOUS, FIXED INCLINED SEPARATOR
84 SEPARATING DIGGER (E.G., VERTICAL COLLECTING TINES)
85 .Moving impeller with cooperating circular arcuate guide
86 .Movable on supporting frame (e.g., pivoted)
87 ..With ejector on digger or digger carrier
88 ..Plural cooperating moving diggers
89 ..Moving diggers with intercepting moving stripper or conveyer
90 ..Moving digger with intercepting stripper or chute
91 ..Moving digger carrier with relatively moving digger
92 ..Separator or collector within annular or endless digger
93 ..Rolling or coaxial with traction wheel
94 ..Carried by endless flexible member
95 ..Rotary
96 ...Conical digger portion
97 ...Horizontal axis (e.g., longitudinal axis)
98 ....Transverse axis
99 ..Cyclic
100 ..Pivoted about ground wheel axle
101 .Separating digger intercepted by moving conveyer or impeller
102 .Laterally deflecting diggers

SEPARATING DIGGER (E.G., VERTICAL COLLECTING TINES)
103 .Spaced, inclined shares or guides (pairs)
104 .Inclined lifting surfaces
105 ..Tines (e.g., forks)
106 ..Vertically stepped transverse elements
107 .Tooth or tine arrangements or details
108 TRACTION WHEEL DRIVE DETAILS FOR UNEARTHING UNIT PART
109 UNEARTHING UNIT OR VEHICULAR BREAK-FRAME
110 DIGGER AND MOVING CONVEYER UNIT ADJUSTABLE RELATIVE TO CHASSIS
111 EARTH REMOVAL AND SEPARATION
112 .Rolling screen or sieve (e.g., wheel or belt)
113 .Spiral conveyer for excavator or separator
114 .With impeller or clod breaker for excavator or separator
115 ..Transversely moving rotary member
116 ..Rotary
117 ..Endless belt type impeller or breaker
118 ...Opposed endless members
119 ...Excavator or separator within confines of endless impeller or breakers
120 ...Endless impeller or breaker above excavator or separator
121 ..Impeller or breaker driven through cyclic path
122 .Clod pulverizer outside separating zone
123 .Conveyer disposed below separator
124 .Moving conveyer, digger or separator
125 ..Rolling nonseparating elevator or conveyer
126 ..Moving open separator or separating conveyer
127 ...Compound motion (e.g., with agitator)
128 ...Rotary cylinder with radially extending separating elements
129 ...Rotary drum type
130 ...Plural, successive, endless belt type
131 ...Plural successive separators, one a belt
132 ...Moving screen or grate (e.g., shaker)
133 ...Relatively moving separator elements (e.g., rollers)
134 ..Moving digger and separate separator
135 .Separator formed in collector receptacle
136 .Digger and fixedly interconnected contiguous separator
137 WITH PROTECTIVE GUARD OR CASING
138 WITH MATERIAL REDIRECTING CONVEYER OR CHUTE
139 UNEARTHING UNIT FIXED ON VERTICALLY SHIFTABLE VEHICLE FRAME
140 UNEARTHING UNIT WITH GAUGE RUNNER OR WHEEL
141 LIFTING OR TILTING MEANS FOR UNEARTHING APPARATUS
142 DRIVE DETAILS (E.G., CLUTCH OR GEARING)
143 FRAMES AND/OR WHEELED CHASSIS
144 MISCELLANEOUS (E.G., HOPPER OR COLLECTOR)

DIG 1 Peanut digger

CLASS 172 EARTH WORKING

1	PROCESSES
2	AUTOMATIC POWER CONTROL
3	.Motive power control
4	.Constant depth type
4.5	.Land leveller type
5	.Obstruction sensing type (includes plant sensing)
6	..Electrical
7	.Draft responsive
8	..Variable rate responsive
9	..With manual actuator to select type of condition sensed
10	..Sensitivity adjustment
11	..With excess draft release
12	..Overload lift type
13	LAWN EDGER
14	.With or convertible to non-earth working implement
15	.Rolling or driven cutter
16	..With fixed cutter or furrower
17	.With wheel or roller
18	.Impact or grapple
19	SOD CUTTER
20	.With means for vertical transverse cutting while moving
21	LAWN AERATOR OR PERFORATOR, OR PLUG REMOVER
22	.Earth removing
23	DRIVEN FROM OR GUIDED BY STATIONARY OBJECT, OR ANCHORED
24	.Around tree or stake
25	.Rotatable about vertical axis
26	.Guided by surface track or previously formed shoulder
26.5	.Dragline scraper
26.6	..Scraper part rearranged upon reverse movement
27	WITH MEANS FOR CUTTING OR SHREDDING PLANTS WITHOUT SOIL DISTURBANCE
28	.Driven
29	WITH MEANS FOR SHIFTING SURFACE MATERIAL WITHOUT SOIL DISTURBANCE
30	.Driven shifting means
31	.Combined with rolling or vertically acting transverse cutter
32	WITH SEPARATING AFTER EARTH WORKING
33	WITH POWER DRIVEN MOLDBOARD, CONVEYER OR HANDLER
34	COMPLETE APPARATUS ADAPTED FOR USE UPSIDE DOWN
35	WITH DRIVE MEANS FOR TOOL OR CLEANER
36	.Subsurface shears or nippers
37	.Tool rotated by attendant
38	.With obstruction feeling device for moving or releasing implement
39	.With cleaner or comminutor spaced from ground surface
40	.Vibrating tool
41	.Attendant supported tool
42	.Guided by walking attendant
43	..With ground support vertically adjustable relative to frame
44	.Subsurface shaft or bar (e.g., rod weeder)
45	.Flails
46	.Coaxial tools oppositely rotated
47	.With specific relationship of mast-type hitch (i.e., three-point hitch) to implement
48	.Plural driven tools
49	..Contiguous cooperating or intermeshing rotary ground engaging tools
49.5	...Rotating about vertical axes
50	..Diverse tools
51	...All rotary
52	....Parallel axes
53	...Rectilinearly reciprocating tool
54	...Oscillating tool
54.5	..Tool reciprocates or oscillates within a generally horizontal plane
55	..Plural groups of disks
56	..Staggered tools
57	..Laterally spaced tools
58	...Longitudinal axes
59	...Vertical axes
60	...Transverse axes
61	.Intermittent drive for tool
62	..With spring return
63	.With non-driven tool (e.g., plow, harrow, drag, scraper, knife or roll, etc.)
64	..Non-driven furrow opener and driven dam former
65	..Interdigitating non-driven and driven tools
66	..Cooperating driven cleaner or comminutor and contiguous tool
67	..Driven comminutor at outlet of earth guide
68	..Rolling tool
69	...With tool drive from rolling tool
70	...Fore-and-aft non-driven tool
71	..Non-driven tool follows path of driven tool
72	...Leveling drag or furrow shaper
73	..Staggered driven and non-driven tool (e.g., cotton chopper, etc.)
74	.With power take-off from tool drive to adjust tool
75	.Interconnected tool lift and drive control
76	.Implement with ground support for depth control
77	..Vertically biased implement
78	..Vertically adjustable ground support
79	..Tool driven from prime mover on vehicle
80	.With wheel substitute (e.g., runner, etc.)
81	.With plant deflector or protector
82	.Driven tool selectively shiftable along line of travel
83	..Tool drive interrupted by shifting tool
84	.Simultaneously reciprocating and oscillating blade having elongated shank
85	..Transverse chopping type
86	...With plural cranks or cams driving each blade
87	...Means for varying contour of path of blade
88	..With plural cranks or cams driving each blade
89	..Means for varying contour of path of blade
90	.Irregular or off-center ground-engaging wheel or support
91	.Blade movable with respect to cyclically driven carrier
92	..With means for moving blade
93	...Rectilinearly reciprocating blade
94	...Blade oscillating arcuately or swivelly with respect to rotary carrier
95	...By cam or crank
96	..Blade flexible or with yieldable mount on carrier
97	.Compound motion for tool (e.g., reciprocating and oscillating, reciprocating and rotating)
98	.Tool mounted for lateral shifting
99	..About generally vertical axis
100	.Blade on endless driven belt or chain
101	.Tool guided for rectilinear reciprocation

	WITH DRIVE MEANS FOR TOOL OR CLEANER
	.Tool guided for rectilinear reciprocation
102	..Tool moves in horizontal, transverse path
103	.With overload relief or clutch in drive train (e.g., overload release, etc.)
104	..Unidirectional clutch in drive from ground wheel
105	.Driven from rolling or driven ground wheel
106	..Belt or chain drive
107	.Tool driven about horizontal, longitudinal axis
108	..Rotary driven tool
109	...Adjustable tooth or blade
110	.Tool driven about generally vertical axis (e.g., oscillating choppers, etc.)
111	..Rotary driven tool
112	.With deflector or shield for thrown material
113	..Laterally directed outlet flow
114	.Specific propelling means
115	..Tool steers implement
116	..Tool propels implement
117	.Tool freely or yieldably mounted on chassis
118	.Tool driven about axis transverse to draft line
119	..Screw or spiral rib, blade or tooth row
120	..Disk or planar cutter (e.g., saw, etc.)
121	..Laterally extending bar or blade with skeleton support (e.g., lawn mower type, etc.)
122	..Drum with teeth or blades
123	..Rotary driven tool
124	.Tool driven about diagonal axis
125	.Tool drive details
126	WITH EARTH MARKER
127	.Marker shiftable on turning
128	.Marker adjusted upon raising implement
129	.Ground wheel operated marker control
130	.Multiple interconnected markers
131	..Markers on laterally shiftable member
132	.Marker swingable about longitudinal axis to both sides
777	SCRAPER SUPPORTS NARROW DEPENDING TOOL
778	.Tool supporting clamp means engage upper and lower edges
779	SCRAPER POSITION AUTOMATICALLY CONTROLLED BY LINKAGE FOR LEVELLING
780	SCRAPER BETWEEN WIDELY SPACED FRONT AND REAR GROUND SUPPORTS
781	SCRAPER BETWEEN FRONT AND REAR GROUND SUPPORTS OF VEHICLE
782	.With laterally offset inclined shoulder forming tool
783	.With scraper attached ground support
784	.With diverse tool or portion
785	..Non-scraping tool precedes and spaced from scraper
786	.Plural scrapers
787	..Spaced and in same path
788	.Push frame for scrapers
789	.Actuator for bodily shifting scraper subframe draft connection
790	.Counterbalance means for scraper adjustment
791	.Three or more independently operable scraper actuators
792	..Scraper adjustable about vertical axis of annular support
793	...Actuator for laterally shifting support
794	.Spring biased into ground contact
795	.Specific actuator between frame and scraper
796	..For adjustment about vertical axis
797	..For adjustment about longitudinal axis
798	.Actuator for tilting wheel relative to vehicle frame
799	.Specific means for horizontally angling wheel relative to vehicle frame
799.5	TOWED SCRAPER WITH GROUND SUPPORT WHEELS
133	DIVERSE TOOLS
134	.One located in path of implement wheel
135	.One implement surrounds another
136	.Tools usable alternately only
137	.With means to vary spacing of tools upon turning
138	.With interconnected vertical adjustment
139	..Plow and colter
140	.With independent means for vertical movement
141	.Interconnected adjustment of horizontal angle of rolling and position of diverse tool
142	.Including spring formed tool or standard
143	.Including intermittently rolling tool
144	.Colter, jointer and plow
145	.Three or more diverse implements following same path (A, B, C, or A, B, A,)
146	..Four or more
147	...Alternately diverse (A, B, A, B)
148	..Longitudinally spaced like implements with intermediate diverse implement (A, B, A)
149	..Including rolling tool
150	...Smooth levelling roller
151	...Diverse rolling
152	.At least four alternately diverse laterally spaced tools (A, B, A, B)
153	..Alternate rolling and non-rolling
154	..All rolling
155	.Laterally spaced like tools with intermediate diverse tool (A, B, A)
156	..Spaced rolling with intermediate nonrolling
157	..Spaced non-rolling with intermediate rolling
158	..All rolling
159	..Spaced right and left hand tools with intermediate symmetrical tool
160	..Including spike tooth
161	.Including implement alternating for right or left hand operation
162	..Reversal of implement adjusts diverse tool
163	.Jointer and plow
164	..Rolling jointer
165	.Including colter
166	..Rolling colter
167	.Fixed point or share with rotary moldboard
168	.Rotating tool with fixed moldboard
169	.Including tool rotatable about vertical axis
170	.Including smooth levelling roller
171	..Spaced from moldboard side of plow
172	..With diverse rolling tool
173	..With teeth
174	.Rolling and non-rolling
175	..Following same path
176	...Furrowing or ridging implement followed by furrow or ridge roller
177	...Rolling tool has circumferentially spaced blades, tines or the like
178	...Including disk gang
179	...Non-rolling tool group with laterally co-extensive rolling tool

DIVERSE TOOLS
.Rolling and non-rolling
..Following same path
180 ...Rolling precedes non-rolling (same path)
181 ....Concave furrowing disk with trailing tool
182 ..Laterally spaced
183 ...With scissors or shearing action between adjacent faces
184 .Diverse rolling
185 ..Spaced on same axis of rotation
186 ..Plane and dished disks
187 ..Differing in size
188 .Runner attached
189 .Including fabric or flexible tool
190 .Including vertical, longitudinally oriented disc or blade (e.g., as stabilizer)
191 ..Plural
192 .Including horizontal knife or cutter
193 .First tool with spaced trailing sweep
194 ..Sweep adjustable
195 .Second implement follows path of first
196 ..Including subsoiler
197 ..Teeth and scraper, leveller or drag
198 ..Including teeth
199 ..Including drag, scraper or levelling blade
200 ...Proceeded by implement of different type
201 .Laterally spaced
202 ..Spaced from moldboard side of plow
203 ...Connected to moldboard or handle
204 ALTERNATING FOR RIGHT OR LEFT HAND OPERATION (OTHER THAN SCRAPER)
205 .Draft revoluble on transverse axis
206 .Interrelated tool shift and lateral movement of draft member
207 ..Draft member reversed
208 ..Draft member latch control
209 .Interrelated tool lift and shift
210 ..Mast type hitch
211 ..Lift by ground support manipulation
212 .Interrelated tool shift and ground support manipulation
213 .Tools oriented for movement in opposite directions
214 ..Wheeled frame with reversible draft member
215 ..Tilting beam
216 ..Pivoted about spaced transverse axes, or translated
217 ..With movable deflector
218 .Shiftable moldboard
219 .Tool shifted for opposite throw
220 ..Reversible disk with reversible cleaner
221 ..Plural tools shifted about individual vertical axes
222 ...With translational movement of axes
223 ..Moldboard type shiftable about longitudinal axis
224 .Axially rotatable implement
225 ..With actuator
226 ...Gearing
227 ....Chain or cable
228 .Parallel separate tools
229 ..Interconnected for simultaneous raising and lowering
230 ..Independently operable
231 ...Power derived from ground wheel
232 .Oblique axis in longitudinal vertical plane
233 WITH OBSTRUCTION FEELER FOR MOVING OR RELEASING IMPLEMENT TO AVOID OBSTRUCTION (INCLUDES DAM FORMER)
234 .Relatively movable
235 ..Latch releasing
236 GROUND ENGAGEABLE DRAFT RESPONSIVE LEVER
237 .Roll over type implement
238 GROUND SUPPORT MOVED VERTICALLY RELATIVE TO FRAME BY DRAFT MEANS
239 DRAFT, PITCH OR GROUND LEVEL RESPONSIVE DEPTH CONTROL
240 WITH GROUND SUPPORT ENGAGEABLE WITH GROUND FOR TRANSPORT ONLY
241 .Apparatus inverted to engage ground support with ground
242 .Implement tiltable on longitudinal axis
243 .Tool changeable to or replaced by ground support
244 .Tool and ground support moved together relative to frame
245 CONVERTIBLE; OR CHANGEABLE BY DISASSEMBLY OR ASSEMBLY
246 .To land vehicle with body
247 .To device classifiable in another class
248 .To different type of hitch
249 .Plural simultaneously usable tools to single tool
250 .Changeable by disassembly or assembly
251 ..Tool changeable to diverse tool
252 ...Tool plus added part forms diverse tool
253 ..Tool added or substracted
254 ..Tool rearranged on support structure
255 TURN LIFTS TOOL OFF OR LOWERS TOOL INTO GROUND
256 PROPULSION UNIT GUIDED BY WALKING ATTENDANT OR PART OF ARTICULATED VEHICLE
257 .Riding attendant
258 .Endless track or single driven wheel
259 .With vertically adjustable wheel
260 .With actuator for moving earth working element vertically
260.5 HAVING TOOL OVERLOAD SHIFT CONTROLLED BY A FLUID PRESSURE DEVICE
261 OVERLOAD SHIFTING
262 .Alternate tool brought into operation upon shift
263 .Actuator released
264 .Against spring return device
265 ..Swinging about fixed pivot axis
266 ...Including toggle linkage
267 ....Toggle adjustable
268 ....Toggle links at acute angle
269 .Resilient latch
270 .Friction lock
271 .Frangible lock (e.g., shear pin, etc.)
272 WITH MEANS TO FACILITATE MOUNTING OF IMPLEMENT ON MOTOR VEHICLE
273 .Tool forward of rear of motor vehicle
274 .Implement has ground support
275 .Self-coupling by horizontal movement
810 MOUNTING FOR PUSHED TOOL AT END OF MOTOR VEHICLE
811 .Transversely mounted blade (e.g., bulldozer, etc.)
812 ..With valve or pump for hydraulic control system
813 ..Fluid line specifically arranged, or shield for system component
814 ..Having means controlling drive for interconnected vehicles
815 ..Contiguous, relatively adjustable blades; or blade having relatively adjustable earth-engaging parts
816 ..Blade mounting includes resilient connection
817 ..Removable attachment for general purpose vehicle
818 ..Blade angle adjustable in a horizontal plane
819 ...Power-operated adjusting means

MOUNTING FOR PUSHED TOOL AT END OF MOTOR VEHICLE
.Transversely mounted blade (e.g., bulldozer, etc.)
..Blade angle adjustable in a horizontal plane
...Power-operated adjusting means
820 ....Blade angled about fixed, central, generally vertical axis
821 .....And tilt of blade adjustable in a generally vertical plane
822 ....And tilt of blade adjustable
823 ...And tilt of blade adjustable
824 ..Having adjustable tilt of angularly fixed blade
825 ...About a pivot axis fixed to mounting
826 ...Including adjustable length device between mounting means and upper corner portion of blade
827 ..Having means to prevent lateral movement of mounting or blade
828 ..With power means for raising and lowering blade
829 ...Including elongated flexible element (e.g., cable) connecting power means to tool or mounting means
830 ...Power means is fluid servomotor
831 ....Plural servomotors
832 ..With blade-carried ground support
833 .Tool prepares wheel path for passage of wheel
834 .With tool-carried ground support
278 WITH WHEEL STEERING OR ACTUATOR FOR HORIZONTALLY ANGLING WHEEL AXIS
279 .Implement part interconnected with motor vehicle steering means
280 ..Implement wheel steered
281 ..Transverse tool bar laterally shiftable
282 .Wheel on trailing implement responds to turning movement
283 ..Interconnected with adjustable tool
284 ..With additional angular adjustment of wheel
285 ..Rear wheel turned or controlled
286 .Wheel on non-propelled device
287 ..Wheel interconnected with tool
288 ..Plural interconnected relatively movable wheels
289 ...Transversely aligned stub shafts
290 ..Swinging axle
291 ..Wheel behind tool
292 SPECIFIC PROPELLING MEANS
293 SERIES OF LIKE ELEMENTS SEQUENTIALLY OPERATED BY POWER CYCLE
294 .Sequentially operated servo-motors
295 .Tool forward of rear of motor vehicle
296 .Shaft with spirally arranged projections
297 TOOL FORWARD OF REAR OF MOTOR VEHICLE
298 .With ground support
299 .Power actuator with cut-out or lock-out means
300 .With rearwardly mounted tool
301 ..Tools actuated by independent power units
302 ...Front and rear independent
303 .Power actuator with manual adjusting or supplemental manual actuating means
304 .Tools independently actuatable
305 .With means for moving tool laterally
306 .Connected to front axle
307 .Parallelogram type lift
308 .With push bar
309 .Pivoted on horizontal diagonal axis
310 PLURAL WHEELED IMPLEMENTS
311 .Outrigged implement adjustable inwardly
312 .Implement draft connection forwardly of rear of self-propelled vehicle
313 .Laterally spaced with separate draft tongues
314 .Implements in echelon (e.g., gang plows, etc.)
315 ACTUATOR ON TRAILING IMPLEMENT, CONTROLLED FROM PROPELLING VEHICLE
316 .Servo-motor on implement
317 ACTUATOR ON VEHICLE FOR RELATIVELY MOVING PARTS OF TRAILING IMPLEMENT
318 .Actuator on vehicle moves implement ground support vertically relative to implement frame
319 ..Interconnected means for moving hitch
320 .Disk gang angling
321 ACTUATOR ON VEHICLE FOR MOVING WHEELED IMPLEMENT
322 WITH ACTUATOR FOR ROCKING TOOL ABOUT WHEEL AXIS
323 .Unstable wheeled frame moved by actuator
324 WITH ACTUATOR ON TRAILING GROUND SUPPORTED FRAME FOR MOVING DRAFT MEANS LATERALLY OR VERTICALLY
325 .Tool rigidly connected to tongue
326 .Vertically
327 ..With vertically adjustable ground support
328 ...Interconnected means for adjusting draft means and ground support
329 GUIDED BY WALKING ATTENDANT; SUPPORTED, PROPELLED, OR HELD IN POSITION BY ATTENDANT
330 .With seat for moving hitch
331 .Hitch guided relative to supporting frame
332 .Tool manipulated with respect to mounting frame
333 ..Arched wheel frame (i.e., straddle row, etc.)
334 ...Seat counterbalanced beam
335 ...With spring biasing means
336 ....Spring biased upwardly during operation
337 ...Combined implement lift and wheel adjustment
338 ...Tongueless, animal draft
339 ....With balancing means
340 ...Multiple plant row type
341 ...With added intermediate tool
342 ...Cross connected drag bars
343 ...Foot operated
344 ...With support bracket for transport
345 ..Manipulated about longitudinal axis
346 ..Plural tools independently or oppositely manipulable
347 ..Spring biased
348 ..Vertically manipulated
349 .Rolling tool
350 ..Handle swingably mounted on axis of tool
351 .Guided or propelled by walking attendant and with ground support or draft means
352 ..With stepper propulsion means
353 ..With body harness or engaging means
354 ..With wheel
355 ...Alternately usable tools rocked about wheel axis
356 ...Plural longitudinally spaced wheels
357 ...Handle forward of tool
358 ...Tool forward of wheel
359 ...Tool and handle relatively vertically adjustable
360 ..With wheel substitute (e.g., runner, etc.)
361 ..Handle connected to tool or runner

GUIDED BY WALKING ATTENDANT; SUPPORTED, PROPELLED, OR HELD IN POSITION BY ATTENDANT
.Guided or propelled by walking attendant and with ground support or draft means
362 ..Tool standard connected to handle
363 ..Plural handles associated with relatively adjustable tools
364 ..Handle mounted tool adjusting, latching or locking mechanism
365 ..Tool and handle relatively adjustable
366 ...Vertically
367 ..Multiple handles connected to multiple longitudinal tool carrying beams
368 ..Plural handles connected to opposite sides of longitudinal beam
369 ...With brace member
370 .With attendant attaching means
371 .Hand tool
372 ..Adjustable
373 ...Plural tools relatively adjustable
374 ....At least one tool immovably secured to handle
375 ..Alternately usable diverse tools or parts
376 ..Loop type
377 ..Channel type
378 ..Plural prongs, teeth or serrations
379 ...Plural rows
380 ...Made from sheet material
381 ..Non-planar earth working portion
382 MULTIPLE LEVEL TOOLS
383 AXIS OF ROTATION OF WHEEL LOCKABLE OR ANGULARLY ADJUSTABLE
384 .With actuator for tilting in a vertical plane
385 .Adjustable stop
386 .Lockable against free swinging
387 WITH WHEEL SUBSTITUTE (E.G., RUNNER, ETC.)
388 .With wheel
389 .Spring tooth implement
390 ..Parallel pivoted tooth bars
391 .Spike tooth implement
392 .Plural runner supported implements relatively movable during operation
393 .Spaced parallel runners with tool mounted therebetween
394 .Disk type tool
395 WITH GROUND SUPPORT VERTICALLY ADJUSTABLE RELATIVE TO FRAME
396 .Vertically adjustable or selectively lockable hitch
397 .Tool land ground support moved together relative to frame
398 ..Linkage to tool
399 .With power take-off from plural wheels
400 .Actuator and interconnected means for adjusting wheels on different axles
401 ..Three or more adjustable wheels on different axles interconnected
402 ...With power take-off from self-adjusted wheel
403 ..With power take-off from wheel
404 ...Wheel adjusted by own power
405 ..One wheel translates another swings
406 ..With additional actuator changing relative position of wheels
407 .Power operated adjustment
408 ..Wheel actuates its crank axle mount
409 ...Wheel lockable to crank axle arm
410 ...Intermittently rotatable member swingable with crank
411 ...."Constant height" depth adjustment
412 ...Swingable arm engageable with wheel
413 ..Servo-motor adjusting means
414 .Flexible or lost motion connection to actuator
415 .Translating motion
416 ..One ground support translates and another swings
417 ..Parallel links
418 ..With actuator
419 ...Screw jack type
420 ...Rack and pinion or ratchet type
421 .Plural ground supports vertically adjustable relative to each other and the frame
422 .Crank axle with angularly spaced wheel carrying arms
423 .With actuator
424 ..Spring assisted
425 ..Gearing
426 ...Worm gear
427 ...Screw jack type
428 ...Rack and pinion or ratchet type
429 ..Manually operated lever rigid with crank axle
430 WITH INDICATING OR SIGHTING MEANS
431 WITH SEAT OR ATTENDANT'S STATION
432 .Plural
433 .Riding attachment
434 .Movable to non-use position
435 .Operator changes position or seat adjustable
436 .Mounted on transverse member connecting plural implements
437 WITH TOOL SHARPENER
438 COMBINED
439 MAST TYPE HITCH (E.G., THREE POINT HITCH, ETC.)
440 .Angled gangs liftable as a unit
441 ..Tandem gangs
442 ...With actuator for angling groups relatively
443 .Struts on trailer or between implement parts
444 .Hitch quadrilateral modified during lift
445 .With means operated by vertical hitch movement
445.1 .Including blade, scraper, or smoother
445.2 ..Angularly adjustable about vertical axis
446 .Laterally adjustable tool
447 ..Rockable about vertical axis
448 .With auxiliary vertical adjustment
449 .Tool movable relative to mast while earth working
450 .Sway limiting means or swayable tool
451 .With tool frame or bar extending beyond sides of vehicle
452 WITH ACTUATOR ADAPTED TO LIFT TOOL FOR TRANSPORT ON WHEELED FRAME OR BROADLY CLAIMED IMPLEMENT
453 .Actuator electrically powered
454 .Angled gangs lifted as a unit
455 ..Tandem gangs
456 .Central group liftable vertically, side groups movable inwardly
457 .With means to restrain lateral sway when raised
458 .Vertical movement interrelated with another
459 .Pivotable about longitudinal axis (e.g., lateral levelling, etc.)
460 ..Tool independently vertically adjustable at transversely spaced points
461 .Tool lifted with respect to stationary or relatively movable cleaner
462 .Plural tools, individually spring biased down, lifted as unit

WITH ACTUATOR ADAPTED TO LIFT TOOL FOR TRANSPORT ON WHEELED FRAME OR BROADLY CLAIMED IMPLEMENT
463 .Lift actuator moves with tool or forms removable unit therewith
464 .Servo-motor forces tool down
465 .Servo-motor with follow-up control (e.g., motion responsive position control, etc.)
466 .Tool held raised for relieving load on servo-motor
467 .With shiftable hitch causing vertical movement
468 .Plural tools, independently actuatable
469 ..By single selectively connectable actuator
470 ..With separate actuator for concurrent lift or with interlock
471 ..Three or more independent actuators
472 .Plural tools simultaneously raised, individually lowered
473 .Tool differentially or sequentially lifted at longitudinally spaced points
474 .Tool rocked about independently vertically adjustable transverse axis
475 ..Plural longitudinally spaced actuators
476 .With lateral adjustment
477 ..Tool adjustable about vertical axis
478 .Tool and lift actuator on opposite sides of transverse pivot axis
479 .Tool lifted forward of transverse pivot axis
480 .Tool swung about freely shiftable or delayed pivot
481 .With separate latch
482 .Tool swings about rock shaft axis
483 .Translatable tool
484 ..By parallel links
485 .Power actuator with manual adjusting or supplemental manual actuating means
486 ..Manual actuation coextensive with power
487 ..Constant height depth adjustment
488 .Single lift actuator for plural relatively movable tools
489 ..Tools relatively moved during lift
490 .Rotary drum actuator
491 .Servo-motor actuator
492 .With power take-off for actuator
493 ..Position controlled power disengagement
494 .Overcenter or toggle holding means
495 .Foot operated actuator
496 ..With combined or optional hand actuation
497 .Tool spring biased during operation
498 ..Biased to neutral position
499 ..Spring means alternately biases tool in opposite directions
500 ..Tool spring pressed downwardly
501 .Lost motion connection between actuator and tool
502 ..Flexible connector
503 .Actuator slidably connected to tool
504 .Screw actuator
505 .Tool connected to frame by bail
506 .Spring assisted or spring actuator
507 GROUND SUPPORT MOVABLE HORIZONTALLY
508 WITH GUARD, SHIELD OR PLANT DIVERTER
509 .Fender for deflected earth
510 ..Rotary
511 ..Perforated or screening type
512 ..Inverted U-shape
513 ..Laterally spaced fenders for inwardly thrown earth
514 .Weed turner or trash holddown
515 ..Spring biased or spring formed
516 ...Plural cooperating elements
517 .Plant deflector
518 ROLLING, ROTATING OR ORBITALLY MOVING TOOL
519 .Yieldable material rim (e.g., rubber, etc.)
520 .Tools on different axes in mutual driving relationship
521 .With power take-off from tool or wheel
522 .Axis substantially vertical
523 ..With vertically extending teeth
524 ...Positioning means engaging circumference
525 ...With weight
526 ...Plural tools
527 .Axis substantially longitudinal
528 .With means for stopping or retarding rotation
529 ..Positive stop
530 ...Wheel or motor controlled
531 .Wobble discs
532 .Screw or spiral
533 .Clutch between shaft and rotating element
534 .Wheel or roller with peripherally spaced plant saving means
535 .Detachable rim for disk
536 .Wheel, roller or gauge and axially adjacent tool on same axis
537 .Corrugated surface rollers
538 .Paired press rims (e.g., planter press wheels, etc.)
539 .Smooth roller with groove, rim or disk
540 .Tool has circumferentially spaced teeth, tines, blades or the like
541 ..With means for preventing ground engagement of teeth or blades
542 ..Tooth or blade on endless carrier
543 ..Spring tooth or blade
544 ..Spring moving or mounting means for tooth or blade
545 ..Blades or teeth change position relative to each other or rotating support during rotation
546 ...With means for causing movement
547 ..With cleaning means
548 ..Tooth or blade units on single axle
549 ...Tooth or blade units angularly adjustable on axle
550 ..Tooth or blade adjustable on carrier
551 ..Rolling tool spring biased into ground contact
552 ..Laterally extending bar or blade with skeleton support (e.g., lawn mower type, etc.)
553 ...Toothed bar or blade
554 ..Drum with axially spaced teeth or blades
555 ..Integral disk
556 ..Tooth or blade axially clamped to hub face (e.g., hoe wheel type, etc.)
557 .Rim with spokes
558 .With disk cleaning means
559 ..Rotatably mounted cleaning means
560 ..Cleaner for pair of converging disks
561 ..Cleaners for opposite sides of disk
562 ..Plural cleaners for single disk
563 ..Cleaners with common operator
564 ...Mounted on rock shaft
565 ...Operating means moves parallel to disk gang axis
566 ..Spring biased toward disk
567 .Disk gang and single disk on diverse axes
568 .Disk gang with movable or removable section

	ROLLING, ROTATING OR ORBITALLY MOVING TOOL
569	.Disks pivoted on vertical axes with interconnected means for moving them indentically
570	.With spring means other than for detent
571	..Spring is for tool group horizontal angling
572	..Spring acts to move tool vertically
573	...Plural tools, individually spring urged
574	.Plural disks with individual mount or axis
575	..Touching disks
576	..With interconnected means for adjusting a plurality of disks
577	.Reversible group
578	.With wheel (not on motor vehicle)
579	.Plural groups of disks
580	..Power operated actuator
581	..Groups changeable to different types of arrangements
582	..With independent lateral adjustment
583	..Vertically adjustable group
584	..Horizontally angularly adjustable group
585	...Groups of unequal length
586	...More than two laterally positioned groups
587	...Groups laterally spaced and unaligned
588	...Hitch longitudinally movable on tongue and groups abreast
589	...Turning connection offset from draft connection
590	....Latch responsive to tractor motion
591	...With manual actuator
592	....Concentric controls
593	....Separate handles for independent gang adjustment
594	....Double tandem groups
595	...Double tandem groups
596	...Tandem groups
597	....Toggle joint between groups
598	...Thrust means directly between group axles
599	.Disk gang
600	..Supported for tilting and horizontal angling adjustment
601	..Disks rotatable relative to axle
602	.Single disk freely swayable
603	.Disk horizontally angularly changeable
604	.Detailed disk structure per se
605	SHIFTABLE HITCH MOVES TOOL RELATIVE TO FRAME
606	WITH CLEANER
607	.Cleaner surrounds tooth
608	.Clearing roller
609	.For plural tools
610	.Scraper
611	WITH WEIGHT
612	FABRIC OR FLEXIBLE TOOL
613	PLURAL RELATIVELY MOVABLE TOOLS
614	.Tool pivots on pivoted member when member moves
615	..Tools connected to parallel pivoted bars
616	...Bars pivoted about vertical axis
617	....Also pivoted about horizontal axis
618	.Tools assume different angularity for opposite draft
619	.Plural tool groups relatively vertically movable because of operation
620	..Parallel transverse tooth bars
621	...Spring biased bars
622	...With actuator to vary inclination of teeth
623	..Groups abreast and in tandem
624	..Plural groups movably connected to forward transverse draft bar
624.5	...With parallelogram-type linkage
625	...With alternate draft means (spaced 90 degrees)
626	...Sectional draft bar
627	...Groups also connected to one another
628	..Similar groups arranged to form a triangular shape
629	..Three or more laterally spaced groups
630	..Groups pivoted to opposite sides of longitudinal draft member
631	..Groups movable about common longitudinal axis
632	..Group movable about oblique horizontal axis
633	..Group pivotal about intermediate transverse axis
634	.Parallel, pivotally adjusted tool bars
635	..With actuator
636	...Tools also adjustable about vertical or longitudinal axes
637	...Plural actuators, independently pivoted tool bars
638	...Gear
639	..Specific mounting for pivoted tool bar
640	.Tool group pivotally adjustable about horizontal axis
641	.Beam spreader of the pivoted yoke type
642	.Pair of tools cooperate to move earth to or from plant row
643	.Spring formed tool or standard
644	.Tools longitudinally adjustable to and from transverse alignment
645	.Tools relatively adjustable horizontally without causing vertical displacement
646	..Laterally adjustable tools, independently free to move vertically
647	..Tools simultaneously adjustable about their individual, spaced vertical axes
648	..Collapsible lazy tong group
649	..Tool groups relatively horizontally adjustable
650	...Also vertically adjustable
651	...Group pivoted about vertical axis
652	....V-shaped
653	.....Nested
654	..Main central beam, tools laterally adjustable relative thereto
655	..Tool adjustable vertically and laterally
656	..Tool laterally adjustable
657	.Relatively movable because of operation
658	..With interconnecting means to prevent independent lateral movement
659	.Adjustable about spaced horizontal axes
660	..Concurrent adjustment
661	.Vertically translatable tool
662	.Tool movable to non-use position
663	WITH ACTUATOR
664	.For relatively movable earth engaging parts
665	..Tool and runner
666	.For adjustment about longitudinal axis
667	.For lateral adjustment
668	.For vertical adjustment with respect to wheeled frame
669	WITH WHEEL; OR SUPPORTED ON WHEEL FRAME OR BROADLY CLAIMED IMPLEMENT
670	.All wheels on one side of tool
671	.Mounted on single longitudinal beam in tool path
672	..Wheel secured to tool
673	.Laterally adjustable tool
674	.With bracket to hold tool off ground

WITH WHEEL; OR SUPPORTED ON WHEEL FRAME OR BROADLY CLAIMED IMPLEMENT
675 .Vertically adjustable tool
676 .Tool follows wheel path
677 WITH DRAFT DETAIL
678 .Spring biased hitch
679 .Adjustable
680 ..Vertical
681 TOOL, STANDARD OR CONNECTION
682 .Tool flexed to change contour
683 .Latched in earth working position
684 .Tool pivots on member when member moves
684.5 .Frame-supported blade, scraper, or smoother drawn by vehicle
685 .Plural tools
686 ..Right and left hand type
687 ..Longitudinally spaced rows
688 ...Staggered
689 ..Closed geometrically shaped frame
690 ..V-shaped frame
691 ..Mounted on transverse or oblique tool bar
692 ...Angularly adjustable bar
693 ...Oblique bar
694 ..Laterally spaced tools
695 ...Tools in echelon (3 or more)
696 ...Tools on opposite side of longitudinal beam
697 ...Tools in transverse alignment
698 .Tool with laterally spaced standards
699 .Subsoilers
700 ..With separate vertically spaced earth working portion attached to same standard
701 .Ridgers
701.1 .Tool is transversely elongated blade (e.g., bulldozer)
701.2 ..Having removable corner bit
701.3 ..Having removable cutting edge
702 .Reversible part
703 ..Earth engaging means
704 ...Portion of earth engaging assembly
705 .Spring biased or formed tool or tool part
706 ..Plural earth engaging parts relatively movable during operation
707 ..Spring formed tool or standard
708 ...With separate or rigid earth working portion
709 ..Laterally biased
710 ..Pivoted tool biased beyond pivot
711 ..Leaf or torsion spring
712 .Tool assumes different position for opposite draft
713 .Tooth
714 .Plural earth engaging parts relatively movable because of operation
715 ..Rotary landslide
716 ..Movable moldboard for inverting furrow slice
717 ...Belt
718 ...Roller
719 .With add-on cutting or wearing element applied directly over, or onto, the original cutting element
720 .Subsurface blade (e.g., weeder, etc.)
721 .Non-rectangular, symmetrical type
722 ..Earth breaking part and separately attached wings
723 ...Draw cut point
724 ...Wings integral
725 ..With separable vertical cutter on centerline
726 ..Having separable parts jointed at centerline
727 ..With attached runner or depth gauge
728 ...With additional blades attached to runner
729 ...Adjustable
730 ..Winged
731 ..Lateral extent decreases upwardly
732 ..Triangular blade
733 ..Constant height and V-shape
734 .Adjustable
735 ..To present different working portion
736 ..Relatively adjustable earth engaging parts
737 ...Element adjusted for wear compensation
738 ...Relatively adjustable tool and runner
739 ..Adjustable about horizontal transverse axis
740 ...Tool adjustably connected to standard
741 ..Laterally adjustable
742 ...Adjustable about a vertical axis
743 ...Adjustable about a longitudinal axis
744 ..Vertically adjustable
745 .Welded
746 .With portion extended beyond landslide
747 .Specific material
748 .Pivoted tool
749 .Having separable parts interconnected without detachable fastening means
750 ..Self-engaging snap fastener
751 ..Captive fastener or wedge tightened or engaged after assembly
752 .With separable vertical planar longitudinal cutter (e.g., colter, etc.)
753 .Interlocked or interfitted parts
754 .Share and furrow slice inverting moldboard
755 ..Heating or lubricating
756 ..Skeleton
757 ..Furrow slice retainer
758 ..Furrow slice cutter or breaker
759 ..With additional element juxtaposed to moldboard
760 ..Specific moldboard shape
761 ..Serrated, toothed or notched point or share
762 .Specific tool and standard connection
763 .Specific standard and beam connection
764 .With separate runner, gauge, shoe or landslide
765 .Specific tool shape
766 ..Tool with parallel fingers or blades
768 ..Draw cut type
769 ..Separable parts
770 ..Angularly related tool surfaces
771 ..With curved surface
772 .Removable tool portion (e.g., replaceable cutting or wearing element for tool)
772.5 ..Portion is cutting edge
773 .Specific standard
774 ..With lateral offset
775 ..Braced
776 MISCELLANEOUS (E.G., FRAMES, ETC.)

900 PLANT THINNERS

CLASS 173 TOOL DRIVING OR IMPACTING

1 PROCESSES
2 AUTOMATIC CONTROL OF POWER OPERATED MEANS
3 .Responsive to condition of cleansing means
4 .Tool advance causing or controlling means
5 ..Responsive to torque or speed condition of drive
6 ...With additional control by means sensing condition of advance means
7 ...Drive motor motivating energy condition initiates control
8 ....Motive fluid flow or pressure condition of drive motor
9 ...Fluid flow or pressure operated advance means
10 ..Responsive to length of stroke of means reciprocating hammer head or tool
11 .Drive means responsive to condition of advance causing or controlling means
12 .Drive means responsive to torque or speed condition
13 DRIVE CONTROLLED BY RELATIVE AXIAL MOVEMENT OF TOOL
14 .Reciprocating drive member connected to pulsing fluid column
15 .Drive motor controlled
16 ..Modified internal motor operation
17 ...Motor piston movement modified relative to motive fluid port
18 DRIVE CONTROLLED BY RELATIVE MOVEMENT OF ADVANCE CAUSING OR CONTROLLING MEANS OR MANIPULATING HANDLE
19 SELF-ACTING ADVANCE AND RETRACTION CYCLE
20 WITH INDICATING OR SIGNALING MEANS
21 .Distance of advance
22 WITH VEHICLE SUPPORT FOR DRIVE
23 .Nontransporting means to support vehicle during tool operation
24 .Movement of vehicle causes tool advance
25 .Vehicle motor mechanically coupled to drive tool
26 ..Drive gearing displaced relative to source of power
27 .Vehicle motor and drive motor powered by same energy source
28 .Drive structure moved to nonuse position for transport
29 CONVERTIBLE
30 WITH MEANS ENGAGED BY PART OF HUMAN OTHER THAN HAND
31 WITH WORK ENGAGING MEANS SUPPORTING DRIVE
32 .Anchored to work
33 ..Balanced with respect to axis of tool advance
34 .Structure extends between opposed points
35 ..Tool advanced laterally of structure
36 .Structure engages work at point diametrically opposed to tool
37 .Relatively adjustable work engaging elements
38 SWINGING ARM CAUSES ADVANCE WITH MEANS TO GUIDE RECTILINEAR TOOL ADVANCE
39 WITH MEANS TO ADJUST POSITION OF AXIS OF TOOL ADVANCE
40 .Drive gearing displaced relative to source of power
41 ..With plural relatively displaced gearing sections
42 .Plural adjustments
43 ..Powered by motor or mechanism
44 .Adjustment powered by motor or mechanism
45 WITH MEANS TO SPACE AXIS OF TOOL ADVANCE RELATIVE TO PRIOR POSITION
46 COMBINED
47 DRIVE ADJUSTABLE TO COMPLETELY CHANGE KIND OF DRIVE
48 .Adjustable to impacting device
49 DRIVE BY MEANS REACTING TO ROTATING ECCENTRIC MASS
50 POWER PATHS TO PLURAL TOOLS FROM SINGLE DRIVE
51 .Drive plural means to reciprocate hammer heads or tools
52 SINGLE ADVANCE CAUSING OR CONTROLLING MEANS OR MANIPULATING FOR PLURAL DRIVES
53 HAMMER OR TOOL SHAFT RECIPROCATED BY GRIPPING MEANS WHICH RELEASE OR YIELD TO PERMIT ADVANCE
54 .With fixed means cyclically contacted by grip structure
55 ..Contact moves grips out of shaft engagement
56 .Means concurrently moving shaft about an axis
57 WORK CLEANSING
58 .Controlled by relative movement between drive and tool, advance causing or controlling means or manipulating means
59 .By motive fluid for drive motor or advance causing or controlling motor
60 ..Motive fluid does not contact work but induces flow of another fluid
61 ..Additional cleansing fluid source
62 ...With means providing for independent use of either fluid
63 ...Motive fluid for cleansing bypasses motor chamber
64 ..Supply for cleansing bypasses motor chamber
65 ...Controlled by motor inlet throttle valve
66 ..Fluid supplied through working chamber of idled cyclically operable drive motor
67 ...Supplied through distributor maintained in fixed position
68 ....Motor inlet throttle valve maintains distributor fixed
69 ....Motor exhaust throttled
70 ....Mechanically maintained in fixed position
71 ..With means to inhibit return of detritus into cleansing passage
72 ..Fluid supplied through chamber of advance causing or controlling motor
73 ..Directed into passage in tool
74 .Plural cleansing fluid sources
75 .Cleansing fluid pump operated by drive
76 ..Pump comprises hammer head or impact transmitting anvil
77 .Cleansing fluid controlled by control for drive or advance causing or controlling means
78 .Cleansing fluid passage through hammer head
79 .Drive motor or advance causing or controlling motor provided with passage for cleansing fluid
80 .Cleansing fluid passage in impact transmitting anvil
81 MEANS TO CONTROL ADVANCE AND CYCLICALLY RECIPROCATE A CABLE-OPERATED HAMMER OR TOOL
82 .With means to synchronize advance with reciprocating drive
83 .Advance means bodily reciprocated

MEANS TO CONTROL ADVANCE AND CYCLICALLY RECIPROCATE A CABLE-OPERATED HAMMER OR TOOL
84 .Hammer or tool cyclically disconnected from cable
85 .With plural cable drums
86 .Relatively elevated guide engaging cable between drive and hammer or tool
87 ..Drive is oscillating cable drum
88 ..Drive is oscillating cable engaging means
89 ...Drive permits hammer or tool to freely drop
90 IMPACTING DEVICES (E.G., HAMMERS)
91 .Selective axial direction of impact
92 .With means to grip and release tool in timed relation to impact
93 .With anvil arranged to transmit torsional impact to tool
93.5 ..Rotary tool drive having torque responsive impact
93.6 ...Hammer head reciprocates along rotary axis
93.7 ..Torque transmitted from hammer head traveling axially only
94 .Hammer head moves in arcuate path or rotates
95 ..Hammer head reciprocates along fixed transverse axis
96 ...Arcuate or rotary movement selectively releasable or variable independent of reciprocation
97 ...Arcuate or rotary movement transmitted to tool
98 ..Hammer head moves out of arcuate or rotary path
99 ...Movement out of path is about rotating pivot
100 ..Hammer head movement is oscillatory
101 .Plural relatively moved hammer heads
102 ..One impacts another
103 ..Concentric
104 .With means for rotating tool
105 ..Rotated by separate motor
106 ...Rotation motor exhaust is motive fluid for hammer motor
107 ...Motive fluid supplied to rotation motor is hammer motor exhaust
108 ...Reciprocating type separate motor
109 ..Rotated by hammer head or drive for hammer head
110 ...Rotation is intermittent or oscillatory
111 ....Rotary drive path is directly through hammer head
112 .With means to cause or control advance of hammer head
113 ..Advance operated by hammer drive or actuated in response to hammer vibration
114 .With means to reciprocate tool
115 .Length of cyclic travel of hammer head selectively adjustable
116 .Hammer head driven by pulsating fluid
117 .Hammer head driven by electric motor
118 .Spring bodily cyclically moved with hammer head
119 .Hammer head driven by spring
120 ..With means to adjust spring force
121 ..Spring retracts hammer head
122 .Hammer head driven by relatively moving motion transmitting element
123 ..Rotary cam
124 ..Cyclically disconnected from motion transmitting element
125 .Hammer head constitutes or fixed to drive motor cylinder
126 .Hammer head comprises plural parts or diverse materials
127 ..Piston of drive motor
128 .Impact transmitting anvil
129 ..Attachable at plurality of points along tool
130 ..Adapted to fit tool noncircular in cross section
131 ..Formed of plural transmitting part or separate layers
132 ..With means to directly connect anvil to tool
133 ..Anvil retained for limited movement
134 .Hammer head constitutes piston of drive motor
135 ..Motive fluid applied to striking face
136 ...Supplied through passage in striking face
137 ...Reduced area striking face
138 ..With means to conduct motive fluid to or from striking face
139 .With impact cushioning means
140 DRIVE GEARING ADVANCES RELATIVE TO SOURCE OR POWER
141 ADVANCE CAUSING OR CONTROLLING MEANS
142 .Operated solely by vibrations from reciprocating element in tool drive
143 ..Intermittent unidirectional rotation of advance element
144 .Reciprocatory drive and advance originate from same mechanical element
145 .Rotary drive and advance originate from same mechanical element
146 ..Friction clutch or torque yielding couple in connecting train
147 .Driven flexible member causes advance
148 .Tool advances relative to drive
149 ..Advance means engageable with tool shaft at any point
150 ..Advance motor working member coaxial with tool shaft
151 ..Cable means controls advance
152 .Motor causes or controls advance
153 ..Drive motor exhaust is motive fluid for advance motor
154 ..Drive motor generates advance motor motive energy
155 ..Advance motor exhaust is motive fluid for drive motor
156 ..With lock or brake operable during advance
157 ..Common control element for advance and drive motors
158 ...With relatively movable advance motor control element
159 ..Common energy supply for advance and drive motors
160 ..Advance means includes relatively movable transmission element
161 ..Advance motor control in tool drive manipulating handle
162.1 INCLUDING MEANS TO VIBRATIONALLY ISOLATE A DRIVE MEANS FROM ITS HOLDER
162.2 .Handle type holder
163 MEANS TO DRIVE TOOL ABOUT AN AXIS
164 .Means to hold and relatively rotate sections of tool shaft
165 .Relatively fixed drive for an advancing tool
166 ..With advance stopping means having selectively operable actuating mechanism
167 ..With advance stopping means adapted to grip tool shaft at any point
168 PASSAGE IN MANIPULATING HANDLE FOR DRIVE MOTOR MOTIVE FLUID

	PASSAGE IN MANIPULATING HANDLE FOR DRIVE MOTOR MOTIVE FLUID
169	.Motive fluid control valve in handle passage
170	DRIVE CONTROL OPERABLE BY HAND ENGAGING MANIPULATING HANDLE

6	EARTH GROUNDS
7	.Driving type
8	WITH FLUIDS OR VACUUM
9 R	.Current conductive fluid and/or vacuum
9 F	...Conductive fluid
10	.With cable or conduit preinstallation devices
11 R	.With fluid-condition responsive and/or indicating means
11 BH	...Bushings
12 R	.With expansion and contraction means
12 BH	...Expansion bushings
13	..Built into conduit or cable
14 R	.With fluid maintenance or conditioning means
14 BH	...Bushings
15.1	.With cooling or fluid feeding, circulating or distributing
15.2	..By heat pipe
15.3	..For bushing or pothead
15.4	..Superconductive type
15.5	...For cable, conductor or joint
15.6	..For cable, conductor or joint
15.7	..For welding or furnace cable
16.1	..By ventilation or gas circulation
16.2	...Of bus bars or bus ducts
16.3	...With heat sink
17 R	.Boxes and housings
17 LF	...Liquid filled
17 GF	...Gas filled
17 SF	...Solid filled
17 VA	...Venting, absorption, expansion
17 CT	...Closures, terminals, gaskets
17.05	..Hermetic sealed envelope type (e.g., with exhaust stem)
17.06	...Liquid seal
17.07	...Combined lead-in and exhaust tube
17.08	...With electric connector
18	..With bushing, terminal or lead-in
19	.Conduit or cable end structure
20	..With fluid stops
21 R	.Conduit or cable joints
21 JS	...Joints: separable
21 JR	...Joints: rotatable
21 JC	...Joints: rotatable, coaxial
21 C	...Joints: coaxial
21 CA	...Joints: coaxial angle expansion
22 R	..With fluid stops
22 C	....Concentric
23 R	.With fluid stops
23 C	...Compositions
24	.Conduits, cables and conductors
25 R	..Impregnated insulation type
25 C	....Impregnating compositions
25 G	....Gas filled
25 P	....Processes
26 R	...Multiple conductor
26 G	......Gas filled
27	..Parallel or twisted conductors
28	..Coaxial or concentric type
29	...With spiral spacer
30	.Insulators
31 R	..Axial passage and/or through wall or plate
31 S	....Spark plugs
31.5	...Liquid sealed joint
32	ANTI-INDUCTIVE STRUCTURES
33	.Conductor transposition
34	..Conduit or cable structure
35 R	.Shielded or screened
35 C	...Connectors and joints
35 SM	...Spark plugs, manifolds
35 GC	...Gaskets, covers
35 CE	...Coils, anti-eddy-current
35 MS	...Materials, stock and screen rooms
35 TS	...Radio tube shields
36	..Conductor only
37	UNDERGROUND
38	.Distributing and/or combined with overhead
39	.Street, sidewalk, gutter or curb structure
40 R	OVERHEAD
40 CC	..Ground clamps and cable clips
40 TD	..Tension devices
41	.With messenger cable
42	.With conductor vibration damping means
43	.Distributing and/or plural point support
44	.With connector or wire fanning arrangements
45 R	.Towers, poles or posts
45 TD	...Tension devices
46	HANDLES
47	COMBINED FLUID CONDUIT AND ELECTRICAL CONDUCTOR
48	WALL MOUNTED CONDUITS AND/OR HOUSINGS
49	.Plural outlet and/or conduit
50	BOXES AND HOUSINGS
50.5	.Hermetic sealed envelope type
50.51	..With covering or casing for envelope
50.52	..With electrical connector
50.53	...Envelope portion forms connector
50.54	...With mounting means for a device within envelope
50.55	..Hollow lead surrounding another lead (e.g., concentric type)
50.56	..Lead-in insulated from metal wall
50.57	..Stem or sealing disk attached to envelope neck
50.58	...By fused-type seal
50.59	..With shield for lead-in seal or between the lead-in conductors
50.6	..Plural lead-in
50.61	..With bonded seal for conductive member (e.g., glass to metal)
50.62	...With cement or plastic
50.63	...Metal disk or ring-type seal
50.64	...Foil or flat lead-in
51	.With grounding means
52.1	.With electric device or mounting means therefor
52.2	..Potted or encapsulated
52.3	..Sealed
52.4	...Flat housing for electronic device (e.g., flat pack, dual-in-line package)
52.5	...Header, mounting stud, or can-type housing for semiconductor or crystal
52.6	...Pellet type housing
53	..Plug receptacle or wall switch type
54	...With fixture coupling or mounting means
55	...Unitary with face plate
56	....External
57	...Adjustable
58	...With box or housing mounting means
59	..With connectors
60	...Cable or conduit terminal casings
61	..Fixtures coupling or mounting means
62	...Stud or nipple
63	....With box supporting means
64	....With conduit or cable coupling means
65 R	.With conduit or cable opening, coupling means or hole closures
65 SS	...Sealed stuffing-gland type
65 G	...Grommet type

66	COVERS OR FACE PLATES
67	.With closure for face plate opening
68.1	CONDUITS, CABLES OR CONDUCTORS
68.2	.Bus bars or bus ducts (Residual)
68.3	.Single duct conduits
250	.Preformed panel circuit arrangement (e.g., printed circuit)
251	..With encapsulated wire
252	..With cooling means
253	..Micropanel
254	..Convertible shape (e.g., flexible) or circuit (e.g., breadboard)
255	..With particular substrate or support structure
256	..With particular material
257	...Conducting (e.g., ink)
258	...Insulating
259	...Adhesive/bonding
260	..With electrical device
261	..With particular conductive connection (e.g., crossover)
262	...Feedthrough
263	....With solder
264	....Voidless (e.g., solid)
265	.....Preform in hole
266	....Hollow (e.g., plated cylindrical hole)
267	...Termination post
268	..With single conductive plane (e.g., tape, cable)
69	.Extensible
70 R	.Combined
70 S	...Submarine repeater housings
70 B	...Bus bars
70 C	...Conduits or strips
70 A	...Aerial cable
71 R	..Branched
71 B	....Bus bars
71 C	....Coaxial
72 R	...Multi-duct conduit and/or plural branch
72 A	.....Wire harness
72 B	.....Bus bars
72 C	.....Casing, moldings
72 TR	.....Ribbon type
73.1	..With joint or end structure conductive stress distributing means
74 R	..With end structure
74 A	....Insulating cap or sleeve
75 R	...With joint
75 B	.....Bootleg
75 D	.....With detachable joint (e.g., potheads)
75 F	.....Flexible spring type
75 C	.....Coaxial
76	...Plastic filled
77 R	...Sealing
77 S	.....Spark plugs
78	...With grounding means
79	...With supporting means
80	...With insulator skirts
81	...Elbow or hood outlet type
82	...End cap outlet type
83	...Lining thimble
84 R	..With joints
84 C	....Crimped
84 S	....Separable
85	...Axially insulated joint sleeve sections
86	...Angularly movable or adjustable
87	...Angular
88 R	...Plural conductor and/or duct
88 B	.....Bus bars
88 C	.....Coaxial
88 S	.....Separable
89	...Radially spread or flanged sheath or conduit
90	...Stranded conductor
91	...Divided joint sleeves
92	....Longitudinally
93	...Sleeve and end cap-type casing
94 R	...Bare-conductor
94 S	.....Separable
95	.Plural duct
96	..Embedded conduit-ducts or conductors
97	..Grooves or channels
98	.With embedded conduit-duct or conductor
99 R	.With interior conductor or cable supports
99 B	...Bus bars
99 E	...Expansion
100	..Vertical conductor or cable
101	.Removable wall
101.5	.Buoyant
102 R	.Conductive armor or sheath
102 A	...Alloys
102 SC	...Semiconducting
102 C	...Sheath coated
102 SP	...Strip, type, perforated, slotted
102 P	...Powdered insulation
102 D	...Corrugated
102 E	...Rope
103	..Plural individually sheathed or armored conductors
104	...Embedded in shield
105 R	..Plural, insulated
105 SC	....Semiconducting
105 B	....Segmental
106 R	..Plural, conductively contacting or composite
106 SC	....Semiconducting
106 D	....Corrugated
107	..Protected by nonconductive layer
108	..Spirally applied
109	...Overlapping or interlocking
110 R	.Insulated
110 A	...Oxide
110 P	...Cellulose
110 AR	...Rubber
110 SR	...Synthetic resin
110 SY	...Styrene
110 B	...Isobutylent
110 N	...Polyamide (Nylon)
110 PM	...Polyethylene (including "Mylar")
110 D	...Dacron
110 V	...Vinyl
110 FC	...Fluorocarbons (teflon, Kel-f, FEP-Teflon)
110 S	...Silicones
110 F	...Foam
110 E	...Epoxy
111	..With beads or disc
112	..With identifying means
113 R	..Multiple conductor
113 A	....Radially compressed
113 AS	....Air-spaced
113 C	....Insulating core
114 R	...Split conductor
114 S	.....Segmental reentrant
115	...Dissimilar or auxiliary conducting elements
116	...With filler insulation
117 R	...Assemblies of noncircular section
117 F	.....Flat or ribbon type
117 FF	.....Conductor itself is flat
117 M	.....Mesh
117 AS	.....Air-spaced
117 A	.....Adhesive
118	..With powdered or granular material
119 R	..Composite or noncircular strand section
119 C	....Coated, compositions
120 R	..Plural or impregnated layers
120 C	....Coated or impregnated
120 FP	....Fluid-type cable paper
120 SC	....Semiconducting

	CONDUITS, CABLES OR CONDUCTORS
	.Insulated
	..Plural or impregnated layers
120 AR	....Rubber
120 SR	....Synthetic resin
121 R	...Fibrous or fabric with plastic or coating materials
121 A	.....Flame, weather or mold proof
121 B	.....Cellulose
121 AR	.....Rubber
121 SR	.....Synthetic resin
122 R	...Fibrous or fabric
122 G	.....Glass
122 C	.....Coated
124 R	..Fibrous or fabric
124 G	....Mineral-glass
124 GC	....Mineral-glass, coated
125.1	.Superconductors
126.1	.Conductor structure (nonsuperconductive)
126.2	..Composite
126.3	..Corrugated or slotted
126.4	..Metal coated on insulation
127	..Corona prevention
128.1	..Plural strand
128.2	...Bundle conductors
129 R	...Assemblies of noncircular section
129 B	.....Bus bars
129 S	.....Segmental, reentrant
130	...Annular
131 R	....With wall support
131 A	......Insulating core
131 B	......Synthetic, coated
133 R	..Noncircular strand section
133 B	....Bus bars
135	.Accessories
136	..Anti-abrasion devices
137 R	INSULATORS
137 A	..Coated
137 B	..Compositions
138 R	.Special application
138 A	...Antennas
138 C	...Compositions
138 S	...Spark plugs
138 B	...Pull chains
138 D	...Studs, rods, and joints
138 E	...Slot liners and spacers
138 F	...Terminal covers
138 G	...Component mounting pads, spacers and holders
138 H	...Neon tube type
138 J	...Resistor or heater type
139	.Combined
140 R	..With conductive arcing or stress distributing means
140 C	....Coated
140 H	....Hood type
140 S	....Strain type
140 CR	....Corona ring
141 R	...Strings or stacks
141 C	.....Coated
142	...Bushing type
143	....Condenser type
144	...Arcing or grading devices
145	..With connector
146	.Mid-line spacers
147	..Cross-over
148	.Multiple insulator assemblies
149 R	..Multiple conductor
149 B	....Bus bars
150	..Strings and stacks
151	.Through wall or plate
152 R	..Bushing type
152 A	....Antennas
152 E	....Electric space discharge device
152 S	....Spark plugs
152 G	....Grommets or tubes
152 GM	....Glass-to-metal seal
153 R	...Opposed wall engaging means
153 A	.....Antennas
153 G	.....Grommets
154	.Insulator and conductor embracing holder
155	..Divided insulator
156	.Divided insulator
157	..Aligned through aperture
158 R	.With insulator-supporting or attaching means
158 F	...Fence post insulators
159	..Insulated nail or staple type
160	..Strand engaging suspension means
161 R	..Adjustably or movably mounted
161 F	....Fence post insulators
162	..Double arm
163 R	..Support and/or insulator embracing or clamping
163 F	....Fence post insulators
164	..Support penetrating
165	...Penetrating element socketed in insulator
166 R	...Through aperture, penetrating element clamped
166 S	.....Stand-off insulators
167	.With conductor receiving aperture or bushing type
168	.With conductor holding means
169	..Fitting or terminal type
170	...Hooks
171	...Special conductor form
172	..Insulator embracing
173	...Tie wires
174	..Insulator structure
175	...Self-retaining
176	.With terminal elements
177	..Plural
178	...Multi-part, sectional or composite insulator
179	....Protected rod type
180	....Pin and opposed overlapping terminal
181	...With insulated reinforcing or interlocking element
182	...Cap and pin
183	...Overlapping
184	....Interlinking
185	....Pin and opposed terminal
186	...Caps
187	..Ventilating
188	..Cap type
189	...Plastic material adhered
190	...Divided cap
191	...Clamps or clasps
192	...Rings or wedges
193	...Screw or bayonet
194	..Pin type
195	...Multi-part insulators
196	...Plastic material adhered
197	...Clamps or clasps
198	...Rings or wedges
199	...Expanded
200	...With thimble in socket
201	...Through pin
202	...Screw or bayonet type
203	....Strand thread
204	....Sheet material thread
205	....Soft yielding material pin
206	...Sockets
207	..Link or clevis
208	.Link type
209	.Sectional, multi-part, composite, or coated
210	..Pin socket type
211	.With moisture or dirt removing or shedding
212	.Surface configuration

CLASS 175 BORING OR PENETRATING THE EARTH

1	WITH SEISMIC SHOCK GENERATING
2	BORING WITH EXPLOSION IN INACCESSIBLE HOLE
3	.Severing formed core by explosion
3.5	.Explosive charge carried by projectile
4	.Driving core receiver by explosion or with receptacle collecting material in bore
4.5	.Directing successive projectiles or charges in same path
4.51	.With position orienting or indicating
4.52	.With wall engaging packer or anchor
4.53	.Firing chamber movable in bore relative to carrier or another firing chamber
4.54	.With bore condition firing control, or compensating means
4.55	.Independent firing of plural charges
4.56	.Firing control mechanically actuated in bore
4.57	.Projectile forms bore
4.58	..With means to initially restrain projectile for pressure build-up
4.59	..With means to prevent preliminary bore fluid contact
4.6	.Concave-shaped charge
5	BORING A SUBMERGED FORMATION
6	.Boring with underwater tool drive prime mover
7	.Boring from floating support with submerged independent anchored guide base
8	.Boring from submerged buoyant support
9	.Boring from nonbuoyant support
10	.Boring with submersible vertically movable guide
11	BORING BY DIRECTLY APPLYING HEAT TO FLUIDIZE OR COMMINUTE
12	.Combustion of the formation material
13	.With introduction of slag forming flux
14	.Combustion is confined chamber having restricted discharge orifice
15	.Rotating the heating tool
16	.Electrically produced heat
17	WITH HEATING OR COOLING (1) WITHIN THE BORE, OR (2) DRILLING FLUID
18	ICE BORING
19	BORING WITHOUT EARTH REMOVAL (I.E., COMPACTING EARTH FORMATION)
20	.Combined with earth removal (e.g., removing sample)
21	.Fluid passage to exterior of drive point
22	.Drive point detached from shaft to form cased bore or with installation of casing
23	..Drive point retracted through shaft or casing
24	AUTOMATIC CONTROL
25	.Of fluid pressure below ground
26	.Of boring means including a below-ground drive prime mover
27	.Of advance or applied tool weight
38	.In response to drilling fluid circulation
39	WITH BIT WEAR SIGNAL GENERATING
40	WITH SIGNALING, INDICATING, TESTING OR MEASURING
41	.Ray energy detection or measuring
42	.Indicating agent released in drilling fluid
44	.Providing identifiable indication of core position in situ for core sample orientation
45	.Tool position direction or inclination measuring or indicating within the bore
46	.Signaling or indicating condition of cutting in cuttings retainer
48	.Measuring or indicating drilling fluid (1) pressure, or (2) rate of flow
49	.Transparent inspection feature
50	.Indicating, testing or measuring a condition of the formation
51	WITH SELF-ACTING CYCLIC ADVANCE AND RETRACTION OF TOOL OR TOOL SHAFT
52	WITH MAGAZINE FOR SUCCESSIVELY MOVING UNCONNECTED, ORIENTED TOOL OR SHAFT SECTIONS TO USE POSITION
53	ENLARGEMENT OF EXISTING BORE REQUIRING ACCESSIBILITY TO OPPOSITE ENDS OF THE EXISTING BORE
54	BORING BY BELOW GROUND RECIRCULATION OF UNSUPPORTED ELEMENTS (E.G., SHOT)
55	TOOL ACTUATION BY REACTION OF ROTATING ECCENTRIC MASS
56	NATURAL VIBRATION CHARACTERISTIC OF AN ELEMENT OF BORING MEANS RELATED (1) TO NATURAL VIBRATION CHARACTERISTIC OF ANOTHER ELEMENT, OR (2) TO FREQUENCY OF AN IMPOSED MOTION
57	PROCESSES
58	.Sampling of earth formations
59	..Retaining fluid or taking separate fluid sample
60	..Transporting sample to surface by fluid
61	.Boring curved or redirected bores
62	.Boring horizontal bores
64	.Chemical reaction with earth formation or drilling fluid constituent
65	.Boring with fluid
66	..Treating spent or used fluid above ground
67	..Boring by fluid erosion
68	..Anti-agglomeration treatment of gaseous drilling fluid
69	..Combined liquid and gaseous fluid
70	..Plural liquids
71	..Gaseous fluid or under gas pressure
72	..Prevention of lost circulation or caving
73	MEANS TRAVELING WITH TOOL TO CONSTRAIN TOOL TO BORE ALONG CURVED PATH
74	.Sectional guide or shaft having means to lock sections in angular relation while boring
75	.Normally curved guide or shaft
76	.Axially spaced opposed bore wall engaging guides
77	SIDE WALL TOOL FED LATERALLY WITHOUT ROTATION FROM INACCESSIBLE HOLE
78	MEANS CARRIED BY HOUSING INSERTABLE IN INACCESSIBLE HOLE TO ADVANCE SIDE WALL TOOL LATERALLY
79	TOOL SHAFT ADVANCED RELATIVE TO GUIDE INSERTABLE IN INACCESSIBLE HOLE TO CHANGE DIRECTION OF ADVANCE
80	.Tool telescopes over guide having surface set at angle in hole
81	.With anchor for guide engaging hole side wall
82	.Guide carried by shaft to operative position
83	..With clutch means acting between shaft and guide
84	WITH ABOVE-GROUND CLEANER FOR BORING MEANS
85	WITH ORIENTING OR RACKING MEANS FOR UNCONNECTED TOOLS OR SECTIONS OF SHAFT OR CASING
86	WITH BELOW-GROUND PERSONAL ACCOMMODATION
87	CONVERTIBLE
88	WITH MEANS CARRYING CUTTINGS LATERALLY OF BORE AXIS COMPRISING (1) CHUTE, (2) CONVEYER, OR (3) VEHICLE

89	TOOL ELEMENT OR CONTINUOUSLY DRIVEN FLEXIBLE OR ARTICULATED ENDLESS MEMBER
90	.Flexible or articulated member carried on support swingable or laterally movable relative to bore axis
91	BORING MEANS INCLUDING A CONTINUOUSLY ROTATING BIT DESCRIBING A NONCIRCULAR CROSS-SECTIONAL BORE
92	WITH BELOW-GROUND TOOL DRIVE PRIME MOVER
93	.Below-ground (1) generation of motive fluid, or (2) storage of motivating energy
94	.With below-ground feed means
95	.Plural below-ground drive prime movers
96	..Plural cutter elements driven by individual prime movers
97	.With means to anchor prime movers support to bore wall
98	..Expansible anchor
99	...Fluid-operated
100	.Discharge passage for motive fluid directed toward bore entrance
101	.With positive connection between tool and support shaft for rotary below-ground motor
102	.With below-ground conveyer or impeller for removal of cuttings
103	.With above-ground means
104	.Electric
105	..Reciprocating
106	.With mechanical motion-converting means
107	.Fluid rotary type
108	COMMON DRIVE OR ADVANCING MEANS FOR CONCURRENTLY BORING ALONG LATERALLY SPACED AXES
113	WITH MEANS TO SIMULTANEOUSLY FEED AND ROTATE TOOL FROM A SINGLE MECHANICAL ELEMENT
114	.Constant rotation rate permitted regardless of (1) release of feed force, or (2) change in feed rate
118	.With feed anchor in earth wall being bored
121	.Rotary drive for relatively advancing feed screw
122	WITH MEANS TO FEED DRIVE
135	WITH ABOVE-GROUND MEANS TO IMPACT AN EARTH-PENETRATING MEANS
161	WITH ABOVE-GROUND MEANS TO MOVE TOOL TO A DUMPING LOCATION OFFSET FROM BORE
162	WITH ABOVE-GROUND MEANS TO FEED TOOL
170	WITH TOOL DRIVE PRIME MOVER OR ABOVE-GROUND MECHANICAL MOTION CONVERTING DRIVE MEANS
171	.With installing casing
172	.With endless flexible conveyer
173	.With diversely operated shafts extending into bore
189	.Drive reciprocates tool
195	.Rotary drive for a relatively advancing tool (e.g., rotary table)
202	ABOVE-GROUND MEANS FOR RELATIVELY MOVING BELOW-GROUND TOOL ELEMENTS
203	WITH ABOVE-GROUND MEANS TO ADVANCE OR RETRACT BORING MEANS
205	WITH MEANS PROVIDING PRESSURIZED GAS CONTACT WITH DRILLING LIQUID
206	WITH ABOVE-GROUND MEANS FOR PREPARING OR SEPARATING DRILLING FLUID CONSTITUENTS
207	WITH ABOVE-GROUND MEANS FOR HANDLING DRILLING FLUID OR CUTTING
208	.Fluid spray
209	.Fluid or cuttings directing or receiving means engaging bore entrance
210	..Anchored to bore wall
211	..Axially supported by tool shaft
212	.Pressurized gas supply
213	.With suction pump inlet communicating with bore bottom
214	.Fluid head on tool shaft having lateral port and axial passage with seal for means reciprocable in the head
215	.With tool shaft having plural passages for drilling fluid
216	.Standpipe
217	.With pump
218	.With valve
219	WITH PARTICULAR ACCOMMODATION FOR PERSONNEL (E.G., SEAT OR PROTECTOR)
220	WITH ABOVE-GROUND GUIDE FOR RELATIVELY ADVANCING TOOL
226	WITH SAMPLE COVERING OR COATING MEANS (1) DISPENSED INTO SAMPLE RECEIVER, OR (2) FLUENT
227	WITH STORAGE MEANS FOR BIT LUBRICANT CARRIED BY BIT OR SHAFT
228	.With fluid pressure-actuated feed means
229	.Rotation of bit actuates lubricant feed means
230	WITH EXPANSIBLE BORE WALL ANCHOR
231	WITH MEANS MOVABLE RELATIVE TO TOOL BELOW GROUND TO CONTROL ECCENTRIC FLUID EMISSION
232	WITH MEANS MOVABLE RELATIVE TO TOOL BELOW GROUND TO STOP FLOW TOWARD BORE BOTTOM
233	.Movable to seal sample receiver at bore bottom pressure
234	.With longitudinally spaced valve seats
235	..Seat engaged to stop upward flow
236	.In sample receiver removable through below-ground tool shaft
237	.Means comprises dropped element
238	.Flow-stopping means includes relatively movable cutter element
239	.With undisturbed core receiver
240	..Movable means adapted to underlie severed core
241	.Stops flow by movement about fixed pivot
242	..Pivot transverse to tool axis
243	.Resiliently biased or composed of flexible material
244	WITH MEANS MOVABLE RELATIVE TO TOOL TO RECEIVE, RETAIN, OR SEVER UNDISTURBED CORE
245	.Core bit closure relative upwardly movable by core
246	.Receiver removable through below-ground tool shaft
247	..With fluid pressure-responsive means to remove receiver or operate latch
248	..Core forming cutting edge or element on receiver
249	.Core-retaining or severing means
250	..Fluid-actuated
251	..Actuated upon relative movement between tool and tool shaft
252	...Relative rotary movement
253	..With element holding retaining or severing means inactive
254	..Mounted on transverse pivot
255	..Sliding wedge type (e.g., slips)
256	WITH RELEASABLE MEANS NORMALLY HOLDING JOINTED SHAFT SECTIONS IN ANGULAR RELATION
257	TOOL REMOVABLE OR INSERTABLE THROUGH OR AROUND DRIVING OR DRIVEN SHAFT OR CASING
258	.Laterally shiftable cutter element movable through shaft
259	..Plural cutter elements longitudinally relatively movable into transverse alignment

TOOL REMOVABLE OR INSERTABLE THROUGH OR AROUND DRIVING OR DRIVEN SHAFT OR CASING
.Laterally shiftable cutter element movable through shaft
260 ..Cutter element engages torque transmitting abutment on shaft when expanded
261 ...With additional torque transmitting abutment on bit head and shaft
262 .Tool movable exteriorly of shaft
263 CUTTER ELEMENT LATERALLY SHIFTABLE BELOW GROUND (E.G., EXPANSIBLE)
264 .With separable means holding tool collapsed above ground only
265 .Plural cutter elements longitudinally relative movable into transverse alignment
266 .Plural selectively shiftable cutter elements
267 .Cutter element shifted by fluid pressure
268 ..With dropped element
269 ..Fluid pressure acts against spring biased part
270 .Cutter element shifted by dropped element
271 .With latch operated by fluid pressure or dropped element
272 .Cutter element shifted by relatively longitudinally movable threaded elements
273 .Cutter element shifted by cam or gear axially rotatable relative to shaft
274 .With shifting mechanism spring biased to operative position
275 ..With separate latch
276 ...Frangible or discardable element
277 ...Latch holds mechanism retracted
278 ....Latch return shifting mechanism to inoperative position
279 ..Cam or gear means movable to shift cutter element
280 ...With forwardly extending noncutting portion
281 ..Cutter element substantially longitudinally movable on shaft
282 ...Plural elements expanded into single socket
283 ...With forwardly extending noncutting portion
284 .Cutter element shifted by longitudinally relatively movable parts
285 ..Toggle or linkage between movable parts
286 ..Cam or gear engaging cutter element
287 ...With separate latch holding cutter element in shifted position
288 ...Cutter element substantially longitudinally movable on shaft
289 ...Cutter element spring biased to retracted position
290 .With latch
291 .Spring biased
292 .Pivoted about substantially longitudinal axis
293 BELOW-GROUND (1) HAMMER, OR (2) IMPACT MEMBERS
294 .Combined with safety joint
295 .With noncutting portion forwardly of sleeve impact member having a cutting portion (e.g., reamer)
296 .Fluid-operated
297 ..Restricted orifice for initially delaying escape of restraining fluid
298 .Continuous unidirectional rotary motion of one telescoping member effects consecutive impacts
299 .Resiliently biased
300 .With releasable means to detachably retain telescoping members against axial reciprocation
301 ..Frangible
302 ..Condition for release adjustable
303 ...Adjustable below ground
304 ..Resiliently biased latch
305 .Telescoping members relatively rotatable
306 ..With means to couple members to prevent relative rotation
307 WITH CUTTING EDGE COVER
308 WITH RECEPTACLE
309 .Removable or insertable through below-ground tool shaft
310 .With helical conveyer
311 .Suspended below bit
312 .Sieve or strainer
313 WITH MECHANICAL CLEANER FOR BIT OR CUTTER ELEMENT
314 WITH WELL-TYPE SCREEN
315 COMBINED
316 WITH RELATIVELY MOVABLE PARTS TO FACILITATE CLEANING WITHOUT DISASSEMBLY
317 WITH MEANS MOVABLE RELATIVE TO TOOL OR SHAFT TO CONTROL BELOW-GROUND PASSAGE
318 .Valve prevents upward flow
319 BELOW-GROUND MECHANICAL MOTION CONVERTING MEANS RELATIVELY MOVING PLURAL CUTTING EDGES
320 WITH TOOL SHAFT DETAIL
321 .Axially telescoping shaft section
322 ..Telescoping motion related to relative axial rotation or oscillation
323 .Helix or helically arranged structure
324 .Means other than tool structure to induce fluent flow
325 .Bore wall engaging means mounted on shaft
326 ..Engaging means advances in adjacent hole
327 BIT AND BIT ELEMENT
328 .Magnetized or with magnet
329 .Bit includes diamond
330 ..Core forming type
331 .Rolling cutter bit or rolling cutter bit element
332 ..Core forming-type bit
333 ...With core-breaking means
334 ..Bit with leading cutter forming smaller diameter initial bore
335 ...Leading fixed cutter
336 ..Rolling cutter bit with fixed cutter
337 ..With drilling fluid supply to bearing
338 ..With rotary or endless carrier
339 ..With drilling fluid conduit details
340 ...Fluid conduit lining or element (e.g., slush tube or nozzle)
341 ..Plural rolling cutters with intermeshing teeth
342 ..Adjustable cutter element
343 ..Wobbling cutter
344 ..Noncutting portion forwardly of rolling cutter (e.g., reamer)
345 ...Longitudinal axis cutter
346 ....Separable support for cutter axle
347 ....Removable axle or bushing
348 ..Longitudinal axis cutter
349 ...With transverse axis cutter
350 ..Laterally offset cutter axis
351 ...Disk blade
352 ....Plural coaxial cutters
353 ...Cone or frustum rolling cutter

BIT AND BIT ELEMENT
.Rolling cutter bit or rolling cutter bit element
354 ..Axle rotatable with cutter
355 ..Circumferentially displaced cutter axes
356 ...Stub axle only
357 ...Detachable multiaxis support or spider
358 ...Mutually contacting cutter supports
359 ....With bearing or seal details
360 ..Cross axle with stub axle
361 ..Cross axle
362 ...Vertically disaligned cross axle sections
363 ...Separable supports
364 ...Removable cross axle or bushing
365 ..Outwardly directed stub axle
366 ..Separable support for stub axle
367 ..Detachable stub axle, bushing or bearing
368 ...Releasable cutter securing device
369 ..Stub axle cutter securing means
370 ...Released by antifriction bearing disassembly
371 ..With bearing or seal details
372 ...Antifriction type
373 ..Disk cutter
374 ..Specific or diverse material
375 ...Welded
376 ..Nonsymmetrical bit (e.g., nontracking)
377 ..Spiral rib or tooth row
378 ..Irregular tooth cutter row
379 .Cutting edge self-renewable during operation
380 .Unsupported abrading particle type (e.g., shot)
381 .Cutting edges relatively longitudinally movable during operation
382 .Adjustable cutter element
383 ..Adjustment presents different cutting edge
384 ..Radially adjustable
385 .Bit with leading portion (e.g., pilot) forming smaller diameter initial bore
386 ..Leading portion is separable starter
387 ..Leading portion is core forming type
388 ..Leading portion is a screw
389 ..Impact type
390 ...Plural larger diameter steps
391 ..Plural larger diameter steps
392 ..Leading portion is forked rotary type
393 .With fluid conduit lining or element (e.g., slush tube)
394 .With helical-conveying portion
395 ..Impact type
396 .Axially parallel side wall with transverse cuttings retaining portion
397 .Forked rotary nontracking
398 .Nonsymmetrical bit
399 ..With bore wall engaging guide
400 ..Nonsymmetrical arrangement of opening for cuttings or fluid
401 .Cutting edges facing in opposite axial directions
402 .Casing shoe type
403 .Core forming type
404 ..With core-breaking means
405 ..Impact type
406 .Noncutting portion forwardly of cutting portion (e.g., reamer)
407 ..Impact type
408 .With bit guide or bore wall compacting device
409 .Specific or diverse material
410 ..Insert
411 ..Welded
412 .Plural separable cutter elements
413 ..Independently attachable
414 .Impact type
415 ..Combined with rotary
416 ..Noncircular bore cutter
417 ..With internal-fluid passage
418 ...Plural openings
419 ...Cruciform
420 ..Cruciform
421 .Symmetrical forked rotary type (e.g., fishtail)
423 WEDGING SLIP ASSEMBLY FOR SUPPORTING A PIPE OR ROD
424 MISCELLANEOUS (E.G., EARTH-BORING NOZZLE)

CLASS 177 WEIGHING SCALES

DECEMBER 1990

1	PROCESSES
2	WITH RECORDER
3	.With computing or totalizing means
4	.With recording of a factor additional to weight
5	..Weight identification
6	.Of both gross and tare on one record receiver
7	.Responsive to means sensing removal of material
8	.With record receiver advance
9	..By weigher
10	.External marker operator
11	..Recorder element mounted on poise
12	..Responsive to timer, or completion of weighing operation
13	.Weigher sets type
14	SELECTIVELY PRESET CYCLE FLOW TERMINATOR
15	WITH TOTAL REGISTER
16	.Integrator of steadily flowing fluent material
17	.Of distinct successive loads
18	.Cycle totalizer
19	..Single totalizer operated by plural weighers
20	...By preliminary translation of rotary weighers
21	...By intermittently used one of plural weighers
22	..Weigh beam operated
23	..Discharge valve operated
24	..Weigh chamber operated
25.11	COMPUTER
25.12	.Electrical
25.13	..Digital
25.14	...Multiplying or dividing scales
25.15	....Price
25.16	....Calorie counting
25.17	....Counting
25.18	...Combinatorial scales
25.19	..Weight history
26	.Computer and weigher independently operated by common load holder
27	..Weighing beam dial and computing beam dial with separate poises
28	...Separately pivoted beams
29	...Tabular-type computer
30	.Ancillary weigher
31	.Independent computer scale and index
32	..With adjustable linkage to weight offsetting means
33	...Coaxial pointers
34	.Tabular-type computer
35	..Slidable poise moves table
36	..Weigher moves table
37	...Rotatable drum
38	....With manually operated reading assistance
39	....With additional reading window in drum housing
40	...Encased disc
41	...Externally movable table
42	...Axially rotatable
43	..Calibrated index arm
44	..Table integral with balance beam
45	WITH ALARM OR SIGNAL
46	.In unbalance
47	.In balance
48	..Electric
49	.Of additional counterpoise
50	WITH TESTING
51	.Coin size
52	WITH CONVEYING MEANS HANDLING SUCCESSIVE RECEIVERS
53	.Receiver presence responsive
54	.Rotary
55	..Separate weigh chamber
56	.Separate weigh chamber
57	..Simultaneously operated weigh chambers
58	PLURAL WEIGHERS ON ROTARY SUPPORT
59	DISCHARGE FROM WEIGHER TO RECEIVER
60	WEIGHER RESPONSIVE MATERIAL CONTROL
61	.Translatable among plural sources
62	.Remote discharge station
63	.With additional material-presence responsive means
64	..Controlling feed
65	...To alternating weigh chambers
66	...And discharge
67	....Overload removal
68	.Flow terminator requiring external reset
69	..Plural feed, simultaneous cutoff
70	..Sequential feeding, plural ingredients
71	..Feed and discharge
72	...Manually initiated discharge
73	..Receiver operated reset
74	..Latch release
75	...Sequential latch release
76	...With magnetic operator
77	....With serially connected switch
78	...Reciprocating closure
79	..Holding magnet
80	.With external intercontrol
81	..Initial partial charge
82	.Overload removal
83	.Rotary
84	..Power-driven
85	..Electromagnetic latch release
86	..With preliminary translation
87	...Initiates feed control operation
88	....By cam on weigh chamber
89	.Stationary weigh chamber
90	.Alternating weigh chambers
91	..Divided unit
92	...With relatively oscillating partition
93	....Pivoted feed diverter
94	...Oscillating
95	....Valve means correlated with weigh chamber
96	.....Opened by gravity
97	.....Mounted externally of weigh chamber
98	..Feed diverter
99	...With discharge valve
100	..Valved discharge
101	..Siphon discharge
102	..Oscillating
103	.Plural chambers
104	..With simultaneous discharge
105	.Discharge valve or gate
106	..Opening initiated by feed terminator
107	..Closing initiates feed
108	..Power actuated
109	...Clutched
110	....Magnetically operated
111	..Mechanically interconnected with feed valve
112	..With linkage operator
113	..Latch release
114	.Correlated feed and discharge
115	..Oscillating weigh chamber
116	.Feed
117	..Weigh chamber placement initiates flow
118	..With receiver retainer
119	..Conveyer
120	...With feed cutoff
121	...Variable speed
122	..Sequentially actuated flow control means
123	...Distinct controllers
124	WITH LOCK OR SEAL
125	CHECK CONTROLLED
126	COLLAPSIBLE, FOLDABLE, KNOCKDOWN
127	.With carrying case
128	WITH REPAIR OR ASSEMBLY MEANS
129	CONVERTIBLE

CONVERTIBLE
130 .Hand truck
131 .Hand manipulatable load pickup device
132 STRUCTURAL INSTALLATION
133 .Geographic
134 ..Pit
135 ...With guard or shield
136 .Vehicle
137 ..Running gear springs
138 ...With indicator disconnect means
139 ..Unitary load transferrer and weigher
140 ..Hand truck
141 ..Hydraulic weigher
142 .Building
143 .Refrigerator
144 .Furniture or room fixture
145 WITH WEIGHER LOADING OR UNLOADING MEANS
146 .Jack
147 .Hoist
148 .Hand manipulatable weigher
149 ..Container type
150 EQUAL-ARM BEAM TRANSFER MECHANISM
151 LOAD-HOLDER TRANSFER MECHANISM
152 .Unitary with weigher
153 ..Transmission disconnect means
154 MEANS HOLDING LOAD-DRIVEN ELEMENT AGAINST MOTION
155 .Separates bearing parts
156 .At transmission mechanism
157 .Balance beam
158 ..Plural beams
159 .At indicator
160 SACK SUPPORT
161 LOAD GUIDE
162 .Chute
163 .Rail
164 PRESET
165 .Responsive to load receiver
166 .Ancillary pointer
167 .Fixed index or dial
168 .Spring support
169 ..Effective length of spring
170 ..Lever
171 .Lever balance-type beam
172 ..Load-arm length
173 .Indicator structure
174 ..Rack connection
175 .In transmission
176 ..Counterweight
177 ILLUMINATED
178 .Projected
179 WITH BEARING SHIELD
180 WITH CASING CLOSURE OR SHIELD
181 .Transparent
182 ..Lens
183 LUBRICATOR
184 SHOCK ABSORBER, DAMPER
185 .Electrical or magnetic
186 .Indicator mechanism
187 .Load-holder transmission mechanism
188 ..Fulcrumed lever
189 .Load holder
190 EQUAL ARM TYPE
191 .With counterweight manipulating means
192 ..Elongated flexible counterweight
193 .With indicator tower
194 .With bias toward balance
195 ..By spring
196 ...Torsion bearing type
197 .With longitudinally movable poise
198 .With check link
199 PLURAL DISTINCT LOAD HOLDERS WITH COMMON EVALUATOR
200 .Load comparing type
201 SELF-POSITIONING
202 .Offsets over or under load
203 .Supplemental weight offsetting means
204 ..Transferred responsive to self-positioning means
205 ..Remote indicator
206 ..Slidable weight
207 .Buoyancy type
208 .Fluid transmission to pressure gauge
209 ..Interconnected load-supporting expansible chamber
210 R .Electrical current generating or modifying
210 C ...Capacitors
210 EM ...Electromotive or electromagnetic force
210 FP ...Frequency changes or pulse counts
211 ..Strain gauge
212 .Repositioning in response to deflection under load
213 ..Electrically actuated poise
214 ...With indicator of poise position
215 ...Speed control of poise
216 .Pendulum
217 ..Plural opposed
218 ...Translatable
219 ...Tape-driven
220 ..Drives indicator through transmission mechanism
221 ...Flexible member
222 ...Gearing
223 ....Rectilinear rack
224 ..Pointer fixed to pendulum
225 .Spring
226 ..Temperature compensator
227 ...Modifies leverage
228 ...Acts on spring
229 ..Cantilever
230 ..Force modifier connects spring and load-holder
231 ..Load-holder steadying structure and spring carried by casing
232 ..Coil spring in sleeve casing
233 ...With vertical pointer slit
234 ..Magnified indication of spring deformation
235 .Counterweight type
236 ..Variable fulcrum
237 ..Progressive counterweight pickup
238 WITH CASING
239 .Base
240 ..With standard
241 ...Carrying additional housing
242 ....Access opening in cylindrical wall
243 ...Penetrated by load-holder support
244 ASSEMBLY SUPPORT
245 COMBINED
246 BEAM
247 .Coarse and fine sliders
248 .Plural counterweight pickup
249 .Transmission interconnected with slidable counterweight
250 .Counterweight retention
251 .Adjustable load-arm connection
252 .Plural counterweights
253 LOAD HOLDER
254 .Fluid transmission
255 .Sway or tilt prevention
256 .Pivotally interconnected transmission levers
257 ..Integrated force delivered by lever extension from interconnection
258 ..Separate lever loaded by load-holder levers
259 ...With additional serially connected lever
260 .Adjusting means
261 .Movably mounted pivot
262 .Scale pan
263 ..Suspended

129	.Dynamic seal or fluid curtain
130	..Recirculating
165	WITH FLUID OR MECHANICAL MEANS TO ACCUMULATE ENERGY (I) DERIVED FROM MOTION OF VEHICLE OR (II) OBTAINED FROM OPERATION OF VEHICLE MOTOR, AND GIVE UP THE ENERGY (1) WHEN NEEDED FOR VEHICLE ACCELERATION OR (2) TO POWER AN AUXILIARY SYSTEM OF THE VEHICLE
166	WHEELED INFANT CARRIAGE OR CRIB WITH DRIVEN MEANS FOR RECIPROCATING IT LONGITUDINALLY
2.1	MOTOR SUPPLIED WITH POWER FROM EXTERNAL SOURCE
2.2	.Source comprises or includes energy derived from force of nature (e.g., sun, wind)
167	WITH MEANS FOR CONTROLLING OPERATION RESPONSIVE TO ELECTROMAGNETIC RADIATION, MAGNETIC FORCE, OR SOUND WAVES RECEIVED FROM SOURCE, OR REFLECTED FROM OBJECT OR SURFACE, LOCATED APART FROM VEHICLE
168	.Having controlling means adapted to interact with stationary means which describes course of vehicle's travel
169	.Radiation, force, or waves reflected from external object or surface
170	WITH MEANS RESPONSIVE TO SPEED OF VEHICLE FOR MAINTAINING SPEED AT, OR PREVENTING IT FROM EXCEEDING, A PARTICULAR VALUE
171	.Including device to signal to operator existence of unusual or unintended speed
172	.Including device responsive to centrifugal force
173	..And means to prevent tampering or unauthorized use
174	..Having electrical switch
175	.Including fluid pressure actuated servomechanism
176	..And electrical quantities comparison means for development of input pressure
177	..And one or more electrical components for establishing or regulating input pressure
178	.Including electrically actuated servomechanism
179	..And electrical quantities comparison means for development of electrical input
180	SKI- OR SKATE-TYPE VEHICLE FOR IMPARTING MOVEMENT TO A PERSON STANDING THEREON
181	.With power means or a portion thereof affixed to or built into the ski or skate
182	INCLUDING ONE OR MORE SKI-LIKE OR RUNNER MEMBERS
183	.Member substitutable for wheel type support structure
184	..With propulsion element of endless track type
185	...Track comprises substitute for or addition to propulsion element of traction wheel type
186	.With at least one surface-engaging propulsion element
187	..Element shuffles along support surface
188	..Spiral type element
189	..Plural elements connected to and spaced along the plural throws of a common crankshaft
190	..Endless track type element
191	...Protruding from member
192	...Plural tracks with interconnected drive or support means
193	...With vertically movable track support located intermediate the forward and rearward extremities of the track
194	..Plural discrete elements protruding from a wheel, hub, or shaft
195	...Each element moves relative to wheel, hub, or shaft
196	..Element comprises traction wheel
197	WITH MEANS FOR DETECTING WHEEL SLIP DURING VEHICLE ACCELERATION AND CONTROLLING IT BY REDUCING APPLICATION OF POWER TO WHEEL
198	PORTABLE CARRIER SUPPORTS MOTOR VEHICLE IN TOTO AND IS PROPELLED THEREBY
199	WITH POWERED, GROUND-ENGAGING MEANS FOR PRODUCING, OR ASSISTING IN THE PRODUCTION OF, LATERAL MOVEMENT OF THE VEHICLE (E.G., FOR PARKING)
200	.Comprising rotatably driven auxiliary wheel or endless track
201	..Driven by frictional engagement with tire of vehicle traction wheel
202	..Driven by auxiliary electric or fluid motor
203	.Comprising reciprocably driven stepper or rotatably driven cam
204	WITH DEVICE FOR PROGRAMMABLY OPERATING VEHICLE'S STEERABLE WHEELS DURING PARKING MANEUVER THEREOF
6.2	STEERING BY DRIVING
6.24	.Combined with manual steering
6.26	..Interlocked
6.28	...Electrical
6.3	...Fluid
6.32	...Lever and/or linkage
6.34	....With controller cam
6.36	....Lost motion type
6.38	....Geared
6.4	....With flexible and/or yieldable link
6.44	.Auxiliary steering motor
6.48	.Independently operable drive motors
6.5	..Electrical
6.54	.Variable contact
6.58	.Controlled from rotatably mounted superstructure
6.6	..Steering responsive to rotary movement of superstructure
6.62	.Combined
6.64	.Swinging traction frame responsive to differential drive
6.66	.Reversing drive to traction element
6.7	.Endless flexible track
7.1	SPECIAL DRIVING DEVICE
7.2	.Spiral type element
7.3	.Reaction jet propulsion
7.4	.Propeller type
7.5	.Vehicle mounted winch for pulling vehicle
8.1	.Stepper

	SPECIAL DRIVING DEVICE
	.Stepper
8.2	..Step or abutment ascending/desending type vehicle
8.3	..Wheel and stepper type
8.4	...Nonsupporting pusher type stepper
8.5	..With alternately lifted supporting base and leg
8.6	..With alternately lifted feet or skid
8.7	..Endless or rotary type
9	.Portable track
9.1	..Endless, flexible
9.21	...Track substituted for drive wheel
9.22	...Guided by walking attendant
9.23	...With attendant station
9.25	....Rider straddles vehicle (e.g., motorcycle)
9.26	...Convertible from wheel type
9.28	....Track remains with vehicle
9.3	.....Wheel or track contacts ground
9.32	...With auxiliary obstacle surmounting means
9.34	...With ground wheel
9.36	....Opposite and laterally spaced
9.38	....Steering
9.4	...With hitch
9.42	...Combined
9.44	...With track-related steering means
9.46	....Pivoted track frame
9.48	...Laterally extendable track
9.5	...Track support mounted for vertical movement
9.52	....Adjustable
9.54	....With spring
9.56	.....Longitudinally extending coil spring
9.58	.....Leaf or torsion spring
9.6	......Transversely extending
9.62	...Toothed wheel drive
9.64	....Belt or chain driven
10	..Annular
11	MOTOR-CARRYING ATTACHMENTS
12	.Driven steering wheel type
13	..Single wheel
14.1	VEHICLE TRAINS
14.2	.Motorized trailer
14.3	..All motors supplied from power plant of a single vehicle
14.4	.Drive means betwen vehicles through coupling
14.6	.Tractor drive effort varied by pull exerted by trailer
14.7	.Vehicle drive drives other vehicle wheel
14.5	.Overload release
15	ADDITIONAL TRACTION WHEEL
16	TRACTION WHEEL ATTACHMENTS
19.1	STEERED BY WALKING ATTENDANT
19.2	.Who steerably controls steerable wheel
19.3	.Handle movement controls vehicle drive
20	WITH ROLLERS
21	SPECIAL WHEEL BASE
22	.Five or more wheels
23	..Driven steering wheel type
24	...Stub-axle type
24.01	..Having tandem steerable or translatable wheels or wheel sets
24.02	..Displaceable wheel shifts or proportions load
24.03	..Independently rotatable side-by-side dual wheels
24.04	..With differential housing integrally fixed to vehicle frame
24.05	..Rocker beam houses drive means
24.06	..Plural propelling motors
24.07	...Separate driving motor for each drive wheel
24.08	..Each wheel positively driven
24.09	..With interaxle differential
24.1	..With drive interrupt means to either tandem drive wheel
24.11	..Driven tandem wheels
24.12	...One serially driven by other
24.13	..Spring rocker beam
205	.With mechanism of occupant-powered type for developing torque for supplementing, alternating with, or replacing torque of motor
206	..And means for controlling motor in response to either operation of occupant-powered mechanism or vehicular movement resulting therefrom
207	..Including member utilized in common by occupant-powered mechanism and by motor for transmitting torque output of each to wheel
208	.Collapsible or knockdown for storage or transport
209	.With means for changing number of supporting wheels, or for adjusting relative location thereof
210	.Having only three wheels
211	..Including steerable and driven wheel
212	...All wheels motor driven
213	...Having motor mounted to swing with steerable wheel
214	....Electrical-type motor
215	..Including two wheels driven and having common axis of rotation
216	...Electrical-type motor
217	...Including endless element for transmitting drive to wheels
218	.Having only two wheels
219	..Arranged in tandem
220	...Electrical-type motor
221	...Including rotating element for frictionally engaging and driving a wheel
222	....And means for steering that wheel
223	...Including steerable and driven wheel
224	....Both wheels motor driven
225	...Having frame element or fender constituting also exhaust or fuel passageway or fuel reservoir
226	...Including longitudinally extending shaft for transmitting drive to wheel
227	...Including resilient means for mounting driven wheel
228	...Including resilient means for mounting motor
229	...With means for cooling motor
230	...With change-speed means between motor and driven wheel
231	...Including endless element for transmitting drive and means for adjusting tension of element
36	STEAM TRACTION ENGINES
37	.Driven steering wheel type
38	..Four wheels driven
39	.With boiler leveler
40	.Spring mounted on axle
232	WITH MEANS FOR (1) PROTECTING MOTOR FROM IMPACT OF COLLISION, (2) UTILIZING MASS OF MOTOR TO ABSORB FORCE THEREOF, OR (3) PROTECTING OCCUPANT REGION OF VEHICLE FROM IMPACT-INDUCED SHIFTING OF MOTOR
41	WITH LEVELING DEVICE
233	HAVING FOUR WHEELS DRIVEN
234	.With means for steering all driven wheels

HAVING FOUR WHEELS DRIVEN
.With means for steering all driven wheels
235 ..Comprising articulated frame and means for pivoting one portion of frame relative to other portion about vertical axis located centrally of vehicle
236 ..In a path of travel other than that produced by turning the front wheels and the rear wheels substantially equally and oppositely
237 ..Comprising swingable, plural-wheel-carrying axles on individual, vertical axes of pivot
238 ...At least one axle being offset from its pivotable axis
239 ...Including longitudinally extending, endless element for transmitting drive to wheels
240 ..Including rotatable shaft extending longitudinally from wheels at one end of vehicle to wheels at other end for transmitting steering force thereto
241 ..Including longitudinally extending, endless element for transmitting drive to wheels
242 .Including pump and fluid motor, or generator and electric motor, for driving one or more wheels
243 ..And another means for driving the remaining driven wheels
244 .With means for braking either (1) one or more driven wheels or (2) structure transmitting drive to wheel
245 .Including separate mechanical assemblies for transmitting drive to each of two wheels at one end of vehicle
246 ..And assemblies for each of two wheels at other end, also
247 .With manually operated means for disengaging drive to one or more, but fewer than all, of the four wheels
248 .With differential means for driving two wheel sets at dissimilar speeds
249 ..And means for locking out the differential means
250 ...Manually operated type of lockout means
251 .Including longitudinally extending, endless element for transmitting drive to wheels
252 HAVING AT LEAST ONE WHEEL BOTH DRIVEN AND STEERABLE
253 .Steerable wheel has exclusive axis of pivot (i.e., stub-axle type)
254 ..Including flexible, axially rotatable means having one portion fixed to vehicle and another portion pivotable with wheel for transmitting drive thereto
255 ...Pivotable portion of means has additional structure of gearlike nature in driving engagement with corresponding structure on wheel
256 ...Means comprises rotatable shaft containing plural universal joints
257 ....Having at least one joint located on each side of axis of pivot
258 ...Pivotable portion of means includes ball or socket element of ball-and-socket type universal joint
259 ....Joint includes intermediate ball, floating in groove, for positively engaging ball with socket
260 ...Pivotable portion of means includes gear element of intermeshing gear type universal joint
261 ....Joint includes at least one gear element rotatable on axis of pivot and intermeshing with gear element on pivotable portion
262 .....Joint also includes gear element on fixed portion engaging gear element on axis of pivot and vertically offset from gear element on pivotable portion
263 ...Having axis of pivot disposed between parallel planes defined by opposite sides of wheel
264 .With driven axle, mounting two or more wheels, swingable about axis of pivot, and motor mounted to swing therewith
265 ..Having axle offset longitudinally from axis of pivot
266 .With driven axle, mounting two or more wheels, swingable about axis of pivot, and swingable also about a horizontal axis
267 .With driven axle, mounting two or more wheels, swingable about axis of pivot, and shaft for transmitting drive coincident with axis
268 WITH BELT OR HARNESS FOR RESTRAINING OCCUPANT, AND MEANS WHEREBY THE BELT OR HARNESS CONTROLS, OR IS CONTROLLED BY, THE FUNCTIONING OF A VEHICLE SYSTEM OR COMPONENT
269 .System comprises transmission or element thereof
270 .System comprises ignition circuit or starter circuit or element of one or other
271 WITH MEANS FOR PROMOTING SAFETY OF VEHICLE, ITS OCCUPANT OR LOAD, OR AN EXTERNAL OBJECT
272 .Responsive to absence or inattention of operator, or negatively reactive to attempt to operate vehicle by person not qualified mentally or physically to do so
273 ..Utilizing weight, or lack thereof, of operator on seat or other support to determine presence or absence
274 .Responsive to engagement of portion of perimeter of vehicle with external object
275 ..And causing application of vehicle brake
276 ...Brake comprises or includes element moved or deformed into engagement with ground
277 ...And also interruption of at least one operational system of the vehicle or its motor
278 ....System comprises clutch
279 ..And causing interruption of an electrical system of the vehicle or its motor
280 ..And causing operation of vehicle steering system
281 .Comprising either movable closure member or fastening device therefor responsive to forward or rearward movement, or variations therein, of vehicle
282 .Responsive to sensing of acceleration, deceleration, or tilt of vehicle
283 ..And causing interruption of ignition circuit
284 ...And also impeding flow of fuel

WITH MEANS FOR PROMOTING SAFETY OF VEHICLE, ITS OCCUPANT OR LOAD, OR AN EXTERNAL OBJECT
.Responsive to sensing of acceleration, deceleration, or tilt of vehicle
285 ..And causing disruption of drive train between motor and wheels
286 .Comprising vehicle system or component responsive either to position of movable closure member or to status of fastening device therefor
287 .By preventing unauthorized or unintended access or use
288 ..Reponsive to failure of taxicab operator to activate fare meter upon boarding of passenger
289 ..Comprising device, mechanism, or system for either repositioning a movable or removable closure member or operating a fastening device therefor
290 .Responsive to weight of cargo load transported by vehicle
53.1 MOTOR AS SOURCE OF POWER FOR OTHER MACHINE
53.2 .Other machine is creeper drive on motor vehicle
53.3 .Other machine is mounted by three point hitch (i.e., Ford-Ferguson hitch)
53.4 .Hydraulic drive to other machine
53.5 .Electric drive to other machine
53.6 .Drive to other machine by power take-off (PTO) driven by wheel or axle of motor vehicle
53.61 ..PTO mounted directly on or engaging drive wheel to rotate therewith
53.62 ..PTO constantly driven with wheel selectively driven
53.7 .Drive to other machine by power take-off (PTO) at front end of vehicle
53.8 .Other machine is vehicle accessory
54.1 POWER
54.2 .With spring powered motor
55 .On lower running gear
56 ..Rear axle and body
57 ...Longitudinal shaft
58 ..Frame
59 ...Pivoted support on axle
60 ...Electric
61 ..Pivoted support on axle
62 ..Rear axle
63 .Motor moved by axle
291 .Having specific motor-to-body-frame relationship
292 ..Including change-speed gearing, or clutch, mounted in common with motor
293 ...With member or mechanism for controlling gearing or clutch, and means for minimizing transfer of movement, caused by operation of motor, to member or mechanism
294 ...With means enabling repositioning of motor and gearing or clutch
295 ...With wheeled auxiliary frame, resiliently joined to body frame, for supporting motor and gearing or clutch
296 ..Including means on body frame or motor for handling exhaust
297 ..Having motor shaft parallel to rotational axis of driven wheel
298 ..Including means enabling repositioning of motor
299 ..Including auxiliary frame for motor and resilient means for connecting auxiliary frame to body frame
300 ..Including means of nonsupporting nature for minimizing operation-induced movement of motor
65.1 .Electric
65.2 ..Combined with nonelectric drive means
65.3 ..With means on vehicle for generating power for the electric motor
65.4 ...Generating means is driven by a prime mover
65.5 ..With motor in or moveable with wheel
65.6 ..With gearing between electric motor and drive wheel
65.7 ...Gearing is a changeable ratio gearing
65.8 ..With electronic devices (logic gates, semi-conductors, vacuum tubes, etc.) in control circuit
301 .Including traction motor of turbine type driven by fluid product of combustion
302 .Including traction motor of kind driven by expansible fluid from source external of motor
303 ..Gas is product of treatment of a volatile fluid (e.g., gas is steam)
304 ...With means to condense gas discharged from motor
305 .Including traction motor of kind driven by noncompressible fluid received under pressure from a pump
306 ..Vehicle includes another system operated by same fluid
307 ..Having variable displacement type motor or pump
308 ..Having separate motor for each driven, surface-engaging member
309 .With means for handling motor exhaust
310 .With means to generate steam for a propulsion purpose
68.1 .With means to guide and/or control air for power plant cooling
68.2 ..With further means to utilize power plant cooling air for other purposes
68.3 .With means to guide and/or control combustion air for power plant
68.4 .Radiators and condensers, mounting
68.6 ..With protector for the radiator or condenser
68.5 .Battery mountings and holders
69.2 .Hoods
69.21 ..Pivoted about horizontal axis extending transversely of vehicle (e.g., alligator type or front end pivot)
69.22 ..With noise suppression means
69.23 ...Noise suppression means prevents hood from vribrating (i.e., anti-rattlers)
69.24 ..With access openings having moveable or removeable closures
69.25 ..Water deflectors
69.3 .With means to increase idle speed of internal combustion engine to compensate for accessory load
69.4 .With fuel supply for internal combustion engine
69.5 ..Engine uses gaseous fuel
69.6 .Vehicle has plural power plants
69.1 .Underpans
337 TRANSMISSION MECHANISM
338 .Condition responsive (e.g., responsive to speed, load, etc.)
339 .With temperature control, lubrication or sealing
340 .With laterally movable wheel
341 .Wheel drives parallel wheel
342 .Tire directly driven
343 ..With particular gear structure
344 .Assembly feature

	TRANSMISSION MECHANISM
345	.Traction aid
346	.With protective guard or casing
347	.Mechanical movement transmission
348	.Final drive axle movable
349	..Rigid axle
350	...Belt or chain drive
351	....With tensioning means
352	...With lateral support between the differential or axle housing and the vehicle frame
353	...With sprung differential
354	....And differential support feature
355	....And final gear drive
356	...And final gear drive
357	..Belt or chain drive
358	..Swinging axle, single pivot
359	..With sprung differential
360	...And differential support feature
361	...And final gear drive
362	...And transverse leaf spring suspension
363	..And final gear drive
364	.Variable speed or direction
365	..Plural
366	..Belt or chain
367	..Fluid drive
368	..Friction drive
369	..Planetary
370	.With brake
371	.Final gear drive at each of two parallel wheels
372	..Planetary
373	..Belt or chain
374	.Gear transmission relationship to frame or axle
375	..Transmission is differential
376	.Shaft relationship to frame or shaft
377	.Transmission support
378	..Differential or axle housing
379	..Shaft
380	...With propeller shaft casing, (e.g., torque tube)
381	...Vibration damping
382	..Flexible support
383	.With particular drive coupling
384	..Relative axial movement
385	..Drive connection to wheel
76	COMPENSATING DEVICES
314	WITH PLURAL FUEL TANKS
315	MANUALLY ACTUATED CONTROLLING DEVICES
316	.By other than hand or foot of operator
317	.On mine car vehicle
318	.On delivery-type vehicle
319	.With rein means
320	.With vehicle control extension
321	.With plural control stations
322	..Side-by-side
323	..For single control means
324	..With tool or equipment control
325	..Braking controllable by passenger
326	.With movable control station or seat position
327	..Movable cab
328	...Tilting
329	..Simultaneously movable seat and control
330	..Seat on seat portion movable to alternate positon
331	...With tool or equipment control
332	.With tiller-type handle
333	.Multiple vehicle functions controllable by single device
334	.With adjustable operator engageable control
335	.With fuel or air throttle control
336	.With transmission control
78	.Steering shaft
79	STEERING GEAR
131	.Steering by terrestrial guide
132	.With fluid power assist
133	..With alternate emergency power means (e.g., pump, gearing etc.)
134	..Between articulated wheeled vehicle sections
135	...Combined with another steering mode
136	...Reciprocating power assist
137	....Including flexible power transmitting means
138	....Including interengaging gear means
139	....Plural working members
140	..Each wheel steerable
141	..With condition modulated steering
142	...Electrical control
143	...Speed condition only
144	..With swinging vehicle frame transversing axle
145	..Including flexible power transmitting means
146	..Steering column supported
147	...Including rack gear means
148	..With rack and pinion gearing intermediate steering shaft and power assist
149	..Having rotary working member
150	..Having flexible working member
151	..Steering linkage includes interengaging gear means
152	..With plural working members
153	...Working member movement traverses vehicle path
154	..Working member movement traverses vehicle path
155	...Moves separate rod for each wheel steering arm
156	....Via intermediate pivoted member
157	.....With link member interconnecting pivoted member and rod
158	....Working member is moving cylinder
159	...Working member part engages wheel steering arm
160	...Working member part engages tie rod
161	..Movable working member engages wheel steering arm
162	..Movable working member is moving cylinder
163	..With linkage intermediate working member and wheel steering arm
79.1	.With electric power assist
79.3	.With mechanical power assist
79.4	..Swinging axle
79.5	..Truck
64	DUST GUARDS
89.1	BODIES
89.11	.With passenger compartment having article receiving or removing means
89.12	.Tractor and similar vehicle cabs
89.13	.Movable cab or operator's station
89.14	..Tilting
89.15	...Via power or power enhancing means
89.16	..Overmotor cab
89.17	.Movable body portion facilitating engine access
89.18	..Cab portion
89.19	.Overmotor cab
89.2	.With means for handling exhaust of a motor
90	.Dashboards
90.6	.Footboards and pedal guards
311	FRAME
312	.With structure adapted to receive or support a motor, change-speed gearing, or other power train element
313	MISCELLANEOUS

171	.Mounting or suspension means
172	..Elastic suspension means
173	.Particular shape
174	..Variable thickness
175	SOUND-MODIFYING MEANS
176	.Lens
177	.Intensifying horn
178	..Collapsible
179	..With particular mounting structure
180	..Material
181	..With vibratory filaments
182	..With resonant chamber
183	...Double wall
184	..Having apertures in walls
185	..With sound-path restriction
186	...Adjustable
187	..Plural intensifying portions
188	...Similar portions
189	..Multisection housing
190	...Separable
191	..With external sound deflector
192	..Particular shape of the horn
193	...Spiral sound path
194	...Doubly folded sound path
195	...Wide angle annular outlet
196	.Within tubular means
197	..Adjustable
198	.Housing or enclosure (e.g., sound confining and absorbing)
199	..Speaker type
200	..Machine type enclosure
201	...Offfice type devices (e.g., typewriters, teleprinters, etc.)
202	...Electical type devices (e.g., transformers, motors, etc.)
203	...Reaction engine test chamber
204	...Internal-combustion engine
205	...Partial enclosure or shroud
206	.By wave interference
207	.Mechanical vibration attenuator
208	..Damping of flexural structure
209	..Relatively moving parts
210	.Sound absorbing fence or screen (e.g., jet engine or vehicle noise)
211	.Combined
212	.Muffler, fluid conducting type
213	..Reaction engine type
214	...Upstream (e.g., intake silencer)
215	...With adjustable outlet nozzle
216	....Longitudinally adjustable section
217	...Removable silencer unit (e.g., mobile)
218	...Ground installation silencer
219	...With adjustable internal baffles
220	...With disparate fluid mingling
221	....Liquid
222	...With sound absorbing material
223	..Silencer for firearms
224	..Sound absorbing ventilating duct or curb (e.g., a/c, heat, air flow type)
225	..With fan to assist fluid flow
226	..With adjustable fluid flow
227	..Pipe-muffler (e.g., tail pipe type)
228	..With exhaust pipe
229	..Carburetor, burner, or compressor intake silencer
230	..Pneumatic type motor (e.g., air hammer, etc.)
231	..With solid particle separator (e.g., spark arrestor, vacuum cleaner, etc.)
232	..Separate distinct units serially connected
233	..Liquid motion silencer
234	...Water-closet type
235	..Underwater discharge

SOUND-MODIFYING MEANS
.Muffler, fluid conducting type
236 ..With muffler cut-out
237 ..With pressure relief safety valve
238 ..Multiple distinct inlets and/or outlets
239 ...Outlets
240 ..Manifold type
241 ..Adjustable muffler (i.e., internal or external parts)
242 ..Mouthpiece (e.g., telephone, microphone, etc.)
243 ..With repair, replacement, or quick disassembly
244 ..Corrosion prevention
245 ...Internally coated parts
246 ...Nonmetallic
247 ..Straight-through passage
248 ...Continuous conduit
249 ....With expansion chamber
250 .....And side branch
251 .....And multi-passage
252 ...With sound absorbing material
253 ...With muffler bypass
254 ....Valve controlled
255 ...Expansion chamber
256 ..With sound absorbing material
257 ...And multi-passage
258 ...Pervious material interposed in flow path
259 ..With disparate fluid mingling
260 ...Liquid
261 ....Sprayed
262 ...Induced by suction
263 ....Motion induced
264 ..With baffle or baffle structure
265 ...Retroverted
266 ....And side branch chamber
267 ...Coaxial foraminous walls
268 ...Multi-passage
269 ...Expansion chamber type
270 ....With alternating partial baffles along the length of casing
271 ....With adjustable or flexible wall
272 ....Plural chambers
273 ....And side branch chamber
274 ....With centrifugal flow
275 ....And multi-passage
276 ...Side branch
277 ...Movable baffle
278 ....Biased
279 ...Spiral
280 ....Helical
281 ...Perpendicular and/or oblique
282 ...Casings
283 ....Air or liquid cooled
284 .Sound absorbing panels
285 ..Load bearing block type structure
286 ..Specific acoustical properties or dimensions
287 ..Movable/foldable panels
288 ..Cellular
289 ..Light permeable
290 ..Multilayer panel or wall structure
291 ...With membrane outer layer
292 ...With perforated or porous face and honeycomb-like core
293 ..With channels or cavities in surface layer
294 ..Materials
295 .Space absorbers
296 .Methods

CLASS 182 FIRE ESCAPES, LADDERS, SCAFFOLDS

1	MEANS MAINTAINING STEP LEVER ON HORIZONTALLY PIVOTED LADDER
2	MEANS MAINTAINING PLATFORM LEVEL ON ANGULARLY MOVABLE SUPPORT
3	TORSO HARNESS
4	.Window washer type
231	.Attached to strand wound on reel, and means for retarding unwinding of strand
232	..Including spring for rewinding strand
233	..Fluid resistance brake
234	..Movable, friction brake element applied by centrifugal force
235	..Friction brake and occupant-operated mechanism for applying brake during descent
5	.Strand-engaging, with descent retarder
6	..Leg or loop type
7	..With seat
8	.Ladder-associated
9	.With pole encircling or grasping means
10	INCLINED CABLE SUPPORTING CARRIER TRAVELING THEREALONG
11	.Occupant-controlled
12	HORIZONTAL TRAVERSING - ACTUATION, CONTROL, OR RESPONSE
13	.Occupant actuation or control
14	..Occupant-controlled ascent or descent
15	..Holding means
16	.With handle or steering means
17	.Holding means
18	WITH INDICATOR, SIGNAL OR ALARM
19	AUTOMATIC CONTROL
20	CONVERTIBLE
21	.Ladder
22	..Ladder of different type
23	...Stepladder prop pivoted to inverted position
24	....Stile and prop end abutting
25	....With spreader or tie
26	...Stepladder type with variable prop and ladder connection
27	..Scaffold
28	..Table
29	...Ironing board
30	....Board as pivoted ladder prop
31	.....Crossed leg board support
32	...Wash stand
33	..Chair or stool
33.2	...Bottom and legs invert to unveil ladder
33.3	...Steps on chair back
33.4	....Fixed steps
33.5	...Step withdraws from beneath seat
33.6	....End-for-end turnout
34	..Bed
35	.Furniture
36	TRAVERSING, TRACK-MOUNTED
37	.With occupant elevating or lowering means
38	.With vertically spaced second track
39	.Ground- or floor-engaging
40	UPWARDLY EXTENSIBLE FLEXIBLE LADDER OR ESCAPE
41	.Self-rigidifying
42	ENDLESS CONVEYER ESCAPE
43	.Top and bottom support
44	..With pivoted or folding attached carrier
45	PITCHED ROOF CONFORMING SCAFFOLD
46	WITH INSULATION
47	.Fire or heat shield
48	CHUTE OR ESCAPE TOWER FOR PERSONNEL
49	.With ladder
50	WITH PROJECTOR OR PROJECTILE
51	WITH FLUID HANDLING
52	.Conduit is support
53	DETACHABLE WINDOW SEAT TYPE
54	.With step or additional platform
55	.Platform below window
56	.Extensible platform
57	.Interior wall-engaging means
58	..Depending
59	...Saddle
60	....Wall-clamping means
61	....Exterior strut
62	..With outside strut or brace
62.5	WITH EXTENSIBLE VERTICAL AND NONVERTICAL SECTIONS
63	WITH TRANSPOSITIONING AND ERECTION MEANS
64	.Ladder rotatably mounted on supporting base (e.g., vehicle)
65	..Base rotates on vertical axis
66	...Reciprocating ladder section
67	....Extending section stiles supported on fixed section stiles
68	..Pivotally mounted extension ladder on horizontal axis
69	...Lazy tong-extending means
70	WITH STORAGE DEVICE FOR SUPPLE ESCAPE
73	.Reel
74	..Escape of ladder type lowers upon release of latch
75	...With retarder or brake on reel
236	..With means for retarding unwinding of strand type escape
237	...Including spring for rewinding strand
238	...Fluid resistance brake
239	...Movable, friction brake element applied by centrifugal force
240	...Friction brake and occupant-operated mechanism for applying brake during descent
71	.Occupant weight-actuated descent device
72	.Occupant-controlled descent retarder
76	.Wall-embedded
77	DOOR AND LADDER
78	.Door operates ladder
79	..Guided rigid ladder
80	...Guide on wall or frame
81	..Door and ladder on opposite sides of wall
82	WALL- OR FLOOR-ATTACHED
83	.Wall-mounted platform, with ladder
84	..Movable platform with movable ladder
85	..Movable ladder
86	...Pivoted
87	.Embedded scaffold support member
88	.Retractable or collapsible beneath floor, track-mounted
89	.Spring-biased pivoted step or ladder
90	.Independent rung or step
91	..Pivoted
92	..Readily detachable
93	.Ladder
94	..Wall penetrating operating means
95	..Folding, rigid components
96	...Parallelogram type
97	..Pivoted
98	...Normally counterbalanced to inoperative position
99	..With portion overhanging roof
100	.Single pole or strand
101	LADDER WITH VERTICALLY MOVING PLATFORM OR ESCAPE
102	.Ladder supports platform
103	..Stile or prop-guided carriage
104	PIVOTALLY CONNECTED LADDERS, MUTUALLY SUSTAINING
105	.Central upright ladder section supported therebetween
106	WITH HANDRAIL OR GUARD FOR LADDER
107	SAFETY DEVICE FOR GROUND-SUPPORTED LADDER
108	.Terminal foot or shoe
109	..Diverse ground-engaging means

SAFETY DEVICE FOR GROUND-SUPPORTED LADDER
.Terminal foot or shoe
110 ..Suction cup
111 ..Pivotal component
112 SAFETY DEVICE, PLATFORM ASSOCIATED
113 .Railing
114 WITH SUCKER ROD SUPPORT
115 LADDER AND PLATFORM
116 .Platform with ladder as support
117 ..Between spaced ladders
118 ...Facing ladders
119 ....Readily detachable platform
120 ..Detachable step, single ladder
121 ...Plural rung-engaging
122 ....Stile-contacting
123 ..Plural platforms
124 ..Ladder with pivoted ladder prop and pivoted platform
125 ..Platform positioned by ladder and prop divergence
126 ..Prop-pivoted platform
127 LADDER WITH LAND VEHICLE
128 SCAFFOLD SUPPORTED INTERNALLY ON SHAFT
129 COMBINED
130 PLURAL PLATFORMS, COMMON SUPPORT
131 .Mounted for relative motion
132 .Stepped
133 POLE OR STRAND GRASPING-TYPE CLIMBER
134 .Foot- or leg-attachable
135 ..With diverse holding means for occupant
136 .Alternate grasping
137 BODY CATCHER
138 .Sheet or net type
139 ..Tensioned peripherally
140 ..Folding base
141 PLATFORM WITH ELEVATING OR LOWERING MEANS
142 .Suspended
143 ..Simultaneously operable suspension means
144 ...Platform continuously level
145 ..Separate (i.e., nonwork) support for suspension means
146 ...Platform holding detent coacts with support
147 ..Plural distinct elevating means
148 .Operating means on platform
149 .Trestle-type support, beam-elevating
150 SUSPENDED PLATFORM
151 KIT OR SEPARABLE PARTS
152 UNITARY FOLDABLE, RIGID SCAFFOLD OR LADDER
153 .Trestle
154 ..Crossed leg
155 ..Legs foldable parallel to beam axis in all planes
156 .Collapsible ladder
157 ..Lazy tong type
158 ...Mechanical or power-extending means
159 ..Parallel moving side, pivoted rung or step
160 ...Storage providing component
161 ...Plural element stile
162 ...With collapsible prop
163 ..Folding stile
164 ...Rung-to-rung stile sections
165 LADDER WITH PIVOTED PROP
166 .Section extensible below prop pivot
167 ..With step registration
168 .Coplanar extension with prop pivoted to lower section
169 .Single rear prop, pole type
170 .Rear prop, laterally moving
171 .Converging and contacting stiles or props
172 .Lateral prop
173 .Hinged to top-step rear flange
174 .Pivoted to top-step cleat
175 ..With cleat spaced spreader or tie
176 ...Multiple link folding spreader
177 .Overlapping stile and prop
178 WITH STACKING MEANS
179 SELF-SUSTAINING
180 .Ladder
181 .Scaffold horse (i.e., trestle)
182 ..Intermediate extensible shaft
183 ..Longitudinally extensible beam
184 ..Extensible leg
185 ..Unitary leg and beam coupler brace
186 ..Beam clamped by leg actuation
187 SCAFFOLD EXTERNAL OF SHAFT
188 .Horizontally adjustable
189 SINGLE STILE, STRAND OR POLE
190 .Flexible
191 ..With sliding carrier
192 ...Load-responsive brake
193 ...Occupant-actuated brake
194 LADDER
195 .Slidable nested single rung units
196 .Flexible
197 ..With spacer
198 ...Rung-attached
199 ..Plural spaced strand stile member
200 .Supporting surface compensating means
201 ..Stile extension
202 ...Equalizing extensions
203 ...Rung-engaging means
204 ...Increment adjustment
205 ....Ratchet type
206 .With hook or grab
207 .Extension
208 ..Mechanical or power-extending
209 ..With latch
210 ...Section movement actuated
211 ....Spring-biased latch
212 ...With remote control of latch
213 ....Elevating cable actuated
214 .With spacer means
215 .Rung sandwiched between elements of composite stile
216 .Tie rod assembled
217 .With reinforcing means
218 ..Bow string type
219 ..For side rail
220 .Independent support for rung
221 LEG OR SHOE ATTACHABLE POLE CLIMBER
222 PLATFORM
223 .Relatively movable sections
224 SCAFFOLD HORSE BEAM OR LEG
225 .Relatively movable
226 ..Beam clamped by pivoting leg
227 ..With intermediate staff
228 RUNG, STEP OR RUNG-STILE CONNECTION
229 PUTLOG OR SPACER
241 MOVABLE STRAND ESCAPE AND MEANS FOR RETARDING TRAVEL OF STRAND
230 MISCELLANEOUS

101	.Master control unit
102	..Including redundant circuitry
103	.For door operating systems
104	..With safety or security features
105	.For safety of passengers or protection of equipment
106	..Under excess weight condition
107	..During seismic or other building movement
108	.For electro-mechanical braking systems
109	..Emergency braking
110	.For hydraulic motive power systems
111	..With speed control
112	.For electric motive power systems
113	..Leveling systems
114	..Utilizing auxiliary power
115	..Vibration and "start bump" control
116	..With speed control
117	...In terminal zones
118	...Speed pattern generators
119	...Of AC motor
120	...Of DC motor
121	.Call registration systems
122	..Single car controllers
123	...For freight lifts or mine hoists
124	..Group controllers
125	...With automatic dispatching
126	...With security or priority preemption
127	...With assignment of calls to cars
128	...With assignment of cars to zones
129	..Floor selectors
130	.Monitoring, Signalling, and Indicating Systems
131	..For load sensing and passenger counting
132	..Of passenger activity
133	..Of operating parameters
134	..Position detectors
135	..Status indicators
136	...Of position
137	...Of direction or responding car
138	...For dispatching
139	..Information communication systems
140	..Alarm systems
28	CONTROL MECHANISM
29.1	.For manual control
29.2	.For hydraulic control
30	.Door actuated
31	..Electric
32	.Landing stops
33	..Lock
34	.Limit
35	..Electric
36	..Carrier actuated
37	...Deflected rope
38	.Speed controlled
39	..Electric
40	.Well obstruction
41	..Electric
42	.Operator actuated
43	..Electric
44	..Rope controllers
45	...Running rope
46	.Controller locks
47	..Door actuated
48	...Electric
49	...Locked door
50	....Electric
51	DOOR MECHANISM
52 R	.Motor actuated
52 LC	...Landing and car doors operatively coupled
53	..Common motor shaft
54	..Separate motors
55	.Flexible screens
56	.Sliding doors
57	..Locked door
58	..Vertical movement
59	...Locked door
60	...Sliding coupler
61	.Locks
62	HATCH MECHANISM
63	.Lever opener
64	.Sliding coupler
65	.Direct contact
66	.Vertically slidable hatch
67	WELL-END CUSHIONS
68	FLUID GOVERNORS
69	.Car-supported pump
70	.Counterweight
71	EMERGENCY CABLES
72	CABLE RELEASERS
73	CAR BRAKES AND CATCHES
74	.Door controlled
75	.Landing chairs
76	..Car supported
77	.Driven catch devices
78	..Rotating gear
79	..Well supported
80	.Car supported

CAR BRAKES AND CATCHES
.Car supported
81 ..Cable controlled
82 ...Positive
83 ....Rail side
84 ....Sliding
85 ...Rail face
86 ...Rail side
87 ....Eccentric
88 ....Wedge
89 ..Speed controlled
90 ...Rail side
91 ....Vertically pivoted
92 ..Operator controlled
93 ...Rail side

CLASS 188 BRAKES

DECEMBER 1990

1.11	WITH CONDITION INDICATOR
1.12	TO RETARD ROLLING OF CASTER
2 R	VEHICLE
2 A	..Braking torque regulators
2 D	..Bowdin wire-operated
2 F	..Wheelchair brakes
3 R	.Train
3 H	...Fluid pressure vehicle
4 R	.Wheel and ground
4 B	...Rotary brake member
5	.Ground-engaging
6	..Sprag
7	..Anchors
8	..Sled
9	.Wagon
10	..Four-wheel
11	..Divided beam
12	..Running gear support
13	...Divided beam
14	..Hayrack type
15	..Retreating shoe
16	.Independent wheel
17	.Hub or disk
18 R	..Motor vehicle
18 A	....Disc brakes
19	.Cart
20	.Children's carriages
21	.Truck
22	..Two-wheel
23	...Ground-engaging
24.11	.Velocipede (e.g., bicycle, etc.)
24.12	..Including mechanism for opposed gripping of wheel rim or tire
24.13	...Wheel rim configured to cooperate with components
24.14	...Having means to increase braking force (e.g., self-energizing brake, etc.)
24.15	....Variable leverage actuator
24.16	....Plural brakes having common actuator
24.17	...Actuation controlled by back-pedalling
24.18	...With means to lock brake in actuated position
24.19	...Having means to adjust spacing between brake component and wheel rim or tire
24.21	...Having center-pull, cable-type actuator for mechanism
24.22	...Specific actuator element structure
25	..Roller
26	..Hub or disk
27	..Pivoted wheel
28	.Clasp
29	.Top shoes
30	.One-way
31	.Positive lock
32	.On ground
33	.Railway
34	..Train
35	..Wheel and rail
36	...Chock
37	....Roller shoe
38	..Track
38.5	...Plural abutments selectively engageable by vehicle-carried means, e.g., car-spotter
39	...Rotary shoe
40	...Slot
41	..Rail
42	...Carrier type
43	...Grippers
44	....Automatic
45	....Wheel clamps
46	..Equalizing series
47	..Connected trucks
48	..Maximum traction type
49	..Four wheel opposing
50	...Open center
51	...Divided beam
52	..Four wheel spreading
53	...Divided beam
54	....Locomotive type
55	....Mine car type
56	..Clasp
57	..Top shoes
58	..Disk on axle
59	...Side shoes
60	..Positive lock
61	..One-way
62	..On track
63	...Catchers
64	WHEEL AND STRAND
65.1	STRAND
65.2	.With attaching means
65.3	.Plural brakes
65.4	.Tortuous grip
65.5	..Adjustable
67	ROD
	WHEEL
68	.Frictional and positive
69	.Positive lock
70 R	.Axially and transversely movable
70 B	...Self-energizing
71.1	.Axially movable brake element or housing therefor
71.2	..With clutch between load and brake assemblage
71.3	..Antipodal, relatively separable brake elements
71.4	...Annular elements
71.5	..Plural rotating elements (e.g., "multidisc")
71.6	..With means for cooling brake
71.7	..With means to adjust for wear of brake
71.8	...Self-adjusting means
71.9	....Including unidirectionally rotating screw
72.1	..With means for actuating brake element
72.2	...Self-force-increasing means
72.3	...And means for retracting brake element
72.4	...By fluid pressure piston
72.5	....Piston for each of plural elements
72.6	....And/or mechanical linkage
72.7	...By inclined surface (e.g., wedge, cam or screw)
72.8	....Screw or helical cam
72.9	...By pivoted lever
73.1	..Structure of brake element
73.2	...Circumferential or circumferentially spaced
73.31	..Retainer for brake element
73.32	...Having means to facilitate changing brake element
73.33	....By manipulation of brake actuator
73.34	.....Pivotable actuator
73.35	...Having actuator and means to prevent vibration thereof
73.36	....Including means to prevent vibration of brake element
73.37	...Having means to prevent vibration of brake element
73.38	....Spring
73.39	...Including torque member supporting brake element
73.41	...Including actuator pivotable in plane parallel to axis of rotation of wheel
73.42	....And slidable in that plane
73.43	...Including actuator slidable in plane parallel to axis of rotation of wheel
73.44	....On axially extending pin
73.45	.....Plural pins

	WHEEL
	.Axially movable brake element or housing therefor
	..Retainer for brake element
73.46	...Including actuator fixed on torque member
73.47	...Having closed loop type housing
74	.Transversely movable
75	..Opposing
76	...Rim grip
77 R	..Strap
77 W	....Wrap band type
78	..Expanding
79	...Multiple sets
323	...Three shoes
324	....Rotary cam operatively abutting shoe ends
325	...Two shoes
326	....Operators at both ends of each shoe
327	....Anchors adjacent unoperated ends
328	.....Common anchor pivot or abutment
329	......Rotary cam abutting shoe ends
330	.....Rotary cam abutting shoe ends
331	....Adjacent ends operatively connected and not anchored to support
332	.....Rotary cam abutting shoe ends
333	.....One end anchored
334	....Anchors at alternate ends
335	...Radially guided shoe
336	...Continuous split band
337	....Anchored intermediate ends
338	.....Rotary cam operatively abutting band ends
339	....Rotary cam operatively abutting band ends
340	...Lateral guide for shoe
341	...Anchor
342	...Self-energizing
343	...Wedge operator
79.51	..Having wear take up or compensating structure
79.52	...Temperature responsive
79.53	...Feeler actuated
79.54	...Actuated in conjunction with other braking element
79.55	...Actuated by brake operating lever
79.56	...Having separate adjustment actuator mechanism
79.57	...Manually operated
79.58	....Brake operator length adjusted
79.59	....Mounted between shoe and a support member
79.61	.....Causes direct, simultaneous adjustment of plural shoes
79.62	...Located on or in an operator
79.63	...Mounted between shoe and a support member
79.64	....Between plural supporting shoes
80	.Rotary shoes
82.1	.One-way brakes
82.2	..Reversible
82.3	..With disabler
82.34	...Integral with engager
82.4	..With hold out
82.5	..Combined or plural diverse types
82.6	..Biased flexible band
82.7	..Pivoting or flexing detent (e.g., pawl)
82.74	...Axially moving
82.77	...On rotating member
82.8	..Dragged wedging member
82.84	...Rolling
82.9	..Axially moving
83	.Continuous
84	.Fixed brake
85	.Intermittent
371	PLASTIC DEFORMATION OR BREAKAGE OF RETARDER ELEMENT (E.G., IMPACT ABSORBER)
372	.And subsequent reverse deformation
373	.Element twisted
374	.Element extruded through or around tool
375	.Element severed by cutting tool
376	.Frangible element
377	.Crushable element
378	INERTIA OF DAMPING MASS DISSIPATES MOTION (E.G., VIBRATION DAMPER)
379	.Resiliently supported damping mass
380	..Supported by mechanical spring
266	INTERNAL-RESISTANCE MOTION RETARDER
267	.Using magnetic flux
268	.Using yieldable or fluent solid or semisolid
269	.Using diverse fluids
270	.Operating against ambient atmosphere
271	.Combined with surface-friction brake
272	.Combined with mechanism retarded by brake
273	..Restricting exhaust from engine
274	.With heat exchanger
275	.With valved regulator responsive to inertia of valve member
276	.With means compensating for change in temperature of viscosity
277	..Including thermostatic valve responsive to temperature
278	...Manually adjustable valve
279	.Resistance responsive to changing condition
280	..Relative speed of thrust member or fluid flow
281	..Relative direction of thrust member
282	...By valved orifice in thrust member
283	..Position of load-linked valve
284	..Position of thrust member relative to chamber
285	...With means for adjusting responsiveness
286	...Having orifice in chamber wall
287	....Plural, successively encountered orifices
288	...Having varying area of chamber passageway for thrust member
289	...Having varying area of metering rod extending through orifice in thrust member
290	.Including unidirectionally rotating load member
291	..With clutch between load and brake assemblage
292	..Cooperating with peripherally mating jointly rotating member
293	..Driving relatively moving element which causes flow of brake fluid
294	...With means for regulating movement of element
295	...Comprising rectilinearly reciprocating piston
296	..Driving radial vanes which cause toroidal flow of brake fluid
297	.Including thrust member and variable volume chamber
298	..Forming flexible wall enclosure for fluid
299	..With control means remote from chamber
300	..With means for locking parts together temporarily
301	..Causing air suction in chamber
302	..Rectilinear reciprocation of piston caused by arcuately oscillating load member
303	...Pistons reciprocating oppositely in nonaligned cylinders

INTERNAL-RESISTANCE MOTION RETARDER
.Including thrust member and variable volume chamber
..Rectilinear reciprocation of piston caused by arcuately oscillating load member
304 ...Load member located between dual pistons
305 ...Piston reciprocating along axis of oscillation
306 ..Arcuately oscillating thrust member
307 ...Resilient or radially urged vane
308 ...Causing fluid flow through hub of thrust
309 ....With manually adjusted valve in hub
310 ...With means for manually adjusting fluid flow
311 ..Thrust member reciprocating in enclosed chamber
312 ...Having piston rod extending through ends of chamber
313 ...Causing fluid flow between compartments of chamber
314 ....With reservoir for fluid
315 .....Annular reservoir
316 ....Through or around piston within chamber
317 .....Through orifice in piston
318 ......And passage external to chamber
319 ......With manually regulated valve for orifice
320 ......Tortuous path orifice
321.11 ..Including means connecting thrust member to load
322.11 ..Specific retarder component structure
322.12 ...Including protective shield for retarder
322.13 ...Including valve
322.14 ....Foot valve
322.15 ....Piston valve
322.16 ...Including seal or guide
322.17 ....Between piston rod and cylinder
322.18 ....Between piston and cylinder
322.19 ...Cylinder structure
322.21 ...Having means for filling or recharging
322.22 ...Thrust member structure
322.5 .Using viscosity of fluid medium
381 FRICTIONAL VIBRATION DAMPER
OPERATORS
105 .Multiple
106 R ..Vehicle
106 F ....Fluid and mechanical
106 A ....Inside wheel
106 P ....Plural systems
107 ...Railway
108 .Vehicle step
109 .Seat
110 .Automatic
..Vehicle
111 ...Trips
112 R ...Train
112 A .....Anti-sway control
113 ...Four-wheel
114 ...Hub
...Auxiliary mechanism on tongue
115 ....Rear wheel
116 .....Divided beam
117 ....Front wheel
118 .....Divided beam
...Movable tongue
119 ....Rising and falling
120 ....Rear wheel
121 .....Divided beam
122 ....Front wheel
123 .....Divided beam
...Railway
124 ....Train
125 .....Drawbar
126 ......Speed-responsive
127 ....Strain release
128 ...Sled
129 ...Rise and fall
130 ....Rotary
131 ...Turning
132 ...Horse pull
134 ..Differential movement
135 ..Momentum
136 ...Wedging shoe
137 ...Electric control
138 ....Vehicle
139 ...Gravity control
140 R ...Vehicle
140 A .....Servo brake
141 ....Fluid-pressure control
142 ....Draft control
143 ....Wheel and ground
144 ....Railway
145 .....Winding
146 ......Axle
147 .....Train
148 ......Push rod
149 ......Drawbar
150 ....Speed-responsive
151 R .Fluid pressure
151 A ...Safety devices
152 ..Road vehicle
344 ...Velocipede
345 ...With multiple master cylinders
346 ...With friction drag response
347 ...With hydraulic quick-slack-take-up pulsator
348 ...With power quick-slack-take-up
349 ...With front rear brake apportioner
350 ...With steering gear control
351 ...With hydraulic automatic slack adjuster
352 ...With bleeding or filling device
353 ...With hydraulic lock
354 ...With independent wheel control
355 ...With nonmanual fluid-power source
356 ....Vacuum power
357 .....And manual
358 ....Liquid power
359 .....And manual
360 ....And manual
361 ....Wheel brake operating assembly
362 ....With transversely movable internal brake
363 .....Motor between shoe ends
364 ......Dual opposed piston motor
365 ....Radially acting motor
366 ....Arcuate or annular motor
367 ....Axially acting
368 ....Axially acting motor
369 ....With axially movable brake member
370 .....Spot type
153 R ..Rail vehicle
153 D ....Diaphragm
153 A ....Rim grip type
154 ..Exhaust of propelling motor
155 .Fluid current
156 .Electric and mechanical
157 ..Electric motor on staff
158 .Electric
159 ..Dynamic
160 ...Additional current
161 ..Electromagnet
162 ...Rotary motor
163 ...Solenoid
164 ...Magnetic circuit
165 ....Rail-engaging
166 .Spring
167 ..Vehicle
168 ...Draft release
169 ....Wagon

	OPERATORS
	.Spring
170	..Fluid-pressure release
171	..Electric release
173	...Vehicle
174	.Weight
175	..Draft control
176	..Vehicle body

216	.Release mechanism
217	.Brake-thrust distributors
	ELEMENTS
218 R	.Brake wheels
218 XL	...Disk type
218 A	...Dust guard
219.1	.Beams or beam assemblies
219.6	..With movable, reversible or adjustable heads
220.1	...Pivoted head
220.6	....Lockingly adjustable
221.1	.....Yieldably readjustable
222.1	..With fixed head or thrust block
222.6	...Integral head and beam
223.1	...Trussed beam
223.6	....Head or block held by tension element
224.1	.....Tension adjusted by terminal nut
225.6	..Trussed beam
226.1	...Integral tension and compression member
228.1	...Tubular compression member
228.6	...H, I, L, T, U, V, or X cross section compression member
229.1	...With strut-type fulcrum
229.6	....Reversible
231	..With fulcrum
232	...Reversible
233	...Spaced
233.3	..With guides and/or guards
233.7	..H, I, L, T, U, V, or X cross section beam
234	.Shoe fasteners
235	..Locomotive type
236	..Heads
237	..Combined wheel guards
238	..Multiple shoes
239	...Superposed
240	...Linear arrangement
241	....Frangible connection
242	..Interlocking heads and shoes
243	...Longitudinal key
244	...Longitudinal insertion
245	...Side insertion
246	...Clamps
247	..Shoe-back lugs
248	...Cast in
249	..Flexible shoes
250 R	.Shoes
250 A	...Transversely expandable
250 H	...One-piece
250 C	...Multiple web
250 D	...Web and flange connections
250 E	...Slotted shoes and vibration dampers
250 F	...Anchor and operator fittings
250 G	...Surfaces and fasteners
250 B	...Shoe construction
251 R	..Composite
251 A	....Materials
251 M	....Metallic surfaces
252	...Flanged
253	....Recessed
254	...Shells
255	...Cast metal matrix
256	....Nonmetallic inserts
257	....Faces
258	....Backs
259	...Flexible
260	..Chills
261	..Recessed
262	..Rotary
264 R	.Cooling and lubricating
264 A	...Air-cooled, axially engaging
264 AA	....Auto wheel type
264 B	...Lubrication
264 D	...Liquid cool
264 E	...Wet friction surface and internal resistance
264 F	...Operating fluid cooling
264 CC	...Contained coolant
264 G	...Insulators
264 P	...With pump
264 W	...External wheel covers
265	.Locks

CLASS 190 TRUNKS AND HAND CARRIED LUGGAGE

DECEMBER 1990

1	CONVERTIBLE
2	.Bed
3	.Bureau
4	..Top and front opening
5	...Compartment top
6	..Front opening
7	...Compartment front
8	.Chair
9	.Shelved
10	..Desk flap
11	.Desk or table
12 R	..Camp kits
12 A	....Combined with or convertible to table or chair
13 R	.Wardrobe
13 B	...Curtains
13 C	...Followers
13 D	...Ironing boards
13 E	...Irons, pads, latches, etc.
13 F	...Shoe box
13 G	...Hats
13 H	...Tray type
14	..Extensible
15 R	...Telescopic
15 A	.....Convertible to enlarged open-top container
15.1	.Luggage carrier
16	SAMPLE CASES
17	.Link-supported tray
18 R	SUPPORTING DEVICES
18 A	..Wheeled
19	TRUNKS
20	.Circular end
21	.Extensible and sectional
22	..Telescopic
23	.Wall
24	.Frames and interior braces
25	.Reinforcing strips
26	.Protecting harness
27	.Harness
28	.Valances
29	.Tray movers and supporters
30	..Lid-operated, movement
31	..Pivoted tray
32	...Vertical pivot
33	..Sliding tray
34	..Link connections and props
35	.Trays
36	.Followers
37	.Corner shields and buffers
39	.Handles
40	.Materials
100	HAND LUGGAGE (SUITCASE, BRIEFCASE, ETC.)
101	.Theft resistant
102	.With means for securing an accessory
103	.Variable volume
104	..Telescoping sections
105	...Selectively adjustable
106	.With means to bias luggage mouth into open configuration
107	.Knockdown or collapsible
108	.Plural
109	.Compartmented
110	..Removable compartment or compartment-forming member
111	..Independently closable compartments
112	.With plural access openings
113	.Closure panel struck from luggage wall
114	.Coacting closure elements hinged to opposed side walls
115	.With handle
116	..Detachable
117	..Plural interengaging elements
118	..Closure locking means manipulated via handle
119	.With means to fasten the hand luggage in closed condition
120	..And means to prevent inadvertent or unauthorized opening
121	..Fastening means secured to mouth frame
122	.Including frame or frame members substantially surrounding luggage mouth
123	..Including means to facilitate attachment to the hand luggage

47	.Bar
48	.Conduit plow
49	.Third-rail shoe
50	.Trolley
51	..Common wire passing
52	..Detachable
53	..Nonunderrunning
54	..Indefinite path
55	...Bow
56	...Roller
57	..Multiple contact
58	...Tandem
59	..Heads
59.1	...Sliding contact
60	...Swivel
60.1	....Center bias
60.2	...Lateral swing
60.3	...Vertical swing
60.4	...Axial slide
60.5	...Pole couplings
61	...Wheel to head contactor
62	...Ice clearers or preventers
63	...Wheels
63.1	....Quick release
63.2	....Lateral slide
63.3	....Universal mount
63.4	....Slidable pins
63.5	....Pin fasteners
64	..Poles
65	...Frames
66	..Stands
67	...Fluid pressure erector
68	...Spring erector
69	....Torsion
70	....Tension or compression
71	..Rope protectors
72	..Guards and finders
73	...Constantly operative
74	....Fixed
75	....Spiral cam replacer
76	....Star wheel
77	...Normally operative
78	....Automatic
79	....Rope-retracted
80	.....Lateral swing
81	.....Longitudinal swing
82	...Normally inoperative
83	....Automatic
84	....Rope-actuated
85	.Trolley retrievers
86	..Erector release
87	...Fluid pressure erector
88	...Spring erector
89	....Toggle
90	..Fluid pressure-retracted
91	..Spring-retracted
92	...Rope-actuated
93	....Slack take-up
94	..Weight-retracted
95	.Nonretracting trolley stops

1.1	INTERRELATED MOTOR AND BRAKE CONTROL
1.2	.Sensed condition responsive control of motor or brake
1.21	..Brake
1.22	...And motor
1.23	...Speed or acceleration responsive
1.24	..Speed or acceleration responsive
1.25	.Plural diverse brake means
1.26	.Motor energy control having adjusting and holding device, with means on brake control to override holding device
1.27	..Holding device engaged by electric means
1.28	...Magnetic holding device
1.29	..Mechanical holding device engaged by mechanical means
1.3	...Device or means including a threaded shaft, rack or rathet
1.31	.Brake control having holding device, with means on motor control to override holding device
1.32	..Holding device responsive to motion, speed, or acceleration
1.33	...Holding device comprising brake valve operated by solenoid.
1.34	..Holding device engaged by electric means
1.35	...Holding device comprising brake valve operated by solenoid
1.36	.Brake engaged when motor energy deactivated brake disengaged when motor energy activated
1.37	..Electric motor
1.38	...Cam actuated brake
1.39	...Electrically actuated brake
1.4	..Internal combustion type motor
1.41	...Controls brake valve
1.42	....Vacuum actuated brake
1.43	.Brake condition change modifies motor condition
1.44	..Brake actuation interrupts ignition circuit of fluid motor
1.45	..Brake actuation decreases or eliminates fluid energy input to motor
1.46	...By closing throttle valve
1.47	...By preventing increasing operation of motor energy control
1.48	..Brake actuation opens switch to electric motor
1.49	...Mechanically actuated brake
1.5	....Lever disengages switch
1.51	.Decreasing fluid energy input to motor actuates brake
1.52	.Control means selectively operates motor energy input and brake
1.53	..Electric motor
1.54	...Fluid actuated brake
1.55	...Electrically actuated brake
1.56	..Foot operated control means
1.57	...Motor and brake control including interconnected elements
1.58	...Pivots and translates
1.59	....Pivots about intermediate fulcrum
1.6	...Pivots about two fulcrums
1.61	...Pivots about intermediate fulcrum
1.62	...Lever reciprocates on moveable supports at both ends
1.63	...Pivots for sequential operation
1.64	..Control means including fluid passage
3.21	VORTEX-FLOW DRIVE AND CLUTCH
3.22	.With means to effect torque reversal
3.23	.With brake
3.24	..Alternatively operative clutch and brake
3.25	.With additional drive or clutch
3.26	..Simultaneously operative clutches
3.27	..Alternatively operative clutches
3.28	.Including drive-lockup clutch
3.29	..Having fluid-pressure operator
3.3	...With auxiliary source of pressure
3.31	..Having speed-responsive operator
3.32	.Alternatively operative drive and clutch
3.33	.Fluid-pressure operator for engaging clutch
3.34	VORTEX-FLOW DRIVE AND BRAKE
3.51	TRANSMISSION CONTROL AND CLUTCH CONTTROL
3.52	.Planetary transmission and coaxial clutch
3.53	..Including separate, reversing pedal
3.54	.Common control
3.55	..Power operated clutch
3.56	...Electromagnetically operated
3.57	...Fluid-press operated
3.58	....Electrically triggered
3.59	....Vacuum operated
3.61	..Stepped ratio transmission
3.62	...With control lever
3.63	.Interrelated (e.g., with interlock)
4 R	TRANSMISSION CONTROL AND BRAKE
4 A	..Automobile type
4 B	..Internal resistance brake
4 C	..Forward and reverse gearing
5	.Back-pedaling brake
6 R	..Hub brake
6 A	....With change speed transmission
6 B	....Rotatable axle
7	.Automatic brake
8 R	..Responsive to drive release
8 A	....Cable

	TRANSMISSION CONTROL AND BRAKE
	.Automatic brake
	..Responsive to drive release
8 C	....Coil brake

33 C	.....Coil
34	...Shaft thrust
35	...Pilot mechanism
36	....Brake band
37	...Transversely moving
38	....Ball or roller
39	....Positive
40	...Electric
41 R	..One-way engaging
41 S	....Spring
41 A	....Sprags
42	...Free-engine type
43	...Reversible
43.1	....Pivoted pawls
43.2	....Slidable pawls
44	....Ball or roller
45	...Ball or roller
45.1	...Wedging pawl or block
45.2	...Two-point gripper
46	...Positive
47	...Manual control
48.1	.Plural clutch-assemblage
48.2	..Including electrically-actuated clutch-assemblage
48.3	..Diverse clutch-assemblages
48.4	...Including three or more assemblages
48.5	...Including one clutch-assemblage having interdigitated clutch-elements
48.6	....And another clutch-assemblage having unirotationally-engaging clutch-elements
48.7	..With means to actuate or de-actuate clutch-assemblages sequentially
48.8	..Associated with three or more shafts
48.9	...Alternatively-operative assemblages
48.91	....Having common clutch-element support
48.92	..Including unirotationally-engaging clutch-elements
49	..Parallel vehicle wheels
50	...Free wheel
51	..Reversing
52	.Progressive engagement
53 R	..Frictional and positive
53 A	....Expansible or contractible blocker or blocker actuator means
53 B	....No blocker means present
53 C	....Spring-like elements as friction means
53 D	....Magnetic or electro-magnetic operated friction means
53 E	....Radially extending blocker lugs or arm extending axially between friction members (no end blocker)
53 F	....Annular friction member as an end blocker means, i.e., blocker lugs, pins, or teeth
53 G	....Shifter held from disengagement (lock); also devices where detent acts as blocker, plus friction means
53 H	....Ratchet and pawl or similar synchronizing means
54	.Torque responsive
55	..Yielding
56 R	..Release on overload
56 C	....Coil clutch
56 F	....Fluid clutches and operators
56 L	....Clutch element on pivoted lever
57	.Fluent material and mechanical
58 R	.Fluent material
58 A	...Vanes on shearing members
58 B	...Smooth surfaces on shearing members
58 C	...Axially movable shear type fluid clutches
59	..Axially movable piston
60	..Transversely movable piston
61	..Gear-pump type
62	.Plow-lifting type
63	.Free-engine type
64	.Velocipede free wheel
65	.Axially and transversely engaging
66	.Axially engaging
67 R	..Positive
67 A	....Pilot clutch cause synchronous engagement of positive clutch
67 P	....Pin
70	..Spreading
70.11	..Interposed, mating clutch-elements
70.12	...With means to cool or lubricate clutch parts
70.13	...With removable or replaceable or interchangeable clutch parts
70.14	...Including surface characteristics of clutch-element
70.15	....Axially-tapered mating surfaces
70.16	...With torque connection between clutch-element and its shaft
70.17	....Resilient torque connection (e.g., for damping vibration)
70.18	.....Including chordally-disposed connection
70.19	....Axially-slidable connection
70.2	.....Spline connection for multiple clutch-elements
70.21	...With means to move multiple clutch-elements axially and sequentially

	CLUTCHES
	.Axially engaging
	..Interposed, mating clutch-elements
70.22	...With means to move clutch-element axially and latch into engaged or disengaged position
70.23	...With cam or wedge contacting clutch-element or pressure plate for axial movement thereof
70.24	....By cam surface on bell-crank
70.25	...With adjustable means to move clutch-element axially (e.g., to compensate for wear)
70.26	....Including plural adjusting screws (e.g., to equalize pressure angularly)
70.27	...With spring means to move clutch-element axially
70.28	....To separate engaged clutch-elements
70.29	....And actuator lever pivoted on pressure plate
70.3	...With actuator lever pivoted on pressure plate or back plate to move clutch-element axially
	.Transversely engaged
71	..Positive
72	..Interior and exterior
73	...Opposing
74	..Interior
75	...Expanding
76	....Radial
77	....Split ring
78	.....Cam operated
79	..Exterior
80	...Strap
81 R	....Multiple folds
81 C	......Coil
82 R	.Operators
82 P	...Rack and pinion operator
82 T	...Temperature operator
83	..Multiple for same clutch
84 R	..Electric
84 P	....Photo-cell operator
84 A	....Electromagnetic axially engaging; coil concentric with clutch shaft and different shaft than armature
84 AA	.....With multiple clutches
84 AB	.....With multiple coils
84 B	....Coil and armature on same shafts axially engaging
84 C	....Fixed concentric coil, axially engaging
84 PM	....Permanent magnet
84 T	....Transversely engaging
84 E	....Electro-static
85 R	..Fluid pressure
85 A	....Axially engaging-rotating motor and clutch
85 AA	....Axially engaging clamping rotating motor and clutch
85 AB	....Axially engaging spreading rotating motor and clutch
85 AT	....Transversely engaging rotating motor and clutch
85 C	....Clutch and non-rotating motor
85 CA	....Clutch and non-rotating motor concentric with shaft
85 F	....Centrifugal fluid clutches
85 V	....Vacuum clutches and operators
86	...Double acting
87.1	...Multiple clutches
87.11	....Having independent operators
87.12	.....Responsive to rotational speed of clutch-element
87.13	.....With selective distributor for fluid pressure
87.14	....Alternatively operative clutches
87.15	.....Clutches co-axial with operators
87.16	......Common or interconnected operator(s)
87.17	.......Operator between clutches
87.18	.....With selective distributor for fluid pressure
87.19	......Having neutral position
88 R	...Flexible motor
88 A	.....Flexible fluid motor-axially engaged
88 B	.....Radially engaged
89 R	..Spring or weight
89 A	....Cam release
89 B	....Bellville disc springs and leaf springs
89 QT	....Quick throw spring
89 W	....Weight operated
90	...Electric release
91 R	...Fluid release
91 A	.....Motor concentric with clutch shaft
92	..One-direction apply and release
93 R	..Cam
93 A	....Axially thrusting cams rotatable about clutch axis
93 B	....Axially moving cam acting on pivoted lever
93 C	....Axially moving cam acting on transversely moving wedge or clutch member
94	..Screw
95	..Handwheel
96	..Central pin
97	...Screw operated
98	..Shipper saddles
99 R	..Lever systems
99 A	....Levers mounted on axially engaging clutch
99 B	....Levers mounted on transversely engaging clutch
99 S	....Stationary levers
100	..Follow-up
101	..Releasing
102	..Check of driven member
103 R	..Speed responsive
103 A	....Centrifugal operated, axially engaged
103 B	....Centrifugal operator transversely engaged
103 C	....Acceleration and inertia responsive
103 F	....Fluid operated
103 FA	....Fluid pressure engaged with centrifugal valve
104 R	...Fixed-speed release
104 B	.....Transversely engaged-interior
104 C	.....Transversely engaged-exterior
104 F	.....Fluid clutches and operators
105 R	...Fixed-speed engagement
105 A	.....Centrifugal (fluid or powder) non-pivoted weights (radially movable or slidable) i.e., mercury clutch
105 B	.....Axially engaged with non-pivoted weights-weights movable radially or slidable
105 BA	.....Transversely engaged with non-pivoted weights
105 BB	.....Transversely engaged positive with non-pivoted weights
105 C	.....Axially engaged with pivoted weights
105 CP	.....Weights pivoted on axis parallel to clutch axis-axially engaged
105 CS	.....Single pair clutching elements axially engaged with pivoted weights
105 CD	.....Transversely expanding clutch with pivoted weights

	CLUTCHES
	.Operators
	..Speed responsive
	...Fixed-speed engagement
105 CE	.....Transversely engaged-pivoted weights and clutching elements movable separately
105 CF	.....Transversely contracting
105 F	.....Fluid controls for centrifugal clutches
106 R	...Release
106 F	.....Devices to prevent fluid clutches from being operated by centrifugal forces acting on fluid
	ELEMENTS
106.1	.Clutch-element resiliently carried on hub
106.2	..By helical-coil springs

200 WITH MEANS RESPONSIVE TO MALFUNCTION
201 .Antijackpotting device
202 WITH ADDITIONAL, DISPARATE MEANS PREVENTING FRAUDULENT ACTUATION
203 .Means preventing use of tethered check
204 .Antijarring device
205 CONTROL MECHANISM ACTUATED BY CHECK, OTHER THAN COIN (E.G., SLUG, TOKEN, CARD), WHICH IS MUTILATED OR RETAINED
206 .By pliant currency (e.g., dollar bill)
207 ..Including light sensitive testing device
208 .Having means to mutilate check
209 ..And means to test physical characteristic of check
210 .Having means to read magnetically encoded check
211 .Having electric circuit with switch operated by check
212 .Having means to test physical characteristic of check
213 ..Tests electrical or magnetic property
215 INCLUDING VALUE ACCUMULATOR FOR PLURAL CHECKS
216 .Having solid state circuitry
217 ..Programmable
218 ..Including binary counter
219 .And electric circuit with switch operated by check
220 ..Accumulator includes electric circuit having stepper switch
221 ...Single check operate switch
222 ...Plural stepper switches
223 ..Accumulator having ratchet wheel
224 .Having electric circuit completed by check itself
225 .Mechanical accumulator
226 ..Having ratchet wheel
227 ...And indexing means differently responsive to various check values
228 ..And means to impart thrust to check to operate accumulator
229 CONTROL MECHANISM RESPONSIVE TO PLURALITY OF CHECKS
230 .Including electric circuit with switch operated by check
231 ..Single switch
232 .Including part locked by detent and released by check
233 ..Stationary detent
234 ..And means to impart thrust to check to unlock part
235 ...Pivoted detent
236 ....And pivoted released part
237 .Check prevents locking of part by detent
238 ..Including reciprocating check mover
239 INCLUDING ELECTRIC CIRCUIT WITH SWITCH OPERATED BY CHECK
240 .And holding circuit responsive to operation of switch
241 ..Controlled by timer
242 ...Weight of check operates switch
243 .And means to impart thrust to check to operate switch
244 .Weight of check operates switch
245 ..And means holds switch in operative position
246 ...Switch held by weight of check
247 INCLUDING PART LOCKED BY DETENT AND RELEASED BY CHECK
248 .Stationary detent
249 .And means to impart thrust to check to unlock part
250 ..Noncontacting, relatively movable parts connected by check
251 ...Connected parts pivot
252 ...Connected parts reciprocate
253 ..Pivoted detent
254 ...And pivoted released part
255 ....Unidirectionally pivoted
256 ....Spring biased
257 ...Released part biased by spring
258 ..Pivoted released part
259 ..Reciprocating released part
260 .Weight of check unlocks part
261 ..Pivoted released part
262 ...Unidirectionally pivoted
263 ....Noncontacting, relatively movable parts connected by check
264 ....Having means to hold check in contact with detent
265 .....And ejector to remove check
266 .....Check passageway has movable portion
267 ....Having motor for driving released part
268 .....Spring motor
269 ......And regulating escapement mechanism
270 ......And regulating ratchet mechanism
271 ......Spring biased detent
272 .....And regulating ratchet mechanism
273 .....Weight motor
274 ......Having regulating escapement mechanism
275 ......Spring biased detent
276 ....Having regulating ratchet mechanism
277 ...Having means to hold check in contact with detent
278 ...Having motor for driving released part
279 ....Spring motor
280 ....Weight motor
281 .....Weight of check
282 ..Having means to hold check in contact with detent
283 ...One piece detent
284 ....Biased by spring
285 ..Released part biased by spring
286 ...To lock position
287 ..Released part biased by weight
288 ..Pivoted detent
289 ...Biased by spring
290 CHECK PREVENTS LOCKING OF PART BY DETENT
291 .Including check mover
292 ..Pivoted
293 INCLUDING NONCONTACTING, RELATIVELY MOVABLE PARTS CONNECTED BY CHECK
294 .And means to impart thrust to check to move part
295 ..Having pivoted part
296 ...Coaxial pivoted parts
297 ....Spring biased part
298 ...And linearly reciprocating part
299 ....Both parts spring biased
300 ..Parts spring biased
301 .Weight of check moves part
302 INCLUDING MEANS TO TEST VALIDITY OF CHECK
303 .By testing material composition
304 ..Having electric circuit completed by check
305 ...Circuit includes thermocouple
306 ...Circuit includes three or more contacts
307 ...Circuit includes movable contact
308 ....Pivotable
309 .....Cam actuated
310 ...And means to impart thrust to check
311 ....Unidirectionally pivoted
312 ...And means to stop check at contact
313 ....Pivotable
314 .....Solenoid actuated
315 ...Circuit includes spring contact

	INCLUDING MEANS TO TEST VALIDITY OF CHECK
	.By testing material composition
	..Having electric circuit completed by check
316	...Circuit includes elongated contact (e.g., long slide)
317	..Having electric circuit influenced by check
318	...Passing between transmitting and receiving coils
319	...Entering coil
320	..Having magnetic field acting on check
321	...And scavenger mechanism
322	....Movable megnet
323	....Movable portion within check passageway
324	...And magnetically actuated deflector or stop
325	...Speed or path of check altered
326	....After impact with rigid body (i.e., bounce test)
327	..Check impacts against rigid body (i.e., bounce test)
328	.Having means to test surface configuration
329	..Raised annular rim
330	..Both faces of check
331	..Serrated edge
332	..Apertured check
333	...And means to impart thrust to check
334	.Having means to test size
335	..Thickness
336	..By cradle sensor
337	..By pivoted lever sensor
338	..By fixed guage
339	.Having means to test weight
340	..By adjustable counterbalance
341	..By spring counterbalance
342	INCLUDING MEANS TO IMPART THRUST TO CHECK
343	.Introducing device
344	INCLUDING SPECIFIC CHECK PASSAGEWAY (E.G., CHUTE DETAIL)
345	.And scavenger mechanism
346	.And movable check diverter
347	.Having means to divert spurious matter
346	..Liquid diverter
349	..Wire or filament diverter
350	WITH SPECIFIC CABINET STRUCTURE
351	.Slot closure
352	.Check exhibitor
214	CHECK PER SE
353	MISCELLANEOUS

300	CONVEYING APPARATUS ENTIRELY SUPPORTED BY MOBILE GROUND ENGAGING MEANS
301	.Condition responsive control means for vehicle or conveyer
302	.Retractable ground wheel
303	.Including three relatively movable interconnected wheel or track equipped vehicles
304	.Dirigible vehicle
305	..Pulling winch on vehicle
306	.Ground wheel lockable in transverse or longitudinal position on vehicle
307.1	.Bucket conveyor
308.1	.Shovel or tine pushable under load
309	.Support slidable on ground
310	.Conveyer driven by motion of ground-engaging element
311	.Including gravity conveyer section or bin with driven conveyer
312	.Conveyer shiftably mounted on vehicle
313	..Contractible or foldable conveyer section
314	..Separate conveyers serially arranged on single vehicle
315	..Power means for shifting conveyer
316.1	...Fluid-actuated ram
317	..Horizontally swingable conveyer
318	..Vertically swingable conveyer
319	...Means for maintaining conveyer-drive motor support in level position
320	...Winch-operated shifting mechanism
321	CONVEYER OR ACCESSORY THEREFOR SPECIALIZED TO CONVEY PEOPLE
322	.With means to control the operation of the section
323	..By means responsive to an unsafe operating characteristic of the system
324	.With means to facilitate passenger entry or exit
325	..By support having interdigitating members (e.g., comb plate, etc.)
326	.By stairway having steps forming an endless member
327	..Having hinged plates forming steps
328	..Trained about vertical axis or axes
329	..With means allowing tensioning of the endless member
330	..With drive means
331	...With means synchronizing the operation of the steps and a handrail
332	..With paired track step levelers
333	..With specified step structure
334	.By support means having a zone of varying speed
335	.Moving hand-support structure
336	..With handrail tensioning means
337	..Specific handrail configuration
338	..Handrail guard
339.1	WITH MEANS TO FACILITATE WORKING, TREATING, OR INSPECTING CONVEYED LOAD AT A STATION
340	.Having signalling or load identifying means
341	.Condition responsive control of conveyer or station apparatus
343.1	.Load supporting conveyor portion is retarded or stopped with load at station without being disconnected from remainder of continuously moving conveyer
343.2	..Load supporting conveyor portion is movably secured to conveyor drive
345.1	.Means engaging conveyor or load on a conveyor to align load for working
345.2	..Means engages conveyor to fix conveyor position relative to station
345.3	...Means engages a conveyor portion (i.e., pallet) which is separable from the conveyor drive to fix the position of said conveyor portion
346	.Static means for supporting load or workman adjacent conveyer for operation on load
346.1	.Means to convey a palleted load back and forth between an initial location and the work station
346.2	.Means to transfer a load back and forth between the mainline conveyor and the work station
346.3	.Conveyor(s) lowers the load to at least one of a plurality of fixed work stations
347.1	CONVEYOR SYSTEM HAVING AUXILIARY SECTION FOR STORING ITEMS MOVING BETWEEN SOURCE AND DESINATION
347.2	.Auxiliary section has the same entrance and exit
347.3	..Auxiliary section has a reversibly driven conveyor for bidirectional article movement
347.4	.Plural laterally spaced, same direction auxiliary paths
348	CONVEYER ARRANGEMENT FOR SELECTING AMONG PLURAL SOURCES OR DESTINATIONS
357	.Condition responsive control means to prevent collision on merging conveyors
358	.Condition responsive control means including sensing condition of source or destination
349	.With selection responsive to means containing or introducing changeable operating instructions
349.1	..By synchronously moving signal carrier distinct from conveyer
349.2	...Moving at different velocity than conveyer
349.3	....Rotary signal carrier
349.4	.....Magnetic means on rotary carrier stores code
349.5	..Using central memory to store code until article is discharged
349.6	...Memory stores plural sources or destinations
349.7	....Inventory also in memory
349.8	....Material detector indexes code
349.9	.....Plural, longitudinally spaced, material detectors index code
349.95	....Conveyer detector indexes code
350	..By magnetic means
351	..By selectively positioned abutment means
352	...Having plural abutments arranged in a specific pattern
353	...Having support means slidably mounting abutment means
354	...Having an abutment support containing a plurality of abutment receiving means
355	..By repositionable contact or switch actuator
359	.With gravity-conveying means
360	..By movably mounted, load-supporting, gravity section
361	...By repositionable idler roll or rollway
362	.By directing the load to or from a conveying section from or to selected sources or destinations
363	..By proportioning the feed from multiple sources
364	..By moving a load directing means along the length of the section

CONVEYER ARRANGEMENT FOR SELECTING AMONG PLURAL SOURCES OR DESTINATIONS
.By directing the load to or from a conveying section from or to selected sources or destinations
365 ..By discharging from a section including independently movable load-supporting portions
366 ..By selecting one of a plurality of supply or discharge paths
367 ...By material-diverting means placed across the load path
367.1 ....Material diverted by plural, successive gates
367.2 ....Plural, manually manipulated gate actuators
368 ...By a selectively movable stop means
369 ...By means connecting the system with a normally spaced path
370 ..By loading or unloading section at selected one of a plurality of preestablished locations along the length thereof
371 ...By reversibly driving the section
372 ..By shifting the load from the section
373 CONVEYER FOR CHANGING ATTITUDE OF ITEM RELATIVE TO CONVEYED DIRECTION
374 .By optionally facing successive items according to a predetermined recurring cycle
375 .By actuating item-holder relative to holder-carrying conveyer
376 ..With holder-actuating means responsive to item-sensing means
377 ..Holder carried by orbiting conveyer
378 ...Holder or conveyer moves intermittently (e.g., for "indexing" load)
379 .By gripping item and turning item about fixed axis
380 .With pressurized fluid causing change in attitude
381 .With magnetism causing change in attitude
382 .By conveying randomly faced items and turning items to uniform facing
383 ..Including significantly shaped portion of conveyer cooperating with significantly shaped item to face item
384 ...Including orbiting progression of item-receiving pockets and means moving item within pocket
385 ....By roller/finder to move item and/or fit surface indentation on item
386 .....Roller/finder rotating about plural axes
387 ....Pockets comprise grooved, transversely disposed rollers
388 ...Including protruding portion of conveyer entering end of slotted or hollow item
389 ...For shaped item suspended in or by shaped passageway
390 ...For shaped item fitting outline of shaped passageway
391 ...Via vibrating bowl having shaped passageway
392 ...Via rotating means having shaped passageway or exit
393 ...Including orbiting progression of item-fitting elements passing through supply of scrambled items
394 ..By conveying an item that has a position characteristic and rotating the item until it is positioned
395 ..With control means actuated in response to sensing of improperly faced item
396 ..Including separating item from scrambled supply hopper
397 ...By orbiting progression of item-receiving pockets passing through supply
398 ..By distinguishing between alternatively faced items and conveying uniformly faced items
399 ...By turning only improperly faced items to uniform facing
400 ...By partially turning all items to uniform facing and direction
401 .With control means for attitude-changer responsive to sensing of item
402 .For inverting successive items
403 ..By means driven for inverting conveyed items
404 ...Orbiting conveyer-inverter means
405 ....Twisted-belt conveyer means
406 .For changing both the elevation and the posture of successive items
407 ..By plural, sequentially acting conveyers
408 ..By an orbitally moving conveyer
409 ..By an oscillating or reciprocating conveyer
410 .By plural distinct occurrences of turning each successive item
411 .By conveyer and means driven for turning successive conveyed items
412 ..By means between successive conveyer sections or conveyer elements
413 ...By means which interdigitate with conveyer sections or elements
414 ....By turntable which lifts, turns and lowers item(s)
415 ..By plural, unequal-speed members simultaneously contacting and conveying items
416 .By member adjacent conveyer for contacting successive conveyed items
417 ..Longitudinally twisted item-bounding passageway
418 CONVEYER SYSTEM FOR ESTABLISHING AND MOVING A GROUP OF ITEMS
418.1 .Having items discharged from plural distinct outlets into group
418.2 ..With outlets longitudinally spaced along path of progressively formed group
418.3 ...Superposes items within group
418.4 ..With vertically aligned outlets discharging in the same direction and superposing items
418.5 .Having plural successive groups discharged by single conveyer into larger group
418.6 .Having conveyer drop grouped items simultaneously onto another conveyer
418.7 .Subdivides continuous item stream into longitudinally spaced groups
418.8 ..By offsetting first or last article
418.9 ..And imbricates items within group
419.1 ..By item engaging stop means
419.2 ..By different speed conveyers
419.3 ...With spaced dividers on conveyer limiting group size
426 .By shifting group of items simultaneously from stream conveyer to form a group
427 ..And distributing items of group into plural streams
428 ..By air blast or suction
429 ..By reciprocating shifter
430 ...Having oblique or orbital movement

	CONVEYER SYSTEM FOR ESTABLISHING AND MOVING A GROUP OF ITEMS
431	.By depositing items successively from one conveyer onto group conveyer
432	.By shifting group from row conveyer onto row conveyer
433	.By shifting group from row conveyer onto stream conveyer
434	CONVEYER SYSTEM FOR ARRANGING OR REARRANGING STREAM(S) OF ITEMS
435	.By distributing items onto vertically tiered conveyer/receiver
436	.By distributing items from one stream into plural streams
437	..With control means responsive to sensing means
438	..By air blast or suction diverter
439	..By magnetic diverter
440	..By orbiting progression of item engaging elements
441	...On rotating carrier (e.g., star wheel, etc.)
442	..By interposing a guide into path of stream
443	.By queueing items from quantity source of items into stream(s) of items
444	..With control means responsive to sensing means
445	..Forming plural streams
446	...By jiggling items into streams
447	...And merging plural streams into one stream
448	..Merging plural streams (i.e., source) into one stream
449	...By synchronized orbiting progression of item-engaging elements
450	....On rotating carrier (e.g., star wheel, etc.)
451	...By synchronized gate(s) in paths of plural streams
452	...By guide means in paths of streams
453	..Via throat for restricting flow of massed items
454	...With supplementary moving surfaces that form throat
455	....Including retro-moving surface
456	.By laterally or vertically moving successive items in longitudinally moving stream
457	..To change direction of longitudinally moving stream
458	..To respace plural streams laterally
459	.By longitudinally respacing successive items in stream
460	..With space-control means responsive to item-sensing means
461	..By successive conveyers having dissimilar speeds
462	...To crowd or imbricate items in stream
463.1	CONVEYOR SYSTEM FOR MOVING A SPECIFIC LOAD AS A SEPARATE UNIT
463.2	.System includes a linear conveyor or portion thereof which bodily shifts transversely to move a load in synchronization with a transverse, continously operating conveyor section
463.3	.System includes linear conveyor or portion thereof which shifts to lift or lower load before or after linearly conveying load relative to adjacent conveyor section
463.4	.System includes gate means
463.5	..Load obstructing gate and means for lifting load over the obstruction
463.6	..Plural successively operated gate means
464.1	.System includes control means responsive to sensing means
464.2	..Responsive to load presence or absence
464.3	...Responsive to condition of at least one conveyor
464.4	..Responsive to undesired condition of load
465.1	.System includes a load supported by a conveyor portion which is separable from the conveyor drive
465.2	..Wherein the conveyor portion moves in a closed path in the horizontal plane only
465.3	..Wherein the conveyor portion is supported and driven adjacent its opposite sides by horizontally spaced drives
465.4	..Wherein the conveyor portion supports the load below the drive
466.1	.System includes a T-shaped or headed load suspended between parallel conveyors directly
467.1	.System includes a rotating screw
468.01	.System includes an oscillating or reciprocating load engaging element
468.2	..Comprising load gripping elements
468.3	...Gripping elements movable relative to one another to space articles in the load
468.4	...Suction gripping elements
468.5	...Magnetic or electrostatic gripping elements
468.6	..Engaging element moves load vertically and horizontally
468.7	...Element pushes load over nonlinear support
468.8	..Engaging element moves load vertically only
468.9	..Engaging element moves load horizontally in a straight line
468.1	...Element pushes load over separate support and has nonlinear path of travel
468.11	...Element pushes load over separate support and has linear path of travel
469.1	.System includes a rotating or endless carrier with a load engaging element
470.1	..Comprising a load gripping element
471.1	...Suction gripping element
472.1	...Magnetic or electrostatic gripping element
473.1	..Nongripping elements are adjustable or replaceable for different sized loads
474.1	..With means to move load engaging elements relative to carrier
475.1	...Whereby the load engaging component moves relative to the carrier to maintain load in a desired position during travel along a curved path
476.1	...Element is shifted to discharge or receive a load
477.1	....Element is only shifted with the load during discharge
478.1	..Carrier rotates about a fixed axis
479.1	...Elements push the load over a separate support
480.1	....With a load retaining guard means
481.1	...With load retaining guard means
482.1	..Means mounted on the engaging element to forceably eject the load from the element
483.1	..Means moveable mounted inside the path of the element to eject the load
484.1	..Elements comprise a nongripping pair of members which self-open as they pass through a curved path

CONVEYOR SYSTEM FOR MOVING A SPECIFIC LOAD AS A SEPARATE UNIT
.System includes a rotating or endless carrier with a load engaging element
485.1 ..Nongripping elements support the load below the endless carrier
486.1 ...Elements are hooks
487.1 ..Nongripping elements are laterally projecting pins which engage the interior of a hollow load
493 CONVEYER HAVING IMPINGING FLUID TO FEED, SHIFT OR DISCHARGE LOAD; OR MEANS TO FACILITATE CLEANING OF CONVEYER; OR STERILIZING OR LUBRICATING MEANS
494 .Having cleaning means
495 ..By fluid applying means
496 ..By conveyer contacting brush
497 ..By conveyer contacting scraper
498 ...Having a moving scraper
499 ...With scraper biasing means
500 .Having lubricating means
501 ..For rollers forming belt troughing structure
502.1 WITH ALARM RINDICATOR
502.2 .Means for measuring dimensions (height, width, or length) of load on a conveyor
502.3 .Means for indicating position of unit load
502.4 .Means responsive to conveyor movement to indicate speed or to actuate alarm due to abnormal speed
506 CONVEYER HAVING MEANS SPECIALIZED FOR COLLECTING A LOAD FROM A STATIC SUPPORT (E.G., THE GROUND, ETC.)
507 .Having control means responsive to load condition or unsafe operating condition
508 .Having means to form a pile on a static support
509 .Having buckets specialized to gather load batches
510.1 .Power-driven feed means
511 ..Having vertically adjustable feeding means
512 ..Paired feeding means
513 ...Opposite hand screws
514 ...Opposed load engaging pushers
515 ....Orbiting progressions of pusher elements
516 .....Mounted on endless carriers
517 ..Reciprocating pusher feeding means
518 ..Rotating feeding means
519 .Having means mounting conveyer for pile surface attack
520 .Self-gathering pusher
521 .By vibratory trough entrance means
522 .Having passive material collecting means
523 CONVEYER SYSTEM HAVING A GRAVITY CONVEYER SECTION
524 .Condition responsive
525 .With means to affect flow
526 ..Moving flow control means coordinated with power-driven conveyer section
527 ...Successive power-driven conveyer sections
528 ..Power-driven conveyer section operatively engages adjustable gravity section
529 ..Conveying element of power-driven conveyer section manipulated to effect load discharge
530 ..Gate
531 ...Actuated by, or otherwise coordinated with, power-driven conveyer section
532 ...In generally vertical exit path of gravity discharge material holder
533 ..By agitating, stirring, vibrating, etc.
534 ..By retarding velocity or reducing volume
535 ..Adjustably mounted conveyer section
536 ...Section is terminal one of system
537 .With means to handle portion of load which becomes separated from main flow path
538 .Conveyer section(s) adjustable for nonoperative purpose (e.g., storage, transport, etc.)
539 .Including a load-supporting bridging element (e.g., horizontal surface) between conveyer sections
540 .Gravity discharge material holder is source of supply, discharging by gravity to power-driven section
541 ..With at least one more gravity section therebetween
542 ...And having plural, successive power-driven sections
543 ..With at least one more successive power-driven section
544 ...Of the apron belt type
545 ...Of the screw type
546 ..Followed by at least one gravity section
547 ..Apron belt type of discharge-receiving, power-driven section
548 ..Screw type of discharge-receiving, power-driven section
549 ..Bucket type of discharge-receiving, power-driven section
550.01 .Bin having a power-driven conveyor section for discharging or feeding discharge to a gravity or power-driven section
550.2 ..Having adjustable bin or discharge means
550.3 ..Excess material on power-driven discharge means returned to bin
550.4 ..Power-driven discharge means feeds to a subsequent gravity section
550.5 ..Power-driven discharge means feeds to a subsequent power-driven section
550.6 ...Of the screw type
550.7 ...Of the bucket type
550.8 ...Of the scraper type
550.9 ...Of the apron type
550.1 ..Screw type power-driven discharge means
550.11 ..Bucket type power-driven discharge means
550.12 ..Scraper type power-driven discharge means
550.13 ..Apron type power-driven discharge means
560 .Power-driven conveyer section feeding to gravity section (i.e., gravity discharge material holder, or gravity flow path) feeding in turn to another power-driven section
561 ..Gravity conveyor section fed by one run of power-driven section, and feeding in turn to another run of the same section
562 .Gravity conveyor section is gravity flow path feeding to power-driven section
563 ..Followed by gravity section (i.e., gravity discharge material holder, or gravity flow path)
564 ..Thrower type power-driven section
565 ..Plural gravity sections
566 ..Plural power-driven sections
567...Serially arranged

	CONVEYER SYSTEM HAVING A GRAVITY CONVEYER SECTION
568	.Plural power-driven conveyor sections feeding to gravity section (i.e., gravity discharge material holder, or gravity flow path)
569	.Power-driven conveyor section feeding to plural gravity sections (i.e., gravity discharge material holder, or gravity flow path)
570	CONVEYING SYSTEM HAVING PLURAL POWER-DRIVEN CONVEYING SECTIONS
571	.With condition responsive control of a section
572	..By means responsive to presence or condition of load
573	...By overload sensing
574	.Conveyer carried by load-engaging conveyer
575	.With means controlling the interrelated operation of plural sections
576	.With means operating successive sections in timed relation
577	.With means for altering the speed (e.g., accelerating, decelerating, stopping,reversing, etc.) of a section
578	.Having a cyclically swingable section
579	.With means operating successive sections at different speeds
580	.Recycling load in a closed path
581	.With means allowing a section to fold upon itself
582	.With supply chamber for system
583	.With means connecting sections for quick assembly of disassembly
584	..By means allowing relative movement of joined sections
585	.Including tripper
586	.With relatively adjustable sections
587	..By means mounting a section for lateral swinging movement
588	...With means to vary the effective length of the system (e.g., telescoping sections
589	...With means mounting a section to swing about a generally horizontal axis
590	...With yieldable side walls
591	...With a curved guide or support
592	..By means mounting a section to swing about a generally horizontal axis
593	...With flexible means and winding drum
594	..By means to vary the effective length of the system
595	...By nested trough sections
596	....With opposed gripper means
597	.Including power-driven means for laterally shifting a conveyer-engaged load
598	..By a revolving or pivotal member
599	.Including non-driven means for moving load relative to conveyer
600	.Including rest for transient load
601	.Forming plural conveying paths feeding to single conveying path or vice versa
602	.Forming a single conveying path
603	..Superposed sections forming an ascending or descending zigzag conveying path
604	..Load simultaneously engaged between and moved by coacting conveyers
605	...With load transfer between coacting conveyers
606	..Plural sections each formed of or including a closed flexible loop
607	...With elevating or lowering section
608	..Plural rotating sections
609	..Plural vibratory sections
610	..Diverse sections
611	...Having a rotating section
612	....With load engaging element carried by the rotating section
613	.....Element retractable to disengage from load
614	....And a reciprocating section
615	CONVERTIBLE
617	PROCESSES
618	CONVEYER SECTION
619	.Load propelled as the reactive means in a linear motor or moving magnetic field
620	.Load simultaneously engaged between and moved by a plurality of driven conveyer members
621	..Reciprocating member
622	..Oppositely moving members (e.g., doffing, etc.)
623	..Wherein the velocities of at least two of the members are not equal
624	..Rotary members
625	...Screw type
626.1	..Opposed endless belts
626.2	...Load is enclosed by belts
626.3	....Having means to adjust one belt relative to the opposed belt
626.4	.....By biasing means
626.5	...Having adjustable belt portion
626.6	....By biasing means
629	.Diverse
630	.Moving wave type
631	.Conveyer section or portion thereof cyclically rotates, shifts or oscillates for a extra-conveying function
632	.Conveyer section folds to facilitate transportation or storage of section
633	.Movement of load changed relative to conveyer movement on contact of load with passive means
634	..Load responsive means or timing means controls load engaging means
635	..Stripper (e.g., static scraper)
636	..Passive means causes load to move laterally of conveyer
637	...To discharge load from conveyer
638	.Thrower
639	..Condition responsive control
640	..With guide or deflector for material thrown
641	..Adjustable means to control trajectory distance or direction
642	..Rotary
643	.Endless belt strand or chain-like member to lift viscous fluid
644	.Conveyer for signatures
657	.Screw
658	..Including rotating load confining means (e.g., tumbler)
659	..Including a deformable element
660	..Including an axially adjustable helical surface formation
661	..Having axially varying capacity
662	..Plural helical surface formations
663	...Separate, parallel formations supporting same load
664	...Transversing less than 360 degrees
665	....And reversible
666	...Coupled end-to-end
667	....With intermediate drive
668	....Pivotably
669	...Of opposite hand
670	..With means for controlling flow or to assist conveying

CONVEYER SECTION
.Screw
671 ..With means to assist in discharging from or feeding to the housing of the helical surface information
672 ..Including bearing means
673 ...Bearing means directly engages periphery of the helical surface formation
674 ..Including drive means
675 ...Having reversible or variable speed
676 ..Helical surface formation structure
677 ..With means for securing helical surface formation to driving member
678.1 .Endless conveyor having means for suspending load
679 ..Magnetic means
680 ..Means engagable with hanger to change hanger position relative to drive means or to release load
681 ..Load directly suspended from means spanning between parallel drive means
682 ..Having lock connection between hanger and load engaging means
683 ..Articulated drive means provided with non-load supporting guide means
684 ..Having means interengaging articulated drive and drive means therefor
685 ..Elongated drive means and hanger interengaging means
686 ...Strand or cable drive means connected to hanger below hanger support means
687 ...Chain or pivotally connected members drive means connected to hanger below hanger support means
687.1 ..Separable conveyor portion
688.1 .Having means to enhance the friction or adherence between the conveyor and load at random locations on conveyor
689.1 ..Suction
690.1 ..Magnetic
690.2 ..Transversely extending enlongated ridge means formed on or attached by nonmechanical means to the conveyor
691 ..Electrostatic
692 ..Impaling
693 ...Having impaled load removal assisting means
697 ..Load-engaging belt having separate load-impelling, projecting member swingably mounted thereon
698 ..Load-engaging belt having load-impelling, projecting cross members (e.g., slat, etc.) joined thereto by mechanical fastening means
699 ...Belt formed of a continuous member of flexible sheet-type material (e.g., canvas, etc.)
699.1 ..By a plurality of laterally spaced, projecting members on the conveyor
700 .Single suspended loop
701 .Bucket
702 ..To convey liquid
703 ..Having means to facilitate loading or discharging load from bucket
704 ...Bucket has door means to release load
705 ...Having means to engage and move load from bucket
706 ...Having means to pivot bucket relative to endless drive means
707 ..Interconnected buckets form chain
708 ..Having means to close gap between buckets
709 ..Having means to adjust tension on endless bucket carrier
710 ..Slide and guide or wheel and track means to movably support bucket
711 ..Bucket with connection to endless band or strand-type carrier
712 ..Bucket with connection to endless chain or link-type carrier
713 ..Bucket structure
714 ...Composite
715 .Flexible pocket
716 .Flight means in conduit for lifting flowable solid material
717 .Pusher conveyer and separate load support surface
718 ..Condition responsive control
719 ..Having means to prevent damage to conveyer
720 ..Having means to recycle conveyed load
721 ..With antifriction or movable supporting surface
722 ..Rotating pusher
723 ...To move load in an arcuate path
724 ....Wherein path is helical
725 ..Endless-orbiting pusher or its load support
726 ...Coacting plural pushers in plural orbits
727 ...Pusher edge configured to load-support surface
728 ...Pusher connected to endless pusher-carrier
729 ....With carrier drive or guide means configured to pusher
730 ....Integral element forming pusher, connection and carried link
731 ....By detachable or adjustable connection
732 ....By pivot between pusher and carrier
733 ....By connection to single carrier
734 ...Pusher-surface configuration
735.1 ...Load support, casing, shield or auxiliary attachment
735.2 ....Modules connectable end to end with no relative movement
735.3 ....Door, casing, cover, or load supporting surface
735.4 .....Casing or load supporting floor with door
735.5 .....Removable cover overlying the conveyor
735.6 ....Modules connected end to end permitting relative angular positioning (e.g., due to uneven ground)
736 ..Reciprocating pusher
737 ...Plural laterally spaced alternately acting
738 ...Mounted on a carrier
739 ....Carrier has a swinging path of movement
740 ....Carrier has an orbital path of movement
741 ....Plural pushers
742 .....Oscillating about axis or axes
743 ......Axis or axes transverse to path of travel
744 ....Axis or axes below load support surface
745 ......Axis or axes perpendicular to load support surface
746 ....Pivotally mounted pusher
747 ...Pusher having linear path of movement
748 ....Moved by endless actuator
749 ...Pusher configuration
750 .Reciprocating conveying surface
751 ..With control means responsive to sensor means
752 ..Vibratory conveying member

CONVEYER SECTION
.Reciprocating conveying surface
..Vibratory conveying member
753 ...Selectively operated to reverse direction of movement
754 ...With flexible-belt extension
755 ...With retrograde-movement preventer
756 ...Having helical path
757 ....Confined within a bowl
758 ...Coupled parts from single vibratory trough
759 ...Conveying member having support or drive
760 ....With damper for conveying member or support
761 * ....With means to control load speed
762 .....By control of motor speed
763 ....Support for conveying member
764 .....Pivotal link support
765 .....Rolling contact support
766 .....With drive causing conveying member vibration
767 ......With damper for drive
768 ......By fluid means
769 ......By electromagnetic means
770 ......By unbalanced weights
771 ...Conveying member configuration
772 ..With retrograde movement preventer
773 ..Including set of alternately-acting load-support members
774.1 ...Longitudinally extending interdigitated sets (lifted by oscillating arms, etc.)
775 ....Each set movable
776 .....Sets move through a closed-loop path
774.2 ....Load support member lifted by inclined supporting fluid actuators
774.3 ....Load support members lifted by supporting, eccentric cam or rotating crank drive
774.4 ....Load support members lifted by inclined supporting surface
777 ...Including transverse pivoted sets of alternately acting load-support members
778 .Spiral
779 .Load-supporting rolls moved about endless path
780 .Live roll
781 ..Roll drive means engages, disengages or slips responsive to lod position or blockage
782 ..Having means to adjust position of roll relative to load (i.e., vertically, horizontally, angularly, etc.)
783 ..Having intermittent, periodic, timed or programmed drive for rolls
784 ..Arranged or having means to change load speed
785 ..Roll(s) center load on conveyer
786 ..Load moves axially of roll
787 ..Rolls causes load to travel curved path
788 ..With motor means for roll
789 ..Roll drive means
790 ...Belt drive
791 ...Gear drive
792 .Conveyer having a zone of varying speed
793 .Unit load conveying surface means moved about an endless or rotating path
794 ..With manual, position or condition responsive drive control
797 ..Unit load conveying means maintained in uniform orientation while transiting from one direction to another
798 ...By coacting with guide only while transiting from one direction to another
799 ...Plural endless means support and maintain conveying surface horizontally orientated while moving around associated but axially displaced sprockets
800 ...By constant engagement with guide means throughout conveying course of travel
801 ..Conveying surface elevates load and has cantilever-type connection with endless means
802 ..Conveying surface movable relative to path
803.01 ..Holder is removable or replaceable relative to drive
803.2 ...Holder supported and driven by horizontally spaced drive
795 ...Each conveying surface means abbutted and pushed by succeeding conveying surface means
803.3 ..Holder grips load
803.4 ...Relatively adjustable grippers space portion of load
803.5 ...Suction gripper
803.6 ...Magnetic or electrostatic gripper
803.7 ...Gripper portion biased to load engaging portion
803.8 ...Gripper portion made of resilient material which is self biased into engaging position
803.9 ...Cam means moves at least one portion of the gripper to a load engaging position
803.1 ...Gripping portions self-open as they pass through a curved path
803.11 ..Nongripping holder is adjustable for different sized loads
803.12 ..Holder for hollow load contacted interiorly
803.13 ..Holder formed of nongripping elements which self-open as they pass through a curved path
803.14 ..Holder means forms recess to receive or seat load
803.15 ..Holder means forms an aperature for receiving load
803.16 .Rotary conveyor without specific locations for supporting randomly placed articles or bulk material
804 .Endless conveyer
805 ..Magnetically guided, supported or driven
806 ..Revolvable means engaging carrier belt face automatically skews to correct belt training deviation
807 ...With power drive (e.g., pressure cylinder or electric motor, etc.) for skewing revolvable means
808 ...With revolvable means supporting belt in transversely troughed form
809 ..Vertically shiftable belt situated between auxiliary load supports
810 ..Condition responsive
811 ..Pressurized fluid or suction applied to carrier belt to modify its reaction with support
812 ..Having variable conveying length
813 ..Device for tensioning belt
814 ...With spring biasing means
815 ...With counterweight
816 ...With screw adjusting means

	CONVEYER SECTION
	.Endless conveyer
817	..Separate, parallel conveying reaches supporting same load
818	..Having upwardly facing trough configuration in transverse direction on conveying reach
819	...Edges movable together to enclose load
820	...Having preformed trough shape
821	....Formed of or including a continuous member of sheet-like material (e.g., canvas, etc.)
822	....Formed or including transverse plates tandemly disposed lengthwise of carrier belt
823	...Supported in trough form by separate, unattached means engaging carrier belt face
824	....Roller or roller assembly
825	.....Independently rotatable rollers canted relative to each other
826	......Means for selectively adjusting angle between rollers to vary carrier belt shape
827	......Pivotally linked rollers form chain supported only at its ends
828	......Roller-supporting transverse frame connected to side-frame stand
829	......Individually cantilevered roller
830	......Transverse frame carrying at least three transversely spaced roller supports
831	..Upper and lower runs of same belt travel vertically aligned, laterally bending paths
832	..Carrier belt drive means
832.1	...Indexed or intermittent drive
832.2	...Brake means to slow, stop or hold carrier belt
832.3	....Brake means directly engages carrier belt
833	...Carrier belt driven by contact with separate drive belt, or connected thereto by quick-release clamp
834	...Wheel with radial teeth-engaging carrier belt or means connected therewith
835	...Roller, wheel, or drum-engaging belt
836.1	..Having load retainer or guide separate from carrier belt
836.2	...Load retainer biases load transversely against carrier belt
836.3	...Laterally adjustable or yieldable guides contact load
836.4	...Replaceable modular guides for changing the conveying path cross-section
837	..Support, guide, or hold-down means for carrier belt
838	...Track which supports rollers attached to belt
839	...Means twists carrier belt or guides it between angularly oriented horizontal reaches
840	...Guide exerting lateral force on nonload-supporting belt surface
841	...Means slidably supporting belt
842	...Rotatable support or hold-down engaging non-load-carrying face of belt
843	....Resilient
844.1	..Carrier belt structure
844.2	...Connection means joins ends of sheet-like belt
845	...Carrier belt supported or guided by rotatable means attached thereto
846	...Formed of or including a continuous member of sheet-like material (e.g., canvas, etc.)
847	....Including separate reinforcing elements or plural sheet-formed plies
848	...Formed of or including wire mesh, or rods hooked together at belt edges
849	....Link belt attached to carrier belt
850	...Formed of or including pivotally interconnected rigid links
851	....Separate pins interconnect links
852	.....Links pivot about mutually perpendicular axes
853	.....Links having interfitted ends
860.1	CONVEYOR FRAME OR CASING
860.2	.Modules connectable end-to-end with no relative movement
860.3	.Casing, cover, shield or load supporting surface
860.4	..Casing with door
860.5	..Removable cover overlying the conveyor
861.1	.Adjustable conveyor frame or casing
861.2	..Conveyor frame or casing flexes or pivots intermediate its ends to move one end relative to the other
861.3	...Single horizontal pivot axis only
861.4	..Entire conveyor pivots about horizontal and vertical axes
861.5	..Entire conveyor pivots about horizontal axis
861.6	..Entire conveyor pivots about vertical axis

CLASS 200 ELECTRICITY, CIRCUIT MAKERS AND BREAKERS

DECEMBER 1990

1 R	MULTIPLE CIRCUIT CONTROL
1 A	..Bank of leaf spring contacts
1 B	..Sequential operations
1 TK	..Telephone key, leaf spring
1 V	..Reversing
2	.Loop
3	.Combined thermal current
4	.Combined pivoted and reciprocating contact
5 R	.Multiple switch
5 A	...With independent operators
5 B	...Independent operators interlocked
5 C	...Independent operators sequence locked
5 D	...Multiple push-button subsequent release
5 E	...Multiple push-button only one operable at a time
5 EA	....Discrete and identical geometric shaped interlocking slider means
5 EB	....Laminated locking slider arrangement
5 F	...Starter switches for fluorescent lights
175	.Automatic multiple contact selective means
176	..With multidirectional selector means
177	...In different planes
178	..With motion in a single plane
179	...Rotary
180	....With clutch
6 R	.Pivoted contact
6 A	...Universally pivoted handle
6 B	...Cam actuated
6 BA	....Lever borne contacts
6 BB	....Leaf spring contacts
6 C	...Leaf spring contacts
7	..Combined types
8 R	..Radial contact pressure
8 A	....Axial bridging
9	...Plural switch
10	...Arc extinguishing and preventing
11 R	..Dial type
11 A	....With axial bridging
11 B	....Clamping contacts
11 C	.....With circuit
11 D	....Wafer
11 DA	.....Printed circuit
11 E	....Common bias
11 EA	.....With lift
11 G	....Leaf spring bias
11 H	....Laminated leaf spring
11 J	....Coil spring bias
11 K	....Diverse individual bias
11 TC	....Tap changers
11 TW	....Thumbwheel
12	...Electromagnetic release
13	....Plural switch
14	...Plural switch
15	..Knife blade
16 R	.Reciprocating contact
16 A	...Face or normal bridging contact
16 B	...Plunger type
16 C	...Spring-biased
16 D	...Flexible, self-biasing
16 E	...Plug type
16 F	...Knife blade, contact clip
17 R	.Operating means
17 A	...Retarded
17 B	...Step-by-step
18	..Plural switch
600	CAPACITIVE SWITCH
181	ELECTROSTRICTIVE OR ELECTROSTATIC
19 R	PERIODIC
19 A	..Contact breaker assembly
19 DC	..Distributor cap
19 DR	..Distributor rotor
19 EL	..Elevated
19 L	..Locks
19 M	..Magnet
19 TS	..Traffic signal
19 WG	..Wire guard
20	.Combined
21	..Rotary and cam
22	...Adjustable
23	.Multiple contact
24	..Rotary
25	...Adjustable
26	...Radial contact pressure
27 R	..Cam operated
27 A	....Automotive (e.g., distributor)
27 B	....Programming timer
27 BA	.....Sign display
27 BB	......Traffic control signs
28	.Rotary
29	..Adjustable
30 R	.Cam operated
30 A	...Automotive distributor contact breaker assembly
30 AA	....Contact breaker lever
31 R	..Adjustable
31 A	...Contact breaker assemblies
31 CA	....Centrifugal advance mechanism
31 DP	....Distributor plate
31 V	....Vacuum or suction controlled advance mechanism
33 R	RETARDED
33 A	..Mercury
33 B	..Cam operated
33 C	..Chain or flexible drive
33 D	..Longitudinally movable carriage
34	.Dashpot
35 R	.Clock train
35 H	...Hand operated
35 B	...Radio
35 EQ	...Seasonal change
35 A	...Automobile or radio
35 W	...Rewinding for clock
36	..Rotary
37 R	...Multiple contact
37 A	.....Cam operated
38 R	..Cam operated
38 A	....Dial manually set
38 F	....Resettable with automatic return
38 FA	.....Resettable interval timer for oven, range
38 FB	.....Resettable interval timer for radio or clock
38 B	....Sequential program actuated by cam disc
38 BA	.....Individually adjustable cam disc
38 C	....Drum or pattern surface actuated
38 CA	.....Adjustable surface
38 D	....Continuous cycle timer
38 DA	.....Twenty-four-hour cycle
38 DB	.....Sunday cutout
38 DC	.....Adjustable cycle for seasonal change
38 E	....Longitudinally movable
39 R	..Latch trip
39 A	....Range timer
40	...Motor release
41	...Weight release
42.01	PLURAL SWITCHES CONTROL SINGLE CIRCUIT
42.02	.Coded removable actuator
43.01	SWITCH ACTIVATION INHIBITOR (E.G., UNAUTHORIZED/INADVERTENT USE PREVENTION)
43.02	.Combined with connector coupling
43.03	.Engine starter protector
43.04	.Removable actuator
43.05	..Actuator is circuit completing element
43.06	..Plural switches actuated by a single coded element
43.07	..Reciprocating actuator activates switch
43.08	..By rotation of actuator

	SWITCH ACTIVATION INHIBITOR (E.G., UNAUTHORIZED/INADVERTENT USE PREVENTION)
43.09	.Combination automatically actuates switch
43.11	.Actuator locking device
43.12	..Combination lock controls actuator
43.13	..Reciprocating actuator (e.g., push button)
43.14	..Circuit breaker handle type (i.e., padlock)
43.15	...Including attachments to lock handle
43.16	.Actuator blocking device (e.g., latch)
43.17	..Hand grip type (e.g., power tool)
43.18	..Push button type
43.19	..Removable blocking element
43.21	...Mounted on actuator
43.22	.Locked cover prevents access to actuator
46	PATTERN-SHEET CONTROLLED
47	LIMIT SWITCH
48 R	HIGH-POTENTIAL TYPE
48 P	..Pivoted insulator
48 A	..Rotating and pivoted
48 KB	..Knife blade
48 V	..Vertical reach
48 SB	..Side break
48 CB	..Center break
49	POLE SWITCH
50 R	INTERLOCKING
50 A	..Interlock between cover and switch
50 AA	...Draw-out type
50 B	..Interlock between plug and switch
50 C	..Interlock between two or more switches
51 R	COMBINED WITH OR ACTUATED BY CONNECTOR COUPLING
51 LM	..Lazy man
51.01	.Candle-simulating assembly
51.02	.Multiple coupling
51.03	..Multiple circuit control, selective
51.04	...Plural switch
51.05	.Multiple circuit control, selective
51.06	..Three-or-more contact coupling
51.07	.Plural-position coupling
51.08	..Bayonet-coupling
51.09	.Coupling-actuated switch
51.1	..Switch closing on coupling separation
51.11	.Switch in parallel with coupling contacts
51.12	.Meeting contacts of coupling members forming switch contacts
51.13	.Bayonet-coupling
51.14	.Screw-coupling
51.15	..Pull-chain switch
51.16	..Push-button switch
51.17	..Rotatable-key switch
52 R	SPECIAL APPLICATION
52 A	..Tilting vehicle operated
56 R	.Indicating instrument
56 A	...Movable contact beater type
60	.Portable light
61	.Incubator
61.01	.Sound wave responsive
61.02	.Light responsive
61.03	.Gas or smoke responsive
61.04	.Liquid or moisture responsive
61.05	..Conducting liquid
61.06	..Humidity responsive
61.07	...Weight of absorbed water
61.08	.Frangible or destructible type
61.09	.Tramp metal actuated
61.1	.Game or amusement piece operated
61.11	..Ball (e.g., pin ball)
61.12	.Bicycle chain, sprocket or brake actuated
61.13	.Running length, web or strand actuated
61.14	..Actuator attached to or part of web or strand
61.15	..Spooled or reeled quantity
61.16	...Diameter sensing
61.17	..Spool, reel or idler rotation
61.18	..Absence or loss of tension (e.g., breakage or misalignment)
61.19	.Movable or removable interposed non-conductor
61.2	.Container contents level responsive
61.21	..Fluent solid bin or hopper
61.22	.Pneumatic tire inflation responsive
61.23	..Casing deformation feeler
61.24	..Ground engaging feeler
61.25	..Fluid pressure actuated
61.26	...Biased tube engaging member
61.27	.Turn indicator type switches
61.28	..Gear shift lever mounted
61.29	..Pedal controlled or mounted
61.3	..Reset by completed turn
61.31	...Set by turning
61.32	....With pre-turning setting means
61.33	....Steering arm, draglink or tie rod actuated
61.34	...Controller moves reset dog into operative position
61.35	...By movement of steering wheel or post relative to column
61.36	....Wheel or wheel attached member engages controller or rigid extension
61.37	....Through gearing
61.38	....Wheel carried switch unit
61.39	..Control by direction of rotation of shaft or spindle
61.4	.Diameter responsive (e.g., wear)
61.41	.Stationary feeler detects transient object
61.42	.Feeler moves into detecting contact with object
61.43	..Sensitive edge type closure
61.44	..Vehicle attached or carried
61.45 R	.Change of inclination or of rate of motion responsive (e.g., inertia and tilt switches)
61.45 M	...Magnetic holding means
61.46	..Rotary motion
61.47	..Conducting fluid type
61.48	..Oscillating controller
61.49	...Resilient support arm
61.5	...Restrained against return to normal
61.51	...Conducting
61.52	..Tilt responsive
61.53	..Linearly moving controller
61.54	.Steering wheel, shaft or column mounted
61.55	..Wheel hub spring biased type
61.56	...With radially extending operator (e.g., horn ring)
61.57	..On or in wheel rim
61.58 R	.Actuated concurrently with operation or use of art device
61.58 B	...Seat belt
61.59	..Article inserted type (e.g., pencil sharpener)
61.6	..Coupling of fluid conduit
61.61	..Drawer
61.62	..Closure, closure operator or accessory
61.63	...Letter slot or box
61.64	...Lock, bolt or keeper actuated
61.65	....Elevator bar lock type
61.66	....Improper key or mere presence of key in lock
61.67	....By movement of bolt
61.68	.....In keeper
61.69	...Plural closures or plural closure cycles
61.7	...Hinge member actuated
61.71	...Sliding closure
61.72	....Closure-dragged switch actuator
61.73	....Abutment type switch actuator

	SPECIAL APPLICATION
	.Actuated concurrently with operation or use of art device
	..Closure, closure operator or accessory
	...Sliding closure
61.74	....Spring-biased switch &actuator
61.75	.....With modified closure
61.76	...Spring-biased switch actuator
61.77	....Pull chain operator
61.78	....Spring contact
61.79	....Manually disabled
61.8	....Manually reset
61.81	....Mounted on closure frame or enclosure wall
61.82	.....In recess
61.83	...Gravity actuated
61.84	...Window accessory (e.g., shades and blinds)
61.85	..Manipulating, operating or carrying handle
61.86	...For fluid controlling valve
61.87	...Hand brake lever
61.88	...Gear shift lever
61.89	..Vehicle pedal
61.9	...Engine governed over-riding means
61.91	..Transmission controlled
61.93	.Anti-intrusion type
	SNAP
400	CONTACT MOVED BY SUDDEN RELEASE OF STORED ENERGY, (E.G., SPRING CHARGER)
401	TOGGLE MECHANISMS
402	SNAP
403	.Mercury snap
404	.Magnetic snap
405	.Double snap
406	..Including raised flexible snap element (e.g., dome)
407	..Blade element stressed to twisted configuration
408	..Spring Buckle
409	...Spring compressed between two points at a fixed distance from each other
410	..Rotating contact
411	...Contact movement blocked until spring is charged (e.g., latch)
412	....Push button actuated
413	....Pull cord actuated
414	....Including radial motion
415	...Contact restrained until spring is charged (e.g., detent)
416	...Cam actuated contact
417	....Push button actuated
418	....Pull cord actuated
419	...Ratchet controlled
420	....Pull cord actuated
421	....Pawl carries contact
422	.....Push button actuated
423	.....Pull cord actuated
424	..Contact movement is blocked until spring is charged
425	...Blocked by distinct latch
426	....Driving and driven element oscillate about a common axis
427	.....With reciprocating contact
428	....Including cam or wedge release
429	....Including reciprocating contact
430	..Contact movement is restrained until spring is charged (e.g., detent)
431	..Cam or wedge release
432	...Roller contact acts as cam
433	...Contact slides over pivot point
434	...Reciprocating contact
435	....Contact carrier snaps in opposite direction from actuator
436	...Including lost motion coupling to cam
437	...Spring biased element slides over pivoted element
438	...Spring biased pivoted element snapped when cam follower crossed pivot
439	...Wedge on reciprocating actuator
440	..With mechanism to insure positive separation of contacts (i.e., positive kick)
441	...Contact moved by separate lever
442	...Actuator moves contact near limit of travel
443	..Contact driven by impact element
444	...Having weight drive
445	..Snap spring system using multiple diverse springs
446	..Systems having lost motion connections between the actuator, an intermediate snapped element and the contact
447	..Double ended type (e.g., reciprocating bridging contacts)
448	...Contact pivots moved by actuator
449	..Reciprocating contacts
450	...Compression spring type
451	..End of blade pivotally carries element compressing blade
452	..Both ends of blade are freely floating
453	..Compression spring (e.g., push force)
454	...Both ends of spring move
455	....Having roller contact
456	....Both ends of spring are carried by blade (e.g., leaf spring)
457	....Axially compressed coil spring
458	....One end of spring is carried by actuator
459	...One end of spring is fixed
460	....Central portion of spring is moved to cause snap
461	....Blade is moved to cause snap
462	..Tension spring (e.g., pull force)
463	...Contact pivot point is moved to cause snap
464	....Pivot point is carried by actuator
465	...Both ends of spring move
466	....One end of spring is carried by actuator
467	...One end of spring is fixed
468	.Single snap
469	..Including lost motion coupling to cam
470	..Contact movement is blocked by latch until spring is charged
471	..Contact restrained before snap spring is charged (e.g., detent)
472	...Detent function performed by spring biased contact (e.g., knife blade)
79	SUSPENDED-WIRE CONTROLLED
80 R	CENTRIFUGAL
80 A	..Liquid contact
80 B	..Reed-type contact
81 R	FLUID PRESSURE
81 H	..Hand operated
81.4	.Plural switch
81.5	.With plural operators
81.6	.Operable to cause liquid contact flow
81.8	.Bourdon tube type
81.9 R	.Flow-responsive type
81.9 M	...Magnet
81.9 HG	...Mercury
82 R	.Piston
82 B	...High voltage
82 C	...Micro-switch
82 D	...Automobile
82 DA	....Starter
82 A	...Adjustable piston stroke
82 E	...Magnet
83 R	.Diaphragm
83 WM	...Washing machine
83 A	...Differential pressure
83 B	...Special diaphragm
83 C	...Aneroid bellows

CLASS 200 ELECTRICITY, CIRCUIT MAKERS AND BREAKERS

DECEMBER 1990

	FLUID PRESSURE
	.Diaphragm
83 D	...Differential and plural bellows
83 F	...Liquid contact
83 J	...Piston and diaphragm
83 L	...Magnetically operated
83 N	...Contacts on diaphragm
83 P	...Snap action
83 Q	...Combined switch and valve actuator
83 S	...Adjustment means
83 SA	....Differential and range adjustment
83 T	...Time delay
83 V	...Miniature
83 Y	...Multiple diaphragms or multi-ply diaphragms
83 W	...Overpressure protection means

150 G	....Puffer piston
151	..Solid
182	LIQUID CONTACT
183	.Combined
184	..With illumination means
185	..With electrical resistance
186	.Time delay
187	.Plural switches (in same housing)
188	..With common electrical connection (solid or liquid)
189	..Progressive contacts
190	.Liquid level responsive
191	.Having capillary tube means
192	..With electro-capillary action
193	.Having electrolytic conductive-liquid means
194	..With significant electrolyte
195	.Spray or jet by centrifugal force and/or by other pressure-producing means
196	..Periodic
197	...Oscillating jet
198	...Contact dips (moves relative to container) into the conductive liquid
199	.Contact dips (moves relative to container) into the conductive liquid
200	..Periodic
201	...Progressive contacts
202	...Cam actuated
203	.Cam actuated
204	..Gyratory movement
205	..Periodic
206	...Plural switches (switches not in same housing)
207	...Eccentric switch movement (wobble)
208	.Periodic
209	.Piston or plunger means
210	..Contact attached to or unitary with piston or plunger
211	.Pressure-deformable (flexible) means
212	..With progressive contacts
213	..With movably attached contact means
214	.With movable liquid-separating or shifting means
215	.With external support or external housing
216	..With hermetic or resin sealing
217	..Dual function support
218	...With actuator securing means
219	..With actuation means
220	.Tiltable or rotatable
221	..Container has plural major conductive-liquid containing chambers or spaces connected by a passageway
222	...Container forms at least one contact
223	..Having position sensitive ring, disk or conical contact
224	..Multi-throw or multi-position
225	...Single pole-double throw
226	..Container forms at least one contact
227	...Chamber contains insulative restrictive element or means to form at least one conductive-liquid-containing recess
228	..Chamber contains insulative restrictive element or means to form at least one conductive-liquid-containing recess
229	..Container includes at least one integral recess
230	..Float actuated
231	..With significant contact-sealing means
232	..With anti-splash means
233	.Particular conductive liquid
234	..Having contact wetting agent
235	.Particular contact structure or material
236	..Mounting or attaching means
500	HELICAL DRIVE MECHANISM
501	GEAR DRIVEN
502	SOLID CONTACT
503	.Rolamite-type
504	.Coaxial switch
505	.Hand held squeeze actuated switch
506	.Interposed nonconductor
507	.Screw used as moving contact
508	.Both contacts are moved

SOLID CONTACT
509 .Bimodal (e.g., single stroke make/break-no make on return)
510 ..Push button actuator
511 .Compressible elastomer
512 .Membrane type
513 ..Specific dome shape
514 ..Specitic nonconductive materials
515 ..Pressure equalizing means
516 ..Including auxiliary dome/disc type spring
517 ..Including additional actuator
518 .Plural actuators operate single switch
519 .Push and/or pull with 3 or more positions
520 .Push button operated
521 ..Including tactile feedback mechanism
522 ..Trigger actuator
523 ..Including alternate action mechanism (e.g., push-push)
524 ...With heart-shape cam
525 ...With w-shape rocking element
526 ...With rotating member (e.g., ball point pen type)
527 ....Including rotating contact
528 ....Rotating cam moves contact
529 ..Mechanism to transfer reciprocating to rotary or rocking
530 ..Contact carried by push button
531 ...Sliding contact
532 ...Leaf spring contact
533 ..Cam actuated contact
534 ..Abutting contact
535 ...Leaf spring contact
536 ..Sliding contact
537 .Reciprocating actuator
538 ..Push/pull rod
539 ...Specific detent structure
540 ...Contact carried by rod
541 ....Sliding contact
542 ...Cam actuated contact
543 ..Pull cord
544 ...Rotating contact
545 ...Cam actuated contact
546 ...Leaf spring contact
547 ..Slide switch (handle projects perpendicular to motion)
548 ...Housing and actuator form detent
549 ...Contact carried by slide
550 ....Sliding contact
551 ...Cam actuated contact
552 ..Two button switches - (noncoaxial parallel buttons)
553 .Rocking actuator (e.g., rocker, lever)
554 ..Knife blade contact
555 ...With catch
556 ..Housing and actuator form detent
557 ..Actuator biasing mechanism
558 ..Cam actuated contact
559 ...Leaf spring contact
560 ..Rotating contact
561 ..Reciprocating contact in straight-line motion
562 ..Contact carried by actuator
563 ...Sliding contact
564 .Rotating actuator (e.g., dial)
565 ..Housing and actuator form detent
566 ..Auxiliary motion required to actuate or release (e.g., push to rotate)
567 ..Rotation about a longitudinal axis of tool or appliance
568 ..Contact actuated by cam
569 ...Leaf spring contact operated by cam on actuator
570 ..Rotating contact
571 ...Sliding contact
572 ..Linear moving contact
573 CAM OPERATES CONTACT OR MICROSWITCH
574 .Peripheral cam
237 ELECTRIC SWITCH DETAILS
238 .Contact
239 ..Abutting type
240 ...With subsequent rolling
241 ...With subsequent sliding
242 ....Having contact cleaning structure
243 ...Bridging contacts
244 ...With rigid pivoted member carrying the moving contact
245 ...With resilient mounting
246 ....With spring blade support
247 ....Within supporting guides
248 ...Self-aligning contacts
249 ...Having contact adjusting means
250 ...Having biasing means
251 ....Means for adjusting contact pressure
252 ..Sliding type
253 ...Having contact cleaning structure
253.1 ...Plug type contacts
254 ...Knife and clip contacts
255 ....Having biasing means
256 .....Means for adjusting contact pressure
257 ...With resilient mounting
258 ...Self-aligning contacts
259 ...Having contact adjusting means
260 ...Having biasing means
261 ....Means for adjusting contact pressure
262 ..Material
263 ...Cooperating contacts of different material
264 ...Infiltrated porous substance
265 ...Compositions
266 ...Alloys
267 ...One layer (i.e., additional to its mounting)
268 ...Two layers
269 ...Three layers or more
270 ...Elements
271 ..Blade or pole-plate
272 ...With support
273 ...Rotary
274 ....With support
275 ..Particular shape or structure of the contact
276 ...Coil spring contact
276.1 ....With push button actuator
277 ...Roller contact
277.1 ....With push button actuator
277.2 ....With rocker actuator
278 ...Laminated
279 ...Contact making surface (e.g., grooved)
280 ..Interchangeable and reversible
281 ..Replaceable or renewable
282 ..Spring clip
283 ..Leaf spring support
284 ..Integral contact and terminal structure
285 ..Lubricated
286 ..Adjustment means
287 ...Self-adjusting
288 ..Buffer, rebound preventing
289 ..Cooler
290 ..Spring biasing means
291 ..Detent
292 ..Printed circuit
293 .Cases and bases
293.1 ..Unitary switch mounted in handle or handgrip
294 ..Surface
295 ..With flexible mounting means
296 ..Panel
297 ..Outlet box
298 ..Pendant
299 ...With lamp socket
300 ..Frangible element

CLASS 201 DISTILLATION: PROCESSES, THERMOLYTIC

DECEMBER 1990

1 WITH MEASURING, TESTING OR INSPECTING
2 WITH CLEANING OF APPARATUS
2.5 NON-MINERAL DISTILLAND WITH CATALYST OR CHEMICAL TREATMENT OF VOLATILE COMPONENT
3 WITH PHYSICAL SEPARATION OF SOLID BY-PRODUCT FROM REMOVED ADMIXTURE
4 .Gas or vapor containing mixture
5 AND SHAPING TO DESIRED FORM OR CONFIGURATION
6 .Prior to charging to carbonizing zone
7 WITH COMMINUTING
8 .Prior to charging to carbonizing zone
9 AND SURFACE TREATING MATERIAL TO REDUCE OR PREVENT AGGLOMERATING OR FOAMING OR SWELLING DURING DISTILLATION
10 BY CONDUCTION USING PREHEATED CHARGE CONTAINER OR PREHEATED INERT DISPARATE SOLID OR PREHEATED LIQUID
11 .Liquid is metal
12 .Particulate disparate solid
13 USING A CARBONIZATION PRODUCT AS INDIRECT HEAT SOURCE
14 .For heating the carbonaceous material
15 ..Including heat by burning of product
16 ...Solid product
17 AND REFINING CHAR, E.G., DESULFURIZING COKE
18 UTILIZING APPARATUS OF PARTICULAR COMPOSITION
19 APPLYING ELECTRICAL ENERGY DIRECTLY TO MATERIAL
20 ADDING DISPARATE NON-GASEOUS MATERIAL TO FEED
21 FEED OF TWO OR MORE CARBONACEOUS MATERIAL (AT LEAST THE PREDOMINATE ONE BEING SOLID)
22 .Char containing
23 .Mineral oil containing
24 .Coals only
25 FEED OTHER THAN COAL, OIL SHALE OR WOOD
26 IN PARALLEL STAGES SIMULTANEOUSLY
27 INCLUDING BURNING OF VAPORIZED PRODUCT
28 SEQUENTIALLY REMOVING, TREATING AND RECYCLING A PRODUCT
29 .Removing and treating vapor
30 AND FRACTIONALLY CONDENSING VAPORS
31 FLUIDIZED BED
32 IN A MOVING BED
33 .Agitating
34 .Gravitating
35 CARBONIZING UNDER PNEUMATIC PRESSURE OR VACUUM
36 AND ADDING DISPARATE GASEOUS MATERIAL TO THE CARBONIZING ZONE
37 .Combustion gases
38 .Steam containing
39 QUENCHING CHAR WITH AN INERT MATERIAL
40 ARRANGING THE CARBONACEOUS MATERIAL IN THE CARBONIZING ZONE

120 ....Vertical
121 .....With fluid injection
122 .....With recuperator
123 .....With regenerator
124 .....With heating chamber
125 ......Alternate reverse flow flues
126 ......Vertical flues
127 ......Circumvallate flues
128 ....Inclined
129 .....With fluid injection
130 .....With regenerator or recuperator
131 .....Rotary
132 .....Gas bench
133 ....Horizontal
134 .....With fluid injection to retort
135 .....Plural gas and/or air admission
136 .....Rotary
137 .....With heating chamber
138 .....With flues
139 ......Vertical
140 ....With recuperators
141 ....With reversible regenerators
142 ....Alternatively poor and/or rich gas fuel
143 ....Regenerators reversing along the system
144 ....Regenerators reversing across the system
145 ......Horizontal
146 ....With regenerators
147 .....Gas bench
148 ......With recuperator
149 ......With fluid injection
150 ....Preheating
151 ....Combustion control devices
152 ..Separatory
153 ...Still and column
154 ....Plural columns
155 ....Plural stills
156 .....Parallel
158 ...Column
159 ....With preheater
160 ....Automatic temperature and/or pressure control
161 ....Partial reflux condenser
162 ....Vapor-element by-pass
163 ...Still
164 ....Recovery from containers
165 ....Still and stove
166 ....Still and stand boiler
167 ....Still and feed-water heater
168 ....Still and extractor
169 .....Continuous extraction
170 .....Still extractor
172 ....Plural
173 .....Series
174 ......Multiple effect
175 ....With agitator
176 ....With distilland treating devices
177 .....Preheater
178 ......Straining
179 ......Dephlegmating
180 ......Condensing
181 .....Level control
182 ....With vapor-treating devices
183 .....Still and absorber
184 ......Still absorber
185.1 .....Condenser
185.2 ......Direct contact
185.3 ......Air condensers
185.4 ......Circulating coolant in cap or top closure
185.5 ......Helical coil for vapor stream
185.6 ......Helical coil for coolant
186 ......Plural
187 ......Concentric with still
188 ......Still supporting
189 ......Still supported
190 ....Cap (or closure)
191 ....Jacketed
192 ....Still feeding
193 ....Distilland-level control
194 ....Still feeding
195 ......Still feeding
196 ....Distilland-level control
197 .....With separator
198 .....Dephlegmator
199 .....Doubler
200 .....Filter
201 .....Aerator
202 ....With condensate-treating devices
203 .....Aeration
204 .....Decanter
205 ....Vacuum
206 ....Automatic heat control
.Types

CLASS 203 DISTILLATION: PROCESSES, SEPARATORY

DECEMBER 1990

1	WITH MEASURING, TESTING OR INSPECTING
2	.Of temperature or pressure
3	.Of concentration
4	INCLUDING PURGING OF THE SYSTEM
5	SEPARATING ISOTOPES OR TAUTOMERS
6	ADDITION OF MATERIAL TO DISTILLAND TO INHIBIT OR PREVENT REACTION OR TO STABILIZE
7	.For scale inhibiting or corrosion preventing
8	.For inhibiting or preventing a polymerization reaction
9	..Of unsaturated hydrocarbon
10	WATER PURIFICATION ONLY
11	.Under pressure or vacuum
12	DISTILLING TO SEPARATE OR REMOVE ONLY WATER
13	.From nitric acid
14	.From organic compound
15	..Organic acid
16	...Acetic
17	..Aldehyde or ketone
18	..Alcohol
19	...Ethanol
20	INCLUDING DEFOAMING OR INHIBITING FOAM
21	AND RECOVERING HEAT BY INDIRECT HEAT EXCHANGE
22	.Utilizing recovered heat for heating feed
23	..Distillation residue as heat source
24	..Compressed vapor as heat source
25	.Utilizing recovered heat for heating the distillation zone
26	..Compressed vapor as heat source
27	.Utilizing recovered heat in subsequent step in process
28	WITH CHEMICAL REACTION
29	.Including step of adding catalyst or reacting material
30	..For polymerizing unwanted component
31	..Oxidizing material
32	..Reducing material
33	..Inorganic salt containing oxygen in the anion
34	..Acid
35	...Phosphoric or sulfuric acid
36	..Alkaline oxide or hydroxide
37	...Alkali metal hydroxide
38	..Organic material
39	WITH DISPARATE PHYSICAL SEPARATION
40	.Of entrained particles from a vapor or gas
41	.Utilizing solid sorbent
42	.Utilizing liquid sorption of component from gas or vapor
43	.Utilizing liquid-liquid extracting of distillation product
44	..Of distillate
45	...And distilling raffinate phase
46	...And distilling extractant phase
47	.Utilizing removing solid from liquid
48	..By crystallizing
49	CONVECTIVE DISTILLATION WITH NORMALLY GASEOUS MEDIUM, E.G., AIR
50	ADDING MATERIAL TO DISTILLAND EXCEPT WATER OR STEAM PER SE
51	.At least two materials
52	..Mixtures of hydrocarbons
53	..One material is water
54	...A second material is aldehyde or ketone
55	...A second material is an alcohol
56	..One additive an alcohol or ether
57	.Organic compound
58	..Heterocyclic
59	..Amine
60	..Ester
61	..Acid
62	..Aldehyde or ketone
63	..Alcohol or ether
64	...Polyhydroxy alcohol or ether derivative thereof
65	...Hydroxy aromatic (e.g., Phenol)
66	...Methanol
67	..Halogenated hydrocarbon
68	..Hydrocarbon
69	...Aromatic
70	...Acyclic
71	PLURAL DISTILLATIONS PERFORMED ON SAME MATERIAL
72	.One a filming distillation
73	.One a distillation under positive pressure or vacuum
74	..Distillation of initial distillate
75	...And return of distillation product to a previous distillation zone
76	...Including the addition of water or steam
77	...Initial distillation under positive pressure or vacuum
78	..And returning distillation product to a previous distillation zone
79	..Including the addition of water or steam
80	..Initial distillation under positive pressure or vacuum
81	.Distillation of initial distillate
82	..And returning distillation product to a previous distillation zone
83	..Including the addition of water or steam
84	.And returning distillation product to a previous distillation zone
85	.Including the addition of water or steam
86	DISTILLATION IN APPARATUS OR ELEMENT OF SPECIFIC MATERIAL
87	WITH FRACTIONAL CONDENSATION OF VAPOR OUTSIDE STILL
88	FLASH VAPORIZATION OF DISTILLAND
89	FILMING OF DISTILLAND FOR VAPORIZATION
90	SPRAYING OF DISTILLAND INTO VAPORIZATION ZONE
91	VAPORIZATION ZONE UNDER POSITIVE PRESSURE OR VACUUM
92	.Including the addition of water or steam
93	..And returning product of distillation step to distillation zone
94	.And returning product of distillation step to distillation zone
95	INCLUDING ADDITION OF WATER OR STEAM
96	.To distillation column
97	.And returning product of distillation step to distillation zone
98	AND RETURNING PRODUCT OF DISTILLATION STEP TO DISTILLATION ZONE
99	MISCELLANEOUS SEPARATORY

CLASS 204 CHEMISTRY, ELECTRICAL AND WAVE ENERGY

DECEMBER 1990

	PROCESSES AND PRODUCTS
1.11	.Electrolysis
1.5	..Actinide series element or compound
2	..Electroprinting
2.1	..Electroforming battery electrode
3	..Electroforming
4	...Reproductions
5	....Recording devices
6	....Printing plates, electrotypes, dies and the like
7	....Mirrors and reflectors
8	....Ornamental
9	....Rolls, rings or hollow bodies
10	...Powder, flakes or colloidal suspensions
11	...Perforated or foraminous articles
12	...Sheets, webs, wires, filaments
13	....Of indeterminate length
14.1	..Coating
	...Specific shapes, forms or configurations
15	....Localized areas
16	.....Uniting and repairing
17	.....Printing members
18.1	.....Designs and ornamentation
19	....Mirrors and reflectors
20	....Non-conducting base
21	.....Textile fabrics
22	.....Sheets and plates
23	....Conducting base
24	.....Perforated or foraminous
25	.....Cylinders, rolls or hollow articles
26	......Internal coating
27	.....Sheets, webs, wires, filaments
28	......Of indeterminate length
	...Combined
29	....With base treatment
30	.....Non-conducting base
31	......Waterproofing
32.1	.....Cleaning or etching
33	......Aluminum base
34	......Ferrous base
34.5	......Semiconductor
35.1	....With treatment of the coating
36	.....Brightening and burnishing
37.1	.....Heat treatment
37.3	......Coating includes tin
37.6	.....Nonmetal electrolytic coating
38.1	....With other coating methods
38.3	.....Anodic layer
38.4	.....Nonelectrolytic metal layer with subsequent electrodeposition
38.5	.....Electrolytic layer with subsequent, nonelectrolytic metal layer
38.6	.....Ceramic layer
38.7	.....Resinous layer

136	....Hydrocarbon oils
138	....Sugar
140	...Metals and metallic alloys
141.5	....Removing foreign materials, e.g., cleaning, etc.
144	.....By internal battery action
144.5	.....With current change in workpiece or solid-workpiece moving contact
145 R	.....Nonelemental material from ferrous metals
145 F	.......Fused bath
146	.....Entire identifiable elemental layer or portion; e.g., stripping, etc.
147	....Object protection
148	.....Internal battery action
149	...Water, sewage and other waste waters
150	....Internal battery action
151	....Diaphragm
152	....With filtering
153	...Alkali-forming metal hydroxides
153.1	..Analysis or testing
153.11	...For corrosion
153.12	...Involving enzyme or microorganism
153.13	...For halogen or halogen containing compound
153.14	...For nitrogen or nitrogen containing compound
153.15	...For alkali or alkaline earth metal or compound thereof
153.16	...For oxygen or oxygen containing compound (except water)
153.17	....Utilizing semipermeable membrane
153.18	....Utilizing solid electrolyte
153.19	...For sulfur or sulfur containing compound
153.2	...For organic compound
153.21	...For pH
153.22	...For water (e.g., moisture, etc.)
153.23	...Including titration
155	.Electrical, or wave energy in magnetic field
156	..With discharge
157.15	.Processes of treating materials by wave energy
157.2	..Isotope separation or enrichment
157.21	...Inorganic product produced
157.22	....Using laser
157.3	..Removing a component from normally gaseous mixture
157.4	..Process of preparing desired inorganic material
157.41	...Using laser
157.42	...Using sonic or ultrasonic energy
157.43	...Using microwave energy
157.44	...Using ionizing radiation
157.45	...Boron, phosphorous or silicon containing product produced
157.46	...Nitrogen containing product produced
157.47	...Carbon containing product produced
157.48	...Halogen containing product produced
157.49	...Sulfur containing product produced
157.5	...Oxygen containing product produced
157.51	....Metal oxide or hydrate thereof
157.52	...Hydrogen containing product produced
157.6	..Process or preparing desired organic product containing at least one atom other than carbon and hydrogen
157.61	...Using laser
157.62	...Using sonic or ultrasonic energy
157.63	...Using ionizing radiation
157.64	....Nitrogen, sulfur, phosphorous or silicon containing product produced
157.65	....Carbocyclic ring containing product produced
157.67	...Vitamin product produced
157.68	...Carbohydrate or protein product produced
157.69	...Heterocyclic product produced
157.7	....Hetero sulfur containing
157.71	....Hetero nitrogen containing
157.72	.....Hetero nitrogen ring contains at least two hetero atoms
157.73	...Phosphorous product produced
157.74	...Silicon product produced
157.75	...Heavy metal product produced

PROCESSES AND PRODUCTS

	.Processes of treating materials by wave energy
	..Process or preparing desired organic product containing at least one atom other than carbon and hydrogen
157.76	...Sulfur product produced
157.77	....Nitrogen containing
157.78	....Oxygen containing
157.79	.....Halogen containing
157.8	....Halogen containing
157.81	...Nitrogen product produced
157.82	....Oxygen containing
157.83	.....Nitroso or oxime containing
157.84	......Halogen containing
157.85	....Carbon triple bonded to nitrogen containing
157.86	....Halogen containing
157.87	...Carboxylic acid or derivative product produced
157.88	....Oxygen other than as part of a carboxylic acid or derivative moiety
157.89	....Atom other than carbon, hydrogen or oxygen
157.9	...Alcohol product produced
157.91	....Fused or bridged ring containing
157.92	...Ether product produced
157.93	...Aldehyde or ketone product produced
157.94	...Halogen product produced
157.95	....Carbon and halogen only in product
157.96	.....Carbocyclic ring containing
157.97	......Aryl ring containing
157.98	....Unsaturated product
157.99	.....Unsaturation in aryl ring
158.1	....Carbocyclic ring containing
158.11	....Two or more diverse halogen atoms containing
158.12	....Four or more carbon atoms containing
158.14	..At least one carbocyclic ring and only carbon and hydrogen atoms in product produced
158.2	..Processes of purifying materials
158.21	...Organic material purified

192.25	....Semiconductor
192.26	....Optical or photoactive
192.27	.....Reflective

	.Coating, forming or etching by sputtering
	..Glow discharge sputter deposition (e.g., cathode sputtering, etc.)
	...Specified deposition material or use
	....Optical or photoactive
192.28	.....Absorptive
192.29	.....Transparent conductor
192.3	....With sputter etching
192.31	..Ion plating
192.32	..Sputter etching
192.33	...Measuring or testing (e.g., of operating parameters, end point determination, etc.)
192.34	...Ion beam etching (e.g., ion milling, etc.)
192.35	...Etching specified material
192.36	....Organic
192.37	....Silicon containing
192.38	.Vacuum arc discharge coating
193	APPARATUS
194	.Electrolytic
400	..Analysis and testing
401	...Fault testing of sensor or component
402	...Regeneration or activation
403	...Biological, e.g., microbe, enzyme, antigen, etc.
404	...Corrosion
405	...Titration
406	...With significant electrical circuitry or nominal computer device
407	...With significant display or analytical device
408	...With means for temperature or pressure compensation
409	...With means providing specified-flow condition or flow-path
410	....Solid electrolyte means
411	....Three or more electrodes
412	...Three or more electrodes
413	...Liquid electrode, e.g., Hg, Na, etc.
414	...Gel electrolyte
415	...Selectively permeable membrane
416	...Ion-sensitive electrode
417	....Liquid ion-exchanger
418	....Organic membrane
419	....Inorganic membrane
420	.....Glass ion-selective membrane
421	...Solid electrolyte
422	....Liquid sample sensor
423	.....With fugitive protective element
424	....Gas sample sensor
425	.....With impressed current means
426	......Planar electrode surface
427	.....With gas reference material
428	......With protective element
429	.......Protective element is a layer
430	...Moisture absorbing electrolyte
431	...Gas sensing electrode
432	....With gas diffusion electrode
433	...Measuring carbon or pH
434	...Involving plating, coating or stripping
435	...Standard reference electrode
196	..Object protection
197	...Internal battery
	..With movable electrode means
198	...Work conveyer
199	....Rotary
200	.....With base treatment
201	.....Loose article
202	....Endless
203	.....With base treatment
204	......With current control
205	.....With current control
206	...Continuous strip or filament electrode
207	....With base treatment
208	.....Stripping
209	.....Mechanical working
210	.....Heat treatment means
211	....With current control
212	...Rotary
213	....Barrels and rotary receptacles
214	.....Swinging or tilting receptacles
215	....With base treatment
216	.....Stripping
217	.....Mechanical working
218	....With current control
219	...Liquid electrode
220	....With electrode recirculation means
221	....With oscillator, reciprocator or agitator
222	...Electrode oscillator, reciprocator or agitator
223	....With current control
224 R	...Localized area applicators
224 M	.....Electrochemical machining
225	...Electrode feeding or withdrawal means
226	....With base treatment
227	..Cells with base treatment means
228	..Cells with current control means
229	...With fluid pressure, flow or level intercontrol
230	....Gaseous fluid
231	...Auxiliary electrode
232	..Cells with electrolyte treatment means
233	...Leacher, dissolver or extractor
234	....Recirculation
235	.....With filter
236	.....With heater or cooler
237	...Recirculation
238	....With filter
239	....With heater or cooler
240	...With filter
241	...With heater or cooler
242	..Cells
243 R	...Fused bath
243 M	.....Bath current distribution, magnetic field control
244	....Plural cells
245	....With feeding and/or withdrawal means
246	.....Gas feeding
247	.....Gas withdrawal
248	...Internal battery
249	....Filter or loose electrode type
250	...Liquid electrode
251	....Diaphragm type
252	...Diaphragm type
253	....Plural cells
254	.....Bipolar electrode
255	......With feeding and/or withdrawal means
256	.......Gas
257	.....With feeding and/or withdrawal means
258	......Gas
259	....Basket-type electrode
260	....Concentrically arranged electrodes
261	....With agitator
262	....With heater or cooler
263	....With feeding and/or withdrawal means
264	.....And filter
265	.....Gas feeding
266	.....Gas withdrawal
267	...Plural cells
268	....Bipolar electrode
269	....With feeding and/or withdrawal means
270	.....Gas
271	...Portable
272	...Concentrically arranged electrodes
273	...With agitator
274	...With heater or cooler
275	...With feeding and/or withdrawal means
276	....And filter

	APPARATUS
	.Electrolytic
	..Cells
	...With feeding and/or withdrawal means
277	....Gas feeding
278	....Gas withdrawal
279	..Elements
280	...Electrodes
281	....Electroforming molds or strips plates
282	....With diaphragm
283	.....Perforated or foraminous electrode
284	....Perforated or foraminous
285	.....Work holder
286	....With electrode supporting means
287	.....Work container
288	.....Electrodes with lateral extensions
289	....With lateral extensions
290 R	....Laminated or coated
290 F	......Dielectric film-forming metal base, insoluble conductive coating
291	....Composition
292	.....Metallic
293	......Alloys
294	.....Carbon containing
295	...Diaphragms
296	....Organic
297 R	...Electrode supports and work holders
297 M	.....Workpiece held by magnetism or suction
297 W	.....Workpiece rack
298.01	.Coating, forming or etching by sputtering
298.02	..Coating
298.03	...Measuring, analyzing or testing
298.04	...Ion beam sputter deposition
298.05	...Ion plating
298.06	...Triode, tetrode, auxiliary electrode or biased workpiece
298.07	...Specified gas feed or withdrawal
298.08	...Specified power supply or matching network
298.09	...Specified cooling or heating
298.11	...Specified mask, shield or shutter
298.12	...Specified target particulars
298.13	....Target composition
298.14	...Specified anode particulars
298.15	...Specified work holder
298.16	...Magnetically enchanced
298.17	....Flux passes through target surface
298.18	.....Focusing target (e.g., conical target, plural inclined targets, etc.)
298.19	.....Planar magnetron
298.2	......Moving magnetic field or target
298.21	.....Cylindrical or curved magnetron target
298.22	......Moving magnetic field or target
298.23	...Moving workpiece or target
298.24	....Indeterminate length moving workpiece
298.25	....Multi-chamber (e.g., including air lock, load/unload chamber, etc.)
298.26	....Plural diverse treatment stations, zones, or coating material source within single chamber
298.27	....Plural modes of movement (e.g., planetary, epicyclic, etc.)
298.28	....Rotational movement
298.29	....Oscillatory movement
298.31	..Etching
298.32	...Measuring, analyzing or testing
298.33	...Specified gas feed or withdrawal
298.34	...Auxiliary electrode, bias means or specified power supply
298.35	...Multi-chamber, load/unload means or moving workpiece
298.36	...Beam or directed flux etching (e.g., ion beam, etc.)
298.37	...Magnetically enhanced
298.38	...Microwave excitation
298.39	...Plural parallel plates (e.g., desmearing reactor, etc.)
298.41	.Vacuum arc discharge coating
299 R	.Electrophoretic or electro-osmotic
299 EC	...Coating
300 R	..With electrode moving means
300 EC	....Coating
301	..With diaphragm
302	.Electrical separation or purification of liquids
304	..With electrode moving means
305	..With current control means
306	...With fluid pressure, flow or level intercontrol
307	..With agitator or vibrator
308	..With heating or cooling means

CLASS 206 SPECIAL RECEPTACLE OR PACKAGE

DECEMBER 1990

0.5	INFUSION CONTAINING
0.6	FOR GAS
0.7	.With gas storing absorbent or solvent
0.8	FOR COIN, E.G., MAT
0.81	.Combined
0.82	.With closing or fastening means
0.83	..Multiple pocket or compartment
0.84	.Multiple pocket or compartment
85	WITH IGNITER FOR TOBACCO CONTENT
86	.Combined
87	.Igniter is flint-wick type
88	..Interrelated ignition and content access
89	..With common access to igniter and content
90	.Igniter is match
91	..Inner compartment slides relative to outer
92	..Swingable container flap or cover provides access to match
93	...Unitary foldable blank container and match cover unit
94	..Attached to or carried by external container
95	...Having means to receive cover flap of match packet (e.g., tongue and slot connection)
96	MATCH PACKET, CONTAINER OR HOLDER (E.G., MATCH SAFE)
97	.With windguard
98	.Striker surface in withdrawal path of match
99	..Match comb type
100	..Opposed striker surfaces
101	.Means to secure to person or garment
102	.With disparate article, article receiver or display feature (not ash tray or tobacco)
103	..Match comb type
104	.Match comb type
105	..Plural "books"
106	..With accidental ignition prevention means or arrangement
107	...Discrete holder
108	...Striker surface guard or shield
109	....Groove or opposed surfaces
110	....Slide or pivot of match comb
111	...Nonflap type
112	...Striker surface on outside of cover flap
113	....Access through tuck-flap aperture
114	....At comb back
115	...Match-head shield
116	..Pivotally mounted comb
117	..With integral debris receiver
118	..Discrete case for book
119	..Attachment means
120	...For ash tray
121	.Plural matches grouped in box
122	..Plural boxes grouped in box
123	..Gravity feed to access port
124	...Convertible from box
125	...With debris receiver
126	..Mechanistic means to raise content
127	..With means to support or attach box
128	...Convertible from box
129	...With means to expose match
130	...Including debris receiver
131	..With discrete case for box
132	...Including debris receiver
133	..With debris receiver
134	.With support or attachment means (for loose matches)
135	..With debris receiver
136	.With debris receiver
137	.With separate striker member
138	..Magazine supply
44 R	DISPLAY TYPE (I.E., CONVERTIBLE TO OR FROM DISPLAY)
44 B	..Sheet holder
44 K	..Basket
44.11	.Stock and sample
44.12	.With removal facilitating means
45	.Terraced or stepped shelves
45.11	.Sectional or multiple movable compartment type
45.12	..With rupturable wall portion
45.13	.Cover-controlled or cover-operated display
45.14	.With content supporting and/or positioning means
45.15	..Slidable or pivotally mounted
45.16	..Follower or adjustable bottom
45.17	..Located on or formed by outwardly swingable side wall
45.18	..Movable to inclined support position
45.19	..Supporting bed or platform on receptacle bottom
45.2	.With cover convertible to easel or receptacle support
45.21	..Folded blank box
45.22	...Multiple blank
45.23	..Pivoted cover
45.24	.With folding easel or receptacle support
45.25	..Folded blank box
45.26	...Support cut from receptacle wall
45.27	...Multiple blank
45.28	.With cover convertible to display card
45.29	..Folded blank box
45.3	...Multiple blank
45.31	.With window or transparent wrapper
45.32	..Pie
45.33	..Transparent wrapper
45.34	..Cover one or more walls
139	PORTABLE SEGREGATING CARRIER FOR PLURAL CYLINDRICAL BEVERAGE-TYPE RECEPTACLES (E.G., BEER CANS, POP BOTTLES)
140	.Noncollapsible carrier with tongue and aperture-type interlock between exterior walls
141	.Handle struck from top wall
142	.Handle retainer container mutually coact for grasping receptacles
143	..Handle means interposed between receptacles
144	.Interlocking carriers
145	.Receptacle chime, or closure cap flange, engaging type (e.g., "six-pack")
146	..Having additional retainer for disparate article
147	..Unitary retainer or foldable blank packaging unit
148	...Inwardly struck tab engages radially extending shoulder of chime or edge of cap skirt
149	...Inwardly struck tab engages inner cylindrical surface of chime
150	...Band or strand type
151	...Unitary retainer grips chime perimetrically
152	...Slots spaced along fold line from retaining apertures
153	....Only one end of retained receptacles engaged
154	....Chimes at both ends of retained receptacle held in slots
155	....Sleeve-type container with end walls
156	...Retaining flap includes periphery of blank
157	....Flap projects between rows of receptacles
158	...Rim of aperture in horizontal wall engages chime

	PORTABLE SEGREGATING CARRIER FOR PLURAL CYLINDRICAL BEVERAGE-TYPE RECEPTACLES (E.G., BEER CANS, POP BOTTLES)
	.Receptacle chime, or closure cap flange, engaging type (e.g., "six-pack")
159	..Clip-type retainer interlocks with chimes of juxtaposed receptacles
160	..Spacer abuts side and chimes of receptacles
161	..Finger-hole carrier means
162	.Pendent from handle
163	..Handle bodily shiftable vertically
164	...With hooked end
165	...Panel type
166	....Retractable into carrier
167	..Part movable to receptacle loading position
168	...Bottle neck engaged in wall aperture
169	...Retained in carrying position by handle
170	..Collapsible
171	...Having anti-collapse latch
172	....Involving middle wall
173	.....Interlock with bottom
174	...Individual receptacle positioning means
175	....Folded blank type
176	.....Multiple blanks
177	......Severable blank
178	......Separate blank forms transverse wall
179	.......U-shaped member
180	.....Center wall
181	......Horizontally and vertically folded slide flap forms transverse wall
182	......Single center wall folded from bottom
183	......Confronting center walls folded from bottom
184	......Lower margins of center walls connected at horizontal fold
185	......Center walls connected at vertically extending fold, one free end wall
186	......One center wall folded on horizontal line
187	.......Two center walls folded on horizontal line
188	......Doubled center walls folded from different end walls
189	......Side walls folded from unitary bottom wall
190	.......Transverse wall folded from center wall only
191	.......Transverse wall folded from center wall and side wall
192	..Divisible carrier
193	..Folded blank with means for receptacle compartment or spacer
194	...With apertured receptacle retaining wall
195	....Multiple receptacles in single aperture
196	....With additional receptacle separator
197	...With positioning cutout
198	...Tray with center wall forming a handle
199	..Having apertured panel for receptacle
200	..Folded blank carrier with applied handle
201	..Rigid grid support and retainer
202	...Formed of wire
203	..Molded plastic tray
77.1	WITH SOAP-HANDLING MEANS
204	WITH MOISTURE ABSORBENT
205	INCLUDING ANCILLARY ARTICLE CONTACTING MEDIUM
206	.For fastener
207	.For tool or appliance
208	..Razor
209	..Brush
209.1	...Transverse bristle
210	..Body treatment
211	.For spark plug
212	.For thermometer
213	.For apparel
213.1	.Gas medium
214	FOR PLURAL STATIONERY IMPLEMENTS
215	FOR STATIONERY OR CARBON PAPER
551	FOR PASTRY WEDGE, PER SE; E.G., PIE SLICE
219	FOR MIXING
220	.Including free mixing element (e.g., pestle)
221	.Means to manipulate without rupture
222	.Tear strip or piercer
216	COMBINED OR CONVERTIBLE
217	.Including drinking vessel
218	..Collapsible
223	.Assemblage or kit
541	..Camp or lunch type
550	...With external vent
542	...With specified nonfood characteristic; e.g., mirror
543	...With specified vacuum-type receptacle
544	...With retainer for vacuum-type receptacle
545	...With structural, or composition, insulating feature
546	...Knockdown, or nested, mess gear type
547	...With canteen container
548	...With flaccid wrapper
549	...With specified means to carry or support
568	..Specified mixture components
569	..Test (e.g., diagnostic or indicator)
570	..Therapeutic type (e.g., first aid, doctor kit)
571	...Syringe, hypodermic or catheter
572	...Material with tool
573	..Signal, lamp or reflector
574	..Needlework or dressmaking
575	..Arts, crafts or sign
576	..Household or office equipment (e.g., mixer-grinder, recording kit)
577	..Knockdown
578	..Photography
579	..Game, sport or education
580	..Lock with key
581	..Cosmetic or toilet
582	..Patch (e.g., tire, tank, roof)
224	..Draftsman or lettering
225	..Including wound, or rolled, web-like material
226	...With storage means in core
227	..Including thread or strip
228	..With razor
229	..With content applicator or dispenser
230	...Fastener and tool
231	..Including fastener
232	.Including booklet, leaflet or record means
233	.Including tissue "dispensing" means
38	.For pocket or personal use
38.1	..Key case
234	..Tools
235	..With vanity case
236	..With tobacco produt
237	...And paper
238	...And cutting or comminuting means
239	....For opening inserted package
240	....For shaving plug
241	....For cutting quid
242	FOR TOBACCO, PIPE OR CIGARETTE HOLDER
243	.Hat supported

	FOR TOBACCO, PIPE OR CIGARETTE HOLDER
244	.Pipe
245	.Laminate wall
246	.With ash holder
247	.With anti-tampering means
248	.With means for holding package or bag at different levels in outer container
249	.With ejector
250	..Content withdrawal synchronized with cover opening
251	...In casing with two hinged complementary covers
252	..Having biasing means
253	..Plunger type
254	..Having pulling means
255	..Follower type
256	.With segregating means
257	..Displaceable, resiliently joined, plural cell elements
258	..Flexible web
259	.Reinforcement or case for single cigarette package
260	.Pouch type
261	.Casing formed of two hinged complementary covers
262	..Released by translation of covers
263	..Having retaining member
264	.With opening or separating means
265	.With closure
266	..Biased
267	..Sliding
268	..Integral hinge
269	..Waterproof
270	..Telescoping
271	.Sheet-formed receptacle
272	..Twisted
273	..Folded blank
274	..Sealed
275	..Shield
276	.End cover for cigar or cigarette
277	FOR SQUEEZE TUBE (E.G., TOOTH PASTE TUBE)
81	FOR COLOR OR PAINT MATCHING
1.7	FOR ARTIST EQUIPMENT
1.8	.Paint holder (e.g., color box)
1.9	.Paint package
83	FOR TEETH
3	FOR AMMUNITION
5	FOR EYEGLASS OR SPECTACLE
5.1	.Contact lens
6	.Hinged parts
6.1	FOR JEWELRY
278	FOR APPAREL
278.1	.Cedar chest type
8	.Hat and headwear
9	..Rack, frame or ring
11	.Fur
279	.Means to hold article hanger or support
280	.Reinforced wall
281	.Indicia
282	.Means to facilitate article insertion
283	..Wall spreader or swing arm attached to panel
284	.Article hanger attachment extended from container
285	..Removable article hangers retained in spaced relation
286	..Bag-type container
287	...Article completely enclosed
287.1	....Foldable to compact use configuration
288	.Article hanger integral with container
289	.Article hanger suspended from container or attached support
290	..Plural article hangers
291	...Removable article hangers retained in spaced relation
292	.Article retainer or positioner
293	..Resilient or elastic member
294	..Aperture
295	..Tongue struck from panel
296	..Member enters opening in retained article
297	..Separate self-supporting folded blank
298	..Bar, rod or tube
299	.Single self-supporting folded blank forms container
300	FOR CLOTHES HANGER
301	FOR TIME MECHANISM OR ELEMENT
18	.Watch or clock movement
70	.Watch spring
19	SACRAMENTAL
302	FOR A TIRE VALVE OR PATCH
303	FOR AN ANNULAR ARTICLE
304	.Tire or inflated inner tube
304.1	..Flaccid encasement
304.2	..Partial encasement (i.e., portion of article remains uncovered)
305	FOR AN INSTRUMENT (I.E., MEANS TO MEASURE, TEST OR INDICATE)
306	.Thermometer
307	FOR SOUND RECORDING (I.E., TEMPLET TYPE)
308	.Music roll
15	.Phonograph cylinder
309	.Phonograph disk
310	..With spindle-like retainer
311	..Album type
312	..Jacket or folder
313	...With distinct liner, cushion or sleeve
314	FOR A MUSICAL ARTICLE
14	.Violin
315.1	FOR A SPORT IMPLEMENT, EXERCISE DEVICE OR GAME
315.2	.For a golf club
315.3	..Golf bag
315.4	...Including club head protector or cover
315.5	...Including pocket for golfing accessories
315.6	...Including means for separating club shafts
315.7	...Including means for maintaining bag in upright position
315.8	...Including side wall stiffener or reinforcement
315.9	.For a ball
315.91	..Bowling ball
315.11	.For hunting or fishing equipment
316.1	FOR AN OPTICAL DEVICE OR ELEMENT (E.G., CAMERA, TELESCOPE, BINOCULARS, MICROSCOPE, LENS, FILTER, ETC.)
316.2	.Camera
316.3	.Binoculars
317	FOR A WEAPON
318	FOR A BEARING OR JOURNAL
319	FOR A MOTOR OR ENGINE
320	FOR A HOUSEHOLD APPLIANCE
321	FOR A BUILDING COMPONENT
322	.Brick, block or tile
323	.Shingle
324	..Self-sealing type
325	.Prehung door or window
326	FOR FURNITURE OR DRAPE
327	FOR SPARK PLUG
328	FOR AN ELECTRICAL COMPONENT
329	.Engaged in wall aperture
330	.Carried on wire or flaccid strip
331	.Secured lead wire
332	.Sheet-molded compartments
333	.Battery package
334	.Box with content positioner
335	FOR A VEHICLE
336	FOR SAFETY PIN
337	FOR FORKED HAIRPIN

338 FOR A FASTENER
339 .Surgical or wound type
340 .Staple, clip, belt or lacing hook
341 ..Retained in aperture of support member
342 .Alternately reversed
343 .Flaccidly or integrally (but not severably) connected
344 ..Between lamina
345 ..Secured to common flaccid member
346 ...Plane of member normal to extent of fastener
347 ...Held by aperture in member
348 FOR HOOK, HANGER, EYE, CHAIN, BUTTON, CLASP (I.E., HABERDASHERY TYPE)
349 FOR A TOOL (E.G., KNIFE, SHAVER)
350 .Magnetic holder
351 .Powered razor
352 .Razor blade
353 ..Folded blank or wrapper
354 ..Plural blades
355 ...With blade removal means
356 ....Providing for razor coaction
357 ....Mid-blade access for finger
358 .....Alternate direction feeding
359 ...Plus container for discarded blade
360 ....Follower function for discard
361 .Brush (e.g., swab, sponge)
362 ..Plural
362.1 ...Transverse bristle
362.2 ..Transverse bristle
362.3 ...Projecting handle
15.2 ..Closure supported
15.3 ...Projecting handle
362.4 ..Folded blank
363 .Body treatment (i.e., surgical, but not cosmetic)
364 ..Syringe (e.g., enema or catheter per se)
365 ...Hypodermic or needle per se
366 ....Plural
367 ..Vaccine point
368 ..Dental
369 ...Plural
370 ..Plural or diverse
371 .Desk-clerical, drafting or engineering type
553 .Eating or kitchen type
372 .Plural
373 ..Diverse
374 ...Common handle
375 ..Common handle
376 ..Wrenches
377 ...Inserted type
378 ...Socket type
379 ..Drills or taps
380 ..Needle type (e.g., sewing, knitting and including pins, toothpicks)
381 ...Phonograph "needle"
382 ...Carried in aperture of, or pierced through, retainer
383 ....Plane of retainer normal to extent of "needles"
384 FOR GREASE GUN CHARGE OR CARTRIDGE
385 FOR LIPSTICK OR REFILL CARTRIDGE
386 WITH PALLET FEATURE
595 .With handling aperture in content
596 .Specified multiple handling aperture pairs
597 .Binder wrap for content
598 .Specified handling aperture
599 .Specified pallet legs
600 .Knockdown or collapsible type
387 FOR A SOUND TAPE CARTRIDGE OR CASSETTE
388 NONSPOOLED FILAMENTARY MATERIAL (E.G., SKEIN)
49 EMBROIDERY, LACE OR RUCHING
389 FOR ROLL OR REEL
390 .Concatenated articles
391 .Plural rolls
392 ..Yarn
393 ..Material extended between rolls
394 ..Axially aligned rolls
395 .Folded blank
396 ..Having core flap
397 .Wrapped, boxed, or secured through roll core
398 .Peripheral reel cover
399 ..Slat type
400 ..Single strip encircles reel
401 ..Sheet segments
402 ..Reel flange closes cup-like container
53 .With clamp
54 ..Centrally attached
55 ..Layer retained
403 .Complementary bodies
404 ..Quick release
405 ...Central connection
406 ....Resilient retainer
407 .Tubular housing with attached end wall
408 .With content positioner
409 .With pay-out aperture
410 .Flaccid wrapper
411 .Adhesive tape
412 .Interleaved roll components
413 .With end protector
414 ..Circumferential flange type
415 ..Core secured
416 ...Opposite end protectors to same core
417 .Batt
68 FOR AN INCANDESCENT MANTLE
418 FOR A FILAMENT OR SPACE DISCHARGE BULB OR TUBE
419 .Plural
420 ..Set
421 ..Axially aligned
422 ..Allochiral arrangement
423 FOR A PLANT, FLOWER OR TREE (INCLUDES CUT OR ARTIFICIAL)
424 FOR A BOOK
425 FILE FOR PLURAL CARDS OR SHEETS
426 FOR STEMWARE
436 FOR PLURAL TETRAHEDRON RECEPTACLES
427 FOR PLURAL BEVERAGE-TYPE RECEPTACLES
428 .Strap-type handle
429 .Container exposes one side or row of retained receptacles
430 .Coaxial, abutting receptacles
431 .Noncylindrical receptacles
432 .Shrink-type wrapper
433 .Shock protection
434 .Four-sided wrapper
435 .Inwardly moving side member
528 FOR AMPULE, CAPSULE, PELLET OR GRANULE
529 .Suppository type
530 .Single unit container
531 .Structure for "press-out" of content unit
532 .With rupture means for access
534 .With indicia or indicator
534.1 .Single layer in edge-to-edge array
534.2 ..With means for lateral access
535 .Stacked within container
536 ..Limited access by component manipulation
537 ...Pocket pen type
538 .Compartmented
539 ..Single unit
533 ...With limited access via radial face of "pill box"
540 .Plural loose content
438 FOR BODY TREATMENT ARTICLE OR MATERIAL (I.E., "SURGICAL" OR THERAPEUTIC TYPE)
439 .With gas permeable cover
440 .Bandage, drape or dressing
441 ..Short strip type
63.3 .Ligatures

	FOR BODY TREATMENT ARTICLE OR MATERIAL (I.E., "SURGICAL" OR THERAPEUTIC TYPE)
63.5	.Dental
69	FOR RUBBER BAG OR TUBE (E.G., PROPHYLACTIC)
71	FOR METALLIC LEAF
442	BALE-TIE PACKAGE
443	FOR PLURAL ROD-LIKE ARTICLES
444	FOR MAGNETIC DISC ASSEMBLY
445	FOR PLURAL DISC-LIKE ARTICLES (E.G., BOTTLE CAPS)
554	PLURAL PAPER BAGS, I.E., STACK OR PACK
446	FOR CYLINDER
447	FOR TACKY MATERIAL (E.G., FLY PAPER)
448	FOR CURVED PANEL (E.G., CURVED AUTO GLASS)
449	FOR PLATE OR SHEET
555	.With access means for manual content removal, e.g., desk tray
556	..With follower
450	.Book-type cover with attached retainer
451	.Bound or clamped package
452	..Threaded clamping member
453	.Corner or edge protector
454	.Fragile or sensitive (e.g., glass mirror)
455	..Photo film or plate
456	..Specimen or photo slide
457	WITH ORNAMENTATION OR SIMULATION
458	.Simulates wearing of article
459	WITH INDICIA OR INDICATOR
460	ARTICLE ADHESIVELY SECURED TO SUPPORT
461	ARTICLE HOUSING ATTACHED TO PANEL
462	.Housing projects from panel aperture
463	..Projecting from both sides of panel
464	.Tongue and slot-type attachment
465	..Housing flanges held in parallel slots in panel
466	.Bag-type housing
467	.Movable or detachable housing closure
468	..Sliding
469	..Frangible
470	..Hinged
471	.Housing contoured to retain article
472	BOOK-TYPE COVER WITH ATTACHED ARTICLE RETAINER
473	.Diverse retainers for one or more articles
474	.Tongue and slot-type cover closure
475	.Content inspection opening in cover
476	ARTICLE IN TONGUE OR FOLD APERTURE
477	BASE WITH ATTACHED CLASPING-TYPE ARTICLE RETAINER
478	.Pliant retainer
479	..Plural loops formed from continuous strip or strand
480	.Resiliently biased rigid retainer
481	.Rigid loop-type retainer
482	.Tongue-type retainer struck from base
483	.Diverse retainers for one or more articles
484	LAMINATE SHEET PACKET
484.1	.With gas permeable cover
484.2	.Cover of plural lamina
485	ARTICLE HELD IN APERTURES OF OPPOSED WALLS
486	ARTICLE HELD IN APERTURE IN BASE
487	.Tongue and slot-type base sample connection
488	.Supplementary retainer
489	..Sheet type
490	.Peripheral aperture
601	WITH TEAR, CUT, OR BREAK MEANS
602	.Divisible or separate contanier type
602.1	..Egg carton
603	.With attached cutter or punch
604	.Tear type
605	..With tear strip
606	...Encompassing receptacle
607	...Terminating to provide hinge
608	...Delineated by perforations or score line
609	....With diverse tear means
610	....Bag or envelope type
611	....Perforated only
612	....Score only
613	...In adhesive zone
614	...Plural
615	...With additional tear means
616	..With cord, string or wire
617	...Along seam or fold
618	....Bag or envelope type
619	.....Including content lift or draw-out arrangement
620	..Along weakened line
621	...Forms reusable closure
621.1	....Gable-top container (e.g., milk carton)
621.2	.....Pour spout
621.3	....Pour spout
621.4	.....Located in a side wall
621.5	.....Spout located in top wall at the intersection of only two side walls
621.6	.....Hinged along a line not colinear with wall edge
621.7	....Plug
621.8	....Slide
622	....Tearing plural overlying flaps
623	....Encompassing receptacle
624	....Includes three walls
625	....Includes two walls
626	....Limited to one wall
627	...Encompasses receptacle
628	...With finger accommodation means
629	...Adjacent adhesive seam
630	...Tearable member overlies weakened line
631	..Along an adhesive seam
631.1	...Forms reusable closure
631.2	....Pour spout
631.3	.....Gable-top container (e.g., milk carton)
632	...Bag or envelope type
633	...With pull tab
634	..Frangible wall portion
491	FOLDED BLANK
492	.Article folded with blank
493	RETAINER ENTERS OPENING IN ARTICLE
494	FOR FOLDED SHEET-LIKE ARTICLE
495	SUPPORT PANEL HAVING ARTICLE PINNED OR WRAPPED THEREON
37	FOR POCKET OR PERSONAL USE
37.1	.For a key
37.2	..Including external element for ejecting key
37.3	..Key frictionally retained in container
37.4	..Compartmented
37.5	..Including key retainer of two elements movable relative to each other and to the container
37.6	..Including plural, serially aligned key retainers
37.7	...Removable
37.8	..Including key retainer for common mounting of plural keys
496	.Debris (e.g., ashes)
39	.Ticket case
39.1	..With means to retain stub
39.2	...Piercing pin type
39.3	..Plural stacks, coils or fan-folded strips
39.4	..With ejector mechanism
39.5	..With opening for ejection by finger
39.6	...Pull type
39.7	..Folded card or folded sheet content

	FOR POCKET OR PERSONAL USE
	.Ticket case
39.6	..Coiled strip or fan-folded strip content
1.5	WITH STRUCTURAL LOCKING MODIFICATION
497	SHRINK FILM PACKAGE (E.G., BY HEAT OR VACUUM)
499	NESTING OR VERTICAL STACKING WITHIN CONTAINER OR WITHIN RETAINER
500	.Lamp shades, globes, reflectors
501	DIFFERENT RECEPTACLES WITH MEANS FOR STACKING
502	.Cup and saucer type
503	STRUCTURAL FEATURES FOR VERTICAL STACKING, I.E., SIMILAR RECEPTACLES
504	.Having specified means for lateral stacking
505	.Having specified means for nesting instead of stacking
506	..Selectively positioned abutment (e.g., bail or handle)
507	..By selective orientation of superposed receptacles
508	.Closure structure specified for stacking
509	.Having vertical projecting element or recess for interlock
510	..Handle type
511	..Plural distinct feet or supports type
512	..Corner lug or ear type
513	.Formed from wire or rod of reticulated body fabric
514	DIFFERENT RECEPTACLES WITH STRUCTURAL FEATURES FOR NESTING
515	STRUCTURAL FEATURES FOR NESTING IDENTICAL RECEPTACLES OR CLOSURES
516	.With separate cushion or spacer means
517	.Distortable for nesting or components of "knockdown" receptacles
518	.Noncircular receptacles (e.g., trays)
519	.Having defined means to limit extent of nesting
520	..Defined means at closed end of receptacle
557	TRAY TYPE
558	.Plural lateral array
559	.With content manipulator means
560	.With content latch means
561	.With partition
562	.With aperture for article
563	..Specified shape
564	.With recess or groove for article
565	.With article retainer
566	.For jewelry
567	.For refuse
521	SHOCK PROTECTION TYPE (E.G., FREE FALL)
521.1	.For egg, fruit, or vegetable (e.g., egg carton)
521.2	..Single item
521.3	..Including parallel partitions attached to two opposing container walls by triangular webs
521.4	...Including a transverse partition folded up from the bottom wall
521.5	..Including parallel partitions which project through openings in opposed container walls
521.6	..Item supported in an opening in a retaining element
521.7	...Item supported in openings of spaced retaining elements
521.8	..Including a curved or sloping support surface for an item
521.9	...V-Shaped
522	.Inflated retainer
523	.Foam-like retainer
524	..In situ
583	.With sling or suspension means
584	.With surround or flowable or particulate-like material, e.g., "pop corn"
585	.Stack, pile or nest arrangement
586	.With distinct corner or edge protector
587	.With groove-like support
588	.With article aperture in retainer
589	..Plural apertures for plural article
590	..Plural apertures for article
591	.With yieldable retainer
592	..Configured for article
593	..Separator between articles
594	..Distinct liner
83.5	FOR SALE
524.1	WITH SPECIFIED MATERIAL FOR CONTAINER OR CONTENT
524.2	.Plural different lamina wall
524.3	.For container lining, coating or impregnate
524.9	..Plural similar lamina
524.4	.For content inhibitor or stabilizer
524.5	.For caustic or deliquescent content
524.6	.For container
524.7	..Soluble container
524.8	EVACUATED
525	WITH ARTICLE CONTENT
526	.Plural
527	MISCELLANEOUS
	******************************
	CROSS-REFERENCE ART COLLECTIONS
	******************************
800	CHEWING GUM
802	SHIRRED SAUSAGE CASING
803	EMERGENCY (E.G., FLARE, FIRST AID, SURVIVAL PACK)
804	WITH MEANS TO LIFT OR DRAW OUT CONTENT
805	RUBBER BAND
806	SUSPENSION
807	TAMPER PROOF
809	X-TYPE
810	ZIPPER (I.E., RECEPTACLE SECUREMENT)
811	WATERPROOF
812	PACKAGED TOWEL
813	ADHESIVE
814	SPACE FILLER
815	FINGER OPENING
816	FLEXIBLE CLOSURE (E.G., SLIDING DESK TOP TYPE)
817	FOLLOWER
818	MAGNET
819	MATERIAL
820	SEPARABLE, STRIP-LIKE PLURAL ARTICLES
821	STACKING MEMBER
822	SPECIAL SHAPE
823	COSMETIC, TOILET, POWDER PUFF
824	TEAR APERTURES FOR ROLL, STRIP OR SHEET
825	RECOIL-TYPE RETAINER
828	MEDICINAL CONTENT
829	VACUUM, OR SUCTION, CUP ADJUNCT
830	BISCUIT PACKAGE
831	DETACHABLE COUPON

CLASS 208 MINERAL OILS: PROCESSES AND PRODUCTS

DECEMBER 1990

1	SYNTHETIC DRYING OILS
2	PHENOLIC OR TOXIC OILS
3	OXIDATION OF MINERAL OILS
4	.To form asphalts, tars or pitches
5	..In presence of soild contact material
6	..Tar, pitch, or asphalt feed
7	.With cracking
390	TAR SAND TREATMENT WITH LIQUID
391	.Inorganic (only) liquid
400	BY TREATMENT OF SOLID MINERAL, E.G., COAL LIQUEFACTION, ETC.
401	.Including a test or measurement
402	.Using electrical, magnetic or wave energy
403	.Chemical modification of solids before hydrogenation
404	.Using molten additive, e.g., heat carrier, etc.
405	..Molten catalyst
406	...Halide-containing
407	.Specified agitation or circulation in gas contact zone
408	..Gas includes hydrogen
409	..Vertical gas upflow, e.g., fluidization, etc.
410	...Using solid heat carrier
411	..Using solid heat carrier
412	.Plural hydrogenation steps
413	..Solid catalyst in at least one step
414	.With hydrogen production from water
415	.Including contact of feed with liquid produced in the process, i.e., recycle
416	..With discrete hydrogenation of recycle stream
417	..Recycle of bottoms (resid)
418	..Including contact with hydrogen gas
419	.Using specifically added catalyst during hydrogenation
420	..Dissolved or suspended-thermally-decomposab le catalyst, component or precursor
421	..Containing Group VI transition metal
422	...And Group VIII metal
423	..Containing Group VIII metal
424	.Specified procedure to improve separation of solids from liquid product
425	..Including centrifugation, filtering, flotation or vibration
426	.Including agglomeration, comminution or size-classification of solids
427	.Including burning of feed or product
428	.Including contact with extraneous additive other than hydrogen, e.g., solvent, etc.
429	..Distinct addition zones
430	..Contact with additive, followed by chemical conversion
431	..Specified hydrogen-donor solvent
432	..With specified circulation procedure in contact zone
433	..Simultaneous treatment with gaseous additive and liquid solvent
434	..Additive is petroleum or fraction from petroleum refining
435	..Additive is specified catalyst or liquid solvent or dispersant
12	COLORNG TREATMENTS (INCLUDES FLUORESCENCE)
13	TREATMENT OF REFINING SLUDGE
14	PRODUCTS AND COMPOSITIONS
15	.Fuels
16	..Gasolines
17	...Admixtures
18	.Lubricating oils
19	..Admixtures
20	.Waxes
21	..Admixtures
22	.Asphalts, tars, pitches and resins
23	..Admixtures
24	PARAFFIN WAX; TREATMENT OR RECOVERY
25	.With ureas
26	.With sorption agents
27	.Chemical treatment (refining or modification except mere solvent extraction)
28	.Separation of paraffin from oil (e.g., dewaxing)
29	..Emulsion dewaxing
30	..Separation of residual oil from wax (i.e., deoiling)
31	...With solvent
32	...Sweating
33	..Solvent dewaxing
34	...With deasphalting treatment
35	...With chilling by evaporation of solvent
36	...With nondewaxing solvent extraction of oil
37	..Chilling
38	...With filtering
39	ASPHALTS, TARS, PITCHES AND RESINS; MAKING, TREATING AND RECOVERY
40	.By chemical conversion of oil
41	.By distillation
42	..Tar feed
43	...By contact with hot gases
44	.Chemical modification of asphalt, tar, pitch or resin
45	.Solvent extraction
46	CHEMICAL CONVERSION OF HYDROCARBONS
47	.With prevention of corrosion or erosion in system
48 R	.With prevention or removal of deleterious carbon accumulations or equipment
48 Q	...Quench
48 AA	...Antifoulant additive
49	.Plural serial stages of chemical conversion
50	..Coking in at least one stage
51	...With reforming
52 R	...With both catalytic and thermal cracking
52 CT	.....Catalyst treatment to remove metal contaminants
53	...First stage is coking
54	....Second stage is cracking
55	.....Catalytic cracking
56	..Hydrogen donor diluent cyclic processes
57	..First stage is an hydrogenation (saturation)
58	..First stage is hydrocracking (includes hydro-desulfurization under cracking conditions)
59	...Hydrocracking in all stages
60	...With subsequent reforming
61	...With subsequent thermal or catalytic cracking
62	..First stage is reforming
63	...Reforming in all stages
64	....Catalyst in at least one stage
65	.....Noble metal containing catalyst
66	...Catalytic
67	..First stage is thermal or catalytic cracking
68	...With subsequent hydrocracking
69	...With subsequent reforming
70	....Catalytic reforming
71	...With subsequent polymerization
72	...Cracking in all stages
73	....Catalyst in at least one stage
74	.....Catalyst in multiple stages

	CHEMICAL CONVERSION OF HYDROCARBONS
	.Plural serial stages of chemical conversion
	..First stage is thermal or catalytic cracking
	...Cracking in all stages
75	....With cracking of total product from first stage
76	....With cracking of the first stage bottoms
77	....With cracking of the first stage intermediate fraction
78	.Plural parallel stages of chemical conversion
79	..At least one stage is reforming
80	..Split feed
81	.With contacting vapor porducts with liquid feed (i.e., product scrubbing and feed stripping)
82	..Only selected fractions of product or feed are contacted
83	..With subsequent fractionation
84	..With added material (to scrubbing-stripping stage)
85	.With preliminary treatment of feed
86	..Deasphalting
87	..Solvent extraction
88	..Refining
89	...With hydrogen
90	...With acids
91	...With solid absorbents
92	..Distillation
93	...With blending of products of distillation with each other or with converted products
94	...Plural stages of distillation
95	.With subsequent treatment of products
96	..Solvent extraction
97	..Refining
98	...With acids
99	...With solid adsorbents
100	..Separation of vapors and liquid products
101	...With absorption with liquid
102	...With additional separation of liquid products from primary separation zone
103	...With additional separation of vapor products
104	....With distillation of second stage liquid
105	....With condensation of second stage vapors
106	.Cracking
107	..Hydrogenative
108	...Catalytic
109	....Silica or silicate containing catalyst
110	.....With metal or metal oxide
111	......Group III metal or oxide
112	....Metal or metal oxide catalyst
113	..Catalytic
114	...Phosphorus, boron or nitrogen containing catalyst
115	...Halogen containing catalyst
116	....Metal halide
117	.....Group III metal halide
118	...Silica or silicate containing catalyst
119	....With metal or metal oxide
120	.....Group III metal or oxide
121	...Metal or metal oxide containing catalyst
122	....Group III metal or oxide
123	.....With Group VI metal or oxide
124	.....With Group VIII metal or oxide
125	..With nonreactive material
126	...Solids
127	....Suspension system
128	...Vapors
129	....Combustion gases
130	....Steam
131	..Soaking
132	..With heating in tubular confined stream
133	.Reforming (includes dehydrogenation, isomerization, cyclization, aromatization, alkylation, dealkylation reactions)
134	..Catalytic
135	...With Group III metal or metal oxide containing catalyst
136	....With Group VI metal or metal oxide
137	....With Group VIII metal or metal oxide
138	.....Noble metal or oxide thereof
139	......With halogen containing additive
140	......With recovery or reactivation of catalyst
141	...Feed of specific composition
142	.Hydrogenation (saturation)
143	..Catalytic
144	...Feed of specific composition
145	....With added source of hydrogen (includes hydrogen donor)
146	.Solids contacting and mixing
147	..Separate contiguous, dissimilar function, contacting zones
148	..Combined gravitating bed and suspension zones
149	..Solids of dissimilar composition
150	..Purging
151	...Plural stages
152	..Solids replenishment, or selective discard
153	..Suspension system
154	...Start-up and shut down procedures
155	...Plural zones of similar function
156	....Solids and contacting fluids are both in series
157	...Liquid feed
158	...With augmented turbulence (in addition to normal mixing in bed)
159	...With temperature regulation
160	....By solids circulation to external heat exchange and return to same zone
161	...Separation of entrained fines from effluents
162	....In presence of a liquid
163	...Fluidized dense bed
164	....Solids transferring
165	..Gravitating compact beds
166	...Liquid feeding
167	....Solids curtain type
168	...Solids-vapor disengagement
169	...Plural zones of similar function (same chamber)
170	...Size stratification prevention
171	...Uniform solids withdrawal
172	...Preheating or quenching with solids
173	...Solids transferring
174	....By pneumatic lifting
175	.....Compact type
176	..Solids moving processes
177	REFINING
178	.With reagent feed control
179	.Purifying used oil
180	..With added organic material
181	..Plural treating agents (sequential or simultaneous)
182	...One is a solid contact material
183	....With acid or alkali
184	..Distillation or degassing
185	...With gaseous treating agent
186	...With solid-liquid separation
187	.Water removal (dehydration)

	REFINING
	.Water removal (dehydration)
188	..With treating agent
189	.Sweetening
190	..With hypochlorites
191	..With copper compounds
192	...With preliminary treatment of oil
193	...With subsequent treatment of the sweet oil
194	....Separation or recovery of copper compound
195	...Copper chloride and free oxygen containing gas
196	..With peroxides
197	..With lead compounds
198	...Lead sulfide
199	...Sodium plumbite
200	....With preliminary treatment of the oil
201	....With subsequent treatment of the sweet oil
202	.....Organic treating agent
203	..With alkali metal hydroxide or carbonate
204	...With added oxygen containing organic compound
205	....Acyclic alcohol
206	...With added nitrogen containing compound
207	..Nitrogen containing compound
208 R	.Sulfur removal (free or combined sulfur)
208 M	...Using free alkali metal
209	..With hydrogen
210	...Plural stage treatments with hydrogen
211	...With preliminary treatment of feed
212	...With subsequent treatment of product
213	...With solid catalyst or absorbent
214	....With hydrogen yielding material (H donor)
215	....With heavy metal sulfide
216 R	....With group VI metal or compound
216 PP	......With specific porosity or pore volume
217	....With Group VIII metal or compound
218	..Split treatment
219	..With acids
220	...Plural stages of sulfur removal
221	...With preliminary treatment of feed
222	...With subsequent treatment of product
223	...Inorganic acid
224	....Sulfuric acid
225	....Hydrochloric acid
226	..With alkali or alkali earth metal compound (except clays)
227	...Plural stages of sulfur removal
228	...With preliminary treatment of feed
229	...With subsequent treatment of product
230	...Alkali metal compound
231	....With added oxygen containing organic compound
232	.....Alcohol containing
233	......With other organic compound
234	.....With regeneration of treating agent
235	....With regeneration of treating agent
236	..With nitrogen containing treating reagent
237	..With organic reagent
238	...Hydrocarbon containing
239	...Heavy metal soap containing
240	...Oxygen containing
241	..With free halogen or nonmetal halide containing reagent
242	..With sulfur oxides
243	..With Group VI metal or compound
244	..With Group VIII metal or compound
245	..With silicon or compound thereof
246	..With Group IB metal or compound
247	..With Group IIB metal or compound
248	..With Group III metal or compound
249	..With Group IV, V, VII metal or compound
250	..Solids contacting and mixing
251 R	.Metal contaminant removal
251 H	...Employing hydrogen
252	..With acid
253	..With metal or metal compound
254 R	.Nitrogen contaminant removal
254 H	...Employing hydrogen
255	.Gum or gum former removal
256	..With acid
257	..With metal or metal compound
258	...Alkali metal
259	...Alkali or alkali earth metal compound (except clays)
260	...Clay type or alumina
261	....Vapor phase treatment
262.1	.Halogen contaminant removal
262.5	..Polychorinated biphenyl (PCB)
263	.Organic acid or phenol contaminant removal
264	.With hydrogen
265	.With acids
266	..Sulfuric acid
267	...With fluid rotation or agitation
268	...White oil making
269	...Split treatment
270	...Plural stages of acid treatment
271	...With preliminary treatment of the oil
272	....Fractionation
273	...With subsequent treatment of the oil
274	....Organic treating agent
275	....Solid absorbent
276	...With nonwater additive
277	....Organic compound
278	....Solid contact material
279	..Phosphorus containing acid
280	..Halogen containing acid
281	...Hydrochloric acid
282	..Organic acid
283	.With alkali or alkali earth metal compound (except clays)
284	..Alkali metal compound
285	...With preliminary treatment of the oil
286	...With subsequent treatment of the oil
287	...With solid carrier
288	...With added material
289	.With nitrogen containing compound
290	.With organic compound
291	..Oxygen containing
292	.With boron, phosphorus, arsenic, antimony or bismuth containing treating agent
293	.With sulfur containing treating agent
294	.With free metal
295	.With Group IV, V, VI, VII or VIII metal compound
296	.With Group IB or IIB metal compound
297	.With Group III metal compound (except clays)
298	.With liquid treating agent (includes slurries of solids)
299	.With solid catalyst or absorbent
300	..Of particular physical shape or structure
301	..With preliminary treatment of the oil
302	..With subsequent treatment of the oil
303	..Plural treating stages
304	..Processes including downward movement of particles
305	..Solids rehabilitation
306	..Composite or plural treating agents
307	..Silicon or carbon containing treating agent
308	FRACTIONATION
309	.Deasphalting

FRACTIONATION
310 R .Adsorption
310 Z ...Zeolite adsorbent
311 .Liquid extraction with solvents
312 ..With blending of separated fractions with each other or with feed
313 ..Extractive distillation
314 ..Plural stages with different oil miscible solvents
315 ...With recycle of product of later extraction to earlier extraction stage
316 ...Difference is mere change in proportions of solvents
317 ..Counter current multistage extraction
318 ..With recycle of oil
319 ..With pressure variation
320 ..With temperature gradient in extraction zone or between extraction zones
321 ..With solvent rehabilitation
322 ..Organic solvent containing
323 ...With added solvent or solvent modifier
324 ....Inorganic
325 ...Heterocyclic
326 ....Hetero-N-containing
327 ....Furfural and derivatives
328 ...Nonoxo carbonylic
329 ....Carboxylic esters
330 ...Nitrogen-containing solvent
331 ....Amino compound
332 ...Oxo compound containing
333 ...Oxy compound
334 ....Ethers
335 ....Aromatic
336 ...Halogen containing
337 ...Hydrocarbon
338 ..Liquid sulfur dioxide
339 ..Liquid-liquid contacting
340 .Recovery of mineral oil from natural or converted gases
341 ..By absorption and vaporization
342 ...With fractional condensation prior to absorption
343 ...Indirect heat exchange between lean and rich absorbent
344 ...Plural absorption stages
345 ....At least one stage is under pressure
346 ...Absorption stage is under pressure
347 .Distillation
348 ..With nonvapor compound added prior to or during vaporization
349 ..With nonvaporization treatment of liquid condensate or residue
350 ..Rectification
351 ...C1-C4 alkane removal
352 ...Flash vaporizaton
353 ...With heat recovery by indirect heat exchange
354 ...Plural or combined with additional distillation
355 ....With product recycle between distillation zones
356 ...With added gas or vapor (e.g., steam)
357 ...Vacuum or pressure
358 ...With liquid product recycle to rectification zone
359 ..Spraying
360 ..Filming
361 ..Flash vaporization
362 ..With added gas or vapor
363 ...Steam
364 ..Plural stages of vaporization
365 ...With heat recovery by indirect heat exchange
366 ..Vacuum or pressure
367 ..With agitation of distilland
368 ..Condensatin by direct heat exchange
369 ..Volatile treatment other than condensation

509	SORTING SPECIAL ITEMS, AND CERTAIN METHODS AND APPARATUS (E.G., POCKET TYPE AND LIGHT RESPONSIVE SORTING, ETC.) FOR SORTING ANY ITEMS
510	.Sorting eggs or components thereof
511	..Radiant energy sensing means controls separating means
512	..By weight
513	...Sensing egg weight and controlling separating means in accordance therewith
514	...Orbiting or rotating carrier responsive to egg weight
515	....Carrier tilted by means (e.g., trip, cam, etc.) adjacent travel path when depressed to particular elevation
516	...Same eggs successively placed on means (e.g., balance beams, etc.) responsive to different weights
517	.Sorting lumber, logs, pipes, rails, or like items
518	..Condition responsive means controls separating means
519	...Relatively movable calipers closed against item
520	...Sensor responsive to item contact
521	..With endless conveyer belt
522	.Sorting bottles, ampoules, jars, drinking vessels, or like ceramic or glass containers
523	..Condition responsive means controls separating means
524	...Sensing radiant energy reflected, absorbed, emitted, or obstructed by item or adjunct (e.g., label, cap, etc.) thereof
525	....Sizing with visible light beam
526	....Detecting internal flaw (e.g., air bubble, crack, etc.) in wall of item
527	.....By means of radio frequency radiation
528	....Detecting flaw in, or absence or misplacement of, label on item
529	...Sensing position, shape, or presence of closure
530	...Sensor contacts item
531	....Gauge
532	.....Plug
533	.....Relatively movable calipers closed against item
534	.Sorting paper money
535	.Sorting cigarettes, cigars, or packages thereof
536	..Sensing radiant energy reflected, absorbed, emitted, or obstructed by item or adjunct thereof

SORTING SPECIAL ITEMS, AND CERTAIN METHODS AND APPARATUS (E.G., POCKET TYPE AND LIGHT RESPONSIVE SORTING, ETC.) FOR SORTING ANY ITEMS
.Sorting cigarettes, cigars, or packages thereof
537 ..Fluid or vacuum sensing means controls separating means
538 .Nonconveying driven means for turning item at separating or inspecting station to facilitate sorting
539 .Traveling items shifted to form line, or into end or edge alignment, to facilitate inspection or separation
540 .Traveling item turned to predetermined position
541 ..Plural orienting means
542 ..Reciprocable or pivotable orienting means
543 ..Fluid orienting means
544 ..Means orienting item moved by gravity
545 ..Driven orienting means
546 .Signalling, indicating, or display means
547 ..Indicia associated with cards, file folders, or like coded items, or with sorting means therefor (including cards per se with edge coding)
548 ..Operation of apparatus stopped
549 ..Signal lamp or audible alarm
550 ..Indicating scale
551 ..Item counter
552 .Condition responsive means controls separating means
553 ..Cards or sheets separated by rotatable suction drum
554 ..Sorting cards or sheets coded by perforations
555 ..Diverse
556 ...Diverse electrical tests
557 ...Including noncondition-responsive separating means
558 ...At single station
559 ..Means (e.g., information storing device, timer, delaying relay, etc.) delaying actuation of separating means
560 ...Mechanical
561 ....Rotatable pin carrier
562 ...Magnetic
563 ....Electrical
564 .....Electronic
565 ......Shift register
566 ....Controlled by article
567 ..Magnetic test sensing property of item
568 ...Magnetic core tested
569 ...Reading indicia
570 ...Permeability
571 ..Electrical test sensing property of item
572 ...Detecting flaw in dielectric
573 ...Electrical component tested
574 ....Resistor or capacitor
575 ....Lamp or battery
576 ..Sensing radiant energy reflected, absorbed, emitted, or obstructed by item or adjunct thereof
577 ...Infrared, visible light, or ultraviolet
578 ....Ultraviolet
579 ....Laser
580 ....Color detection
581 .....Intensity
582 ......Measuring ratio of sensed intensities
583 ....Reading indicia
584 .....On mail
585 ....Mirror or prism in optical path
586 ....Sizing
587 ....Reflected from item
588 ....Transmitted through item
589 ...X-ray or gamma ray
590 ...Sonic or supersonic energy
591 ..Sensing by applying fluid or vacuum to item
592 ..Responsive to weight of item
593 ...Detecting movement of item support with electrical sensor
594 ....Photodetector
595 ....Switch
596 ...Pusher or deflector controls movement of item on separate support
597 ..Sensing position, shape, or presence of closure or end wall on container
598 ..Sensing contour of item having no missing parts
599 ..Sorting items according to susceptibility to deform (e.g., malleability, hardness, compressibility, etc.), rupture, or vibrate
600 ..Sensor contacts item
601 ...Gauge
602 ....Relatively movable calipers closed against item
603 ....Sheet gauging
604 ....Sensor generates electrical signal
605 .....Items separated into at least three classes
606 .Separating means
607 ..Corn silk separator
608 ..Sorting items according to edge coding
609 ...Magnet attracts or repels item
610 ...Keyboard control
611 ...Cards, file folders, or like items sorted by means of necked-down notch thereon
612 ...Cards, file folders, or like items alternatively having notch or hole at particular location thereon
613 ..Sorting cards, file folders, or like items having coded sorting holes
614 ..Hand supported implements
615 ..Brush, flail, or rake used other than as one of opposed pair of gauge elements to separate, or to facilitate separation of, items
616 ...Rotatable
617 ..Item gripped between opposed elements
618 ...Rollers
619 ..Gauge enters hole in item
620 ..Gauging passage between orbiting belts
621 ..Rotating or orbiting carrier having expandable gauging passage passing items of different size at different points along carrier travel path
622 ...Belt
623 ....With gauging pocket for individual item
624 .....Pocket formed by rollers, disks, or wheels spaced transversely of belt or by contoured transverse roller, bar, or slat
625 ..Gauge with clearer other than continuous feeder
626 ...Spacing between gauge elements increased to free item
627 ...Rotatable or pivotable clearer
628 ...Stationary clearer
629 ..Diverse
630 ...Including means supporting items for manual sorting or allowing operator to control item destination

SORTING SPECIAL ITEMS, AND CERTAIN METHODS AND APPARATUS (E.G., POCKET TYPE AND LIGHT RESPONSIVE SORTING, ETC.) FOR SORTING ANY ITEMS

.Separating means

..Diverse

631 ...Including separation effected by items following different trajectories through space

632 ...Including separation effected by item of particular size passing through gauging passage between separate elements

633 ....Stationary elements

634 ...Including separation effected by item of particular size passing through gauging aperture in wall (e.g., perforated panel, etc.)

635 ...Including separation effected by different items traveling in different directions while contacting a surface

636 ..Magnet attracts or repels item

637 ..Items thrown or falling through space strike surface and only some rebound

638 ..Items separate by following different trajectories through space

639 ...Fluid jet changes trajectory of item

640 ...Items thrown or falling through space strike surface and rebound with different trajectories

641 ...Takeoff ramp adjustable to different angular positions relative to horizontal plane

642 ...Thrower

643 ..Suction

644 ..Fluid jet

645 ..Sorting items by weight

646 ...Orbiting or rotating carrier responsive to item weight

647 ....Counterbalance on balance beam moved until beam tilts to item discharging position

648 ....Carrier tilted by means (e.g., trip, cam, etc.) adjacent travel path when depressed to particular elevation

649 ...Same items successively placed on means (e.g., balance beams, etc.) responsive to different weights

650 ...Item support swings about fixed horizontal axis to discharge at different vertically spaced points

651 ..Pusher moving item on separate surface

652 ...Pivotable

653 ...Reciprocable

654 ...Rotatable

655 ..Gravity-type conveyer (e.g., chute, etc.) movable between different discharge positions

656 ..Movement of items along different paths controlled by passive deflector

657 ...Deflector movable into and out of path of item

658 ...Deflector spaced above conveying means to pass item of particular size thereunder

659 ..Sorting items by size

660 ...Item of particular size passed through gauging passage between separate elements

661 ....Gauging passage between stationary element (e.g., bar, slat, etc.) and orbiting belt

662 ....Gauging passage between stationary element (e.g., bar, slat, etc.) and roller

663 ....Gauging passage between orbiting belt and roller or wheel

664 ....Gauging passage between elements of rotating cage

665 ....Gauging passage between elements of orbiting belt

666 ....Item moves along curved gauging passage

667 ....Gauging passage between rotatable elements

668 .....Element adjustable to change width of gauging passage

669 .....Helical roller

670 .....Items move longitudinally of gauging passage varying in width along length thereof

671 .....Spindle or roller having projecting elements spaced circumferentially thereof

672 .....Spindle or roller having axially spaced, flat-sided circumferential elements (e.g., flanges, disks, wheels, etc.) projecting therefrom

673 .....Cylindrical rollers

674 ....Gauging passage between moving elements (e.g., vibrating bars, slats, etc.)

675 ....Gauging passage between stationary elements (e.g., bars, slats, etc.)

676 .....Element adjustable to change width of gauging passage

677 .....Items move longitudinally of elongate elements

678 ......With means moving, or regulating movement of, items along elements

679 ......Width of gauging passage varies

680 ...Item of particular size passed through gauging aperture in wall (e.g., perforated panel, etc.)

681 ....Aperture in orbiting belt

682 ....Aperture in chute or trough

683 ....Aperture in circumferential wall of hollow body (e.g., tube, etc.) rotatable about longitudinal axis thereof

684 ...Item of particular size or shape enters pocket

685 ....On orbiting belt

686 ....On exterior of drumlike body (e.g., roller, etc.) rotatable about longitudinal axis thereof

687 ....On interior of hollow drumlike body (e.g., tube, etc.) rotatable about longitudinal axis thereof

688 ..Means pierces, or enters preformed hole in, item

689 ..Items separate by traveling in different directions while contacting drumlike body (e.g., roller, hollow cylinder, etc.) turning about longitudinal axis thereof

690 ...Items travel circumferentially and longitudinally of turning axis

691 ..Items separate by traveling in different directions while contacting same inclined surface of moving support

692 ...Items contact inclined reach of orbiting belt

693 ....Item separating reach inclined only in direction of belt movement

694 ...Translating support

SORTING SPECIAL ITEMS, AND CERTAIN METHODS AND APPARATUS (E.G., POCKET TYPE AND LIGHT RESPONSIVE SORTING, ETC.) FOR SORTING ANY ITEMS
.Separating means
695 ..Items separate by traveling in different directions while contacting same horizontal surface of moving support
696 ..Items separate by traveling in different directions while contacting same inclined surface of static support
697 ...Helical ramp
698 ..Means movable between horizontal item-supporting position and gravity discharge position
699 ..Sorting items according to susceptibility to deform (e.g., malleability, hardness, compressibility, etc.), rupture, or vibrate
700 ..Sorting items according to roughness or adhesiveness
701 ..Item turned while traveling
702 ..Manual sorting
703 ...Item supported on table or chute
704 ....Rotated about vertical axis
705 ...Item supported on orbiting or rotating carrier
706 ..Specific compartment of receptacle brought into alignment with feed means by operator
707 ..Items separated by tipping, rolling, or sliding off support under force of gravity
